Alemite Corporation. (See Dosch, Peter, assignor.)
Alger, Harley C., assignor to R. R. Donnelley & Sons Company, Chicago, Ill. Ink fountain for printing presses. 1,780,694; Nov. 4.
Alger, Harley C., assignor to R. R. Donnelley & Sons Company, Chicago, Ill. Ink fountain for printing presses. 1,780,695; Nov. 4.
Alland, Maurice, Atlantic City, N. J. Top. 1,780,547; Nov. 4.
Allen, Lavont C. (See Jennings, C. S., and Allen.)
Alliance Machine Company, The. (See Keller, W. D., and Poto, assignors.)
Alvin Corporation, The. (See Staf, Axel H., assignor.)
American Bicheroux Company, The. (See Heuze, Charles, assignor.)
American Brass Company. (See Oxer, George C., assignor.)
American Cyanamid Company. (See Bradley, Theodore F., assignor.)
American Electrical Heater Company. (See Kuhn, Frank, assignor.)
American Iron & Machine Works, Inc. (See Lincoln, Robert A., assignor.)
American Laundry Machinery Company, The. (See Staley, Alonzo D., assignor.)
American Radiator Company. (See Dillman, Earnest J., assignor.)
American Steel and Wire Company, of New Jersey, The. (See Coons, P. T., and Rose, assignors.)
American Telephone and Telegraph Company. (See Green, Estill I., assignor.)
American Telephone and Telegraph Company. (See Reynolds, Frederick W., assignor.)
American Telephone and Telegraph Company. (See Ritter, Paul E., assignor.)
American Telephone and Telegraph Company. (See Roberts, Leland C., assignor.)
American Thread Company, The. (See Clark, Robert K., assignor.)
Ames, Caroline F., administratrix. (See Ames, Elmer U.)
Ames, Elmer U., deceased, Collingswood, by C. F. Ames, administratrix, Haddonfield, N. J. Knitting machine. 1,780,328; Nov. 4.
Amsler, Alfred J., Schaffhausen, Switzerland. Testing machine. 1,780,696; Nov. 4.
Anderson, Arvid E., Scotia, N. Y., assignor to General Electric Company. Control system. 1,780,664; Nov. 4.
Anderson, Carl E., East Orange, assignor to Eastern Tool & Mfg. Co., Bloomfield, N. J. Stand. 1,780,163; Nov. 4.
Anderson, Carl J., Chicago, Ill. Motor-controlling device. 1,780,612; Nov. 4.
Anderson, Clifford E., Brainerd, Minn. Can-top lock. 1,780,575; Nov. 4.
Anderson, Irvin W. (See Kettmann, A. P., and Anderson.)
Anderson, James A., et al. (See Dickson, George A., assignor.)
Anderson, Perry, Milwaukee, Wis. Toy parachute. 1,780,734; Nov. 4.
Anderson, Raymond T., assignor to The V. D. Anderson Company, Cleveland, Ohio. Feeding mechanism for presses. 1,780,218; Nov. 4.
Anderson, V. D., Company, The. (See Anderson, Raymond T., assignor.)
Andres, Lloyd J., assignor of one-half to E. E. Rullman, Chicago, Ill. Continuous sound-reproducing apparatus. 1,780,414; Nov. 4.
Andrews, J. Lewis, Elmwood Park, assignor to Stewart-Warner Corporation, Chicago, Ill. Vacuum fuel-feed device. 1,780,290; Nov. 4.
Appel, Saul C., Medford, Mass. Universal radiator bracket. 1,780,162; Nov. 4.
Apple, Vincent G., Dayton, Ohio. Friction device. 1,780,455; Nov. 4.
Apple, Vincent G., Dayton, Ohio. Winding dynamo-electric-machine elements. 1,780,456; Nov. 4.
Archer, Merton T., Pittsburgh, Pa., assignor to The National Supply Company, Toledo, Ohio. Intermittent gas-lift pump. 1,780,808; Nov. 4.
Armour Fertilizer Works. (See King, William B., assignor.)
Arps, Bruno, New Holstein, Wis. Traction lug. 1,780,518; Nov. 4.
Art Metal Construction Company. (See Larson, O. J., and Jones, assignors.)
Asbestos Panels Corporation. (See Lanhoffer, Edmond O., assignor.)
Ashe, William O., St. Louis, Mo., assignor, by mesne assignments, to General Steel Castings Corporation, Granite City, Ill. Locomotive structure. 1,780,457; Nov. 4.
Ashworth Advertising Company. (See Ashworth, John W., assignor.)
Ashworth, John W., assignor to Ashworth Advertising Company, Incorporated, New York, N. Y. Safety-razor-blade holder. 1,780,549; Nov. 4.
Astrup, Andrew, and W. Astrup, Racine, Wis. Headlight. 1,780,548; Nov. 4.
Astrup, William. (See Astrup, Andrew and W.)
Attinger, Stephen J., Sharpsburg, Pa. Picture frame. Des. 82,410; Nov. 4.
Attwood, Charles E., assignor to Postindex Company, Inc., Jamestown, N. Y. Paper file. 1,780,735; Nov. 4.
Autodrink Corporation, The. (See Smith, Harry C., assignor.)
Axe, Roy T., assignor to The O. M. Edwards Company, Inc., Syracuse, N. Y. Ventilator construction for window frames. 1,780,665; Nov. 4.
Babcock & Wilcox Company, The. (See Jacobus, D. S., and Jones, assignors.)
Babcock & Wilcox Company, The. (See Jones, William A., assignor.)
Babcock & Wilcox Company, The. (See Kerr, Howard J., assignor.)
Badger, E. B., & Sons Company. (See Peters, William A., jr., assignor.)
Bagasse Development Inc. (See Horn, Harry L., assignor.)
Bailey, Percy S., Marblehead, Mass., assignor to General Electric Company. Flood-lighting device. 1,780,666; Nov. 4.
Baker, John C., Lake Bluff, assignor to Fansteel Products Company, Inc., North Chicago, Ill. Breaker mechanism. 1,780,415; Nov. 4.
Baltimore Gas Engineering Corporation. (See Friend, Wayne Z., assignor.)
Bany, Herman, Yeadon, Pa., and G. R. McDonald, Schenectady, N. Y., assignors to General Electric Company. Synchronizing apparatus. 1,780,667; Nov. 4.
Barclay, Colin T. (See Barclay, John G., and C. T.)
Barclay, John G., and C. T., Kilmarnock, Scotland. Engine drain or compression relief valve. 1,780,857; Nov. 4.
Bard, Francis N., Highland Park, Ill. Reversing-gear mechanism. 1,780,329; Nov. 4.
Barker, William T., jr., assignor to Hartford-Empire Company, Hartford, Conn. Composite plunger for glass feeders. 1,780,550; Nov. 4.
Barnickel, Wm. S., & Company. (See De Groote, M., and Monson, assignors.)
Barnickel, Wm. S., & Company. (See De Groote, M., Monson, and Wirtel, assignors.)
Barrett Blue Blaze Burner Co. (See Barrett, James J., assignor.)
Barrett, James J., White Plains, N. Y., assignor to Barrett Blue Blaze Burner Co., Inc. Oil burner. 1,780,219; No. 4.
Bartlett Hayward Company, The. (See McGurty, William J., assignor.)
Bartlett Hayward Company, The. (See Wagner, Frederick H., assignor.)
Barton, Theophilus F., Upper Montclair, N. J., assignor to General Electric Company. System of electric distribution. 1,780,668; Nov. 4.
Basch, Arthur C. (See Kelly, William J., assignor.)
Bassett, Edward W., assignor to The Celma Company, Toledo, Ohio. Compact. 1,780,736; Nov. 4.
Batchell, George W., Toledo, Ohio. Glass tank. 1,780,164; Nov. 4.
Bateman, Arthur T., and A. Irvine, assignors to Bohn Aluminum & Brass Corporation, Detroit, Mich. Molding apparatus. 1,780,514; Nov. 4.

Bateman, William H. (See Leach, R. W., and Bateman.)
Bateson, Thomas H., assignor to Multibestos Company, Walpole, Mass. Clutch-ring-shearing machine. 1,780,259; Nov. 4.
Bauer, Eugene C. (See McKee, W. S., and Bauer.)
Bauer, Gustav, and C. Schmieske, Hamburg, Germany. Regulating device for liquid couplings. 1,780,613; Nov. 4.
Bauer, Harry E. (See Costuma, J. A., Bauer, and Lovercheck.)
Baughman, George W., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,780,737; Nov. 4.
Baumberger, William J. (See Yerk, H. H., and Baumberger.)
Baumgartner, Henry H., Belleville, N. J., assignor to Drake Non-Clinkering Furnace Block Company, Inc., New York, N. Y. Steam generator. 1,780,220; Nov. 4.
Baxter, Leon H., Hudson, Ohio. Toy ship. Des. 82,411; Nov. 4.
Bay, Frank N. (See Watts, C. T., and Bay.)
Bayerl, Alfons. (See Becker, F., Helmann, and Bayerl.)
Beach, Willard C., Newark, N. J. Spray nozzle. 1,780,738; Nov. 4.
Bearens, Claude, Brooklyn, N. Y. Power transmission. 1,780,858; Nov. 4.
Becker, Franz, H. Helmann, and A. Bayerl, Dessau in Anhalt, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Esterifying cellulose. 1,780,151; Nov. 4.
Belden, Clements G. (See Frehse, A. W., and Belden.)
Bell & Gossett Company. (See Jones, David J., assignor.)
Bell Telephone Laboratories, Incorporated. (See Bernhard, Lucian, assignor.)
Benczalski, Wojciech, Eureka, Calif. Pencil sharpener. 1,780,371; Nov. 4.
Benjamin, Harry S., Detroit, Mich. Coin-controlled weighing machine. 1,780,165; Nov. 4.
Bennett, Clifford, Richmond, New South Wales, Australia. Reversible steam turbine engine. 1,780,458; Nov. 4.
Benton, Edward A., and M. Linderner, Altoona, Pa. Piston ring. 1,780,697; Nov. 4.
Benzle, Margaret L., New York, N. Y. Corset-steel protector. 1,780,859; Nov. 4.
Berendes, Rudolf, and L. Schütz, Elberfeld, Germany, assignors to Winthrop Chemical Company, Inc., New York, N. Y. Betainethiocyanate. 1,780,860; Nov. 4.
Berg, Hans, Grand Rapids, Mich., assignor to Kellogg Switchboard & Supply Co., Chicago, Ill. Cabinet. Des. 82,413; Nov. 4.
Berg, Joseph, Long Island City, N. Y. Insulating block. 1,780,739; Nov. 4.
Bergmann, Conrad, Phidadelphia, assignor to Columbia Steel Equipment Company, Philadelphia, Pa. Follower block. 1,780,861; Nov. 4.
Berlin, Harry, Brooklyn, N. Y. Braided waved braid. 1,780,515; Nov. 4.
Berlinger, Jacob, Brooklyn, N. Y. Finger ring or similar article. Des. 82,470; Nov. 4.
Bernhard, Lucian, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Desk stand for a hand telephone. Des. 82,414; Nov. 4.
Bernhard, Richard, assignor to Traylor Engineering & Manufacturing Company, Allentown, Pa. Gyratory crusher. 1,780,459; Nov. 4.
Bess, Charles, Dunsmuir, Calif. Derailing frog. 1,780,372; Nov. 4.
Bester, Leonard R., Long Island City, N. Y. Locomotive power plant. 1,780,516; Nov. 4.
Beuttell, Alfred W., Norbury, England. Illuminating device. 1,780,373; Nov. 4.
Birch, William M., assignor to Mid-States Steel & Wire Co., Crawfordsville, Ind. Wireworking machine. 1,780,374; Nov. 4.
Birnbaum, Henry, Shelton, Wash. Blowtorch. 1,780,152; Nov. 4.
Blackman, Birt G., assignor of one-third to C. Redfield, Ogden, Utah. Vacuum tube. 1,780,698; Nov. 4.
Blair, Robert S., Stamford, Conn. Soap cake and art of making same. 1,780,330; Nov. 4.
Bleichert, Adolf, & Co., A. G. (See Müller, Max, assignor.)
Bloomfield, Russell C. (See O'Farrell, Thomas, assignor.)
Bloss, Richard R., Columbus, Ohio. Metal sheeting. 1,780,862; Nov. 4.
Blum, Albert, Rapperswil, Switzerland, assignor, by mesne assignments, to Aktiengesellschaft für mechanische Knüpfteppiche System Boyer, Zurich. Knotting device for machines for manufacturing knotted carpets. 1,780,740; Nov. 4.
Blume, William R. (See Dreyfus, C., and Blume.)
Bodle, Virgil H. (See Richardson, C. M., and Bodle.)
Bohl, Hugo, Westfield, N. J., assignor to Radiant Lighting Fixture Co. Inc., New York, N. Y. Lighting fixture or article of similar nature. Des. 82,415; Nov. 4.
Bohn Aluminum & Brass Corporation. (See Bateman, A. T., and Irvine, assignors.)
Boiler Equipment Company. (See Miller, Don M., assignor.)
Bolster, Calvin M., Lakehurst, N. J. Pump. 1,780,614; Nov. 4.
Bond, Joseph E., Appleton, Wis. Agitator. 1,780,166; Nov. 4.
Boorum & Pease Company. (See Mortensen, Jens N., assignor.)
Boston Wire Stitcher Company. (See Maynard, Arthur H., assignor.)
Bovaird & Company. (See Hall, Frank H., assignor.)
Bowen, James, Swansea, Wales. Air cooling the cylinders of internal-combustion engines. 1,780,809; Nov. 4.
Boynton, Lysle G. (See Kallin, W. E., and Boynton.)
Bradford, Jefferson, and C. B. Peoples, Butler, Ky. Foot guard. 1,780,331; Nov. 4.
Bradley, Theodore F., Westfield, N. J., assignor to American Cyanamid Company, New York, N. Y. Treating porous and nonporous materials. 1,780,375; Nov. 4.
Braeburn of Rochester, Inc. (See Elsfeld, Emanuel M., assignor.)
Brahy, Charles, assignor to C. E. Marion, New York, N. Y. Automatic liquid-fuel dispenser. 1,780,292; Nov. 4.
Brickhill, Everard C., North Fitzroy, Australia. Water sprinkler. 1,780,332; Nov. 4.
Briney, Barton H., Indiana Harbor, Ind. Heating boiler. 1,780,576; Nov. 4.
Brooks, William H., Oconomowoc, Wis., and W. Page, New York, N. Y. Apparatus for agitating the contents of storage vessels. 1,780,333; Nov. 4.
Brower, William M., Palo Alto, assignor to Federal Telegraph Company, San Francisco, Calif. Radiotransmitting apparatus. 1,780,167; Nov. 4.
Brown, Charles W., San Diego, Calif. Closet-flushing device. 1,780,810; Nov. 4.
Brown Company. (See Richter, George A., assignor.)
Brown, Harry E., Wichita, Kans., assignor to A. H. Nellson, Tulsa, Okla. Grab for drill rods and the like. 1,780,699; Nov. 4.
Brown, Robert S., assignor, by mesne assignments, to The New Britain-Gridley Machine Company, New Britain, Conn. Metal-working machine. 1,780,889; Nov. 4.
Brückel, Waldemar, and R. Schimpf, Berlin, Germany, assignors to General Electric Company. Frequency-responsive signal-receiving apparatus. 1,780,660; Nov. 4.
Brush, Alanson P. (See Nacker, Owen M., assignor.)
Buchmann, John, Hamilton, Ohio. Brush. 1,780,221; Nov. 4.
Buehler, Brownell, Philadelphia, Pa., assignor to Noble & Wood Machine Company. Hoosick Falls, N. Y. Jordan plug. 1,780,863; Nov. 4.
Bull, Arthur W., Naugatuck, Conn., assignor to The Dorr Company, New York, N. Y. Impeller agitator. 1,780,551; Nov. 4.
Bull, Frederic, and F. White, Walsall, England. Nonskid device for the wheels of road vehicles. 1,780,864; Nov. 4.
Bullard Company, The. (See Bullard, E. P., jr., and Kolb, assignors.)
Bullard, Edward J., jr., Stratford, and G. F. Kolb, assignors to The Bullard Company, Bridgeport, Conn. Clutch. 1,780,222; Nov. 4.
Burdick, Earl S., Milwaukie, L. P. Byrne, Portland, and F. W. Chausse, Salem, Oreg. Bottle-capping machine. 1,780,639; Nov. 4.
Burmeister, Hans, Berlin, Germany, assignor to Pyrene-Minimax Corporation. Device for distributing foam for fire-extinguishing purposes. 1,780,168; Nov. 4.
Burnelli, Vincent J., New York, N. Y., assignor to The Uppercu-Burnelli Corporation. Retractible landing gear. 1,780,811; Nov. 4.
Burnelli, Vincent J., New York, N. Y., assignor to The Uppercu-Burnelli Corporation. Airfoil and fuselage connection. 1,780,812; Nov. 4.
Burnelli, Vincent J., New York, N. Y., assignor to The Uppercu-Burnelli Corporation. Airplane. 1,780,813; Nov. 4.
Burnett, Waldo B. (See Williams, I., and Burnett.)
Burnett, Waldo B., and I. Williams, Pittsburgh, Pa., assignors, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Aldehyde amine condensation product. 1,780,334; Nov. 4.
Burnett, William, jr., Marion, assignor to Modern Coal Burner Co., Chicago, Ill. Portable electric lamp. 1,780,779; Nov. 4.
Burns, William, Glasgow, Scotland. Lateral splash guard for road vehicles. 1,780,640; Nov. 4.
Burtnett, Everett R., Pasadena, Calif. Engine clutch-control-actuated speed-change mechanism for transmission gearing. 1,780,460; Nov. 4.
Bush, Wilfred E., et al. (See Christy, Arley B., assignor.)
Byars, George W., Lexington, N. C. Window screen. 1,780,461; Nov. 4.
Byrne, Lewis P. (See Burdick, E. S., Byrne, and Chausse.)
C. N. K. Transmission Corp. (See Christie, H. E., and Couse, assignors.)
Cabot, Godfrey L., Inc. (See Hardy, Arthur C., assignor.)
Cadwallader, John, assignor to The Monarch Manufacturing Company, Tiffin, Ohio. Weed cutter. 1,780,741; Nov. 4.
Cameron, Alexander S., assignor to W. J. Cameron, Chicago, Ill. Optical apparatus. 1,780,291; Nov. 4.
Cameron, William J. (See Cameron, Alexander S., assignor.)
Campbell, Frank G. (See Strong, Leon B., assignor.)
Canton, Allen A., assignor to Cantonice Corporation, New York, N. Y. Electrical pump. 1,780,335; Nov. 4.
Canton, Allen A., New York, N. Y., assignor to Glacier, Inc., of the State of New York. Pumping mechanism. 1,780,336; Nov. 4.

Canton, Allen A., New York, N. Y., assignor to Glacier, Inc., of the State of New York. Pumping mechanism. 1,780,337; Nov. 4.
Canton, Allen A., New York, N. Y., assignor to Glacier, Inc., of the State of New York. Combination motor and pump. 1,780,338; Nov. 4.
Canton, Allen A., New York, N. Y., assignor to Glacier, Inc., of the State of New York. Combination motor and pump. 1,780,339; Nov. 4.
Cantonice Corporation. (See Canton, Allen A., assignor.)
Capobianco, Vincenzo. (See Nanzolini, E., Capobianco, and Scarponi.)
Capwell, George F., Wethersfield, Conn. Producing pictures in colors. 1,780,260; Nov. 4.
Carman, Earl, Walton, N. Y. Vertically-adjustable partition bar for stables. 1,780,577; Nov. 4.
Carmean, James H. (See Carmean, Samuel M. and J. H.)
Carmean, Samuel M. and J. H., Kansas City, Mo. Thermostatic control for electric heaters. 1,780,462; Nov. 4.
Carr, Helena E., Harrison, Mont. Berry picker. 1,780,376; Nov. 4.
Cary, Clifford E., Chicago, Ill. Hinge means for lavatory bowls. 1,780,615; Nov. 4.
Castle, Leon J. (See Webster, William A., assignor.)
Caudle, Fred, et al. (See White, James F., assignor.)
Celanese Corporation of America. (See Dreyfus, C., and Blume, assignors.)
Celma Company, The. (See Bassett, Edward W., assignor.)
Central United National Bank, The. (See McKee, Willis, assignor.)
Certain-teed Products Corporation. (See Codwise, Philip W., assignor.)
Certain-teed Products Corporation. (See Otis, Edward C., assignor.)
Chadbourne, Weston F., Franklin, Mass. Snap-on clip. 1,780,169; Nov. 4.
Chausee, Francis W. (See Burdick, E. S., Byrne, and Chausse.)
Chew, Samuel N., Thornton Heath, assignor to Pneumatic Conveyance & Extraction (1929) Limited, London, England. Dust separator. 1,780,641; Nov. 4.
Christenson, Niels A., Cleveland, Ohio. Compressor. 1,780,642; Nov. 4.
Christianson, Andrew, Pittsburgh, Pa., assignor to Standard Steel Car Corporation. Internal-combustion-engine cooling system. 1,780,517; Nov. 4.
Christie, Howard E., and K. W. Couse, Bronx, assignors to C. N. K. Transmission Corporation, New York, N. Y. Automatic transmission. 1,780,293; Nov. 4.
Christy, Arley B., assignor of one-third to The Light Grain & Milling Company, and one-third to W. E. Bush, Liberal, Kans. Control mechanism for grain-car-unloading apparatus. 1,780,578; Nov. 4.
Chritton, George A., trustee. (See Eckart, George F., assignor.)
Chrysler Corporation. (See Henderson, Herbert V., assignor.)
Clark, J. R., Co., The. (See Kalgren, John E., assignor.)
Clark, James E. (See Clark, Thomas E. and J. E.)
Clark, Robert K., Springfield, Mass., assignor to The American Thread Company, New York, N. Y. Sewing-machine bobbin. 1,780,742; Nov. 4.
Clark, Thomas E. and J. E., assignors to Continuous Train Control Corporation, Detroit, Mich. Track installation to control railway trains. 1,780,416; Nov. 4.
Clarke, Alex A., Chicago, Ill. Cutter head. 1,780,170; Nov. 4.
Clarke, John Q., Crawfordsville, Ind. Burial-casket attachment. 1,780,171; Nov. 4.
Cleveland Pneumatic Tool Company, The. (See Wallace, John F., assignor.)
Cleveland Rock Drill Company, The. (See Richardson, Led L., assignor.)
Cobbs, William N., Pittsburgh, Pa. Locomotive headlight. 1,780,865; Nov. 4.
Codwise, Philip W., Kenmore, N. Y., assignor to Certain-teed Products Corporation, New York, N. Y. Laminated wall board. 1,780,743; Nov. 4.
Coggins, Thomas H. and A. Farrington, Aston, Birmingham, England. Propeller of motor-driven canal and other boats, river barges, and the like. 1,780,552; Nov. 4.
Colt, J. B., Company, The. (See Mandeville, John L., assignor.)
Columbia Steel Equipment Company. (See Bergmann, Conrad, assignor.)
Compagnie International pour la Fabrication des Essences et Petroles. (See Joseph, Alfred, assignor.)
Continental Motors Corporation. (See Niven, Archie M., assignor.)
Continuous Torque Transmission Company. (See Ahlm, Charles E. F., assignor.)
Continuous Train Control Corporation. (See Clark, Thomas E., and J. E., assignors.)
Cook, John T., St. Paul, Minn. Plasterer's brush or the like. 1,780,340; Nov. 4.
Cool, Buol F. (See Cool, Paul L. and B. F.)
Cool, Paul L. and B. F., assignors of 52 per cent to H. McDaniel, Council Bluffs, Iowa. Timer for cream testers. 1,780,377; Nov. 4.
Coons, Perry T., Montclair, N. J., and G. H. Rose, Cleveland, Ohio, assignors to The American Steel and Wire Company of New Jersey. Concrete reenforcement support. 1,780,463; Nov. 4.
Cooper, Simon, Brooklyn, N. Y. Sostenuto piano. 1,780,670; Nov. 4.
Copithorn, Walter E., Natick, Mass. Smoker's pipe. 1,780,866; Nov. 4.
Coppage, John W., Franklin Park, Ill. Wheel-flange lubricator. 1,780,464; Nov. 4.
Cordonnier, Harold J., and C. H. Ziler, Carthage, Mo. Coffin-lowering device. 1,780,700; Nov. 4.
Cornella, Emanuel, Chicago, Ill. Inverted electric motor. 1,780,867; Nov. 4.
Corning Glass Works. (See Lebby, States L., assignor.)
Correll, Charles J., et al. (See Marx, Louis, assignor.)
Corson, Michael G., Jackson Heights, N. Y. Lead alloy amenable to hardening by heat treatment. 1,780,261; Nov. 4.
Cosgrove, Caroline E., administratrix. (See Cosgrove, John W.)
Cosgrove, John W., Medford, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Cementing machine. 1,780,341; Nov. 4.
Cosgrove, John W., deceased, by C. E. Cosgrove, administratrix, Medford, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Cementing machine. 1,780,342; Nov. 4.
Costume, Jacob A., and H. E. Bauer, New York, and C. L. Lovercheck, Brooklyn, assignors to International Taxameter Corporation, New York, N. Y. Taximeter. 1,780,780; Nov. 4.
Coulson, Edwin, Chiswick, London, England. Knife-grinding mechanism for use with slicing machines. 1,780,868; Nov. 4.
Couse, Kibbey W. (See Christie, H. E., and Couse.)
Cowen, Robert I., New York, N. Y. Colored and tinted parchment paper and the like and manufacture of the same. 1,780,616; Nov. 4.
Cramer, Stanley S., Haddon Heights, assignor to Radio Condenser Company, Camden, N. J. Electrical condenser. 1,780,172; Nov. 4.
Crane, Roland F., Cincinnati, Ohio. Photographic-printing device. 1,780,701; Nov. 4.
Crawford, McGregor and Canby Company, The. (See Mattern, George W., assignor.)
Cregger, Roe B., Richmond, Va. Blowtorch support and scriber. 1,780,814; Nov. 4.
Crippen, Eugene G., Schenectady, N. Y., assignor to General Electric Company. Condenser microphone. 1,780,671; Nov. 4.
Crocker, Thomas F., Chicago, Ill., assignor to Reserve Holding Company, Kansas City, Mo. Telephone system. 1,780,617; Nov. 4.
Crosby, Gorham. (See Gunn, Thomas M., assignor.)
Crouch, Artist B., Detroit, Mich. Piston and piston-ring assembly. 1,780,223; Nov. 4.
Crowe, John M., Covington, Ky., assignor, by mesne assignments, to The Stanley Works, New Britain, Conn. Portable tool. 1,780,173; Nov. 4.
Crowe, John M., Covington, Ky., assignor, by mesne assignments, to The Stanley Works, New Britain, Conn. Portable power saw. 1,780,174; Nov. 4.
Crowley, Lillian F., Vincennes, Ind. Truss brace. 1,780,579; Nov. 4.
Crutchfield, George K., jr., W. C. Northam, and J. C. Kinker, jr., Richmond, Va., assignors to said Crutchfield. Bag-tying machine. 1,780,815; Nov. 4.
Curtis, Charles G., New York, and E. R. Newton, Jamaica, N. Y. Two-cycle internal-combustion engine. 1,780,175; Nov. 4.
Cutler-Hammer, Inc. (See Meuer, George J., assignor.)
Da Costa, James S., Merchantville, N. J., assignor of one-half to J. B. Webb, Detroit, Mich. Setting means for conveying mechanism. 1,780,224; Nov. 4.
Dake, Fred L., assignor to The Foote Company, Inc., Nunda, N. Y. Power-control mechanism. 1,780,869; Nov. 4.
Danker, Karl, New York, N. Y. Armored car. 1,780,518; Nov. 4.
Danner, Philip S., Point Richmond, and J. E. Muth, Berkeley, assignors to Standard Oil Company of California, San Francisco, Calif. Metal amino carbonyls and making the same. 1,780,643; Nov. 4.
Davenport, Leonard M. (See Johnson, Eric G., assignor.)
Davis, Archibald H., jr., assignor to Shaw-Perkins Manufacturing Company, Pittsburgh, Pa. Heat-exchanging apparatus. 1,780,294; Nov. 4.
Davis, Augustine, jr. (See Haupt, Walter H., assignor.)
Davis, Harry A., assignor to Draper Corporation, Hopedale, Mass. Warper. 1,780,891; Nov. 4.
Davis, John H., New York, N. Y., assignor to Air Line Transportation Company, Philadelphia, Pa. Impelling device. 1,780,580; Nov. 4.
De Dudzeele, Gaston, Paris, France. Device for treating rough tubes and analogous articles with lead. 1,780,870; Nov. 4.
Deere & Company. (See Paul, William L., assignor.)
De Groote, Melvin, St. Louis, and L. T. Monson, Maplewood, Mo., assignors to Wm. S. Barnickel & Company, Webster Groves, Mo. Breaking petroleum emulsions. 1,780,343; Nov. 4.

De Groote, Melvin, St. Louis, L. T. Monson, Maplewood, and A. F. Wirtel, Webster Groves, assignors to Wm. S. Barnickel & Company, Webster Groves, Mo. Breaking petroleum emulsions. 1,780,344; Nov. 4.

De Groote, Melvin, St. Louis, L. T. Monson, Maplewood, and A. F. Wirtel, assignors to Wm. S. Barnickel & Company, Webster Groves, Mo. Breaking petroleum emulsions. 1,780,345; Nov. 4.

De Koning, Arthur E., Portland, Oreg. Sawing machine. 1,780,176; Nov. 4.

Delman, Inc. (See Ellington, Ferdinand W., assignor.)

De Long, Everett M., Detroit, Mich. Intake manifold. 1,780,519; Nov. 4.

De Moulin, Edmond, Los Angeles, Calif. Camera tripod. 1,780,225; Nov. 4.

Dever, Henry F. (See Koch, L. E., and Dever.)

Dewend, William D., South Bend, Ind., assignor, by mesne assignments, to Oliver Farm Equipment Company. Disk harrow. 1,780,644; Nov. 4.

De Witt, William J., Auburn, Mass., assignor to Shoe Form Co., Inc., Auburn, N. Y. Back-part stay. 1,780,177; Nov. 4.

De Witt, William J., assignor to The Shoe Form Co., Inc., Auburn, N. Y. Hosiery form. 1,780,744; Nov. 4.

Dickson, George A., Medway, assignor of one-third to L. M. Dickson, Medway, and one-third to J. A. Anderson, City Mills, Mass. Screen for windows, windshields, and the like. 1,780,871; Nov. 4.

Dickson, Lillian M., et al. (See Dickson, George A., assignor.)

Dieux, Jean, Paris, France. Electric pick-up for gramophone or other sound records. 1,780,378; Nov. 4.

Diller, Alfred, Aesch/Basel, Switzerland. Pencil having a sharpening device for the lead. 1,780,581; Nov. 4.

Dillman, Earnest J., Detroit, Mich., assignor to American Radiator Company, New York, N. Y. Control device. 1,780,417; Nov. 4.

Dinsmoor, Paul A., assignor to Lawrence Paper Manufacturing Company, Lawrence, Kans. Reversible reel for strip-applying machines. 1,780,469; Nov. 4.

Dispersions Process, Inc. (See Pratt, William B., assignor.)

Dodge, Adiel Y., South Bend, Ind. Telephone head set. 1,780,178; Nov. 4.

Donnelley, R. R., & Sons, Company. (See Alger, Harley C., assignor.)

Dorneth, Julius, Berlin-Konradshohe, assignor to the firm Typograph-Gesellschaft m. b. H., Berlin, Germany. Matrix-setting and type-line-casting machine. 1,780,816; Nov. 4.

Dornig, Walter, Berlin-Dahlem, Germany. Constant-speed multifrequency electrical generating apparatus. 1,780,702; Nov. 4.

Dorr Company, The. (See Bull, Arthur W., assignor.)

Dosch, Peter, Stratford, Conn., assignor, by mesne assignments, to Alemite Corporation, Chicago, Ill. Oiling apparatus. 1,780,465; Nov. 4.

Drake Non-Clinkering Furnace Block Company. (See Baumgartner, Henry H., assignor.)

Draper, Clare H., and E. H. Trevett, assignors to Draper Corporation, Hopedale, Mass. Warper. 1,780,892; Nov. 4.

Draper Corporation. (See Davis, Harry A., assignor.)

Draper Corporation. (See Draper, C. H., and Trevett, assignors.)

Dreaper, William P., Hampstead Heath, England. Manufacture of artificial silk and the like. 1,780,346; Nov. 4.

Dreyfus, Camille, and W. R. Blume, New York, N. Y., assignors to Celanese Corporation of America. Ornamental fabric and making the same. 1,780,645; Nov. 4.

Driemeyer, George F. and E. C. Jackson, St. Louis, Mo., assignors, by mesne assignments, to General Steel Castings Corporation, Granite City, Ill. Locomotive structure. 1,780,466; Nov. 4.

Dubois, Charles, assignor to Société Industrielle de Matériel d'Entreprise et de Construction, Paris, France. Motor-driven shears. 1,780,817; Nov. 4.

Duffy, James F., assignor to Duffy Manufacturing Company, Holland, Mich. Automobile floor mat. Des. 82,412; Nov. 4.

Duffy Manufacturing Company. (See Duffy, James F., assignor.)

Dumben, Henry J., Waterville, Iowa. Book rack or support. 1,780,872; Nov. 4.

Duncombe, Tyrrell H., Miami, Fla. Aeroplane. 1,780,672; Nov. 4.

Dunham Company, The. (See Dunham, Ray E., assignor.)

Dunham, Ray E., assignor to The Dunham Company, Berea, Ohio. Core-molding mechanism. 1,780,470; Nov. 4.

Dunlop, Robert R., assignor to The Jeffrey Manufacturing Company, Columbus, Ohio. Electric controller. 1,780,703; Nov. 4.

Dunn, William T. (See Shows, J. E., and Dunn.)

Du Pont, E. I., de Nemours & Company. (See Burnett, W. B., and Williams, assignors.)

Du Pont, E. I., de Nemours & Company. (See Lawson, Walter E., assignor.)

Du Pont, E. I., de Nemours, & Company. (See Stine, Charles M., assignor.)

Du Pont, E. I., de Nemours, & Company. (See Williams, I., and Burnett, assignors.)

Durchman, Lauri I. L., Petersburg, Va. Manufacturing alpha cellulose. 1,780,347; Nov. 4.

Durdin, Augustus C., jr., Chicago, Ill. Automatically-controlled water-circulating system. 1,780,379; Nov. 4.

Durdin, Augustus C., jr., Chicago, Ill. Automatic control system for electric motors. 1,780,380; Nov. 4.

Dyment Company, The. (See Dyment, Elwood, assignor.)

Dyment, Elwood, Lakewood, assignor to The Dyment Company, Cleveland, Ohio. Tire-display stand. 1,780,381; Nov. 4.

Eastern Tool & Mfg. Co. (See Anderson, Carl E., assignor.)

Eastern Tool & Manufacturing Company. (See Falstrom, Henry W., assignor.)

Eastern Tube and Tool Co. (See Schneider, E. J., and Wiggins, assignors.)

Eaton, John, Schenectady, N. Y., assignor to General Electric Company. Door-closing device. 1,780,673; Nov. 4.

Eby, Hugh H. (See MacFadden, Wilford C., assignor.)

Eckart, George F., assignor to G. A. Chritton, trustee, Chicago, Ill. Differential. 1,780,745; Nov. 4.

Eckeraley, James E., Aberdeen, assignor of one-half to A. Polson, Hoquiam, Wash. Feed-roll mechanism for veneer and shingle machines. 1,780,582; Nov. 4.

Eckert, John A. (See Leety, H. E., Eckert, and Page.)

Eckhard, William K., Dunellen, N. J., assignor to R. Hoe & Co., Inc., New York, N. Y. Sheet-registering mechanism for printing machines. 1,780,848; Nov. 4.

Edwards, Charles B., Mount Clemens, Mich. Listing machine. 1,780,295; Nov. 4.

Edwards, O. M., Company, The. (See Axe, Roy T., assignor.)

Ehrhart, Raymond N., Edgewood, assignor to Elliott Company, Pittsburgh, Pa. Condenser. 1,780,781; Nov. 4.

Einfeldt, Ernest E., Davenport, Iowa, assignor to French & Hecht, Incorporated. Metal wheel and making the same. 1,780,704; Nov. 4.

Eisfeld, Emanuel M., assignor to Braeburn of Rochester, Inc., Rochester, N. Y. Necktie holder. Des. 82,419; Nov. 4.

Electric Auto-Lite Company, The. (See Schwarzmann, W. E., and Strniste, assignors.)

Electric Wheel Company. (See Schooling, Luther L., assignor.)

Electrical Laboratories, Inc. (See Leupold, Henry G., assignor.)

Electrolux Servel Corporation. (See Munters, Carl G., assignor.)

Elite-Diamantwerke Aktiengesellschaft. (See Lesage, Alfred, assignor.)

Elizondo, Rodolfo E., Monterrey, Mexico. Lamp. 1,780,746; Nov. 4.

Ellington, Ferdinand W., Jamaica, assignor to Delman, Inc., New York, N. Y. Shoe. Des. 82,416; Nov. 4.

Ellington, Ferdinand W., Jamaica, assignor to Delman, Inc., New York, N. Y. Shoe. Des. 82,417; Nov. 4.

Ellington, Ferdinand W., Jamaica, assignor to Delman, Inc., New York, N. Y. Shoe. Des. 82,418; Nov. 4.

Ellington, Ferdinand W., Queens County, assignor to Delman, Inc., New York, N. Y. Shoe. Des. 82,469; Nov. 4.

Elliott Company. (See Ehrhart, Raymond N., assignor.)

Elliott, William C., Minco, and E. S. Henry, Medford, Okla. Adjustable high and low pressure switch alarm. 1,780,179; Nov. 4.

Ellis, Forrest T., assignor to General Motors Corporation, Detroit, Mich. Finishing spline shafts. 1,780,747; Nov. 4.

Elsner, Hermann, deceased, Cassel, by C. Wagner, administrator, Cassel-Wilhelmshohe, Germany. Interstage superheating in steam power plants. 1,780,226; Nov. 4.

Emerson, Charles J. (See Jansson, B. G., and Emerson.)

Esborn, Swan. (See Hammer, F. L., Smith, and Esborn.)

Evans Auto Loading Co. Inc., The. (See Seeley, F. L., and Snyder, assignors.)

Evans Auto Loading Co. Inc., The. (See Snyder, Clifford L., assignor.)

Evans Auto Loading Co. Inc., The. (See Tucker, Max D., assignor.)

Evans, Erwin K., Holland Patent, N. Y. Automatic pressure-controlling apparatus. 1,780,583; Nov. 4.

Everlite Novelty Mfg. Corp. (See Fruchtman, Saul W., assignor.)

Ewald, Bernhard K. F., Villingen, Germany, assignor to The Tabulating Machine Company, Endicott, N. Y. Compound type bar. 1,780,674; Nov. 4.

Exploration G. m. b. H. (See Jenny, Willy P., assignor.)

Face-A-Lite Manufacturing Company. (See Nelson, Otto S., assignor.)

Fachnic, Fred, Withrow, Wash. Water motor. 1,780,584; Nov. 4.

Fahrenwald, Frank A., Chicago, Ill. Apron-type conveyer. 1,780,382; Nov. 4.

Falstrom, Henry W., assignor to Eastern Tool & Manufacturing Company, Bloomfield, N. J. Rake. 1,780,180; Nov. 4.

Fansteel Products Company. (See Baker, John C., assignor.)

Farrington, Albert. (See Coggins, T. H., and Farrington.)

Fassen, Charles A., Detroit, Mich. Tree-branch holder. 1,780,181; Nov. 4.

Fay, Richard D., Cambridge, Mass. Apparatus for radiating sound waves. 1,780,349; Nov. 4.

Federal Telegraph Company. (See Brower, William M., assignor.)

Ferling, George W. (See Stoltz, C. F., and Ferling.)

Figg, George E., New York, N. Y. Bow tie. 1,780,418; Nov. 4.

Finsen, Eyvind, assignor to Gleason Works, Rochester, N. Y. Gear-generating machine. 1,780,350; Nov. 4.

Fischer, Paul, New York, N. Y. Railroad-crossing gate and train stop. 1,780,520; Nov. 4.

Fischler, Paul E., Bay City, Mich. Magnetic reproducer. 1,780,419; Nov. 4.

Fisher, Albert H., East Cleveland, Ohio, assignor to H. B. Sabin, Cleveland, Ohio. Litter-gathering device. 1,780,748; Nov. 4.

Fitzgerald, Cecil Y. (See Pierson, C. W., Fitzgerald, and Thomae.)

Flagge, Phillipp F., Milwaukee, Wis. Gutter construction. 1,780,553; Nov. 4.

Fleischmann, Christian, Bloomfield, N. J., assignor to Westinghouse Lamp Company. Bulb-cullett-centering device. 1,780,618; Nov. 4.

Flint, Richard A., Malad, Idaho. Wind and waterproof fixture. 1,780,420; Nov. 4.

Floss, Carl W., Detroit, Mich. Floating reamer. 1,780,554; Nov. 4.

Foote Company, The. (See Dake, Fred L., assignor.)

Forman, Robert E., Cincinnati, Ohio. Air-propelled motorcycle. 1,780,705; Nov. 4.

Fortier, Leon D., Kankakee, assignor to Sears, Roebuck and Co., Chicago, Ill. Liquid-fuel cook stove. 1,780,421; Nov. 4.

Fox, William, Vaudeville Company. (See Fried, Armin, assignor.)

Francsics, Karl, Budapest, Hungary. Trousers hanger. 1,780,153; Nov. 4.

Frankforter, Clarence J., Lincoln, assignor to Frankforter Oil Process, Inc., Omaha, Nebr. Treating hydrocarbons. 1,780,873; Nov. 4.

Frankforter Oil Process, Inc. (See Frankforter, Clarence J., assignor.)

Frederics, E., Ins. (See Frederics, Ernest O., assignor.)

Frederics, Ernest O., assignor to E. Frederics, Inc., New York N. Y. Hair and scalp treating apparatus. 1,780,182; Nov. 4.

Freer, Phelps M., Detroit, Mich. Piston. 1,780,183; Nov. 4.

Freeze, John H., Cape Girardeau, Mo. Boat. 1,780,467; Nov. 4.

Frehse, Albert W., and C. G. Belden, assignors to General Motors Corporation, Detroit, Mich. Clutch. 1,780,749; Nov. 4.

French & Heckt, Incorporated. (See Einfeldt, Ernest E., assignor.)

Fried, Armin, assignor to William Fox Vaudeville Company, Los Angeles, Calif. Camera mounting. 1,780,585; Nov. 4.

Friedmann, Jacob, Freeport, assignor to Kaylon, Incorporated, New York, N. Y. Shirt pocket and making the same. 1,780,874; Nov. 4.

Friend, Wayne Z., Charleston, W. Va., assignor to Baltimore Gas Engineering Corporation. Fractionation apparatus. 1,780,818; Nov. 4.

Frigidaire Corporation. (See Geiler, Frederick C., assignor.)

Frigidaire Corporation. (See Hull, Harry B., assignor.)

Frigidaire Corporation. (See Schmeiding, Warren H. F., assignor.)

Fruchtman, Saul W., Brooklyn, N. Y., assignor to Everlite Novelty Mfg. Corp. Lamp. Des. 82420; Nov. 4.

Fujita, Masa, Sakia-gun, Fukui, Japan. Deformable chair. 1,780,468. Nov. 4.

Fuller Lehigh Company. (See McAuliffe, Sydney J., assignor.)

Furlong, Roland A., assignor to the Yawman & Erbe Manufacturing Company, Rochester, N. Y. Card index system. 1,780,227; Nov. 4.

Fykse, Mitchell L., South Milwaukee, Wis. Rope-thrusting shovel with differential thrust. 1,780,351; Nov. 4.

G. & W. Electric Specialty Co. (See Williams, Paul F., assignor.)

Galloway, Robert M., and R. A. Schafer, assignors to The National Automatic Tool Company, Richmond, Ind. Hydraulic control valve unit. 1,780,471; Nov. 4.

Garand, John C., Springfield, Mass., assignor to The Lyman Gun Sight Corporation, Middlefield, Conn. High-speed firing mechanism. 1,780,521; Nov. 4.

Garden City Plating and Manufacturing Company. (See Kurtzon, Morris, assignor.)

Gardner, Daniel, Rueil, France. Manufacture of high-purity carbon. 1,780,154; Nov. 4.

Geiler, Frederick C., Dayton, Ohio, assignor by mesne assignments, to Frigidaire Corporation. Tray for refrigerating units. 1,780,422; Nov. 4.

General Aniline Works, Inc. (See Hentrich, W., Hardtmann, and Knoche, assignors.)

General Aniline Works, Inc. (See Nawiasky, P., and Krause, assignors.)

General Aniline Works, Inc. (See Pfaffendorf, Wilhelm, assignor.)

General Aniline Works, Inc. (See Thauss, A., and Mauthe, assignors.)

General Electric Company. (See Anderson, Arvid E., assignor.)

General Electric Company. (See Bailey, Percy S., assignor.)

General Electric Company. (See Bany, H., and McDonald, assignors.)

General Electric Company. (See Barton, Theophilus F., assignor.)

General Electric Company. (See Brückel, W., and Schimpf, assignors.)

General Electric Company. (See Crippen, Eugene G., assignor.)

General Electric Company. (See Eaton, John, assignor.)

General Electric Company. (See Hough, Eugene L., assignor.)

General Electric Company. (See Kellogg, Edward W., assignor.)

General Electric Company. (See Newkirk, Burt L., assignor.)

General Electric Company. (See Owens, Joseph W., assignor.)

General Ice Scoring Machine Company, The. (See Roark, Robert H., assignor.)

General Motors Corporation. (See Ellis, Forrest T., assignor.)

General Motors Corporation. (See Frehse, A. W., and Belden, assignors.)

General Motors Corporation. (See Neef, Robert, assignor.)

General Motors Corporation. (See Tenney, Perry L., assignor.)

General Motors Research Corporation. (See Hallett, George E. A., assignor.)

General Motors Research Corporation. (See Phillips, William M., assignor.)

General Motors Research Corporation. (See Short, Charles R., assignor.)

General Steel Castings Corporation. (See Ashe, William O., assignor.)

General Steel Castings Corporation. (See Driemeyer, G. F., and Jackson, assignors.)

Gentilini, Augusto. (See Papò, A., and Gentilini.)

Gesellschaft für Drahtlose Telegraphie m. b. H. (See Schaffer, Walter, assignor.)

Gilbert, A. C., Company, The. (See Lanz, John, assignor.)

Gilger, George V., Cimarron, assignor of one-half to H. B. Marcum, Newton, Kans. Pick-up attachment for combines. 1,780,472; Nov. 4.

Gill Glass and Fixture Company. (See Aglow, Harry, assignor.)

Gill Stella F., Kansas City, assignor to N. S. Hillyard, St. Joseph, Mo. Manacle. 1,780,473; Nov. 4.

Glacier, Inc. (See Canton, Allen A., assignor.)

Glazer, Fred, Dorchester, Mass. Upholstery device. 1,780,474; Nov. 4.

Gleaner Combine Harvester Corporation. (See Hale, Stephen H., assignor.)

Gleason, Kenneth, Hibbing, Minn. Cable-terminal hook. 1,780,184; Nov. 4.

Gleason Works. (See Finsen, Eyvind, assignor.)

Gleichauf, Fred A., Newark, Ohio. Buffet. Des. 82,421; Nov. 4.

Globe Steel Abrasive Company. (See Martin, David, assignor.)

Godefroid, Armand, Berlin, Germany. Coin assorter. 1,780,819; Nov. 4.

Goff, Errol W., Everett, Mass., assignor to Warren Telechron Company. Clock or the like. Des. 82,424; Nov. 4.

Gold, Bruce B. (See Gold, Samuel B. and B. B.)

Gold, Samuel B. and B. B., assignors to Weber Engine Company, Kansas City, Mo. Variable-speed transmission. 1,780,475; Nov. 4.

Goldbecher, Frank, Grantwood, N. J. Automobile table. 1,780,706; Nov. 4.

Golden, Alexander R., New York, and J. I. Kahn, Brooklyn, N. Y. Merchandizing fabric. 1,780,228; Nov. 4.

Goldsborough, Frederick B., Croton-on-Hudson, N. Y. Caisson head. 1,780,586; Nov. 4.

Goodrich, B. F., Company, The. (See Richardson, C. M., and Bodle, assignors.)

Gorbutt, Sidney B., assignor, by mesne assignments, to Willamette-Ersted Company, Portland, Oreg. Bracket for tractor hoists. 1,780,646; Nov. 4.

Gordon, Edward L., McKees Rocks, Pa. Bottle cap and measuring device. 1,780,875; Nov. 4.

Gorsline, Samuel G. (See Wery, Jules, assignor.)

Gosden, Freeman F., et al. (See Marx, Louis, assignor.)

Gotham Knitting Machine Corporation. (See Leavin, William H. and S. B., assignors.)

Gotham Silk Hosiery Company. (See Parlini, Alexander C., assignor.)

Grace, John F., Arlington, N. J., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Steam condenser. 1,780,476; Nov. 4.

Grace, John F., Arlington, N. J., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Condenser. 1,780,477; Nov. 4.

Grace, John F., Arlington, N. J., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Condenser. 1,780,478; Nov. 4.

Graham, William P., assignor to Graham & Zenger, Inc., New York, N. Y. Disk or similar article. Des. 82,422; Nov. 4.

Graham & Zenger, Inc. (See Graham, William P., assignor.)

Grant, Albert E., assignor to Grant Heat Machine Corporation, New York, N. Y. Oil burner. 1,780,185; Nov. 4.

Grant Heat Machine Corporation. (See Grant, Albert E., assignor.)

Grasselli Chemical Company, The. (See Laftman, Axel B., assignor.)

Grasselli Chemical Company, The. (See Lawrence, Ralph E., assignor.)

Green, Estill I., East Orange, N. J., assignor to American Telephone and Telegraph Company. Oscillation generator. 1,780,229; Nov. 4.
Green, Irving I., Brookline, Mass. Camera tripod. 1,780,383; Nov. 4.
Green, Irving I., Brookline, Mass. Filter holder for cameras. 1,780,384; Nov. 4.
Griffith, Floyd H., Kansas City, Mo. Arch corrector. 1,780,479; Nov. 4.
Grigg, Norman C., Drysdale, Victoria, Australia. Method of and apparatus for decorticating, retting, and scutching flax. 1,780,480; Nov. 4.
Gross, Jacob W., Hartford, Conn. Book-backing and press-machine combination. 1,780,296; Nov. 4.
Grosse, Carl, Berlin-Hermsdorf, Germany. Vibratory apparatus. 1,780,878; Nov. 4.
Grove, Cornelius S. (See Miller, W. E., Shinn, and Grove.)
Grunwald, Albert C., River Forest, assignor to Precision Metal Workers, Chicago, Ill. Ash receptacle. Des. 82,423; Nov. 4.
Gunn, Thomas M., Brooklyn, N. Y., assignor of one-sixth to G. Crosby, Glen Ridge, N. J. Fluid-displacement apparatus. 1,780,784; Nov. 4.
Gustafson, August W., Hutto, Tex. Planter attachment. 1,780,587; Nov. 4.
Guyot, Reinhard, Los Angeles, Calif. Toy. 1,780,385; Nov. 4.
Hagel, John L., assignor to The Hagel Wagon Spring Bolster Co., St. Paul, Minn. Hitch. 1,780,186; Nov. 4.
Hagel Wagon Spring Bolster Co., The. (See Hagel, John L., assignor.)
Hahn, Fred A., East Moline, Ill. Washing device. 1,780,155; Nov. 4.
Hahn, Ray, Pleasant Valley, Iowa, assignor of one-half to W. Leese. Vegetable topper. 1,780,820; Nov. 4.
Haight, F. A. (See Jackson, Andrew, assignor.)
Hale, Stephen H., Kansas City, assignor to Gleaner Combine Harvester Corporation, Independence, Mo. Spiral conveyer. 1,780,481; Nov. 4.
Hall, Elbert J. (See Winslow, C. A., and Hall.)
Hall, Frank H., assignor to Hovaird & Company, Bradford, Pa. Sucker-rod turner. 1,780,877; Nov. 4.
Hall, Frederick R., Arncliffe, near Sydney, New South Wales, Australia. Apparatus for extracting moisture from air. 1,780,156; Nov. 4.
Hall, Norman E. (See Krause, John M., assignor.)
Hallett, George E. A., assignor to General Motors Research Corporation, Dayton, Ohio. Variable-speed power-transmission unit. 1,780,423; Nov. 4.
Halsey, Fred H., Texarkana, Ark. Building construction. 1,780,707; Nov. 4.
Hamer, Leland S., and J. Q. Little, Long Beach, Calif. Well tool. 1,780,482; Nov. 4.
Hammer, Forrester L., Branford, W. R. Smith, West Haven, and S. Esborn, assignors to Malleable Iron Fittings Company, Branford, Conn. Remote control device for carburetors. 1,780,522; Nov. 4.
Handley Page Limited. (See Page, Frederick H., assignor.)
Haney, William J., North Vernon, Ind. Tap for dancing slippers or shoes. 1,780,230; Nov. 4.
Hanson, Casper F., assignor to Olson Manufacturing Company, Albert Lea, Minn. Stanchion. 1,780,187; Nov. 4.
Hardtmann, Max. (See Hentrich, W., Hardtmann, and Knoche.)
Hardy, Arthur C., Wellesley, assignor to Godfrey L. Cabot, Inc., Boston, Mass. Optical measuring instrument. 1,780,231; Nov. 4.
Harris, Clara C., Sabina, Ohio. Tally. 1,780,878; Nov. 4.
Harris, George R., Los Angeles, Calif. Street-lighting fixture. Des. 82,425; Nov. 4.
Harrison, John H., Stockton, Calif. Leveling attachment for ladders. 1,780,386; Nov. 4.
Hart, Paul B., Maracaibo, Venezuela. Automatic blowout preventer. 1,780,387; Nov. 4.
Hartford-Empire Company. (See Barker, William T., jr., assignor.)
Haskelite Manufacturing Corporation. (See Meyercord, G. R., and Norris, assignors.)
Haupt, Walter H., Ludlow, Ky., assignor to A. Davis, jr., Cincinnati, Ohio. Apparatus for embossing cans. 1,780,890; Nov. 4.
Havens, Louis A., jr., Queens Village, N. Y. Ammonia-gas detector. 1,780,483; Nov. 4.
Hayman, Eber J., Parkersburg, W. Va. Joint. 1,780,232; Nov. 4.
Heavey, Michael T., Berkeley, Calif. Rack for rolled materials. 1,780,647; Nov. 4.
Hefti, Wilhelm, Wulflingen, assignor to the firm Sulzer Freres Societe Anonyme, Winterthur, Switzerland. Engine cylinder. 1,780,388; Nov. 4.
Heimann, Heinrich. (See Becker, F., Heimann, and Bayerl.)
Hein, August, Brooklyn, N. Y. Belt carrier. 1,780,523; Nov. 4.
Heineman, Warren F., Shorewood, assignor to A. O. Smith Corporation, Milwaukee, Wis. Electric flash welding. 1,780,297; Nov. 4.
Heltzel, John N., Warren, Ohio. Concrete road construction. 1,780,588; Nov. 4.
Henderson, Herbert V., assignor to Chrysler Corporation, Detroit, Mich. Lamp. Des. 82,426; Nov. 4.
Henderson, William H., Youngstown, Ohio. Process of and apparatus for slaking lime. 1,780,821; Nov. 4.
Hendrix, William R., Pacific Palisades, assignor of one-half to H. A. Hyde, Santa Monica, Calif. Water-regulating device. 1,780,589; Nov. 4.
Henry, Earl S. (See Elliott, W. C., and Henry.)
Hentrich, Winfrid, M. Hardtmann, Wiesdorf-on-the-Rhine, and R. Knoche, Leverkusen-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Condensation product of the benzodiazine series. 1,780,879; Nov. 4.
Hesson, Charles M., and W. J. Koch, Midland Park, assignors to The Fred H. Knapp Corporation, Ridgewood, N. J. Can-boxing machine. 1,780,424; Nov. 4.
Heuze, Charles, Auvelais, Belgium, assignor, by mesne assignments, to The American Bicheroux Company. Process and apparatus for the manufacture of glass. 1,780,590; Nov. 4.
Hewitt, William R., New York, N. Y. Bolt and nut lock. 1,780,675; Nov. 4.
Higgins, Emma. (See Higgins, John A., assignor.)
Higgins, John A., assignor to E. Higgins, St. Joseph, Mo. Composite lubricant. 1,780,157; Nov. 4.
Highway Trailer Company. (See Williams, Leroy E., assignor.)
Hildebrandt, Ernest A., Indianapolis, and C. McDonaugh, Beech Grove, Ind. Superheater bracket. 1,780,188; Nov. 4.
Hillyard, Newton S. (See Gill, Stella F., assignor.)
Hirsch, Rudolph, North Bergen, assignor to Reiss Premier Pipe Co., Inc., Union City, N. J. Cigarette and cigar holder. 1,780,389; Nov. 4.
Hirschhorn, Benjamin, assignor to Millie Patent Holding Co., Inc., New York, N. Y. Tea cartridge. 1,780,484; Nov. 4.
Hodge, George O., assignor to Standard Steel and Bearings Incorporated, Plainville, Conn. Riveting stays or rivets in ball bearings. 1,780,189; Nov. 4.
Hoe, R., & Co. (See Eckhard, William K., assignor.)
Hoffman, Edward L., Dayton, Ohio. Parachute. 1,780,190; Nov. 4.
Hoffman, Oscar. (See Woodman, Commodore B., assignor.)
Holed-Tite Packing Corporation. (See Koppelman, Morris, assignor.)
Holmes, Herbert G., assignor to Novo Engine Company, Lansing, Mich. Relief valve. 1,780,782; Nov. 4.
Holtzer-Cabot Electric Company, The. (See Kennedy, Carlton L., assignor.)
Honda, Kotaro, Sendai, Japan. Machine for testing and quantitatively indicating the cutting power and durability of blades and cutlery. 1,780,822; Nov. 4.
Hopkins, George F., deceased, Jackson, Mich.; W. K. Sagendorph, executor. Lathe and lathe chuck. 1,780,390; Nov. 4.
Hopkins, John C., Lakewood, and A. Osolin, Cleveland, Ohio. Operating blast furnaces. 1,780,485; Nov. 4.
Hoppe, Emil C., Elizabeth, N. J. Amusement-park building or analogous structure. Des. 82,427; Nov. 4.
Horii, Shinjiro, Tokyo, Japan. Backing for stencil sheets. 1,780,391; Nov. 4.
Horn, Harry L., New York, N. Y., assignor to Bagasse Development Inc. Preparing cellulose pulp. 1,780,750; Nov. 4.
Horni, Paul P., Newark, N. J. Self-starting synchronous motor. 1,780,648; Nov. 4.
Horscraft, Herbert T., Valley Stream, and W. L. King, St. Albans, N. Y. Clothesline and drier. 1,780,708; Nov. 4.
Horton, H. B., et al. (See Olson, E. D., and Horton, assignors.)
Horton, William A. (See Olson, E. D., and Horton.)
Houck, John D., Chicago, Ill. Coffee-making device. 1,780,751; Nov. 4.
Hough, Eugene L., St. Louis, Mo., assignor to General Electric Company. Control system. 1,780,676; Nov. 4.
Huebner-Bleistein Patents Company. (See Huebner, William C., assignor.)
Huebner, William C., Chicago, Ill. Apparatus for making photographic fractional exposures. 1,780,191; Nov. 4.
Huebner, William C., Chicago, Ill., assignor to Huebner-Bleistein Patents Company, Buffalo, N. Y. Photographic-printing apparatus. 1,780,678; Nov. 4.
Huebner, William C., Buffalo, N. Y. Holding and supporting device for printing or print-receiving elements and the like. 1,780,677; Nov. 4.
Huff, Leslie R., Phillipsburg, assignor to Ingersoll-Rand Company, Jersey City, N. J. Plate valve. 1,780,524; Nov. 4.
Hull, Harry B., Dayton, Ohio, assignor, by mesne assignments, to Frigidaire Corporation. Refrigerating apparatus. 1,780,425; Nov. 4.
Hutchins Car Roofing Company. (See Wilson, Alfred R., assignor.)
Hyde, Howard A. (See Hendrix, William R., assignor.)
Hyde, Louis B., Detroit, Mich. Hot-water heater. 1,780,426; Nov. 4.
Hydro-Oil Fire Corporation. (See Teale, W., and McLauthlin, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Becker, F., Heimann, and Bayerl, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Knorr, Angelo, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Pungs, Wilhelm, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Pungs, W., and Jahrstorfer, assignors.)

I. G. Farbenindustrie Aktiengesellschaft. (See Siedler, P., and Moeller, assignors.)
Icre, Jean B., New York, N. Y. Craft adapted to travel on land or water or in the air. 1,780,298; Nov. 4.
Iizuka, Bunpachi, San Mateo, Calif. Ash-tray structure. 1,780,591; Nov. 4.
Imperial Chemical Industries Limited. (See Speight, Eric A., assignor.)
Imperial Chemical Industries Limited. (See Warren, Thomas R., assignor.)
Ingalls, Ralph T. (See Rasmussen, Charles, assignor.)
Ingersoll-Rand Company. (See Huff, Leslie R., assignor.)
Ingersoll-Rand Company. (See Redfield, S. B., and Naab, assignors.)
Ingersoll-Rand Company. (See Smith, William A., sr., and W. A., jr., assignors.)
International Business Machines Corporation. (See Peirce, John R., assignor.)
International Combustion Engineering Corporation. (See Van Brunt, John, assignor.)
International Harvest Hat Co. (See Shlenker, Leon M., assignor.)
International Taxameter Corporation. (See Costuma, J. A., Bauer, and Lovercheck, assignors.)
Intertype Corporation. (See Sperry, Arthur G., assignor.)
Irvine, Andrew. (See Bateman, A. T., and Irvine.)
Jackson, Andrew, Binghamton, assignor of one-half to F. A. Haight, Johnson City, N. Y. Deflecting rim for boilers and washing machines. 1,780,192; Nov. 4.
Jackson, Edwin C. (See Driemeyer, G. F., and Jackson.)
Jackson, John W., Moose Jaw, Saskatchewan, Canada. Shock loading and unloading machine. 1,780,299; Nov. 4.
Jacobs Bros. Co. Inc., The. (See Jacobs, Harry M., assignor.)
Jacobs, Harry M., assignor to The Jacobs Bros. Co. Inc., Brooklyn, N. Y. Warming device. 1,780,649; Nov. 4.
Jacobsen, Jens N., Alameda, Calif., assignor to The Pfaudler Company, Rochester, N. Y. Sanitary valve. 1,780,525; Nov. 4.
Jacobus, David S., Montclair, N. J., and W. A. Jones, West New Brighton, N. Y., assignors to The Babcock & Wilcox Company, Bayonne, N. J. Heat-transfer device. 1,780,300; Nov. 4.
Jaenichen, Louis, Springfield Township, Oakland County, assignor to The Standard Computing Scale Company, Detroit, Mich. Lever for scales and making the same. 1,780,262; Nov. 4.
Jahrstorfer, Michael. (See Pungs, W., and Jahrstorfer.)
James Manufacturing Company. (See Markey, George T., assignor.)
Janda, George W., Bismarck, and R. C. Plaggmier, Taylor, assignors to The National Survault Company, Bismarck, N. Dak. Burial vault. 1,780,193; Nov. 4.
Jansson, Bennett T., Kittery, Me., and C. J. Emerson, Winchester, Mass. Screw driver. 1,780,785; Nov. 4.
Jefferson Electric Company. (See Kellner, Louis, assignor.)
Jeffery Manufacturing Company, The. (See Levin, Nils D., assignor.)
Jeffrey Manufacturing Company, The. (See Dunlop, Robert R., assignor.)
Jenkins, Howard, Denver, Colo. Sprinkler. 1,780,233; Nov. 4.
Jennings, Chester S., and L. C. Allen, assignors to The Lamson Company, Syracuse, N. Y. Conveyer system. 1,780,486; Nov. 4.
Jennings, Irving C., South Norwalk, Conn. Sump or bilge pump. 1,780,679; Nov. 4.
Jenny, Will P., Strasburg, Ohio, assignor to the firm Exploration G. m. b. H., Hanover, Germany. Adjustable stand for portable balances. 1,780,158; Nov. 4.
Johansson, Karl O. R., Appelviken, assignor to Aktiebolaget Lindholmen-Motalon, Motala Verkstad, Sweden. Sink mine. 1,780,592; Nov. 4.
Johns-Manville Corp. (See Lawrence, William H., assignor.)
Johnson, Andrew S., St. Paul, Minn. Dry poultry feeder. 1,780,392; Nov. 4.
Johnson, Edward T., Greenfield, assignor to The New England Box Company, Greenfield, Mass. Wire-bound box and making the same. 1,780,709; Nov. 4.
Johnson, Eric G., Brooklyn, N. Y. Button. 1,780,555; Nov. 4.
Johnson, Eric G., assignor of one-half to L. M. Davenport, Trenton, N. J. Bag clasp. 1,780,880; Nov. 4.
Johnson, Erick A., Pine Bluffs, Wyo. Potato-digger blade. 1,780,235; Nov. 4.
Johnson, John, Honolulu, Hawaii. Bed-spring fabric. 1,780,352; Nov. 4.
Johnson Metal Products Co. (See Johnson, Paul G., assignor.)
Johnson, Paul G., Erie, assignor to Johnson Metal Products Co., Erie, Pa. Screen. 1,780,823; Nov. 4.
Johnston, Joseph W., Steubenville, Ohio. Brake drum. 1,780,234; Nov. 4.
Jones, David J., assignor to Bell & Gossett Company, Chicago, Ill. System of pressure and temperature regulation for heaters. 1,780,393; Nov. 4.
Jones, James R. (See Larson, O. J., and Jones.)
Jones, Mary W., Wilkes-Barre, Pa. Combination cabinet. 1,780,353; Nov. 4.
Jones, William A. (See Jacobus, D. S., and Jones.)
Jones, William A., West New Brighton, N. Y., assignor to The Babcock & Wilcox Company, Bayonne, N. J. Fluid heater. 1,780,301; Nov. 4.
Joseph, Alfred, Enghein, assignor to Compagnie Internationale pour la Fabrication des Essences et Petroles, Paris, France. Apparatus for the hot purification of gases. 1,780,159; Nov. 4.
Jurgensen, Max L., Chicago, Ill. Electric toy. 1,780,487; Nov. 4.
Kahn, Julius I. (See Golden, A. R., and Kahn.)
Kalgren, John E., assignor to The J. R. Clark Co., Minneapolis, Minn. Folding table. 1,780,394; Nov. 4.
Kallin, Wallace E., St. Paul, and L. G. Boynton, Minneapolis, Minn. Metal slat for window shades. 1,780,556; Nov. 4.
Kane, Bernard N., East Liverpool, Ohio, assignor to Warwick China Company, Wheeling, W. Va. Plate. Des. 82,471; Nov. 4.
Kasper, Joseph F., Louisville, Ky. Kitchen cabinet. Des. 82,430; Nov. 4.
Katagiri, Chihiro, Tokio, Japan, assignor to Yoshio Katagiri, New York, N. Y. Mechanical toy. 1,780,557; Nov. 4.
Katagiri, Yoshio. (See Katagiri, Chihiro, assignor.)
Kattwinkel, Hans, Coswig, Germany. Friction body for friction couplings, brakes, and the like. 1,780,710; Nov. 4.
Kaufmann, John J., Elkins Park, assignor to Steel Heddle Manufacturing Company, Philadelphia, Pa. Heddle frame. 1,780,786; Nov. 4.
Kavanau, Ira, New York, N. Y. Hosiery package. 1,780,558; Nov. 4.
Kay, William E., Elyria, Ohio. Cutting machine. 1,780,680; Nov. 4.
Kaylon, Incorporated. (See Friedmann, Jacob, assignor.)
Keller, Walter D., and W. L. Poto, assignors to The Alliance Machine Company, Alliance, Ohio. Ingot-stripping mechanism. 1,780,787; Nov. 4.
Kellner, Louis, Brooklyn, N. Y., assignor to Jefferson Electric Company, Chicago, Ill. Electric switch. 1,780,894; Nov. 4.
Kellner, Louis, Brooklyn, N. Y., assignor to Jefferson Electric Company, Chicago, Ill. Electric switch. 1,780,895; Nov. 4.
Kellogg, Edward W., Schenectady, N. Y., assignor to General Electric Company. Sound recording and reproducing apparatus. 1,780,681; Nov. 4.
Kellogg Switchboard & Supply Co. (See Berg, Hans, assignor.)
Kelly, Jess C., Cambridge, Ohio. Salt and pepper shaker. Des. 82,431; Nov. 4.
Kelly, William J., assignor of one-half to A. C. Basch, Brooklyn, N. Y. Making shoes. 1,780,650; Nov. 4.
Kelvinator Corporation. (See Replogle, John R., assignor.)
Kende, George, East Orange, N. J., assignor to Phonodisc Corporation, New York, N. Y. Sound-reproducing machine. 1,780,194; Nov. 4.
Kennedy, Aubrey M., Los Angeles, Calif. Sound-reproducing mechanism for radios. 1,780,788; Nov. 4.
Kennedy, Carlton L., Braintree, assignor to The Holtzer-Cabot Electric Company, Roxbury, Mass. Condenser induction motor. 1,780,395; Nov. 4.
Kennedy, Carlton L., Braintree, assignor to The Holtzer-Cabot Electric Company, Roxbury, Mass. Induction motor. 1,780,881; Nov. 4.
Kensington Steel Company. (See McKee, W. S., and Bauer, assignors.)
Kerr, Howard J., Westfield, assignor to The Babcock & Wilcox Company, Bayonne, N. J. Steam boiler. 1,780,619; Nov. 4.
Kettler, Martin F., Houston, Tex. Well screen. 1,780,882; Nov. 4.
Kettmann, Andrew P., and I. W. Anderson, San Jose, Calif. Ladder. 1,780,263; Nov. 4.
Kieffer, John E., assignor to Kieffer Paper Mills, Ewing, Ind. Shock-absorbing cushioning paper and making same. 1,780,526; Nov. 4.
Kieffer Paper Mills. (See Kieffer, John E., assignor.)
King, C. G., & Co. (See King, Clifford G., assignor.)
King, C. G., & Co. (See Smith, Walter E., assignor.)
King, Clifford G., Barrington, assignor to C. G. King & Co., Inc., Providence, R. I. Shoe buckle. Des. 82,432; Nov. 4.
King, Clifford G., Barrington, assignor to C. G. King & Co., Inc., Providence, R. I. Shoe ornament. Des. 82,433; Nov. 4.
King Manufacturing Company, The. (See Roe, Ernest S., assignor.)
King, William B., Columbia, Tenn., assignor to Armour Fertilizer Works, Chicago, Ill. Double-superphosphate manufacture. 1,780,620; Nov. 4.
King, Willis L. (See Horscraft, H. T., and King.)
Kinker, John C., jr. (See Crutchfield, G. K., jr., Northam, and Kinker.)
Kinney, Fay D., Wenham, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Sheet-separating apparatus. 1,780,195; Nov. 4.
Kinney, Frederick C., and W. T. Stockton, Evanston, Ill. Controlling device. 1,780,752; Nov. 4.
Kirkbridge, Walter H., San Francisco, Calif. Supporting railway rails upon ties. 1,780,396; Nov. 4.
Kirkham, Joseph E., Topeka, Kans. Troweling machine for concrete or other plastic material. 1,780,427; Nov. 4.
Klaren, William B., Lexington, Ky. Self-steaming iron. 1,780,236; Nov. 4.

Klauer, Philipp, Nuremberg, Germany, assignor to the Firm Vereinigte Schuhfabriken Bernels-Wessels A. G., Augsburg-Oberhausen, Germany. Baby's shoe. Des. 82,434; Nov. 4.

Knapp, Fred H. Corporation, The. (See Hesson, C. M., and Koch, assignors.)

Knoche, Rudolf. (See Heutrich, W., Hardtmann, and Knoche.)

Knorr, Angelo, Berlin, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Solution of cellulose derivatives. 1,780,883; Nov. 4.

Koch, Lawrence E., and H. F. Dever, assignors, by mesne assignments, to Time-O-Stat Controls Company, Elkhart, Ind. Actuator for controlling devices. 1,780,302; Nov. 4.

Koch, William J. (See Hesson, C. M., and Koch.)

Kohnle, Frederick, assignor to The Monarch Marking System Company, Dayton, Ohio. Price tag. 1,780,488; Nov. 4.

Kohnle, Frederick, assignor to The Monarch Marking System Company, Dayton, Ohio. Price-marking tag. 1,780,753; Nov. 4.

Kolb, George F. (See Bullard, E. P., jr., and Kolb.)

Kolber, Morris, Brooklyn, assignor to New Diamond Point Pen Co., Inc., New York, N. Y. Fountain pen. 1,780,527; Nov. 4.

Koppelman, Morris, Brooklyn, N. Y., assignor, by mesne assignments, to Holed-Tite Packing Corporation. Packing for fragile articles. 1,780,264; Nov. 4.

Koppers Company, The. (See Van Ackeren, Joseph, assignor.)

Kraemer, August F., assignor to Louis Stern Company, Providence, R. I. Extension device for bracelets. 1,780,824; Nov. 4.

Kratz, Edouard M., assignor to Marsene Products Co., Chicago, Ill. Transparent-paper machine. Re17,854; Nov. 4.

Krause, Artur. (See Nawiasky, P., and Krause.)

Krause, John M., assignor of one-half to N. E. Hall, Los Angeles, Calif. Toy top. Des. 82,435; Nov. 4.

Krause, Wilhelm, Berlin, Germany. Coin-operated telephone apparatus for automatic telephone exchanges. 1,780,754; Nov. 4.

Krippendorf Kalculator Company. (See Leslie, Bernard S., assignor.)

Kuhn, Frank, assignor to American Electrical Heater Company, Detroit, Mich. Handle assembly. 1,780,825; Nov. 4.

Kuhn, Frank, assignor to American Electrical Heater Company, Detroit, Mich. Handle assembly. 1,780,826; Nov. 4.

Kulair Corporation. (See Kusel, Abraham J., assignor.)

Kurtzon, Morris, Highland Park, assignor to Garden City Plating and Manufacturing Company, Chicago, Ill. Roller or caster. 1,780,755; Nov. 4.

Kusel, Abraham J., Baltimore, Md., assignor to Kulair Corporation. Refrigerating valve and constructing the same. 1,780,593; Nov. 4.

Laftman, Axel B., Bayonne, N. J., assignor, by mesne assignments, to The Grasselli Chemical Company, Cleveland, Ohio. Reducing the zinc-oxide content of lithopone. 1,780,559; Nov. 4.

La Hodny, William, assignor to Standard Mirror Company, Inc., Buffalo, N. Y. Combined mirror and instrument. Des. 82,436; Nov. 4.

Lamson Company, The. (See Jennings, C. S., and Allen, assignors.)

Landrock, Paul, Rochester, N. Y., assignor to Photostat Corporation, Providence, R. I. Photographic apparatus. 1,780,489; Nov. 4.

Laue, Abbot A., New Rochelle, N. Y. Fire wall for furnaces. 1,780,303; Nov. 4.

Langford, George W., Ann Arbor, Mich. Baling press. 1,780,528; Nov. 4.

Lanhoffer, Edmond O., Poissy, France, assignor to Asbestos Panels Corporation, New York, N. Y. Process and apparatus for reproducing by stamping. 1,780,560; Nov. 4.

Lansdown, Norman D., assignor to Standard-Trump Bros. Machine Company, Wilmington, Del. Circular-knitting machine. 1,780,756; Nov. 4.

Lanterman, Lloyd S., La Canada, Calif. Steam or vapor generator. 1,780,529; Nov. 4.

Lanz, John, assignor by mesne assignments to The A. C. Gilbert Company, New Haven, Conn. Electric fan. 1,780,789; Nov. 4.

Larsen, Charles, Denver, Colo. Apparatus for the removal of obstructive matter from oil wells. 1,780,428; Nov. 4.

Larson, Oscar J., and J. R. Jones, assignors to Art Metal Construction Company, Jamestown, N. Y. Compressor and locking means therefor. 1,780,354; Nov. 4.

Lashenick, Joseph, Brooklyn, N. Y. Advertising display apparatus. 1,780,651; Nov. 4.

Lasker, William W., Brooklyn, assignor to Remington Rand Incorporated, New York, N. Y. Tabulating machine. 1,780,621; Nov. 4.

Lassen, Grover V. (See White, Ezekiel F., assignor.)

Latour, André, Grenoble, France. Rectifier of the synchronous type. 1,780,827; Nov. 4.

Lawaczeck, Franz, Munich, Germany, assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Utilization of hydraulic energy. 1,780,490; Nov. 4.

Lawrence Paper Manufacturing Company. (See Dinsmoor, Paul A., assignor.)

Lawrence, Ralph E., Wickliffe, assignor to The Grasselli Chemical Company, Cleveland, Ohio. Acid treatment of metal articles. 1,780,594; Nov. 4.

Lawrence, Ralph E., Wickliffe, assignor to The Grasselli Chemical Company, Cleveland, Ohio. Inhibitor. 1,780,595; Nov. 4.

Lawrence, William H., New York, N. Y., assignor to Johns-Manville Corp. Protective covering for bridges. 1,780,622; Nov. 4.

Lawson, Clarence A., jr. (See Lawson, Clarence A., sr., and C. A., jr.)

Lawson, Clarence A., sr., and C. A., jr., Los Angeles, Calif. Dental cabinet. 1,780,757; Nov. 4.

Lawson, Walter E., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Coating composition. 1,780,652; Nov. 4.

Leach, Robert W., and W. H. Bateman, Newport, England. Valve. 1,780,160; Nov. 4.

Leach, Robert W., and W. H. Bateman, Newport, England. Valve. 1,780,828; Nov. 4.

Leamy, Alan H., Auburn, Ind., assignor to Manning & Co., Chicago, Ill. Automobile. Des. 82,428; Nov. 4.

Leamy, Alan H., Auburn, Ind., assignor to Manning & Co., Chicago, Ill. Automobile. Des. 82,437; Nov. 4.

Leavin, Samuel B. (See Leavin, William H. and S. B.)

Leavin, William H. and S. B., assignors by mesne assignments to Gotham Knitbac Machine Corporation, New York, N. Y. Knitting needle. 1,780,790; Nov. 4.

Lebaron Detroit Company. (See Roberts, R. S., and Votypka, assignors.)

Lebby, States L., assignor to Corning Glass Works, Corning, N. Y. Projector. 1,780,355; Nov. 4.

Lebeis, Martin, Berlin, Germany, assignor to Remington Rand Incorporated, New York, N. Y. Tabulating machine. 1,780,884; Nov. 4.

Leese, William. (See Hahn, Roy, assignor.)

Leety, Harry E., and J. A. Eckert, Pittsburgh, and A. W. Page, Penn Township, Allegheny County, assignors to P. Wall Manufacturing Supply Company, Pittsburgh, Pa. Furnace. 1,780,783; Nov. 4.

Lehrecke, Hans, Frankfort-on-the-Main, Germany, assignor to The Roessler & Hasslacher Chemical Company, New York, N. Y. Evolution of hydrocyanic acid. 1,780,196; Nov. 4.

Lehrecke, Hans, Frankfort-on-the-Main, Germany, assignor to The Roessler & Hasslacher Chemical Company, New York, N. Y. Causing the simultaneous evolution of hydrocyanic acid and an irritant gas. 1,780,197; Nov. 4.

Lehrecke, Hans, Frankfort-on-the-Main, Germany, assignor to The Roessler & Hasslacher Chemical Company, New York, N. Y. Stabilization of hydrocyanic acid. 1,780,198; Nov. 4.

Lenderink, Andrew, Kalamazoo, Mich. Filter bed. 1,780,791; Nov. 4.

Leopold, Samuel N. (See McClelland, R., Powell, and Leopold.)

Lesage, Alfred, Brand-Erbisdorf, assignor to Elite-Diamantwerke Aktiengesellschaft, Brand-Erbisdorf, Saxonia, Germany. Piston for internal-combustion engines. 1,780,829; Nov. 4.

Leslie, Bernard S., Beverly, Mass., assignor to Krippendorf Kalculator Company, Portland, Me. Area-estimating device for sheet material. 1,780,237; Nov. 4.

Lessing, Rudolf, London, England. Treatment of carbonaceous materials. 1,780,830; Nov. 4.

Leupold, Henry G., Cambridge, assignor to Electrical Laboratories, Inc., Boston, Mass. Thermostatic apparatus. 1,780,758; Nov. 4.

Leveque, Bernard T., Wenham, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Bobbin-winding machine. 1,780,304; Nov. 4.

Levin, Nils D., assignor to The Jeffery Manufacturing Company, Columbus, Ohio. Mining machine. Re17,855; Nov. 4.

Lewis, William Utica, N. Y. Convertible single or double bed. 1,780,792; Nov. 4.

Leyton, Geoffrey B. (See Leyton, Helen G. and G. B.)

Leyton, Helen G. and G. B., Oxford, England. Knitting machine. 1,780,831; Nov. 4.

Liberman, Meyer, Vallejo, Calif. Trousers. 1,780,356; Nov. 4.

Lichter, Ira J., Teaneck, N. J. Call system. 1,780,711; Nov. 4.

Light Grain & Milling Company, The, et al. (See Christy, Arley B., assignor.

Lincoln, Robert A., assignor of one-half to American Iron & Machine Works, Inc., Tonkawa, Okla. Weight indicator. 1,780,238; Nov. 4.

Linderman, Bert A., New York, N. Y., assignor to Linderman & Co., Wilmington, Del. Fluid-pressure-operated device. 1,780,199; Nov. 4.

Linderman, Bert A., assignor to Linderman & Company, New York, N. Y. Metallic shoe for fluid-pressure-operated brakes. 1,780,200; Nov. 4.

Linderman & Co. (See Linderman, Bert A., assignor.)

Linderner, Mathius. (See Benton, E. A., and Linderner.)

Lindsay Light Company. (See Little, Robert L., assignor.)

Linn, C. E., et al. (See Olson, E. D., and Horton, assignors.)

Lipkowski, Iwan, Detroit, Mich. Frame for display signs and the like. 1,780,305; Nov. 4.

Little, John Q. (See Hamer, L. S., and Little.)

Little, Robert L., assignor to Lindsay Light Company, Chicago, Ill. Flexible coupling. 1,780,712; Nov. 4.

Locke Insulator Corporation. (See Rowland, Davidge H., assignor.)

Loetscher, Emil C., Dubuque, Iowa. Manufacturing building material of varying densities. 1,780,623; Nov. 4.

Lolley, William H., New York, N. Y. Lifting jack. 1,780,265; Nov. 4.

Lolley, William H., New York, N. Y. Lifting jack. 1,780,266; Nov. 4.

Lovercheck, Charles L. (See Costuma, J. A., Bauer, and Lovercheck.)

Lucomlin, Morris, New York, N. Y. Costume jewelry clasp. Des. 82,429; Nov. 4.

Lyman Gun Sight Corporation. (See Garand, John C., assignor.)

MacFadden, Wilford C., Fox Chase, assignor to H. H. Eby, Philadelphia, Pa. Socket for tubes. 1,780,778; Nov. 4.

Maeulen, Adolph, assignor to Williamsport Mirror & Glass Co., Williamsport, Pa. Ventilator. 1,780,491; Nov. 4.

Mahon, R. C., Company, The. (See Miller, William G., assignor.)

Malleable Iron Fittings Company. (See Hammer, F. L., Smith, and Esborn, assignors.)

Mallory, Edward B., Tenafly, N. J. Refrigerator unit. Des. 82,438; Nov. 4.

Mallory, Edward B., Tenafly, N. J. Refrigerator unit. Des. 82,439; Nov. 4.

Malm, Edward A., Wadena, Minn. Rain drain for window screens. 1,780,492; Nov. 4.

Malone, John P., assignor of one-half to A. P. Young, Chicago, Ill. Apparatus and method for chilling meats. 1,780,267; Nov. 4.

Mandeville, John L., Arlington, N. J., assignor to The J. B. Colt Company. Burner. 1,780,596; Nov. 4.

Manly, Basil M., et al., executors. (See Manly, Charles M.)

Manly, Charles M., deceased, Kew Gardens, N. Y., by J. M. Manly, Chicago, Ill., B. M. Manly, Washington, D. C., and W. G. Manly, Columbia, Mo., executors, assignors to Overman Cushion Tire Company, Inc. Vehicle tire. 1,780,306; Nov. 4.

Manly, John M., et al., executors. (See Manly, Charles M.)

Manly, William G., et al., executors. (See Manly, Charles M.)

Manning & Co. (See Leamy, Alan H., assignor.)

Manning & Co. (See Van Ranst, Cornelius W., assignor.)

Manning, Harry D., Kalmazoo, Mich. Temporary binder. 1,780,429; Nov. 4.

Manzolini, Ettore, V. Capobianco, and F. Scarponi, Rome, Italy. Device to insure the bursting of all kinds of bombs in whatever position of impact or fall. 1,780,624; Nov. 4.

Marcum, Harvey B. (See Gilger, George V., assignor.)

Marion, Charles E. (See Brahy, Charles, assignor.)

Markey, George T., assignor to James Manufacturing Company, Fort Atkinson, Wis. Brooder stove. 1,780,430; Nov. 4.

Marsene Products Co. (See Kratz, Edouard M., assignor.)

Martin, Charles A., Chicago, Ill. Circuit-breaking device. 1,780,202; Nov. 4.

Martin, David, assignor to The Globe Steel Abrasive Company, Mansfield, Ohio. Process and mechanism for making metal pellets. 1,780,201; Nov. 4.

Marx, Louis, New York, N. Y., assignor to C. J. Correll and F. F. Gosden, Chicago, Ill. Vehicle toy. Des. 82,440; Nov. 4.

Maschek, Henry, Wichita Falls, Tex. Dirt mover. 1,780,239; Nov. 4.

Mastin, Clarence W., San Antonio, Tex. Pocket structure for garments. 1,780,204; Nov. 4.

Mattern, George W., assignor to The Crawford, McGregor and Canby Company, Dayton, Ohio. Golf-club head. 1,780,625; Nov. 4.

Matthiessen, Conrad H., jr. (See Parker, Arnold G., assignor.)

Matthiessen, Conrad H., jr., New York, N. Y. Aeroplane. 1,780,561; Nov. 4.

Mattison, Carl L., assignor to Mattison Machine Works, Rockford, Ill. Feed-control means for turning machines. 1,780,203; Nov. 4.

Mattison Machine Works. (See Mattison, Carl L., assignor.)

Maurel, Henry F., Providence, R. I., assignor to Maurel Investment Corporation. Manufacturing fuel briquettes. 1,780,205; Nov. 4.

Maurel Investment Corporation. (See Maurel, Henry F., assignor.)

Mauthe, Gustav. (See Thauss, A., and Mauthe.)

Mayhall, John M., and H. C. Morrison, Milwaukee, Wis. Liquid-testing device. 1,780,597; Nov. 4.

Mayhall, John M., and H. C. Morrison, Milwaukee, Wis. Liquid-measuring device. 1,780,598; Nov. 4.

Maynard, Arthur H., Warwick, R. I., assignor to Boston Wire Stitcher Company, Portland, Me. Stapling machine. 1,780,530; Nov. 4.

McAdams, Shasta E., H. P. Skaggs, and J. T. Singhurst, Erie, Kans. Electric-light socket. 1,780,832; Nov. 4.

McAuliffe, Sydney J., Sydney, New South Wales, Australia, assignor, by mesne assignments, to Fuller Lehigh Company. Producing water gas. 1,780,759; Nov. 4.

McBride, Williard M., Pittsburgh, Pa. Reamer. 1,780,246; Nov. 4.

McCarroll, Charles, Helena, Ala. Aero propeller. 1,780,431; Nov. 4.

McClelland, Ralph, H. K. Powell, and S. N. Leopold, assignors to Morris Paper Mills Company, Chicago, Ill. Display box. 1,780,760; Nov. 4.

McCormick, Hugh M., Huntington, Ind. Pipe for smoking tobacco. 1,780,682; Nov. 4.

McDaniel, Howard. (See Cool, Paul L. and B. F., assignors.)

McDevitt, Frank J., St. Louis, Mo. Acid-sludge burner. 1,780,653; Nov. 4.

McDonald, Frank W., Lawrence, Kans. Building. Des. 82,442; Nov. 4.

McDonald, Gordon R. (See Barry, H., and McDonald.)

McDonald, John J., West View, Pa. Tire. Des. 82,441; Nov. 4.

McDonaugh, Charles. (See Hildebrandt, E. A., and McDonaugh.)

McElroy, James H. (See Riley, R. S., and McElroy.)

McEwan, Andrew J., Tulsa, Okla. Control or power lever mechanism. 1,780,713; Nov. 4.

McGerry, James J., Grand Rapids, and C. H. Whiting, Kalamazoo, Mich., assignors to Rotary Utility Corporation, Chicago, Ill. Rotary chair. Des. 82,443; Nov. 4.

McGerry, James J., Grand Rapids, and C. H. Whiting, Kalamazoo, Mich., assignors to Rotary Utility Corporation, Chicago, Ill. Chair. Des. 82,444; Nov. 4.

McGovern, Daniel F., Montpelier, Vt. Polishing wheel. Re17,853; Nov. 4.

McGregor, James A., Cleveland, Ohio. Corner die. 1,780,432; Nov. 4.

McGregor, James A., Cleveland, Ohio. Die for flanging sheet metal. 1,780,433; Nov. 4.

McGurty, William J., assignor to The Bartlett Hayward Company, Baltimore, Md. Processing furnace dust. 1,780,833; Nov. 4.

McIntosh Electrical Corporation. (See Pullwitt, Herman P., assignor.)

McIntosh, James, Cleveland Heights, Ohio. Fuel mixer for internal-combustion engines. 1,780,626; Nov. 4.

McKee, Walter S., and E. C. Bauer, assignors to Kensington Steel Company, Chicago, Ill. Dipper tooth. 1,780,397; Nov. 4.

McKee, Willis, Cleveland, Ohio, assignor to The Central United National Bank. Conveyer and conveyer roller. 1,780,493; Nov. 4.

McKellar, Archibald D., Park Ridge, Ill. Comb. 1,780,206; Nov. 4.

McLaurin, William W., Brookfield, Mass. Coated paper and manufacturing same. 1,780,793; Nov. 4.

McLauthlin, Herbert F. (See Teale, W., and McLauthlin.)

McLennan, Arpad, Kitscoty, Alberta, Canada. Portable grain-loading device. 1,780,307; Nov. 4.

McNally, John R., Raleigh, N. C. Calculating device. 1,780,494; Nov. 4.

Melendez, Leandro E., New York, N. Y. Magazine pencil. 1,780,207; Nov. 4.

Melling, Herbert T., New York, N. Y. Valve. 1,780,562; Nov. 4.

Messer, Adolf, Frankfort-on-the-Main, Germany. Apparatus for separating liquids into constituents possessing a low-boiling point and constituents possessing a high-boiling point by distillation and rectification. 1,780,563; Nov. 4.

Messer, Vladimir V., New York, N. Y., assignor to Selberling Rubber Company, Barberton, Ohio. Making pump members. 1,780,208; Nov. 4.

Messier, George L. R. J., Montrouge, France. Pneumatic suspension for airplanes. 1,780,531; Nov. 4.

Metcalfe, Robert F., assignor to Socony Burns Corporation, Brooklyn, N. Y. Fuel burner and control therefor. 1,780,357; Nov. 4.

Metro-Goldwyn-Mayer Corporation. (See Wise, Anthony G., assignor.)

Meuer, George J., assignor to Cutler-Hammer, Inc., Milwaukee, Wis. Electric switch. 1,780,434; Nov. 4.

Meyer, Henry, Hambury, Germany. Driving mechanism used in connection with dental tools. 1,780,495; Nov. 4.

Meyercord, George R., Chicago, Ill., and C. B. Norris, Grand Rapids, Mich., assignors to Haskelite Manufacturing Corporation. Embossing plywood. 1,780,496; Nov. 4.

Micro Machine Company. (See York, H. H., and Baumberger, assignors.)

Mid-States Steel & Wire Co. (See Birch, William M., assignor.)

Milcor Steel Company. (See Siebenlist, Anthony G., assignor.)

Miller, Don M., assignor to Boiler Equipment Company, Waterloo, Iowa. Flue cleaner. 1,780,435; Nov. 4.

Miller, Ford S., New Salem, Kans. Clutch mechanism. 1,780,241; Nov. 4.

Miller, James L., assignor to Rex Research Corporation, Toledo, Ohio. Cleaner-set package. 1,780,268; Nov. 4.

Miller, John C., Chicago, Ill. Apparaus for cleaning out conduits and the like. 1,780,436; Nov. 4.

Miller, John G. (See Primas, Alexander, assignor.)

Miller, William E., R. J. Shinn, and C. S. Grove, Hickory, N. C. Cotton picker. 1,780,497; Nov. 4.

Miller, William G., assignor to The R. C. Mahon Company, Detroit, Mich. Oven construction. 1,780,269; Nov. 4.

Millie Patent Holding Co. (Hirschhorn, Benjamin, assignor.)

Mills, Bert E., Oak Park, assignor to Mills Novelty Company, Chicago, Ill. Volume-controlling device for automatic phonographs or the like. 1,780,437; Nov. 4.

Mills Novelty Company. (See Mills, Bert E., assignor.)

Miner, William H., Chazy, N. Y., assignor to W. H. Miner, Inc., Chicago, Ill. Friction shock-absorbing mechanism. 1,780,358; Nov. 4.
Miner, W. H., Inc. (See Miner, William H., assignor.)
Mitchell-Crankless Engines Corporation. (See Sherman, Thomas L., assignor.)
Mitchell, Eugene F. (See Pribnow, J. F., and Mitchell.)
Mock, Judson, Voehringer Company. (See Sutcliffe, Fred, jr., assignor.)
Modern Coal Burner Co. (See Burnett, William, jr., assignor.)
Moeller, August. (See Siedler, P., and Moeller.)
Molitor, Charles B. J., New York, N. Y. Spanish lace for dresses. Des. 82,445; Nov. 4.
Molyneux, George E., Bayonne, N. J. Power-transmitting mechanism. 1,780,654; Nov. 4.
Monarch Manufacturing Company, The. (See Cadwallader, John, assignor.)
Monarch Marking System Company, The. (See Kohnle, Frederick, assignor.)
Monson, Louis T. (See De Groote, M., and Monson.)
Monson, Louis T. (See De Groote, M., Monson, and Wirtel.)
Moore, James R., Springfield, Colo. Chain carrier and pull. 1,780,834; Nov. 4.
Moore, Roger E., New York, N. Y. Mounting for shade fixtures. 1,780,271; Nov. 4.
Moorhouse, Alfred, assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle. 1,780,270; Nov. 4.
Morgan, Mathew B., assignor to The Timken-Detroit Axle Company, Detroit, Mich. Air compressor. 1,780,398; Nov. 4.
Morimura Bros. Inc. (See Tomita, Urasaburo, assignor.)
Morris, Albert S., Oakland, Calif. Adjustable water-sprinkler holder. 1,780,308; Nov. 4.
Morris Paper Mills Company. (See McClelland, R., Powell, and Leopold, assignors.)
Morris Truck and Wheel Co. Inc. (See Naschke, Harry C., jr., assignor.)
Morrison, Howard C. (See Mayhall, J. M., and Morrison.)
Morse, William J., Attleboro, Mass. Combined collar and necktie holder. 1,780,532; Nov. 4.
Mortensen, Jens N., Brooklyn, assignor to Boorum & Pease Company, New York, N. Y. Loose-leaf binder. 1,780,835; Nov. 4.
Motor Wheel Corporation. (See Wilson, Moses W. H., assignor.)
Muller, Gertrude A., Fort Wayne, Ind. Child's costumer. Des. 82,446; Nov. 4.
Muller, Max, assignor to firm Adolf Bleichert & Co., A. G., Leipzig, Germany. Running wheel of passenger aerial cableways. 1,780,627; Nov. 4.
Multibestos Company. (See Bateson, Thomas H., assignor.)
Munson, Edmund L., Mount Kisco, N. Y. Hospital bed. 1,780,399; Nov. 4.
Munters, Carl G., Stockholm, Sweden, assignor to Electrolux Servel Corporation, New York, N. Y. Refrigeration. 1,780,272; Nov. 4.
Muth, John E. (See Danner, P. S., and Muth.)
Myers, Walter, Bridgeport, Conn., assignor to The Singer Manufacturing Company, Elizabeth, N. J. Stitch-forming mechanism for sewing machines. 1,780,309; Nov. 4.
Naab, Julius. (See Redfield, S. B., and Naab.)
Naamlooze Venootschap Nederlandsche Kabelfabriek. (See Proos, Cornelis F., assignor.)
Nabholz, Hans, Essonnes, France. Dyeing machine. 1,780,628; Nov. 4.
Nacker, Owen M., assignor of one-half to A. P. Brush, Detroit, Mich. Brake-equalising mechanism. 1,780,498; Nov. 4.
Naschke, Harry C., jr., assignor to Morris Truck and Wheel Co. Inc., Philadelphia, Pa. Thread-guard caster. 1,780,761; Nov. 4.
National Automatic Tool Company, The. (See Galloway, R. M., and Schafer, assignors.)
National Supply Company, The. (See Archer, Merton T., assignor.)
National Survault Company, The. (See Janda, G. W., and Plaggmier, assignors.)
Nawinsky, Paul, and A. Krause, Ludwigshafen-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y. New vat dyestuffs. 1,780,836; Nov. 4.
Neef, Robert, assignor to General Motors Corporation, Detroit, Mich. Transmission lock and interlock. 1,780,762; Nov. 4.
Neilson, Albert H. (See Brown, Harry E., assignor.)
Nelson, Otto S., Mitchell, assignor to Face-A-Lite Manufacturing Company, Mitchell, S. Dak. Glare-shield holder. 1,780,400; Nov. 4.
Nelson, Simon, Duluth, Minn. Match-manufacturing machine. 1,780,359; Nov. 4.
Newbery, John W., Rockville Center, N. Y. Liquid-fuel burner. 1,780,273; Nov. 4.
New Britain-Gridley Machine Company, The. (See Brown, Robert S., assignor.)
New Diamond Point Pen Co. (See Kolber, Morris, assignor.)
New England Box Company, The. (See Johnson, Edward T., assignor.)
Newkirk, Burt L., Schenectady, N. Y., assignor to General Electric Company. Method and apparatus for heat removal by mercury. 1,780,683; Nov. 4.
Newton, Earle R. (See Curtis, C. G., and Newton.)
Nichols, Edgar B., Camden, N. J., assignor to The Pfaudler Co., Rochester, N. Y. Liquid-processing apparatus. 1,780,794; Nov. 4.
Nichols, Robert P., Port Chester, N. Y. Clock casing. Des. 82,447; Nov. 4.
Niven, Archie M., assignor to Continental Motors Corporation, Detroit, Mich. Sleeve-valve engine-cylinder head. 1,780,763; Nov. 4.
Noble, John H., Kalamazoo, Mich. Rotary shaft packing. 1,780,764; Nov. 4.
Noble & Wood Machine Company. (See Buehler, Brownell, assignor.)
Norris, Charles B. (See Meyercord, G. R., and Norris.)
Northam, Waters C. (See Crutchfield, G. K., jr., Northam, and Kinker.)
Norwood, Harry G., Washington, D. C., assignor to T. F. von Dorn, New York, N. Y. Railway-rail anchor. 1,780,714; Nov. 4.
Nott, Albin J., New York, N. Y. Surface condenser. 1,780,837; Nov. 4.
Novelli, Luis, Bahia Blanca, Argentine Republic. System of ignition for explosive mixtures. 1,780,499; Nov. 4.
Novo Engine Company. (See Holmes, Herbert G., assignor.)
Nyrop, Aage, Copenhagen, Denmark. Sludge separator. 1,780,655; Nov. 4.
O'Connor, Arthur F., assignor to Union Railway Equipment Company, Chicago, Ill. Ice bunker for refrigerator cars. 1,780,765; Nov. 4.
O'Farrell, Thomas, Claremont, assignor to R. C. Bloomfield, Los Angeles, Calif. Agitating, mixing, and circulating machine. 1,780,360; Nov. 4.
O'Hara, Elwin L., Antioch, Calif. Spray-tank agitator. 1,780,500; Nov. 4.
Oliver Farm Equipment Company. (See Dewend, William D., assignor.)
Olsen, John K., assignor to Stewart-Warner Corporation, Chicago, Ill. Fuel-feeding apparatus for internal-combustion engines. 1,780,310. Nov. 4.
Olson, Elmer D., Grand Island, and W. A. Horton, Hastings, Nebr.; said Olson assignor to H. B. Horton, Des Moines, Iowa, and C. E. Linn, Hastings, Nebr. Poultry marker. 1,780,715; Nov. 4.
Olson Manufacturing Company. (See Hanson, Casper F., assignor.)
Oppenheim, Jesse, New York, N. Y. Hairdressing accessory. 1,780,766; Nov. 4.
Osinga, Thomas J., Chicago, Ill. Plumb protector for elevator guides. 1,780,501; Nov. 4.
Osolin, Alfred. (See Hopkins, J. C., and Osolin.)
Otis, Edward C., Chicago, Ill., assignor, by mesne assignments, to Certain-teed Products Corporation. Shingle stacker. 1,780,716; Nov. 4.
Otto, Charles D., New York, N. Y. Lubricating device. 1,780,629; Nov. 4.
Otto, Cliff R., Edmond, Okla. Apparatus for eliminating ice from windshields. 1,780,502; Nov. 4.
Overman Cushion Tire Company. (See Manly, Charles M., assignor.)
Owens, Joseph W., Schenectady, N. Y., assignor to General Electric Company. Circuit-interrupting device. 1,780,684; Nov. 4.
Oxer, George C., New York, N. Y., assignor to American Brass Company. Electrical conductor. 1,780,533; Nov. 4.
Oxer, George C., New York, N. Y., assignor to American Brass Company. Electrical conductor. 1,780,564; Nov. 4.
P & M Company, The. (See Shepherd, Charles B., assignor.)
P & M Company, The. (See Warr, Harold G., assignor.)
Packard Motor Car Company. (See Moorhouse, Alfred, assignor.)
Packard Motor Car Company. (See Tibbetts, Milton, assignor.)
Packer Manufacturing Co., The. (See Webber, Calvin R., assignor.)
Page, Austin W. (See Leety, H. E., Eckert, and Page.)
Page, Frederick H., assignor to Handley Page Limited, London, England. Controlling aeroplanes. 1,780,838; Nov. 4.
Page, Ralph E., Binghamton, assignor to The Tabulating Machine Company, Endicott, N. Y. Ribbon-supporting mechanism. 1,780,630; Nov. 4.
Page, Walter. (See Brooks, W. H., and Page.)
Papò, Armando, and A. Gentilini, Rome, Italy. Moving-picture machine. 1,780,311; Nov. 4.
Parker, Arnold G., assignor to C. H. Matthiesen, jr., New York, N. Y. Aeroplane. 1,780,565; Nov. 4.
Parker, Joseph N., Bedford, Va. Motor vehicle. 1,780,599; Nov. 4.
Parlini, Alexander C., Woodside, assignor to Gotham Silk Hosiery Company, Inc., New York, N. Y. Fabric-tensioning clamp. 1,780,768; Nov. 4.
Paul, Sydney, assignor to Superior Body Company, Lima, Ohio. Vehicle body construction. 1,780,717; Nov. 4.
Paul, Sydney, assignor to Superior Body Company, Lima, Ohio. Funeral car. 1,780,718; Nov. 4.
Paul, William L., Berkeley, Calif., assignor to Deere & Company, Moline, Ill. Power-transmitting mechanism. 1,780,503; Nov. 4.
Pearson, Robert D. (See Pierson, C. W., Fitzgerald, and Thomae, assignors.)

Pedersen, John D., Springfield, Mass. Coating cartridges. 1,780,566; Nov. 4.
Peirce, John R., assignor to International Business Machines Corporation, New York, N. Y. Printing-tabulating machine. 1,780,685; Nov. 4.
Pentz, Albert D., assignor to Pentz Motor Brake Corporation, New Brighton, N. Y. Fluid-pressure brake. 1,780,656; Nov. 4.
Pentz Motor Brake Corporation. (See Pentz, Albert D., assignor.)
Peoples, Charles B. (See Bradford, J., and Peoples.)
Perlo, Samuel. (See Shapiro, Hyman, assignor.)
Peters, William A., jr., Seattle, Wash., assignor to E. B. Badger & Sons Company, Boston, Mass. Fluid-mixing device. 1,780,438; Nov. 4.
Peterson, Peter A., Chicago, Ill. Combination thermostatic switch and plug connecter. 1,780,631; Nov. 4.
Peterson, Reynold W., Galva, Ill. Acid jar. 1,780,534; Nov. 4.
Pewther, Judson C., Wichita, Kans. Washer. 1,780,839; Nov. 4.
Pfaffendorf, Wilhelm, Hochst-on-the-Main, Germany, assignor by mesne assignments, to General Aniline Works, Inc., New York, N. Y. Degreasing textile materials. 1,780,885; Nov. 4.
Pfaudler Company, The. (See Jacobsen, Jens N., assignor.)
Pfaudler Co., The. (See Nichols, Edgar B., assignor.)
Pharo, Charles E., Cortez, Colo. Automatic train-pipe coupling. 1,780,795; Nov. 4.
Phelan, Louis A. M., Beloit, Wis., assignor by mesne assignments, to Time-O-Stat Controls Company, Elkhart, Ind. Mounting for electrical switches. 1,780,312; Nov. 4.
Phelan, Louis A. M., assignor by mesne assignments, to Time-O-Stat Controls Company, Elkhart, Ind. Fusible swing plug. 1,780,313; Nov. 4.
Phillips, William M., Birmingham, assignor by mesne assignments, to Generals Motors Research Corporation, Detroit, Mich. Chromium plating. 1,780,535; Nov. 4.
Phonodisc Corporation. (See Kende, George, assignor.)
Photostat Corporation. (See Landrock, Paul, assignor.)
Picareff, Anton, Art Studios, Inc. (See Picareff, Anton, assignor.)
Picareff, Anton, assignor to Anton Picareff Art Studios, Inc., New York, N. Y. Coloring agent for fabrics and making same. 1,780,314; Nov. 4.
Pierson, Charles W., C. Y. Fitzgerald, and G. E. Thomae, assignors of one-fourth to E. D. Pearson, Los Angeles, Calif. Banjo mute. 1,780,361; Nov. 4.
Pixley, John H., Harrison, Mich. Grass-pulling attachment for spring-toothed harrows. 1,780,840; Nov. 4.
Plaggmier, Robert C. (See Janda, G. W., and Plaggmier.)
Pneumatic Conveyance & Extraction (1929) Limited. (See Chew, Samuel N., assignor.)
Polson, Alexander. (See Eckersley, James E., assignor.)
Pope, Lyman B., Haverhill, assignor to Pope Machinery Corporation, Haverhill, Mass. Heel-shank-shaping machine. 1,780,841; Nov. 4.
Pope Machinery Corporation. (See Pope, Lyman B., assignor.)
Postindex Company. (See Attwood, Charles E., assignor.)
Poto, William L. (See Keller, W. D., and Poto.)
Powell, Henry K. (See McClelland, R., Powell, and Leopold.)
Pratt, William B., Wellesley, Mass., assignor by mesne assignments, to Dispersions Process, Inc., Dover, Del. Treating rubber and product produced thereby. 1,780,657; Nov. 4.
Precision Metal Workers. (See Grunwald, Albert C., assignor.)
Prescott Iron Works. (See Prescott, Sumner K., assignor.)
Prescott, Sumner K., assignor to Prescott Iron Works, Seattle, Wash. Lumber trimmer. 1,780,362; Nov. 4.
Pribnow, Arthur W. (See Pribnow, J. F., and Mitchell, assignors.)
Pribnow, John F., deceased, San Diego, Calif., and E. F. Mitchell, Spokane, Wash.; said Mitchell assignor to A. W. Pribnow, San Diego, Calif.; M. L. Schultz, administrator. Circular-saw-sharpening machine. 1,780,886; Nov. 4.
Price, Thornton W., New Brunswick, N. J. Motor suspension. 1,780,719; Nov. 4.
Primas, Alexander, assignor of one-fourth to J. G. Miller, Buffalo, N. Y. Ventilating window lock. 1,780,274; Nov. 4.
Proctor, George A., Los Angeles, Calif. Sun-bath apparatus. 1,780,363; Nov. 4.
Proctor, Hailey A., Sylvia, Kans. Badge or similar article. Des. 82,448; Nov. 4.
Proos, Cornelis F., assignor to Naamlooze Venootschap Nederlandsche Kabelfabriek, Delft, Netherlands. Junction box for high-tension electric cables. 1,780,686; Nov. 4.
Prudhomme, Eugène A., Neuilly-sur-Seine, assignor to Societe Internationale des Procedes Prudhomme (S. I. P. P.), Paris, France. Process and apparatus for treating hydrocarbons. 1,780,536; Nov. 4.
Pullwitt, Herman P., Oak Park, assignor to McIntosh Electrical Corporation, Chicago, Ill. Electrotherapeutic machine. 1,780,600; Nov. 4.
Pungs, Wilhelm, Ludwigshafen-on-the-Rhine, assignor to I. G. Farbenindustrie (Aktiengesellschaft), Frankfort-on-the-Main, Germany. Oxidation of fats, waxes, and resins. 1,780,632; Nov. 4.
Pungs, Wilhelm, Ludwigshafen-on-the-Rhine, and M. Jahrstorfer, Mannheim, assignors to I. G. Farbenindustrie Aktiengesellshaft, Frankfort-on-the-Main, Germany. Production of wax compositions. 1,780,633; Nov. 4.
Pursel, Harold M., assignor to Sharrock and Pursel, Casper, Wyo. Power-operated scraper. 1,780,401; Nov. 4.
Pyrene-Minimax Corporation. (See Burmeister, Hans, assignor.)
Radiant Lighting Fixvture Co. (See Bohl, Hugo, assignor.)
Radio Condenser Company. (See Cramer, Stanley S., assignor.)
Radio Corporation of America. (See White, Sidney Y., assignor.)
Randerson, John E. H., Albany, N. Y. Package of toilet paper. 1,780,275; Nov. 4.
Ranney, Willet B., assignor to Wm. Wrigley, Jr., Company, Chicago, Ill. Measuring device. 1,780,601; Nov. 4.
Rasmussen, Charles, assignor of one-half to R. T. Ingalls, Racine, Wis. Metal-sawing machine. 1,780,439; Nov. 4.
Read, David Y., Washington, D. C., assignor to L C Smith & Corona Typewriters Inc., Syracuse, N. Y. Typewriting machine. 1,780,537; Nov. 4.
Recko, Joseph A., Bridgeport, Conn. Pipe fitting. 1,780,402; Nov. 4.
Redfield, Cleveland. (See Blackman, Birt G., assignor.)
Redfield, Snowden B., and J. Naab, Easton, Pa., assignors to Ingersoll-Rand Company, Jersey City, N. J. Accumulator timing element for pressure-fluid-supply valves. 1,780,538; Nov. 4.
Redington, John C., Geneva, Ill., assignor by mesne assignments to St. Regis Paper Company, New York, N. Y. Forming valve bags. 1,780,720; Nov. 4.
Reiss Premier Pipe Co. (See Hirsch, Rudolph, assignor.)
Reliance Company, The. (See Wilms, Gustav O., assignor.)
Remington Rand Incorporated. (See Lasker, William W., assignor.)
Remington Rand Incorporated. (See Lebeis, Martin, assignor.)
Replogle, John R., assignor to Kelvinator Corporation, Detroit, Mich. Valve. 1,780,242; Nov. 4.
Replogle, John R., assignor to Kelvinator Corporation, Detroit, Mich. Mechanically-refrigerated cabinet. 1,780,243; Nov. 4.
Reserve Holding Company. (See Crocker, Thomas F., assignor.)
Rex Research Corporation. (See Miller, James L., assignor.)
Reynolds, Frederick W., Grantwood, N. J., assignor to American Telephone and Telegraph Company. Electro-optical transmission. 1,780,364; Nov. 4.
Richards, Frank W., Nampa, Idaho. Door holder. 1,780,403; Nov. 4.
Richardson, Charles M., and Y. H. Bodle, Akron, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y. Apparatus for soling and pressing footwear. 1,780,769; Nov. 4.
Richardson, Led L., assignor to The Cleveland Rock Drill Company, Cleveland, Ohio. Hole-cleaning valve for rock drills. 1,780,440; Nov. 4.
Richter, George A., assignor to Brown Company, Berlin, N. H. Treating fiber of nonconiferous origin. 1,780,539; Nov. 4.
Richter, George A., assignor to Brown Company, Berlin, N. H. Production of sulphite pulp. 1,780,842; Nov. 4.
Rieber, Frank, San Francisco, Calif. Method and apparatus for recording explosive shocks. 1,780,567; Nov. 4.
Riley, Robert S., and J. H. McElroy, assignors to Riley Stoker Corporation, Worcester, Mass. Underfeed stoker. 1,780,796; Nov. 4.
Riley Stoker Corporation. (See Riley, R. S., and McElroy, assignors.)
Risler Corporation of America. (See Risler, Jacques, assignor.)
Risler, Jacques, Paris, France, assignor to Risler Corporation of America, Kansas City, Mo. Rectifying tube. 1,780,504; Nov. 4.
Ritter, Paul E., Roselle, N. J., assignor to American Telephone and Telegraph Company. Telephone and telegraph circuit. 1,780,244; Nov. 4.
Roark, Robert H., Waco, assignor by mesne assignments to The General Ice Scoring Machine Company, Dallas, Tex. Scoring ice blocks by fluid pressure. 1,780,441; Nov. 4.
Roberts, Leland C., Towaco, N. J., assignor to American Telephone and Telegraph Company. Telephone and telegraph system. 1,780,245; Nov. 4.
Roberts, Ralph S., and J. Votypka, assignors to Lebaron Detroit Company, Detroit, Mich. Convertible vehicle body construction. 1,780,797; Nov. 4.
Robertson, John H., London, England. Governor mechanism. 1,780,540; Nov. 4.
Robischon, Herbert. (See Robischon, Michael F., assignor.)
Robischon, Michael F., assignor of one-half to H. Robischon, Utica, N. Y. Step-in combination garment. 1,780,798; Nov. 4.
Roe, Ernest S., assignor to The King Manufacturing Company, Plymouth, Mich. Spring air gun. 1,780,541; Nov. 4.
Roessler & Hasslacher Chemical Company, The. (See Lehrecke, Hans, assignor.)

Roessler & Hasslacher Chemical Company, The. (See Whitby, George S., assignor.)
Rogers, Walter G., Leavenworth, Kans. Hillside tractor. 1,780,799; Nov. 4.
Rose, George H. (See Coons, P. T., and Rose.)
Rose, William D., Portland, Oreg. Magazine cover. Des. 82,449; Nov. 4.
Rosenthal, Samuel J., Brooklyn, N. Y. Tassel-making art. 1,780,602; Nov. 4.
Rotary Utility Corporation. (See McGerry, J. J., and Whiting, assignors.)
Rowland, Davidge H., assignor to Locke Insulator Corporation, Baltimore, Md. Glass insulator and making same. 1,780,246; Nov. 4.
Rubber Service Laboratories Company, The. (See Scott, Winfield, assignor.)
Ruffing, John, sr., Nokomis, Ill. Oil-gauge-rod wiper. 1,780,505; Nov. 4.
Ruilman, Elmer E. (See Andres, Lloyd J., assignor.)
Rutquist, Axel, Portland, Oreg. Combination tool. 1,780,506; Nov. 4.
Sabin, Herbert B. (See Fisher, Albert H., assignor.)
Sagendorph, William K., executor. (See Hopkins, George F.)
Sager, Abraham, Chicago, Ill. Ring. Des. 82,450; Nov. 4.
St. Regis Paper Company. (See Redington, John C., assignor.)
Salustri, Emilio and G., Detroit, Mich. Portable time-stamping mechanism. 1,780,770; Nov. 4.
Salustri, Giacomo. (See Salustri, Emilio and G.)
Scarpa, Nunzio, New York, N. Y. Safety device for elevators. 1,780,568; Nov. 4.
Scarpin, Fiorenzo. (See Mansolini, E., Capobianco, and Scarponi.)
Schaefer, Bernard, Cincinnati, Ohio. Table lighting fixture. Des. 82,451; Nov. 4.
Schaefer, John H., Grosse Pointe, Mich. Clock case. Des. 82,452; Nov. 4.
Schafer, Robert A. (See Galloway, R. M., and Schafer.)
Schaffer, Walter, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Coupling arrangement for frequency changers. 1,780,542; Nov. 4.
Schatz, Desiderius, Zittau, Germany. Device for mechanically determining and indicating the degree of usage of a mechanism. 1,780,603; Nov. 4.
Scheidemandel, Hans, Munich, Germany. Device for the manufacture of doweled wooden boards. 1,780,721; Nov. 4.
Scheiwer, Albert T., Erie, Pa. Curved-blade barber clippers. 1,780,276; Nov. 4.
Schimpf, Robert. (See Brückel, W., and Schimpf.)
Schmidt, Otto C., Sharpsburg, Pa. Grease. 1,780,315; Nov. 4.
Schmieding, Warren H. F., Dayton, Ohio, assignor, by mesne assignments, to Frigidaire Corporation. Refrigerating apparatus. 1,780,442; Nov. 4.
Schmieske, Carl. (See Bauer, G., and Schmieske.)
Schmitt, George P., Oakland, Calif. Paper clip. 1,780,893; Nov. 4.
Schneider, Edwin J., Jamaica, and P. Wiggins, Maspeth, assignors to Eastern Tube and Tool Co., Inc., Brooklyn, N. Y. Electric conductor. 1,780,722; Nov. 4.
Schoemaker, Richard L. A., Delft, Netherlands. Telegraphing in Morse code and apparatus therefor. 1,780,507; Nov. 4.
Schooling, Luther L., assignor to Electric Wheel Company, Quincy, Ill. Wheel. 1,780,404; Nov. 4.
Schuette, Johann, Lichterfelde-Ost, near Berlin, Germany. Framework structure for the steering gear of airships. 1,780,569; Nov. 4.
Schul, Max, Brussels, Belgium. Propeller for vessels and aircraft. 1,780,843; Nov. 4.
Schulse, H. E., Inc. (See Schulse, Herman E., assignor.)
Schulse, Herman E., New York, N. Y., assignor to H. E. Schulse Inc. Dispensing container. 1,780,508; Nov. 4.
Schultz, M. L., administrator. (See Pribnow, J. F., and Mitchell.)
Schulz, Hans F., Bomlitz, near Walsrode, Germany. Applying nitrocellulose varnishes. 1,780,844; Nov. 4.
Schumann, Otto W., Magdeburg, Germany. Rotary internal-combustion engine. 1,780,443; Nov. 4.
Schütz, Ludwig. (See Berendes, R., and Schütz.)
Schwartz, Gerhardt F., St. Louis, Mo. Hot-water tank. 1,780,316; Nov. 4.
Schwarzmann, Wolfgang E., Longmeadow, and C. Strniste, Springfield, Mass., assignors, by mesne assignments, to The Electric Auto-Lite Company. Governor for battery-ignition systems. 1,780,771; Nov. 4.
Scott-Paine, Hubert, Hythe, Southampton, England. Steering water craft. 1,780,767; Nov. 4.
Scott, Winfield, Nitro, W. Va., assignor to The Rubber Service Laboratories Company, Akron, Ohio. Vulcanization of rubber. 1,780,604; Nov. 4.
Scully, John T., New York, N. Y. Combined safety-razor handle, blade support, and guard. Des. 82,453; Nov. 4.
Sears, Roebuck and Co. (See Fortier, Leon D., assignor.)
Seeley, Fay L., and C. L. Snyder, assignors to The Evans Auto Loading Co. Inc., Detroit, Mich. Shipping device. 1,780,277; Nov. 4.
Selberling Rubber Company. (See Messer, Vladimir V., assignor.)
Shapiro, Hyman, assignor to S. Perlo, Brooklyn, N. Y. Illuminated base for statuary and the like. Des. 82,454; Nov. 4.
Sharrock and Pursel. (See Pursel, Harold M., assignor.)
Sharrow, Percy A., East Windsor, Ontario, Canada. Pencil. 1,780,405; Nov. 4.
Shaver, Walter E., Schenectady, N. Y. Chromatic playing attachment for harmonicas. 1,780,368; Nov. 4.
Shaw-Perkins Manufacturing Company. (See Davis, Archibald H., jr., assignor.)
Shaw-Perkins Manufacturing Company. (See Sonneborn, Charles, assignor.)
Shaw, William E. V., Minneapolis, Minn. Bumper rack. 1,780,209; Nov. 4.
Shekter, Adela F., Jamaica, N. Y. Enema pad. 1,780,800; Nov. 4.
Shepherd, Charles B., Springfield, Mass., assignor, by mesne assignments, to The P & M Company, Chicago, Ill. Rail anchor. 1,780,444; Nov. 4.
Sherman, Thomas L., Melbourne, Australia, assignor to Michell-Crankless Engines Corporation, New York, N. Y. Crankless engine. 1,780,365; Nov. 4.
Sherwig, John M., Sharon, Pa. Dirigible headlight. 1,780,445; Nov. 4.
Sherwood, Walter N., North Hoosick, N. Y. Paper-pulp beater. 1,780,845; Nov. 4.
Shimer, Elmer S. and H. L., assignors to Samuel J. Shimer & Sons, Milton, Pa. Cutter heads. 1,780,846; Nov. 4.
Shimer, Harold L. (See Shimer, Elmer S. and H. L.)
Shimer, Samuel J., & Sons. (See Shimer, Elmer S. and H. L., assignors.)
Shinn, Roy J. (See Miller, W. E., Shinn, and Grove.)
Shlenker, Leon M., assignor to International Harvest Hat Co., St. Louis, Mo. Insect-guard attachment for hats. 1,780,801; Nov. 4.
Shoe Form Co., The. (See De Witt, William J., assignor.)
Shoemaker, Joseph A., Bennington, Vt. Drying device. 1,780,446; Nov. 4.
Short, Charles R., Dayton, Ohio, assignor to General Motors Research Corporation, Detroit, Mich. Control for oil filter. 1,780,723; Nov. 4.
Short, Charles R., assignor to General Motors Research Corporation, Detroit, Mich. Rubber engine support. 1,780,724; Nov. 4.
Showers, Charles M., Madison, Wis. Wall form. 1,780,366; Nov. 4.
Shows, John E., Harrisburg, and W. T. Dunn, Houston, Tex. Rotary core drill. 1,780,447; Nov. 4.
Shultz, Chauncey F., St. Louis, Mo. Brush-making machine. 1,780,278; Nov. 4.
Siebenlist, Anthony G., assignor, by mesne assignments, to Milcor Steel Company, Milwaukee, Wis. Rib clip. 1,780,406; Nov. 4.
Siebenmorgen, Louie G., Hiawatha, Kans. Stanchion latch and operating means therefor. 1,780,367; Nov. 4.
Siedler, Philipp, and A. Moeller, Frankfort-on-the-Main-Griesheim, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Liquid supersaturated solution of thiocarbanilide. 1,780,634; Nov. 4.
Simpson, Alfred M., Manila, P. I. Rotary cutter for sugar cane and the like. 1,780,247; Nov. 4.
Singer Manufacturing Company, The. (See Myers, Walter, assignor.)
Singhurst, James T. (See McAdams, S. E. Skaggs, and Singhurst.)
Skaggs, Howard P. (See McAdams, S. E. Skaggs, and Singhurst.)
Skinner, William T., Leonia, N. J. Flash device. 1,780,509; Nov. 4.
Slate Aircraft Corporation. (See Slate, Thomas B., assignor.)
Slate, Thomas B., Glendale, Calif., assignor to Slate Aircraft Corporation. Metallic airship of the rigid type. 1,780,448; Nov. 4.
Smith, A. O., Corporation. (See Heineman, Warren F., assignor.)
Smith, Alfred A., New York, N. Y. Electrical fixture. 1,780,847; Nov. 4.
Smith, Benjamin, Chelsea, Mass. Edible container for ice cream. Des. 82,455; Nov. 4.
Smith, Harry C., assignor to The Autodrink Corporation, New York, N. Y. Beverage dispensing and display device. 1,780,687; Nov. 4.
Smith, L. C. & Corona Typewriters Inc. (See Read, David Y., assignor.)
Smith, Walter E., Warwick Downs, assignor to C. G. King & Co., Inc., Providence, R. I. Shoe ornament. Des. 82,456; Nov. 4.
Smith, Walter E., Daytona Beach, Fla. Insect repeller. 1,780,407; Nov. 4.
Smith, Walter E., Daytona Beach, Fla. Insect repeller. 1,780,408; Nov. 4.
Smith, William, Detroit, Mich. Plant-pot support. 1,780,279; Nov. 4.
Smith, William A., jr. (See Smith, William A., sr., and W. A., jr.)
Smith, William A., sr., Easton, Pa., and W. A. Smith, jr., Phillipsburg, assignors to Ingersoll-Rand Company, Jersey City, N. J. Valve mechanism for rock drills. 1,780,725; Nov. 4.
Smith, Woodruff R. (See Hammer, F. L., Smith, and Esborn.)

Snell, Foster D., Brooklyn, N. Y. Hair waving. 1,780,449; Nov. 4.
Snow, Chester A., jr., Washington, D. C. Determining drift of aircraft. 1,780,369; Nov. 4.
Snyder, Clifford L. (See Seeley, F. L., and Snyder.)
Snyder, Clifford L., Detroit, Mich., assignor to The Evans Auto Loading Co. Inc. Shipping device. 1,780,317; Nov. 4.
Snyder, Clifford L., Detroit, Mich., assignor to The Evans Auto Loading Co. Inc. Shipping device. 1,780,318; Nov. 4.
Société Industrielle de Matériel d'Entreprise et de Construction. (See Dubois, Charles, assignor.)
Societe Internationale Des Procedes Prudhomme (S. I. P. P.). (See Prudhomme, Eugène A., assignor.)
Socony Burner Corporation. (See Metcalfe, Robert F., assignor.)
Sonneborn, Charles, West Pittsburg, assignor to Shaw-Perkins Manufacturing Company, Pittsburgh, Pa. Deformed-tube radiator. 1,780,319; Nov. 4.
Sparkletts Bottled Water Corporation. (See Washburne, Arthur L., assignor.)
Spaulding, Clyde V. (See Steinmetz, J. A., and Spaulding.)
Speight, Eric A., Blackley, Manchester, assignor to Imperial Chemical Industries Limited, London, England. Dyeing of cellulose esters and ethers. 1,780,320; Nov. 4.
Spencer, Owen H., Indianapolis, Ind. Coke means for two-cycle engines. 1,780,635; Nov. 4.
Sperry, Arthur G., Hollis, N. Y., assignor to Intertype Corporation, Brooklyn, N. Y. Safety device for typographical machines. 1,780,848; Nov. 4.
Spillman, Porter R., South Bend, Ind. Siding gauge and scribe. 1,780,849; Nov. 4.
Spinney, Carl E., West Lafayette, Ind. Automatic tank loader for fuel trucks. 1,780,605; Nov. 4.
Spray, Lester E., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Master-control apparatus. 1,780,658; Nov. 4.
Spreen, Charles C., Detroit, Mich. Journal-bearing seal. 1,780,248; Nov. 4.
Spreen, Charles C., Detroit, Mich. Journal-bearing seal. 1,780,249; Nov. 4.
Staf, Axel H., assignor to The Alvin Corporation, Providence, R. I. Spoon or similar article. Des. 82,457; Nov. 4.
Staley, Alonzo D., assignor to The American Laundry Machinery Company, Cincinnati, Ohio. Laundry apparatus. 1,780,210; Nov. 4.
Staminart Corporation, The. (See Stephens, Noble E., assignor.)
Standard Computing Scale Company, The. (See Jaenichen, Louis, assignor.)
Standard Mirror Company. (See La Hodny, William, assignor.)
Standard Oil Company of California. (See Danner, P. S., and Muth, assignors.)
Standard Steel and Bearings Incorporated. (See Hodge, George O., assignor.)
Standard Steel Car Corporation. (See Christianson, Andrew, assignor.)
Standard Trump Bros. Machine Company. (See Lansdown, Norman D., assignor.)
Stanitz, Jacques, assignor to The Youngstown Pressed Steel Company, Warren, Ohio. Casing for an oil pump. Des. 82,458; Nov. 4.
Stanley Works, The. (See Crowe, John M., assignor.)
Steel Heddle Manufacturing Company. (See Kaufmann, John J., assignor.)
Steinmetz, John A., and C. V. Spaulding, Van Vert, Ohio. Rake-cleaning attachment. 1,780,688; Nov. 4.
Stephens, Noble E., Woodside, L. I., assignor to The Staminart Corporation, New York, N. Y. Article of furniture. 1,780,570; Nov. 4.
Stern-Gesellschaft fur Moderne Grundbautechnik m. b. H. (See Zeissl, Ignaz, assignor.)
Stern, Louis, Company. (See Kraemer, August F., assignor.)
Stevens, John A., Lowell, Mass., assignor to The Upson Company, Lockport, N. Y. Heat-transmitting platen. 1,780,280; Nov. 4.
Stewart-Warner Corporation. (See Andrews, J. Lewis, assignor.)
Stewart-Warner Corporation. (See Olsen, John K., assignor.)
Stiegelmayer, Karl, New York, N. Y. Jazz organ. 1,780,548; Nov. 4.
Stine, Charles M., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Substituted guanidine-aldehyde condensation product. 1,780,636; Nov. 4.
Stockton, Walter T. (See Kinney, F. C., and Stockton.)
Stoltz, Carl F., Delhi, Ohio, and G. W. Ferling, Indianapolis, Ind., assignor to The Union Switch & Signal Company, Swissvale, Pa. Apparatus for testing automatic train-control equipment. 1,780,726; Nov. 4.
Storey, Willard M., Winston-Salem, N. C. Fastener for packing cases. 1,780,544; Nov. 4.
Strniste, Charles. (See Schwarzmann, W. E., and Strniste.)
Strong, Charles W., Portland, Oreg. Golf-ball washer. 1,780,850; Nov. 4.
Strong, Leon B., Washington, D. C., assignor of twenty per cent to F. G. Campbell. Method of and apparatus for liquefying gases. 1,780,250; Nov. 4.
Strongson, Herman L., New York, N. Y. Plug cap. 1,780,851; Nov. 4.
Sullivan, Leo V., Warren, Ohio. Glazing clip. 1,780,852; Nov. 4.
Sulzer Freres Societe Anonyme. (See Hefti, Wilhelm, assignor.)
Sundstrand Machine Tool Co. (See Svenson, Ernest J., assignor.)
Sun Rise Lamp Mfg. Co. (See Abel, Frank J., assignor.)
Superior Body Company. (See Paul, Sydney, assignor.)
Sutcliffe, Fred, jr., assignor to Mock, Judson, Voehringer Company, Inc., Philadelphia, Pa. Welt needle for knitting machines. 1,780,689; Nov. 4.
Sutcliffe, Stanley H., Radlett, England. Golf bag. 1,780,802; Nov. 4.
Svenson, Ernest J., assignor to Sundstrand Machine Tool Co., Rockford, Ill. Tool support for lathes. 1,780,606; Nov. 4.
Svenson, Ernest J., assignor to Sundstrand Machine Tool C., Rockford, Ill. Tool support for lathes. 1,780,607; Nov. 4.
Swanson, Swan A., New York, N. Y. Thread-rolling machine. 1,780,608; Nov. 4.
Syester, Vernis O., Linton, Ind. Switch for radioreceivers. 1,780,690; Nov. 4.
Tabulating Machine Company, The. (See Ewald, Bernhard K. F., assignor.)
Tabulating Machine Company, The. (See Page, Ralph E., assignor.)
Tabulating Machine Company, The. (See Weinlich, Hermann A., assignor.)
Teale, Wilbur, and H. F. McLauthlin, Seattle, assignors to Hydro-Oil Fire Corporation, Tacoma, Wash. Hydrooil burner. 1,780,571; Nov. 4.
Tenney, Perry L., Muncie, Ind. Wheel assembly. 1,780,370; Nov. 4.
Tenney, Perry L., Muncie, Ind., assignor to General Motors Corporation, Detroit, Mich. Rubber coupler. 1,780,727; Nov. 4.
Teplow, Solomon, Los Angeles, Calif. Telephone booth. 1,780,251; Nov. 4.
Terry, E. W., et al. (See White, James F., assignor.)
Terry, Earl W., et al. (See White, James F., assignor.)
Tessier, Joseph. (See Adam, Joseph F., assignor.)
Texas Company, The. (See Watson, Claude W., assignor.)
Thauss, Alfred, Cologne-Deutz, and G. Mauthe, Cologne-Holweide, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Water-soluble product derived from the fattery acids occurring in wool fat and preparing the same. 1,780,252; Nov. 4.
Thomae, George E. (See Pierson, C. W., Fitzgerald, and Thomae.)
Thomas, Adolph A., New York, N. Y. Electromagnetic transmitter. 1,780,409; Nov. 4.
Thomas, Thomas H., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Triple-valve device. 1,780,321; Nov. 4.
Thornburgh, Mabel H., Denver, Colo. Marcel cap. 1,780,887; Nov. 4.
Thurm, Léon, Paris, France. Optical device for radio cinematographic transmitters and receivers. 1,780,572; Nov. 4.
Tibbetts, Milton, assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle. 1,780,281; Nov. 4.
Time-O-Stat Controls Company. (See Koch, L. E. and Dever, assignors.)
Time-O-Stat Controls Company. (See Phelan, Louis A. M., assignor.)
Timken-Detroit Axle Company, The. (See Morgan, Mathew B., assignor.)
Toledo Scale Company. (See Ulrich, Edward F., assignor.)
Tomita, Urasaburo, Astoria, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 82,459; Nov. 4.
Tomita, Urasaburo, Astoria, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 82,460; Nov. 4.
Tomita, Urasaburo, Astoria, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 82,461; Nov. 4.
Törnebohm, Hilding V., assignor to Aktiebolaget Svenska Kullagerfabriken, Gottenborg, Sweden. Radius-template-grinding machine. 1,780,211; Nov. 4.
Traylor Engineering & Manufacturing Company. (See Bernhard, Richard, assignor.)
Trevett, Earl H. (See Draper, C. H., and Trevett.)
Tsuji, Shingo, Tokyo, Japan. Apparatus for enabling hatch loading in the rain for ships or the like. 1,780,322; Nov. 4.
Tucker, Max D., Detroit, Mich., assignor to The Evans Auto Loading Co. Inc. Shipping of automobiles. 1,780,282; Nov. 4.
Tupta, Frank, Cleveland, Ohio. Aeroplane. 1,780,410; Nov. 4.
Typograph-Gesellschaft m. b. H. (See Dorneth, Julius, assignor.)
Udy, Marvin J., Niagara Falls, N. Y. Producing two-toned finish on metal surfaces. 1,780,212; Nov. 4.
Uebelhoer, Marvin. (See Uebelhoer, Walter, assignor.)
Uebelhoer, Walter, assignor of one-half to M. Uebelhoer, Buffalo, N. Y. Wheel puller. 1,780,888; Nov. 4.
Ulrich, Edward F., assignor to Toledo Scale Company, Toledo, Ohio. Weighing scale. 1,780,411; Nov. 4.

Union Railway Equipment Company. (See O'Connor, Arthur F., assignor.)
Union Switch & Signal Company, The. (See Baughman, George W., assignor.)
Union Switch & Signal Company, The. (See Spray, Lester E., assignor.)
Union Switch & Signal Company, The. (See Stoltz, C. F., and Ferling, assignors.)
United Shoe Machinery Corporation. (See Cosgrove, John W., assignor.)
United Shoe Machinery Corporation. (See Kinney, Fay D., assignor.)
United Shoe Machinery Corporation. (See Leveque, Bernard T., assignor.)
Uppercu-Burnelli Corporation, The. (See Burnelli, Vincent J., assignor.)
Upson Company, The. (See Stevens, John A., assignor.)
Van Ackeren, Joseph, assignor to The Koppers Company, Pittsburgh, Pa. Coking retort oven. 1,780,803; Nov. 4.
Van Brunt, John, Flushing, assignor to International Combustion Engineering Corporation, New York, N. Y. Apparatus for generating steam by the burning of fuel in suspension. 1,780,283; Nov. 4.
Van Brunt, John, Flushing, assignor to International Combustion Engineering Corporation, New York, N. Y. Finely-divided-fuel-burning boiler furnace. 1,780,284; Nov. 4.
Van Brunt, John, Flushing, assignor to International Combustion Engineering Corporation, New York, N. Y. Boiler. 1,780,285; Nov. 4.
Van Ranst, Cornelius W., Auburn, Ind., assignor, by mesne assignments, to Manning & Co., Chicago, Ill. Radiator shell. Des. 82,462; Nov. 4.
Velton, Stephen J., Houston, Tex. Aircraft motor. 1,780,450; Nov. 4.
Vereinigte Schuhfabriken Berneis-Wessels A. G. (See Klauer, Philipp, assignor.)
Vertucci, Vincent M., Jersey City, N. J. Preparing chromium-plated ferrous articles. 1,780,213; Nov. 4.
Volz, Charles A., Birmingham, Mich. Level device. 1,780,253; Nov. 4.
Von Dorn, Theodore F. (See Norwood, Harry G., assignor.)
Von Frankenberg, Arthur, New York, N. Y. Ash tray or similar article. Des. 82,463; Nov. 4.
Vosika, Ludvik. (See Vosika, Robert and L.)
Vosika, Robert and L., Wilber, Nebr. Bottle-cleaning apparatus. 1,780,451; Nov. 4.
Votypka, John. (See Roberts, R. S., and Votypka.)
Wadsten, Sten, Bloomfield, N. J., assignor to Westinghouse Lamp Company. Machine for making spaced coiled filaments. 1,780,609; Nov. 4.
Wager, Robert H., Jersey City, N. J. Lather-forming device. 1,780,573; Nov. 4.
Wagner, Allen P., Jonestown, Pa. Table. 1,780,254; Nov. 4.
Wagner, Carl, administrator. (See Elsner, Hermann.)
Wagner, Frederick H., assignor to The Bartlett Hayward Company, Baltimore, Md. Liquid and gas contact apparatus. 1,780,255; Nov. 4.
Walker Dishwasher Corporation. (See Walker, Forrest A., assignor.)
Walker, Forrest A., assignor to Walker Dishwasher Corporation, Syracuse, N. Y. Dishwasher. 1,780,452; Nov. 4.
Wall, P., Manufacturing Supply Company. (See Leety, H. E., Eckert, and Page, assignors.)
Wallace, John F., Shaker Heights, assignor to The Cleveland Pneumatic Tool Company, Cleveland, Ohio. Shock-absorbing strut. 1,780,659; Nov. 4.
Wallace, John F., Shaker Heights, assignor to The Cleveland Pneumatic Tool Company, Cleveland, Ohio. Shock-absorbing strut for aircraft. 1,780,660; Nov. 4.
Walsh, Vincent G., London, England. Emulsifying and analogous apparatus. 1,780,353; Nov. 4.
Walss, Walther, Meggen, near Lucerne, Switzerland. Social game. 1,780,256; Nov. 4.
Ward, Charles E., Charleston, W. Va. Seal for stern bearings for propeller shafts. 1,780,804; Nov. 4.
Waring, William G., Webb City, Mo. Utilization of galvanizer's waste. 1,780,323; Nov. 4.
Warner, Harry B., Hagerstown, Md. Radio cabinet. Des. 82,464; Nov. 4.
Warr, Harold G., Park Ridge, assignor to The P. & M. Company, Chicago, Ill. Rail anchor. 1,780,412; Nov. 4.
Warren Telechron Company. (See Goff, Errol W., assignor.)
Warren, Thomas R., Norton-on-Tees, assignor to Imperial Chemical Industries Limited, London, England. Automatic control of turbo-alternators. 1,780,691; Nov. 4.
Warwick China Company. (See Kane, Bernard N., assignor.)
Washburne, Arthur L., assignor to Sparklets Bottled Water Corporation, Los Angeles, Calif. Bottle-cleansing machine. 1,780,772; Nov. 4.
Watson, Claude W., Port Arthur, Tex., assignor to The Texas Company, New York, N. Y. Treating hydrocarbon oils. 1,780,286; Nov. 4.
Watts, Cleal T., and F. N. Bay, Albia, Iowa. Internal combustion engine. 1,780,854; Nov. 4.
Wearham, Gordon A., London, England. Display apparatus and operating the same. 1,780,773; Nov. 4.
Weaver, Cora P., Alhambra, Calif. Automobile curtain. 1,780,257; Nov. 4.
Webb, Jervis B. (See Da Costa, James S., assignor.)
Webber, Calvin R., assignor to The Packer Manufacturing Co., Inc., New York, N. Y. Bottle structure. 1,780,728; Nov. 4.
Weber Electric Company. (See Weber, John, assignor.)
Weber Engine Company. (See Gold, Samuel B. and B. E., assignor.)
Weber, John, assignor to Weber Electric Company, Schenectady, N. Y. Electric-lamp socket. Des. 82,465; Nov. 4.
Weber, John, assignor to Weber Electric Company, Schenectady, N. Y. Electric-lamp socket. Des. Des. 82,466; Nov. 4.
Weber, John, assignor to Weber Electric Company, Schenectady, N. Y. Electric-lamp socket. Des. 82,467; Nov. 4.
Webster, William A., Galesburg, assignor of one-third to L. J. Castle, Abingdon, Ill. Steam engine. 1,780,324; Nov. 4.
Wedberg, Axel G. W., Chicago, Ill. Mold for concrete buildings. 1,780,661; Nov. 4.
Weinberg, Fred, White Plains, N. Y. Combined cigarette extinguisher and residue receptacle. 1,780,258; Nov. 4.
Weinlich, Hermann A., Berlin, Germany, assignor to The Tabulating Machine Company, Endicott, N. Y. Typewriter punch with column cut-out. 1,780,610; Nov. 4.
Weisberg, Sidney M., Brooklyn, N. Y. Tire-inflation device. Des. 82,468; Nov. 4.
Weiss, Joseph, Chicago, Ill. Door check. 1,780,662; Nov. 4.
Wenalan, Hannah, Highland Park, Ill. Chopper. 1,780,453; Nov. 4.
Wery, Jules, deceased, Deerfield; M. Wery, administratrix, assignor to S. G. Gorsline, River Forest, Ill. Canclosing machine. 1,780,729; Nov. 4.
Wery, May, administratrix. (See Wery, Jules.)
Westinghouse Air Brake Company, The. (See Thomas, Thomas H., assignor.)
Westinghouse Lamp Company. (See Fleischmann, Christian, assignor.)
Westinghouse Lamp Company. (See Wadsten, Sten, assignor.)
Wheatley Patents Ltd. (See Wheatley, Walter H., assignor.)
Wheatley, Walter H., assignor to Wheatley Patents Ltd., London, England. Making helical cutters. 1,780,805; Nov. 4.
Wheeler, Clem E., Oak Park, Ill. Office desk. 1,780,287; Nov. 4.
Whitby, George S., Montreal, Quebec, Canada, assignor by mesne assignments to The Roessler & Hasslacher Chemical Company, New York, N. Y. Substituted thiuram polysulphide and process of making. 1,780,545; Nov. 4.
White, Ezekiel F., Hartford, assignor of G. V. Lassen, West Hartford, Conn. Separator. 1,780,774; Nov. 4.
White, Frank. (See Bull, F. and White.)
White, James F., assignor of ten per cent to E. W. Terry, Richmond, ten one-hundredths to E. W. Terry, Albany, and sixty one-hundredths to F. Candle, Richmond, Calif. Internal-combustion engine. 1,780,454; Nov. 4.
White, Sidney Y., assignor, by mesne assignments, to Radio Corporation of America, New York, N. Y. Electrical amplifier circuits. 1,780,611; Nov. 4.
Whiting, Charles H. (See McGerry, J. J., and Whiting.)
Wiggins, Peter. (See Schneider, E. J., and Wiggins.)
Wiley, Samuel, Metuchen, N. J. Flare. 1,780,214; Nov. 4.
Willamette-Ersted Company. (See Gorbutt, Sidney B., assignor.)
Williams, Alfred P., Madisonville, Ky. Toy electrically-operated shovel. 1,780,806; Nov. 4.
Williams, Clinton R., New York, N. Y. Fountain-pen housing. 1,780,546; Nov. 4.
Williams, Ernest, Stone, England. Trepan tool with radial cage, cutter, and guide. 1,780,325; Nov. 4.
Williams, Harry, Vancouver, British Columbia, Canada. Cutlery-cleaning device. 1,780,637; Nov. 4.
Williams, Ira. (See Burnett, W. B., and Williams.)
Williams, Ira, and W. B Burnett, Pittsburgh, Pa., assignors, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Aldehyde amine condensation product. 1,780,326; Nov. 4.
Williams, Leroy E., assignor to Highway Trailer Company, Edgerton, Wis. Dump-body vehicle. 1,780,775; Nov. 4.
Williams, Leroy E., assignor to Highway Trailer Company, Edgerton, Wis. Trailer-frame structure. 1,780,776; Nov. 4.
Williams, Lewis S., Romsey, England. Boot and shoe sock. 1,780,574; Nov. 4.
Williams, Paul F., assignor to G. & W. Electric Specialty Co., Chicago, Ill. Combination pot head and series cut-out. 1,780,413; Nov. 4.
Williams, William R., Salt Lake City, Utah. Toy. 1,780,855; Nov. 4.
Williamsport Mirror & Glass Co. (See Maculen, Adolph, assignor.)
Wilms, Gustav O., Milwaukee, Wis., assignor, by mesne assignments, to The Reliance Company, Wilmington, Del. Electrical switch. 1,780,216; Nov. 4.

Wilson, Alfred R., assignor, by mesne assignments, to Hutchins Car Roofing Company, Detroit, Mich. Hoist anchorage for car roofs. 1,780,730; Nov. 4.
Wilson, Moses W. H., East Lansing, assignor to Motor Wheel Corporation, Lansing, Mich. Wire-wheel-assembly device. 1,780,215; Nov. 4.
Wiltse Appliance Co. (See Wiltse, Sumner, assignor.)
Wiltse, Sumner, Detroit, Mich., assignor to Wiltse Appliance Co. Pump mechanism. 1,780,217; Nov. 4.
Winslow, Charles A., Vallejo, and E. J. Hall, Berkeley, Calif. Oil filter. 1,780,663; Nov. 4.
Winthrop Chemical Company. (See Berendes, R., and Schütz, assignors.)
Wirtel, Arthur F. (See De Groote, M., Monson, and Wirtel.)
Wise, Anthony G., Los Angeles, assignor to Metro-Goldwyn-Mayer Corporation, Culver City, Calif. Collapsible hub. 1,780,510; Nov. 4.
With, Bror, Skoyen, near Oslo, Norway. Ski tie. 1,780,511; Nov. 4.
Wolf, Robert B., New York, N. Y. Production of paper pulp. 1,780,638; Nov. 4.
Wolff, Oscar M., Chicago, Ill. Show case. 1,780,512; Nov. 4.
Woodman, Commodore B., assignor of one-half to O. Hoffman, Oakland, Calif. Bottle-capping machine. 1,780,327; Nov. 4.
Worthington Pump and Machinery Corporation. (See Grace, John F., assignor.)
Worthington Pump and Machinery Corporation. (See Lawaczeck, Franz, assignor.)
Wray, Thomas A., University City, Mo. Metal-lath support. 1,780,731; Nov. 4.
Wright, Fenton, Kansas City, Mo. Shirt fastener. 1,780,692; Nov. 4.
Wrigley, Wm., Jr., Company. (See Ranney, Willet B., assignor.)
Yawman & Erbe Manufacturing Company, The. (See Furlong, Roland A., assignor.)
Yazel, Jacob B., Marion, Ohio. Exhaust connection. 1,780,693; Nov. 4.
Yerk, Henry H., and W. J. Baumberger, Davenport, assignors to Micro Machine Company, Bettendorf, Iowa. Grinding machine. 1,780,288; Nov. 4.
Young, Adam P. (See Malone, John P., assignor.)
Young, Frank W., Verona, N. J. Method of and apparatus for applying cake reenforcements. 1,780,732; Nov. 4.
Young, Frank W., Verona, N. J. Filtering device. 1,780,777; Nov. 4.
Youngstown Pressed Steel Company, The. (See Stanitz, Jacques, assignor.)
Zeissl, Ignaz, assignor to Stern-Gesellschaft fur Moderne Grundbautechnik m. b. H., Vienna, Austria. Pile. 1,780,807; Nov. 4.
Zepp, Frank W., San Francisco, Calif. Terminal connecter for electrical conductors. 1,780,289; Nov. 4.
Ziler, Corban H. (See Cordonnier, H. J., and Ziler.)

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 4TH DAY OF NOVEMBER, 1930

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Accumulator timing element for pressure-fluid-supply valves. S. B. Redfield and J. Naab. 1,780,538; Nov. 4.
Acid and an irritant gas, Causing the simultaneous evolution of hydrocyanic. H. Lehrecke. 1,780,197; Nov. 4.
Acid, Evolution of hydrocyanic. H. Lehrecke. 1,780,196; Nov. 4.
Acid jar. R. W. Peterson. 1,780,534; Nov. 4.
Acid, Stabilization of hydrocyanic. H. Lehrecke. 1,780,198; Nov. 4.
Actuator for controlling devices. L. E. Koch and H. F. Dever. 1,780,302; Nov. 4.
Aeroplane. T. H. Duncombe. 1,780,672; Nov. 4.
Aeroplane. C. H. Mattblessen, jr. 1,780,561; Nov. 4.
Aeroplane. A. G. Parker. 1,780,565; Nov. 4.
Aeroplane. F. Tupta. 1,780,410; Nov. 4.
Aeroplanes, Controlling. F. H. Page. 1,780,838; Nov. 4.
Agitating, mixing, and circulating machine. T. O'Farrell. 1,780,360; Nov. 4.
Agitator. J. E. Bond. 1,780,166; Nov. 4.
Aircraft, Determining drift of. C. A. Snow, jr. 1,780,369; Nov. 4.
Aircraft motor. S. J. Velton. 1,780,450; Nov. 4.
Airfoil and fuselage connection. V. J. Burnelli. 1,780,812; Nov. 4.
Airplane. V. J. Burnelli. 1,780,813; Nov. 4.
Airplanes, Pneumatic suspension for. G. L. R. J. Messier. 1,780,531; Nov. 4.
Airship of the rigid type, Metallic. T. B. Slate. 1,780,448; Nov. 4.
Alarm: *See*—
Switch alarm.
Aldehyde amine condensation product. I. Williams and and W. B. Burnett. 1,780,326; Nov. 4.
Aldehyde amine condensation products. W. B. Burnett and I. Williams. 1,780,334; Nov. 4.
Alpha cellulose, Manufacturing. L. I. L. Durchman. 1,780,347; Nov. 4.
Ammonia-gas detector. L. A. Havens, jr. 1,780,483; Nov. 4.
Anchor, Rail. C. B. Shepherd. 1,780,444; Nov. 4.
Anchor, Rail. H. G. Warr. 1,780,412; Nov. 4.
Anchor, Railway-rail. H. G. Norwood. 1,780,714; Nov. 4.
Arch corrector. F. H. Griffith. 1,780,479; Nov. 4.
Area-estimating device for sheet material. B. S. Leslie. 1,780,237; Nov. 4.
Ash-tray structure. B. Iizuka. 1,780,591; Nov. 4.
Automobile. A. H. Leamy. Des. 82,428; Nov. 4.
Automobile. A. H. Leamy. Des. 82,437; Nov. 4.
Automobile table. F. Goldbecher. 1,780,706; Nov. 4.
Automobiles, Shipping of. M. D. Tucker. 1,780,282; Nov. 4.
Badge or similar article. H. A. Proctor. Des. 82,448; Nov. 4.
Bag: *See*—
Golf bag.
Bag clasp. E. G. Johnson. 1,780,880; Nov. 4.
Bag-tying machine. G. K. Crutchfield, jr., W. C. Northam, and J. C. Kinker, jr. 1,780,815; Nov. 4.
Baling press. G. W. Langford. 1,780,528; Nov. 4.
Bar: *See*—
Type bar.
Base for statuary and the like, Illuminated. H. Shapiro. Des. 82,454; Nov. 4.
Bath apparatus, Sun-. G. A. Proctor. 1,780,363; Nov. 4.
Beater, Paper pulp. W. N. Sherwood. 1,780,845; Nov. 4.
Bed, Convertible single or double. W. Lewis. 1,780,792; Nov. 4.
Bed, Hospital. E. L. Munson. 1,780,399; Nov. 4.
Bed-spring fabric. J. Johnson. 1,780,352; Nov. 4.
Belt carrier. A. Hein. 1,780,523; Nov. 4.
Berry picker. H. E. Carr. 1,780,876; Nov. 4.
Betainethiocyanate. R. Berendes and L. Schütz. 1,780,860; Nov. 4.
Binder, Loose-leaf. J. N. Mortensen. 1,780,835; Nov. 4.
Binder, Temporary. H. D. Manning. 1,780,429; Nov. 4.
Block: *See*—
Follower block. Insulating block.
Blow-out preventer, Automatic. P. B. Hart. 1,780,387; Nov. 4.
Blowtorch. H. Birnbaum. 1,780,152; Nov. 4.
Board: *See*—
Wall board.
Boards, Device for the manufacture of doweled wooden. H. Scheidemandel. 1,780,721; Nov. 4.
Boat. J. H. Freese. 1,780,467; Nov. 4.
Bobbin, Sewing-machine. R. K. Clark. 1,780,742; Nov. 4.
Bobbin-winding machine. B. T. Leveque. 1,780,304; Nov. 4.
Boiler: *See*—
Heating boiler. Steam boiler.
Boiler. J. Van Brunt. 1,780,285; Nov. 4.
Bolt and nut lock. W. R. Hewitt. 1,780,675; Nov. 4.
Book-backing and press-machine combination. J. W. Gross. 1,780,296; Nov. 4.
Booth, Telephone. S. Teplow. 1,780,251; Nov. 4.
Bottle cap and measuring device. E. L. Gordon. 1,780,875; Nov. 4.
Bottle-capping machine. E. S. Burdick, L. P. Byrne, and F. W. Chausse. 1,780,639; Nov. 4.
Bottle-capping machine. C. B. Woodman. 1,780,327; Nov. 4.
Bottle-cleansing machine. A. L. Washburne. 1,780,772; Nov. 4.
Bottle structure. C. R. Webber. 1,780,728; Nov. 4.
Bow tie. G. E. Figg. 1,780,418; Nov. 4.
Box: *See*—
Display box.
Box and making the same, Wire-bound. E. T. Johnson. 1,780,709; Nov. 4.
Brace: *See*—
Truss brace.
Bracelets, Extension device for. A. F. Kraemer. 1,780,824; Nov. 4.
Bracket: *See*—
Superheater bracket.
Bracket for tractor hoists. S. B. Gorbutt. 1,780,646; Nov. 4.
Braid, Braided waved. H. Berlin. 1,780,515; Nov. 4.
Brake drum. J. W. Johnston. 1,780,234; Nov. 4.
Brake-equalizing mechanism. O. M. Nacker. 1,780,498; Nov. 4.
Brakes, Metallic shoe for fluid-pressure-operated. B. A. Linderman. 1,780,200; Nov. 4.
Breaker mechanism. J. C. Baker. 1,780,415; Nov. 4.
Brush. J. Buchmann. 1,780,221; Nov. 4.
Brush-making machine. C. F. Shultz. 1,780,278; Nov. 4.
Brush or the like, Plasterer's. J. T. Cook. 1,780,340; Nov. 4.
Buckle, Shoe. C. G. King. Des. 82,432; Nov. 4.
Buffet. F. A. Gleichauf. Des. 82,421; Nov. 4.
Building. F. W. McDonald. Des. 82,442; Nov. 4.
Building construction. F. H. Halsey. 1,780,707; Nov. 4.
Building material of varying densities, Manufacturing. E. C. Loetscher. 1,780,623; Nov. 4.
Building or analogous structure, Amusement-park. E. C. Hoppe. Des. 82,427; Nov. 4.
Bulb-cullet-centering device. C. Fleischmann. 1,780,618; Nov. 4.
Bumper rack. W. E. V. Shaw. 1,780,209; Nov. 4.
Burner: *See*—
Fuel burner. Oil burner.
Hydrooil burner. Sludge burner.
Burner. J. L. Mandeville. 1,780,596; Nov. 4.
Burner and control therefor, Fuel. R. F. Metcalfe. 1,780,357; Nov. 4.
Button. E. G. Johnson. 1,780,555; Nov. 4.
Cabinet. H. Berg. Des. 82,413; Nov. 4.
Cabinet, Combination. M. W. Jones. 1,780,353; Nov. 4.
Cabinet, Dental. C. A. Lawson, sr., and C. A. Lawson, jr. 1,780,757; Nov. 4.
Cabinet, Kitchen. J. F. Kasper. Des. 82,430; Nov. 4.
Caisson head. F. B. Goldsborough. 1,780,586; Nov. 4.
Cake reenforcements, Method of and apparatus for applying. F. W. Young. 1,780,732; Nov. 4.
Calculating device. J. R. McNally. 1,780,494; Nov. 4.
Call system. I. J. Lichter. 1,780,711; Nov. 4.
Camera mounting. A. Fried. 1,780,585; Nov. 4.
Camera tripod. E. de Moulin. 1,780,225; Nov. 4.
Can-boxing machine. C. M. Hesson and W. J. Koch. 1,780,424; Nov. 4.
Can-closing machine. J. Wery. 1,780,729; Nov. 4.
Can-top lock. C. E. Anderson. 1,780,575; Nov. 4.
Cans, Apparatus for embossing. W. H. Haupt. 1,780,890; Nov. 4.
Car, Armored. K. Danker. 1,780,518; Nov. 4.
Car, Funeral. S. Paul. 1,780,718; Nov. 4.
Carbon, Manufacture of high-purity. D. Gardner. 1,780,154; Nov. 4.
Carbonaceous materials, Treatment of. R. Lessing. 1,780,830; Nov. 4.
Carrier: *See*—
Belt carrier.
Cartridges, Coating. J. D. Pedersen. 1,780,566; Nov. 4.
Case: *See*—
Show case.
Casing, Clock. R. P. Nichols. Des. 82,447; Nov. 4.
Casing for an oil pump. J. Stanitz. Des. 82,458; Nov. 4.
Casket attachment, Burial-. J. Q. Clarke. 1,780,171; Nov. 4.
Caster, Thread-guard. H. C. Naschke, jr. 1,780,761; Nov. 4.

Cellulose, Esterifying. F. Becker, H. Heimann, and A. Bayerl. 1,780,151; Nov. 4.
Cellulose esters and ethers, Dyeing of. E. A. Speight. 1,780,320; Nov. 4.
Cellulose pulp, Preparing. H. L. Horn. 1,780,750; Nov. 4.
Cementing machine. J. W. Cosgrove. 1,780,341-2; Nov. 4.
Chain carrier and pull. J. R. Moore. 1,780,834; Nov. 4.
Chair: *See*—
Deformable chair.
Chair. J. J. McGerry and C. H. Whiting. Des. 82,444; Nov. 4.
Chilling meats, Apparatus and method for. J. P. Malone. 1,780,267; Nov. 4.
Chopper. H. Wenalan. 1,780,453; Nov. 4.
Chromatic-playing attachment for harmonicas. W. E. Shaver. 1,780,368; Nov. 4.
Chromium plating. W. M. Phillips. 1,780,535; Nov. 4.
Cigarette extinguisher and residue receptacle, Combined. F. Weinberg. 1,780,258; Nov. 4.
Circuit-breaking device. C. A. Martin. 1,780,202; Nov. 4.
Circuit-interrupting device. J. W. Owens. 1,780,684; Nov. 4.
Circuits, Electrical amplifier. S. Y. White. 1,780,611; Nov. 4.
Clamp: *See*—
Fabric-tensioning clamp.
Clasp: *See*—
Bag clasp.
Cleaner: *See*—
Flue cleaner.
Cleaner-set package. J. L. Miller. 1,780,268; Nov. 4.
Cleaning apparatus, Bottle. R. and L. Vosika. 1,780,451; Nov. 4.
Cleaning device, Cutlery-. H. Williams. 1,780,637; Nov. 4.
Clip: *See*—
Glazing clip. Rib clip.
Paper clip. Snap-on clip.
Clippers, Curved-blade barber. A. T. Scheiwer. 1,780,276; Nov. 4.
Clock case. J. H. Schaefer. Des. 82,452; Nov. 4.
Clock or the like. E. W. Goff. Des. 82,424; Nov. 4.
Closet-flushing device. C. W. Brown. 1,780,810; Nov. 4.
Clothesline and drier. H. T. Horscraft and W. L. King. 1,780,708; Nov. 4.
Clutch. E. P. Bullard and G. F. Kolb. 1,780,222; Nov. 4.
Clutch. A. W. Frehse and C. G. Belden. 1,780,749; Nov. 4.
Clutch mechanism. F. S. Miller. 1,780,241; Nov. 4.
Clutch-ring- shearing machine. T. H. Bateson. 1,780,259; Nov. 4.
Coating composition. W. E. Lawson. 1,780,652; Nov. 4.
Coffee-making device. J. D. Houck. 1,780,751; Nov. 4.
Coffin-lowering device. H. J. Cordonnier and C. H. Ziler. 1,780,700; Nov. 4.
Coin assorter. A. Godefroid. 1,780,819; Nov. 4.
Coloring agent for fabrics and making same. A. Picareff. 1,780,314; Nov. 4.
Comb. A. D. McKellar. 1,780,206; Nov. 4.
Compact. E. W. Bassett. 1,780,736; Nov. 4.
Compressor. N. A. Christensen. 1,780,642; Nov. 4.
Compressor, Air. M. B. Morgan. 1,780,398; Nov. 4.
Compressor and locking means therefor. O. J. Larson and J. R. Jones. 1,780,354; Nov. 4.
Concrete-road construction. J. N. Heltzel. 1,780,588; Nov. 4.
Condensation product of the benzodiazine series. W. Hentrich, M. Hardtmann, and R. Knoche. 1,780,879; Nov. 4.
Condenser. R. N. Ehrhart. 1,780,781; Nov. 4.
Condenser. J. F. Grace. 1,780,477-8; Nov. 4.
Condenser, Electrical. S. S. Cramer. 1,780,172; Nov. 4.
Condenser induction motor. C. L. Kennedy. 1,780,395; Nov. 4.
Condenser, Steam. J. F. Grace. 1,780,476; Nov. 4.
Condenser, Surface. A. J. Nott. 1,780,837; Nov. 4.
Conductor, Electric. E. J. Schneider and P. Wiggins. 1,780,722; Nov. 4.
Conductor, Electrical. G. C. Oxer. 1,780,533; Nov. 4.
Conductor, Electrical. G. C. Oxer. 1,780,564; Nov. 4.
Conduits and the like, Apparatus for cleaning out. J. C. Miller. 1,780,436; Nov. 4.
Connecter for electrical conductors, Terminal. F. W. Zepp. 1,780,289; Nov. 4.
Contact apparatus, Liquid and gas. F. H. Wagner. 1,780,255; Nov. 4.
Container, Dispensing. H. E. Schulse. 1,780,508; Nov. 4.
Container for ice cream, Edible. B. Smith. Des. 82,455; Nov. 4.
Control apparatus, Master. L. E. Spray. 1,780,658; Nov. 4.
Control device. E. J. Dillman. 1,780,417; Nov. 4.
Control device for carburetors, Remote. F. L. Hammer, W. R. Smith, and S. Esborn. 1,780,522; Nov. 4.
Control for electric heaters, Thermostatic. S. M. and J. H. Carmean. 1,780,462; Nov. 4.
Control for oil filters. C. R. Short. 1,780,723; Nov. 4.
Control mechanism for grain car unloading apparatus. A. B. Christy. 1,780,578; Nov. 4.
Control of turboalternators, Automatic. T. R. Warren. 1,780,691; Nov. 4.
Control or power lever mechanism. A. J. McEwan. 1,780,713; Nov. 4.
Control system. A. E. Anderson. 1,780,664; Nov. 4.
Control system. E. L. Hough. 1,780,676; Nov. 4.
Controlling device. F. C. Kinney and W. T. Stockton. 1,780,752; Nov. 4.
Conveyer and conveyer roller. W. McKee. 1,780,493; Nov. 4.
Conveyer, Apron-type. F. A. Fahrenwald. 1,780,382; Nov. 4.
Conveyer, Spiral. S. H. Hale. 1,780,481; Nov. 4.
Conveyer system. C. S. Jennings and L. C. Allen. 1,780,486; Nov. 4.
Core drill, Rotary. J. E. Shows and W. T. Dunn. 1,780,447; Nov. 4.
Core-molding mechanism. R. E. Dunham. 1,780,470; Nov. 4.
Corner die. J. A. McGregor. 1,780,432; Nov. 4.
Corset-steel protector. M. L. Benzie. 1,780,859; Nov. 4.
Costumer, Child's. G. A. Muller. Des. 82,446; Nov. 4.
Cotton picker. W. E. Muller, R. J. Shinn, and C. S. Grove. 1,780,497; Nov. 4.
Coupler, Rubber. P. L. Tenney. 1,780,727; Nov. 4.
Coupling: *See*—
Flexible coupling. Pipe coupling.
Coupling arrangement for frequency changers. W. Schaffer. 1,780,542; Nov. 4.
Couplings, Regulating device for liquid. G. Bauer and C. Schmieske. 1,780,613; Nov. 4.
Cover, Magazine. W. D. Rose. Des. 82,449; Nov. 4.
Covering for bridges, Protective. W. H. Lawrence. 1,780,622; Nov. 4.
Craft adapted to travel on land or water or in the air. J. B. Icre. 1,780,298; Nov. 4.
Crankless engine. T. L. Sherman. 1,780,365; Nov. 4.
Cream testers, Timer for. P. L. and B. F. Cool. 1,780,377; Nov. 4.
Crusher: *See*—
Gyratory crusher.
Curtain, Automobile. C. P. Weaver. 1,180,257; Nov. 4.
Cutter: *See*—
Weed cutter.
Cutter for sugar cane and the like, Rotary. A. M. Simpson. 1,780,247; Nov. 4.
Cutter head. A. A. Clarke. 1,780,170; Nov. 4.
Cutter head. E. S. and H. L. Shimer. 1,780,846; Nov. 4.
Cutters, Making helical. W. H. Wheatley. 1,780,805; Nov. 4.
Cutting machine. W. E. Kay. 1,780,680; Nov. 4.
Cylinder, Engine. W. Hefti. 1,780,388; Nov. 4.
Deformable chair. M. Fujita. 1,780,468; Nov. 4
Derailing frog. C. Bess. 1,780,372; Nov. 4.
Desk, Office. C. E. Wheeler. 1,780 287; Nov. 4.
Detector: *See*—
Ammonia-gas detector.
Device for mechanically determining and indicating the degree of usage of a mechanism. D. Schatz. 1,780,603; Nov. 4.
Device to insure the bursting of all kinds of bombs in whatever position of impact or fall. E. Manzolini, V. Capobianco, and F. Scarponi. 1,780,624; Nov. 4.
Die: *See*—
Corner die.
Die for flanging sheet metal. J. A. McGregor. 1,780,433; Nov. 4.
Differential. G. F. Eckart. 1,780,745; Nov. 4.
Dipper tooth. W. S. McKee and E. C. Bauer. 1,780,397; Nov. 4.
Dirt mover. H. Maschek. 1,780,239; Nov. 4.
Dish or similar article. W. P. Graham. Des. 82,422; Nov. 4.
Dishwasher. F. A. Walker. 1,780,452; Nov. 4.
Disk harrow. W. D. Dewend. 1,780,644; Nov. 4.
Dispenser, Automatic liquid-fuel. C. Braby. 1,780,292; Nov. 4.
Dispensing and display device, Beverage. H. C. Smith. 1,780,687; Nov. 4.
Display apparatus, Advertising. J. Lashenick. 1,780,651; Nov. 4.
Display apparatus and operating the same. G. A. Wearham. 1,780,773; Nov. 4.
Display box. R. McClelland, H. K. Powell and S. N. Leopold. 1,780,760; Nov. 4.
Display stand, Tire-. E. Dyment. 1,780,381; Nov. 4.
Doorcheck. J. Weiss. 1,780 662; Nov. 4.
Door-closing device. J. Eaton. 1,780,673; Nov. 4.
Drain for window screens, Rain. E. A. Malm. 1,780,492; Nov. 4.
Drill: *See*—
Core drill.
Driving mechanism used in connection with dental tools. H. Meyer. 1,780,495; Nov. 4.
Drying device. J. A. Shoemaker. 1,780,446; Nov. 4.
Dust separator. S. N. Chew. 1,780,641; Nov. 4.
Dyeing machine. H. Nabholz. 1,780,628; Nov. 4.
Dyestuffs, New vat. P. Nawiasky and A. Krause. 1,780,836; Nov. 4.
Electric controller. R. R. Dunlop. 1,780,703; Nov. 4.
Electric distribution system. T. F. Barton. 1,780,668; Nov. 4.
Electric-machine elements, Winding dynamo-. V. G. Apple. 1,780,456; Nov. 4.
Electric motor, Inverted. E. Cornella. 1,780,867; Nov. 4.
Electric switch. L. Kellner. 1,780,894; Nov. 4.
Electric switch. G. J. Meuer. 1,780,434; Nov. 4.

Electrical fixture. A. A. Smith. 1,780,847; Nov. 4.
Electrical generating apparatus, Constant-speed multifrequency. W. Dornig. 1,780,702; Nov. 4.
Electrical switch. G. O. Wilms. 1,780,216; Nov. 4.
Electromagnetic transmitter. A. A. Thomas. 1,780,409; Nov. 4.
Electrooptical transmission. F. W. Reynolds. 1,780,364; Nov. 4.
Electrotherapeutic machine. H. P. Pullwitt 1,780,600; Nov. 4.
Emulsifying and analogous apparatus. V. G. Walsh. 1,780,353; Nov. 4.
Enema pad. A. F. Shekter. 1,780,800; Nov. 4.
Energy, Utilization of hydraulic. F. Lawaczeck. 1,780,490; Nov. 4.
Engine: *See*—
Crankless engine. Steam engine.
Internal-combustion engine. Steam turbine engine.
Engine cooling system, Internal-combustion-. A. Christianson. 1,780,517; Nov. 4.

Liquid-testing device. J. M. Mayhall and H. C. Morrison. 1,780,597; Nov. 4.
Liquids into constituents possessing a low boiling point and constituents possessing a high boiling point by distillation and rectification, Apparatus for separating. A. Messer. 1,780,563; Nov. 4.
Listing machine. C. B. Edwards. 1,780,295; Nov. 4.
Litter-gathering device. A. H. Fisher. 1,780,748; Nov. 4.
Loader for fuel trucks, Automatic tank. C. E. Spinney. 1,780,605; Nov. 4.
Lock: *See*—
Bolt and nut lock. Window lock.
Can-top lock.
Lock and interlock, Transmission. R. Neef. 1,780,762; Nov. 4.
Locomotive structure. W. O. Ashe. 1,780,457; Nov. 4.
Locomotive structure. G. F. Driemeyer and E. C. Jackson. 1,780,466; Nov. 4.
Lubricant, Composite. J. A. Higgins. 1,780,157; Nov. 4.
Lubricating device. C. D. Otto. 1,780,629; Nov. 4.
Lubricator: *See*—
Wheel-flange lubricator.
Lumber trimmer. S. K. Prescott. 1,780,362; Nov. 4.
Machine for making spaced coiled filaments. S. Wadsten. 1,780,609; Nov. 4.
Machine for testing and quantitatively indicating the cutting power and durability of blades and cutlery. K. Honda. 1,780,822; Nov. 4.
Magnetic reproducer. P. E. Fischler. 1,780,419; Nov. 4.
Manacle. S. F. Gill. 1,780,473; Nov. 4.
Manifold, Intake. E. M. De Long. 1,780,519; Nov. 4.
Marcel cap. M. H. Thornburgh. 1,780,887; Nov. 4.
Marker, Poultry. E. D. Olson and W. A. Horton. 1,780,715; Nov. 4.
Mat, Automobile floor. J. F. Duffy. Des. 82,412; Nov. 4.
Match-manufacturing machine. S. Nelson. 1,780,359; Nov. 4.
Matrix-setting and type-line-casting machine. J. Dormeth. 1,780,816; Nov. 4.
Measuring device. W. B. Ranney. 1,780,601; Nov. 4.
Merchandising fabric. A. R. Golden and J. I. Kahn. 1,780,228; Nov. 4.
Metal amino carbonyls and making the same. P. S. Danner and J. E. Muth. 1,780,643; Nov. 4.
Metal articles, Acid treatment of. R. E. Lawrence. 1,780,594; Nov. 4.
Metal pellets, Process and mechanism for making. D. Martin. 1,780,201; Nov. 4.
Metal sheeting. R. R. Bloss. 1,780,862; Nov. 4.
Metal slat for window shades. W. E. Kallin and L. G. Boynton. 1,780,556; Nov. 4.
Metal-working machine. R. S. Brown. 1,780,889; Nov. 4.
Microphone, Condenser. E. G. Crippen. 1,780,671; Nov. 4.
Mining machine. N. D. Levin. Re17,855; Nov. 4.
Mirror and instrument, Combined. W. La Hodny. Des. 82,436; Nov. 4.
Mixer. K. Adams. 1,780,733; Nov. 4.
Mixer for internal-combustion engines, Fuel. J. McIntosh. 1,780,026; Nov. 4.
Mixing device, Fluid-. W. A. Peters, jr. 1,780,438; Nov. 4.
Moisture from air, Apparatus for extracting. F. R. Hall. 1,780,156; Nov. 4.
Mold for concrete buildings. A. G. W. Wedberg. 1,780,661; Nov. 4.
Molding apparatus. A. T. Bateman and A. Irvine. 1,780,514; Nov. 4.
Motor: *See*—
Aircraft motor. Induction motor.
Condenser induction motor. Synchronous motor.
Electric motor. Water motor.
Motor and pump, Combination. A. A. Canton. 1,780,338–9; Nov. 4.
Motor-controlling device. C. J. Anderson. 1,780,612; Nov. 4.
Motorcycle, Air-propelled. R. E. Forman. 1,780,705; Nov. 4.
Motor-driven shears. C. Dubois. 1,780,817; Nov. 4.
Motor suspension. T. W. Price. 1,780,719; Nov. 4.
Motors, Automatic control system for electric. A. C. Durdin, jr. 1,780,380; Nov. 4.
Mounting for electrical switches. L. A. M. Phelan. 1,780,312; Nov. 4.
Mute, Banjo. C. W. Pierson, C. Y. Fitzgerald, and G. E. Thomae. 1,780,361; Nov. 4.
Needle for knitting machines, Welt. F. Sutcliffe, jr. 1,780,689; Nov. 4.
Needle, Knitting. W. H. and S. B. Leavin. 1,780,790; Nov. 4.
Nonskid device for the wheels of road vehicles. F. Bull and F. White. 1,780,864; Nov. 4.
Nozzle, Spray. W. C. Beach. 1,780,738; Nov. 4.
Obstructive matter from oil wells, Apparatus for the removable of. C. Larsen. 1,780,428; Nov. 4.
Oil burner. J. J. Barrett. 1,780,219; Nov. 4.
Oil burner. A. E. Grant. 1,780,185; Nov. 4.
Oil, Treating hydrocarbon. C. W. Watson. 1,780,286; Nov. 4.
Oiling apparatus. P. Dosch. 1,780,465; Nov. 4.
Optical apparatus. A. S. Cameron. 1,780,291; Nov. 4.
Optical device for radio cinematographic transmitters and receivers. L. Thurm. 1,780,572; Nov. 4.

Optical measuring instrument. A. C. Hardy. 1,780,231; Nov. 4.
Organ, Jazz. K. Stiegelmayer. 1,780,543; Nov. 4.
Ornament, Shoe. C. G. King. Des. 82,433; Nov. 4.
Ornament, Shoe. W. E. Smith. Des. 82,456; Nov. 4.
Oscillation generator. E. I. Green. 1,780,229; Nov. 4.
Oven, Coking retort. J. van Ackeren. 1,780,803; Nov. 4.
Oven construction. W. G. Miller. 1,780,269; Nov. 4.
Packing for fragile articles. M. Koppelman. 1,780,264; Nov. 4.
Packing, Rotary shaft. J. H. Noble. 1,780,764; Nov. 4.
Pad: *See*—
Enema pad.
Paper and making same, Shock-absorbing cushioning. J. E. Kieffer. 1,780,526; Nov. 4.
Paper and manufacturing same, Coated. W. W. McLaurin. 1,780,793; Nov. 4.
Paper and the like and manufacture of the same, Colored and tinted parchment. R. I. Cowen. 1,780,616; Nov. 4.
Paper clip. G. P. Schmitt. 1,780,893; Nov. 4.
Paper machine, Transparent-. E. M. Kratz. Re17,854; Nov. 4.
Paper, Package of toilet. J. E. H. Randerson. 1,780,275; Nov. 4.
Paper pulp, Production of. R. B. Wolf. 1,780,638; Nov. 4.
Parachute. E. L. Hoffman. 1,780,190; Nov. 4.
Partition bar for stables, Vertically-adjustable. E. Carman. 1,780,577; Nov. 4.
Pen, Fountain. M. Kolber. 1,780,527; Nov. 4.
Pen housing, Fountain-. C. R. Williams. 1,780,546; Nov. 4.
Pencil. P. A. Sharrow. 1,780,405; Nov. 4.
Pencil having a sharpening device for the lead. A. Diller. 1,780,581; Nov. 4.
Pencil, Magazine. L. E. Melèndez. 1,780,207; Nov. 4.
Petroleum emulsions, Breaking. M. De Groote and L. T. Monson. 1,780,343; Nov. 4.
Petroleum emulsions, Breaking. M. De Groote, L. T. Monson, and A. F. Wirtel. 1,780,344–5; Nov. 4.
Phonographs or the like, Volume-controlling device for automatic. B. E. Mills. 1,780,437; Nov. 4.
Photographic apparatus. P. Landrock. 1,780,489; Nov. 4.
Photographic fractional exposures, Apparatus for making. W. C. Huebner. 1,780,191; Nov. 4.
Photographic-printing apparatus. W. C. Huebner. 1,780,678; Nov. 4.
Photographic-printing device. R. F. Crane. 1,780,701; Nov. 4.
Piano, Sostenuto. S. Cooper. 1,780,670; Nov. 4.
Picker: *See*—
Berry picker. Cotton picker.
Pick-up attachment for combines. G. V. Gilger. 1,780,472; Nov. 4.
Picture frame. S. J. Attinger. Des. 82,410; Nov. 4.
Picture machine, Moving-. A. Papò and A. Gentilini. 1,780,311; Nov. 4.
Pictures in colors, Producing. G. F. Capwell. 1,780,260; Nov. 4.
Pile. I. Zeissl. 1,780,807; Nov. 4.
Pipe: *See*—
Smoker's pipe.
Pipe coupling, Automatic train-. C. E. Pharo. 1,780,795; Nov. 4.
Pipe fitting. J. A. Recko. 1,780,402; Nov. 4.
Pipe for smoking tobacco. H. M. McCormick. 1,780,682; Nov. 4.
Piston. P. M. Freer. 1,780,183; Nov. 4.
Piston and piston-ring assembly. A. B. Crouch. 1,780,223; Nov. 4.
Piston for internal-combustion engines. A. Lesage. 1,780,829; Nov. 4.
Piston ring. E. A. Benton and M. Linderner. 1,780,697; Nov. 4.
Planter attachment. A. W. Gustafson. 1,780,587; Nov. 4.
Plate. B. N. Kane. Des. 82,471; Nov. 4.
Plate or similar article. U. Tomita. Des. 82,459–61; Nov. 4.
Platen, Heat-transmitting. J. A. Stevens. 1,780,280; Nov. 4.
Plug cap. H. L. Strongson. 1,780,851; Nov. 4.
Plumb protector for elevator guides. T. J. Osinga. 1,780,501; Nov. 4.
Plunger for glass feeders, Composite. W. T. Barker, jr. 1,780,550; Nov. 4.
Plywood, Embossing. G. R. Meyercord and C. B. Norris. 1,780,496; Nov. 4.
Pocket and making the same, Shirt. J. Friedmann. 1,780,874; Nov. 4.
Pocket structure for garments. C. W. Mastin. 1,780,204; Nov. 4.
Polishing wheel. D. F. McGovern. Des. 17,853; Nov. 4.
Polysulphides and process of making, Substituted thiuram. G. S. Whitby. 1,780,545; Nov. 4.
Porous and nonporous material, Treating. T. F. Bradley. 1,780,375; Nov. 4.
Potato-digger blade. E. A. Johnson. 1,780,235; Nov. 4.
Pothead and series cut-out, Combination. P. F. Williams. 1,780,413; Nov. 4.
Power-control mechanism. F. L. Dake. 1,780,869; Nov. 4.
Power plant, Locomotive. L. R. Bester. 1,780,516; Nov. 4.
Power plants, Interstage superheating in steam. H. Elsner. 1,780,226; Nov. 4.
Power transmission. C. Bearens. 1,780,858; Nov. 4.
Power-transmission unit, Variable-speed. G. E. A. Hallett. 1,780,423; Nov. 4.
Power-transmitting mechanism. G. E. Molyneux. 1,780,654; Nov. 4.
Power-transmitting mechanism. W. L. Paul. 1,780,503; Nov. 4.
Press: *See*—
Baling press.
Presses, Feeding mechanism for. R. T. Anderson. 1,780,218; Nov. 4.
Pressure-controlling apparatus, Automatic. E. K. Evans. 1,780,583; Nov. 4.
Printing machines, Sheet-registering mechanism for. W. K. Eckhard. 1,780,348; Nov. 4.
Printing tubulating machine. J. R. Pierce. 1,780,685; Nov. 4.
Projector. S. L. Lebby. 1,780,355; Nov. 4.
Propeller, Aero. C. McCarroll. 1,780,431; Nov. 4.
Propeller for vessels and aircraft. M. Schul. 1,780 843; Nov. 4.
Propeller of motor-driven canal and other boats, river barges, and the like. T. H. Coggins and A Farrington. 1,780,552; Nov. 4.
Puller: *See*—
Wheel puller.
Pulp, Production of sulphite. G. A. Richter. 1,780,842; Nov. 4.
Pump. C. M. Bolster. 1,780,614; Nov. 4.

Switch for radioreceivers. V. O. Syester. 1,780,690; Nov. 4.
Switch plug, Fusible. L. A. M. Phelan. 1,780,313; Nov. 4.
Synchronizing apparatus. H. Bany and G. R. McDonald. 1,780,667; Nov. 4.
Synchronous motor, Self-starting. P. P. Horni. 1,780,648; Nov. 4.
Table: *See*—
Automobile table. Folding table.
Table. A. P. Wagner. 1,780,254; Nov. 4.
Tabulating machine. W. W. Lasker. 1,780,621; Nov. 4.
Tabulating machine. M. Lebeis. 1,780,884; Nov. 4.
Tag, Price. F. Kohnle. 1,780,488; Nov. 4.
Tag, Price-marking. F. Kohnle. 1,780,753; Nov. 4.
Tally. C. C. Harris. 1,780,878; Nov. 4.
Tank: *See*—
Glass tank. Water tank.
Tap for dancing slippers or shoes. W. J. Haney. 1,780,230; Nov. 4.
Tassel-making art. S. J. Rosenthal. 1,780,602; Nov. 4.
Taximeter. J. A. Costuma, H. E. Bauer, and C. L. Lovercheck. 1,780,780; Nov. 4.
Tea cartridge. B. Hirschhorn. 1,780,484; Nov. 4.
Telegraphing in Morse code and apparatus therefor. R. L. A. Schoemaker. 1,780,507; Nov. 4.
Telephone and telegraph circuit. P. E. Ritter. 1,780,244; Nov. 4.
Telephone and telegraph system. L. C. Roberts. 1,780,245; Nov. 4.
Telephone apparatus for automatic telephone exchanges, Coin-operated. W. Kruse. 1,780,754; Nov. 4.
Telephone head set. A. Y. Dodge. 1,780,178; Nov. 4.
Telephone system. T. F. Crocker. 1,780,617; Nov. 4.
Terminal hook, Cable-. K. Gleason. 1,780,184; Nov. 4.
Testing machine. A. J. Amsler. 1,780,696; Nov. 4.
Textile materials, Degreasing. W. Pfaffendorf. 1,780,885; Nov. 4.
Thermostatic apparatus. H. G. Leupold. 1,780,758; Nov. 4.
Thread-rolling machine. S. A. Swanson. 1,780,608; Nov. 4.
Tie: *See*—
Bow tie. Ski tie.
Time-stamping mechanism, Portable. E. Salustri and G. Salustri. 1,780,770; Nov. 4.
Tire. J. J. McDonald. Des. 82,441; Nov. 4.
Tire-inflation device. S. M. Weisberg. Des. 82,468; Nov. 4.
Tire, Vehicle. C. M. Manly. 1,780,306; Nov. 4.
Tool, Combination. A. Rutquist. 1,780 506; Nov. 4.
Tool, Portable. J. M. Crowe. 1,780,173; Nov. 4.
Tool, Well. L. S. Hamer and J. Q. Little. 1,780,482; Nov. 4.
Tool with radial cage, cutter, and guide, Trepan. E. Williams. 1,780,325; Nov. 4.
Top. M. Alland. 1,780,547; Nov. 4.
Toy. R. Guyot. 1,780,385; Nov. 4.
Toy. W. R. Williams. 1,780,855; Nov. 4.
Toy, Electrical. M. L. Jurgensen. 1,780,487; Nov. 4.
Toy electrically-operated shovel. A. P. Williams. 1,780,806; Nov. 4.
Toy, Mechanical. C. Katagiri. 1,780 557; Nov. 4.
Toy parachute. P. Anderson. 1,780,734; Nov. 4.
Toy ship. L. H. Baxter. Des. 82,411; Nov. 4.
Toy top. J. M. Krause. Des. 82,435; Nov. 4.
Toy, vehicle. L. Marx. Des. 82,440; Nov. 4.
Track installation to control railway trains. T. E. and J. E. Clark. 1,780,416; Nov. 4.
Traction lug. B. Arps. 1,780,513; Nov. 4.
Tractor, Hillside. W. G. Rogers. 1,780,799; Nov. 4.
Traffic-controlling apparatus, Railway. G. W. Baughman. 1,780,737; Nov. 4.
Trailer-frame structure. L. E. Williams. 1,780,776; Nov. 4.
Train-control equipment, Apparatus for testing automatic. C. F. Stoltz and G. W. Ferling. 1,780,726; Nov. 4.
Transmission, Automatic. H. E. Christie and K. W. Couse. 1,780,293; Nov. 4.

Transmission mechanism, Electromagnetic. C. F. Ahlm. 1,780,150; Nov. 4.
Tray for refrigerating units. F. C. Geller. 1,780,422; Nov. 4.
Tray or similar article, Ash. A. von Frankenberg. Des. 82,463; Nov. 4.
Trimmer: *See*—
Lumber trimmer.
Tripod, Camera. I. I. Green. 1,780,383; Nov. 4.
Trousers. M. Liberman. 1,780,356; Nov. 4.
Trousers hanger. K. Francsics. 1,780,153; Nov. 4.
Troweling machine for concrete or other plastic material. J. E. Kirkham. 1,780,427; Nov. 4.
Truss brace. L. F. Crowley. 1,780,579; Nov. 4.
Tube: *See*—
Rectifying tube. Vacuum tube.
Tubes and analogous articles with lead. Device for treating rough. G. de Dudzeele. 1,780,870; Nov. 4.
Turning machines, Feed-control means for. C. L. Mattison. 1,780,203; Nov. 4.
Type bar, Compound. B. K. F. Ewald. 1,780,674; Nov. 4.
Typewriter punch with column cut-out. H. A. Weinlich. 1,780,610; Nov. 4.
Typewriting machine. D. Y. Read. 1,780,537; Nov. 4.
Typographical machines, Safety device for. A. G. Sperry. 1,780,848; Nov. 4.
Upholstery device. F. Glazer. 1,780,474; Nov. 4.
Vacuum fuel-feed device. J. L. Andrews. 1,780,290; Nov. 4.
Vacuum tube. B. G. Blackman. 1,780,698; Nov. 4.
Valve. R. W. Leach and W. H. Bateman. 1,780,160; Nov. 4.
Valve. R. W. Leach and W. H. Bateman. 1,780,828; Nov. 4.
Valve. H. T. Melling. 1,780,562; Nov. 4.
Valve. J. R. Replogle. 1,780,242; Nov. 4.
Valve and constructing the same, Refrigerating. A. J. Kusel. 1,780,593; Nov. 4.
Valve bags, Forming. J. C. Redington. 1,780,720; Nov. 4.
Valve device, Triple-. T. H. Thomas. 1,780,321; Nov. 4.
Valve for rock drills, Hole-. Cleaning. L. L. Richardson. 1,780,440; Nov. 4.
Valve mechanism for rock drills. W. A. Smith, sr., and W. A. Smith, jr. 1,780,725; Nov. 4.
Valve-operating mechanism. J. F. Adam. 1,780,856; Nov. 4.
Valve, Plate. L. R. Huff. 1,780,524; Nov. 4.
Valve, Relief. H. G. Holmes. 1,780,782; Nov. 4.
Valve, Sanitary. J. N. Jacobsen. 1,780,525; Nov. 4.
Valve unit, Hydraulic control-. R. M. Galloway and R. A. Schafer. 1,780,471; Nov. 4.
Varnishes, Applying nitrocellulose. H. F. Schulz. 1,780,844; Nov. 4.
Vault, Burial. G. W. Janda and R. C. Plaggmier. 1,780,193; Nov. 4.
Vegetable topper. R. Hahn. 1,780,820; Nov. 4.
Vehicle body construction. S. Paul. 1,780,717; Nov. 4.
Vehicle body construction, Convertible. R. S. Roberts and J. Votypka. 1,780,797; Nov. 4.
Vehicle, Dump-body. L. E. Williams. 1,780,775; Nov. 4.
Vehicle, Motor. A. Moorhouse. 1,780,270; Nov. 4.
Vehicle, Motor. J. N. Parker. 1,780,599; Nov. 4.
Vehicle, Motor. M. Tibbetts. 1,780,281; Nov. 4.
Veneer and shingle machines, Feed-roll mechanism for. J. E. Eckersley. 1,780,582; Nov. 4.
Ventilator. A. Maeulen. 1,780,491; Nov. 4.
Ventilator construction for window frames. R. T. Axe. 1,780,665; Nov. 4.
Vessels, Apparatus or agitating the contents of storage. W. H. Brooks. 1,780,333; Nov. 4.
Vibratory apparatus. C. Grosse. 1,780,876; Nov. 4.
Wall board, Laminated. P. W. Codwise. 1,780,743; Nov. 4.
Wall form. C. M. Showers. 1,780,366; Nov. 4.
Warming device. H. M. Jacobs. 1,780,649; Nov. 4.
Warper. H. A. Davis. 1,780,891; Nov. 4.
Warper. C. H. Draper and E. H. Trevett. 1,780,892; Nov. 4.
Washer: *See*—
Golf-ball washer.
Washer. J. C. Pewther. 1,780,839; Nov. 4.
Washing device. F. A. Hahn. 1,780,155; Nov. 4.
Water-circulating system, Automatically-controlled. A. C. Durdin, jr. 1,780,379; Nov. 4.
Water craft, Steering. H. Scott-Paine. 1,780,767; Nov. 4.
Water heater, Hot-. L. B. Hyde. 1,780,426; Nov. 4.
Water motor. F. Fachnie. 1,780,584; Nov. 4.
Water-regulating device. W. R. Hendrix. 1,780,589; Nov. 4.
Water-soluble product derived from the fatty acids occurring in wool fat and preparing the same. A. Thauss and G. Mauthe. 1,780,252; Nov. 4.
Water sprinkler. E. C. Brickhill. 1,780,332; Nov. 4.
Water tank, Hot-. G. F. Schwartz. 1,780,316; Nov. 4.
Wax compositions, Production of. W. Pungs and M. Jahrstorfer. 1,780,633; Nov. 4.
Weed cutter. J. Cadwallader. 1,780,741; Nov. 4.
Weighing machine, Coin-controlled. H. S. Benjamin. 1,780,165; Nov. 4.
Weight indicator. R. A. Lincoln. 1,780,238; Nov. 4.
Welding, Electric flash. W. F. Heineman. 1,780,297; Nov. 4.
Well screen. M. F. Kettler. 1,780,882; Nov. 4.
Wheel: *See*—
Polishing wheel.
Wheel. L. L. Schooling. 1,780,404; Nov. 4.
Wheel and making the same, Metal. E. E. Einfeldt. 1,780,704; Nov. 4.
Wheel assembly. P. L. Tenney. 1,780,370; Nov. 4.
Wheel-assembly device, Wire-. M. W. H. Wilson. 1,780,215; Nov. 4.
Wheel-flange lubricator. J. W. Coppage. 1,780,464; Nov. 4.
Wheel of passenger aerial cableways, Running. M. Müller 1,780,027; Nov. 4.
Wheel puller. W. Uebelhoer. 1,780,888; Nov. 4.
Wind and waterproof fixture. R. A. Flint. 1,780,420; Nov. 4.
Window lock, Ventilating. A. Primas. 1,780,274; Nov. 4.
Window screen. G. W. Byars. 1,780,461; Nov. 4.
Wiper, Oil-gauge-rod. J. Ruffing, sr. 1,780,505; Nov. 4.
Wireworking machine. W. M. Birch. 1,780,374; Nov. 4.
Zinc-oxide content of lithopone, Reducing. A. B. Laftman. 1,780,559; Nov. 4.

CLASSIFICATION OF PATENTS

ISSUED NOVEMBER 4, 1930

NOTE.—First number—class, second number—subclass, third number—patent number

1— 3: 1,780,530
2— 4: 1,780,801
78: 1,780,798
128: 1,780,692
154: 1,780,418
198: 1,780,887
227: 1,780,356
247: 1,780,874
253: 1,780,204
257: 1,780,859
4— 37: 1,780,810
169: 1,780,615
5— 61: 1,780,399
185: 1,780,792
8— 5: 1,780,320
1,780,616
6: 1,780,314
11— 1: 1,780,296
12— 47: 1,780,841
128.1: 1,780,177
142: 1,780,650
14— 73: 1,780,622
15— 21: 1,780,850
59: 1,780,451
160: 1,780,340
194: 1,780,221
210: 1,780,505
16— 46: 1,780,761
100: 1,780,755
18— 2: 1,780,769
15: R. 17,854
53: 1,780,604
19— 13: 1,780,480
143: 1,780,455
20— 3.5: 1,780,251
40.5: 1,780,502
65: 1,780,420
22— 10: 1,780,470
95: 1,780,787
136: 1,780,514
23— 188: 1,780,821
250: 1,780,198
24— 30.5: 1,780,880
49: 1,780,532
71: 1,780,824
92: 1,780,555
123: 1,780,184
261: 1,780,893
25— 85: 1,780,629
131: 1,780,661
27— 2: 1,780,171
28— 2: 1,780,602
38: 1,780,891
1,780,892
29— 38: 1,780,889
67: 1,780,325
73: 1,780,439
86: 1,780,888
87: 1,780,215
30— 1: 1,780,276
25: 1,780,549
33— 91: 1,780,506
121: 1,780,237
128: 1,780,647
187: 1,780,849
216: 1,780,501
34— 21: 1,780,649
26: 1,780,182
36— 43: 1,780,574
37— 122: 1,780,239
128: 1,780,401
142: 1,780,397
40— 23: 1,780,488
1,780,753
28: 1,780,773
32: 1,780,651
125: 1,780,305
132: 1,780,373
146: 1,780,163
41— 3.5: 1,780,391
15: 1,780,181
26: 1,780,645
42— 16: 1,780,521
44— 14: 1,780,205
45— 6: 1,780,287
11: 1,780,394
51: 1,780,254
45— 51: 1,780,706
46— 14: 1,780,385
37: 1,780,855
40: 1,780,557
46: 1,780,230
1,780,541
49: 1,780,487
52: 1,780,734
38: 1,780,279
48— 180: 1,780,626
202: 1,780,759
49— 3: 1,780,590
54: 1,780,164
55: 1,780,550
81: 1,780,246
51— 32: 1,780,211
43: 1,780,288
209: R. 17,853
248: 1,780,868
278: 1,780,747
53— 3: 1,780,484
1,780,751
56— 10: 1,780,180
1,780,748
54: 1,780,235
83: 1,780,644
97: 1,780,840
107: 1,780,820
146: 1,780,688
56— 20: 1,780,481
41: 1,780,497
330: 1,780,376
60— 54: 1,780,613
73: 1,780,226
61— 78: 1,780,807
83: 1,780,586
62— 3: 1,780,442
11: 1,780,422
19: 1,780,765
89.5: 1,780,512
95: 1,780,243
116: 1,780,425
119.5: 1,780,272
174: 1,780,250
64— 96: 1,780,727
66— 96: 1,780,689

Horse and mule shoes. Tredegar Company. 80,393; renewed Dec. 13, 1930.

CLASS 4

Preparation devoid of grit for cleaning painted walls, etc. E. J. Smith & Son. 277,505; Nov. 11; Serial No. 299,734; published Aug. 26, 1930.
Scythestones, whetstones, and abrasive sharpening stones. Pike Manufacturing Company. 277,202–3; Nov. 11; Serial Nos. 303,543–4; published Sept. 2, 1930.
Soap. McCourt & McCourt. 277,509; Nov. 11.
Soap. Oro Manufacturing Co. 277,328; Nov. 11; Serial No. 287,157; published Aug. 26, 1930.
Soap, Dry-cleaning. Huntington Laboratories, Inc. 277,187; Nov. 11; Serial No. 303,330; published Aug. 26, 1930.
Soap, Dry-cleaning. Huntington Laboratories, Inc. 277,278; Nov. 11; Serial No. 303,329; published Aug. 26, 1930.
Soap, Toilet. Plough, Inc. 277,204; Nov. 11; Serial No. 303,488; published Sept. 2, 1930.
Soaps, soap flakes, soap powders, etc. M. Werk Company. 277,199; Nov. 11; Serial No. 301,538; published Aug. 26, 1930.
Solution to be applied to vehicle windshields, window panes, and the like for the prevention of the collection of dirt, moisture, steam, etc., thereon. F. M. Howard. 277,477; Nov. 11; Serial No. 294,531; published Aug. 26, 1930.
Washing fluid. L. Massa. 277,491; Nov. 11; Serial No. 296,706; published Aug. 26, 1930.

CLASS 5

Glue. Perkins Glue Company. 277,445; Nov. 11; Serial No. 302,443; published Aug. 26, 1930.

CLASS 6

Antineuralgic and antipyretic. G. B. Stolberg. 277,421; Nov. 11; Serial No. 297,212; published Aug. 12, 1930.
Antiseptic, Drinking-water. B. Reese. 277,398; Nov. 11; Serial No. 303,211; published Sept. 2, 1930.
Antiseptic or disinfecting chemical compound. Hance Brothers & White, Inc. 277,371; Nov. 11; Serial No. 302,434; published Aug. 26, 1930.
Antiseptic tablets. W. C. Eden. 277,181; Nov. 11; Serial No. 302,305; published Aug. 19, 1930.
Antiseptic tablets, cold capsules, tonic, etc. N. Wieselman. 277,498; Nov. 11; Serial No. 297,562; published Sept. 2, 1930.
Balm preparation. Knox Company. 277,244; Nov. 11; Serial No. 301,951; published Aug. 12, 1930.
Cellulose acetate. U. S. Industrial Chemical Co. Incorporated. 277,236; Nov. 11; Serial No. 302,919; published Aug. 12, 1930.
Chemical dye aid. H. Th. Böhme A. G. 277,490; Nov. 11; Serial No. 299,545; published Sept. 2, 1930.
Chemical dyes. Richard Chemical Company. 277,469–70; Nov. 11; Serial Nos. 300,756–7; published Aug. 19, 1930.
Chemical preparation. Kaio Company, The. 277,355; Nov. 11; Serial No. 294,161; published Aug. 19, 1930.
Chemicals. Merck & Co. 79,845; renewed Oct. 11, 1930.
Chemicals. Tartricidgesellschaft m. b. H. 277,433; Nov. 11; Serial No. 299,737; published Aug. 19, 1930.
Cleaning agent. E. Boiko. 277,475; Nov. 11; Serial No. 293,570; published Aug. 19, 1930.
Corn plasters, Medicated. Allcock Manufacturing Co. 277,281; Nov. 11; Serial No. 286,012; published Aug. 19, 1930.
Cosmetics and toilet preparations. Smart & Company. 277,409; Nov. 11; Serial No. 298,856; published Aug. 19, 1930.
Creams and lotions. E. L. Patch Company. 277,384; Nov. 11; Serial No. 301,501; published Aug. 19, 1930.
Deodorant, mouth wash, and antiseptic solution. B. L. Johnson. 277,396; Nov. 11; Serial No. 303,027; published Sept. 2, 1930.
Dressing and invigorant for the hair. Philo Hay Specialties Co. 79,856; renewed Oct. 11, 1930.
Dyes and dyestuffs. E. I. du Pont de Nemours and Company. 277,171; Nov. 11; Serial No. 303,169; published Aug. 19, 1930.
Dyes and dyestuffs. E. I. du Pont de Nemours and Company. 277,397; Nov. 11; Serial No. 303,170; published Aug. 26, 1930.
Ethyl acetate, diethyl oxalate, absolute ether, and cellulose acetate. 30 U. S. Industrial Chemical Co. Incorporated. 277,235; Nov. 11; Serial No. 302,920; published Aug. 12, 1930.
Extract and preparation of Bulgarian garlic. C. Weber. 277,461; Nov. 11; Serial No. 292,644; published Aug. 19, 1930.
Extract made from amniotic fluid. Eli Lilly and Company. 277,395; Nov. 11; Serial No. 303,002; published Aug. 26, 1930.
Extracts to be used for prevention and/or treatment of dermatitis. Cuter Laboratory. 277,172; Nov. 11; Serial No. 303,167; published Aug. 19, 1930.
Ferment. J. H. Cummings. 277,243; Nov. 11; Serial No. 302,212; published Aug. 12, 1930.
Fly repellent and soothing wound dressing. American Turpentine & Tar Company. 277,179; Nov. 11; Serial No. 302,804; published Aug. 19, 1930.
Insecticide, Liquid. M. H. Press. 277,428; Nov. 11; Serial No. 300,086; published Aug. 12, 1930.
Insecticide Perolin Company of America. 277,295; Nov. 11; Serial No. 302,872; published Sept. 2, 1930.
Insecticide, Powdered. Apex Products Corporation. 277,174; Nov. 11; Serial No. 303,147; published Aug. 19, 1930.
Insecticides. Sprayit Products, Inc. 277,399; Nov. 11; Serial No. 303,219; published Sept. 2, 1930.
Insecticides, tonics, liniments, etc. Tee-Lee Chemical Co. 277,387; Nov. 11; Serial No. 302,086; published Aug. 19, 1930.
Laxative compounds, Liquid. California Fig Syrup Co. 35,885; renewed Feb. 12, 1931.
Laxatives. Kooky-Lax Company. 277,436; Nov. 11; Serial No. 299,581; published Aug. 12, 1930.
Lip-stick pencil or crayon, hair tonic, shampoo, etc. A. R. Everson. 277,259; Nov. 11; Serial No. 280,821; published Aug. 19, 1930.
Medical composition. T. H. Banks. 277,242; Nov. 11; Serial No. 302,298; published Aug. 12, 1930.

Medical preparation. H. L. Dittmar. 277,497; Nov. 11; Serial No. 297,800; published Aug. 26, 1930.
Medicinal and pharmaceutical preparations. California Medicinal Wine Co. 277,183; Nov. 11; Serial No. 301,569; published Aug. 19, 1930.
Medicinal preparation. C. Darby. 277,176; Nov. 11; Serial No. 302,997; published Aug. 19, 1930.
Medicinal preparation. J. W. Joseph. 277,479; Nov. 11; Serial No. 294,975; published Aug. 19, 1930.
Medicinal preparation. F. Morgenstern. 277,372; Nov. 11; Serial No. 302,470; published Aug. 26, 1930.
Medicinal preparation. N. B. Perry. 277,178; Nov. 11; Serial No. 302,909; published Aug. 19, 1930.
Medicinal solution. S. A. Ralcer. 277,248; Nov. 11; Serial No. 291,738; published Sept. 2, 1930.
Medicine and pharmaceutical preparations. B. McNeir. 277,410; Nov. 11; Serial No. 298,829; published Aug. 19, 1930.
Medicine, Poultry. Osaveus Products Co. 277,488; Nov. 11; Serial No. 298,329; published Aug. 26, 1930.
Moth balls, naphthalene balls, naphthalene flakes, etc. International Combustion Tar & Chemical Corporation. 277,394; Nov. 11; Serial No. 302,400; published Aug. 26, 1930.
Oil extracted from pine needles. Gardner Pine Needle Products Company. 277,250; Nov. 11; Serial No. 290,351; published Aug. 12, 1930.
Oil, Russian mineral. J. M. Chabrowe. 277,481; Nov. 11; Serial No. 297,855; published Sept. 2, 1930.
Oils and fats, etc., Textile and leather finishing. N. V. Chemische Fabriek Dr. K. A. Oekinga. 277,483; Nov. 11; Serial No. 298,288; published Aug. 19, 1930.
Ointment. Wm. S. Merrell Company. 277,374; Nov. 11; Serial No. 302,586; published Aug. 19, 1930.
Ointment, Antiseptic and analgesic. A. Margulis. 277,234; Nov. 11; Serial No. 302,957; published Aug. 12, 1930.
Ointment, Scalp. T. B. Arroyo. 277,385; Nov. 11; Serial No. 301,781; published Aug. 19, 1930.
Perfume extracts, toilet waters, pastes, etc. Parfumerie Roger et Gallet, Société Anonyme. 277,285; Nov. 11; Serial No. 285,788; published Aug. 12, 1930.
Perfumery goods. Société Anonyme Française Redfern. 277,414; Nov. 11; Serial No. 298,550; published Aug. 12, 1930.
Perfumery goods. Sté. Anonyme Française Redfern. 277,413; Nov. 11; Serial No. 298,551; published Aug. 19, 1930.
Perfumes and face powder. Veolay, Inc. 277,296; Nov. 11; Serial No. 302,841; published Aug. 26, 1930.
Perfumes, toilet water, face powder, etc. Societe Anonyme Jean Patou. 277,288; Nov. 11; Serial No. 303,661; published Sept. 2, 1930.
Pills. Allcock Manufacturing Co. 277,282; Nov. 11; Serial No. 286,009; published Aug. 19, 1930.
Pills. Allcock Manufacturing Co. 277,283; Nov. 11; Serial No. 286,007; published Aug. 19, 1930.
Pomade, hair-glossing fluid, etc., Hair. M. E. Fields. 277,386; Nov. 11; Serial No. 301,873; published Sept. 2, 1930.
Powder, Astringent. H. Silver. 277,239; Nov. 11; Serial No. 302,697; published Aug. 12, 1930.
Powder, Face. Armand Company. 277,473; Nov. 11; Serial No. 293,399; published Sept. 2, 1930.
Powder, rouge, lip stick, etc., Face. Helen Brooks, Inc. 277,305; Nov. 11; Serial No. 301,800; published Aug. 19, 1930.
Powder, Talc. Colgate-Palmolive-Peet Company. 277,471; Nov. 11; Serial No. 300,785; published Aug. 26, 1930.
Preparation for dyeing hair. J. H. Yamada. 277,432; Nov. 11; Serial No. 299,748; published Aug. 19, 1930.
Preparation for internal use. Schering-Kahlbaum A. G. 277,289; Nov. 11; Serial No. 303,659; published Sept. 2, 1930.
Preparation for the relief of colds, inflammations, etc. Beugen's Inc. 277,274; Nov. 11; Serial No. 303,683; published Sept. 2, 1930.
Preparation for the relief of coughs due to colds. M. E. Zentz. 277,391; Nov. 11; Serial No. 302,121; published Sept. 2, 1930.
Preparation for the relief of indigestion. McKesson & Robbins, Incorporated. 277,180; Nov. 11; Serial No. 302,786; published Aug. 19, 1930.
Preparation for the treatment of colds and influenza. B. A. Haun. 277,392; Nov. 11; Serial No. 302,163; published Aug. 19, 1930.
Preparation for treating indigestion and constipation. A. M. Hopper. 277,401; Nov. 11; Serial No. 303,642; published Sept. 2, 1930.
Preparation for use in the treatment of constipation. Petrolagar Laboratories, Inc. 277,393; Nov. 11; Serial No. 302,165; published Sept. 2, 1930.
Preparation or coating for the protection of packages and labels. Sun Tube Corporation. 277,402; Nov. 11; Serial No. 303,665; published Sept. 2, 1930.
Preparation to be taken internally in the treatment of muscle aches, etc. Guardian Health Products Co. 277,240; Nov. 11; Serial No. 302,317; published Aug. 12, 1930.
Preparation to be used after shaving, Liquid. Queen Perfumery Co. 277,336; Nov. 11; Serial No. 284,139; published Aug. 12, 1930.
Preparations for electrodepositing metals of the platinum group. Baker & Company. 277,356; Nov. 11; Serial No. 294,105; published Aug. 12, 1930.
Purgative compounds, Liquid. California Fig Syrup Co. 35,886–7; renewed Feb. 12, 1931.
Purgative, laxatives, and tonic medicinal preparation. Drolac Chemical Co. 277,403; Nov. 11; Serial No. 303,687; published Sept. 2, 1930.
Remedy for rheumatism, gout, and lumbago. Turner's Pharmacy. 81,181; renewed Mar. 7, 1931.
Rouge, face powder, tooth paste, etc., Lip. G. Glatzer. 277,400; Nov. 11; Serial No. 303,284; published Sept. 2, 1930.
Salt. Worcester Salt Company. 277,365; Nov. 11; Serial No. 301,545; published Aug. 19, 1930.
Salt. Worcester Salt Company. 277,388–9; Nov. 11; Serial Nos. 302,115–7; published Sept. 2, 1930.
Salts, Bath. Scott-La Belle Corp. 277,500; Nov. 11; Serial No. 300,091; published Aug. 26, 1930.
Salts, Effervescent. Italian Importing Company. 277,184; Nov. 11; Serial No. 301,344; published Aug. 19, 1930.
Salve, Healing. W. Schmermund. 277,373; Nov. 11; Serial No. 302,483; published Sept. 2, 1930.
Shampoo, Liquid. F. W. Barber. 277,307; Nov. 11; Serial No. 301,150; published Aug. 26, 1930.
Suppositories. Home Treatment Remedy Company. 79,493; renewed Sept. 13, 1930.
Surgical dressings and poultices. Paul Hartmann, A.-G. 277,474; Nov. 11; Serial No. 293,555; published Aug. 19, 1930.
Tonic, General. C. Darby. 277,232; Nov. 11; Serial No. 302,996; published Aug. 12, 1930.
Tonic, Medicinal. Hilliard Iodine Laboratories. 277,185; Nov. 11; Serial No. 301,343; published Aug. 12, 1930.
Tooth paste, face powder, cold cream, etc. Colgate-Palmolive-Peet Company. 277,233; Nov. 11; Serial No. 302,993; published Aug. 12, 1930.

CLASS 8

Humidors. Robbins Company. 277,158; Nov. 11; Serial No. 302,189; published Sept. 2, 1930.

CLASS 9

Powder-train fuses. Coast Manufacturing & Supply Co. 277,504; Nov. 11; Serial No. 299,762; published Aug. 26, 1930.

CLASS 10

Fertilizers. Old Leaf Mold Humus Corporation. 277,146; Nov. 11; Serial No. 303,573; published Sept. 2, 1930.

CLASS 11

Ink. L. E. Waterman Company. 277,147; Nov. 11; Serial No. 303,358; published Sept. 2, 1930.
Inks and stamp pad, Copying, indelible, writing, etc. S. S. Stafford, Inc. 277,245; Nov. 11; Serial No. 301,310; published Sept. 2, 1930.

CLASS 12

Asphalt, Liquid. L. R. Mackenzie. 277,221; Nov. 11; Serial No. 301,961; published Sept. 2, 1930.
Buildings, Portable manufactured. Economy Housing Company. 277,222; Nov. 11; Serial No. 301,421; published Sept. 2, 1930.
Cement, Construction. National Portland Cement Company. 277,212; Nov. 11; Serial No. 302,742; published Sept. 2, 1930.
Cement, Slag puzzolan. Cheney Lime & Cement Company. 277,210; Nov. 11; Serial No. 302,929; published Sept. 2, 1930.
Closet lining, flooring, shelving, etc. George C. Brown & Company. 277,220; Nov. 11; Serial No. 302,158; published Sept. 2, 1930.
Flooring, Oak and beech. Nashville Hardwood Flooring Company. 277,213; Nov. 11; Serial No. 302,741; published Sept. 2, 1930.
Flooring, Open-type. Welded Products Co. Inc. 277,408; Nov. 11; Serial No. 298,872; published Sept. 2, 1930.
Structural-coating material, Protective. Bayer Products Company. 277,407; Nov. 11; Serial No. 298,881; published Sept. 2, 1930.

CLASS 13

Bolts and rivets. Pacific Coast Steel Corporation. 277,272; Nov. 11; Serial No. 301,202; published Aug. 26, 1930.
Escutcheons, door handles, door pulls, etc. Yale and Towne Mfg. Co. 277,267; Nov. 11; Serial No. 302,204; published Aug. 26, 1930.
Hardware, Suitcase and trunk. Seymour Products Company. 277,268; Nov. 11; Serial No. 302,154; published Sept. 2, 1930.
Pipe and tubing, Metal. Youngstown Sheet & Tube Company. 277,426; Nov. 11; Serial No. 300,314; published Aug. 26, 1930.
Releasing devices, valves, connecting tubing, etc., Automatic. Automatic Sprinkler Corporation of America. 277,512; Nov. 11.
Screws. Holo-Krome Screw Corporation. 277,346; Nov. 11; Serial No. 295,619; published Sept. 2, 1930.

Sprinklers, Lawn. National Lawn Sprinkler Corporation. 277,269; Nov. 11; Serial No. 301,995; published Aug. 26, 1930.
Valves and parts thereof. Edward Valve and Manufacturing Co. 277,262; Nov. 11; Serial No. 303,172; published Sept. 2, 1930.
Valves, Multiple-level. Hazleton Company. 277,353; Nov. 11; Serial No. 294,355; published Aug. 26, 1930.

CLASS 14

Bars, castings, and drawn rods, Cored and solid. Sumet Corporation. 277,422; Nov. 11; Serial No. 296,500; published Aug. 26, 1930.
Iron, Pig. Bethlehem Steel Company. 277,526; Nov. 11.

CLASS 15

Candles. West Indian Oil Company. 277,148; Nov. 11; Serial No. 303,139; published Aug. 26, 1930.
Gasoline. Tank Car Stations Incorporated. 277,155–6; Nov. 11; Serial Nos. 302,289–90; published Aug. 19, 1930.
Gasoline and household fuel oil, etc. Busfield Oil Company. 277,437; Nov. 11; Serial No. 299,484; published Aug. 19, 1930.
Gasoline, kerosene, oils, etc. Crystal Oil Works. 277,165; Nov. 11; Serial No. 301,161; published Aug. 26, 1930.
Oil compound. Union Petroleum Company. 81,038; renewed Feb. 21, 1931.
Oil, Lubricating. Clarkson & Ford Company. 277,164; Nov. 11; Serial No. 301,837; published Sept. 2, 1930.
Oils and gas lubricating oils and lubricating greases, Motor-fuel. Bulk Service Stations, Inc. 277,429; Nov. 11; Serial No. 300,048; published Aug. 26, 1930.
Oils and greases. Indian Refining Company. 277,354; Nov. 11; Serial No. 294,225; published Sept. 2, 1930.
Oils and greases and gasoline, Lubricating. Atlantic, Pacific & Gulf Oil Company. 277,150; Nov. 11; Serial No. 302,925; published Sept. 2, 1930.
Oils and greases and power-transmission oils, Lubricating. Fortuna-Werke Spezialmaschinenfabrik A.-G. 277,329; Nov. 11; Serial No. 284,534; published Aug. 19, 1930.
Oils and greases, Lubricating and transmission. Fortuna-Werke Spezialmaschinenfabrik A.-G. 277,330; Nov. 11; Serial No. 284,533; published June 24, 1930.

CLASS 16

Filler for wood and other materials used for floors. Continental Chemical Corporation. 277,494; Nov. 11; Serial No. 295,659; published Aug. 26, 1930.
Paint. Jewel Paint & Varnish Co. 277,465; Nov. 11; Serial No. 300,522; published Aug. 26, 1930.
Varnish. Chicago Mica Company. 277,192; Nov. 11; Serial No. 302,724; published Sept. 2, 1930.
Varnish. International Combustion Tar & Chemical Corporation. 277,195; Nov. 11; Serial No. 302,402; published Aug. 26, 1930.
Varnish and lacquers. I. G. Farbenindustrie Aktiengesellschaft. 277,194; Nov. 11; Serial No. 302,537; published Aug. 26, 1930.
Wax. E. I. du Pont de Nemours and Company. 277,493; Nov. 11; Serial No. 296,001; published Aug. 26, 1930.
Wax, Liquid floor. Standard Oil Company of California. 277,191; Nov. 11; Serial No. 302,750; published Aug. 26, 1930.
Wood composition in the nature of putty, Pliable. Chemical Wood Products Company. 277,198; Nov. 11; Serial No. 301,577; published Sept. 2, 1930.

CLASS 17

Cigars. American Cigar Company. 277,347–9; Nov. 11; Serial Nos. 295,596–8; published Aug. 26, 1930.
Cigars and cigarettes. Kuenzle & Streiff. 80,061; renewed Nov. 1, 1930.
Cigars, Packaged. Max Schwarz Manufacturer of La Primadora Havana Cigars, Ltd. 277,228; Nov. 11; Serial No. 303,581; published Sept. 2, 1930.
Tobacco and cigarettes. Luckett-Wake Tobacco Co. 277,151; Nov. 11; Serial No. 302,864; published Sept. 2, 1930.

CLASS 19

Aeroplanes and aeroplane structural parts. Inland Aviation Company. 277,345; Nov. 11; Serial No. 295,900; published Aug. 26, 1930.
Automobiles, motor cycles, bicycles, etc. Dürener Metallwerke Aktien-Gesellschaft. 277,252; Nov. 11; Serial No. 289,399; published Sept. 2, 1930.
Automotive vehicles and their component parts. Studebaker Corporation. 277,160; Nov. 11; Serial No. 303,404; published Aug. 26, 1930.
Boats. Dawn Boat Corporation. 277,271; Nov. 11; Serial No. 301,416; published Aug. 26, 1930.
Boats, Motor. George F. Crouch Incorporated. 277,170; Nov. 11; Serial No. 303,319; published Sept. 2, 1930.
Hub caps. Studebaker Corporation. 277,299–300; Nov. 11; Serial Nos. 302,419–20; published Aug. 26, 1930.
Motor cycles. Ardie-Werk A. G. 277,343; Nov. 11; Serial No. 287,169; published Sept. 2, 1930.
Trailers. Two-wheeled camping. A. G. S. Sherman. 277,169; Nov. 11; Serial No. 303,387; published Aug. 26, 1930.
Vehicles, Automotive. Studebaker Corporation. 277,275; Nov. 11; Serial No. 303,405; published Aug. 26, 1930.
Wheel for car brakes, Hand. Universal Draft Gear Attachment Co. 277,249; Nov. 11; Serial No. 291,071; published Sept. 2, 1930.

CLASS 21

Buttons, Push. Yale and Towne Mfg. Co. 277,157; Nov. 11; Serial No. 302,203; published Aug. 26, 1930.
Cleaner, Electric vacuum. M. S. Wright Company. 277,175; Nov. 11; Serial No. 303,142; published Sept. 2, 1930.
Electric insulators and electric junction boxes, etc. Merchant Trading Company. 277,167; Nov. 11; Serial No. 301,048; published Sept. 2, 1930.
Electric insulators, electric junction boxes, etc. Merchant Trading Company. 277,166; Nov. 11; Serial No. 301,050; published Sept. 2, 1930.
Electric-lighting fixtures, etc. Miller Company. 277,344; Nov. 11; Serial No. 296,132; published Sept. 2, 1930.
Electrical contact fingers for conducting electric current in and between parts of electric control apparatus. Orco Mfg. Corp. 277,152; Nov. 11; Serial No. 302,513; published Aug. 26, 1930.
Electrical insulation compounds, etc. Harvel Corporation. 277,161; Nov. 11; Serial No. 302,161; published Aug. 19, 1930.
Electrical supplies for automobiles. N. P. Sher. 277,286; Nov. 11; Serial No. 285,753; published Sept. 2, 1930.
Electrically-operated information tabulating and list-selecting machines. Gile Merchandising Bureau. 277,315; Nov. 11; Serial No. 302,729; published Aug. 26, 1930.
Electron-tube systems, Cascaded. E. H. Loftin, trustee. 277,431; Nov. 11; Serial No. 299,784; published Sept. 2, 1930.
Light-sensitive cells, radio detecting, rectifying, and amplifying tubes. Arcturus Radio Tube Company. 277,154; Nov. 11; Serial No. 302,367; published Aug. 26, 1930.
Radio aerial kits. N. K. Malotte. 277,418; Nov. 11; Serial No. 297,752; published Sept. 2, 1930.
Radio receiving sets. Balkelt Radio Company. 277,260; Nov. 11; Serial No. 286,416; published Aug. 26, 1930.
Radio receiving sets, vacuum or electron tubes, and radio speakers. Columbia Radio Corporation. 277,173; Nov. 11; Serial No. 303,163; published Sept. 2, 1930.
Tubes and parts thereof, Electron emissive. Arcturus Radio Company. 277,341; Nov. 11; Serial No. 275,936; published Aug. 26, 1930.
Tubes and parts thereof, Electron emissive. Arcturus Radio Tube Company. 277,351; Nov. 11; Serial No. 295,110; published Sept. 2, 1930.

CLASS 23

Casing-pulling machines, pump-tubing drains, hydraulic plugs, etc. Thrift Corporation. 277,316; Nov. 11; Serial No. 302,702; published Aug. 26, 1930.
Cutlery. P. J. Michels. 277,312; Nov. 11; Serial No. 303,199; published Aug. 26, 1930.
Drilling tools and equipment, Well-. Baash-Ross Tool Company. 277,317; Nov. 11; Serial No. 302,523; published Aug. 26, 1930.
Engines and parts therefor, Internal-combustion. Continental Aircraft Engine Company. 277,423; Nov. 11; Serial No. 296,399; published Sept. 2, 1930.
Grinding and pulverizing machines. Pulverizing Machinery Company. 277,258; Nov. 11; Serial No. 286,837; published Aug. 26, 1930.
Humidifier for internal-combustion engines. Internal Combustion Atomizers Company. 277,313; Nov. 11; Serial No. 303,114; published Aug. 26, 1930.
Ice picks, kitchen forks, cake turners, etc. Utility Manufacturing Co., Inc. 277,350; Nov. 11; Serial No. 295,404; published Aug. 26, 1930.
Key-bitting machines. Yale and Towne Mfg. Co. 277,323; Nov. 11; Serial No. 302,202; published Aug. 26, 1930.
Machines and apparatus for grinding, lapping, etc. Gleason Works. 277,419; Nov. 11; Serial No. 297,786; published Sept. 2, 1930.
Machines and apparatus for manufacturing shoes. Fortuna-Werke Spezialmaschinenfabrik A.-G. 277,334; Nov. 11; Serial No. 284,529; published June 24, 1930.
Machines and apparatus for working leather, etc. Fortuna-Werke Spezialmaschinenfabrik A.-G. 277,333; Nov. 11; Serial No. 284,530; published July 15, 1930.
Rakes, Bamboo. G. W. McGuire. 277,314; Nov. 11; Serial No. 302,702; published Aug. 26, 1930.
Razor blades, pocketknives, scissors, and shears. Montgomery Ward & Co. 277,358; Nov. 11; Serial No. 294,080; published Aug. 26, 1930.
Shovels, cranes, and parts thereof. Ohio Power Shovel Company. 277,321; Nov. 11; Serial No. 302,255; published Sept. 2, 1930.
Supplies, Printers'. American Steel Chase Co. 277,310; Nov. 11; Serial No. 303,268; published Sept. 2, 1930.
Tractors, tractor engines, track links, etc. Caterpillar Tractor Co. 277,417; Nov. 11; Serial No. 297,791; published Aug. 26, 1930.
Vending machines. R. B. Keehnel. 277,311; Nov. 11; Serial No. 303,250; published Aug. 26, 1930.
Winding machines. Universal Winding Company. 85,788; renewed Jan. 15, 1931.
Wrenches, wrench sets, wrench sockets, and tool handles. J. H. Williams & Co. 277,308–9; Nov. 11; Serial Nos. 303,521–2; published Sept. 2, 1930.

CLASS 24

Ironing boards. Peru Basket Company. 277,357; Nov. 11; Serial No. 294,085; published Sept. 2, 1930.
Irons and parts thereof, Self-heating charcoal flat and sad. Colebrookdale Iron Company. 277,304; Nov. 11; Serial No. 301,848; published Aug. 26, 1930.

CLASS 26

Balancing apparatus for grinding wheels, etc. Fortuna-Werka Spezialmaschinenfabrik A.-G. 277,331; Nov. 11; Serial No. 284,532; published July 15, 1930.
Balancing apparatus, measuring apparatus, etc. Fortuna-Werke Spezialmaschinenfabrik A.-G. 277,332; Nov. 11; Serial No. 284,531; published June 24, 1930.
Clothes patterns. G. Fox & Co. Inc. 277,324; Nov. 11; Serial No. 301,883; published Sept. 2, 1930.
Films, Printed motion-picture. Metro-Goldwyn-Mayer Corporation. 277,427; Nov. 11; Serial No. 300,221; published Sept. 2, 1930.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 11TH DAY OF NOVEMBER, 1930

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

A C Spark Plug Company. (See Norviel, Harry E., assignor.)

Aarseth, Ole M., Echo, Minn. Mail box. 1,781,264; Nov. 11.

Abbott, Albert L., Canton, assignor to The Diebold Safe & Lock Company, Canton, Ohio. Jamb section. 1,781,488; Nov. 11.

Abbott, Basil N., Richmond, Va. Flat-top-desk cabinet. 1,781,152; Nov. 11.

Abrahams, Alexander I., New York, N. Y. Loud-speaker horn. 1,781,489; Nov. 11.

Acme Motion Picture Projector Company. (See De Vault, Ralph P., assignor.)

Adam, Auguste E., Houilles, France. Device for automatic adjustment of light projectors. 1,781,311; Nov. 11.

Aerial Advertising, Inc. (See Rohlfs, Roland, assignor.)

Affel, Herman A., Ridgewood, N. J., assignor to American Telephone and Telegraph Company. Concentric conductor system. 1,781,093; Nov. 11.

Affel, Herman A., Ridgewood, and E. I. Green, East Orange, N. J., assignors to American Telephone and Telegraph Company. Concentric conducting system. 1,781,092; Nov. 11.

Aiken, Glen A., and J. R. Royston, Pittsburgh, Pa. Lock washer. 1,781,660; Nov. 11.

Aikman, Burton S., assignor to National Brake & Electric Company, Milwaukee, Wis. Car-washing system. 1,780,991; Nov. 11.

Ainslie, Robert T., Palm Springs, Calif. Motor spreader. 1,780,902; Nov. 11.

Airship Guarantee Company. (See Burney, C. D., Wallis, Norway, and Temple, assignors.)

Aktiengesellschaft Brown, Boverie and Cie. (See Jonas, Julius, assignor.)

Aktiengesellschaft der Maschinenfabriken Escher Wyss & Cie. (See Rüegger, Eduard, assignor.)

Alert Products, Inc. (See Norton, Arthur G., assignor.)

Alland, Maurice, Atlantic City, N. J. Mixing device. 1,781,359; Nov. 11.

Allen, Albert, Winchester, assignor to Atlantic Precision Instrument Company, Boston, Mass. Measuring moisture content of sheet material. 1,781,153; Nov. 11.

Allen, Arthur S., New York, and R. Ruzicka, Dobbs Ferry, assignors to The Packer Manufacturing Co., Inc., New York, N. Y. Bottle structure. 1,781,094; Nov. 11.

Allen, Grosvenor N., and E. H. Kreps, assignors to Oneida Community, Limited, Oneida, N. Y. Spoon or similar article. Des. 82,472; Nov. 11.

Allen, Hugh E., Chicago, assignor of one-half to A. G. McCaleb, Evanston, Ill. Condimentation of ground meats. 1,781,154; Nov. 11.

Allentown Knit Fabrics Company. (See Schreiber, Moses, assignor.)

Allied Die-Casting Corporation. (See Dollin, E. N., assignor, and Jacobson.)

Allyn, Robert S., as trustee. (See Allyn, Robert S., assignor.)

Allyn, Robert S., Brooklyn, N. Y., assignor to R. S. Allyn, as trustee for the benefit of D. G. Clark, Coosada Station, Ala., L. C. Clark, Lakeville, Conn., E. H. Fickinger, Great Neck, and R. S. Allyn, New York, N. Y. Machine for slitting sheets to be stretched. 1,781,533; Nov. 11.

American Chemical Paint Company. (See Gravell, James H., assignor.)

American Electric Switch Corporation. (See Lewis, Joseph C.)

American Lithographic Company. (See Intemann, William, assignor.)

American Mine Door Company, The. (See Gurney, Albert J., assignor.)

American Optical Company. (See Baker, Nelson M., assignor.)

American Rolling Mill Company, The. (See Naugle, H. M., and Townsend, assignors.)

American Smelting and Refining Company. (See MacMichael, Hugh R., assignor.)

American Stove Company. (See Stockstrom, Arthur, assignor.)

American Telephone and Telegraph Company. (See Affel, Herman A., assignor.)

American Telephone and Telegraph Company. (See Affel, H. A., and Green, assignors.)

American Telephone and Telegraph Company. (See Bailey, Austin, assignor.)

American Telephone and Telegraph Company. (See Bailey, A., and Dean, assignors.)

American Telephone and Telegraph Company. (See Blye, Paul W., assignor.)

American Telephone and Telegraph Company. (See Nein, Harry R., assignor.)

American Woodlite Corporation. (See Caughlan, Martha W., assignor.)

Anderson, Charles H., Lexington, Ky. Internal-combustion engine. 1,781,042; Nov. 11.

Anderson, George C., assignor to Cope-Swift Company Incorporated, Detroit, Mich. Plate for burners. 1,780,896; Nov. 11.

Anderson, Henry G. (See Sladek, L. J., and Anderson.)

Anderson, Martin J., assignor to Mathews Conveyer Company, Ellwood City, Pa. Conveying and spacing apparatus. 1,781,424; Nov. 11.

Anderson, Martin J., assignor to Mathews Conveyer Company, Ellwood City, Pa. Conveying apparatus for dipping. 1,781,425; Nov. 11.

Anderson, Raymond T., assignor to The V. D. Anderson Company, Cleveland, Ohio. Press. 1,780,961; Nov. 11.

Anderson, Samuel M., Hyde Park, assignor to B. F. Sturtevant Company, Hyde Park, Mass. Propeller fan. 1,781,155; Nov. 11.

Anderson, V. D., Company, The. (See Anderson, Raymond T., assignor.)

Angert Brothers. (See Angert, George H., assignor.)

Angert, George H., assignor to Angert Brothers, Cincinnati, Ohio. Table. 1,781,043; Nov. 11.

Arana, Camilo M., Habana, Cuba. Photographic reproduction apparatus. 1,781,044; Nov. 11.

Armor, James C., West View, Pa. Packing welding rods and a bundle for the same. 1,781,360; Nov. 11.

Armstrong, Percy A. E., New York, N. Y. Forming alloys. 1,781,490; Nov. 11.

Armstrong, Victor C., Hackensack, N. J., assignor to The Rail Joint Company, New York, N. Y. Rail-joint bar. 1,781,426; Nov. 11.

Arrow Electric Company, The. (See Carlson, Johannes R., assignor.)

Art Concrete Works. (See Haase, L. G., and Brooks, assignors.)

Arthur, James F., Dickson City, Pa. Circulating tube. Re17,866; Nov. 11.

Ashington Coal Company Limited. (See Drummond, Walter J., assignor.)

Atlantic Precision Instrument Company. (See Allen, Albert, assignor.)

Automobile "Lock-Alarm" Corporation. (See Bolduc, Joseph A., assignor.)

Avery Power Machinery Co. (See Scranton, Charles J., jr., assignor.)

Babcock & Wilcox Company, The. (See Hall-Brown, A., and Jones, assignors.)

Babcock & Wilcox Company, The. (See Witz, Henri E., assignor.)

Bacher, Rollin L., Lakewood, assignor to The United States Air Compressor Company, Cleveland, Ohio. Fluid-dispensing apparatus. 1,781,045; Nov. 11.

Bailey, Austin, Maplewood, N. J., assignor to American Telephone and Telegraph Company. Radio signaling system. 1,780,963; Nov. 11.

Bailey, Austin, Freehold, N. J., and S. W. Dean, Houlton, Me., assignors to American Telephone and Telegraph Company. Radio signaling system. 1,780,962; Nov. 11.

Baird, John L., assignor to Television Limited, London, England. Television or like system and apparatus. 1,781,210; Nov. 11.

Baker, Edwin M. (See Leslie, E. H., and Baker.)

Baker, George R. (See Savy, R., Baker, and Prescott.)

Baker, Nelson M., assignor to American Optical Company, Southbridge, Mass. End piece for an ophthalmic mounting. Des. 82,473; Nov. 11.

Baker, Nelson M., assignor to American Optical Company, Southbridge, Mass. End piece for an ophthalmic mounting. Des. 82,474; Nov. 11.

Baker Perkins Company. (See Harber, Laurence S., assignor.)

Baker Perkins Company. (See Savy, R., Baker, and Prescott, assignors.)

Barbera, Tony, assignor to Designograph Company, Trinidad, Colo. Device for making designs on cakes and the like. 1,781,209; Nov. 11.

Barnes, Leland S., Chattanooga, Tenn. Box or container. 1,781,624; Nov. 11.

Barron, William L., Laurence Harbor, assignor to The Singer Manufacturing Company, Elizabeth, N. J. Stitch-forming mechanism for sewing machines. 1,781,427; Nov. 11.

Bartlett Hayward Co., The. (See Wagner, Frederick H., assignor.)

Bartling, Friedrich, Munich, Germany. Thermal treatment of pulverulent material. 1,781,659; Nov. 11.
Barton, John H., assignor to The Florida Copy-Writing Corporation, Miami, Fla. Typewriter attachment. 1,781,312; Nov. 11.
Baylis, Walter S., assignor to Filtrol Company of California, Los Angeles, Calif. Making a decolorizing clay. 1,781,265; Nov. 11.
Beardslee Chandelier Manufacturing Company. (See Ohm, Albert J. D., assignor.)
Beattie, Ernest J., Fall River, Mass. Cutting device and tool therefor. 1,781,564; Nov. 11.
Beatty, Robert J., assignor to The Federal Glass Company, Columbus, Ohio. Method and apparatus for making articles of glassware. 1,781,565; Nov. 11.
Beaumont, R. H., Co. (See Beaumont, Robert H., assignor.)
Beaumont, Robert H., Radnor, Pa., assignor to R. H. Beaumont Co., Philadelphia, Pa. Skip-bucket discharge mechanism. 1,781,211; Nov. 11.
Beckers, Arnold, Cologne-Lindenthal, Germany. Coking oven. 1,780,992; Nov. 11.
Beckman, George V., Lodi, Calif. Disk-mounting attachment for harrows. 1,781,428; Nov. 11.
Beckwith, Arthur C., Caicago, Ill., and F. B. Farnsworth, Wadsworth, Ohio, assignors to Chicago Lubricator Company, Chicago, Ill. Automatic drifting valve for steam locomotives. 1,780,964; Nov. 11.
Bell, Ivan C., assignor to The Guiberson Corporation, Dallas, Tex. Multiple-cutter-disk bit. Re17,856; Nov. 11.
Bellamore, David H., New York, N. Y. Disk wheel. 1,780,897; Nov. 11.
Bell Telephone Laboratories, Incorporated. (See Bruce, Edmond, assignor.)
Bell Telephone Laboratories, Incorporated. (See Carpenter, W. W., and Hersey, assignors.)
Bell Telephone Laboratories, Incorporated. (See Dunham, Bert G., assignor.)
Bell Telephone Laboratories, Incorporated. (See Hague, Alfred E., assignor.)
Bell Telephone Laboratories, Incorporated. (See Harrison, Henry C., assignor.)
Bell Telephone Laboratories, Incorporated. (See Hoch, Ellery T., assignor.)
Bell Telephone Laboratories, Incorporated. (See Holland, Newman H., assignor.)
Bell Telephone Laboratories, Incorporated. (See Horton, Joseph W., assignor.)
Bell Telephone Laboratories, Incorporated. (See King, D. H., and Martin, assignors.)
Bell Telephone Laboratories, Incorporated. (See Mason, Warren P., assignor.)
Bell Telephone Laboratories, Incorporated. (See O'Neill, Henry W., assignor.)
Bell Telephone Laboratories, Incorporated. (See Thuras, Albert L., assignor.)
Bendix Brake Company. (See La Brie, Ludger E., assignor.)
Bendix Brake Company. (See Norton, Raymond J., assignor.)
Benedetto, Antonio, Annandale, near Sydney, New South Wales, Australia. Woodworking machinery. 1,781,429; Nov. 11.
Berman, Adolph, Jackson Heights, Long Island City, N. Y. Automobile ventilator. 1,780,903; Nov. 11.
Berrisford, William H., Stoke-on-Trent, England, assignor to Lockwood's Clean Coal Process Limited, London, England. Apparatus for separating coal from dirt and like foreign substances. 1,780,965; Nov. 11.
Bertschinger, Charles F., Jamaica, N. Y., assignor of three-fourths to Tide Water Oil Company, Bayonne, N. J. Antifraud means for storage tanks. 1,781,534; Nov. 11.
Berwick, Jo D., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Rubber or similar material. Des. 82,475; Nov. 11.
Bethenod, Joseph, Paris, France. Antenna. 1,781,046; Nov. 11.
Bilezikian, Arakel S., et al. (See Strom, Edwin W., assignor.)
Bilezikian, Paul, et al. (See Strom, Edwin W., assignor.)
Biscayne Trust Company et al., executors. (See Gold, E. H. and Russell.)
Biscayne Trust Company, et al, executors. (See Gold, E. H., Manchester, and Russell.)
Bishop & Babcock Manufacturing Company, The. (See Levy, Edward J., assignor.)
Biva, Lucien, Brooklyn, N. Y., assignor to Pennsylvania Textile Mills, Inc., Clifton, N. J. Textile fabric. Des. 82,476; Nov. 11.
Black, Edgar W. (See Boschke, A. C., and Black.)
Blacklock, John W., Brookfield, Mo. Grave cover and casket or vault decoration. 1,781,625; Nov. 11.
Blanchard, Hymen A., Buffalo, N. Y. Concrete curbing. 1,780,904; Nov. 11.
Blaney, William T., Peterborough, Ontario, Canada. Air cleaner. 1,781,430; Nov. 11.
Blau, Fritz, Berlin-Charlottenburg, Germany. Picture. 1,781,313; Nov. 11.
Blaw-Knox Company. (See Williams, Edward, assignor.)
Blesch, Johann W., Evansville, Ind. Cigarette holder. 1,781,566; Nov. 11.
Bliss, E. W., Company. (See Klocke, William, assignor.)
Blood, Howard E., Detroit, Mich., assignor to Norge Corporation. Rotary compressor. 1,781,095; Nov. 11.
Blood, Howard E., and R. Lapsley, assignors to Detroit Gear & Machine Company, Detroit, Mich. Gear-shift mechanism. 1,780,898; Nov. 11.
Blye, Paul W., Rutherford, N. J., assignor to American Telephone and Telegraph Company. Electrical transmission system. 1,780,966; Nov. 11.
Bohl, Hugo, Westfield, N. J., assignor to Radiant Lighting Fixture Co., Inc., New York, N. Y. Glass shade for a lighting fixture or article of similar nature. Des. 82,477; Nov. 11.
Bohl, Hugo, Westfield, N. J., assignor to Radian Lighting Fixture Co., Inc., New York, N. Y. Glass shade for a lighting fixture or article of similar nature. Des. 82,478; Nov. 11.
Böhling, Rudolf H., assignor to the firm of Rohrbogenwerk Gesellschaft mit beschrankter Haftung, Hamburg, Germany. Apparatus for producing bent pipes of correct prescribed lengths. 1,781,567; Nov. 11.
Bolduc, Joseph A., Montreal, Quebec, Canada, assignor to Automobile "Lock-Alarm" Corporation, New York, N. Y. Alarm apparatus. 1,781,096; Nov. 11.
Bondeson, Selma O., Seattle, Wash. Educational device. 1,781,047; Nov. 11.
Bonnot Company, The. (See Bonnot, Louis C., assignor.)
Bonnot, Louis C., Louisville, Ohio, assignor to The Bonnot Company, Canton, Ohio. Disk feeder and mixer. 1,781,097; Nov. 11.
Booth, Charles W., Chicago, Ill. Uncoupling device. 1,781,491; Nov. 11.
Booth, Nicol A., Dunedin, New Zealand. File guide for saw sharpening. 1,781,626; Nov. 11.
Borden Company, The. (See Green, Lee B., assignor.)
Borgnis, Samson, Olney, Pa. Garter grip. 1,781,431; Nov. 11.
Boschke, Albert C., and E. W. Black, Los Angeles, Calif. Shackle. 1,781,627; Nov. 11.
Both, Tonjes A., Stratford, assignor to The Connecticut Electric Manufacturing Company, Bridgeport, Conn. Pilot-light receptacle. 1,781,535; Nov. 11.
Bottle Cap Patents Company. (See Swift, George W., jr., assignor.)
Boughton, Willis A., Cambridge, Mass. Manufacture of rubber. 1,781,492; Nov. 11.
Box Crane & Holst Corporation. (See Hogrebe, Arthur E., assignor.)
Boyle, Eldridge R., Boston, Mass. Carrier for garments. 1,781,628; Nov. 11.
Bradshaw, Harold C., and M. J. De Forest, Chicago, Ill., assignors, by mesne assignments, to United Research Corporation, Long Island City, N. Y. Sound-reproducing apparatus. 1,780,899; Nov. 11.
Braine, Bancroft G., assignor to The Rail Joint Company, New York, N. Y. Stress-balanced splice bar. 1,781,432; Nov. 11.
Braine, Daniel L., Brooklyn, assignor to The Rail Joint Company, New York, N. Y. Rail-joint bar. 1,781,433; Nov. 11.
Brandt, Millard, Tamaqua, Pa., assignor to Darco Corporation, Wilmington, Del. Water purification. 1,781,314; Nov. 11.
Brandt, Millard, Tamaqua, Pa., assignor to Darco Corporation, Wilmington, Del. Regenerating used cooking fats. 1,781,661; Nov. 11.
Braunstein, Schulim, Berlin, Germany. Container for storage and transport of liquefied gases. 1,781,048; Nov. 11.
Brenneis Manufacturing Company. (See Furrer, Samuel S., assignor.)
Brewer, William R., Duluth, Minn. Nonskid device. 1,780,967; Nov. 11.
Bridgeport Hardware Manufacturing Corporation, The. (See Platt, Arthur I., assignor.)
Bridwell, Charles C., Westerville, Ohio. Typewriting machine. 1,781,629; Nov. 11.
Briggs, Loyd A., Cranford, N. J., assignor to Radio Corporation of America. Signaling. 1,781,361; Nov. 11.
Bright, Martin C., Indianapolis, Ind. Automatic gravity cut-off-controlling apparatus. 1,781,315; Nov. 11.
Brigida, Joseph, New York, N. Y. Electrolysis device. 1,781,362; Nov. 11.
Brinton, Charles E., Los Angeles, Calif. Well-drilling tool. 1,781,049; Nov. 11.
Bristol, Edgar H., assignor to The Foxboro Company, Foxboro, Mass. Measuring instrument. 1,781,212; Nov. 11.
Brittain, Richard J., jr., Bloomfield, N. J., assignor to General Motors Corporation, Detroit, Mich. Journal box and frame connection. 1,781,213; Nov. 11.
Broderick, Ernest N., and T. D. Lucier, Detroit, Mich. Method of and mold for casting piston rings. 1,781,098; Nov. 11.
Broeker, Friedrich, Furstenwalde, Germany. Steam-drying or water-separating apparatus for steam power plants. 1,781,568; Nov. 11.
Brooks, Frank M. (See Haase, L. G., and Brooks.)
Brooks, William V., Des Moines, Iowa. Plant support. 1,781,316; Nov. 11.
Brophy, Lawrence W., Muskogee, Okla. Lavatory. 1,780,968; Nov. 11.
Brown, Alfred. (See Peabody, J. C., and Brown.)
Brown Company. (See Richter, G. A., and Schur, assignors.)
Brown Company. (See Sherman, John C., assignor.)
Brown, Herbert E., assignor of one-half to M. H. Mandelbaum, Chicago, Ill. Automobile reverse guard. 1,781,156; Nov. 11.

Brown, John J., assignor, by mesne assignments, to Servel, Inc., New York, N. Y. Refrigeration. 1,781,536; Nov. 11.
Brown, Theophilus, assignor to Deere & Company, Moline, Ill. Cultivator-wheel mounting. 1,780,900; Nov. 11.
Brownback, Henry L., Norristown, Pa. Inlet manifold. 1,781 434; Nov. 11.
Brownell, James L., assignor to Checker Cab Manufacturing Corporation, Kalamazoo, Mich. Motor-vehicle-control apparatus. 1,781,099; Nov. 11.
Bruce, Edmond, Red Bank, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Electrical testing system. 1,781,363; Nov. 11.
Brueckler, Hans. (See Tolman, E. B. jr., and Brueckler.)
Bruni, Amedeo, New York, N. Y. Sound amplifier for airplanes. 1,781,266; Nov. 11.
Brunner, Rudolf, Ruschlikon, near Zurich, Switzerland. Process and apparatus for producing artistic designs. 1,780,969; Nov. 11.
Bryant Electric Company, The. (See Hadley, Donald L., assignor.)
Buffalo Forge Company. (See Criqui, Albert A., assignor.)
Bugbird, Herbert C., Richmond, N. Y. Preparing absorbents for liquid oxygen explosives and resulting absorbents and explosives. 1,781,214; Nov. 11.
Buhman, Richard, Casper, Wyo. Compound for mixing with cements and making the same. 1,781,267; Nov. 11.
Bulkley, Henry P., Oak Park, Ill. Twine holder. 1,781,364; Nov. 11.
Burgher, Clarence L., New York, N. Y. Heating inclosures electrically. Re17,857; Nov. 11.
Burgmann, Robert, Dresden, Germany. Packing or tightening plate. 1,781,365; Nov. 11.
Burkley, Clement J., and E. G. Kimmich, assignors to The Goodyear Tire & Rubber Company, Akron, Ohio. Template for assembling strips of tire-chain material. 1,781,651; Nov. 11.
Burlin, Adolph L., London, England. Treatment of waste spun or woven textile material. 1,781,317; Nov. 11.
Burnelli, Vincent J., assignor to The Upperc-u-Burnelli Corporation. Aircraft. 1,780,993; Nov. 11.
Burney, Charles D., B. N. Wallis, N. S. Norway, and J. E. Temple, Westminster, London, assignors to Airship Guarantee Company, Limited, London, England. Rigid airship. 1,781,100; Nov. 11.
Burroughs Adding Machine Company. (See Horton, Allen A., assignor.)
Burroughs, James A., St. Clair, Mich. Water-power wheel. 1,780,901; Nov. 11.
Burrowes, E. T., Company, The. (See Corporon, George J., assignor.)
Burt, F. N., Company Limited. (See Darrin, Marc, assignor.)
Butler, Robert S., assignor to Southwestern Engineering Corp., Los Angeles, Calif. Filter apparatus. 1,780,905; Nov. 11.
Byington, James A., Orlando, Fla. Box-car brace. 1,781,318; Nov. 11.
Byrne Manufacturing Company, The. (See Dillhoefer, Henry M., assignor.)
Byron, Charles L., Chicago, Ill., assignor, by mesne assignments, to The Wayne Pump Company, Baltimore, Md. Lubricating means. 1,781,493; Nov. 11.
Cabrera Alfred B., assignor to G. A. Youngdahl, Chicago, Ill. Kites. 1,781,662; Nov. 11.
Cade, Arthur R., Pittsburgh, Pa., assignor to Carbide and Carbon Chemicals Corporation. Preparing ethyl esters. 1,781,050; Nov. 11.
Cairns Development Company. (See Carns, Edmund B., assignor.)
Caldwell, Charles A., Dallas, Tex. Sealing device for cocks. 1,780,994; Nov. 11.
Calkins, Claude C., Spokane, Wash. Shoe bearing. 1,781,157; Nov. 11.
Callahan, John M. (See Drumm, H. C., and Callahan.)
Campbell, Archibald N., London, England. Hull for water craft. 1,780,970; Nov. 11.
Campbell, Philip S., Houston, assignor of one-half to M. Culmore, Harris County, Tex. Electric iron. 1,781,158; Nov. 11.
Campula, Anton, Garfield Heights, Ohio. Pressure-actuated valve. 1,781,366; Nov. 11.
Carbide and Carbon Chemicals Corporation. (See Cade, Arthur R., assignor.)
Carey-McFall Co. (See Reukauf, Edward, jr., assignor.)
Carlson, Clarence G., assignor to Chicago Curtain Stretcher Company, Chicago, Ill. Curtain stretcher. 1,780,995; Nov. 11.
Carlson, Edwin G., Riverside, assignor to Speidel Chain Co., Providence, R. I. Extension device. 1,781,101; Nov. 11.
Carlson, Johannes R., assignor to The Arrow Electric Company, Hartford, Conn. Lamp socket. 1,781,663; Nov. 11.
Carns, Edmund B., New York, N. Y., assignor to Cairns Development Company, Wilmington, Del. Wing for aircraft. 1,781,159; Nov. 11.
Carns, Edmund B., Naugatuck, Conn., assignor to Cairns Development Company, Wilmington, Del. Aerofoil. 1,781,160; Nov. 11.
Carol Engineering, Inc. (See McElroy, R. H., and Meehan, assignors.)
Carpenter, Warren W., Queens Village, and R. E. Hersey, Brooklyn, assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y. Automatic toll switching telephone system. 1,780,906; Nov. 11.
Carper, Joseph B., Louisville, Ky. Production of paints. 1,781,435; Nov. 11.
Carrey, John O., assignor to Carrey-Morse Engineering Company, St. Louis, Mo. Adjustable mounting. 1,781,161; Nov. 11.
Carrey-Morse Engineering Company. (See Carrey, John O., assignor.)
Carrier Engineering Corporation. (See Carrier, Willis H., assignor.)
Carrier, Willis H., Essex Fells, assignor to Carrier Engineering Corporation, Newark, N. J. Refrigeration. 1,781,051; Nov. 11.
Carrigan, George W., Cleburne, Tex. Superheater-unit testing device. 1,781,494; Nov. 11.
Carroll, Vencent D., Chicago, Ill. Coffee urn. 1,780,996; Nov. 11.
Caruso, Louis, Irvington, N. J., assignor to The Lionel Corporation, New York, N. Y. Electrical toy. 1,781,537; Nov. 11.
Catlett, John E., San Francisco, Calif. Dishwashing machine. 1,781,052; Nov. 11.
Caughlan, Martha W., Oakland, assignor to American Woodlite Corporation, San Francisco, Calif. Compound reflector. 1,781,436; Nov. 11.
Celaya, Genaro, Los Angeles, Calif. Machine for husking coconuts. 1,781,215; Nov. 11.
Central Waxed Paper Company. (See Goddard, Paul L., assignor.)
Chain Belt Company. (See Gary, Francis P., assignor.)
Chandler, Carl B., assignor to Havana Metal Wheel Co., Havana, Ill. Safety control mechanism for fuel-burning devices. 1,780,971; Nov. 11.
Checker Cab Manufacturing Company, The. (See Johnson, Roy W., assignor.)
Checker Cab Manufacturing Corporation. (See Brownell, James L., assignor.)
Chéneau, Louis J. J. B., Paris, France. Temperature-responsive device. 1,781,630; Nov. 11.
Chicago Curtain Stretcher Company. (See Carlson, Clarence G., assignor.)
Chicago Lubricator Company. (See Beckwick, A. C., and Farnsworth, assignors.)
Chiles, George S. (See Dreibuss, H. C., and Chiles.)
Chisholm, Charles F., Staten Island, assignor of one-half to G. Ramsey, Brooklyn, N. Y. Braking and apparatus therefor. 1,781,437; Nov. 11.
Chrysler Corporation. (See Eisele, Charles W., assignor.)
Chrysler Corporation. (See Henderson, Herbert V., assignor.)
Chubb, Lewis W., Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company. Radio system. 1,781,268; Nov. 11.
Cinema Patents Company. (See De Beaulieu, Leon, assignor.)
Cirne, Charles P., San Francisco, Calif. Reverse lock mechanism. 1,780,907; Nov. 11.
Clark, Dwight G. (See Allyn, Robert S.)
Clark, Edward E., Los Angeles, Calif. Shoulder-pistol holster. 1,781,162; Nov. 11.
Clark, John H., Whetstone, England. Piano. 1,781,216; Nov. 11.
Clark, Lida C., et al. (See Allyn, Robert S., assignor.)
Clarkson, Thomas A., Nashville, Tenn. Animal trap. 1,781,163; Nov. 11.
Clausen, Herbert M., Spokane, Wash. Pneumatic bumper. 1,780,908; Nov. 11.
Cleland, Melvin L., assignor to G. A. Roth Manufacturing Company, Hastings, Nebr. Side awning. 1,781,495; Nov. 11.
Clemens, Fred, Indianapolis, Ind. Automatic course counter and stop. 1,780,909; Nov. 11.
Clendon, George W., Piermont, N. Y., assignor to International Combustion Engineering Corporation. Finely-divided-fuel-burning locomotive. 1,781,319; Nov. 11.
Clodfelter, George M., Yonkers, assignor to The Rail Joint Company, New York, N. Y. Temporary rail joint shim. 1,781,438; Nov. 11.
Clover, John R., Enid, Okla. Cylinder washing machine. 1,781,217; Nov. 11.
Cocks, Edgar, assignor to Los Angeles Wall Bed Company, Los Angeles, Calif. Portable folding bed. 1,781,439; Nov. 11.
Coerper, Hans, Staten Island, assignor to International Combustion Engineering Corporation, New York, N. Y. Boiler furnace. 1,781,269; Nov. 11.
Coffey, Irven E., Hastings, Nebr. Gear-shifting mechanism. 1,781,270; Nov. 11.
Cohan, William M., and M. N. Patzan, Brooklyn, N. Y. Cushioned heel for shoes. 1,780,997; Nov. 11.
Collins, Ernest V., jr., Brooklyn, assignor to Delaware, Lackawanna & Western Coal Company, New York, N. Y. Treating coal. 1,781,102; Nov. 11.
Collins, Ernest V., jr., Brooklyn, assignor to Delaware, Lackawanna & Western Coal Company, New York, N. Y. Treating coal. 1,781,103; Nov. 11.
Collins, Frank, assignor to Metropolitan Lamp Co., Inc., New York, N. Y. Lamp base member or article of similar nature. Des. 82,479; Nov. 11.
Collins, Frank, assignor to Metropolitan Lamp Co., Inc., New York, N. Y. Lamp base member or article of similar nature. Des. 82,480; Nov. 11.

Collins, Frank, assignor to Metropolitan Lamp Co., Inc., New York, N. Y. Lamp base member or article of similar nature. Des. 82,481; Nov. 11.
Collins, Frank, assignor to Metropolitan Lamp Co., Inc., New York, N. Y. Lamp base member or article of similar nature. Des. 82,482; Nov. 11.
Collins, Frank, assignor to Metropolitan Lamp Co., Inc., New York, N. Y. Lamp base member or article of similar nature. Des. 82,483; Nov. 11.
Collins, Frank, assignor to Metropolitan Lamp Co., Inc., New York, N. Y. Lamp base member or article of similar nature. Des. 82,484; Nov. 11.
Collins, Frank, assignor to Metropolitan Lamp Co., Inc., New York, N. Y. Lamp base member or article of similar nature. Des. 82,485; Nov. 11.
Collins, Frank, assignor to Metropolitan Lamp Co., Inc., New York, N. Y. Lamp base member or article of similar nature. Des. 82,486; Nov. 11.
Collins, Frank, assignor to Metropolitan Lamp Co., Inc., New York, N. Y. Lamp base member or article of similar nature. Des. 82,487; Nov. 11.
Collins, Frank, assignor to Metropolitan Lamp Co., Inc., New York, N. Y. Lamp base member or article of similar nature. Des. 82,488; Nov. 11.
Columbus Dental Manufacturing Company, The. (See Moyer, James H., assignor.)
Combustion Utilities Corporation. (See Wonning, Harvey H., assignor.)
Common Brick Manufacturers' Association of America. (See Denison, George W., assignor.)
Congoleum-Nairn, Inc. (See Feeney, Joseph P., assignor.)
Connecticut Electric Manufacturing Company, The. (See Roth, Tonjes A., assignor.)
Connolly, William B., assignor to F. A. Smith Manufacturing Company, Inc., Rochester, N. Y. Electrical lighting device for cigars and the like. 1,781,440; Nov. 11.
Consolidated Iron-Steel Manufacturing Company, The. (See Kahn, Isaac T., assignor.)
Constable Charles E., assignor to The National Marking Machine Company, Cincinnati, Ohio. Bag holder. 1,781,164; Nov. 11.
Continental Can Company. (See Hodgson, William W., assignor.)
Cook, Calvin P., Arlington, Mass., assignor to Swift and Company, Chicago, Ill. Pork-loin brander. 1,781,367; Nov. 11.
Cook, Charles A., Redditch, England, assignor to Henry Wilkes & Company, Limited. Line-supporting ring for fishing rods. 1,781,569; Nov. 11.
Cook, Joel R., assignor to Domestic Electric Company, Cleveland, Ohio. Electric switch. 1,781,441; Nov. 11.
Cope-Swift Company Incorporated. (See Anderson, George C., assignor.)
Corporon, George J., assignor to The E. T. Burrowes Company, Portland, Me. Adjustable window screen. 1,781,654; Nov. 11.
Cormier, Alfred J. (See Slocombe, G. C., and Cormier.)
Cowdrey, George W., Los Angeles, Calif. Bathing suit. 1,781,271; Nov. 11.
Cowley, James T., Syracuse, N. Y., and W. J. Taylor, Winthrop Harbor, Ill., assignors to The Lamson Company, Syracuse, N. Y. Conveyer system. 1,781,655; Nov. 11.
Cox, Harold N., Glen Ridge, N. J., assignor to Cox Multi-Color Photo Company, Pittsburgh, Pa. Apparatus for color photography. 1,781,496; Nov. 11.
Cox Multi-Color Photo Company. (See Cox, Harold N., assignor.)
Crago, Paul H., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Train-annunciating apparatus. 1,781,497; Nov. 11.
Creedy, Frederick, London, England. Dynamo-electric machine. 1,781,538; Nov. 11.
Criqui, Albert A., assignor to Buffalo Forge Company, Buffalo, N. Y. Centrifugal fan. 1,781,165; Nov. 11.
Crosman, Loring P., Maplewood, assignor to Monroe Calculating Machine Company, Orange, N. J. Zero-setting device. 1,781,320; Nov. 11.
Crumrine, Chester W. (See Dorsey, F. F., and Crumrine.)
Culmore, March. (See Campbell, Philip S., assignor.)
Culp, John F., assignor to Ideal Lubricator Company, Philadelphia, Pa. Regulating valve for grease lubricating systems. 1,781,539; Nov. 11.
Cummings, Earle W., assignor to Watertite Casement Hardware Co., Los Angeles, Calif. Combination screen and sash mounting. 1,781,272; Nov. 11.
Curioni, Aldo, Larchmont, N. Y., assignor of one-half to J. R. Hinchcliffe, Carolina, R. I. Boat. 1,780,998; Nov. 11.
Currier, Arthur L., New Ipswich, N. H. Chuck. 1,781,442; Nov. 11.
Curtis Companies, Incorporated. (See Madsen, Sern, assignor.)
Curtis, Henry E., San Jose, Calif. Braking mechanism for motor vehicles. 1,781,443; Nov. 11.
Daco Corporation. (See Brandt, Millard, assignor.)
Dardelet, Hugues L., Nantes, France, assignor, by mesne assignments, to Dardelet Threadlock Corporation, New York, N. Y. Valve mechanism. 1,780,999; Nov. 11.
Dardelet Threadlock Corporation. (See Dardelet, Hugues L., assignor.)
Dardelet Threadlock Corporation. (See Hoke, William E., assignor.)
Dardelet Threadlock Corporation. (See Thomson, Alfred M., assignor.)
Darrin, Marc, Pittsburgh, Pa., assignor to F. N. Burt Company, Limited, Toronto, Canada. Composition of matter and forming same. Re17,867; Nov. 11.
Darrow, Burgess, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Wheel assembly. 1,781,273; Nov. 11.
Davidson, Archer, Brighton, Mass., assignor to Westinghouse Electric & Manufacturing Company. Power plant. 1,781,368; Nov. 11.
Davis, Augustine, jr., Cincinnati, Ohio. Hydraulically-operated tank valve. 1,781,369; Nov. 11.
Davis, James E., Glen Cove, N. Y. Toy dog team and sled. Des. 82,489; Nov. 11.
Day, Ivan E., Edgerton, Ohio. Car seal. 1,781,540; Nov. 11.
Day, Percy C., assignor to The Falk Corporation, Milwaukee, Wis. Ferryboat. 1,781,656; Nov. 11.
Dayton Scale Company. (See Gullberg, Roy K., assignor.)
Dean, Samuel W. (See Bailey, A., and Dean.)
De Beaulieu, Leon, Hollywood, Calif., assignor, by mesne assignments, to Cinema Patents Company, Inc., New York, N. Y. Forming light strips for motion-picture-film printers. 1,781,000; Nov. 11.
Debor, Hermann, Munich, Germany. Manufacturing rawcaoutchouc plates. 1,781,370; Nov. 11.
Deere & Company. (See Brown, Theophilus, assignor.)
De Forest, Matthew J. (See Bradshaw, H. C., and De Forest.)
Degener, Gustave O., assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 1,781,570; Nov. 11.
Degener, Gustave O., assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 1,781,571; Nov. 11.
Dehuff, Walter F., Glen Rock, Pa. Mixing machine. 1,781,321; Nov. 11.
De Lamar, Rudolph, New York, N. Y., assignor to H. S. Germond, jr., Bayonne, N. J. Portable elevator. 1,781,104; Nov. 11.
De Lange, Ambrose C., Kalispell, Mont. Carburetor. 1,781,218; Nov. 11.
Delaval-Crow, Thomas C., assignor to The New Departure Manufacturing Company, Bristol, Conn. Mounting for pinion shaft of rear axle. 1,781,219; Nov. 11.
Delaware, Lackawanna & Western Coal Company. (See Collins, Ernest V., jr., assignor.)
Delling, Erik H., Snyder, N. Y., assignor to Supersteam Products, Inc. Automotive vehicle. 1,781,322; Nov. 11.
Delo, Charles P., Knox, Pa. Aeroplane. 1,781,371; Nov. 11.
Dempster Mill Manufacturing Company. (See Smethers, J. A., and Elliott, assignors.)
Denecke, George, Milwaukee, Wis. Light support. 1,781,372; Nov. 11.
Dengler, Felton S., Port Neches, Tex., assignor, by mesne assignments, to The Texas Company, New York, N. Y. Manufacture of lubricants. 1,781,444; Nov. 11.
Denison, George W., assignor to Common Brick Manufacturers' Association of America, Cleveland, Ohio. Metallic insert for brick or tile structures. 1,781,445; Nov. 11.
Dennett, Robert C. (See Mitchell, Harry V., assignor.)
Derfus, John J., Appleton, Wis. Curd-working machine. 1,781,373; Nov. 11.
De Roo, William C., assignor to The Fosdick Machine Tool Company, Cincinnati, Ohio. Feed-control mechanism. 1,781,274; Nov. 11.
Designograph Company. (See Barbera, Tony, assignor.)
Despa & Fils (Société en commandite par actions). (See Gohy, Jean, assignor.)
De Tovâros, Julius F., Budapest, Hungary. Current collector for electric railways. 1,781,323; Nov. 11.
Detroit Gear & Machine Company. (See Blood, H. E., and Lapsley, assignors.)
Detroit and Security Trust Company. (See Williams, James H., assignor.)
Deutsch, Leo, Beaver, Pa., assignor, by mesne assignments, to The Wayne Pump Company, Baltimore, Md. High-pressure grease gun. 1,781,374; Nov. 11.
De Vault, Ralph P., Villa Park, assignor, by mesne assignments, to Acme Motion Picture Projector Company, Chicago, Ill. Illuminating system, reflector, and lamp assembly. 1,781,053; Nov. 11.
Dictaphone Corporation. (See Woodbridge, Charles K., assignor.)
Diebold Safe & Lock Company, The. (See Abbott, Albert L., assignor.)
Dies, Charles A., Chicago, Ill. Hairpin. 1,781,324; Nov. 11.
Diesel, William F. (See Hill, W. R., and Diesel.)
Dillhoefer, Henry M., Cleveland Heights, assignor to The Byrne Manufacturing Company, Cleveland, Ohio. Bung ring. 1,781,166; Nov. 11.
Di Neuberg, Ferdinando B., Treviso, Italy. Fluid-operated apparatus for lifting automobile wheels. 1,780,972. Nov. 11.
Dobson, William D., Cleveland, Ohio. Gearing for machines. 1,781,275; Nov. 11.
Dockson, Charles H., Detroit, Mich. Pressure-regulating valve. 1,781,054; Nov. 11.
Doell, Theodore W., Berkeley, and E. N. Klemgard, Albany, assignors to Standard Oil Company of California, San Francisco, Calif. Chatterless oil and producing the same. 1,781,167; Nov. 11.

Doherty Research Company. (See Greenfield, Benjamin, assignor.)
Dollin, Edgar N., Malba, N. Y., and C. C. Jacobson, Glen Ridge, N. J.; said Jacobson assignor to John Robertson Co., Inc., Brooklyn, and said Dollin assignor to Allied Die-Casting Corporation, Long Island City, N. Y. Die-casting machine. 1,781,168; Nov. 11.
Domestic Electric Company. (See Cook, Joel R., assignor.)
Dornier, Claudius, assignor to the firm: Dornier-Metallbauten G. m. b. H., Friedrichshafen-on-the-Bodensee, Germany. Accommodation of liquids in flying machines. 1,781,446; Nov. 11.
Dornier-Metallbauten G. m. b. H. (See Dornier, Claudius, assignor.)
Dorsey, Farnum F., South Orange, N. J., and C. W. Crumrine, assignors, by mesne assignments, to North East Appliance Corporation, Rochester, N. Y. Power-transmission mechanism. Re17,858; Nov. 11.
Dowling, Robert W., New York, N. Y. Bathtub. 1,781,325; Nov. 11.
Downard, James S., Dallas, Tex. Premixed asphalt composition and producing the same. 1,781,105; Nov. 11.
Dräger, Otto H. (See Stelzner, Hermann, assignor.)
Dreibus, Harry C., and G. S. Chiles, assignors to Scullin Steel Company, St. Louis, Mo. Truck bolster. 1,781,106; Nov. 11.
Drumm, Herbert C., and J. M. Callahan, assignors to The Union Metal Manufacturing Company, Canton, Ohio. Metal building. 1,781,498; Nov. 11.
Drummond, Walter J., assignor of one-half to Ashington Coal Company Limited, Newcastle-upon-Tyne, England. Apparatus for pulverizing coal and like substances. 1,781,572; Nov. 11.
Dudley, Robert L., San Francisco, Calif. Indicating device for carriers. 1,781,055; Nov. 11.
Dunbar, Thomas L., Watertown, N. Y. Digestion of fibrous material. 1,781,447; Nov. 11.
Dunham, Bert G., Hawthorne, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Testing system. 1,780,910; Nov. 11.
Dunlap, Clarence E., Sioux City, Iowa. Inner-tube patch. Re17,759; Nov. 11.
Dunnican, George W., Bloomfield, N. J., assignor to Weimann Bros. Manufacturing Company, Derby, Conn. Clip for collapsible tubes. 1,781,448; Nov. 11.
Duplan Silk Corporation. (See Maurus, Harry, assignor.)
Duplate Corporation. (See Sherts, J. H., and Hamill, assignors.)
Du Pont, Francis I., assignor to U. S. F. Powder Company, Wilmington, Del. Smokeless powder. 1,780,911; Nov. 11.
Durable Mat Company. (See Lyons, Charles T., assignor.)
Durchman, Lauri I. L., Petersburg, Va. Manufacturing high-grade alpha cellulose. 1,781,449; Nov. 11.
Easton, Lucian F., La Crosse, Wis. Rotary air pump. 1,781,375; Nov. 11.
Eberhardt, Rudolph, Brooklyn, N. Y. Toilet-accessories container. Des. 82,536; Nov. 11.
Eberling, Charles M., Cleveland, Ohio. Roller bearing. 1,781,450; Nov. 11.
Ebert, Laurence R., Vancouver, Wash. Carburetor. 1,781,276; Nov. 11.
Eckstein, Gustav, Barmen, Germany. Making double-sided molds. 1,781,451; Nov. 11.
Edahl, Knute, Chicago, Ill. Refrigerator car. 1,781,169; Nov. 11.
Edgren, Fred E., Chicago, Ill. Straightedge for wall-paper trimmers. 1,781,499; Nov. 11.
Einstein, Albert, Berlin, and L. Szilard, Berlin-Wilmersdorf, Germany, assignors to Electrolux Servel Corporation, New York, N. Y. Refrigeration. 1,781,541; Nov. 11.
Eisele, Charles W., Detroit, assignor to Chrysler Corporation, Highland Park, Mich. Muffler. 1,781,001; Nov. 11.
Eisenhour, Bert E., Aurora, assignor, by mesne assignments, to United Reproducers Corporation, St. Charles, Ill. Electrodynamic sound recorder and reproducer. 1,781,376; Nov. 11.
Elder, Jules H., Memphis, Tenn. Individual-pan-supporting device. 1,781,056; Nov. 11.
Electric Boat Company. (See Grieshaber, Hugo E., assignor.)
Electric Service Supplies Company. (See Graham, Herbert J., assignor.)
Electrolux Servel Corporation. (See Einstein, A., and Szilard, assignors.)
Ellinger, Albert E., Snyder, assignor to Markel Electric Products, Inc., Buffalo, N. Y. Electric heater. Des. 82,490; Nov. 11.
Elliott, Harry C., assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle. 1,781,500; Nov. 11.
Elliott, William. (See Smethers, J. A., and Elliott.)
Elmwall, Gustave W., New York, N. Y. Steam boiler. 1,781,057; Nov. 11.
Engberg, Axel O., and A. Eriksson-Jons, Stockholm, Sweden, assignors to Inventia Patent-Verwertungs-Gesellschaft, Schaffhausen, Switzerland. Blowing nozzle for suction cleaners. 1,781,542; Nov. 11.
Eriksson-Jons, Anders. (See Engberg, A. O., and Eriksson-Jons.)
Errett, John B., Connellsville, Pa. Clothesline fastener. 1,781,573; Nov. 11.
Esnault-Pelterie, Robert, Paris, France. Method and apparatus for use in testing materials. 1,781,002; Nov. 11.
Etablissements Edouard Belin. See Holweck, Fernand, assignor.)
Exolon Company, The. (See Walton, Samuel F., assignor.)
Eyernschmalz, William, Milwaukee, Wis. Necktie. 1,781,377; Nov. 11.
Fageol, Rollie B., Los Angeles, Calif. Vehicle snubber and spring suspension. 1,781,631; Nov. 11.
Falk Corporation, The. (See Day, Percy C., assignor.)
Farnsworth, Fordyce B. (See Beckwith, A. C., and Farnsworth.)
Fearis, James J., Smackover, Ark. Oil-treating apparatus. 1,781,632; Nov. 11.
Federal Glass Company, The. (See Beatty, Robert J., assignor.)
Fedrizzi, Riccardo, Weston, Pa. Automatic control for aeroplanes. 1,781,633; Nov. 11.
Feeney, Joseph P., Kearny, N. J., assignor to Congoleum-Nairn, Inc. Calender roll. 1,781,378; Nov. 11.
Fehr, John R., Dayton, Ohio, assignor, by mesne assignments, to Frigidaire Corporation. Refrigerating apparatus. 1,781,003; Nov. 11.
Fenk, George, Brooklyn, N. Y. Boiler-tap guide. 1,781,634; Nov. 11.
Ferguson, Berlin S., assignor, by mesne assignments, to The Marion Steam Shovel Company, (1927), Marion, Ohio. Crawling traction truck. 1,781,170; Nov. 11.
Ferngren, Enoch T., assignor to Libbey-Owens-Ford Glass Company, Toledo, Ohio. Method and apparatus for drawing sheet glass. 1,781,452; Nov. 11.
Ferris, Ervie A., Westwood, Calif. Device for controlling the travel of tong dogs for sawmill carriages. 1,781,220; Nov. 11.
Ferris, Ervie A., Westwood, Calif. Differential truck for sawmill carriages. 1,781,221; Nov. 11.
Fickinger, Emil H., et al. (See Allyn, Robert S., assignor.)
Filtrol Company of California. (See Baylis, Walter S., assignor.)
Firestone Tire & Rubber Company, The. (See Hulslander, Ray D., assignor.)
Fischacher, Henry L., Boston, Mass. Oven scoop. 1,781,635; Nov. 11.
Fischer, Albert. (See Wahl, H., and Fischer.)
Fischer, Arthur I., Cleveland Heights, assignor to The Republic Brass Company, Cleveland, Ohio. Pipe joint or connection. 1,781,222; Nov. 11.
Fischer, Max M., Brooklyn, N. Y. Automobile radiator screen. Des. 82,491; Nov. 11.
Fitzpatrick, Frank B., Holyoke, Mass., assignor to A. G. Spalding & Bros., New York, N. Y. Movable bleacher. 1,781,058; Nov. 11.
Flintkote Company. (See Harris, William A., assignor.)
Florida Copy-Writing Corporation, The. (See Barton, John H., assignor.)
Ford, George W., Brighton, assignor to H. G. Ponting, London, England. Camera and other optical projection device. 1,781,501; Nov. 11.
Ford, Henry, assignor to Ford Motor Company, Dearborn, Mich. Carburetor. 1,781,502; Nov. 11.
Ford, Henry, assignor to Ford Motor Company, Dearborn, Mich. Vehicle construction. 1,781,503; Nov. 11.
Ford Motor Company. (See Ford, Henry, assignor.)
Ford Motor Company. (See Galamb, Joseph, assignor.)
Ford, William C., Andover, Mass. Fountain pen. 1,781,504; Nov. 11.
Forstner Chain Corporation. (See Forstner, William, assignor.)
Forstner, William, assignor to Forstner Chain Corporation, Irvington, N. J. Flexible metallic strap. 1,781,379; Nov. 11.
Fosdick Machine Tool Company, The. (See De Roo, William C., assignor.)
Foshay, W. B., Co. (See Foshay, W. B., and Magney, assignors.)
Foshay, Wilbur B., and G. R. Magney, assignors to W. B. Foshay Co., Minneapolis, Minn. Building. Des. 82,492; Nov. 11.
Foxboro Company, The. (See Bristol, Edgar H., assignor.)
Foxboro Company, The. (See Reynolds, Irving W., assignor.)
Frame, Augustus J., assignor to Franklin Oil Heating, Inc., Columbus, Ohio. Automatic controlling mechanism. 1,781,453; Nov. 11.
Franklin Oil Heating, Inc. (See Frame, Augustus J., assignor.)
Franklin Railway Supply Company. (See Martin, Frederick W., assignor.)
Franklin Simon & Company. (See Long, Dorothy, assignor.)
Frederickson, Otto A., Ben Avon, Pa., assignor to National Electric Products Corporation, New York, N. Y. Protected armored cable or conduit. 1,781,574; Nov. 11.
Friedman, Isadore, Roxbury, Mass. Combined beacon and lantern. 1,781,326; Nov. 11.
Frigidaire Corporation. (See Fehr, John R., assignor.)
Furrer, Samuel S., Oxnard, Calif., assignor to Brenneis Manufacturing Company, Oxnard, Calif. Disk harrow. 1,781,171; Nov. 11.
G & W Electric Specialty Co. (See Williams, Paul F., assignor.)
Galamb, Joseph, Detroit, assignor to Ford Motor Company, Dearborn, Mich. Door latch. 1,781,505; Nov. 11.

Galloway Engineering Company Limited. (See Greening, H. B., and Galloway, assignors.)
Galloway, James W. (See Greening, H. B., and Galloway.)
Gammeter, Harry C., Cleveland Heights, Ohio. Sign construction. 1,781,277; Nov. 11.
Gandriaut, Lucien, Nancy, France. Weighing apparatus. 1,781,575; Nov. 11.
Garfield, Ellery I., Paris, France. Vehicle body. 1,781,380; Nov. 11.
Gary, Francis P., assignor to Chain Belt Company, Milwaukee, Wis. Endless sectional water screen. 1,781,223; Nov. 11.
Gau, Henry F., Cincinnati, Ohio. Dilator. 1,780,912; Nov. 11.
Gearheart, Edgar G. (See Rohaut, C. N., and Gearheart.)
General Aniline Works, Inc. (See Kränzlein, G., Roemer, and Kronholz, assignors.)
General Aniline Works, Inc. (See Mieg, Walter, assignor.)
General Aniline Works, Inc. (See Scheyer, Heinz, assignor.)
General Electric Company. (See Hall, Chester I., assignor.)
General Electric Company. (See Hewlett, E. M., and Willard, assignors.)
General Electric Company. (See Marcellus, Frederick S., assignor.)
General Electric Company. (See Petch, H. S., and Wellings, assignors.)
General Electric Company. (See Walle, Ludwig, assignor.)
General Motors Corporation. (See Brittain, Richard J., jr., assignor.)
General Motors Corporation. (See Hess, Herman O., assignor.)
General Motors Corporation. (See Liebermann, Paul B., assignor.)
Germond, Henry S., jr. (See DeLamar, Rudolph, assignor.)
Gibson, Wilfrid, and C. R. Henshaw, Blackley, Manchester, assignors to Imperial Chemical Industries Limited, Westminster, England. Purification of triaryl phosphates. 1,781,225; Nov. 11.
Giezentanner, Charles L., Montesano, Wash. Plant-treating apparatus. 1,781,004; Nov. 11.
Gilbert, A. C., Company, The. (See Gilbert, Alfred C., assignor.)
Gilbert, Alfred C., North Haven, assignor to The A. C. Gilbert Company, New Haven, Conn. Mixing apparatus. 1,781,381; Nov. 11.
Gill, E. R., Battery Co. (See Gill, Edwin R., assignor.)
Gill, Edwin R., Yonkers, assignor to E. R. Gill Battery Co., Inc., New York, N. Y. Electric-battery system. 1,781,005; Nov. 11.
Gill, Henry F., Pittsburgh, Pa. Valve. 1,781,224; Nov. 11.
Gillette Rubber Co. (See Hutchens, R. W., and Krause, assignors.)
Gillette Rubber Company. (See Krause, Arnold R., assignor.)
Gilligan, Edward J., Croton-on-Hudson, and A. H. McLean, Ossining, N. Y. Track sander. 1,781,637; Nov. 11.
Gilliland, Francis N. (See Oyster, E. F., and Gilliland.)
Gilpin, Garth G., Riverside, assignor to Union Metal Products Company, Chicago, Ill. Railway-car-hopper door. 1,781,454; Nov. 11.
Glanschnig, Ignatz, Gary, assignor of twenty-five per cent to J. D. Meyers, Hobart, Ind. Aeroplane. 1,781,455; Nov. 11.
Gleaner Combine Harvester Corporation, The. (See Pierson, Torvald N., assignor.)
Goddard, Paul L., Oak Park, assignor to Central Waxed Paper Company, Chicago, Ill. Ice-cream-container liner. 1,781,006; Nov. 11.
Godefroy, Alexandre F., Mexico, Mexico. Sport jumping apparatus. 1,781,506; Nov. 11.
Goellner, John A., assignor to Monarch Metal Weatherstrip Corporation, St. Louis, Mo. Weather strip. 1,781,382; Nov. 11.
Goertz, August, & Company. (See Goertz, Walter A., assignor.)
Goertz, Walter A., East Orange, N. J., assignor to August Goertz & Company, Inc. Vanity box. Des. 82,493; Nov. 11.
Gohy, Jean, Spa, assignor to Despa & Fils (Société en commandite par actions), Verviers, Belgium. Machine for the manufacture of card clothing. 1,781,383; Nov. 11.
Goinard, Joseph M. A., St.-Nazaire, France. Carburetor for internal-combustion engines supplied with heavy oil. 1,781,327; Nov. 11.
Gold, Egbert H., deceased, Evanston, T. H. Manchester, and E. A. Russell; said Manchester and said Russell assignors to Vapor Car Heating Company, Inc., Chicago, Ill.; M. J. Gold and Biscayne Trust Company, executors. Hose coupler. 1,781,543; Nov. 11.
Gold, Egbert H., deceased, Evanston, and E. A. Russell; said Russell assignor to Vapor Car Heating Company, Inc., Chicago, Ill.; M. J. Gold and Biscayne Trust Company, executors. Flexible pipe structure. 1,781,456; Nov. 11.
Gold, Egbert H., deceased, Evanston, and E. A. Russell; said Russell assignor to Vapor Car Heating Company, Inc., Chicago, Ill.; M. J. Gold and Biscayne Trust Company, executors. Flexible pipe structure. 1,781,457; Nov. 11.
Gold, Margaret J., et al., executors. (See Gold, E. H., Manchester, and Russell.)
Gold, Margaret J., et al., executors. (See Gold, E. H., and Russell.)
Golden, Robert F., South Orange, assignor to National Lock Washer Company, Newark, N. J. Curtain for railroad-car windows. 1,780,913; Nov. 11.
Gollnick, Paul A., J. J. Toolan, and G. Harred, assignors, by mesne assignments, to Selectograph Company, Chicago, Ill. Delivery mechanism for addressing machines. 1,781,007; Nov. 11.
Goodfriend, Henry, assignor to Mutual Metal Manufacturing Company, Chicago, Ill. Lighting-fixture canopy or the like. Des. 82,494; Nov. 11.
Goodfriend, Henry, assignor to Mutual Metal Manufacturing Company, Chicago, Ill. Lighting-fixture globe holder or the like. Des. 82,495; Nov. 11.
Goodrich, Cephus G., Wakefield, Va. Fertilizer distributor. 1,781,278; Nov. 11.
Goodyear Tire & Rubber Company, The. (See Berwick, Jo D., assignor.)
Goodyear Tire & Rubber Company, The. (See Burkley, C. J., and Kimmich, assignors.)
Goodyear Tire & Rubber Company, The. (See Darrow, Burgess, assignor.)
Goodyear Tire & Rubber Company, The. (See Jenkinson, Ross E., assignor.)
Goodyear Tire & Rubber Company, The. (See Keller, Parry, assignor.)
Goodyear Tire & Rubber Company, The. (See Kraft, Herman T., assignor.)
Goodyear Tire & Rubber Company, The. (See Sebrell, Lorin B., assignor.)
Goodyear Tire & Rubber Company, The. (See Teegarden, Homer R., assignor.)
Goodyear Tire & Rubber Company, The. (See Teppema, Jan, assignor.)
Gore, Thomas, Brooklyn, N. Y. Securing together two intersecting strands. 1,781,458; Nov. 11.
Gorsuch, Robert A., Gambier, Ohio. Shipping box for chicks. 1,781,279; Nov. 11.
Goudard, Maurice, assignor to Société Anonyme Solex, Neuilly, France. Carburetor. 1,781,576; Nov. 11.
Gould & Eberhardt. (See Jacobson, Hugo W., assignor.)
Gould & Eberhardt. (See Zimmermann, William F., assignor.)
Grace, John F., Arlington, N. J., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Condenser. 1,781,107; Nov. 11.
Grace, John F., Arlington, N. J., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Exhaust connection for condensers. 1,781,108; Nov. 11.
Graf, Edward F., assignor to Winters & Crampton Mfg. Co., Grand Rapids, Mich. Latch. 1,781,172; Nov. 11.
Graham, Herbert J., assignor to Electric Service Supplies Company, Philadelphia, Pa. Lighting unit. 1,781,544; Nov. 11.
Graham, Oakley J. (See Graham, Ota T. and O. J.)
Graham, Ota T. and O. J., Richmond, Va. Truck for transporting cementitious materials. 1,780,973; Nov. 11.
Grand Rapids Store Equipment Corporation. (See Morris, E., and Vanderveld, assignors.)
Gravell, James H., Elkins Park, Pa., assignor to American Chemical Paint Company, Ambler, Pa. Preparing metal for painting. 1,781,507; Nov. 11.
Grayson, John H., Lynwood Calif. Thermostat-valve structure. 1,781,328; Nov. 11.
Great Western Meter Company. (See Lyman, Ray J., assignor.)
Green, Estill I. (See Affel, H. A., and Green.)
Green, John L., El Dorado, Ark. Fluid air cleaner. 1,781,638; Nov. 11.
Green, Lee B., Lakewood, assignor to The Borden Company, Warren, Ohio. Friction clutch. 1,781,173; Nov. 11.
Greenbaum, Harry, Kansas City, Mo. Outer dress garment for ladies' wear. Des. 82,496; Nov. 11.
Greenfield, Benjamin, assignor to Doherty Research Company, New York, N. Y. Fluid-fuel-fired boiler. 1,781,174; Nov. 11.
Greening, Herald B., Hamilton, Ontario, Canada, and J. W. Galloway, Detroit, Mich., assignors to Galloway Engineering Company Limited, Hamilton, Ontario, Canada. Internal-combustion engine. 1,781,008; Nov. 11.
Greening, Herald B., Hamilton, Ontario, Canada, and J. W. Galloway, Detroit, Mich., assignors to Galloway Engineering Company Limited, Hamilton, Ontario, Canada. Two-cycle internal-combustion engine. 1,781,009; Nov. 11.
Griesbaber, Hugo E., New London, Conn., assignor to Electric Boat Company, Groton, Conn. Twin gun mount for submarines. 1,781,175; Nov. 11.
Griffin, James H., St. Helens, assignor to Pilkington Brothers Limited, Liverpool, England. Process of and apparatus for washing off the felts of polisher runners in glass-polishing apparatus. 1,781,226; Nov. 11.
Grissinger, David A. (See Neidhammer, Clyde, assignor.)
Groenenstein, Philip, Cleveland, Ohio. Glare shield. 1,781,545; Nov. 11.

Gross, Jacob G., San Gabriel, Calif. Bevel-cut patch for tubes and other rubber goods. Re17,860; Nov. 11.
Gross, Joseph, and I. Hellman, Bronx, N. Y. Dental handpiece. 1,781,508; Nov. 11.
Grout, Martin B., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Socket. 1,781,384; Nov. 11.
Grubb, Adin A. (See Marshall, Leslie H., assignor.)
Grube, John H., Pasadena, Calif., assignor to Grube Silent Motors Incorporated, Phoenix, Ariz. Engine valve. 1,781,176; Nov. 11.
Grube Silent Motors Incorporated. (See Grube, John H., assignor.)
Guiberson Corporation, The. (See Bell, Ivan C., assignor.)
Gullberg, Roy K., assignor to Dayton Scale Company, Dayton, Ohio. Meat chopper. 1,780,914; Nov. 11.
Gurney, Albert J., assignor to The American Mine Door Company, Canton, Ohio. Rock duster. 1,781,509; Nov. 11.
Haas, Carl F., South Bend, Ind., assignor to Westinghouse Electric and Manufacturing Company. Globe for a lighting fixture. Des. 82,497; Nov. 11.
Haas, Carl F., South Bend, Ind., assignor to Westinghouse Electric and Manufacturing Company. Finial for lighting fixtures or similar articles. Des. 82,498; Nov. 11.
Haase, Leo G., and F. M. Brooks, assignors to Art Concrete Works, Pasadena, Calif. Water-meter box. 1,781,280; Nov. 11.
Hackenberg, Nafanaiel. (See Hackenberg, Stanislav, assignor.)
Hackenberg, Stanislav, assignor of one-half to N. Hackenberg, San Francisco, Calif. Turbine. 1,781,059; Nov. 11.
Hadley, Donald L., Mansfield, Ohio, assignor to The Bryant Electric Company, Bridgeport, Conn. Electrical connector or similar article. Des. 82,499; Nov. 11.
Hague, Alfred E., West Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telephone-exchange system. 1,781,385; Nov. 11.
Hall-Brown, Archibald, Purley, and E. W. Jones, Lincoln, England, assignors to The Babcock & Wilcox Company, Bayonne, N. J. Airship-mooring-mast gear. 1,781,010; Nov. 11.
Hall, Carter F., Baltimore, Md. Cooling system for passenger vehicles. 1,781,151; Nov. 11.
Hall, Chester I., Fort Wayne, Ind., assignor to General Electric Company. Synchronous motor-driven phonograph. 1,781,577; Nov. 11.
Hall, Jay B., Eugene, Oreg. Snowplow. 1,781,578; Nov. 11.
Hall, W. F., Printing Company. (See Harrison, William H., jr., assignor.)
Halvorsen, Severin, Chicago, Ill., assignor to The Newspaper Stuffing Machine Company, Seattle, Wash. Pneumatic feed mechanism. Des. 17,861; Nov. 11.
Hamill, Robert E. (See Sherts, J. H., and Hamill.)
Handley, George F., Glendale, assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 1,781,579; Nov. 11.
Hannum, Freda L., Seattle, Washington. Curtain drier and stretcher. 1,781,177; Nov. 11.
Harber, Laurence S., assignor, by mesne assignments, to Baker Perkins Company, Inc., Saginaw, Mich. Dough-molding machine. 1,781,546; Nov. 11.
Harders, Conrad F. (See Link, R. A., and Harders.)
Hardinge Company. (See Hardinge, Harlowe, assignor.)
Hardinge, Harlowe, assignor to Hardinge Company, Incorporated, York, Pa. Apparatus for disintegrating ore and other material. 1,780,915; Nov. 11.
Harner, John Z., and H. S. Schweinhart, assignors to The Union Manufacturing Company, Boyertown, Pa. Top burner for gas stoves. 1,781,386; Nov. 11.
Harred, George. (See Gollnick, P. A., Toolan, and Harred.)
Harris, Mark, New Rochelle, N. Y. Game table. Des. 82,533; Nov. 11.
Harris, William A., Newton, assignor to Flintkote Company, Boston, Mass. Roofing shingle. Re17,862; Nov. 11.
Harrison, Henry C., Port Washington, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Diaphragm. 1,781,387; Nov. 11.
Harrison, William H., jr., assignor to W. F. Hall Printing Company, Chicago, Ill. Tipping machine. 1,780,916; Nov. 11.
Hartford-Empire Company. (See Peiler, Karl E., assignor.)
Hatch, Alexander G., Farmington, assignor to The Sesamee Company, Hartford, Conn. Permutation lock. 1,781,510; Nov. 11.
Havana Metal Wheel Co. (See Chandler, Carl B., assignor.)
Haviland & Co. (Societe Anonyme). (See Zenker, Paul, assignor.)
Hawkins, Raymond L., assignor to Long Manufacturing Company, Detroit, Mich. Radiator. 1,781,511; Nov. 11.
Heckel, Charles E. (See Schroeter, George A., assignor.)
Heitmuller, Henry, Cullman, Ala. Harrow. 1,781,459; Nov. 11.
Hellot, Maurice, Troyes, France. Tailoring. 1,781,580; Nov. 11.
Hellman, Isaac. (See Gross, J., and Hellman.)
Hellyer, Reginald H., London, England. Pipe joint. 1,781,581; Nov. 11.
Helm, Clyde D., Fort Work, Tex. Pressure-relief device. 1,781,227; Nov. 11.
Henderson, Herbert V., assignor to Chrysler Corporation, Detroit, Mich. Automobile filler cap or similar article. Des. 82,500; Nov. 11.
Henderson, Herbert V., assignor to Chrysler Corporation, Detroit, Mich. Instrument panel. Des. 82,501; Nov. 11.
Henshaw, Charles R. (See Gibson, W., and Henshaw.)
Hercules Powder Company. (See Symmes, Ernest M., assignor.)
Heritage, Clark C., Buffalo, assignor to National Aniline & Chemical Co., Inc., New York, N. Y. Filter discharger. 1,781,389; Nov. 11.
Herrick, Thomas E., jr., Philadelphia, Pa. Cylinder structure. 1,781,582; Nov. 11.
Herschmann, Arthur J., New York, N. Y. Match-holding paper weight. Des. 82,502; Nov. 11.
Hersey, Ralph E. (See Carpenter, W. W., and Hersey.)
Herthel, Eugene C., Chicago, Ill., assignor to Sinclair Refining Company, New York, N. Y. Refining hydrocarbons. 1,781,388; Nov. 11.
Herthel, Eugene C., Chicago, Ill., and E. W. Isom, Locust Valley, N. Y., assignors to Sinclair Refining Company, Chicago, Ill. Cracking of oils. 1,781,390; Nov. 11.
Herzberg, Anton A., Waukesha, and H. O. Schultz, Milwaukee, Wis., assignors to The National Automatic Tool Company, Richmond, Ind. Slip-spindle device. 1,781,109; Nov. 11.
Herzberg, Harry, Brooklyn, N. Y. Dusting mop. 1,781,460; Nov. 11.
Hess, Herman O., Saginaw, Mich. Lathe for turning crank shafts. 1,781,229; Nov. 11.
Hess, Herman O., Saginaw, assignor to General Motors Corporation, Detroit, Mich. Lathe for turning crank shafts. 1,781,228; Nov. 11.
Hewlett, Edward M., and W. W. Willard, Schenectady, N. Y., assignors to General Electric Company. Electric switch. 1,781,178; Nov. 11.
Hill, Henry, Paignton, England. Apparatus for playing golf in restricted spaces or indoors. 1,781,230; Nov. 11.
Hill, Louis A., Washington, D. C. Collar fastener. 1,781,639; Nov. 11.
Hill, William R., and W. F. Diesel, assignors to Sargent & Greenleaf, Inc., Rochester, N. Y. Safety receptacle for small articles. 1,781,060; Nov. 11.
Hillebrand, Paul, assignor to firm Werdohler, Pumpenfabrik Paul Hillebrand G. m. b. H., Werdohl, Germany. Artificial-silk-spinning machine. 1,781,231; Nov. 11.
Hinchcliffe, John R. (See Curioni, Aldo, assignor.)
Hinnekens, Florent, assignor to Van Vlaanderen Machine Company, Paterson, N. J. Method and apparatus for treating fabrics with liquids. 1,781,391; Nov. 11.
Hobbs Manufacturing Company. (See Klaucke, George W., assignor.)
Hoch, Ellery T., Bloomfield, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Electric condenser. 1,781,917; Nov. 11.
Hodges, Fred M., et al. (See McFarland, Ernest H., assignor.)
Hodges, James A., et al. (See McFarland, Ernest H., assignor.)
Hodges, John M., et al. (See McFarland, Ernest H., assignor.)
Hodgson, William W., Chicago, Ill., assignor to Continental Can Company, Inc., New York, N. Y. Handle grip for pails. 1,781,583; Nov. 11.
Hoe, R., & Co. (See Knox, Harry G., assignor.)
Hoegger, Joseph A., Jersey City, N. J. Adjustable-tension paper holder. 1,781,547; Nov. 11.
Hoffer, Le Roy H., assignor to Metropolitan Engineering Company, Brooklyn, N. Y. Welding clamping device. 1,781,548; Nov. 11.
Hogrebe, Arthur E., assignor to Box Crane & Hoist Corporation, Philadelphia, Pa. Crane trolley. 1,781,281; Nov. 11.
Hoke, William E., Baltimore, Md., assignor to Dardelet Threadlock Corporation, New York, N. Y. Valve mechanism. 1,781,011; Nov. 11.
Holland, Charlotte M., administratrix. (See Holland, Newman H.)
Holland, Newman H., deceased, by C. M. Holland, administratrix, Upper Montclair, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Recording telephone conversations. 1,780,919; Nov. 11.
Holland, Walter E., assignor to Philadelphia Storage Battery Company, Philadelphia, Pa. Electric battery. 1,781,641; Nov. 11.
Holland, Walter E., Philadelphia, and L. J. Pearson, Wyncote, Pa., assignors to Philadelphia Storage Battery Company, Philadelphia, Pa. Electrolyte cell. 1,781,641; Nov. 11.
Holt, Carl E., Kansas City, Mo. Lubrication guide. 1,781,512; Nov. 11.
Holweck, Fernand, assignor to Etablissements Edouard Belin, Paris, France. Electrical tuning fork. 1,781,513; Nov. 11.
Holzman, Herman, Newark, N. J. Musical-instruction device. 1,780,918; Nov. 11.
Honeycutt, Paul, Mooresville, N. C. Safety attachment for cottonseed linters. 1,781,061; Nov. 11.
Honigbaum, Harry H., New York, N. Y. Match. 1,780,920; Nov. 11.

Hopewell, Frank B., as trustee. (See Peabody, J. C., and Brown, assignors.)

Horton, Alien A., Plymouth, Mich., assignor to Burroughs Adding Machine Company, Detroit, Mich. Transfer mechanism for calculating machines. 1,781,179; Nov. 11.

Horton, Joseph W., Cambridge, Mass., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Communication system. 1,780,921; Nov. 11.

Horwitt, Paul H., Hartsdale, N. Y. Automobile. Des. 82,503; Nov. 11.

Horwitt, Paul H., Hartsdale, N. Y. Automobile. Des. 82,504; Nov. 11.

Hostutler, Verne, Hollis, Okla. Side bumper for automobiles. 1,780,974; Nov. 11.

Houde Engineering Corporation. (See Peo, Ralph F., assignor.)

Houston, John D., Prineville, Oreg. Thermal plant. 1,781,062; Nov. 11.

Howe, Frank D., Cuyahoga Falls, Ohio. Axle construction. 1,780,922; Nov. 11.

Howe, Harrison M., Bradford, Pa. Pinch bar. 1,781,329; Nov. 11.

Huber, Frederick W., Riverside, Calif. Making Portland cement. 1,781,232; Nov. 11.

Huenemann, Victor C., Garner, Iowa. Adjustable disappearing-lug traction wheel. 1,781,461; Nov. 11.

Hug, Christian J., Highland, Ill. Wheel. 1,780,923; Nov. 11.

Hulett, Ralph M., Cleveland, Ohio. Mail chute. 1,781,282; Nov. 11.

Hulslander, Ray D., assignor to The Firestone Tire & Rubber Company, Akron, Ohio. Apparatus for removing articles from molds. 1,781,665; Nov. 11.

Hultgren, Axel G. E., Soderfors, Sweden. Mold for casting ingots of steel or other metals. 1,781,392; Nov. 11.

Humphrey, Alfred H., Salem, N. Y. License-plate holder. 1,781,642; Nov. 11.

Hunt, Leigh. (See Sturgis, Herbert M., assignor.)

Hunt, Sydney, Birmingham, England, assignor to John Walker & Sons Limited, London, England. Manufacture of blown-glass articles. 1,781,233; Nov. 11.

Hupp Motor Car Company. (See MacPherson, Earle S., assignor.)

Hupp Motor Car Corporation. (See MacPherson, Earle S., assignor.)

Hurlbert, William G., jr., and E. E. Marshman, Warren, Ohio. Expanded-metal lath. 1,781,012; Nov. 11.

Hutchens, Ralph W., and A. R. Krause, assignors to Gillette Rubber Co., Eau Claire, Wis. Upright inner tube mold. 1,781,393; Nov. 11.

Hutchins Car Roofing Company. (See Thompson, William D., assignor.)

Hygienol Co. Inc., The. (See Raynor, Louis L., assignor.)

Hyman, Daniel N., Detroit, Mich., assignor to Hyman Register Corporation, Buffalo, N. Y. Fare register. 1,781,462; Nov. 11.

Hyman Register Corporation. (See Hyman, Daniel N., assignor.)

I. G. Farbenindustrie Aktiengesellschaft. (See Jordan, Otto, assignor.)

I. G. Farbenindustrie Aktiengesellschaft. (See Lützow, Artur, assignor.)

I. G. Farbenindustrie Aktiengesellschaft. (See Schmidt, Albrecht, assignor.)

I. G. Farbenindustrie Aktiengesellschaft. (See Wahl, H., and Fischer, assignor.)

Ideal Lubricator Company. (See Culp, John F., assignor.)

Imperial Chemical Industries Limited. (See Gibson, W., and Henshaw, assignors.)

Independent Oil Well Cementing Co. (See Trouth, John E., assignor.)

Independent Pneumatic Tool Company. (See Norling, Reinhold A., assignor.)

Ingersoll-Rand Company. (See Lear, Earl B., assignor.)

Ingersoll-Rand Company. (See Redfield, Snowden B., assignor.)

Ingraham, Harry A., Zillah, Wash. Fruit-cleaning machine. 1,780,924; Nov. 11.

Intemann, William, Brooklyn, assignor to American Lithographic Company, Inc., New York, N. Y. Advertising sign. 1,781,283; Nov. 11.

International Combustion Engineering Corporation. (See Clendon, George W., assignor.)

International Combustion Engineering Corporation. (See Coerper, Hans, assignor.)

International Combustion Engineering Corporation. (See Rydmark, Josef, assignor.)

International Combustion Engineering Corporation. (See Wood, Wilfred R., assignor.)

Inventia Patent-Verwertungs-Gesellschaft. (See Engberg, A. O., and Eriksson-Jons, assignors.)

Iorio, Candido and F., Jamaica, N. Y. Accordion. 1,781,394; Nov. 11.

Iorio, Frank. (See Iorio, Candido and F.)

Irwin, George T., Toronto, Ontario, Canada. Locking device. 1,781,643; Nov. 11.

Isom, Edward W. (See Herthel, E. C., and Isom.)

Israelson, Fritz, Stockholm, Sweden. Straight-frame knitting machine. 1,780,975; Nov. 11.

Jacklin, Harold M., and C. P. Roberts; said Roberts assignor to said Jacklin, Columbus, Ohio. Method and apparatus for obtaining indicator diagrams. 1,781,013; Nov. 11.

Jacobson, Conrad C. (See Dollin, E. N., and Jacobson.)

Jacobson, Hugo W., Arlington, assignor to Gould & Eberhardt, Newark, N. J. Lubrication system for shaping machines. 1,781,110; Nov. 11.

Jarecki, Frank J., Grand Rapids, Mich. Sheet-metal folder. 1,781,180; Nov. 11.

Jeffrey, Harold M., Methuen, assignor to Patent Protection Corporation, Lowell, Mass. Transfer mechanism for looms. 1,781,514; Nov. 11.

Jenkinson, Ross E., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Pneumatic tire. 1,781,657; Nov. 11.

Jessen, Hans P., Omaha, Nebr. Adjustable shore. 1,781,003; Nov. 11.

Johns, George H., assignor of one-half to S. Mustakos, New Haven, Conn. Game or toy. 1,781,463; Nov. 11.

Johnson, Fritz, Racine, Wis., assignor, by mesne assignments, to Stephenson Underwear Mills, South Bend, Ind. Printing machine. 1,781,395; Nov. 11.

Johnson, Halligan, San Diego, Calif. Amusement ride apparatus. 1,781,464; Nov. 11.

Johnson, Kenneth S., Jersey City, N. J., assignor, by mesne assignments, to Western Electric Company, Incorporated. Electrical network. 1,781,396; Nov. 11.

Johnson, Oliver, Hollywood, Calif., and R. G. Sanders, Spokane, Wash. Control mechanism for concrete-mixing apparatus. 1,781,549; Nov. 11.

Johnson, Peter B., Fremont, Nebr. Stacker. 1,780,925; Nov. 11.

Johnson, Roy W., Columbus, Ohio, assignor to The Checker Cab Manufacturing Company, Kalamazoo, Mich. Motor vehicle head-lamp. Des. 82,535; Nov. 11.

Jonas, Julius, assignor to Aktiengesellschaft Brown, Boveri and Cie., Baden, Switzerland. Ignition device for mercury-arc rectifiers. 1,781,330; Nov. 11.

Jones, Charles E., Griffin, Ga. Construction unit. 1,781,234; Nov. 11.

Jones, Edwin W. (See Hall-Brown, A., and Jones.)

Jones, Homer W., Newark, N. J., assignor to National Carbon Company, Inc. Adjustable lamp socket. 1,781,064; Nov. 11.

Jonsson, Anders J., Linköping, Sweden. Machine for making caps. 1,780,926; Nov. 11.

Jordan, Otto, Ludwigshafen-on-the-Rhine, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Liquid of low-freezing point for cooling and for sealing vessels and the like. 1,780,927; Nov. 11.

Kahn, Isaac T., Cleveland, Ohio. Building construction. 1,780,928; Nov. 11.

Kahn, Isaac T., assignor to The Consolidated Iron-Steel Manufacturing Company, Cleveland, Ohio. Faucet-supporting plug. 1,780,929; Nov. 11.

Kalbfleisch Corporation, The. (See Larson, Leon H., assignor.)

Kari, Heinrich, Jersey City, N. J. Automatically signaling and controlling trains according to the position of track switches. 1,781,284; Nov. 11.

Karmazin, John, Detroit, Mich. Brine-tank evaporation unit. 1,780,930; Nov. 11.

Kaufmann, Wilhelm. (See Liechty, Hermann, assignor.)

Keevers, Matthew J., Northampton, Mass. Buckle support. 1,781,014; Nov. 11.

Kelpp, Anton, Mansfield, Ohio. Revolving table. 1,781,015; Nov. 11.

Keller, Parry, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Mold. 1,781,658; Nov. 11.

Keller, Wm. H., Inc. (See Shaff, Ernest H., assignor.)

Kellogg Switchboard and Supply Company. (See Grout, Martin B., assignor.)

Kelly, Loomis L., Salem, Va. Material-handling apparatus. 1,781,644; Nov. 11.

Kelvinator Corporation. (See Replogle, John R., assignor.)

Keplinger, Charles W., receiver. (See Lewis, Joseph C., assignor.)

Kesner, Herman. (See Kushlin, W., Kesner, and Oltsik.)

Kessel, Johannes B., Chicago, Ill. Mixing device for carburetors. Re17,869; Nov. 11.

Keyser, Johann J., Aarau, Switzerland. Spinning and twisting machine. 1,781,584; Nov. 11.

Keystone Refrigerating Corporation. (See Nielsen, Holger, assignor.)

Kidde, Walter & Company. (See Mapes, Daniel, assignor.)

Kiefer, William F., Evansville, Ind., assignor of one-half to M. L. Reichert, Vanderburgh county, Ind. Illuminated number sign. 1,781,585; Nov. 11.

Kielberg, Henry, Martins Ferry, Ohio, assignor to Wheeling Steel Corporation, Wheeling, W. Va. Roofing roll. 1,781,016; Nov. 11.

Kimmich, Elmer G. (See Burkley, C. J., and Kimmich.)

King, C. G., & Co. (See Recchia, Orlando R., assignor.)

King, C. G., & Co. (See Smith, Walter E., assignor.)

King, Douglas H., Irvington, and H. T. Martin, Ridgewood, N. J., assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y. Wall mounting for a hand telephone. Des. 82,505; Nov. 11.

King, Thomas J., jr., Chicago, Ill. Wire-tying machine. 1,781,181; Nov. 11.

Kirschbraun, Lester, Leonia, N. J. Making emulsified compositions. 1,781,645; Nov. 11.

Kiwad, Michael, New York, N. Y., assignor to La Belle Specialty Co. Inc. Lamp or article of analogous nature. Des. 82,506; Nov. 11.

Klaucke, George W., assignor to Hobbs Manufacturing Company, Worcester, Mass. Corn-cutting machine. 1,781,111; Nov. 11.

Klemgard, Edwin N. (See Doell, T. W., and Klemgard.)

Klocke, William, Woodhaven, assignor to E. W. Bliss Company, Brooklyn, N. Y. Power press. 1,781,397; Nov. 11.

Knox, Harry G., assignor to R. Hoe & Co., Inc., New York, N. Y. Printing machine. 1,781,017; Nov. 11.

Kobel, Ernest. (See Kubler, J., and Kobel.)

Koch, Theodoor, Arnhem, Netherlands. Preparing artificial textile products with reduced luster from viscose. 1,781,018; Nov. 11.

Koehring Company. (See Lichtenberg, Erich H., assignor.)

Koehring Company. (See Plispanen, Väinö, assignor.)

Koepsell, August J., Mayville, Wis. Grate. 1,781,331; Nov. 11.

Königsberger. Walter, Berlin, Germany. Garter. 1,780,931; Nov. 11.

Koppers Company, The. (See Puening, Franz, assignor.)

Kraft, Herman T., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Tread applier. 1,781,285; Nov. 11.

Kränzlein, Georg, and F. Roemer, Frankfort-on-the-Main-Hochst, and E. Kronholz, Bad Soden-on-the-Taunus, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Acid wood dyestuff of the anthraquinone series. 1,780,976; Nov. 11.

Krause, Arnold R. (See Hutchens, R. W., and Krause.)

Krause, Arnold R., Eau Claire, Wis., assignor to Gillette Rubber Company. Bicycle-tire trimmer. 1,781,398; Nov. 11.

Kreger, Norman V., Ben Avon, Pa. Rear-curtain-operating device. 1,781,646; Nov. 11.

Kreps, Elmer H. (See Allen, G. N., and Kreps.)

Kronholz, Erich. (See Kränzlein, G., Roemer, and Kronholz.)

Kubler, Johannes, Baden, and E. Kobel, Ennetbaden, Switzerland. Mercury-vapor rectifier. 1,781,286; Nov. 11.

Kurth, Matthew G., assignor to Master Machinery and Implement Company, Madison, Wis. Hay loader. 1,781,332; Nov. 11.

Kushlin, William, H. Kesner, Brooklyn, and I. Oltsik, New York, N. Y. Pillow. Des. 82,507; Nov. 11.

Kwartin, Bernard, Philadelphia, Pa. Method of and apparatus for recording and reproducing sounds. 1,781,550; Nov. 11.

La Belle Specialty Co. (See Kiwad, Michael, assignor.)

La Brie, Ludger E., South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill. Braking system. 1,781,112; Nov. 11.

Laing, Edward M., Highland Park, Ill. Golf-ball washer. 1,781,113; Nov. 11.

Lamson Company, The. (See Cowley, J. T., and Taylor, assignors.)

Land, Charles H., Detroit, Mich. Tractor trailer. 1,781,399; Nov. 11.

Lane, Alfred M., St. Louis, Mo. Metal weather strip. 1,781,400; Nov. 11.

Lane, Alfred M., St. Louis, Mo. Screened window. 1,781,401; Nov. 11.

La Pointe, Francis J., Ann Arbor, Mich. Hydraulic broaching machine. 1,781,114; Nov. 11.

Lapsley, Robert. (See Blood, H. E., and Lapsley.)

Larson, Leon H., Kalamazoo, Mich., assignor to The Kalbfleisch Corporation, New York, N. Y. Cold-water paint and making same. 1,781,019; Nov. 11.

Larsson, Carl H., Chicago, Ill. Valve tone throat. 1,781,402; Nov. 11.

Laudicina, Giuseppe, East New Haven, Conn. Cast-stone trim block. 1,781,586; Nov. 11.

Leader Iron Works, Inc. (See Summers, Louis D., assignor.)

Leahy, Maurice R., Kansas City, Mo., and M. J. Phelan, Kansas City, Kans. Street sign. 1,781,020; Nov. 11.

Lear, Earl B., Phillipsburg, assignor to Ingersoll-Rand Company, Jersey City, N. J. Valve for rock drills. 1,781,021; Nov. 11.

Lederer, Sigmund L., Providence, R. I., assignor to Providence Stock Company. Bracelet chain. Des 82,508; Nov. 11.

Lehmann, Ernst P., and K. Ruppin, Bradenburg-on-the-Havel, Germany, assignors to said Lehmann. Toy. 1,781,333; Nov. 11.

Leopold, Joseph, New York, N. Y. Safety aeroplane. 1,781,182; Nov. 11.

Leslie, Eugene H., and E. M. Baker, Ann Arbor, Mich. Process of and apparatus for steam distillation. 1,780,977; Nov. 11.

Levy, Abraham, Brooklyn, N. Y. Clock case or similar article. Des. 82,509; Nov. 11.

Levy, Edward J. (now by judicial change of name Edward L. Mayo), assignor to The Bishop & Babcock Manufacturing Company, Cleveland, Ohio. Thermostat. 1,781,287; Nov. 11.

Levy, Edward J. (now by judicial change of name Edward L. Mayo), assignor to the Bishop & Babcock Manufacturing Company, Cleveland, Ohio. Thermostatic switch. 1,781,288; Nov. 11.

Levy, Edward J. (now by judicial change of name Edward L. Mayo), assignor to the Bishop & Babcock Manufacturing Company, Cleveland, Ohio. Thermostatically-operated electrical switch. 1,781,289; Nov. 11.

Levy, Harold, New York, N. Y. Note holder and dispenser. 1,781,022; Oct. 11.

Levy, Harold, Chicago, Ill. Note holding and dispensing device. 1,781,023; Nov. 11.

Lewis, Carroll E., St. Paul, assignor to The Lewis Corporation, Inc., Minneapolis, Minn. Humidifier and heater. 1,781,515; Nov. 11.

Lewis, Chester L., and H. O. Setterberg, Portland, Oreg. Sealing piston ring. 1,781,183; Nov. 11.

Lewis Corporation, The. (See Lewis, Carroll E., assignor.)

Lewis, Herman P., Tarentum, and E. S. Peters, New Sheffield, Pa. Rotary pump. 1,781,065; Nov. 11.

Lewis, Joseph C., Minerva, assignor to C. W. Keplinger, Canton, receiver of the American Electric Switch Corporation, Minerva, Ohio. Latch for service boxes. 1,781,115; Nov. 11.

Libbey-Owens-Ford Glass Company. (See Ferngren, Enoch T., assignor.)

Lichtenberg, Erich H., assignor to Koehring Company, Milwaukee, Wis. Control mechanism for concrete mixers. 1,780,932. Nov. 11.

Lidiak, Joseph P., Lansdowne, Pa., assignor to Westinghouse Electric & Manufacturing Company. Condenser. 1,781,024; Nov. 11.

Liebermann, Paul B., New York, N. Y., assignor to General Motors Corporation, Detroit, Mich. Journal box. 1,781,235; Nov. 11.

Liechty, Hermann, assignor to W. Kaufmann, Bern, Switzerland. Track vehicle. 1,781,334; Nov. 11.

Lilge, Friedrich, Oberhausen, Germany. Whirl burner. 1,781,236; Nov. 11.

Lindenberg, Theodore, Columbus, Ohio. Sound amplifier. 1,781,465; Nov. 11.

Line-O-Graph Company. (See Page, Marshall H., assignor.)

Link, Richard A., and C. F. Harders, assignors to L. A. Young Company, Detroit, Mich. Shaft for golf clubs and the like. 1,781,116; Nov. 11.

Lionel Corporation, The. (See Caruso, Louis, assignor.)

Lockwood's Clean Coal Process Limited. (See Berrisford, William H., assignor.)

Long, Dorothy, assignor to Franklin Simon & Company, Inc., New York, N. Y. Ensemble dress. Des. 82,510; Nov. 11.

Long Manufacturing Company. (See Hawkins, Raymond L., assignor.)

Los Angeles Wall Bed Company. (See Cocks, Edgar, assignor.)

Loughlin, William D. (See Snow, H. A., and Loughlin.)

Lowenthal, Arthur M., Rochester, N. Y., assignor to Max Lowenthal & Sons. Knitted sweater. 1,781,647; Nov. 11.

Lowenthal, Max, & Sons. (See Lowenthal, Arthur M., assignor.)

Lucier, Theophelles D. (See Broderick, E. N., and Lucier.)

Luth & Rösene Elektriska Aktiebolag. (See Uggla, Wilhelm R., assignor.)

Lützow, Artur, Cologne-Mulheim, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Securing of welds on bended bodies. 1,780,978; Nov. 11.

Lyman, Ray J., Berkeley, assignor to Great Western Meter Company, Oakland, Calif. Fluid meter. 1,781,466; Nov. 11.

Lyons, Charles T., Medina, Wash., assignor to Durable Mat Company, Seattle, Wash. Ship's fender. 1,781,403; Nov. 11.

Lyons, John E., Texhoma, Okla. Pipe grab. 1,781,335; Nov. 11.

Mack, Sebastian, Minneapolis, Minn. Signal for automobiles. 1,781,184; Nov. 11.

Mackie, James E., and A. J. Smith, Long Beach, Calif. Floor sleeper. 1,781,117; Nov. 11.

MacMichael, Hugh R., El Paso, Tex., assignor to American Smelting and Refining Company, New York, N. Y. Operating mechanism for Scotch hearths. 1,781,025; Nov. 11.

MacPherson, Earle S., assignor to Hupp Motor Car Corporation. Detroit, Mich. Crank-case ventilator. 1,781,405; Nov. 11.

MacPherson, Earle S., assignor to Hupp Motor Car Company, Detroit, Mich. Axle mounting. 1,781,406; Nov. 11.

Madsen, Sern, assignor to Curtis Companies, Incorporated, Clinton, Iowa. Bearing mounting. 1,781,467; Nov. 11.

Madsen, Sern, assignor to Curtis Companies, Incorporated, Clinton, Iowa. Sash lock for casement sash. 1,781,468; Nov. 11.

Magney, Gottlieb R. (See Foshay, W. B., and Magney.)

Malkin, John E., New York, N. Y. Sparkler toy. 1,781,516; Nov. 11.

Malt-O-Matic Corporation. (See Scholl, Willard J., assignor.)

Manchester, Thomas H. (See Gold, E. H., Manchester, and Russell.)

Mandelbaum, Maurice H. (See Brown, Herbert E., assignor.)

Mangel, Wallie C., Fairfax, Minn. Check hinge. 1,781,185; Nov. 11.

Mangham, Leonard, assignor to Mangham's Automatic Needle Changer Limited, Wellington, New Zealand. Changing the needles of gramophones and like machines. 1,781,587; Nov. 11.

Mangham's Automatic Needle Changer Limited. (See Mangham, Leonard, assignor.)

Manning & Co. (See Van Ranst, Cornelius W., assignor.)

Mapes, Daniel, Mamaroneck, assignor to Walter Kidde & Company, Inc., New York, N. Y. Fire-extinguishing system. 1,781,026; Nov. 11.

Mapes, Daniel, Mamaroneck, assignor to Walter Kidde & Company, Inc., New York. Release device for fluids under pressure. 1,781,027; Nov. 11.

Mapes, Daniel, Mamaroneck, assignor to Walter Kidde & Company, Inc., New York, N. Y. Nonclogging nozzle for fire-extinguishing systems. 1,781,028; Nov. 11.

Mapother, Henry, H., jr., Louisville, Ky., assignor to Vacuum Process Corporation. Making paints. 1,781,648; Nov. 11.

Marcellus, Fredrick S., Scotia, N. Y., assignor to General Electric Company. Demand meter. 1,781,588; Nov. 11.

Marcellus, Myron, Liberal, Kans. Internal-combustion engine. 1,781,589; Nov. 11.

Marcus, Samuel L., Chicago, Ill. Shoe construction. 1,781,118; Nov. 11.

Margrave, Charles B., Los Angeles, Calif. Golf-club grip. 1,781,290; Nov. 11.

Marion Steam Shovel Company, (1927), The. (See Ferguson, Berlin S., assignor.)

Markel Electric Products, Inc. (See Ellinger, Albert E., assignor.)

Marshall, Leslie H., assignor of one-half to A. A. Grubb, Columbus, Ohio. Producing malleable-iron castings. 1,781,119; Nov. 11.

Marshall, Luther A., Floydada, Tex. Egg hatcher. 1,781,336; Nov. 11.

Marshman, Elmer E. (See Hurlbert, W. G., jr., and Marshman.)

Martin, Frederick W., Brooklyn, N. Y., assignor to Franklin Railway Supply Company. Driving-box lubricator. 1,781,337; Nov. 11.

Martin, Harold T. (See King, D. H., and Martin.)

Martin, Wallace. (See Martin, William C. and W. W.)

Martin, William C., Boston, and W. Martin, Watertown, Mass. Sanding device for motor vehicles. 1,781,120; Nov. 11.

Martois, Arthur E., Compton, and W. E. Martois, Gardena, Calif. Straight-line pumping operating mechanism. 1,780,933; Nov. 11.

Martois, Waldo E. (See Martois, Arthur E. and W. E.)

Maschinenfabrik Augsburg-Nurnberg A. G. (See Riehm, Wilhelm, assignor.)

Mason, Warren P., East Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated. Wave filter. 1,781,469; Nov. 11.

Master Machinery and Implement Company. (See Kurth, Matthew G., assignor.)

Mataya, William, Seattle, Wash. Commutator accessory. 1,781,551; Nov. 11.

Mathews Conveyer Company. (See Anderson, Martin J., assignor.)

Mathews, Louis T., Houston, Tex. Copyholder attachment for typewriters. 1,781,552; Nov. 11.

Maurus, Harry, assignor to Duplan Silk Corporation, New York, N. Y. Textile fabric. Des. 82,511; Nov. 11.

Maxwell, Francis, Wallington, England. Cane-crushing apparatus. 1,781,186; Nov. 11.

Mayman, Edwin, San Diego, Calif. Automatic control for airplane flotation apparatus. 1,781,291; Nov. 11.

Mayo, Edward L. (See Levy, Edward J.)

McAuliffe, John E. (See Palmer, F., and McAuliffe.)

McCaleb, Albert G. (See Allen, Hugh E., assignor.)

McCargar, Joseph R., Grand Rapids, Mich. Desk. Des. 82,534; Nov. 11.

McClees, John S., Baltimore, Md. Smoker's article. 1,781,553; Nov. 11.

McCoy, Margaret E., Duluth, Minn. Combination garment. 1,781,590; Nov. 11.

McCoy, Robert R., Cumberland, Md., assignor to White and Haines Optical Co., Columbus, Ohio. Ophthalmic mounting. Des. 82,512; Nov. 11.

McCracken, James A., Los Angeles, Calif. Hand foamite fire extinguisher. 1,781,292; Nov. 11.

McCracken, James A., Los Angeles, Calif. Portable foam-producing apparatus. 1,781,293; Nov. 11.

McCracken, James A., Los Angeles, Calif. Method of and apparatus for production of foam solutions. 1,781,294; Nov. 11.

McCracken, James A., Los Angeles, Calif. Continuous production of fire foam. 1,781,295; Nov. 11.

McElroy, Roy H., and P. A. Meehan, assignors to Carol Engineering, Inc., Dayton, Ohio. Muller pan. Des. 82,513; Nov. 11.

McFarland, Ernest H., assignor of one-third to J. A. Hodges, Louisburg, N. C., one-sixth to F. M. Hodges, Richmond, Va., and one-sixth to J. M. Hodges, Fayetteville, N. C. Air tester. 1,781,121; Nov. 11.

McGee, Eugene H., Chicago, Ill., assignor, by mesne assignments, to Signode Steel Strapping Company. Seal. 1,781,029; Nov. 11.

McGrew, John A., Albany, N. Y. Tie plate and key. 1,781,122; Nov. 11.

McIntyre, Charles S. (See Smith, E. D., and McIntyre.)

McIntyre, William O., Charlotte, N. C. Safety catch. 1,781,591; Nov. 11.

McKeown, John L., Chicago, Ill. Expansion bearing. 1,781,517; Nov. 11.

McLean, Allan H. (See Gilligan, E. J., and McLean.)

McMath, John E. (See Townsend, Frank B., assignor.)

McNab, Alexander, Bridgeport, Conn. Pump. 1,781,404; Nov. 11.

Meehan, Paul A. (See McElroy, R. H., and Meehan.)

Meier, Albert H., Evansville, Ind. Pipe vise and bender. 1,781,592; Nov. 11.

Mellis, John P. (See Wood, Joseph E., assignor.)

Menzak, John, Manville, N. J. Safety razor. 1,780,934; Nov. 11.

Merkle, Mollie K., Paris, Ill. Mop. 1,781,237; Nov. 11.

Metropolitan Engineering Company. (See Hoffer, Le Roy H., assignor.)

Metropolitan Lamp Co. (See Collins, Frank, assignor.)

Meunier, Paul. (See Stapelle, Joseph, assignor.)

Meunier, Paul, Fleurus, Belgium. Carburetor. 1,781,066; Nov. 11.

Meyers, John D. (See Glanschnig, Ignatz, assignor.)

Michell, Joseph, Berwind, Colo. Goggles. 1,781,067; Nov. 11.

Michell, Anthony G. M., Melbourne, Victoria, Australia, assignor, by mesne assignments, to Michell-Crankless Engines Corporation, New York, N. Y. Fluid motor and pump. 1,781,068; Nov. 11.

Michell, Anthony G. M., Melbourne, Victoria, Australia, and J. P. Postlethwaite and T. Smith, London, England, assignors, by mesne assignments, to Michell-Crankless Engines Corporation, New York, N. Y. Mechanism for the interconversion of reciprocating and rotary motions. 1,781,069; Nov. 11.

Michell-Crankless Engines Corporation. (See Michell, Anthony G. M., assignor.)

Michell-Crankless Engines Corporation. (See Michell, A. G. M., Postlethwaite, and Smith, assignors.)

Mieg, Walter, Opladen, Germany, assignor to General Aniline Works, Inc., New York, N. Y. New valuable vat dyestuffs of the anthraquinone series. 1,781,238; Nov. 11.

Mihalyi, Frank, St. Louis, Mo., assignor to The David White Company, Milwaukee, Wis. Transit level. 1,781,666; Nov. 11.

Mihalyi, Frank, St. Louis, Mo., assignor to The David White Company, Milwaukee, Wis. Surveying instrument. 1,781,667; Nov. 11.

Milbomme, Alexander, Ridgefield Park, assignor to Progressive Silk Finishing Co., Hoboken, N. J. Treating textile fabrics. 1,781,296; Nov. 11.

Mishawaka Rubber & Woolen Manufacturing Company. (See Winterhalter, Martin, assignor.)

Mitchell, Harry V., Danville, Ill., assignor of one-half to R. C. Dennett, Freeport, N. Y. Index device. 1,781,070; Nov. 11.

Moen, George E., Kelso, Wash. Valve-reaming tool. 1,781,338; Nov. 11.

Mohun, John L., Omaha, Nebr. Steam engine. 1,781,407; Nov. 11.

Molins, Walter E., Deptford, London, England. Cigarette-making machinery. 1,781,239; Nov. 11.

Molins, Walter E., Deptford, London, England. Cigarette-making machinery. 1,781,240; Nov. 11.

Monarch Metal Weatherstrip Corporation. (See Goellner, John A., assignor.)

Monnot, John F., London, England. Alkaline storage battery. 1,780,935; Nov. 11.

Monroe Calculating Machine Company. (See Crosman, Loring P., assignor.)

Monsch, Robert, Union City, N. J. Sandal. Des. 82,514; Nov. 11.

Montapert, Alfred A., Los Angeles, Calif. Safety fuse and circuit tester. 1,781,593; Nov. 11.

Morley, Earl M. (See Neilson, James R., assignor.)

Morris, Edmund, and A. Vanderveld, assignors to Grand Rapids Store Equipment Corporation, Grand Rapids, Mich. Counter-partition support. 1,781,408; Nov. 11.

Morrow, Isaac E., Dallas, Tex. Door-operating device. 1,781,594; Nov. 11.

Mossbach, Henry, Seattle, Wash. Gauge for gasoline tanks, etc. 1,781,030; Nov. 11.

Motorheator Company. (See Slichter, Charles S., assignor.)

Moyer, James H., assignor to The Columbus Dental Manufacturing Company, Columbus, Ohio. Artificial porcelain root tooth. 1,780,979; Nov. 11.

Moyle, Edward H., Los Angeles, Calif. Typewriter. 1,781,671; Nov. 11.

Mueller, Emil, Cranston, R. I. Screw driver. 1,781,470; Nov. 11.

Mullican, Francis M., Butte, Mont. Figure wheeled toy. 1,781,471; Nov. 11.

Munn, Andrew A., Rapid City, S. Dak. Automatic grapple. 1,781,518; Nov. 11.

Mustakos, Steve. (See Johns, George H., assignor.)

Mutti, Louis, Paris, France. Powder-supplying device with adjustable feed. 1,781,595; Nov. 11.

Mutual Metal Manufacturing Company. (See Goodfriend, Henry, assignor.)

Nagle, Oscar N., Turpin, Okla. Grain separator. 1,781,472; Nov. 11.

National Aniline & Chemical Co. (See Heritage, Clark C., assignor.)

National Automatic Tool Company, The. (See Herzberg, A. A. and Schultz, assignors.)

National Brake & Electric Company. (See Aikman, Burton S., assignor.)

National Carbon Company. (See Jones, Homer W., assignor.)

National Dehydrator Corporation. (See Palmer, William L., assignor.)

National Electric Products Corporation. (See Frederickson, Otto A., assignor.)

National Lock Washer Company. (See Golden, Robert F., assignor.)

National Marking Machine Company, The. (See Constable, Charles E., assignor.)

National Supply Company, The. (See Wilson, John M., assignor.)

Naugle, Harry M., and A. J. Townsend, Canton, assignors, by mesne assignments, to The American Rolling Mill Company, Middletown, Ohio. Cold rolling and coiling strips. 1,781,123; Nov. 11.

Negley, Charles E., Los Angeles, Calif. Valve lifter. 1,781,187; Nov. 11.

Neidhammer, Clyde, Lemoyne, assignor of one-half to D. A. Grissinger, Lemoyne, Pa. Suspending hook. 1,781,072; Nov. 11.

Neilson, James R., Toledo, Ohio, assignor of one-half to E. M. Morley, Delta, Ohio. Treating-material dispersion. 1,781,188; Nov. 11.

Nein, Harry R., Westfield, N. J., assignor to American Telephone and Telegraph Company. Concentric conducting system. 1,781,124; Nov. 11.

Ness, Harold J., and C. H. Roth, Jersey City, N. J., assignors to The New Departure Manufacturing Company, Bristol, Conn. Making roller-bearing cages. 1,781,241; Nov. 11.

Nessell, Clarence W., Forest Park, Ill., assignor to Reserve Holding Company, Kansas City, Mo. Signaling system. 1,781,519; Nov. 11.

Nessell, Clarence W., Forest Park, Ill., assignor to Reserve Holding Company, Kansas City, Mo. Signaling system. 1,781,520; Nov. 11.

New Departure Manufacturing Company, The. (See Delaval-Crow, Thomas C., assignor.)

New Departure Manufacturing Company, The. (See Ness, H. J., and Roth, assignors.)

Newman, Edwin P. S., Washington, D. C. Ice grid. 1,780,980; Nov. 11.

Newspaper Stuffing Machine Company, The. (See Halvorsen, Severin, assignor.)

Niebel, Gottfried, New York, N. Y. Electric bulb or similar article. Des. 82,515; Nov. 11.

Nielsen, Holger, assignor to Keystone Refrigerating Corporation, Beaver Falls, Pa. Rotary compressor. 1,781,073; Nov. 11.

Nilson, John L., and J. F. Prince, Chicago, Ill. Motor for operating windshield cleaners. 1,781,189; Nov. 11.

Nilson, John L., and J. F. Prince, Chicago, Ill. Windshield-cleaner motor. 1,781,190; Nov. 11.

Nordberg Manufacturing Company. (See Talboys, Henry H., assignor.)

Norddeutsche Affinerie. (See Roscher, Heinrich, assignor.)

Norge Corporation. (See Blood, Howard E., assignor.)

Norling, Reinhold A., Aurora, assignor to Independent Pneumatic Tool Company, Chicago, Ill. Clutch mechanism for power hoists. 1,781,125; Nov. 11.

North East Appliance Corporation. (See Dorsey, F. F., and Crumrine, assignors.)

Norton, Arthur G., Holley, assignor to Alert Products, Inc., Rochester, N. Y. Lubricator. 1,781,554; Nov. 11.

Norton, Raymond J., Washington, D. C., assignor to Bendix Brake Company, Chicago, Ill. Brake member. 1,781,074; Nov. 11.

Norviel, Harry E., Anderson, Ind., assignor, by mesne assignments, to A C Spark Plug Company, Flint, Mich. Illuminated instrument panel. 1,781,242; Nov. 11.

Norway, Nevil S. (See Burney, C. D., Wallis, Norway, and Temple.)

Nurnberg, Alice M., Port Townsend, Wash. Cigarette holder. 1,780,936; Nov. 11.

Oakley, Laurence M., Trenton, N. J. Shoe sole. Des. 82,516; Nov. 11.

Oakley, Laurence M., Trenton, N. J. Shoe heel. Des. 82,517; Nov. 11.

O'Bryan, Leslie L. (See Teleki, Benjamin, assignor.)

Ohm, Albert J. D., Oak Park, assignor to Beardslee Chandelier Manufacturing Company, Chicago, Ill. Lighting fixture. Des. 82,518; Nov. 11.

Ohm, Albert J. D., Oak Park, assignor to Beardslee Chandelier Manufacturing Company, Chicago, Ill. Lighting fixture. Des. 82,519; Nov. 11.

Oliver, William H., Abilene, and O. L. Peters and A. A. Struckhoff, Grinnell, Kans. Hamburger-cake-pressing machine. 1,781,330; Nov. 11.

Oltsik, Irving. (See Kushlin, Kesner, and Oltsik.)

Oneida Community, Limited. (See Allen, G. N., and Kreps, assignors.)

O'Neill, Henry W., Elmhurst, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Testing system. 1,780,937; Nov. 11.

Oreggia, Vittorio, San Remo, Italy. Closure for boxes and cases. 1,781,243; Nov. 11.

Osborn Manufacturing Company, The. (See Oyster, E. F., and Gilliland, assignors.)

Oswald, Clyde D., San Bernardino, Calif. Hair-curling machine. 1,781,244; Nov. 11.

Outcelt, Henry J., Warsaw, Ind. Butter-cutting machine. 1,781,075; Nov. 11.

Owen, Brynar J., Oxford, assignor to Sugar Beet and Crop Driers Limited, London, England. Dehydrating vegetable substances and products of organic character. 1,781,473; Nov. 11.

Oyster, Earl F., Cleveland Heights, and F. N. Gilliland, Shaker Heights, assignors to The Osborn Manufacturing Company, Cleveland, Ohio. Mechanism for making molds. 1,781,126; Nov. 11.

P & M Company, The. (See Preston, Frederick A., assignor.)

Packard Motor Car Company. (See Elliott, Harry C., assignor.)

Packer Manufacturing Co., The. (See Allen, A. S., and Ruzicka, assignors.)

Page, Marshall H., New York, N. Y., assignor to Line-O-Graph Company, Kansas City, Mo. Advertising device. 1,781,596; Nov. 11.

Palmer, Frederick, and J. E. McAuliffe, assignors to Triangle Conduit Company, Inc., Brooklyn, N. Y. Electrical conductor and making the same. 1,781,521; Nov. 11.

Palmer, William L., Long Beach, Calif., assignor, by mesne assignments, to National Dehydrator Corporation. Dehydrating oil. 1,781,076; Nov. 11.

Parrish, Mary B., Philadelphia, Pa. Dye preparation. 1,780,981; Nov. 11.

Pascoe, William H. (See Tatter, J., and Pascoe.)

Passis, Joseph, Chicago, Ill. Chair. 1,780,938; Nov. 11.

Patent Protection Corporation. (See Jeffrey, Harold M., assignor.)

Paton, Robert J., London, England. Direction and movement indicator for use on vehicles. 1,781,522; Nov. 11.

Patz, Alexander, Budapest, Hungary. Switch-operating mechanism for electric railways. 1,780,939; Nov. 11.

Peabody, E. Louise, executrix. (See Peabody, J. C., and Brown.)

Peabody, James C., deceased, Boston, and A. Brown, Everett, Mass.; said Brown and E. L. Peabody, executrix, assignors to F. B. Hopewell, Newton, Mass., as trustee. Fibrous sheet material and making same. 1,781,668; Nov. 11.

Pearson, Lawrence J. (See Holland, W. E., and Pearson.)

Pearson, Lawrence J., Wyncote, assignor to Philadelphia Storage Battery Company, Philadelphia, Pa. Battery tester. 1,781,597; Nov. 11.

Peck, Lawrence W., Chicago, Ill. Chamber-flushing device. 1,781,523; Nov. 11.

Peckinpaugh, Ernest H., Chattanooga, Tenn. Fish lure. 1,781,598; Nov. 11.

Pegram, James B., Bridgeton, N. J. Alarm. 1,781,245; Nov. 11.

Peiler, Karl E., West Hartford, Conn., assignor to Hartford-Empire Company, Hartford, Conn. Feeding molten glass. 1,781,340; Nov. 11.

Pennsylvania Textile Mills, Inc. (See Biva, Lucian, assignor.)

Peo, Ralph F., Kenmore, assignor to Houde Engineering Corporation, Buffalo, N. Y. Shock absorber. 1,781,127; Nov. 11.

Perebenda, Frank, Harrison, N. J. Clothespin. 1,781,031; Nov. 11.

Perlman, Abraham, New York, N. Y. Door operating and locking mechanism. 1,781,297; Nov. 11.

Perry, Marsden J., jr., Providence, R. I. Pitcher. Re17,863; Nov. 11.

Petch, Herbert S., London, and J. G. Wellings, Dunchurch, England, assignors to General Electric Company. Protective arrangement. 1,781,555; Nov. 11.

Peters, Emerson S. (See Lewis, H. P., and Peters.)

Peters, Otto L. (See Oliver, W. H., Peters, and Struckhoff.)

Petersen, John, Durant, Iowa. Battery lifter. 1,781,077; Nov. 11.

Petersen, Martin C., Ipswich, S. Dak. Cooking machine. 1,781,669; Nov. 11.

Phelan, Michael J. (See Leahy, M. R., and Phelan.)

Philadelphia Storage Battery Company. (See Holland, Walter E., assignor.)

Philadelphia Storage Battery Company. (See Holland, W. E., and Pearson, assignors.)

Philadelphia Storage Battery Company. (See Pearson, Lawrence J., assignor.)

Pickup, George E., assignor to The Wehrle Company, Newark, Ohio. Drawer construction for stoves and the like. 1,781,524; Nov. 11.

Pierson, Torvald N., assignor to The Gleaner Combine Harvester Corporation, Independence, Mo. Eccentric drive. 1,781,474; Nov. 11.

Pilspanen, Vaino, Helsinki, Finland, assignor to Koehring Company, Milwaukee, Wis. Concrete mixer. 1,780,940; Nov. 11.

Pilkington Brothers Limited. (See Griffin, James H., assignor.)

Pineo, John H., Brookline, Mass. Door fastener. 1,780,941; Nov. 11.

Place, Marguerite H., San Francisco, Calif. Fastening device. 1,781,078; Nov. 11.

Platt, Arthur I., incompetent, by B. R. Platt, conservatrix, Fairfield, Conn., assignor to The Bridgeport Hardware Manufacturing Corporation, Bridgeport, Conn. Ice pick. 1,781,475; Nov. 11.

Platt, Bessie R., conservatrix. (See Platt, Arthur I.)

Pollock, Robert T., New York, N. Y., assignor to Universal Oil Products Company, Chicago, Ill. Cracking petroleum oil. 1,781,128; Nov. 11.

Ponting, Herbert G. (See Ford, George W., assignor.)
Postlethwaite, Joseph P. (See Michell, A. G. M., Postlethwaite, and Smith.)
Power, Frank, Horton, Kans. Attachment for automobile radiators. 1,781,525; Nov. 11.
Prescott, William E. (See Savy, R., Baker, and Prescott.)
Preston, Frederick A., Lake Forest, assignor to The P & M Company, Chicago, Ill. Rail anchor. 1,781,191; Nov. 11.
Price, Thornton W., New Brunswick, N. J. Furnace-controlling device. 1,780,942; Nov. 11.
Prince, John F. (See Nilson, J. L., and Prince.)
Procunier, Harry G., assignor to Procunier Safety Chuck Company, Chicago, Ill. Tapping attachment. 1,781,192; Nov. 11.
Procunier Safety Chuck Company. (See Procunier, Harry G., assignor.)
Progressive Silk Finishing Co. (See Milhomme, Alexander, assignor.)
Providence Stock Company. (See Lederer, Sigmund L., assignor.)
Prutzman, Paul W., Los Angeles, Calif. Continuous foam-producing method and apparatus. 1,781,298; Nov. 11.
Prutzman, Paul W., Los Angeles, Calif. Continuous production of foam solutions. 1,781,299; Nov. 11.
Prutzman, Paul W., Los Angeles, Calif. Apparatus for fire-foam production. 1,781,300; Nov. 11.
Puening, Franz, Pittsburgh, Pa., assignor to The Koppers Company, Pittsburgh, Pa. Heating coal or the like. 1,781,079; Nov. 11.
Quisling, Sverre, Madison, Wis. Portable sanitary drinking fountain. 1,781,599; Nov. 11.
Quisling, Sverre, Madison, Wis. Combined automobile headrest and strap hanger. 1,781,600; Nov. 11.
Radiant Lighting Fixture Co. (See Bohl, Hugo, assignor.)
Radio Corporation of America. (See Briggs, Loyd A., assignor.)
Radio Frequency Laboratories, Inc. (See Snow, H. A., and Loughlin, assignors.)
Rail Joint Company, The. (See Armstrong, Victor C., assignor.)
Rail Joint Company, The. (See Braine, Daniel L., assignor.)
Rail Joint Company, The. (See Clodfelter, George M., assignor.)
Ramsey, George. (See Chisholm, Charles F., assignor.)
Randall, John, Cleveland, Ohio. Apparatus for cleaning edible animal tissues. 1,781,301; Nov. 11.
Ratzan, Michael N. (See Cohan, W. M., and Ratzan.)
Raw, George. (See Welsh, A., and Raw.)
Rayfield, Charles L., assignor to Rayfield Manufacturing Company, Chicago, Ill. Coupling. 1,781,409; Nov. 11.
Rayfield Manufacturing Company. (See Reyfield, Charles L., assignor.)
Raynor, Louis L., New Rochelle, assignor to The Hygienol Co., Inc., New York, N. Y. Powder puff and making same. 1,781,140; Nov. 11.
Reagan, Cyril F., Altoona, Pa. Shock absorber. 1,781,341; Nov. 11.
Recchia, Orlando R., Cranston, R. I., assignor to C. G. King & Co., Inc., Providence, R. I. Shoe buckle. Des. 82,520; Nov. 11.
Redfield, Snowden B., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Connection for drill rods. 1,781,032; Nov. 11.
Reiber, George, Rochester, N. Y. Automatic pastry-baking machine. 1,781,411; Nov. 11.
Reichert, Manson L. (See Kiefer, William F., assignor.)
Reliable Knitting Company. (See Rosenberg, Armin, assignor.)
Rémondy, Léon E., Paris, France. Percussion fuse for artillery and aircraft projectiles. 1,781,556; Nov. 11.
Replogle, John R., assignor to Kelvinator Corporation, Detroit, Mich. Refrigerating apparatus. 1,781,193; Nov. 11.
Republic Brass Company, The. (See Fischer, Arthur I., assignor.)
Reserve Holding Company. (See Nessell, Clarence W., assignor.)
Reukauf, Edward, jr., assignor to Carey-McFall Co., Philadelphia, Pa. Window shade. 1,781,557; Nov. 11.
Reynolds, Irving W., assignor to The Foxboro Company, Foxboro, Mass. Measuring instrument. 1,781,246; Nov. 11.
Reynolds, Morley P., Cleveland Heights, assignor to The W. S. Tyler Company, Cleveland, Ohio. Apparatus for screening materials. 1,781,526; Nov. 11.
Richter, George A., and M. O. Schur, assignors to Brown Company, Berlin, N. H. Fiber liberating and bleaching process. 1,780,943; Nov. 11.
Rickles, William H., Marshall, Tex. Toothbrush cabinet. 1,781,247; Nov. 11.
Riegel, Samuel S., Scranton, Pa. Piston valve and bushing construction. 1,781,342; Nov. 11.
Riehm, Wilhelm, assignor to Maschinenfabrik Augsburg-Nurnberg A. G., Augsberg, Germany. Two-cycle engine with slot scavenging and airless fuel injection. 1,781,194; Nov. 11.
Ring, Josef, Polerady, Czechoslovakia. Cable grip. 1,781,080; Nov. 11.
Roan, F. D., Machine Company. (See Roan, Floyd D., assignor.)
Roan, Floyd D., assignor to F. D. Roan Machine Company, Newlin, Tex. Cotton cleaner. 1,781,343; Nov. 11.
Roberts, Charles P. (See Jacklin, H. M., and Roberts.)
Roberts, Clarence P., Los Angeles, Calif. Ventilating baking pan. 1,781,302; Nov. 11.
Robertson, John, Co. (See Dollin, E. N., and Jacobson, assignors.)
Rockwell, Paul O., Edgewood Arsenal, Md. Process and apparatus for purifying air. 1,781,664; Nov. 11.
Roemer, Fritz. (See Kränzlein, G., Roemer, and Kronholz.)
Rohaut, Charles N., and E. G. Gearhart, Astoria, Oreg. Combination form holder and concrete anchor. 1,781,601; Nov. 11.
Rohlfs, Roland, Forest Hills, assignor to Aerial Advertising, Inc., New York, N. Y. Electrical aerial advertising sign. 1,781,081; Nov. 11.
Rohrbogenwerk Gesellschaft mit beschrankter Haftung. (See Böhling, Rudolf H., assignor.)
Ronk, George T., assignor to Speeder Machinery Corporation, Cedar Rapids, Iowa. Reversible cable drum. 1,781,195; Nov. 11.
Roscher, Heinrich, assignor to Norddeutsche Affinerie, Hamburg, Germany. Refining antimony by electrolysis of acid electrolytes. 1,780,944; Nov. 11.
Rosenberg, Armin, assignor to Reliable Knitting Company, Milwaukee, Wis. Knitted cap and making same. 1,781,196; Nov. 11.
Roth, Clarence H. (See Ness, H. J., and Roth.)
Roth, G. A., Manufacturing Company. (See Cleland, Melvin L., assignor.)
Rousseau, Lacasse, Montmagny, Quebec, Canada. Article-packing strip. 1,781,476; Nov. 11.
Royal Typewriter Company. (See Degener, Gustave O., assignor.)
Royal Typewriter Company. (See Handley, George F., assignor.)
Royston, Joseph R. (See Aiken, G. A., and Royston.)
Ruben Patents Company. (See Ruben, Samuel, assignor.)
Ruben, Samuel, assignor to Ruben Patents Company, New York, N. Y. Electrical condenser. 1,781,033; Nov. 11.
Ruby, Charles E. (See Smith, L. B., and Ruby.)
Rüegger, Eduard, Zurich, assignor to the firm Aktiengesellschaft der Maschinenfabriken Escher Wyss & Cie., Zurich, Switzerland. Electrically-actuated refrigerating machine. 1,781,082; Nov. 11.
Ruppin, Karl. (See Lehmann, E. P., and Ruppin.)
Russell, Bertrand M., Seattle, Wash. Automobile seat cover. 1,781,034; Nov. 11.
Russell, Edward A. (See Gold, E. H., and Russell.)
Russell, Edward A. (See Gold, E. H., Manchester, and Russell.)
Ruzicka, Rudolph. (See Allen, A. S., and Ruzicka.)
Rydmark, Josef, New Rochelle, assignor to International Combustion Engineering Corporation, New York, N. Y. Air-prehenting device. 1,781,303; Nov. 11.
Rygl, Frank, New York, N. Y. Extension table top. 1,781,602; Nov. 11.
Ryley, Bertram H., Moyie, British Columbia, Canada. Treating the filter cake produced from continuous filters. 1,781,652; Nov. 11.
Saklatwalla, Byramji D., Crafton, Pa. Ferrous alloy. 1,781,527; Nov. 11.
Salazar, Jess G., Atwater, Calif. Renewable-head tool. 1,781,344; Nov. 11.
Sampson, Charles H., Rochester, N. Y. Printing machine. 1,781,477; Nov. 11.
Sanders, Raymond G. (See Johnson, O., and Sanders.)
Sapier, Abraham, assignor to Universal Stamping & Mfg. Co., Chicago, Ill. Film framer for motion-picture projectors. 1,780,945; Nov. 11.
Sargent & Greenleaf, Inc. (See Hill, W. R., and Diesel, assignors.)
Savy, Robert, Courbevoie, France, G. R. Baker, and W. E. Prescott, London, England, assignors to Baker Perkins Company, Inc., Saginaw, Mich. Plant for molding creams and the like. 1,781,345; Nov. 11.
Scelzi, John B., Hopewell, Va. Ash receiver. Des. 82,521; Nov. 11.
Schatz, William A., Astoria, N. Y. Dispenser. 1,781,035; Nov. 11.
Scheyer, Heinz, Rio de Janeiro, Brazil, assignor to General Aniline Works, Inc., New York, N. Y. Compound of the pyrazolanthrone series and making same. 1,781,248; Nov. 11.
Schlegel, Charles P., assignor to Schlegel Mfg. Company, Rochester, N. Y. Grip strap or toggle. 1,781,478; Nov. 11.
Schlegel Mfg. Company. (See Schlegel, Charles P., assignor.)
Schmick, Henry J., Louisville, Ky. Power driving unit. 1,781,083; Nov. 11.
Schmidt, Albrecht, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Tanning agent. 1,780,983; Nov. 11.
Schmidt, Alfred, Weehawken, N. J. Cell-finishing machine. 1,780,982; Nov. 11.
Schmidt, Karl, Nuremberg, Germany. Dust cart. 1,781,346; Nov. 11.
Schnee mann, Justin, Chicago, Ill. Table contact. 1,781,528; Nov. 11.
Scholl, Willard J., Jackson, Mich., assignor to Malt-O-Matic Corporation. Food beverage and preparing the same. 1,781,249; Nov. 11.
Schori, Fritz, Wetzikon, Switzerland. Atomizer for materials in powder form. 1,781,603; Nov. 11.
Schreiber, Moses, assignor to Allentown Knit Fabrics Company, New York, N. Y. Knitted fabric or similar article. Des. 82,522; Nov. 11.

Schröder, Heinrich, Cassel, Germany. Umbrella. 1,780,946; Nov. 11.
Schroeter, George A., Brooklyn, N. Y., assignor of one-half to C. E. Heckel, Cincinnati, Ohio. Shoe construction. 1,781,197; Nov. 11.
Schrön, Hans, Munich, Germany. Crank shaft. 1,780,947; Nov. 11.
Schubart, Benno, Nuremberg, assignor to the firm Vereinigte Schuhfabriken Bernels-Wessels A. G., Ausburg-Oberhausen, Germany. Baby's-shoe box. Des. 82,523; Nov. 11.
Schubart, Benno, Nuremberg, assignor to the firm Vereinigte Schuhfabriken Bernels-Wessels A. G., Ausburg-Oberhausen, Germany. Baby's-shoe box. Des. 82,524; Nov. 11.
Schulman, Joseph, Brooklyn, N. Y. Fender. Des. 82,525; Nov. 11.
Schultz, Henry O. (See Herzberg, A. A., and Schultz.)
Schur, Milton O. (See Richter, G. A., and Schur.)
Schwartz, Max, Brooklyn, N. Y. Collapsible umbrella. 1,781,479; Nov. 11.
Schwarz, Henry G., Denver, Colorado. Press for extracting liquids. 1,781,250; Nov. 11.
Schweinhart, Harrison S. (See Harner, J. Z., and Schweinhart.)
Schwendt, Bernard J., Cleveland, and C. F. Stoltz, Cincinnati, Ohio. Rail support. 1,781,251; Nov. 11.
Scranton, Charles J., jr., assignor to Avery Power Machinery Co., Peoria, Ill. Recleaner. 1,781,198; Nov. 11.
Scull'n Steel Company. (See Dreibuss, H. C., and Chiles, assignors.)
Scbrell, Lorin B., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Uniting rubber and other substances. 1,781,649; Nov. 11.
Seguin, Julien E. M., Paris, France. Lubricating gun. 1,781,604; Nov. 11.
Selbert, Edward G., Washington, D. C. Reproducing device. 1,781,605; Nov. 11.
Selectograph Company. (See Gollnick, P. A., Toolan, and Harred, assignors.)
Servel, Inc. (See Brown, John J., assignor.)
Sesamee Company, The. (See Hatch, Alexander G., assignor.)
Setterberg, Harry O. (See Lewis, C. L., and Setterberg.)
Sexauer, John A., New York, N. Y. Washer. 1,781,119; Nov. 11.
Shaff, Ernest H., assignor to Wm. H. Keller, Inc., Grand Haven, Mich. Pressure-fluid motor. 1,781,130; Nov. 11.
Shaff, Ernest H., assignor to Wm. H. Keller, Inc., Grand Haven, Mich. Pressure-fluid motor. 1,781,131; Nov. 11.
Shaff, Ernest H., assignor to Wm. H. Keller, Inc., Grand Haven, Mich. Pressure-fluid motor. 1,781,132; Nov. 11.
Shaff, Ernest H., assignor to William H. Keller, Inc., Grand Haven, Mich. Pressure-fluid motor. 1,781,133; Nov. 11.
Sheer, H. M., Company. (See Williams, James R., assignor.)
Shelton, Jack F., Memphis, Tenn. Furnace. 1,780,984; Nov. 11.
Shelton, Jack F., Memphis, Tenn. Seed pan. 1,780,985; Nov. 11.
Sherman, John C., Gorham, Me. Apparatus for exchanging safety-razor blades. 1,780,949; Nov. 11.
Sherman, John C., Gorham, Me., assignor to Brown Company, Berlin, N. H. Method of and apparatus for making conduits by extrusion. 1,780,948; Nov. 11.
Sherts, James H., Brackenridge, and R. E. Hamill, Tarentum, Pa., assignors to Duplate Corporation. Making laminated glass. 1,781,084; Nov. 11.
Shoemaker, Edward J., Canton, Ohio. Submarine and auxiliary boat therefor. 1,781,134; Nov. 11.
Shook, Lawrence G., Los Angeles, Calif. Venetian blind for motor vehicles. 1,781,304; Nov. 11.
Shulman, Isidor, New York, N. Y. Game. 1,781,529; Nov. 11.
Siciliani, Joseph, Chicago, Ill. Container for pastry or the like. Des. 82,526; Nov. 11.
Sickels, Allison, Cape May, N. J. Automatic control for reserve lubricants. 1,781,252; Nov. 11.
Signode Steel Strapping Company. (See McGee, Eugene H., assignor.)
Simpson, George N., Chicago, Ill. Car dumper. 1,781,606; Nov. 11.
Sinclair Refining Company. (See Herthel, Eugene C., assignor.)
Sinclair Refining Company. (See Herthel, E. C., and Isom, assignors.)
Singer Manufacturing Company, The. (See Barron, William L., assignor.)
Sipos, Frank, Detroit, Mich. Protective device. 1,780,986; Nov. 11.
Sirmans, Joseph H., Stockton, Ga. Operating mechanism for loading devices. 1,781,480; Nov. 11.
Sixma, Klaas, Montclair, N. J. Fitting for electrical conduits. 1,781,199; Nov. 11.
Skinner, Dudley N., Linwood, Pa. Gutter support. 1,781,085; Nov. 11.
Sladek, Louis J., Chicago, and H. G. Anderson, Sycamore, Ill. Copyholder. 1,781,135; Nov. 11.
Slichter, Charles S., assignor to Motorheator Company, Madison, Wis. Heating device for internal-combustion motors. 1,781,412; Nov. 11.
Slocombe, George C., Long Beach, and A. J. Cormier, Bellflower, Calif. Drilling bit. 1,781,413; Nov. 11.
Slocumb, Lloyd G., Ferguson, Mo. Radio receiving apparatus. 1,781,414; Nov. 11.
Smede, Lloyd, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Anode of carbonized iron or the like. 1,781,305; Nov. 11.
Smethers, James A., and W. Elliott, assignors to Dempster Mill Manufacturing Company, Beatrice, Nebr. Ridge-splitter. 1,781,670; Nov. 11.
Smith, Aaron J. (See Mackie, J. E., and Smith.)
Smith, Edwin S., Harrisburg, Pa. Combination sling shot and bow. 1,781,530; Nov. 11.
Smith, Elijah D., and C. S. McIntyre, Drumright, Okla. Long-stroke pumping outfits. 1,781,347; Nov. 11.
Smith, F. A., Manufacturing Company. (See Connolly, William B., assignor.)
Smith, Frank L., Columbiana, Ohio. Constructing furniture. 1,781,086; Nov. 11.
Smith, Henry J., Philadelphia, Pa. Journal jack. 1,781,136; Nov. 11.
Smith, Leighton B., Newton, and C. E. Ruby, Cambridge, Mass. Treatment of wool. 1,781,415; Nov. 11.
Smith, Thomas. (See Michell, A. G. M., Postlethwaite, and Smith.)
Smith, Walter E., Warwick Downs, R. I., assignor to C. G. King & Co., Inc., Providence, R. I. Shoe ornament. Des. 82,527; Nov. 11.
Snow, Harold A., and W. D. Loughlin, assignors to Radio Frequency Laboratories, Inc., Boonton, N. J. Input collector system for electrical amplifiers. 1,780,987; Nov. 11.
Snyder, George E., Pomona, Calif. Headlight mounting. 1,781,137; Nov. 11.
Société Anonyme Solex. (See Goudard, Maurice, assignor.)
Solar Refining Company, The. (See Werkenthin, Theodore A., assignor.)
Southwestern Engineering Corp. (See Butler, Robert S., assignor.)
Spalding, A. G., & Bros. (See Fitzpatrick, Frank B., assignor.)
Speck, John P., Tiffin, Ohio. Panel construction for signboards. 1,781,558; Nov. 11.
Speeder Machinery Corporation. (See Ronk, George T., assignor.)
Speidel Chain Co. (See Carlson, Edwin G., assignor.)
Spencer, Alexander, London, England. Railway and the like vehicle. 1,781,253; Nov. 11.
Spiros, Sam, Chicago, Ill. Trimmer for films. 1,781,200; Nov. 11.
Spreen, Charles C., Detroit, Mich. Journal-bearing seal. 1,781,201; Nov. 11.
Spry, John W., Dallas, Tex. Apparatus for proportioning and mixing materials for concrete. 1,780,988; Nov. 11.
Stamberg, Frank F., Cicero, Ill., assignor to Standard Oil Company, Whiting, Ind. Drawing lubricant. 1,781,607; Nov. 11.
Standard Oil Company. (See Stamberg, Frank F., assignor.)
Standard Oil Company of California. (See Doell, T. W., and Klemgard, assignors.)
Standard Oil Co. of Indiana. (See Watts, George W., assignor.)
Standard Oil Development Company. (See Zaikowsky, Wladimir M., assignor.)
Stapelle, Joseph, Brussels, assignor to P. Meunier, Fleurus, Belgium. Carburetor. 1,781,087; Nov. 11.
Stelling, William A., assignor to The Textile Finishing Machinery Company, Providence, R. I. Tenter clip. 1,781,138; Nov. 11.
Stelzner, Hermann, assignor to O. H. Dräger, Lubeck, Germany. Gas protective or breathing filter. 1,781,254; Nov. 11.
Stephenson Underwear Mills. (See Johnson, Fritz, assignor.)
Stern, Moses E., New York, N. Y. Window screen. 1,781,202; Nov. 11.
Stevason, John L., Indianapolis, Ind. Plant protector. 1,780,950; Nov. 11.
Stewart, Victor R. Glenside, Pa. Locomotive valve gear. 1,781,559; Nov. 11.
Still, Elmer G., Livermore, Calif. Aircraft device. Re17,868; Nov. 11.
Stockstrom, Arthur, assignor to American Stove Company, St. Louis, Mo. Gas range. Des. 82,528; Nov. 11.
Stoltz, Carl F. (See Schwendt, B. J., and Stoltz.)
Strobel, Charles K., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Radiodetector. 1,781,088; Nov. 11.
Stroble, Ella, administratrix. (See Stroble, John, assignor.)
Stroble, John, Seward, Kans., deceased; E. Stroble, administratrix. Ventilator. 1,781,608; Nov. 11.
Strom, Edwin W., Woburn, assignor of one-half to P. Bilezikian, Watertown, and one-half to A. S. Bilezikian, Newton, Mass. Steam generator. 1,781,653; Nov. 11.
Struckhoff, Aloys A. (See Oliver, W. H., Peters, and Struckhoff.)
Sturgis, Herbert M., assignor, by mesne assignments, to L. Hunt, Kansas City, Mo. Mop head. 1,781,481; Nov. 11.
Sturtevant, B. F., Company. (See Anderson, Samuel M., assignor.)
Suarez, John G., New York, N. Y. Safety-razor attachment. 1,780,951; Nov. 11.

Sugar Beet and Crop Driers Limited. (See Owen, Brynar J., assignor.)
Summers, Louis D., assignor, by mesne assignments, to Leader Iron Works, Inc., Decatur, Ill. Boiler and water heater. 1,781,531; Nov. 11.
Summers, Louis D., assignor, by mesne assignments, to Leader Iron Works, Inc., Decatur, Ill. Boiler and water heater. 1,781,532; Nov. 11.
Sundstrand, Gustaf D., assignor to Sundstrand Machine Tool Co., Rockford, Ill. Pump. 1,781,416; Nov. 11.
Sundstrand Machine Tool Co. (See Sundstrand, Gustaf D., assignor.)
Supersteam Products, Inc. (See Delling, Erik H., assignor.)
Swift and Company. (See Cook, Calvin P., assignor.)
Swift, George W., jr., assignor, by mesne assignments, to Bottle Cap Patents Company, Bordentown, N. J. Bottle-capping machine. 1,781,030; Nov. 11.
Swoboda, H. O., Inc. (See Swoboda, Hans O., assignor.)
Swoboda, Hans O., Edgewood, assignor to H. O. Swoboda, Inc., Pittsburgh, Pa. Ironing machine. 1,781,482; Nov. 11.
Symmes, Ernest M., assignor to Hercules Powder Company, Wilmington, Del. Viscosimeter. 1,780,952; Nov. 11.
Szilard, Leo. (See Einstein, A., and Szilard.)
Talboys, Henry H., assignor to Nordberg Manufacturing Company, Milwaukee, Wis. Track jack. 1,780,989; Nov. 11.
Talboys, Henry H., assignor to Nordberg Manufacturing Company, Milwaukee, Wis. Turntable support. 1,781,348; Nov. 11.
Talley, Charlotte, New York, N. Y. Hospital chart and card holder. 1,781,139; Nov. 11.
Tatter, John, and W. H. Pascoe, Chicago, Ill. Piston. 1,781,037; Nov. 11.
Tauschek, Gustav, Vienna, Austria. Pawl. 1,781,349; Nov. 11.
Taylor, James H., Chicago, Ill. Universal ring-rolling machine. 1,781,140; Nov. 11.
Taylor, Roscoe A., Carbondale, Ill. Tent stake. 1,781,350; Nov. 11.
Taylor, William J. (See Cowley, J. T., and Taylor.)
Tchoubritch, Michel, Sucy-en-Brie, France. Automatic telephone system. 1,781,609; Nov. 11.
Teegarden, Homer R., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Method and apparatus for making cable beads. 1,781,650; Nov. 11.
Telefonaktiebolaget L. M. Ericsson. (See Vos, Mauritz, assignor.)
Teleki, Benjamin, assignor of one-half to L. L. O'Bryan, Chicago, Ill. Composite structure. 1,781,203; Nov. 11.
Television Limited. (See Baird, John L., assignor.)
Temple, John E. (See Burney, C. D., Wallis, Norway, and Temple.)
Ten Eyck, Christine Z., administratrix. (See Ten Eyck, William B.)
Ten Eyck, William B., deceased, by C. Z. Ten Eyck, administratrix, Montclair, N. J., assignor, by mesne assignments, to Western Electric Company, Incorporated. Conductor. 1,780,953; Nov. 11.
Teppema, Jan, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Preserving rubber. 1,781,306; Nov. 11.
Texas Company, The. (See Dengler, Felton S., assignor.)
Textile Finishing Machinery Company, The. (See Stelling, William A., assignor.)
Thompson, William D., assignor, by mesne assignments, to Hutchins Car Roofing Company, Detroit, Mich. Car roof. 1,781,483; Nov. 11.
Thomson, Alfred M. (See Thomson, Robert and A. M.)
Thomson, Alfred M., Newark, N. J., assignor to Dardelet Threadlock Corporation, New York, N. Y. Rod or like article. Des. 82,529; Nov. 11.
Thomson, Alfred M., Newark, N. J., assignor to Dardelet Threadlock Corporation, New York, N. Y. Rod or like article. Des. 82,530; Nov. 11.
Thomson, Robert, and A. M., Newark, N. J. Power press. 1,781,038; Nov. 11.
Thring, Leonard G. P., Cambridge, England. Torsion meter. 1,781,560; Nov. 11.
Thuras, Albert L., East Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Vibratory system. 1,781,351; Nov. 11.
Tide Water Oil Company. (See Bertschinger, Charles F., assignor.)
Tolman, Edgar B., jr., and H. Brueckler, assignors to United Conveyer Corporation, Chicago, Ill. Pneumatic conveyer apparatus. 1,781,352; Nov. 11.
Tomkins, Stirling, South Nyack, N. Y. Belt. 1,780,954; Nov. 11.
Tomonaga, Tetsuo, Deal, N. J. Cigar case. 1,781,089; Nov. 11.
Toolan, John J. (See Golinick, P. A., Toolan, and Harred.)
Torok, Atilla S., Cumberland, Md. Governor attachment. 1,781,610; Nov. 11.
Toth, Steven, Perris, Calif. Disk plow. 1,780,955; Nov. 11.
Totten, Harry A., Burlingame, assignor to Transit Mixers, Inc., San Francisco, Calif. Concrete-mixing apparatus. 1,780,956; Nov. 11.
Townsend, Arthur J. (See Naugle, H. M., and Townsend.)
Townsend, Frank B., assignor of one-half to J. E. McMath, Penn Yan, N. Y. Basket handle. 1,781,611; Nov. 11.
Trahan, Rudolph, Rumstick Point, R. I. Valve-grinding device. 1,781,417; Nov. 11.
Transit Mixers, Inc. (See Totten, Harry A., assignor.)
Travis, Simeon E., jr., Hattiesburg, Miss. Carrier of the plural-deck type. 1,781,612; Nov. 11.
Treiber Diesel Engine Corporation. (See Treiber, Otis D., assignor.)
Treiber, Otis D., Narberth, Pa., assignor to Treiber Diesel Engine Corporation, Camden, N. J. Internal-combustion engine. 1,781,039; Nov. 11.
Trent Process Corporation. (See Trent, Walter E., assignor.)
Trent, Walter E., assignor to Trent Process Corporation, New York, N. Y. Carbonizing process. 1,781,613; Nov. 11.
Trent, Walter E., assignor to Trent Process Corporation, New York, N. Y. Distilling coals. 1,781,614; Nov. 11.
Triangle Conduit Company. (See Palmer, F., and McAuliffe, assignors.)
Trojahn, Herman E., St. Louis, Mo. Coin-controlled drive for fare registers. 1,781,353; Nov. 11.
Trouth, John E., Seminole, assignor to Independent Oil Well Cementing Co., Inc., Oklahoma City, Okla., Cement mixer for cementing oil and gas wells. 1,781,255; Nov. 11.
Tuck, Roston, Needles, Calif. Sand-drying apparatus. 1,781,484; Nov. 11.
Tyler, W. S., Company, The. (See Reynolds, Morley P., assignor.)
U. S. F. Powder Company. (See du Pont, Francis I., assignor.)
Uggla, Wilhelm R., Morby, Stocksund, assignor to Luth & Rösene Elektriska Aktiebolag, Stockholm, Sweden. Yieldable carrier for motion-transmitting devices. 1,781,418; Nov. 11.
Union Manufacturing Company, The. (See Harner, J. Z., and Schweinhart, assignors.)
Union Metal Manufacturing Company, The. (See Drumm, H. C., and Callahan, assignors.)
Union Metal Products Company. (See Gilpin, Garth G., assignor.)
Union Switch & Signal Company, The. (See Crago, Paul H., assignor.)
Union Switch & Signal Company, The. (See Strobel, Charles K., assignor.)
United Conveyer Corporation. (See Tolman, E. B., jr., and Brueckler, assignors.)
United Reproducers Corporation. (See Eisenhour, Bert E., assignor.)
United Research Corporation. (See Bradshaw, H. C., and De Forest, assignors.)
United Shoe Machinery Corporation. (See Winkley, Erastus E., assignor.)
United States Air Compressor Company, The. (See Bacher, Rollin L., assignor.)
United States Printing & Lithograph Company. (See Weikel, William F., assignor.)
Universal Oil Products Company. (See Pollock, Robert T., assignor.)
Universal Stamping & Mfg. Co. (See Sapier, Abraham.)
Upperco-Burnelli Corporation, The. (See Burnelli, Vincent J., assignor.)
Vacuum Process Corporation. (See Mapother, Henry H., jr., assignor.)
Vander Gheynst, Irma H., New York, N. Y. Candy. 1,781,636; Nov. 11.
Van Ranst, Cornelius W., Auburn, Ind., assignor, by mesne assignments, to Manning & Co., Chicago, Ill. Starting-crank arrangement for front-drive automobiles. 1,781,354; Nov. 11.
Van Vlaanderen Machine Company. (See Hinnekens, Florent, assignor.)
Vapor Car Heating Company. (See Gold, E. H., Manchester, and Russell, assignors.)
Vapor Car Heating Company. (See Gold, E. H., and Russell, assignors.)
Veder, Frederika, New York, N. Y. Tea-ball holder. 1,780,957; Nov. 11.
Vereinigte Schuhfabriken Berneis-Wessels, A. G. (See Schubart, Benno, assignor.)
Veronda, William J., San Marino, Calif. Boxing amusement device. 1,781,307; Nov. 11.
Von Frankenberg, Arthur, New York, N. Y. Receptacle. 1,781,141; Nov. 11.
Von Leesen, Emil, Berlin-Treptow, Germany. Pendulum hardness tester. 1,781,615; Nov. 11.
Vos, Mauritz, assignor to Telefonaktiebolaget L. M. Ericsson, Stockholm, Sweden. High-frequency differential transformer. 1,781,308; Nov. 11.
Wadell, Albert H., Newark, N. J. Clamp for seating brake linings. 1,781,355; Nov. 11.
Wagner, Frederick H., assignor to The Bartlett Hayward Co., Baltimore, Md. Gas holder. 1,781,256; Nov. 11.
Wagner, Frederick H., assignor to The Bartlett Hayward Company, Baltimore, Md. Decmulsifier. 1,781,257; Nov. 11.
Wahl, Hans, and A. Fischer, Ludwigshafen-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Generating power in internal-combustion engines. 1,781,485; Nov. 11.
Walker, Arthur J., Ogden, Utah. Stencil. 1,781,258; Nov. 11.
Walker, John, & Sons, Limited. (See Hunt, Sydney, assignor.)
Walker, Robert, Vancouver, British Columbia, Canada. Furnace. 1,781,616; Nov. 11.

Walker, William B., Roxboro, N. C. Apparatus for operating on spinning frames and other machines. 1,781,142; Nov. 11.
Wallace, Ralland J., Oklahoma City, Okla. Pliers or tongs. 1,781,419; Nov. 11.
Walle, Ludwig S., Scotia, N. Y., assignor to General Electric Company. Electric switch-operating mechanism. 1,781,561; Nov. 11.
Wallis, Barnes N. (See Burney, C. D., Wallis, Norway, and Temple.)
Wallis, Thomas I., Evansville, Ind. Portable folding table. 1,781,562; Nov. 11.
Walter, Gustave, Jersey City, N. J. Locomotive bell ringer. 1,781,563; Nov. 11.
Walton, Samuel F., Hamburg, N. Y., assignor to The Ekolon Company, Blasdell, N. Y. Moldable product and producing the same. 1,781,204; Nov. 11.
Waterbury Button Company, The. (See Wolcott, Robeson B., assignor.)
Watertite Casement Hardware Co. (See Cummings, Earle W., assignor.)
Waterworth, Eric N., West Hobart, Australia. Talking machine. 1,781,617; Nov. 11.
Watts, George W., Whiting, assignor to Standard Oil Co. of Indiana, Whiting, Ind. Tar separator. 1,781,618; Nov. 11.
Wayne Pump Company, The. (See Byron, Charles L., assignor.)
Wayne Pump Company, The. (See Deutsch, Leo, assignor.)
Wehrle Company, The. (See Pickup, George E., assignor.)
Weikel, William F., assignor to United States Printing & Lithograph Company, Baltimore, Md. Printed-matter indicator. 1,781,309; Nov. 11.
Weimann Bros. Manufacturing Company. (See Dunnican, George W., assignor.)
Wellings, John G. (See Petch, H. S., and Wellings.)
Wells, Harry L. (See Wysong, Ansel S., assignor.)
Welsh, Arthur, and G. Raw, New Washington, England. Apparatus for conveying from the working face in mines. 1,781,259; Nov. 11.
Wendell, Evert J., Wayne, Pa. Rotary pump. 1,781,619; Nov. 11.
Wenzlawski, Karl E., Galveston, Tex. Electric switch. 1,781,260; Nov. 11.
Werdohler Pumpenfabrik Paul Hillebrand G. m. b. H. (See Hillebrand, Paul, assignor.)
Werkenthin, Theodore A., assignor to The Solar Refining Company, Lima, Ohio. Apparatus for fractionally extracting petroleum hydrocarbons with alcohol. 1,781,420; Nov. 11.
Werkenthin, Theodore A., assignor to The Solar Refining Company, Lima, Ohio. Fractionally extracting petroleum hydrocarbons with alcohol. 1,781,421; Nov. 11.
West, Paul F., Detroit, Mich. Vapor-supplying attachment. 1,781,356; Nov. 11.
Western Electric Company. (See Johnson, Kenneth S., assignor.)
Western Electric Company. (See Ten Eyck, William B., assignor.)
Westinghouse Electric & Manufacturing Company. (See Chubb, Lewis W., assignor.)
Westinghouse Electric & Manufacturing Company. (See Davidson, Archer, assignor.)
Westinghouse Electric and Manufacturing Company. (See Haas, Carl F., assignor.)
Westinghouse Electric & Manufacturing Company. (See Lidiak, Joseph P., assignor.)
Westinghouse Electric & Manufacturing Company. (See Smede, Lloyd, assignor.)
Westinghouse Electric & Manufacturing Company. (See Wolf, Lester J., assignor.)
Wetzell, Clare A., Sterling, Ill. Wheel-bearing figure toy. Des. 82,531; Nov. 11.
Wheeling Steel Corporation. (See Kielberg, Henry, assignor.)
White, David, Company, The. (See Mihalyi, Frank, assignor.)
White and Haines Optical Co. (See McCoy, Robert R., assignor.)
White, Rollin H., Cleveland Heights, Ohio. Track-laying tractor. 1,781,486; Nov. 11.
White, Samuel O., Muncie, Ind. Oiling means for transmission gearing. 1,780,958; Nov. 11.
Whitmore, George S., Yakima, Wash. Marking device. 1,781,620; Nov. 11.
Wickersham, Elmer E., San Leandro, Calif. Internal-combustion engine. 1,781,090; Nov. 11.
Wiley, Samuel, Metuchen, N. J. Illuminating device for aircraft. 1,781,621; Nov. 11.
Wiley, William R., Detroit, Mich. Hood catch. 1,781,261; Nov. 11.
Wilkes, Henry, & Company. (See Cook, Charles A., assignor.)
Wilkes, Thomas S., Corvallis, Oreg. Surgical splint. 1,780,959; Nov. 11.
Willard, Waldo W. (See Hewlett, E. M., and Willard.)
Williams, Edward, Charleroi, assignor, by mesne assignments, to Blaw-Knox Company, Pittsburgh, Pa. Furnace door. Re17,864; Nov. 11.
Williams, James H., assignor to Detroit and Security Trust Company, Detroit, Mich. Making castings. 1,781,143; Nov. 11.
Williams, James R., assignor to H. M. Sheer Company, Quincy, Ill. Damper control for house-heating systems. 1,780,960; Nov. 11.
Williams, Leonard H., Freewater, Oreg. Wire puller. 1,781,622; Nov. 11.
Williams, Paul F., assignor to G. & W. Electric Specialty Co., Chicago, Ill. Conductor disconnecter. 1,781,144; Nov. 11.
Williams, Paul F., assignor to G. & W. Electric Specialty Company, Chicago, Ill. Cable hanger. 1,781,145; Nov. 11.
Williams, Paul F., assignor to G & W Electric Specialty Co., Chicago, Ill. Pothead device for use on electrical circuits. 1,781,671; Nov. 11.
Wilson, John M., Pittsburgh, Pa., assignor to The National Supply Company, Toledo, Ohio. Pipe joint. 1,781,091; Nov. 11.
Winkley, Erastus E., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for operating upon blanks. 1,780,990; Nov. 11.
Winner, Carl, Hamtramck, Mich. Power gang filing device. 1,781,150; Nov. 11.
Winterhalter, Martin, Halle-on-the-Saale, Germany, assignor, by mesne assignments, to Mishawaka Rubber & Woolen Manufacturing Company, Mishawaka, Ind. Fastening for wearing apparel and the like. Re17,865; Nov. 11.
Winters & Crampton Mfg. Co. (See Graf, Edward F., assignor.)
Wintrob, Jacob M., Philadelphia, Pa. Combined valance-board support and curtain-rod bracket. 1,781,262; Nov. 11.
Witz, Henri E., Oberhausen, Germany, assignor to The Babcock & Wilcox Company, Bayonne, N. J. Mechanical stoker for forced-draft furnaces. 1,781,487; Nov. 11.
Wolcott, Robeson B., Watertown, assignor to The Waterbury Button Company, Waterbury, Conn. Bottle carrier. 1,781,357; Nov. 11.
Wolf, Benzion, Chicago, Ill. Garter. 1,781,673; Nov. 11.
Wolf, Lester J., South Bend, Ind., assignor to Westinghouse Electric & Manufacturing Company. Synchronizing system. 1,781,263; Nov. 11.
Wonning, Harvey H., Batesville, Ind., assignor to Combustion Utilities Corporation, New York, N. Y. Discharge cone for gas generators. 1,781,040; Nov. 11.
Wood, Henry A. W., assignor to Wood Newspaper Machinery Corporation, New York, N. Y. Paper-folding device. 1,781,422; Nov. 11.
Wood, Joseph E., assignor of one-half to J. P. Mellis, Chicago, Ill. Table construction. 1,781,423; Nov. 11.
Wood Newspaper Machinery Corporation. (See Wood, Henry A. W., assignor.)
Wood, Wilfred R., London, England, assignor to International Combustion Engineering Corporation, New York, N. Y. Finely-divided-fuel-burning furnace construction. 1,781,310; Nov. 11.
Woodbridge, Charles K., Flushing, N. Y., assignor to Dictaphone Corporation, Bridgeport, Conn. Timing. 1,781,041; Nov. 11.
Working, Earl B., Manhattan, Kans. Chocolate material and making same. 1,781,672; Nov. 11.
Worthington Pump and Machinery Corporation. (See Grace, John F., assignor.)
Wright, James A., Montreal, Quebec, Canada. Front-axle assembly. 1,781,205; Nov. 11.
Wright, James A., Montreal, Quebec, Canada. Tractor. 1,781,206; Nov. 11.
Wysong, Ansel S., assignor of one-half to H. L. Wells, Chicago, Ill. Piston. 1,781,207; Nov. 11.
Young, L. A., Company. (See Link, R. A., and Harders, assignors.)
Youngblood, Daniel B., Caledonia, Mich. Truck body. 1,781,208; Nov. 11.
Youngdahl, George A. (See Cabrera, Alfred B., assignor.)
Zaikowsky, Wladimir M., Pasadena, Calif., assignor to Standard Oil Development Company. Internal-combustion engine. 1,781,146; Nov. 11.
Zaikowsky, Wladimir M., Pasadena, Calif., assignor to Standard Oil Development Company, New York, N. Y. Supercharger for internal-combustion engines. 1,781,147; Nov. 11.
Zaikowsky, Wladimir M., Pasadena, Calif., assignor to Standard Oil Development Company, New York, N. Y. Internal-combustion engine. 1,781,148; Nov. 11.
Zenker, Paul, Paris, assignor to Haviland & Co. (Societe Anonyme), Limoges, France. Plate or similar article. Des. 82,532; Nov. 11.
Zimmermann, William F., Maplewood, assignor to Gould & Eberhardt, Newark, N. J. Oiling system for shapers. 1,781,149; Nov. 11.
Zink, John S., Tulsa, Okla. Gas burner. 1,781,623; Nov. 11.
Zwerling, Harry, Brooklyn, N. Y. Installation for supplying and circulating heated or cooled air. 1,781,358; Nov. 11.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 11TH DAY OF NOVEMBER, 1930

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Absorbents for liquid-oxygen explosives and resulting absorbents and explosives, Preparing. H. C. Bugbird. 1,781,214; Nov. 11.
Accordion. C. and F. Iorio. 1,781,394; Nov. 11.
Addressing machines, Delivery mechanism for. P. A. Gollnick, J. J. Toolan, and G. Harred. 1,781,007; Nov. 11.
Advertising device. M. H. Page. 1,781,596; Nov. 11.
Aerofoil. E. B. Carns. 1,781,160; Nov. 11.
Aeroplane. C. P. Delo. 1,781,371; Nov. 11.
Aeroplane. I. Glanschnig. 1,781,455; Nov. 11.
Aeroplane, Safety. J. Leopold. 1,781,182; Nov. 11.
Air cleaner. W. T. Blaney. 1,781,430; Nov. 11.
Aircraft. V. J. Burnelli. 1,780,993; Nov. 11.
Aircraft device. E. G. Still. Re17,868; Nov. 11.
Airplane flotation apparatus, Automatic control for. E. Mayman. 1,781,291; Nov. 11.
Air-preheating device. J. Rydmark. 1,781,303; Nov. 11.
Air, Process and apparatus for purifying. P. O. Rockwell. 1,781,664; Nov. 11.
Airship, Rigid. C. D. Barney, B. N. Wallis, N. S. Norway, and J. E. Temple. 1,781,100; Nov 11.
Air tester. E. H. McFarland. 1,781,121; Nov. 11.
Alarm. J. B. Pegram. 1,781,245; Nov. 11.
Alarm apparatus. J. A. Bolduc. 1,781,096; Nov. 11.
Alloy, Ferrous. B. D. Saklatwalla. 1,781,527; Nov. 11.
Alloys, Forming. P. A. E. Armstrong. 1,781,490; Nov. 11.
Amplifier for airplanes, Sound. A. Bruni. 1,781,266; Nov. 11.
Amusement ride apparatus. H. Johnson. 1,781,464; Nov. 11.
Anchor, Rail. F. A. Preston. 1,781,191; Nov. 11.
Animal tissues, Apparatus for cleaning edible. J. Randall. 1,781,301; Nov. 11.
Animal trap. T. A. Clarkson. 1,781,163; Nov. 11.
Anode of carbonized iron or the like. L. Smede. 1,781,305; Nov. 11.
Antenna. J. Bethenod. 1,781,046; Nov. 11.
Antimony by electrolysis of acid electrolytes, Refining. H. Roscher. 1,780,944; Nov. 11.
Apparatus for playing golf in restricted spaces or indoors. H. Hill. 1,781,230; Nov. 11.
Apparatus for removing articles from molds. R. D. Hulslander. 1,781,665; Nov. 11.
Ash receiver. J. B. Scelzi. Des. 82,521; Nov. 11.
Asphalt composition and producing the same, Premixed. J. S. Downard. 1,781,105; Nov. 11.
Atomizer for materials in powder form. F. Schori. 1,781,603; Nov. 11.
Automobile. P. H. Horwitt. Des. 82,503–4; Nov. 11.
Automobile filler cap or similar article. H. V. Henderson. Des. 82,500; Nov. 11.
Automobile reverse guard. H. E. Brown. 1,781,156; Nov. 11.
Automobile ventilator. A. Berman. 1,780,903; Nov. 11.
Automobiles, Starting-crank arrangement for front-drive. C. W. Van Ranst. 1,781,354; Nov. 11.
Awning, Side. M. L. Cleland. 1,781,495; Nov. 11.
Axle assembly, Front-. J. A. Wright. 1,781,205; Nov. 11.
Axle construction. F. D. Howe. 1,780,922; Nov. 11.
Axle mounting. E. S. MacPherson. 1,781,406; Nov. 11.
Baking pan, Ventilating. C. P. Roberts. 1,781,302; Nov. 11.
Bar: *See*—
  Pinch bar. Splice bar.
  Rail-joint bar.
Basket handle. F. B. Townsend. 1,781,611; Nov. 11.
Bathtub. R. W. Dowling. 1,781,825; Nov. 11.
Battery: *See*—
  Electric battery. Storage battery.
Battery lifter. J. Petersen. 1,781,077; Nov. 11.
Battery system, Electric. E. R. Gill. 1,781,005; Nov. 11.
Battery tester. L. J. Pearson. 1,781,597; Nov. 11.
Beacon and lantern, Combined. I. Friedman. 1,781,326; Nov. 11.
Bearing cages, Making roller. H. J. Ness and C. H. Roth. 1,781,241; Nov. 11.
Bearing, Expansion. J. L. McKeown. 1,781,517; Nov. 11.
Bearing mounting. S. Madsen. 1,781,407; Nov. 11.
Bearing, Roller. C. M. Eberling. 1,781,450; Nov. 11.
Bearing, Shoe. C. C. Calkins. 1,781,157; Nov. 11.
Bed, Portable folding. E. Cocks. 1,781,439; Nov. 11.
Bell ringer, Locomotive. G. Walter. 1,781,563; Nov. 11.
Belt. S. Tomkins. 1,780,954; Nov. 11.
Beverage and preparing the same, Food. W. J. Scholl. 1,781,249; Nov. 11.
Bit: *See*—
  Disk bit. Drilling bit.
Bleacher, Movable. F. B. Fitzpatrick. 1,781,058; Nov. 11.
Blind for motor vehicles, Venetian. L. G. Shook. 1,781,304; Nov. 11.
Block: *See*—
  Cast-stone trim block.
Boat. A. Curioni. 1,780,998; Nov. 11.
Boiler: *See*—
  Fluid-fuel-fired boiler. Steam boiler.
Boiler and water heater. L. D. Summers. 1,781,531–2; Nov. 11.
Boiler furnace. H. Coerper. 1,781,269; Nov. 11.
Boiler tap guide. G. Fenk. 1,781,634; Nov. 11.
Bottle-capping machine. G. W. Swift, jr. 1,781,036; Nov. 11.
Bottle carrier. R. B. Wolcott. 1,781,357; Nov. 11.
Bottle structure. A. S. Allen. 1,781,094; Nov. 11.
Box: *See*—
  Journal box. Meter box.
  Mail box.
Box for chicks, Shipping. R. A. Gorsuch. 1,781,279; Nov. 11.
Box or container. L. S. Barnes. 1,781,624; Nov. 11.
Boxing amusement device. W. J. Veronda. 1,781,307; Nov. 11.
Brace: *See*—
  Car brace.
Bracelet chain. S. L. Lederer. Des. 82,508; Nov. 11.
Brake member. R. J. Norton. 1,781,074; Nov. 11.
Braking and apparatus therefor. C. F. Chisholm. 1,781,437; Nov. 11.
Braking mechanism for motor vehicles. H. E. Curtis. 1,781,443; Nov. 11.
Braking system. L. E. La Brie. 1,781,112; Nov. 11.
Brander, Pork-loin. C. P. Cook. 1,781,367; Nov. 11.
Brine-tank evaporation unit. J. Karmazin. 1,780,930; Nov. 11.
Broaching machine, Hydraulic. F. J. La Pointe. 1,781,114; Nov. 11.
Bucket discharge mechanism, Skip-. R. H. Beaumont. 1,781,211; Nov. 11.
Buckle, Shoe. O. R. Recchia. Des. 82,520; Nov. 11.
Building. W. B. Foshay and G. R. Magney. Des. 82,492; Nov. 11.
Building construction. I. T. Kahn. 1,780,928; Nov. 11.
Building, Metal. H. C. Drumm and J. M. Callahan. 1,781,498; Nov. 1.
Bumper for automobiles, Side. V. Hostutler. 1,780,974; Nov. 11.
Bumper, Pneumatic. H. M. Clausen. 1,780,908; Nov. 11.
Bung ring. H. M. Dillhoefer. 1,781,166; Nov. 11.
Burner: *See*—
  Gas burner. Whirl burner.
Burner for gas stoves, Top. J. Z. Harner and H. S. Schweinhart. 1,781,386; Nov. 11.
Burner plate. G. C. Anderson. 1,780,896; Nov. 11.
Butter-cutting machine. H. J. Outcelt. 1,781,075; Nov. 11.
Cabinet, Flat-top-desk. B. N. Abbott. 1,781,152; Nov. 11.
Cabinet, Toothbrush. W. H. Rickles. 1,781,247; Nov. 11.
Cable beads, Method and apparatus for making. H. R. Teegarden. 1,781,050; Nov. 11.
Cable drum, Reversible. G. T. Ronk. 1,781,195; Nov. 11.
Cable grip. J. Ring. 1,781,080; Nov. 11.
Cable hanger. P. F. Williams. 1,781,145; Nov. 11.
Cable or conduit, Protected armored. O. A. Frederickson. 1,781,574; Nov. 11.
Calculating machines, Transfer mechanism for. A. A. Horton. 1,781,179; Nov. 11.
Calender roll. J. P. Feney. 1,781,378; Nov. 11.
Camera and other optical projection device. G. W. Ford. 1,781,501; Nov. 11.
Candy. I. H. Vander Gheynst. 1,781,636; Nov. 11.
Cane-crushing apparatus. F. Maxwell. 1,781,186; Nov. 11.
Caoutchouc plates, Manufacturing raw. H. Debor. 1,781,370; Nov. 11.
Cap, and making same, Knitted. A. Rosenberg. 1,781,196; Nov. 11.
Car brace, Box-. J. A. Byington. 1,781,318; Nov. 11.
Car dumper. G. N. Simpson. 1,781,606; Nov. 11.
Car, Refrigerator. K. Edahl. 1,781,169; Nov. 11.
Car roof. W. D. Thompson. 1,781,483; Nov. 11.
Car seal. I. E. Day. 1,781,540; Nov. 11.
Car-washing system. B. S. Aikman. 1,780,991; Nov. 11.
Carbonizing process. W. E. Trent. 1,781,613; Nov. 11
Carburetor. A. C. De Lange. 1,781,218; Nov. 11.
Carburetor. L. R. Ebert. 1,781,276; Nov. 11.
Carburetor. H. Ford. 1,781,502; Nov. 11.
Carburetor. M. Goudard. 1,781,576; Nov. 11.
Carburetor. P. Meunier. 1,781,066; Nov. 11.

Carburetor. J. Stapelle. 1,781,087; Nov. 11.
Carburetor for internal-combustion engines supplied with heavy oil. J. M. A. Golnard. 1,781,327; Nov. 11.
Carburetors, Mixing device for. J. B. Kessel. Re17,869; Nov. 11.
Carrier: *See*—
  Bottle carrier.
Carrier for garments. E. R. Boyle. 1,781,628; Nov. 11.
Carrier for motion-transmitting devices, Yieldable. W. R. Uggla. 1,781,418; Nov. 11.
Carrier of the plural-deck type. S. E. Travis, jr. 1,781,612; Nov. 11.
Case: *See*—
  Cigar case.
Cast stone trim block. G. Laudicina. 1,781,586; Nov. 11.
Castings, Making. J. H. Williams. 1,781,143; Nov. 11.
Castings, Producing malleable-iron. L. H. Marshall. 1,781,119; Nov. 11.
Catch, Safety. W. O. McIntyre. 1,781,591; Nov. 11.
Cell-finishing machine. A. Schmidt. 1,780,982; Nov. 11.
Cellulose, Manufacturing high-grade alpha. L. I. L. Durchman. 1,781,449; Nov. 11.
Cement, Making Portland. F. W. Huber. 1,781,232; Nov. 11.
Cement mixer for cementing oil and gas wells. J. E. Trouth. 1,781,255; Nov. 11.
Chair. J. Passis. 1,780,938; Nov. 11.
Chamber-flushing device. L. W. Peck. 1,781,523; Nov. 11.
Chocolate material and making same. E. B. Working. 1,781,672; Nov. 11.
Chopper: *See*—
  Meat chopper.
Chuck. A. L. Currier. 1,781,442; Nov. 11.
Chute, Mail. R. M. Hulett. 1,781,282; Nov. 11.
Cigar case. T. Tomonaga. 1,781,089; Nov. 11.
Cigarette-making machinery. W. E. Molins. 1,781,239–40; Nov. 11.
Circuits, Pothead device for use on electrical. P. F. Williams. 1,781,671; Nov. 11.
Circulating tube. J. F. Arthur. Re17,866; Nov. 11.
Clamp for seating brake linings. A. H. Wadell. 1,781,355; Nov. 11.
Clay, Making a decolorizing. W. S. Baylis. 1,781,265; Nov. 11.
Cleaner: *See*—
  Air cleaner. Fluid air cleaner.
  Cotton cleaner.
Clip: *See*—
  Tenter clip.
Clip for collapsible tubes. G. W. Dunnican. 1,781,448; Nov. 11.
Clock case or similar article. A. Levy. Des. 82,509; Nov. 11.
Closure for boxes and cases. V. Oreggia. 1,781,243; Nov. 11.
Clothespin. F. Perebenda. 1,781,031; Nov. 11.
Clutch, Friction. L. B. Green. 1,781,173; Nov. 11.
Clutch mechanism for power hoists. R. A. Norling. 1,781,125; Nov. 11.
Coal and like substances, Apparatus for pulverizing. W. J. Drummond. 1,781,572; Nov. 11.
Coal from dirt and like foreign substances, Apparatus for separating. W. H. Berrisford. 1,780,965; Nov. 11.
Coal or the like, Heating. F. Puening. 1,781,079; Nov. 11.
Coal, Treating. E. V. Collins, jr. 1,781,102–3; Nov. 11.
Coals, Distilling. W. E. Trent. 1,781,614; Nov. 11.
Cocks, Sealing device for. C. A. Caldwell. 1,780,994; Nov. 11.
Communication system. J. W. Horton. 1,780,921; Nov. 11.
Commutator accessory. W. Mataya. 1,781,551; Nov. 11.
Composite structure. B. Teleki. 1,781,203; Nov. 11.
Composition of matter and forming same. M. Darrin. Re17,867; Nov. 11.
Compound for mixing with cements and making the same. R. Buhman. 1,781,267; Nov. 11.
Compound of the pyrazolanthrone series and making same. H. Scheyer. 1,781,248; Nov. 11.
Compressor, Rotary. H. E. Blood. 1,781,095; Nov. 11.
Compressor, Rotary. H. Nielsen. 1,781,073; Nov. 11.
Concentric conducting system. H. R. Nein. 1,781,124; Nov. 11.
Concrete, Apparatus for proportioning and mixing materials for. J. W. Spry. 1,780,988; Nov. 11.
Concrete mixer. V. Piispanen. 1,780,940; Nov. 11.
Concrete-mixing apparatus. H. A. Totten. 1,780,956; Nov. 11.
Concrete-mixing apparatus, Control mechanism for. O. Johnson and R. G. Sanders. 1,781,549; Nov. 11.
Condenser. J. F. Grace. 1,781,107; Nov. 11.
Condenser. J. P. Lidiak. 1,781,024; Nov. 11.
Condenser, Electric. E. T. Hoch. 1,781,917; Nov. 11.
Condenser, Electrical. S. Ruben. 1,781,033; Nov. 11.
Condensers, Exhaust connection for. J. F. Grace. 1,781,108; Nov. 11.
Conducting system, Concentric. H. A. Affel and E. I. Green. 1,781,092; Nov. 11.
Conductor. W. B. Ten Eyck. 1,780,953; Nov. 11.
Conductor disconnecter. P. F. Williams. 1,781,144; Nov. 11.
Conductor system, Concentric. H. A. Affel. 1,781,093; Nov. 11.
Conduits by extrusion, Method of and apparatus for making. J. C. Sherman. 1,780,948; Nov. 11.
Conduits, Fitting for electrical. K. Sixma. 1,781,199; Nov. 11.
Construction unit. C. E. Jones. 1,781,234; Nov. 11.
Container for pastry or the like. J. Siciliani. Des. 82,526; Nov. 11.
Container for storage and transport of liquefied gases. S. Braunstein. 1,781,048; Nov. 11.
Container liner, Ice-cream-. P. L. Goddard. 1,781,006; Nov. 11.
Container, Toilet accessories. R. Eberhardt. Des. 82,536; Nov. 11.
Control for aeroplanes, Automatic. R. Fedrizzi. 1,781,633; Nov. 11.
Control mechanism for concrete mixers. E. H. Lichtenberg. 1,780,932; Nov. 11.
Controlling mechanism, Automatic. A. J. Frame. 1,781,453; Nov. 11.
Conveyer apparatus, Pneumatic. E. B. Tolman, jr., and H. Brueckler. 1,781,352; Nov. 11.
Conveyer system. J. T. Cowley and W. J. Taylor. 1,781,655; Nov. 11.
Conveying and spacing apparatus. M. J. Anderson. 1,781,424; Nov. 11.
Conveying apparatus for dipping. M. J. Anderson. 1,781,425; Nov. 11.
Conveying from the working face in mines, Apparatus for. A. Welsh and G. Raw. 1,781,259; Nov. 11.
Cooking machine. M. C. Petersen. 1,781,669; Nov. 11.
Cooling system for passenger vehicles. C. F. Hall. 1,781,151; Nov. 11.
Cotton cleaner. F. D. Roan. 1,781,343; Nov. 11.
Counter and stop, Automatic course. F. Clemens. 1,780,909; Nov. 11.
Coupler, Hose. E. H. Gold, T. H. Manchester, and E. A. Russell. 1,781,543; Nov. 11.
Coupling. C. L. Rayfield. 1,781,409; Nov. 11.
Cover and casket or vault decoration, Grave. J. W. Blacklock. 1,781,625; Nov. 11.
Crank-case ventilator. E. S. MacPherson. 1,781,405; Nov. 11.
Crank shaft. H. Schrön. 1,780,947; Nov. 11.
Creams and the like, Plant for molding. R. Savy, G. R. Baker, and W. E. Prescott. 1,781,345; Nov. 11.
Cultivator-wheel mounting. T. Brown. 1,780,900; Nov. 11.
Curbing, Concrete. H. A. Blanchard. 1,780,904; Nov. 11.
Curd-working machine. J. J. Derfus. 1,781,373; Nov. 11.
Curling machine, Hair-. C. D. Oswald. 1,781,244; Nov. 11.
Curtain for railroad-car windows. R. F. Golden. 1,780,913; Nov. 11.
Curtain operating device, Rear-. N. V. Kreger. 1,781,646; Nov. 11.
Cut-off-controlling apparatus, Automatic gravity. M. C. Bright. 1,781,315; Nov. 11.
Cutting device and tool therefor. E. J. Beattie. 1,781,564; Nov. 11.
Cutting machine, Corn-. G. W. Klaucke. 1,781,111; Nov. 11.
Cylinder structure. T. E. Herrick, jr. 1,781,582; Nov. 11.
Damper control for house heating systems. J. R. Williams. 1,780,960; Nov. 11.
Deemulsifier. F. H. Wagner. 1,781,257; Nov. 11.
Demand meter. F. S. Marcellus. 1,781,588; Nov. 11.
Dental handpiece. J. Gross and I. Hellman. 1,781,508; Nov. 11.
Designs on cakes and the like, Device for making. T. Barbera. 1,781,209; Nov. 11.
Designs, Process and apparatus for producing artistic. R. Brunner. 1,780,969; Nov. 11.
Desk. J. R. McCarger. Des. 82,534; Nov. 11.
Diaphragm. H. C. Harrison. 1,781,387; Nov. 11.
Die-casting machine. E. N. Dollin and C. C. Jacobson. 1,781,168; Nov. 11.
Dilator. H. F. Gau. 1,780,912; Nov. 11.
Dishwashing machine. J. E. Catlett. 1,781,052; Nov. 11.
Disk bit, Multiple-cutter-. I. C. Bell. Re17,856; Nov. 11.
Disk feeder and mixer. L. C. Bonnot. 1,781,097; Nov. 11.
Disk wheel. D. H. Bellamore. 1,780,897; Nov. 11.
Dispenser. W. A. Schatz. 1,781,035; Nov. 11.
Dispensing apparatus, Fluid-. R. L. Bacher. 1,781,045; Nov. 11.
Door, Furnace. E. Williams. Re17,864; Nov. 11.
Door operating and locking mechanism. A. Perlman. 1,781,297; Nov. 11.
Door-operating device. I. E. Morrow. 1,781,594; Nov. 11.
Door, Railway-car hopper. G. G. Gilpin. 1,781,454; Nov. 11.
Dough-molding machine. L. S. Harber. 1,781,546; Nov. 11.
Dress, Ensemble. D. Long. Des. 82,510; Nov. 11.
Dress garment for ladies' wear, Outer. H. Greenbaum. Des. 82,496; Nov. 11.
Drier and stretcher, Curtain. F. L. Hannum. 1,781,177; Nov. 11.
Drill rods, Connection for. S. B. Redfield. 1,781,032; Nov. 11.
Drilling bit. G. C. Slocombe and A. J. Cormier. 1,781,413; Nov. 11.
Drinking fountain, Portable sanitary. S. Quisling. 1,781,599; Nov. 11.
Driving-box lubricator. F. W. Martin. 1,781,337; Nov. 11.
Dust cart. K. Schmidt. 1,781,346; Nov. 11.
Duster, Rock. A. J. Gurney. 1,781,509; Nov. 11.

Dye preparation. M. B. Parrish. 1,780,981; Nov. 11.
Dyestuffs of the anthraquinone series, Acid wood. G. Kranzlein, F. Roemer, and E. Kronholz. 1,780,976; Nov. 11.
Dyestuffs of the anthraquinone series, New valuable vat. W. Mieg. 1,718,238; Nov. 11.
Eccentric drive. T. N. Pierson. 1,781,474; Nov. 11.
Educational device. S. O. Bondeson. 1,781,047; Nov. 11.
Electric battery. W. E. Holland. 1,781,040; Nov. 11.
Electric bulb or similar article. G. Niebel. Des. 82,515; Nov. 11.
Electric heater. A. E. Ellinger. Des. 82,490; Nov. 11.
Electric iron. P. S. Campbell. 1,781,158; Nov. 11.
Electric machine, Dynamo-. F. Creedy. 1,781,538; Nov. 11.
Electric switch. J. R. Cook. 1,781,441; Nov. 11.
Electric switch. E. M. Hewlett and W. W. Willard. 1,781,173; Nov. 11.
Electric switch. K. E. Wenzlawski. 1,781,260; Nov. 11.
Electrical conductor and making the same. F. Palmer and J. E. McAuliffe. 1,781,521; Nov. 11.
Electrical connector or similar article. D. L. Hadley. Des. 82,499; Nov. 11.
Electrical network. K. S. Johnson. 1,781,396; Nov. 11.
Electrical switch, Thermostatically-operated. E. J. Levy. 1,781,289; Nov. 11.
Electrical testing system. E. Bruce. 1,781,363; Nov. 11.
Electrical transmission system. P. W. Blye. 1,780,966; Nov. 11.
Electrolysis device. J. Brigida. 1,781,362; Nov. 11.
Electrolytic cell. W. E. Holland and L. J. Pearson. 1,781,641; Nov. 11.
Elevator: *See*—
Portable elevator.
Emulsified compositions, Making. L. Kirschbraun. 1,781,645; Nov. 11.
Engine: *See*—
Internal-combustion engine. Steam engine.
Engine with slot scavenging and airless fuel injection, Two-cycle. W. Riehm. 1,781,194; Nov. 11.
Ethyl esters, Preparing. A. R. Cade. 1,781,050; Nov. 11.
Extension device. E. G. Carlson. 1,781,101; Nov. 11.
Fabric or similar article, Knitted. M. Schreiber. Des. 82,522; Nov. 11.
Fabrics with liquids, Method and apparatus for treating. F. Hinnekens. 1,781,391; Nov. 11.
Fan, Centrifugal. A. A. Criqui. 1,781,165; Nov. 11.
Fan propeller. S. M. Anderson. 1,781,155; Nov. 11.
Fare register. D. N. Hyman. 1,781,462; Nov. 11.
Fastener, Clothesline. J. B. Errett. 1,781,573; Nov. 11.
Fastener, Collar. L. A. Hill. 1,781,639; Nov. 11.
Fastener, Door. J. H. Pineo. 1,780,941; Nov. 11.
Fastening device. M. H. Place. 1,781,078; Nov. 11.
Fastening for wearing apparel and the like. M. Winterhalter. Re17,865; Nov. 11.
Fats, Regenerating used cooking. M. Brandt. 1,781,661; Nov. 11.
Faucet-supporting plug. I. T. Kahn. 1,780,929; Nov. 11.
Feed-control mechanism. W. C. De Roo. 1,781,274; Nov. 11.
Feed mechanism, Pneumatic. S. Halvorsen. Re17,861; Nov. 11.
Felts of polisher runners in glass-polishing apparatus, Process of and apparatus for washing off the. J. H. Griffin. 1,781,226; Nov. 11.
Fender: *See*—
Ship's fender.
Fender. J. Schulman. Des. 82,525; Nov. 11.
Ferryboat. P. C. Day. 1,781,656; Nov. 11.
Fertilizer distributor. C. G. Goodrich. 1,781,278; Nov. 11.
Fiber liberating and bleaching process. G. A. Richter and M. O. Schur. 1,780,943; Nov. 11.
Fibrous material, Digestion of. T. L. Dunbar. 1,781,447; Nov. 11.
Fibrous sheet material and making same. J. C. Peabody and A. Bowers. 1,781,668; Nov. 11.
Figure toy, Wheel-bearing. C. A. Wetzell. Des. 82,531; Nov. 11.
File guide for saw sharpening. N. A. Booth. 1,781,626; Nov. 11.
Filing device, Power gang. C. Winner. 1,781,150; Nov. 11.
Film printers, Forming light strips for motion-picture-. L. de Beaulieu. 1,781,000; Nov. 11.
Films, Trimmer for. S. Spires. 1,781,200; Nov. 11.
Filter apparatus. R. S. Butler. 1,780,905; Nov. 11.
Filter cake produced from continuous filters, Treating the. B. H. Ryley. 1,781,652; Nov. 11.
Filter discharger. C. C. Heritage. 1,781,389; Nov. 11.
Filter, Wave. W. P. Mason. 1,781,469; Nov. 11.
Finial for lighting fixtures or similar articles. C. F. Haas. Des. 82,498; Nov. 11.
Fire extinguisher, Hand foamite. J. A. McCracken. 1,781,292; Nov. 11.
Fire-extinguishing system. D. Mapes. 1,781,026; Nov. 11.
Fire foam, Continuous production of. J. A. McCracken. 1,781,295; Nov. 11.
Fire-foam production, Apparatus for. P. W. Prutzman. 1,781,300; Nov. 11.
Fish lure. E. H. Peckinpaugh. 1,781,598; Nov. 11.
Fishing rods, Line-supporting ring for. C. A. Cook. 1,781,569; Nov. 11.
Floor sleeper. J. E. Mackie and A. J. Smith. 1,781,117; Nov. 11.
Fluid air cleaner. J. L. Green. 1,781,638; Nov. 11.
Fluid-fuel-fired boiler. B. Greenfield. 1,781,174; Nov. 11.
Fluid meter. R. J. Lyman. 1,781,466; Nov. 11.
Fluid-operated apparatus for lifting automobile wheels. F. B. Di Neuberg. 1,780,972; Nov. 11.
Fluids under pressure, Release device for. D. Mapes. 1,781,027; Nov. 11.
Foam-producing apparatus, Portable. J. A. McCracken. 1,781,293; Nov. 11.
Foam-producing method and apparatus, Continuous. P. W. Prutzman. 1,781,298; Nov. 11.
Foam solutions, Continuous production of. P. W. Prutzman. 1,781,299; Nov. 11.
Foam solutions, Method of and apparatus for production of. J. A. McCracken. 1,781,294; Nov. 11.
Folding table, Portable. T. I. Wallis. 1,781,562; Nov. 11.
Fork: *See*—
Tuning fork.
Fountain: *See*—
Drinking fountain.
Frames and other machines, Apparatus for operating on spinning. W. B. Walker. 1,781,142; Nov. 11.
Fruit-cleaning machine. H. A. Ingraham. 1,780,924; Nov. 11.
Fuel-burning devices, Safety control mechanism for. C. B. Chandler. 1,780,971; Nov. 11.
Furnace: *See*—
Boiler furnace.
Furnace. J. F. Shelton. 1,780,984; Nov. 11.

Furniture, Constructing. F. L. Smith. 1,781,086; Nov. 11.
Fuse and circuit tester, Safety. A. A. Montapert. 1,781,593; Nov. 11.
Fuse for artillery and aircraft projectiles, Percussion. L. E. Rémondy. 1,781,556; Nov. 11.
Game. I. Shulman. 1,781,529; Nov. 11.
Game or toy. G. H. Johns. 1,781,463; Nov. 11.
Game table. M. Harris. Des. 82,533; Nov. 11.
Garment, Combination. M. E. McCoy. 1,781,590; Nov. 11.
Garter. W. Königsberger. 1,780,931; Nov. 11.
Garter. B. Wolf. 1,781,673; Nov. 11.
Garter grip. S. Borgnis. 1,781,431; Nov. 11.
Gas burner. J. S. Zink. 1,781,623; Nov. 11.
Gas protective or breathing filter. H. Stelzner. 1,781,254; Nov. 11.
Gauge for gasoline tanks, etc. H. Mossbach. 1,781,030; Nov. 11.
Gear, Airship-mooring-mast. A. Hall-Brown and E. W. Jones. 1,781,010; Nov. 11.
Gear, Locomotive valve. V. R. Stewart. 1,781,559; Nov. 11.
Gear-shift mechanism. H. E. Blood and R. Lapsley. 1,780,898; Nov. 11.
Gear-shifting mechanism. I. E. Coffey. 1,781,270; Nov. 11.
Gearing for machines. W. D. Dobson. 1,781,275; Nov. 11.
Generator: *See*—
Steam generator.
Generators, Discharge cone for gas. H. H. Wonning. 1,781,040; Nov. 11.
Glass articles, Manufacture of blown-. S. Hunt. 1,781,233; Nov. 11.
Glass, Feeding molten. K. E. Peiler. 1,781,340; Nov. 11.
Glass, Making laminated. J. H. Sherts and R. E. Hamill. 1,781,084; Nov. 11.
Glass, Method and apparatus for drawing sheet. E. F. Ferngren. 1,781,452; Nov. 11.
Glassware, Method and apparatus for making articles of. R. J. Beatty. 1,781,565; Nov. 11.
Globe for a lighting fixture. C. F. Haas. Des. 82,497; Nov. 11.
Goggles. J. Michell. 1,781,067; Nov. 11.
Golf-ball washer. E. M. Laing. 1,781,113; Nov. 11.
Golf-club grip. C. B. Margrave. 1,781,290; Nov. 11.
Governor attachment. A. S. Torok. 1,781,610; Nov. 11.
Grab, Pipe. J. E. Lyons. 1,781,335; Nov. 11.
Grain separator. O. N. Nagle. 1,781,472; Nov. 11.
Gramophones and like machines, Changing the needles of. L. Mangham. 1,781,587; Nov. 11.
Grapple, Automatic. A. A. Munn. 1,781,518; Nov. 11.
Grate. A. J. Koepsell. 1,781,331; Nov. 11.
Grease gun, High-pressure. L. Deutsch. 1,781,374; Nov. 11.
Grinding device, Valve-. R. Traban. 1,781,417; Nov. 11.
Gun mount for submarines, Twin. H. E. Grieshaber. 1,781,175; Nov. 11.
Hairpin. C. A. Dies. 1,781,324; Nov. 11.
Hamburger-cake-pressing machine. W. H. Oliver, O. L Peters, and A. A. Struckhoff. 1,781,339; Nov. 11.
Handle: *See*—
Basket handle.
Hanger: *See*—
Cable hanger.
Harrow. H. Heitmuller. 1,781,459; Nov. 11.
Harrow, Disk. S. S. Furrer. 1,781,171; Nov. 11.
Harrows, Disk-mounting attachment for. G. V. Beckman. 1,781,428; Nov. 11.
Hatcher, Egg. L. A. Marshall. 1,781,336; Nov. 11.
Headlight mounting. G. E. Snyder. 1,781,137; Nov. 11.

Headrest and strap hanger, Combined automobile. S. Quisling. 1,781,600; Nov. 11.
Hearths, Operating mechanism for Scotch. H. R. MacMichael. 1,781,025; Nov. 11.
Heater: *See*—
Boiler and water heater.
Heating device for internal-combustion motors. C. S. Slichter. 1,781,412; Nov. 11.
Heating inclosures electrically. C. L. Burgher. Re17,857; Nov. 11.
Heel for shoes, Cushioned. W. M. Cohan and M. N. Ratzan. 1,780,997; Nov. 11.
Heel, Shoe. L. M. Oakley. Des. 82,517; Nov. 11.
Hinge, Check. W. C. Mangel. 1,781,185; Nov. 11.
Holder, Adjustable-tension paper. J. A. Hoegger. 1,781,547; Nov. 11.
Holder and concrete anchor, Combination form. C. N. Rohaut and E. G. Gearhart. 1,781,601; Nov. 11.
Holder and dispenser, Note. H. Levy. 1,781,022; Nov. 11.
Holder, Bag. C. E. Constable. 1,781,164; Nov. 11.
Holder, Cigarette. J. W. Blesch. 1,781,566; Nov. 11.
Holder, Cigarette. A. M. Nurnberg. 1,780,936; Nov. 11.
Holder, Cop. L. J. Sladek and H. G. Anderson. 1,781,135; Nov. 11.
Holder, Gas. F. H. Wagner. 1,781,256; Nov. 11.
Holder, Hospital chart and card. C. Talley. 1,781,139; Nov. 11.
Holder, License-plate. A. H. Humphrey. 1,781,642; Nov. 11.
Holder, Tea-ball. F. Veder. 1,780,957; Nov. 11.
Holder, Twine. H. P. Bulkley. 1,781,364; Nov. 11.
Holding and dispensing device, Note. H. Levy. 1,781,023; Nov. 11.
Holster, Shoulder pistol. E. E. Clark. 1,781,162; Nov. 11.
Hood catch. W. R. Wiley. 1,781,261; Nov. 11.
Hook: *See*—
Suspending hook.

Toy, Sparkler. J. E. Maikin. 1,781,516; Nov. 11.
Track jack. T. H. Talboys. 1,780,989; Nov. 11.
Track sander. E. J. Gilligan and A. H. McLean. 1,781,637; Nov. 11.
Traction wheel, Arjustable disappearing-lug. V. C. Huenemann. 1,781,461; Nov. 11.
Tractor. J. A. Wright. 1,781,206; Nov. 11.
Tractor, Track-laying. R. H. White. 1,781,486; Nov. 11.
Tractor trailer. C. H. Land. 1,781,399; Nov. 11.
Train-annunciating apparatus. P. H. Crago. 1,781,497; Nov. 11.
Transformer, High-frequency differential. M. Vos. 1,781,308; Nov. 11.
Trap: *See*—
Animal trap.
Tread applier. H. T. Kraft. 1,781,285; Nov. 11.
Triaryl phosphates, Purification of. W. Gibson and C. R. Henshaw. 1,781,225; Nov. 11.
Trimmer: *See*—
Tire trimmer.
Trimmers, Straightedge for wall-paper. F. E. Edgren. 1,781,499; Nov. 11.
Trolley, Crane. A. E. Hogrebe. 1,781,281; Nov. 11.
Truck body. D. B. Younghlood. 1,781,208; Nov. 11.
Truck bolster. H. C. Dreibuss and G. S. Chiles. 1,781,106; Nov. 11.
Truck, Crawling traction. B. S. Ferguson. 1,781,170; Nov. 11.
Truck for transporting cementitious materials. O. T. and O. J. Graham. 1,780,973; Nov. 11.
Tube: *See*—
Circulating tube.
Tuning fork, Electrical. F. Holweck. 1,781,513; Nov. 11.
Turbine. S. Hackenberg. 1,781,059; Nov. 11.
Tying machine, Wire-. T. J. King, jr. 1,781,181; Nov. 11.
Typewriter. E. H. Moyle. 1,781,071; Nov. 11.
Typewriter attachment. J. H. Barton. 1,781,312; Nov. 11.
Typewriters, Copyholder attachment for. L. T. Mathews. 1,781,552; Nov. 11.
Typewriting machine. C. C. Bridwell. 1,781,629; Nov. 11.
Typewriting machine. G. O. Degener. 1,781,570–1; Nov. 11.
Typewriting machine. G. F. Handley. 1,781,579; Nov. 11.
Umbrella. H. Schröder. 1,780,946; Nov. 11.
Umbrella, Collapsible. M. Schwartz. 1,781,479; Nov. 11.
Uncoupling device. C. W. Booth. 1,781,491; Nov. 11.
Urn, Coffee. V. D. Carroll. 1,780,996; Nov. 11.
Valve. H. F. Gilg. 1,781,224; Nov. 11.
Valve and bushing construction, Piston. S. S. Riegel. 1,781,342; Nov. 11.
Valve, Engine. J. H. Grube. 1,781,176; Nov. 11.
Valve for grease lubricating systems, Regulating. J. F. Culp. 1,781,539; Nov. 11.
Valve for rock drills. E. B. Lear. 1,781,021; Nov. 11.
Valve for steam locomotives, Automatic drifting. A. C. Beckwith and F. B. Farnsworth. 1,780,964; Nov. 11.
Valve, Hydraulically-operated tank. A. Davis, jr. 1,781,369; Nov. 11.
Valve lifter. C. E. Negley. 1,781,187; Nov. 11.
Valve mechanism. H. L. Dardelet. 1,780,999; Nov. 11.
Valve mechanism. W. E. Hoke. 1,781,011; Nov. 11.
Valve, Pressure-actuated. A. Campula. 1,781,366; Nov. 11.
Valve, Pressure-regulating. C. H. Dockson. 1,781,054; Nov. 11.
Valve structure, Thermostat. J. H. Grayson. 1,781,328; Nov. 11.
Valve tone throat. C. H. Larsson. 1,781,402; Nov. 11.
Vanity box. W. A. Goertz. Des. 82,493; Nov. 11.
Vapor-supplying attachment. P. F. West. 1,781,356; Nov. 11.
Vegetable substances and products of organic character, Dehydrating. B. J. Owen. 1,781,473; Nov. 11.
Vehicle, Automotive. E. H. Delling. 1,781,322; Nov. 11.
Vehicle body. E. I. Garfield. 1,781,380; Nov. 11.
Vehicle construction. H. Ford. 1,781,503; Nov. 11.
Vehicle control apparatus, Motor-. J. L. Brownell. 1,781,099; Nov. 11.
Vehicle, Motor. H. C. Elliott. 1,781,500; Nov. 11.
Vehicle, Track. H. Liechty. 1,781,334; Nov. 11.
Ventilator: *See*—
Automobile ventilator. Crank-case ventilator.
Ventilator. J. Stroble. 1,781,608; Nov. 11.
Vibratory system. A. L. Thuras. 1,781,351; Nov. 11.
Viscosimeter. E. M. Symmes. 1,780,952; Nov. 11.
Wall mounting for a hand telephone. D. H. King and H. T. Martin. Des. 82,505; Nov. 11.
Washer: *See*—
Golf-ball washer. Lock washer.
Washer. J. A. Sexauer. 1,781,129; Nov. 11.
Washing machine, Cylinder. J. R. Clover. 1,781,217; Nov. 11.
Waste spun or woven textile material, Treatment of. A. L. Burlin. 1,781,317; Nov. 11.
Water-power wheel. J. A. Burroughs. 1,780,901; Nov. 11.
Water purification. M. Brandt. 1,781,314; Nov. 11.
Water screen, Endless sectional. F. P. Gary. 1,781,223; Nov. 11.
Weather strip. J. A. Goellner. 1,781,382; Nov. 11.
Weather strip, Metal. A. M. Lane. 1,781,400; Nov. 11.
Weighing apparatus. L. Gandriaut. 1,781,575; Nov. 11.
Welding clamping device. L. H. Hoffer. 1,781,548; Nov. 11.
Welds on bended bodies, Securing of. A. Lützow. 1,780,978; Nov. 11.
Wheel: *See*—
Disk wheel. Water-power wheel.
Traction wheel.
Wheel. C. J. Hug. 1,780,923; Nov. 11.
Wheel assembly. B. Darrow. 1,781,273; Nov. 11.
Whirl burner. F. Lilge. 1,781,236; Nov. 11.
Window screen. M. E. Stern. 1,781,202; Nov. 11.
Window screen, Adjustable. G. J. Corporon. 1,781,654; Nov. 11.
Window, Screened. A. M. Lane. 1,781,401; Nov. 11.
Windshield-cleaner motor. J. L. Nilson and J. F. Prince. 1,781,190; Nov. 11.
Wing for aircraft. E. B. Carns. 1,781,159; Nov. 11.
Wire puller. L. H. Williams. 1,781,622; Nov. 11.
Woodworking machinery. A. Benedetto. 1,781,429; Nov. 11.
Wool, Treatment of. L. B. Smith and C. E. Ruby. 1,781,415; Nov. 11.
Zero-setting device. L. P. Crosman. 1,781,320; Nov. 11.

CLASSIFICATION OF PATENTS

ISSUED NOVEMBER 11, 1930

NOTE.—First number = class, second number = subclass, third number = patent number

R. Des. 17, 863

This Emblem Means Quality Products Baked Right Here. For Bakery Products. Chicago Master Baker's Association. 12,809; Nov. 18.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 18TH DAY OF NOVEMBER, 1930

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Abson, Gene, assignor to Chicago Paving Laboratory, Inc., Chicago, Ill. Asphaltic material and process for manufacture. 1,782,186; Nov. 18.

Accounting & Tabulating Corporation of Great Britain, Limited, The. (See Thomas, A., and Hallahan, assignors.)

Acme Motion Picture Projector Company. (See Pondelicek, Jerry J., assignor.)

Adams, Harold S., Larchmont, N. Y., and L. Meuser, Bound Brook, N. J., assignors to The Naugatuck Chemical Company, Naugatuck, Conn. Manufacturing tetraalkylated thiuramdisulphides. 1,782,111; Nov. 18.

Adams, Harold S., Larchmont, N. Y., and L. Meuser, Bound Brook, N. J., assignors to The Naugatuck Chemical Company, New Haven, Conn. Treating mixtures of amines. 1,782,112; Nov. 18.

Adams, James W., Bradford, England. Centrifugal liquid purifier. 1,781,676; Nov. 18.

Aeolian Company, The. (See Dickinson, Joseph H., assignor.)

Agfa Ansco Corporation. (See Eggbert, J., Schmidt, and Wendt, assignors.)

Ajax Electrothermic Corporation. (See Linnhoff, Franz, assignor.)

Akers, Axel, assignor to Quality Hardware & Machine Corporation, Chicago, Ill. Multiple-mixture die-casting method and machine. 1,781,939; Nov. 18.

Aktiengesellschaft der Maschinenfabriken Escher Wyss & Cie. (See Flatt, Fritz, assignor.)

Albersheim, Walter J., and H. S. Konheim, New York, N. Y. Shock absorber. 1,782,113; Nov. 18.

Alderson, Herbert J., Toronto, Ontario, assignor of forty-five per cent to J. Legge, Lampton Park, Ontario, Canada. Reciprocating engine. 1,781,831; Nov. 18.

Alemite Corporation. (See Davis, Ernest W., assignor.)

Alemite Corporation. (See Thomas, G. F., and Herb, assignors.)

Alexander, Roy W., Newark, N. J. Straining attachment for pans and kettles. 1,781,995; Nov. 18.

Allard, J. A., jr., et al. (See Anglemeyer, Herman B., assignor.)

Allcock-Laight & Westwood Co., The. (See Jensen, John E., assignor.)

Allegheny Steel Company. (See Detwiler, William F., assignor.)

Alleman, Gellert, Swarthmore, Pa., assignor to Sun Oil Company, Philadelphia, Pa. Manufacturing color lakes from petroleum. 1,781,772; Nov. 18.

Allen, Guy L., Dallas, Tex. Elevator-door-operating apparatus. 1,782,223; Nov. 18.

Allen, John W., Fresno, Calif. Cotton chopper. 1,781,829; Nov. 18.

Allen, Samuel E., Pittsburgh, Pa. Tag-making machine. 1,782,086; Nov. 18.

Allen, Scott E., and O. N. Wiswell, assignors, by mesne assignments, to C-O-Two Fire Equipment Company, Los Angeles, Calif. Head for puncturing closure disks. 1,782,020; Nov. 18.

Allen, Scott E., and O. N. Wiswell, assignors, by mesne assignments to C-O-Two Fire Equipment Company, Los Angeles, Calif. Gas-operated screw-type head for puncturing closures. 1,782,021; Nov. 18.

Allen, Scott E., and O. N. Wiswell, assignors, by mesne assignments, to C-O-Two Fire Equipment Company, Los Angeles, Calif. Gas-pressure means for releasing connections. 1,782,022; Nov. 18.

Alliance Manufacturing Company. (See Clark, Harold W., assignor.)

Allied Die-Casting Corporation. (See Cook, George W., assignor.)

Allyn, Robert S. (See Simmons, John W., assignor.)

Allyne, Edmund E., as trustee. (See Larsen, Harry E., assignor.)

Altorfer, Alpheus W., Peoria, assignor to Altorfer Bros. Company, East Peoria, Ill. Laundry apparatus. 1,782,224; Nov. 18.

Altorfer Bros. Company. (See Altorfer, Alpheus W., assignor.)

Amdyco Corporation. (See Palmer, Walter, assignor.)

American Cable Company. (See Conner, Edward A., assignor.)

American Floor Surfacing Machine Company, The. (See Wolfe, H. H., and Myers, assignors.)

American Flyer Mfg. Co. (See Becker, Harry S., assignor.)

American Sales Book Company. (See Pringle, W. A., and Hagerman, assignors.)

Ancira, Gonazalo, Houston, Tex. Sundial. 1,782,114; Nov. 18.

Anderson, Helmer, assignor to General Mills, Inc., Minneapolis, Minn. Bag shaker and feeder. 1,781,714; Nov. 18.

Anderson, Lon D., Cross Cut, Tex. Wrench. 1,781,940; Nov. 18.

Anderson, Louis A., assignor to R. & G. Company, Attleboro, Mass. Vanity case. 1,782,377; Nov. 18.

Andrade, Cipriano, jr., New York, N. Y. Differential. 1,781,996; Nov. 18.

André, Henri G., Paris, France. Unilateral conductor for rectifying alternating current. 1,782,129; Nov. 18.

Anglemeyer, Herman B., Calexico, assignor of one-tenth to J. A. Allard, jr., one-fourth to A. M. Lichty, one-fourth to B. C. Shepherd, one-eighth to M. W. Zander, and one-sixteenth to I. H. Van Cleave, Pomona, Calif. Automotive air-cleansing device. 1,781,742; Nov. 18.

Aniol, John F., Chicago, Ill. Vehicle lamp. 1,781,865; Nov. 18.

Anker-Holth, Severin C., Los Angeles, Calif. Flying machine. 1,781,910; Nov. 18.

Antoni, Ernst J., Denver, Colo. Plant thinner. 1,781,743; Nov. 18.

Arensberg, Francis L., Pittsburgh, and A. J. Jackman, Forest Hills, assignors to Vesuvius Crucible Company, Swissvale, Pa. Refractory structure. 1,782,023; Nov. 18.

Armitage, Joseph B. (See Kearney, E. J., and Armitage.)

Armstrong, Edward P., Portland, Oreg. Saw grinder. 1,781,941; Nov. 18.

Arnold, Charles L., Shelbyville, Ky. Embalmer's plug. 1,782,332; Nov. 18.

Aronson, Louis V., Newark, N. J., assignor to Art Metal Works, Inc. Vanity case. 1,782,024; Nov. 18.

Art Metal Works, Inc. (See Aronson, Louis V., assignor.)

Asahi Glass Company Limited, The. (See Kamita, Kiyoshi, assignor.)

Asbestos Wood & Shingle Co. (See MacIldowie, John C., assignor.)

Aseltine, Fred E., assignor, by mesne assignments, to Delco Products Corporation, Dayton, Ohio. Charge-forming device for internal-combustion engines. 1,782,333; Nov. 18.

Ashworth, William H., Columbia, S. C. Automatic planer-knife grinder. 1,781,674; Nov. 18.

Atticks, Harry J., and J. G. Saltzman, New York, N. Y. Actuating means for electric-light dimmers. 1,782,390; Nov. 18.

Aurand, Omer R., Shamokin Dam, Pa. Combined light and signal. 1,782,334; Nov. 18.

Austin, Charles J., assignor to R. E. Roberts, Utica, N. Y. Shade holder. 1,782,159; Nov. 18.

Autocar Company, The. (See Bachman, B. B., and Clarke, assignors.)

Automobile "Lock-Alarm" Corporation. (See Bolduc, Joseph A., assignor.)

Auto Ramps Corporation. (See Smith, Horace L., jr., assignor.)

Autosales Corporation. (See Grant, Garnet P., assignor.)

Bachman, Benjamin B., Philadelphia, Pa., and L. S. Clarke, Palm Beach, Fla., assignors to The Autocar Company, Ardmore, Pa. Internal-combustion engine. 1,782,187; Nov. 18.

Bacon, Raymond F., Bronxville, N. Y. Recovery of sulphur from pyrites. 1,782,225; Nov. 18.

Bacon, Raymond F., Bronxville, N. Y. Recovery of sulphur from iron pyrites. 1,782,226; Nov. 18.

Bader, Fred W., Hillsdale, N. J., assignor to J. Kridel, Sons & Co. Textile fabric. Des. 82,537; Nov. 18.

Babney, Robert H., Massilon, assignor of one-half to H. F. Frease, Canton, Ohio. Speed indicator and variable synchronizer. 1,781,866; Nov. 18.

Bahr, Emil, Dean, Mont. Alarm device. 1,782,378; Nov. 18.

Bailey, Claude B., Wyandotte, assignor to McCord Radiator & Mfg. Co., Detroit, Mich. Gasket. 1,782,087; Nov. 18.

Bailey, Richard O. (See Gray, D., Bailey, and Murray.)

Baird, John L., assignor to Television Limited, London, England. Transmitting signals. 1,781,799; Nov. 18.

Baird, John L., assignor to Television Limited, London, England. Television apparatus and the like. 1,781,800; Nov. 18.

Bal, Victor, Hyannis, Nebr. Hay loader. 1,782,227; Nov. 18.

Baldwin, Luther C., assignor, by mesne assignments, to U. S. Bobbin & Shuttle Company, 1929, Providence, R. I. Spool or bobbin. 1,781,801; Nov. 18.

Ball, Charles F., assignor to Chain Belt Company, Milwaukee, Wis. Concrete mixer and agitator. 1,781,965; Nov. 18.

Ball, Howard, Long Beach, Calif. Adjustable scaffolding. 1,781,911; Nov. 18.

Ballauf, Fritz, F. Muth, and A. Schmelzer, Elberfeld, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Carbazole indophenol compounds and preparing the same. 1,781,966; Nov. 18.

Ballou, B. A. & Co. (See Stafford, Rogers T., assignor.)

Balton, James L., Baltimore, Md. Baking and molding device. 1,782,088; Nov. 18.

Baltzell, Edmund A., Portland, Oreg. Sharpening device. 1,781,967; Nov. 18.

Bandoly, Erich, assignor to Central Scientific Company, Chicago, Ill. Resistance box. 1,781,802; Nov. 18.

Barber, Franklin L., and E. W. Webb, assignors to Standard Car Truck Company, Chicago, Ill. Lateral-motion roller bearing for cars. 1,782,130; Nov. 18.

Barber Gas Burner Company, The. (See Kerr, Harry E., assignor.)

Barbour Flax Spinning Co. (See Tracy, Homer D., assignor.)

Bargeboer, Adolf, The Hague, Netherlands. Rotary pump. 1,782,282; Nov. 18.

Barium Reduction Corporation. (See Pierce, James B., jr., assignor.)

Barnes, Eugene L., Buffalo, N. Y. Compressor pump. 1,782,188; Nov. 18.

Barnes, Eugene L., Buffalo, N. Y. Refrigerating apparatus. 1,782,189; Nov. 18.

Barnes, George H., Joliet, Ill. Illuminated sign. 1,781,677; Nov. 18.

Barnes Sash Holder, Inc. (See Barnes, Stanley, assignor.)

Barnes, Stanley, assignor to Barnes Sash Holder, Inc., Indianapolis, Ind. Sash holder. 1,781,912; Nov. 18.

Barrows, Donald S., Rochester, N. Y., assignor, by mesne assignments, to The Symington Company. Journal box. 1,782,055; Nov. 18.

Barstow, Edwin O., assignor to The Dow Chemical Company, Midland, Mich. Fixing or recovering chlorine. 1,781,830; Nov. 18.

Bartels, Edward E., assignor to Standard Oil Company, Whiting, Ind. Converting high-boiling hydrocarbon oils. 1,782,160; Nov. 18.

Bartholomew, Orlo A., Kansas City, Mo. Process and apparatus for barking logs. 1,781,942; Nov. 18.

Bartholomew, Orlo A., St. Louis, Mo. Crane-operated device. 1,781,943; Nov. 18.

Bartlett, Alexandra T., assignor to H. M. Snyder, New York, N. Y. Chair. Des. 82,538; Nov. 18.

Bartley, Charles B., and V. H. Dake, Pittsburgh, Pa. Current-rectifying apparatus. 1,782,228; Nov. 18.

Bartoletti, Dante, Pittsburgh, Pa., assignor of one-half to M. Fredieˈ Monessen, Pa. Antiskid chain for automobiles. 1,782,283; Nov. 18.

Basel, Arthur H., Ithaca, Nebr. Corn popper. 1,781,678; Nov. 18.

Bassick Company, The. (See Harold, Walter F., assignor.)

Bassick Company, The. (See Moore, Raymond G., assignor.)

Bassick Company, The. (See Moore, R. G., and Claud-Mantle, assignors.)

Bastiaens, Marion, Elberon, N. J., assignor to Belle-Rea Corporation, Wilmington, Del. Measuring dispensing device for containers. 1,781,968; Nov. 18.

Batter, Frank, Linnton, Oreg. Heat-exchange apparatus. 1,781,913; Nov. 18.

Battle, Richard. (See Bergquist, C. H., and Battle.)

Baum, Isaac A., Chicago, Ill. Molding for metal frames. 1,781,773; Nov. 18.

Baumer, Harry W., Chicago, Ill. Protective device for electric circuits. 1,782,089; Nov. 18.

Bayles, John H. G., Nottingham, England. Circular-knitting machine. 1,782,161; Nov. 18.

Beach, George F., Philadelphia, Pa., assignor, by mesne assignments, to Ryan, Scully & Company, Philadelphia, Pa. Furnace conveyer. 1,782,335; Nov. 18.

Beane, Walter H. (See Dodge, H. C., and Beane.)

Beau Ideal Food Co. (See Grande, Albert, assignor.)

Beck, Robert W., Lewiston, Idaho. Bicuspid and molar bridge teeth. 1,782,251; Nov. 18.

Becker, Aloysius W., assignor to Reconoheet Company, Chicago, Ill. Space heater. 1,782,229; Nov. 18.

Becker, Harry S., River Forest, assignor to American Flyer Mfg. Co., Chicago, Ill. Automatic safety cut-out for toy railways and the like. 1,781,969; Nov. 18.

Belin, Edouard, Paris, France. Device for recording documents transmitted by radio. 1,781,944; Nov. 18.

Bell, Frank B., assignor to Edgewater Steel Company, Pittsburgh, Pa. Car wheel. 1,781,867; Nov. 18.

Bell & Gossett Company. (See Daley, Walter A., assignor.)

Bell, John E., Brooklyn, and E. W. Isom, Locust Valley, N. Y., assignors to Sinclair Refining Company, Chicago, Ill. Cracking hydrocarbons. 1,782,056; Nov. 18.

Bell, Lawrence D., Los Angeles, and J. C. Rombach, Glendale, Calif.; said Rombach assignor to said Bell. Cigar and cigarette lighter. 1,782,025; Nov. 18.

Bell-Rea Corporation. (See Bastiaens, Marion, assignor.)

Bemis Bro. Bag Company. (See Litchfield, Isaac W., assignor.)

Benjafield, Walter O., Regina, Saskatchewan, Canada. Switch. 1,781,970; Nov. 18.

Berezowski, John, assignor of one-half to P. Berezowski, Philadelphia, Pa. Clamp. 1,781,997; Nov. 18.

Berezowski, Peter. (See Berezowski, John, assignor.)

Bergquist, Charles H., and R. Battle, Okmulgee, Okla. Fluid meter. 1,781,744; Nov. 18.

Bertsch, Johann A. (See Jaeger, A. O., and Bertsch.)

Betancourt, Miguel, Bronx, N. Y. Bit gauge and positioning or leveling attachment. 1,782,284; Nov. 18.

Beyer, David S., Boston, Mass. Combination cigarette case, lighter, and ash tray. 1,782,026; Nov. 18.

Beyer, Heinrich, Flensburg, Germany. Liquid pump. 1,782,252; Nov. 18.

Bezner, Hugo, Crossingersheim, Germany. Shirt collar. 1,781,336; Nov. 18.

Bielenberg, Claude N., Deer Lodge, Mont. Concentrating machine. 1,781,971; Nov. 18.

Bing, Julius, assignor to the firm Magnet-Werke G. m. b. H., Eisenach Spezialfabrik für Elektromagnet-Apparate, Eisenach, Germany. Magnetic separator. 1,781,998; Nov. 18.

Bischof, Ulrich, Aarau, Switzerland. Machine for knotting warps. 1,782,162; Nov. 18.

Bittinger, Charles, Brookline, Mass. Rear-view mirror. 1,781,999; Nov. 18.

Bizzarri, Anthony, New York, N. Y. Oil pump. 1,782,803; Nov. 18.

Blakely, Sidney R., Jamaica Plain, Mass. Insole and making same. 1,781,715; Nov. 18.

Blecha, Albert, Benkelman, Nebr. Cultivator hitch. 1,781,972; Nov. 18.

Block, Mayer E., Peoria, Ill. Agitator for washing machines. 1,781,774; Nov. 18.

Blue Valley Creamery Company. (See McCain, Wes W., assignor.)

Bohl, Hugo, Westfield, N. J., assignor to Radiant Lighting Fixture Co. Inc., New York, N. Y. Lighting fixture or article of similar nature. Des. 82,539; Nov. 18.

Bohn Aluminum & Brass Corporation. (See Miller, Rudolph, assignor.)

Bolduc, Joseph A., Montreal, Quebec, Canada, assignor to Automobile "Lock-Alarm" Corporation, New York, N. Y. Alarm apparatus. 1,782,190; Nov. 18.

Bolling, John E., East Orange, N. J. Telephone-connecter take-up. 1,781,191; Nov. 18.

Bollinger, John C., Olympia, Wash. Sleeve holder. 1,782,057; Nov. 18.

Bollmann, Hermann, Hamburg, Germany. Apparatus for distilling fatty acids. 1,781,745; Nov. 18.

Bolton, Edith M., Gerrard's Cross, England. Spoon. 1,781,973; Nov. 18.

Bond, William A. (See Robbins, Frank D., assignor.)

Bonsall, Charles D., assignor to P. H. Murphy Company, New Kensington, Pa. Curline reenforcement and load-lifting arrangement. 1,781,775; Nov. 18.

Booth, Benjamin W., Ketchikan, Alaska. Animal trap. 1,782,253; Nov. 18.

Booth, William N., assignor to Kelsey-Hayes Wheel Corporation, Detroit, Mich. Disk wheel. Des. 82,540; Nov. 18.

Booth, William N., assignor to Kelsey-Hayes Wheel Corporation, Detroit, Mich. Wood wheel. Des. 82,541; Nov. 18.

Borden Company, The. (See Green, Lee B., assignor.)

Borgquist, Alfred H., Copenhagen, Denmark. Gramophone, megaphone, or the like. 1,781,974; Nov. 18.

Borton, George W., New Lisbon, N. J., assignor to Pennsylvania Crusher Company, New York, N. Y. Hammer crusher. 1,781,891; Nov. 18.

Boulade, Antonin, assignor to Societe du Carburateur Zenith, Lyon, France. Carburetor. 1,782,027; Nov. 18.

Bourdon, Pierre M., Paris, France, assignor to Michelin & Cie., Clermont-Ferrand, France. Wheel for railroad vehicles. 1,782,285; Nov. 18.

Bowes, Laurence C. (See Wanamaker, E., and Bowes.)

Boyce-Thompson Institute for Plant Research, Inc. (See Hartzell, Albert, assignor.)

Bradbury, Tennyson F. (See Hall, H. C., and Bradbury.)

Bradner, Donald B., and C. H. Milligan, assignors to The Champion Coated Paper Co., Hamilton, Ohio. Paper-coating composition. 1,781,716; Nov. 18.

Bradt, Merritt B., Brooklyn, N. Y. Games and amusement device. 1,781,717; Nov. 18.

Bragg, Caleb S., Palm Beach, Fla., and V. W. Kliesrath, Port Washington, assignors to Bragg-Kliesrath Corporation, Long Island City, N. Y. Hydraulically-actuated brake mechanism. 1,781,868; Nov. 18.

Bragg, Caleb S., Palm Beach, Fla., and V. W. Kliesrath, Port Washington, assignors to Bragg-Kliesrath Corporation, Long Island City, N. Y. Hydraulically-actuated brake mechanism. 1,781,869; Nov. 18.

Bragg-Kliesrath Corporation. (See Bragg, C. S., and Kliesrath, assignors.)

Brandes Laboratories, Inc. (See Michell, Philip A., assignor.)

Braun, Philip N. (See Schremp, E. J., and Braun.)

Bray, Little B., Bonaire, Ga. Hame hook. 1,781,975; Nov. 18.

Breidenbach, Max, Mainz, Germany. Game. 1,782,254; Nov. 18.

Brenchley, Richard, Reims, France, assignor, by mesne assignments, to Dual Motors Ltd., London, England. Phonograph. 1,781,679; Nov. 18.

Broberg, Elmer, assignor to Elco Tool and Screw Corporation, Rockford, Ill. Shade-roller bracket. 1,782,131; Nov. 18.

Broberg, Elmer, assignor to Elco Tool & Screw Corporation, Rockford, Ill. Shade-roller bracket. 1,782,132; Nov. 18.

Bromley, John, & Sons, Incorporated. (See Dicken, George M., assignor.)

Brown Company. (See Richter, George A., assignor.)

Brown, Sidney G., North Acton, England. Gyroscopic indicating instrument. 1,781,746; Nov. 18.

Brown, Walter G., Balboa, Canal Zone, Panama. Rack. 1,781,976; Nov. 18.

Brownyer, Nelson R., assignor to The Timken-Detroit Axle Company, Detroit, Mich. Car truck. 1,782,192; Nov. 18.

Bryant Electric Company, The. (See Goodridge, Gilbert W., assignor.)

Bryant Electric Company, The. (See Webster, Benjamin C., assignor.)

Budd, Edward G., Manufacturing Company. (See Ledwinka, Joseph, assignor.)

Buffalo Foundry & Machine Company. (See How, Harlan W., assignor.)

Bulkowski, Joseph, Chicago, Ill. Mechanical toy. 1,781,804; Nov. 18.

Bunte Brothers. (See Oblander, Herbert, assignor.)

Burch, Eli F., Laurel Springs, N. J., assignor to Crew Levick Company, Philadelphia, Pa. Process and apparatus for dewaxing oils. 1,782,028; Nov. 18.

Burgess Battery Company. (See Henderson, Joseph M., assignor.)

Burnand, Ernest, Paris, France. Plate spring. 1,782,286; Nov. 18.

Burrell, Benjamin S., East Chicago, Ind. Lubricating connecters. 1,782,337; Nov. 18.

Burroughs Adding Machine Company. (See Horton, Allen A., assignor.)

Burson Knitting Company. (See Rolston, Walter F., assignor.)

Byron Jackson Co. (See Grant, John, assignor.)

C-O-Two Fire Equipment Company. (See Allen, S. E., and Wiswell, assignors.)

Cadman, Addi B., Beloit, Wis., assignor to Warner Mfg. Co., South Beloit, Ill. Trailer vehicle. 1,782,115; Nov. 18.

Cadman, Addi B., Beloit, Wis., assignor to Warner Mfg. Co., South Beloit, Ill. Trailer vehicle. 1,782,116; Nov. 18.

Cady, Walter G., Middletown, Conn., assignor to Radio Corporation of America. Electromechanical system. 1,781,680; Nov. 18.

Cady, Walter G., Middletown, Conn., assignor to Radio Corporation of America. Mounting piezo-electric resonators for the excitation of various overtones. 1,782,117; Nov. 18.

Cahall, George W., Philadelphia, Pa. Artist's easel. 1,782,118; Nov. 18.

Calco Chemical Company, The. (See Sumner, Richard E., assignor.)

Callen, Peter E., Toronto, Ontario, Canada. Head number for horses. 1,782,193; Nov. 18.

Calpin, Raymond, Everett, assignor to A. S. Campbell Company, East Boston, Mass. Automobile body and constructing a body. 1,782,230; Nov. 18.

Calvert, George W., Rushville, Mo. Hydraulic scale. 1,782,255; Nov. 18.

Cambridge Instrument Company. (See Stallan, William J., assignor.)

Camp, Percy B., Maywood, Ill., assignor to Universal Draft Gear Attachment Co. Brake mechanism for railway cars. 1,781,805; Nov. 18.

Campbell, A. S., Company. (See Calpin, Raymond, assignor.)

Campbell, Charles A., Watertown, N. Y., assignor to The New York Air Brake Company. Feed valve for air brakes. 1,781,747; Nov. 18.

Campbell, Harry E., assignor to Campbell Metal Window Corporation, Baltimore, Md. Sealing mechanism for metal windows. 1,782,338; Nov. 18.

Campbell, Herbert R., Paterson, N. J. Bridge warning indicator. 1,781,675; Nov. 18.

Campbell Metal Window Corporation. (See Campbell, Harry E., assignor.)

Campbell, Wallace G., Lockport, N. Y. Radiator tank. 1,782,058; Nov. 18.

Campobasso, Anthony, Chicago, Ill. Shade and screen for doors, windows, and the like. 1,782,339; Nov. 18.

Capps, Frank L., Bridgeport, Conn. Radio frequency transformer. 1,781,776; Nov. 18.

Carey, Philip, Manufacturing Company, The. (See Greider, Harold W., assignor.)

Carlo, Paul. (See Schleicher, M., and Carlo.)

Carr, Fred S., deceased, Newton, Mass., by United-Carr Fastener Corporation, Cambridge, Mass., assignee. Shiftable nut fastening. Re17,870; Nov. 18.

Carrier Engineering Corporation. (See LeGrand, Joseph M., assignor.)

Carter, Winthrop L., assignor to Nashua Sure-Hold Company, Nashua, N. H. Holding band. 1,782,194; Nov. 18.

Case Research Laboratory, Inc. (See Case, Theodore W., assignor.)

Case, Theodore W., assignor to Case Research Laboratory, Inc., Auburn, N. Y. Talking-picture machine. 1,781,945; Nov. 18.

Casper, Frank L., Howes Cave, N. Y. Table-leaf support. 1,782,059; Nov. 18.

Cater, William B. (See Shanks, W., and Cater.)

Central Scientific Company. (See Bandoly, Erich, assignor.)

Ceres, Albert F., jr. (See Nelson, G. W., and Ceres.)

Chain Belt Company. (See Ball, Charles F., assignor.)

Champion Coated Paper Co., The. (See Bradner, D. B., and Milligan, assignors.)

Chance, Thomas M., Merion, Pa. Separation of materials of different specific gravities. Re17,873; Nov. 18.

Chapman Electric Neutralizer Company. (See Chapman, William H., assignor.)

Chapman, William H., assignor to Chapman Electric Neutralizer Company, Portland, Me. Discharge bar for neutralizing static electricity. 1,782,340; Nov. 18.

Chapper, Frank E., and W. R., McGee, Detroit, Mich. Boot hook. 1,781,748; Nov. 18.

Charlesworth, Stanton I., and A. W. Harris, Cleveland, Ohio. Coating compound. 1,782,341; Nov. 18.

Checker Cab Manufacturing Corporation. (See Ruppel, Frederick C., assignor.)

Chicago Paving Laboratory, Inc. (See Abson, Gene, assignor.)

Chicago Telephone Supply Co. (See Schellenger, Newton C., assignor.)

Chicago Telephone Supply Company. (See Stirling, James A., assignor.)

Childs, John S., assignor of one-third to R. A. Nease, and one-third to C. B. Harrington, McMechen, W. Va. Wheel-flange oiler. 1,782,133; Nov. 18.

Chipman, Andrew L. (See Chipman, Harry E., assignor.)

Chipman, Harry E., Springfield, Mass., assignor to A. L. Chipman, New York, N. Y. Control switch. 1,781,892; Nov. 18.

Chipman, Harry E., Springfield, Mass., assignor to A. L. Chipman, New York, N. Y. Control switch. 1,781,893; Nov. 18.

Christel, Karl, Tauchn, Germany. Machine for cleaning the matrices for type setting and casting machines. 1,781,946; Nov. 18.

Christopherson, Charles J., Oak Park, Ill. Window holder. 1,781,870; Nov. 18.

Clark, Harold W., assignor to The Alliance Manufacturing Company, Alliance, Ohio. Garden shears. 1,782,029; Nov. 18.

Clark Loose Leaf Manufacturing Company. (See Kemp, John B., assignor.)

Clarke, Louis S. (See Bachman, B. B., and Clarke.)

Claud-Mantle, Arthur. (See Moore, R. G., and Claud-Mantle.)

Claude, Georges, assignor to Société l'Air Liquide, Société Anonyme pour l'Etude et l'Exploitation des Procédés Georges Claude, Paris, France. Gas separation process. 1,782,287; Nov. 18.

Clement, Donald B., New York, N. Y., assignor to McKesson & Robbins, Incorporated, Bridgeport, Conn. Wrapping paper. Des. 82,542; Nov. 18.

Cleveland Pneumatic Tool Company, The. (See Greve, Louis W., assignor.)

Cluff, Rohan, Nogales, Ariz. Projecting apparatus. 1,782,288; Nov. 18.

Collins, John N., Rosedale, N. Y. Collar. 1,782,000; Nov. 18.

Collins, Odie O., Riverside, Calif. Gripping device. 1,782,030; Nov. 18.

Columbia Narrow Fabric Company. (See Kenyon, Charles F., assignor.)

Columbus Dental Manufacturing Co., The. (See Fischler, Bernard, assignor.)

Columbus Dental Manufacturing Company, The. (See Vongunten, Alfred E., assignor.)

Comer, Victor T., San Francisco, Calif. Electric-cell-testing machine. 1,781,914; Nov. 18.

Comstock, Dorothy D. (See Stoddard, Beatrice M., assignor.)

Conner, Edward A., Stratford, Conn., assignor to American Cable Company, Inc. Machine for making wire strands, ropes, and cables. 1,781,894; Nov. 18.

Conner, Frank T., South Chicago, Ill. Antiglare device. 1,781,777; Nov. 18.

Conrad, Isiah, assignor to F. O. Schoedinger, Columbus, Ohio. Sheet-metal furniture. 1,781,718; Nov. 18.

Consolidated Ashcroft Hancock Company. (See Heise, Otto W. assignor.)

Consolidated Iron-Steel Manufacturing Company. (See Luton, John K., assignor.)

Cook, Lawrence L., Indianapolis, Ind. Amusement device. 1,782,163; Nov. 18.

Cook Pottery Company, The. (See Lovett, Charles H., assignor.)

Cooke, George W., Forest Hills, N. Y., assignor, by mesne assignments, to Allied Die-Casting Corporation, Long Island City, N. Y. Grease nozzle. 1,781,681; Nov. 18.

Cooper, William R., Huntingdon, Quebec, Canada, and H. Quick, New York, N. Y. Snap hook. 1,782,379; Nov. 18.

Copeman Laboratories Company. (See Copeman, Lloyd G., assignor.)

Copeman, Lloyd G., assignor to Copeman Laboratories Company, Flint, Mich. Refrigerating unit of fired ceramic material. 1,781,778; Nov. 18.

Coplen, Donald G., Seattle, Wash. Safety equipment for aircraft. 1,782,184; Nov. 18.

Copley, Duncan M., and J. P. Snyder, assignors to The Norwich Pharmacal Company, Norwich, N. Y. Mercury compound of meta cresol. 1,782,090; Nov. 18.

Cotton, Walter H., Chicago, Ill. Lubricating device. 1,782,135; Nov. 18.

Cox, Frederick A., Chicago, Ill. Door latch. 1,782,289; Nov. 18.

Cragg, Herbert, Ottawa, Ontario, Canada. Oscillating headlight for automobiles. 1,782,290; Nov. 18.

Crawford, George M., Ingomar, and J. M. London, Butler, Pa. Coal-loading machine. 1,781,895; Nov. 18.
Crenshaw, Erswell V., assignor to Langenberg Hat Company, St. Louis, Mo. Wearing apparel. 1,781,832; Nov. 18.
Crew Levick Company. (See Burch, Eli F., assignor.)
Crichton, James V., assignor of one-half to K. Salberg, Philadelphia, Pa. Variable speed mechanism. 1,782,001; Nov. 18.
Crosby, Stephen A., Philadelphia, Pa. Eraser attachment for typewriters. 1,782,060; Nov. 18.
Cross, James W., Finsbury Pavement, London, and Eric E. Johnson, Tottenham, London, England. Seat. 1,782,231; Nov. 18.
Cross, William A., East Milton, Mass. Sectional liquid heating apparatus. 1,781,915; Nov. 18.
Crotty, Joseph J., New York, assignor to The Universal Pipe and Radiator Company, New York, N. Y. Soil pipe. 1,781,682; Nov. 18.
Crowe Name Plate & Manufacturing Co. (See Scheibel, Charles, assignor.)
Crowell, Henry W., Glen Ridge, N. J. Gauge. 1,782,002; Nov. 18.
Csont, Aron, Coraopolis, Pa. Waterproof shoe. 1,782,136; Nov. 18.
Cummer, Freeman B., Carmen, Manitoba, Canada. Siding clamp. 1,781,833; Nov. 18.
Cummings, Leon H., Ware, Mass. Collapsible table for automobiles. 1,781,977; Nov. 18.
Cutler-Hammer Inc. (See Rodman, Thomas H., assignor.)
Cutler-Hammer, Inc. (See Stevens, W. C., and Meuer, assignors.)
Da Costa, James S., Merchantville, N. J., assignor of one-half to J. B. Webb, Detroit, Mich. Elevator mechanism. 1,781,806; Nov. 18.
Dains, Irven F., assignor to Western Stoneware Company, Monmouth, Ill. Pottery kick out element. 1,781,947; Nov. 18.
Dake, Virgil H. (See Bartley, C. B., and Dake.)
Daley, Walter A., assignor to Bell & Gossett Company, Chicago, Ill. Unrestricted-return water heater. 1,782,380; Nov. 18.
Dalton, Hubert, Stamford, Conn. Belt-tightening mechanism for motor-driven supply units. 1,782,195; Nov. 18.
Dalton, Hubert, Stamford, Conn. Threadless nut or collar. 1,782,196; Nov. 18.
Daly, Catherine T., et al. (See Smith, Augustus, assignor.)
Daly, Mary B., et al. (See Smith, Augustus, assignor.)
Dana, Frank H. (See Sanderson, A. N., Dana, and Vogel.)
Daneman, A. S. (See D'Autremont, Louis F., assignor.)
Darling, William H., London, Ontario, Canada. Waste-pipe fitting. 1,781,719; Nov. 18.
D'Autremont, Louis F., assignor of one-half to A. S. Daneman, Dayton, Ohio. Stencil sheet. 1,781,834; Nov. 18.
Davies, W. Sanders, et al., trustees. (See Davis, Kenneth, assignor.)
Davin, George H., Cassel, Germany, assignor to Schmidt'sche Heissdampf G. m. b. H., Cassel-Wilhelmshohe, Germany. Apparatus for maintaining a predetermined water level in steam boilers. 1,781,749; Nov. 18.
Davis, Ernest, assignor to The Prosperity Company Inc., Syracuse, N. Y. Pressing element for pressing machines. 1,782,137; Nov. 18.
Davis, Ernest W., Oak Park, assignor to Alemite Corporation, Chicago, Ill. Lubricating system. 1,781,948; Nov. 18.
Davis, Frank M., Milwaukee, Wis., and A. C. Hoeh, Pontiac, Mich., assignors to Davis & Thompson Company, Milwaukee, Wis. Continuously-operating multiple lathe. 1,782,138; Nov. 18.
Davis, Kenneth, Ebensburg, Pa., assignor to R. Peale, W. S. Davies, and W. S. Wallace, trustees. Machine for handling loose materials. 1,781,978; Nov. 18.
Davis, Kenneth, Ebensburg, Pa., assignor, by mesne assignments, to Peale-Davis Company, Wilmington, Del. Process and mechanism for separating intermixed materials. 1,782,391; Nov. 18.
Davis, Kenneth, Ebensburg, Pa., assignor, by mesne assignments, to Peale-Davis Company, Wilmington, Del. Process and mechanism for separating intermixed materials. 1,782,392; Nov. 18.
Davis & Thompson Company. (See Davis, F. M., and Hoeh, assignors.)
Dean, Philip, Madison, Wis. Knockdown shelving. 1,782,119; Nov. 18.
Dedrick, David G., Groton, Conn. Sounding device. 1,782,139; Nov. 18.
Degener, Gustave O., assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 1,781,720; Nov. 18.
De Graaf, Martin, Grand Rapids, Mich. Humidifier. 1,782,197; Nov. 18.
De Haven, Avery S. (See Fremon, J. A., and De Haven.)
Delco Products Corporation. (See Aseltine, Fred E., assignor.)
De Leon, Frances M., New York, N. Y. Unit twin bed. 1,781,807; Nov. 18.
Demag Aktiengesellschaft, et al. (See Lang, Anton, assignor.)
Denkert, James R., Johnstown, N. Y. Inflatable playing ball and bladder therefor. 1,782,198; Nov. 18.
De Rozieres, Eugene, Metuchen, N. J. Grinder for pigments and the like. 1,781,808; Nov. 18.
Detroit Michigan Stove Company. (See Maul, Henry C., assignor.)
Detwiler, William F., Tarentum, Pa., assignor to Allegheny Steel Company, Brackenridge, Pa. Rolling mill. 1,781,809; Nov. 18.
Diago, Frederico G., Habana, Cuba. Aeroplane. 1,782,256; Nov. 18.
Diamond, Harry I., Atlanta, Ga. Bias insulating tape. 1,781,896; Nov. 18.
Dicken, George M., Hulmeville, Pa., assignor to John Bromley & Sons, Incorporated. Lace. Des. 82,543; Nov. 18.
Dickinson, Joseph H., Larchmont, N. Y., assignor to The Aeolian Company. Expression device for automatic pianos. 1,782,061; Nov. 18.
Dickley, George A., and E. B. Groff, Long Beach, Calif. Adjustable platen-press chase. 1,781,979; Nov. 18.
Dickman, John A., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Telephone substation equipment. 1,781,916; Nov. 18.
Di Cristina, Anthony F., Los Angeles, Calif. Ring. Des. 82,544; Nov. 18.
Dobbins, Donald C., Champaign, Ill. Transmission mechanism. 1,782,342; Nov. 18.
Dobbins, Donald C., Champaign, Ill. Transmission mechanism. 1,782,343; Nov. 18.
Dodge, Adiel Y., South Bend, Ind. Vacuum-inducing construction. 1,782,199; Nov. 18.
Dodge, Harold C., Portland, and W. H. Beane, Klamath Falls, Oreg. Conveyer. 1,781,750; Nov. 18.
Doherty, Henry L., New York, N. Y. Method and apparatus for distilling solid carbonaceous material. 1,781,871; Nov. 18.
Dominion Cutout Company Limited. (See Tate, James R., assignor.)
Douglas, George R., Detroit, Mich. Rail. 1,782,031; Nov. 18.
Douglas, John F. H., and E. W. Kane, Milwaukee, Wis. Synchronous dynamo-electric machine. 1,782,200; Nov. 18.
Dow Chemical Company, The. (See Barstow, Edwin O., assignor.)
Dow Chemical Company, The. (See Dow, Herbert H., assignor.)
Dow, Herbert H., assignor to The Dow Chemical Company, Midland, Mich. Method of and apparatus for gas analysis. 1,782,032; Nov. 18.
Drake, John L., assignor to Libbey-Owens-Ford Glass Company, Toledo, Ohio. Heating means for sheet-glass apparatus. 1,781,917; Nov. 18.
Driggs, Louis L., jr., Tippecanoe City, Ohio, and H. B. Faber, New York, N. Y. Projectile for signaling or illuminating purposes. 1,782,291; Nov. 18.
Driggs, Louis L., jr., Tippecanoe City, Ohio, and H. B. Faber, New York, N. Y. Flare. 1,782,292; Nov. 18.
Dual Motors Ltd. (See Brenchley, Richard, assignor.)
Dugan, Earl T., Providence, R. I., assignor to Abe Manheimer & Company, Inc., St. Louis, Mo. Shoe ornament or similar article. Des. 82,546; Nov. 18.
Dumler, Charles, Canton, Okla. Revolving display stand. 1,782,257; Nov. 18.
Dunham Company, The. (See Dunham, Ray E., assignor.)
Dunham, Ray E., assignor to The Dunham Company, Berea, Ohio. Roller pulverizer. 1,782,201; Nov. 18.
Dunham, Samuel E., Augusta, Ga. Packing for piston rods and valve stems. 1,782,258; Nov. 18.
Dunkelsberg, Louis, New York, N. Y. Golf tee. 1,781,684; Nov. 18.
Dunsheath, Percy, assignor to W. T. Henley's Telegraph Works Company, Limited, London, England. Application of insulating material in the form of strips to electric conductors. 1,782,381; Nov. 18.
Du Pont, E. I., de Nemours & Company. (See Kern, J. G., and Sala, assignors.)
Du Pont, E. I., de Nemours & Company. (See Pitman, Earle C., assignor.)
Dura Company The. (See Graff, George, assignor.)
Dyer, Frederick C., Toronto, Canada. Ore-concentrating table. 1,781,810; Nov. 18.
Dziacos, Nicolas. (See Franquet, J., and Dziacos.)
Eadie Brothers and Company Limited. (See Whiteley, Wilfred, assignor.)
Earl, Harley J., assignor to General Motors Corporation, Detroit, Mich. Running board. Des. 82,547; Nov. 18.
Earl, Schuyler H., assignor to Gleason Works, Rochester, N. Y. Chuck. 1,781,721; Nov. 18.
Eastwood, Harry F., Merrick, N. Y. Furnace attachment. 1,781,811; Nov. 18.
Econoheet Company. (See Becker, Aloysius W., assignor.)
Eddy, Harold F. (See Keenan, W. F., jr., and Eddy.)
Edgewater Steel Company. (See Bell, Frank B., assignor.)
Edwards, Charles R., Houston, Tex. Pipe-pulling machine. 1,781,918; Nov. 18.
Edwards Manufacturing Company, The. (See Richmond, Samuel, assignor.)
Eggers, Heinrich, Bremen-Weser, Germany, assignor of five per cent to A. Orgovan, five per cent to O. S. Leszay, New York, and five per cent to I. Matusoff, Brooklyn, N. Y. Manufacture of paper from plant fiber. 1,782,382; Nov. 18.
Eggert, John, Leipzig, Richard Schmidt, and Bruno Wendt, Dessau-in-Anhalt, Germany, assignors to Agfa Ansco Corporation, Binghamton, N. Y. Light-sensitive layer and making photographic images. 1,782,259; Nov. 18.

Ehret, Conrad, Oklahoma City, Okla. Thief-hole cover. 1,781,722; Nov. 18.
Elco Tool & Screw Corporation. (See Broberg, Elmer, assignor.)
Electric Signal Company, The. (See Klein, Joseph W., assignor.)
Elektronmetall G. m. b. H. (See Wagner, Karl F., assignor.)
Elgin Butter Tub Company. (See Walstrom, Axel M., assignor.)
Elliott, Albert G. (See Royce, F. H., Rowledge, and Elliott.)
Elliott, Frank M., Detroit, Mich. Snap-fastener stud. 1,782,293; Nov. 18.
Elrod, Henry E. (See Hodges, T. A., and Elrod.)
Emmes, Frank C., and H. J. Knopp, Brussels, Wis. Illuminated flower vase. 1,781,835; Nov. 18.
Endicott Johnson Corporation. (See Steed, Leonard L., assignor.)
Enell, Howard H., Cleveland Heights, Ohio. Irrigating apparatus. 1,781,751; Nov. 18.
Epstein, Barnett, New York, N. Y. Combination pocketbook. 1,782,003; Nov. 18.
Erickson, Ole P., Chicago, Ill. Universal joint for pipe couplings. 1,782,062; Nov. 18.
Everhard, Edgar P. (See Willcox, F. H., and Everhard.)
Eversman, Lewis W., Julesburg, Colo. Beet harvester. 1,781,919; Nov. 18.
Eynon, Thomas M., Philadelphia, Pa. Liquid-level indicator. 1,782,233; Nov. 18.
Faber, Henry B. (See Driggs, L. L., jr., and Faber.)
Fageol, Hollie B., Los Angeles, Calif. Snubber. 1,781,898; Nov. 18.
Farrington, Harry J., Auburndale, Mass. Box for jewelry and the like. 1,781,779; Nov. 18.
Faultless Caster Company. (See Noelting, William H., assignor.)
Fawick, Thomas L., Racine, Wis. Spring shackle. 1,782,091; Nov. 18.
Feinstein, Max. (See Miller, C., and Feinstein.)
Felsenthal, G., & Sons. (See Scully, Walter P., assignor.)
Ferguson Brothers Manufacturing Company. (See Hanley, William, assignor.)
Firex Extinguisher Company, The. (See Wilcox, Frank T., assignor.)
Fischler, Bernard, Brooklyn, N. Y., assignor, by mesne assignments, to The Columbus Dental Manufacturing Co., Columbus, Ohio. Pontic for bridgework. 1,781,899; Nov. 18.
Fisher, Anna M., Los Angeles, Calif. Message holder. 1,781,752; Nov. 18.
Fisher, Edward J., Jackson Heights, assignor to Lavender Line, Inc., New York, N. Y. Savings bank. 1,781,920; Nov. 18.
Fisher, Harry L., and H. A. Winkelmann, Akron, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y. Rubber derivative and making same. 1,782,140; Nov. 18.
Fixman, Benjamin, Bartlesville, Okla. Making motor fuel. 1,781,872; Nov. 18.
Flannery, Bernard M., Seattle, Wash. Automobile parking system. 1,781,753; Nov. 18.
Flatt, Fritz, assignor to the firm Aktiengesellschaft der Maschinenfabriken Escher Wyss & Cie., Zurich, Switzerland. Plant for the generation of high-pressure steam. 1,781,836; Nov. 18.
Florisson, Charles L., Becon-Les-Bruyeres, assignor to Societe de Condensation et d'Applications Mecaniques, Paris, France. Method and apparatus for torpedo-firing operations. 1,782,294; Nov. 18.
Forbes, John S., Philadelphia, Pa., assignor, by mesne assignments, to Yates & Grant, Inc., Detroit, Mich. Magnetic razor-conditioning device. 1,782,033; Nov. 18.
Ford, Ira D., Roseland, Ontario, Canada, assignor to Universal Button Fastening & Button Company, Detroit, Mich. Securing means. 1,782,164; Nov. 18.
Ford, Ira D., Roseland, Ontario, Canada, assignor to Universal Button Fastening & Button Company, Detroit, Mich. Securing means. 1,782,165; Nov. 18.
Ford, Ira D., Roseland, Ontario, Canada, assignor to Universal Button Fastening & Button Co., Detroit, Mich. Securing means. 1,782,166; Nov. 18.
Forstner Chain Corporation. (See Forstner, William, assignor.)
Forstner, William, assignor to Forstner Chain Corporation, Irvington, N. J. Mesh chain and making same. 1,782,004; Nov. 18.
Foster Wheeler Corporation. (See Keenan, Walter F., jr., assignor.)
Foster Wheeler Corporation. (See Keenan, W. F., jr., and Eddy, assignors.)
Fox, Harold E., Pittsburgh, Pa., assignor to Pittsburgh Metal Airplane Company. Shaping hollow bodies. 1,781,723; Nov. 18.
Frank, Pardee H., assignor to The Timken Roller Bearing Company, Canton, Ohio. Shaft inclosure. 1,781,685; Nov. 18.
Frankl, Paul T., New York, N. Y., assignor to Warren Telechron Company. Combined clock casing and dial therefor or similar article. Des. 82,548; Nov. 18.
Franklin Simon & Company. (See Long, Dorothy, assignor.)
Franquet, Jean, Chatillon Sous Bagneux, and N. Dziacos, Paris, France. Removable radiating device for the cooling of spark plugs. 1,782,260; Nov. 18.
Frater, Gordon G., assignor to G. B. Lewis Company, Watertown, Wis. Hive frame. 1,782,202; Nov. 18.
Frease, Hurxthal F. (See Bahney, Robert H., assignor.)
Fredici, Marino. (See Bartoletti, Dante, assignor.)
Freeberg, George. (See Simons, G. A., and Freeberg.)
Fremon, Jules A., and A. S. De Haven, Leeper, Mo., assignors, by mesne assignments, to Pen Desk Set Company. Fountain-pen desk stand. 1,782,109; Nov. 18.
Freydberg Bros., Inc., et al. (See Strauss, Nathan J., assignor.)
Freyn Engineering Company. (See Willcox, F. H., and Everhard, assignors.)
Friede, Samuel M., and F. J. McGuire, Sarasota, Fla. Match-stock-cutting apparatus. 1,781,900; Nov. 18.
Friedman, Albert J., Chicago, Ill. Ring. Des. 82,549; Nov. 18.
Friis-Hansen, Erik, Fort Saskatchewan, Alberta, Canada. Harvesting machine. 1,782,261; Nov. 13.
Fry, Adolf, Essen-Ruhr, Germany, assignor, by mesne assignments, to The Nitralloy Corporation. Electric resistance furnace adapted for hardening by nitrogenization. Re17,874; Nov. 18.
Funk, John G., Cleveland, Ohio. Combination kitchen utensil. 1,781,837; Nov. 18.
Funke, Frank J., La Crosse, Wis. Container. 1,782,120; Nov. 18.
Fusgen, Peter, and W. Kost, Dusseldorf, assignors to Rheinische Metallwaaren- und Maschinenfabrik, Dusseldorf-Derendorf, Germany. Spring arrangement. 1,781,724; Nov. 18.
Gamache, Joseph, Los Angeles, Calif., assignor to Imperial Oscillating Valve Company, Las Vegas, Nev. Oscillating valve. 1,781,901; Nov. 18.
Gas Research Company, The. (See Smith, Harry F., assignor.)
Gates, Joseph W. (See Manning, P. A., and Gates.)
Gay, Frazer W., Newark, N. J., assignor to General Electric Company. Connecting electrical machines with transformer banks. 1,782,262; Nov. 18.
Gay, Frazer W., Newark, N. J., assignor to General Electric Company. Connecting electrical machines with transformer banks by phase changing and voltage changing. 1,782,263; Nov. 18.
Geigy, J. R., S. A. (See Laeuger, Paul, assignor.)
Gender, Paeschke & Frey Company. (See Kempter, Philip, assignor.)
General Aniline Works, Inc. (See Ballauf, F., Muth, and Schmelzer, assignors.)
General Aniline Works, Inc. (See Kahn, M., Schepss, and Zeh, assignors.)
General Aniline Works, Inc. (See Kahn, M., and Thauss, assignors.)
General Electric Company. (See Gay, Frazer W., assignor.)
General Fireproofing Company. (See Gourley, Glenn T., assignor.)
General Mills, Inc. (See Anderson, Helmer, assignor.)
General Motors Corporation. (See Earl, Harley J., assignor.)
General Spring Bumper Corporation. (See Jandus, Herbert S., assignor.)
Gent, Oscar L., Tulsa, Okla. Wall. 1,782,034; Nov. 18.
Getz, Benjamin E., Morton, Ill. Laundry apparatus. 1,781,921; Nov. 18.
Gianera, Peter A., Torrance, Calif. Foot throttle. 1,782,035; Nov. 18.
Gibson, Carter C., assignor to The Two-Way Electric Grinder Company, Hamburg, Iowa. Grinding apparatus. 1,782,063; Nov. 18.
Giesecke, William E., assignor to Charles T. Wilson Company, Inc., New York, N. Y. Machine and process for cracking nuts. 1,781,838; Nov. 18.
Giffen, Florin M., Union, N. J., assignor of Oxweld Acetylene Company. Blowpipe head. Des. 82,551; Nov. 18.
Gilchrist, Benjamin W. (See McCullough, J. F. K., and Gilchrist.)
Gill, Edwin R., jr., Yonkers, N. Y. Manifolding. 1,781,902; Nov. 18.
Gleason Works. (See Earl, Schuyler H., assignor.)
Glintenkamp, William P., Bellaire, assignor to May Manufacturing Co. Inc., New York, N. Y. Bridge member for an optical mounting. Des. 82,550; Nov. 18.
Goldberg, Benjamin D., New York, N. Y. Water heater. Des. 82,552; Nov. 18.
Goldschmidt, Victor M., Oslo, Norway. Manufacture of ceramic products. 1,782,295; Nov. 18.
Goldstein, Adolph O., assignor to Sno-ko Inc., Santa Cruz, Calif. Ice-shaving device. 1,782,296; Nov. 18.
Goodman, Abraham and J., Brooklyn, N. Y. Pinch waver. 1,781,812; Nov. 18.
Goodman, Jacob. (See Goodman, Abraham and J.)
Goodman Manufacturing Company. (See Vodoz, Frederick W., assignor.)
Goodrich, B. F., Company, The. (See Fisher, H. L., and Winkelmann, assignors.)
Goodrich, B. F., Company, The. (See Gray, Harold, assignor.)
Goodridge, Gilbert W., Fairfield, Conn., assignor to The Bryant Electric Company, Bridgeport, Conn. Attachment plug and receptacle. 1,782,297; Nov. 18.
Goodwin, Selden J., San Francisco, Calif. Lock device. 1,781,813; Nov. 18.
Goodyear Redwood Co. (See Lawson, Davenport, assignor.)

Gourley, Glenn T., assignor to General Fireproofing Company, Youngstown, Ohio. Knockdown metal cabinet. 1,782,344; Nov. 18.
Grab, Gustav A., Portland, Oreg. Frame for traversing hoists. 1,781,754; Nov. 18.
Graff, George, assignor to The Duro Company, Toledo, Ohio. Rim for dome lights or the like. Des. 82,553; Nov. 18.
Graham, Walter J., Marietta, Ohio. Glass dish or similar article. Des. 82,554; Nov. 18.
Grain Machinery Company, The. (See Haines, George H., assignor.)
Grande, Albert, assignor to Beau Ideal Food Co., Boston, Mass. Ornamental food package and making the same. 1,782,232; Nov. 18.
Grant, Garnet P., assignor to Autosales Corporation, Long Island City, N. Y. Goods-vending display stand. Des. 82,555; Nov. 18.
Grant, John, Los Angeles, assignor, by mesne assignments, to Byron Jackson Co., West Berkeley, Calif. Well elevator. 1,781,922; Nov. 18.
Graves, Mildred V. (See Graves, Ralph I., assignor.)
Graves, Ralph I., Washington, D. C., assignor to M. V. Graves, Chevy Chase, Md. Vending machine. 1,781,839; Nov. 18.
Gray, Daniel, R. O. Bailey, Oneida, and W. S. Murray, Utica, N. Y., assignors to Oneida Community, Limited, Oneida, N. Y. Articles having tarnish resisting surface and making same. 1,782,092; Nov. 18.
Gray, Harold, Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Heat-plastic composition. 1,782,036; Nov. 18.
Gray Rose, E., Sacramento, Calif. Valve for vacuum-cleaner dust bags. 1,782,064; Nov. 18.
Grebenstein, George W., Newtonville, Mass. Wheel puller. 1,782,037; Nov. 18.
Green, Joseph G., San Francisco, Calif. Display case. Des. 82,556; Nov. 18.
Green, Lee B., Lakewood, assignor to The Borden Company, Warren, Ohio. Centrifugal drier. 1,782,264; Nov. 18.
Greene, Clarence K., Cananea, Mex. Variable-pitch propeller. 1,782,167; Nov. 18.
Greider, Harold W., Plymouth Meeting, Pa., assignor to The Philip Carey Manufacturing Company. Heat-insulating material and process of manufacture. 1,782,383; Nov. 18.
Greider, Harold W., Plymouth Meeting, Pa., assignor to The Philip Carey Manufacturing Company. Porous material and the manufacturing process thereof. 1,782,384; Nov. 18.
Greve, Louis W., assignor to The Cleveland Pneumatic Tool Company, Cleveland, Ohio. Shock absorber. 1,782,141; Nov. 18.
Grier, Ulysses, New York, N. Y. Aeroplane-cloth speaker. 1,781,949; Nov. 18.
Grieve, T., & Co. Limited. (See Grieve, Thomas S., assignor.)
Grieve, Thomas S., Leicester, England. Circular-knitting machine. 1,782,298; Nov. 18.
Grieve, Thomas S., assignor to T. Grieve & Co. Limited, Leicester, England. Yarn-feeding means for circular-knitting machines. 1,782,299; Nov. 18.
Griffin, William M., and C. L. Merriman, assignors to Wayne Company, Fort Wayne, Ind. Casing for a liquid-dispensing apparatus. Des. 82,557; Nov. 18.
Grison, Joseph, New York, N. Y. Massaging device. 1,782,005; Nov. 18.
Groene, William F., assignor to The R. K. Le Blond Machine Tool Company, Cincinnati, Ohio. Lathe-oiling mechanism. 1,781,755; Nov. 18.
Groff, Earl B. (See Dickley, G. A. and Groff.)
Groove Lock Co. Inc. (See Leberman, Harry, assignor.)
Grubbs, Elbert E. (See Hardy, Donovan H., assignor.)
Gunn Furniture Company. (See Gunn, William E., assignor.)
Gunn, William E., assignor to Gunn Furniture Company, Grand Rapids, Mich. Desk. Des. 82,558; Nov. 18.
Gwynn, Albert R., Los Angeles, Calif. Radio log. 1,782,065; Nov. 18.
Haak, Bodo, Neuroessen, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Conversion of salts into globular or similar shaped bodies. 1,782,038; Nov. 18.
Haase, Otto, Dresden-Altstadt, Germany. Steering mechanism for vehicles. 1,782,265; Nov. 18.
Haentjens, Otto, Hazleton, Pa. Centrifugal-pump-priming system. 1,782,345; Nov. 18.
Hagemann, Louis F. (See Pringle, W. A., and Hagemann.)
Haines, George H., Caledonia, assignor to The Grain Machinery Company, Marion, Ohio. Mixing apparatus. Re17,875; Nov. 18.
Hall Arch Company. (See Hall, Arthur F., assignor.)
Hall, Arthur F., Boston, Mass., assignor to Hall Arch Company, Philadelphia, Pa. Refractory structure. 1,781,780; Nov. 18.
Hall, Horace C., and T. F. Bradbury, assignors to Rolls Royce Limited, Derby, England. Aluminum alloy. 1,782,300; Nov. 18.
Hall, Robert F., Schenectady, N. Y. Truck for railway rolling stock. 1,782,093; Nov. 18.
Hallahan, Frederick E. (See Thomas, A., and Hallahan.)
Hammer, Samuel, Brooklyn, N. Y. Meter-entrance switch box. 1,781,686; Nov. 18.
Hammond, C. S., & Company. (See King, Peter J., assignor.)
Hamrol, Felix, assignor, by mesne assignments, to Motor City Sales Company, Detroit, Mich. Automatic loading device. 1,781,873; Nov. 18.
Händle, Karl, Muehlacker, Germany. String-molding press. 1,782,301; Nov. 18.
Handley, George F., Glendale, N. Y., assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 1,781,725; Nov. 18.
Hanley, William, East Orange, N. J., assignor to Ferguson Brothers Manufacturing Company, Hoboken, N. J. Screen. 1,782,203; Nov. 18.
Hannegan, Thomas P., St. Paul, Minn. Crank-case oil heater. 1,781,840; Nov. 18.
Harding, John W., Wheeling, W. Va. Clamp and making the same. 1,782,266; Nov. 18.
Hardy, Donovan H., assignor of one-half to E. E. Grubbs, Manila, P. I. Shoe-lace knotter. 1,782,066; Nov. 18.
Harper, Lurella, et al., administratrices. (See Hilgert, Mathew.)
Harrington, Claude B., et al. (See Chirds, John S., assignor.)
Harris, Arch W. (See Charlesworth, S. I., and Harris.)
Hartzell, Albert, assignor to Boyce-Thompson Institute for Plant Research, Inc., Yonkers, N. Y. Insecticide and method of production. 1,781,841; Nov. 18.
Harvey, Jane C., Miami, Fla. Hat holder. 1,782,302; Nov. 18.
Harwick, Henry K., Darby, Pa. Steam pipe for locomotives. 1,782,346; Nov. 18.
Hassinger, Louis. (See Trageser, A. H., and Hassinger.)
Hassman, Edward, Fleming, Colo. Corn gatherer. 1,782,067; Nov. 18.
Havens, William D., Schenectady, N. Y. Timing indicator for internal-combustion engines. 1,782,142; Nov. 18.
Hawkes, William H., New York, N. Y. Flatiron. 1,782,039; Nov. 18.
Hay, Donald L., et al. (See Mason, Max, assignor.)
Hazell, Joseph W., Washington, D. C. Negative holder. 1,782,068; Nov. 18.
Hazeltine Corporation. (See MacDonald, William A., assignor.)
Hazman, Jacob, assignor to L. Weiner, Providence, R. I. Ornamenting device and making the same. 1,781,687; Nov. 18.
Headrick, James, et al. (See Hillier, Seymour W., assignor.)
Heise, Otto W., Bridgeport, Conn., assignor to Consolidated Ashcroft Hancock Company, Inc., New York, N. Y. Retard gauge. 1,781,814; Nov. 18.
Helmecke, Arthur A., Bay City, Tex. Well tool. 1,781,903; Nov. 18.
Henderson, Joseph M., assignor to Burgess Battery Company, Madison, Wis. Method and apparatus for making dry-cell cores. 1,781,688; Nov. 18.
Henley's, W. T., Telegraph Works Company. (See Dunsheath, Percy, assignor.)
Henning, Henry H., Pymble, near Sydney, New South Wales, Australia. Electric heating apparatus for liquids. 1,782,069; Nov. 18.
Herb, Otto J. (See Thomas, G. F., and Herb.)
Herby, Wilbur R., and R. J. Unger, Dayton, Ohio. Building structure. 1,782,121; Nov. 18.
Hermans, Theodorus H. (See Vermeulen, R., van Urk, and Hermans.)
Herold, Walter F., Upper Montclair, N. J., assignor to The Bassick Company, Bridgeport, Conn. Caster. 1,781,815; Nov. 18.
Heyer, Frederic K., assignor to The Yale & Towne Manufacturing Company, Stamford, Conn. Cylinder lock. 1,782,347; Nov. 18.
Higgins, Harry A., assignor to Long Manufacturing Company, Detroit, Mich. Radiator. 1,781,781; Nov. 18.
Highway Trailer Company. (See Williams, Leroy E., assignor.)
Hilgert, Mathew, deceased, New York, N. Y., L. Harper and H. M. Weiss, administratrices. Tongue for shoes. 1,781,950; Nov. 18.
Hill, Edith A. (See Mayberry, M. E., and Hill.)
Hill, Reuben, Detroit, Mich., assignor to Sargent & Greenleaf, Inc., Rochester, N. Y. Door-control apparatus. 1,782,040; Nov. 18.
Hillier, Seymour W., assignor of one-half to J. Headrick and one-fourth to G. G. Startup, Sultan, Wash. Pulley carrier for guy lines. 1,782,348; Nov. 18.
Hirsch, Joseph, Yonkers, N. Y., assignor to Kops Bros. Inc. Elastic webbing. 1,782,041; Nov. 18.
Hirsch, Sidney, assignor to Photomaton Inc., New York, N. Y. Shutter for photographic cameras. 1,781,923; Nov. 18.
Hodges, Thomas A., Tulare, Calif., and H. E. Elrod, Dallas, Tex. Oil gauge. 1,781,756; Nov. 18.
Hoeh, Albert C. (See Davis, F. M., and Hoeh.)
Hofmann, Otto U., Philadelphia, Pa. Welding and the resultant product. 1,782,234; Nov. 18.
Holden, Albert D., Texon, Tex. Golf tee. 1,781,757; Nov. 18.
Hopkins Corporation. (See Hopkins, Marcus C., assignor.)
Hopkins, Marcus C., Washington, D. C., assignor, by mesne assignments, to Hopkins Corporation, Jersey City, N. J. Electrical movement for loud-speakers. 1,782,094; Nov. 18.
Hopkins, Robert C., Alliance, Ohio. Oil strainer. 1,781,874; Nov. 18.

Hopkins, Robert C., Alliance, Ohio. Pickling tongs. 1,781,875; Nov. 18.
Horton, Allen A., Plymouth, Mich., assignor to Burroughs Adding Machine Company, Detroit, Mich. Controlling mechanism for power-driven calculating machines. 1,781,689; Nov. 18.
How, Harlan W., assignor to Buffalo Foundry & Machine Company, Buffalo, N. Y. Evaporator. 1,782,143; Nov. 18.
Howland, Thomas J., Long Branch, N. J. Apparel. 1,781,842; Nov. 18.
Hudson Motor Car Company. (See Toncray, Millard H., assignor.)
Hull, Ray B., near Dayton, Ohio. Spear pole for removing paper from the rollers of paper-making machines. 1,782,349; Nov. 18.
"Hundertfeuer" Gesellschaft für Moderne Bautentechnik mit beschränkter Haftung. (See Ludwig, Karl, assignor.)
Hupp, Ferdinand M., Clearwater, Nebr. Stock waterer. 1,782,350; Nov. 18.
I. G. Farbenindustrie Aktiengesellschaft. (See Haak, Bodo, assignor.)
Ideal Aeroplane & Supply Co. (See Kramer, William, assignor.)
Imlach, John S., Ottawa, Ontario, Canada. Device for removing wheels or other elements from their bearings. 1,782,303; Nov. 18.
Imperial Oscillating Valve Company. (See Gamache, Joseph, assignor.)
Indianapolis Pump & Tube Company. (See Noblitt, Quintin G., assignor.)
Industrial Spray-Drying Corporation. (See Uhl, Ben F., assignor.)
Ingersoll-Rand Company. (See Smith, William A., jr., assignor.)
Ingersoll, Robert H., assignor to Robt. H. Ingersoll, Inc., New York, N. Y. Razor stropper. 1,782,352; Nov. 18.
Ingersoll, Robert H., deceased, New York, N. Y., C. S. Smith, Lansing, Mich., and F. C. Leubuscher, Essex Fells, N. J., executor, assignors to Robt. H. Ingersoll, Inc., New York, N. Y. Razor-blade stropper. 1,782,351; Nov. 18.
Ingersoll, Robt. H., Inc. (See Ingersoll, Robert H., assignor.)
Innis, Merrill M., and O. S. Ward, Columbus, Ohio. Motor-vehicle brake mechanism. 1,781,843; Nov. 18.
Intertype Corporation. (See Sperry, Samuel E., assignor.)
Isaacson, Abraham, Los Angeles, Calif. Box label. 1,781,980; Nov. 18.
Isom, Edward W. (See Bell, J. E., and Isom.)
Jackman, Arthur J. (See Arensberg, F. L., and Jackman.)
Jacobson, Edward B., Pittsfield, Mass. Device for controlling the voltage of storage batteries. 1,781,844; Nov. 18.
Jaeger, Alphons O., and J. A. Bertsch, St. Louis, Mo., said Jaeger assignor to The Selden Company, Pittsburgh, Pa. Zeolite. 1,782,353; Nov. 18.
James Manufacturing Company. (See Shodron, John G., assignor.)
Jamison, Charles A., Philadelphia, Pa., assignor to Pennsylvania Crusher Company, New York, N. Y. Hammer mill. 1,781,904; Nov. 18.
Jandus, Herbert S., Detroit, Mich., assignor, by mesne assignments, to General Spring Bumper Corporation. Bumper. Des. 82,560; Nov. 18.
Jantzen, Fred, Bronx, N. Y. Furniture shoe. 1,781,951; Nov. 18.
Jeffrey Manufacturing Company, The. (See Levin, Nils D., assignor.)
Jennings, James W., Providence, R. I., assignor to Quaker Silver Company, Attleboro, Mass. Salt and pepper shaker or similar article. Des. 82,559; Nov. 18.
Jensen, Axel V., Copenhagen, Denmark, assignor to F. L. Smidth & Co., New York, N. Y. Rotary cement-burning kiln. 1,781,845; Nov. 18.
Jensen, Frederick H., Seattle, Wash. Pump. 1,782,144; Nov. 18.
Jensen, John E., Toronto, Ontario, assignor to The Allcock-Laight & Westwood Co., Toronto, Canada. Fishing lure. 1,782,204; Nov. 18.
Jensen, William, Pasadena, Calif. Liquid-whipping apparatus. 1,782,095; Nov. 18.
Jerram, Arthur E., Leicester, England. Starting device for motor-driven machines. 1,782,304; Nov. 18.
Jewell, Howard W., Los Angeles, Calif. Distributing conduit. 1,781,726; Nov. 18.
Johnson, Eric E. (See Cross, J. W., and Johnson.)
Johnson, James A., assignor to A. W Stimson, Los Angeles, Calif. Straight-line transmission. 1,781,924; Nov. 18.
Johnson, James A., assignor to A. W. Stimson, Los Angeles, Calif. Transmission mechanism. 1,781,925; Nov. 18.
Johnston, William H., Proctor, Minn. Adjustable liner. 1,782,846; Nov. 18.
Joubert, Lawrence, Williamstown, Ontario, Canada. Collapsible post. 1,782,168; Nov. 18.
Jovino, John B., Brooklyn, N. Y. Cartridge holder. 1,781,816; Nov. 18.
Joyce, Bryan P., Davenport, Iowa. Packing. 1,781,926; Nov. 18.
Kahn, Louis, et al. (See Strauss, Nathan J., assignor.)
Kahn, Myrtil, Cologne, W. Schepss, Leverkusen-on-the-Rhine, and L. Zeh, Wiesdorf-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Aromatic methyleneamino compounds and preparing the same. 1,781,982; Nov. 18.
Kahn, Myrtil, Cologne-Dentz-on-the-Rhine, and A. Thauss, Cologne-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Manufacture of arylalkylethers which are aralkylated in the nucleus and of their sulphonic acids. 1,781,981; Nov. 18.
Kamita, Kiyoshi, Ushigome-Ku, assignor to The Asahi Glass Company Limited, Tokyo, Japan. Preventing the weathering (especially clouding, tarnishing, and lustering) of the surface of glass. 1,782,169; Nov. 18.
Kandt, Rudolf. (See Wieczorek, Emanuel, assignor.)
Kane, Edward W. (See Douglas, J. F. H., and Kane.)
Kay, William E., Elyria, Ohio. Cutting machine. 1,782,305; Nov. 18.
Kayes, Sydney C., assignor to Montello Heel Company, Brockton, Mass. Lift for separately-formed attachable heels. 1,781,847; Nov. 18.
Kearney, Edward J., Wauwatosa, and Joseph B. Armitage, Milwaukee, assignors to Kearney & Trecker Corporation. West Allis, Wis. Machine-tool organization. 1,782,235; Nov. 18.
Kearney & Trecker Corporation. (See Kearney, E. J., and Armitage, assignors.)
Keenan, Walter F., jr., Pelham Manor, N. Y., assignor to Foster Wheeler Corporation, New York, N. Y. Economizer. 1,782,205; Nov. 18.
Keenan, Walter F., jr., Pelham, N. Y., and H. F. Eddy, Jackson, Mich., assignors to Foster Wheeler Corporation, New York, N. Y. Superheater boiler. 1,782,096; Nov. 18.
Keene, William R., Ruleville, Miss. Cotton-picking sack. 1,782,354; Nov. 18.
Keller, Anderw P., Tiffin, Ohio. Clay-molding die. 1,782,236; Nov. 18.
Kelly, John T., Waco, Tex. Joint. 1,781,848; Nov. 18.
Kelsey-Hayes Wheel Corporation. (See Booth, William N., assignor.)
Kelvinator Corporation. (See Spreen, Charles C., assignor.)
Kemp, John B., Ridgewood, N. J., assignor to Clark Loose Leaf Manufacturing Company. Pad holder. 1,781,782; Nov. 18.
Kemp, John B., Ridgewood, N. J., assignor to Clark Loose Leaf Manufacturing Company. Pad holder. 1,781,783; Nov. 18.
Kempter, Philip, assignor to Gender, Paeschke & Frey Company, Wilwaukee, Wis. Combination bread and cake cover. Des. 82,561; Nov. 18.
Kennedy, William A., Oak Park, Ill. Rail anchor. 1,782,170; Nov. 18.
Kenyon, Charles F., assignor to Columbia Narrow Fabric Company, Shannock, R. I. Tensioning device for elastic threads. 1,781,817; Nov. 18.
Kern, Jean G., and C. J. Sala, assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Vat assistant for use in dyeing. 1,782,122; Nov. 18.
Kerr, Harry E., assignor to The Barber Gas Burner Company, Cleveland, Ohio. Gas burner. 1,781,784; Nov. 18.
Kerr, Harry E., assignor to The Barber Gas Burner Company, Cleveland, Ohio. Gas burner. 1,781,785; Nov. 18.
Kidde, Walter, & Company. (See Mapes, Daniel, assignor.)
Kiddie-Rbester Co., The. (See Stoddard, Beatrice M.)
Kiesel, William F., jr., Altoona, Pa. Smoke-arch seal. 1,781,849; Nov. 18.
King, Peter J., Detroit, Mich., assignor to C. S. Hammond & Company, Inc., Brooklyn, N. Y. Cutting machine for globe construction. 1,782,237; Nov. 18.
Kinney, Paul V., Austin, assignor to MacIntyre-Fishback Mfg. Co., Pueblo, Colo. Fruit-packing bag. 1,782,355; Nov. 18.
Kirchhan, Robert O., Milwaukee, Wis. Valve. 1,782,238; Nov. 18.
Kirsten, Joseph A. G., East London, South Africa. Means or apparatus for lifting motor vehicles and the like through the medium of their wheels. 1,782,306; Nov. 18.
Kiwad, Michael, New York, N. Y., assignor to La Belle Specialty Co. Inc. Lamp or similar article. Des. 82,562; Nov. 18.
Kiwad, Michael, New York, N. Y., assignor to La Belle Specialty Co. Inc. Lamp or article of analogous nature. Des. 82,563; Nov. 18.
Kiwad, Michael, New York, N. Y., assignor to La Belle Specialty Co. Inc. Lamp or article of analogous nature. Des. 82,564; Nov. 18.
Kiwad, Michael, New York, N. Y., assignor to La Belle Specialty Co. Inc. Lamp or article of analogous nature. Des. 82,565; Nov. 18.
Klein, Joseph W., assignor to The Electric Signal Company, Limited, Los Angeles, Calif. Signal device. 1,781,927; Nov. 18.
Kleinschmidt, Edward E., assignor, by mesne assignments, to Teletype Corporation, Chicago, Ill. Printing telegraphy. 1,781,905; Nov. 18.
Kliesrath, Victor W. (See Bragg, C. S., and Kliesrath.)
Knechtel, Emerald W., Bell, Calif. Advertising sign and the like. 1,781,727; Nov. 18.
Knopp, Henry J. (See Emmes, F. C., and Knopp.)
Koch, Edwin W., Tremont, Ill. Dice box. 1,781,983; Nov. 18.
Koeppe, Albert F., St. Louis, Mo. Clamping apparatus for shoe heels. 1,781,690; Nov. 18.

Kohr, Robert F., assignor to The Studebaker Corporation, South Bend, Ind. Brake. 1,781,691; Nov. 18.
Konheim, Harvey S. (See Abersheim, W. J., and Konheim.)
Kops Bros. Inc. (See Hirsch, Joseph, assignor.)
Kornsweet, Samuel A., Venice, Calif. Combined cigarette-package holder and match box. 1,782,145; Nov. 18.
Kornsweet, Samuel A., Venice, Calif. Decorated vizor. 1,782,206; Nov. 18.
Kost, Walter. (See Füsgen, P., and Kost.)
Kramer, William, Richmond Hill, assignor to Ideal Aeroplane & Supply Co., Incorporated, New York, N. Y. Toy airplane. 1,782,385; Nov. 18.
Krantz, Hubert. Aachen, Germany. Centrifugal extractor. 1,781,984; Nov. 18.
Krasnow, Philip, Brooklyn, N. Y. Wedding ring. Des. 82,566; Nov. 18.
Kremmling, Otto, Hamersleben, near Oschersleben, Germany. Automatic dough dividing and working machine. 1,782,006; Nov. 18.
Kridel, J., Sons & Co. (See Bader, Fred W., assignor.)
Krueger, Theodore H., New York, N. Y. Package sealer. 1,782,123; Nov. 18.
Kunkel, Victor V., Los Angeles, Calif. Toy bird. 1,782,042; Nov. 18.
Kyle, William D., Milwaukee, assignor to Line Material Company, South Milwaukee, Wis. Fuse box. 1,781,876; Nov. 18.
La Belle Specialty Co. Inc. (See Kiwad, Michael, assignor.)
Ladd, Lillian R., Mobile, Ala. Bridge-game accessory. 1,781,850; Nov. 18.
Laeuger, Paul, assignor to the firm J. R. Geigy, S. A., Basel, Switzerland. Manufacture of acid dyestuffs of the phenonaphthosafranine series. 1,782,356; Nov. 18.
La Gasse, Delphis A., Fall River, Mass. Crate attachment. 1,782,307; Nov. 18.
Lahay, Dell J., Carney, assignor to Universal Playground Equipment Company, Menominee, Mich. Roundabout. 1,782,207; Nov. 18.
Lamoureux, Arthur F., and P. Sellas, Norwich, Conn. Window-shade holder. 1,782,357; Nov. 18.
Lang, Anton, Feldkirchen, near Munich, assignor of one-half to Demag Aktiengesellschaft, Duisburg, and one-half to Maschinenfabrik Fr. Schüle & Co., Feldkirchen, near Munich, Germany. Winch drum. 1,782,358; Nov. 18.
Lang, Gregory, Yuba City, Calif. Bean cutter. 1,781,851; Nov. 18.
Langenberg, Frederick C. (See Solberg, J. C., Langenberg, and Sawtelle.)
Langenberg Hat Company. (See Crenshaw, Erswell V., assignor.)
Larsen, Harry E., New York, N. Y., assignor to E. E. Aliyne, as trustee for a syndicate composed of E. E. Aliyne, R. H. White, and H. E. Larsen. Refrigerator. 1,781,758; Nov. 18.
Lattner, Paul M., Cedar Rapids, Iowa. Heat-conducting means for steam generators or fluid heaters. 1,782,171; Nov. 18.
Lavender Line, Inc. (See Fisher, Edward J., assignor.)
Lawson, Davenport, assignor to Goodyear Redwood Co., Elk, Calif. Logging system. 1,782,043; Nov. 18.
Lawson, Edith C., Geneva, N. Y. Water kettle. Des. 82,567; Nov. 18.
Lazarus, Rex H., Jackson, Mich. Flag holder. 1,782,070; Nov. 18.
Leberman, Harry, assignor to Groove Lock Co. Inc., New York, N. Y. Fastening device for pocketbooks and the like. 1,782,208; Nov. 18.
Le Blond, R. K., Machine Tool Company, The. (See Greene, William F., assignor.)
Ledwinka, Joseph, assignor to Edward G. Budd Manufacturing Company, Philadelphia, Pa. Attaching upholstery in automobile bodies. 1,782,239; Nov. 18.
Legge, James. (See Alderson, Herbert J., assignor.)
Le Gorre, Jean L., York, Pa. Knitting machine. 1,782,007; Nov. 18.
Le Grand, Joseph M., Baltimore, Md., assignor to Carrier Engineering Corporation. Tap. 1,781,985; Nov. 18.
Lesser, Murray, Brooklyn, N. Y. Display box. Des. 82,568; Nov. 18.
Leszay, Otto S., et al. (See Eggers, Heinrich, assignor.)
Leubuscher, Frederic C., et al., executors. (See Ingersoll, Robert H.)
Levin, Harold L., Passaic, N. J., assignor, by mesne assignments, to The Patent and Licensing Corporation, Boston, Mass. Method of and mechanism for coating roofing elements. 1,781,877; Nov. 18.
Levin, Nils D., assignor to The Jeffrey Manufacturing Company, Columbus, Ohio. Cutter bit and carrier therefor. 1,782,172; Nov. 18.
Lewis, Arthur L., Newton Center, assignor to Lewis-Shepard Company, Watertown, Mass. Portable platform. 1,782,146; Nov. 18.
Lewis, Edmund W. (See Wright, F. H., and Lewis.)
Lewis, Frederick H., Chicago, Ill. Shower cabinet. 1,781,692; Nov. 18.
Lewis, G. B., Company. (See Frater, Gordon G., assignor.)
Lewis-Shepard Company. (See Lewis, Arthur L., assignor.)
Libbey-Owens-Ford Glass Company. (See Drake, John L., assignor.)
Lichty, A. N., et al. (See Anglemeyer, Herman B., assignor.)
Liebeck, Harry, Swarthmore, Pa., assignor to Scott Paper Company. Paper-making machine. 1,781,928; Nov. 18.
Lindemann, A. J., & Hoverson Company. (See Lindemann, Walter C., assignor.)
Lindemann, Walter C., assignor to A. J. Lindemann & Hoverson Company, Milwaukee, Wis. Portable hydrocarbon stove. 1,782,008; Nov. 18.
Line Material Company. (See Kyle, William D., assignor.)
Linnhoff, Franz, Eberswalde, Germany, assignor to Ajax Electrothermic Corporation, Ajax Park, Ewing Township, N. J. Electric melting furnace. 1,782,359; Nov. 18.
Litchfield, Isaac W., Boston, Mass., assignor to Bemis Bro. Bag Company. Bag closure. 1,782,240; Nov. 18.
Ljungdahl, Janne F., Stockholm, Sweden. Potato-setting machine. 1,781,986; Nov. 18.
Logan, William B., De Quincy, La., assignor, by mesne assignments, to The Newport Company. Removing color from rosin. 1,782,267; Nov. 18.
London, Jacob M. (See Crawford, G. M., and London.)
Long, Dorothy, assignor to Franklin Simon & Company, Inc., New York, N. Y. Dress. Des. 82,569; Nov. 18.
Long Manufacturing Company. (See Higgins, Harry A., assignor.)
Longnecker, Clyde G., Evanston, Ill. Double-breasted garment. Des. 82,570; Nov. 18.
Lovett, Charles H., assignor to The Cook Pottery Company, Trenton, N. J. Bracket for bathrooms. Des. 82,571; Nov. 18.
Lowe, Ernest G., Hartford, Ill. Mechanism for stretching and drying hides and leather. 1,782,097; Nov. 18.
Luckensmeier, Frederick, Reedsburg, Wis. Pneumatic cleaning tool. 1,782,308; Nov. 18.
Ludwig, Karl, Hamburg, Germany, assignor to "Hundertfeuer" Gesellschaft für Moderne Beautentechnik mit beschränkter Haftung, Hamburg, Germany. Liquid-spraying device. 1,782,309; Nov. 18.
Luse, William J., New York, N. Y. Multiple-screw fuse plug. 1,781,786; Nov. 18.
Lustgarten, Bernard, New York, N. Y. Brassière. 1,782,044; Nov. 18.
Luton, John K., assignor to The Consolidated Iron-Steel Manufacturing Company, Cleveland, Ohio. Boiler stand. Des. 82,572; Nov. 18.
Lyhne, Anker S., Bridgeport, Conn. Lip-stick holder. 1,781,852; Nov. 18.
Lynch, Frank J., assignor to The Sun Tube Corporation, Hillside, N. J. Automatic stop for extruding machines. 1,782,360; Nov. 18.
Lynch, Joseph F., Stockton, Calif. Direction signal for automobiles. 1,781,853; Nov. 18.
MacDonald, William A., Little Neck, N. Y., assignor to Hazeltine Corporation, Jersey City, N. J. Amplification system. 1,781,759; Nov. 18.
MacIldowie, John C., assignor to Asbestos Wood & Shingle Co., Nashua, N. H. Method and apparatus for preparing wet mixtures. 1,781,728; Nov. 18.
MacIntyre-Fishback Mfg. Co. (See Kinney, Paul V., assignor.)
Magnet-Werke G. m. b. H., Eisenach Spezialfabrik für Elektromagnet-Apparate. (See Bing, Julius, assignor.)
Major Equipment Co. (See Major, Roscoe E., assignor.)
Major, Roscoe E., Chicago, Ill., assignor to Major Equipment Co., Inc. Lens-holding lock for reflectors. 1,781,729; Nov. 18.
Majuschak, Joseph, Lyndhurst, N. J. Window ventilator. 1,782,098; Nov. 18.
Manheimer, Abe, & Company. (See Dugan, Earl T., assignor.)
Manning, Paul A., Madison, Ill., and Joseph W. Gates, St. Louis, Mo. Automatic air release for air brakes. 1,782,208; Nov. 18.
Manes, Daniel, Mamaroneck, assignor to Walter Kidde & Company, Inc., New York, N. Y. Release mechanism for fire-extinguishing systems. 1,781,854; Nov. 18.
Marchesini, Peter, Peabody, Mass. Abrading machine. 1,782,269; Nov. 18.
Marciano, Gerardo F., assignor to Universal Optical Corporation, Providence, R. I. Ophthalmic mounting. 1,781,760; Nov. 18.
Marshall, Benjamin H., Wilmette, Ill. Movable balcony for buildings. 1,781,787; Nov. 18.
Marvin, Lester B., Pueblo, Colo. Seat support. 1,782,241; Nov. 18.
Maschinenfabrik Fr. Schüle & Co. et al. (See Lang, Anton, assignor.)
Mason, Carl T., East Orange, assignor to Tiffany Manufacturing Company, Newark, N. J. Pressure gauge. 1,781,818; Nov. 18.
Mason, Max, Chicago, Ill., assignor of thirty per cent to L. B. Slichter, thirty per cent to D. L. Hay, and ten per cent to D. C. Slichter, Madison, Wis. Thermostat and similar control mechanism. 1,782,045; Nov. 18.
Matschei, Curt, Wettingen, Switzerland. Front-wheel driving joint with steering swivel for motor vehicles. 1,782,361; Nov. 18.
Matt, Walter J., assignor to Utica Cutlery Company, Utica, N. Y. Knife handle or similar article. Des. 82,573; Nov. 18.
Matt, Walter J., assignor to Utica Cutlery Company, Utica, N. Y. Knife handle or similar article. Des. 82,574; Nov. 18.
Mattson, Alex. (See Rauha, J. M., jr., and Mattson.)
Matusoff, Irving, et al. (See Eggers, Heinrich, assignor.)

Matzka, Wincenty, London, England. Production of a ferment. 1,781,788; Nov. 18.
Mauck, Victor, Marion, Pa. Water heater. 1,782,209; Nov. 18.
Maul, Henry C., assignor to Detroit Michigan Stove Company, Detroit, Mich. Combined heater casing and fire box. Des. 82,575; Nov. 18.
Maurer, Oscar V. (See Rittenhouse, M. J., and Maurer.)
Maxson, Louis A., Claremont, N. H., assignor to Sullivan Machinery Company. Mining machine. 1,781,906; Nov. 18.
May Manufacturing Co. Inc. (See Glintenkamp, William P., assignor.)
Mayberry, Mary E., Burlingame, and E. A. Hill, San Francisco, Calif. Rhythmic chart for child orchestration. 1,782,046; Nov. 18.
Mayer, Fred W., Chicago, Ill. Torque-controlled gear-changing mechanism. 1,781,761; Nov. 18.
McArthur, Arthur R., deceased, Gary, Ind., M. L. McArthur, executrix. 1,782,362; Nov. 18.
McArthur, Mattie L., executrix. (See McArthur, Arthur R.)
McCain, Wes W., Oak Park, assignor to Blue Valley Creamery Company, Chicago, Ill. Perforating device. 1,781,819; Nov. 18.
McCord Radiator & Mfg. Co. (See Bailey, Claude B., assignor.)
McCullough, John F. K., and B. W. Gilchrist, assignors to Ternstedt Manufacturing Company, Detroit, Mich. Chromium plating. 1,781,789; Nov. 18.
McDermid, John, Ennerdale, England. Antisiphonic liquid-seal trap. 1,781,683; Nov. 18.
McGee, William R. (See Chapper, F. E., and McGee.)
McGinnis, John A., assignor to Wheeling Stamping Company, Wheeling, W. Va. Slug-casting machine. 1,782,047; Nov. 18.
McGuinness, Frank J., Webster, Mass. Door-latch striker. 1,782,071; Nov. 18.
McGuire, Frank J. (See Friede, S. M., and McGuire.)
McGuire, Ottis M., Bridgeport, Nebr. Beet harvester. 1,781,952; Nov. 18.
McKee, Neal T., Bronxville, assignor to The Superheater Company, New York, N. Y. Exhaust-steam injector. 1,782,009; Nov. 18.
McKenzie, William M., Glenbrook, Conn. Separator. 1,781,790; Nov. 18.
McKesson & Robbins, Incorporated. (See Clement, Donald B., assignor.)
McKinstry, Frank, Nashville, Tenn. System for preventing the formation of ice on aircraft. 1,782,072; Nov. 18.
McNerney, Bernard L., Minneapolis, Minn. Electric motor. 1,782,242; Nov. 18.
McQueston, Frank S., assignor to Baxter D. Whitney & Son, Inc., Winchendon, Mass. Cutter spindle. 1,782,243; Nov. 18.
Means, Dwight R., Madena County, Ohio, assignor to Pittsburgh Plate Glass Company. Treating ammoniacal liquors. 1,781,987; Nov. 18.
Mechanical Rubber Company, The. (See Teague, Merwyn C., assignor.)
Mechlovits, Bernat, New York, N. Y. Brooch or similar article. Des. 82,576; Nov. 18.
Mechlovits, Bernat, New York, N. Y. Brooch or similar article. Des. 82,577; Nov. 18.
Mendenhall, William S., Aberdeen, Wash. Seat construction. 1,782,270; Nov. 18.
Merco Nordstrom Valve Company. (See Nordstrom, Sven J., assignor.)
Merriman, Carroll L. (See Griffin, W. M., and Merriman.)
Merryweather, Thomas, Akron, Ohio. Metal-arch member for openings. 1,782,147; Nov. 18.
Metal Hose & Tubing Co. (See Wallace, Archibald L., assignor.)
Meuer, George J. (See Stevens, W. C., and Meuer.)
Meuser, Ludwig. (See Adams, H. S., and Meuser.)
Mewes, Karl E. R., Dortmund, Germany. Liquefying and separating gas mixtures. 1,781,693; Nov. 18.
Meyer, Harold W., Brooklyn, N. Y. Fishhook spreader and making the same. 1,782,010; Nov. 18.
Meyer, Leo J., assignor of one-half to J. A. Schuler, St. Louis, Mo. Feeding mechanism for nut-cracking machines and the like. 1,782,124; Nov. 18.
Meyer, Louis, Milford, Ill. Door-operating mechanism. 1,781,694; Nov. 18.
Meyer, Walter G. (See Schneider, Michael J. N., assignor.)
Meyer, William. (See Norden, Oliver, assignor.)
Michelin & Cie. (See Bourdon, Pierre M., assignor.)
Michell, Philip A., New Brighton, N. Y., assignor to Brandes Laboratories, Inc., Newark, N. J. Acoustic device. 1,781,988; Nov. 18.
Michelman, Harry, Brooklyn, N. Y. Fire-alarm device. 1,781,855; Nov. 18.
Mifflin, B., Hood Brick Company. (See Thomas, John W., assignor.)
Milk Bottle Crate Company. (See Stoddard, Robert, assignor.)
Miller, Arthur E. (See Salisbury, H. M., and Miller.)
Miller, Charles, Long Island City, and M. Feinstein, Corona, N. Y. Shoe counter. 1,781,953; Nov. 18.
Miller, Constantine G., Chicago, Ill. Electroplating machine. 1,781,791; Nov. 18.
Miller, Rudolph, assignor, by mesne assignments, to Bohn Aluminum & Brass Corporation, Detroit, Mich. Radiator-cap construction. 1,781,878; Nov. 18.
Milligan, Charles H. (See Bradner, D. B., and Milligan.)
Mills, Chester B., assignor, by mesne assignments, to Sperry Gyroscope Company, Inc., Brooklyn, N. Y. Gyrocompass reversing contact. 1,782,048; Nov. 18.
Miner, W. H., Inc. (See O'Connor, John F., assignor.)
Mitchell-Henry, Lorenzo, London, England. Reel for fishing rods and the like. 1,781,695; Nov. 18.
Monroe, Andrew J. and G. W., Arthur, Ill. Lifting attachment for road graders. 1,782,363; Nov. 18.
Monroe, George W. (See Monroe, Andrew J., and G. W.)
Montello Heel Company. (See Kayes, Sydney C., assignor.)
Moore, Raymond G., assignor to The Bassick Company, Bridgeport, Conn. Hood catch. 1,781,820; Nov. 18.
Moore, Raymond G., and Arthur Claud-Mantle, assignors to The Bassick Company, Bridgeport, Conn. Cabinet latch. 1,782,386; Nov. 18.
Morris, Lelelia, Dallas, Tex. Composition of matter. 1,781,730; Nov. 18.
Moser, Frederick C., East Brook, Pa. Cylinder honing device. 1,781,856; Nov. 18.
Motor City Sales Company. (See Hamrol, Felix, assignor.)
Motor Products Corporation. (See Pritchard, William S., assignor.)
Murphy, Edwin J., Philadelphia, Pa. Variable-speed control for electric motors. 1,781,762; Nov. 18.
Murphy, P. H., Company. (See Bonsall, Charles D., assignor.)
Murray, William S. (See Gray, D., Bailey, and Murray.)
Musher, Albert, Washington, D. C. Preserving emulsions. 1,782,011; Nov. 18.
Muth, Friedrich. (See Ballauf, F., Muth, and Schmelzer.)
Myers, Harry L. (See Wolfe, H. H., and Myers.)
Nagel-Chase Manufacturing Company, The. (See Schultz, Edward, assignor.)
Nagel, Theodore, Brooklyn, N. Y. Briquette oven. 1,782,244; Nov. 18.
Nashua Sure-Hold Company. (See Carter, Winthrop L., assignor.)
Nation, John, Highmore, S. Dak. Wrench. 1,782,364; Nov. 18.
National Tube Company. (See Robinoff, B. S., Paine, and Quillen, assignors.)
Naugatuck Chemical Company, The. (See Adams, H. S., and Meuser, assignors.)
Nease, Roy A., et al. (See Childs, John S., assignor.)
Neely, James F. (See Payne, Glade W., assignor.)
Nelson, Mary D., Minneapolis, Minn. Undergarment for women. 1,781,929; Nov. 18.
Nelson, Gordon W., and A. F. Ceres, jr., Philadelphia, Pa. Lip-stick holder. 1,782,365; Nov. 18.
Newcomb, Edward C., and D. G. Roos, assignors to The Studebaker Corporation, South Bend, Ind. Internal-combustion engine. 1,781,696; Nov. 18.
New Idea Spreader Company, The. (See Synck, Henry, assignor.)
Newlin, Charles O., Seattle, Wash. Spray brush. 1,781,763; Nov. 18.
Newport Company, The. (See Logan, William B., assignor.)
New York Air Brake Company, The. (See Campbell, Charles A., assignor.)
Nicholson, Leonard H., Chula Vista, Calif. Automobile door or window screen. 1,782,173; Nov. 18.
Nilson, John L., and J. F. Prince, Chicago, Ill. Windshield-cleaner-operating mechanism. 1,781,697; Nov. 18.
Nitralloy Corporation, The. (See Fry, Adolf, assignor.)
Noblitt, Quintin G., assignor to Indianapolis Pump & Tube Company, Indianapolis, Ind. Automobile heater. 1,781,731; Nov. 18.
Noelting, William H., assignor to Faultless Caster Company, Evansville, Ind. Detachable top-bearing caster and socket. 1,781,732; Nov. 18.
Noma Electric Corporation. (See Sadacca, Albert, assignor.)
Norden, Oliver, assignor to W. Meyer, Chicago, Ill. Hair drier. 1,781,879; Nov. 18.
Nordstrom, Sven J., assignor to Merco Nordstrom Valve Company, San Francisco, Calif. Lubricated plug valve. 1,781,821; Nov. 18.
Norwich Pharmacal Company, The. (See Copley, D. M., and Snyder, assignors.)
Nose, Toichi, Kamakura Machi, Kanagawa Ken, Japan. Aeroplane. 1,782,210; Nov. 18.
Nuetzi, Julius. (See Suter, E., and Nuetzi.)
Oblander, Herbert, assignor to Bunte Brothers, Chicago, Ill. Bottle or similar container. Des. 82,578; Nov. 18.
O'Brien, Denis F., East Orange, N. J. Valve-inserting method and mechanism. 1,781,698; Nov. 18.
O'Connor, John F., assignor to W. H. Miner, Inc., Chicago, Ill. Car construction. 1,782,211; Nov. 18.
O'Hagan, Bernard E., assignor to The Union Switch & Signal Company, Swissvale, Pa. Motor-control apparatus. 1,781,880; Nov. 18.
Olsen, Oscar B. (See Quast, A. H., and Olsen.)
Olson, Carl G., assignor to Shakeproof Lock Washer Company, Chicago, Ill. Lock washer. 1,782,387; Nov. 18.
Oneida Community, Limited. (See Gray, D., Bailey, and Murray, assignors.)

Oneida Community, Limited. (See Solbert, J. C., Langenberg, and Sawtelle, assignors.)
Orgovan, Alexander, et al. (See Eggers, Heinrich, assignor.)
Orr, Paul L., Wilkinsburg, Pa. Electrode holder. 1,781,930; Nov. 18.
Osgood, Louis A., Hartford, Conn., assignor to Toledo Scale Company, Toledo, Ohio. Weighing scale. 1,782,125; Nov. 18.
Overmyer, Clyde H., and G. J., Hartford City, Ind. Pull knob. Des. 82,579; Nov. 18.
Overmyer, Clyde H. and G. J., Hartford City, Ind. Pull handle. Des. 82,580; Nov. 18.
Overmyer, George J. (See Overmyer, Clyde H. and G. J.)
Overstreet, John T., San Antonio, Tex. Well-pumping apparatus. 1,782,310; Nov. 18.
Owen, William A., Akron, Ohio. Heel for footwear. 1,781,931; Nov. 18.
Owens, Freeman H., New York, N. Y. Talking-picture apparatus. Re17,876; Nov. 18.
Oxweld Acetylene Company. (See Giffen, Florin M., assignor.)
Paine, Sumner E. (See Robinoff, B. S., Paine, and Quillen.)
Palmer, Walter, Chester, Pa., assignor to Amdyco Corporation, New York, N. Y. Method of and apparatus for producing fire-extinguishing foam. 1,782,366; Nov. 18.
Panes, Isidore, New York, N. Y. Corset. 1,782,311; Nov. 18.
Pankey, Amos V., Harrisonburg, Va. Refrigerator. Re17,872; Nov. 18.
Pape, Byron W., Salt Lake City, Utah. Apparatus for screening, sorting, and handling material. 1,781,857; Nov. 18.
Parker, Clara B., executrix. (See Parker, George D.)
Parker, George D., deceased, Riverside, Calif., C. B. Parker, executrix. Apparatus for well drilling. 1,781,989; Nov. 18.
Parker, Walter H., Beaver, Pa., assignor, by mesne assignments, to The Wayne Pump Company, Baltimore, Md. Liquid-dispensing apparatus. 1,781,881; Nov. 18.
Parkhill, Frederic W., Kansas City, Mo. Interchangeable appliance for mixing, beating, etc. 1,782,245; Nov. 18.
Parmley, Walter C., Upper Montclair, N. J. Reenforced concrete pipe. 1,781,699; Nov. 18.
Pasternak, Martin, New York, N. Y., assignor to Radio Corporation of America. Radiocabinet. Des. 82,583; Nov. 18.
Patent and Licensing Corporation, The. (See Levin, Harold L., assignor.)
Patterson, John F., assignor to The Warren City Tank & Boiler Company, Warren, Ohio. Water roof tank. 1,782,174; Nov. 18.
Paul, Alice O., et al. (See Paul, Leonard, B., assignor.)
Paul, Leonard B., assignor of one-third to A. O. Paul, Williamstown, W. Va., and two-thirds to L. G. Zachos, Chicago, Ill. Sliding and swinging window. 1,781,858; Nov. 18.
Payne, Frank, Biltmore, N. C. Railroad-crossing signal. 1,782,312; Nov. 18.
Payne, Glade W., Vergil, assignor of one-half to J. F. Neely, Emporia, Kans. Hoisting machine. 1,781,700; Nov. 18.
Payne, Walter B. (See Tiefel, C. G., and Payne.)
Peale-Davis Company. (See Davis, Kenneth, assignor.)
Peale, Rembrandt, et al., trustees. (See Davis, Kenneth, assignor.)
Pearmain, John D., Scarborough, N. Y. Illuminated sign. 1,782,175; Nov. 18.
Pen Desk Set Company. (See Fremon, J. A., and De Haven, assignors.)
Pen Desk Set Company. (See Wahl, John C., assignor.)
Penn Art Steel Works. (See Willson, Job H., assignor.)
Pennington, Elonza A., Arkadelphia, Ark. Air-storage tank. 1,782,271; Nov. 18.
Pennsylvania Crusher Company. (See Borton, George W., assignor.)
Pennsylvania Crusher Company. (See Jamison, Charles A., assignor.)
Peperkorn, Heinrich, assignor to Schmidt'sche Heissdampf-Gesellschaft m. b. H., Cassel-Wilhelmshohe, Germany. Indirectly-heated steam generator. 1,781,764; Nov. 18.
Perla, Samuel, Brooklyn, N. Y. Lamp. Des. 82,584; Nov. 18.
Peters, Frederick J., Babylon, N. Y. Plate or the like. Des. 82,581; Nov. 18.
Petersen, Hugo, Berlin-Steglitz, Germany. Manufacture of sulphuric acid. 1,781,954; Nov. 18.
Petersen, Thorvald, assignor to Reed Manufacturing Company, Erie, Pa. Diestock. 1,781,932; Nov. 18.
Phillips, Morris G. P., London, England. Machine for removing flags and other adhering leaf from the stalks of tobacco leaves. 1,781,701; Nov. 18.
Photomaton Inc. (See Hirsch, Sidley, assignor.)
Piché, Frank W., Detroit, Mich. Brake mechanism. 1,782,176; Nov. 18.
Pierce, Frederic E., New York, N. Y. Manufacturing high-grade zinc oxide. 1,781,702; Nov. 18.
Pierce, James B., jr., assignor to Barium Reduction Corporation, Charleston, W. Va. Making hydrogen peroxide. 1,781,859; Nov. 18.
Pine Waste Products, Inc. (See Wallace, Joseph H., assignor.)
Piquerez, Emile, St. Cloud, assignor to Société Anonyme des Etablissements Técalémit, Paris, France. Pump-outflow-regulating device. 1,782,073; Nov. 18.
Pitman, Earle C., Princeton, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Preventing spontaneous combustion. 1,782,126; Nov. 18.
Pittsburgh Metal Airplane Company. (See Fox, Harold E., assignor.)
Pittsburgh Plate Glass Company. (See Means, Dwight R., assignor.)
Pittsburgh Screw and Bolt Corporation. (See Shrum, Peter J., assignor.)
Pleasant, Herman E., Mansfield, Ohio, assignor to Westinghouse Electric and Manufacturing Company. Refrigerator cabinet. Des. 82,582; Nov. 18.
Poehls, Alfred F., Algoma, Wis. Adjustable base for automobile jacks. 1,782,313; Nov. 18.
Pohlson, Carl V., Pawtucket, R. I. Combined brush and hat holder. 1,781,822; Nov. 18.
Poirmeur, Louis I., Meru, France. Rotary pump of the oscillating-blade type. 1,782,314; Nov. 18.
Pondelicek, Jerry J., assignor, by mesne assignments, to Acme Motion Picture Projector Company, Chicago, Ill. Cutting machine. 1,781,703; Nov. 18.
Pormann, Robert, Union City, N. J. Attachment for looms. 1,782,099; Nov. 18.
Porter, William J., Spokane, Wash. Automobile disposal and withdrawal structure. 1,781,955; Nov. 18.
Powell, John, Salop, England. Water tap. 1,782,315; Nov. 18.
Power, Lewis R., Lawton, Mich. Lathe center. 1,782,272; Nov. 18.
Powers, Milton A., New York, N. Y., assignor, by mesne assignments, to The Timken-Detroit Company, Detroit, Mich. Burner for producing heat from liquid fuel. 1,782,049; Nov. 18.
Powers, Milton A., New York, N. Y., assignor, by mesne assignments, to The Timken-Detroit Company, Detroit, Mich. Liquid fuel heating. 1,782,050; Nov. 18.
Prince, John F. (See Nilson, J. L., and Prince.)
Pringle, William A., and L. F. Hagemann, Niagara Falls, N. Y., assignors to American Sales Book Company, Limited, Toronto, Canada. Manifolding device. 1,782,388; Nov. 18.
Pritchard, William S., assignor to Motor Products Corporation, Detroit, Mich. Weather strip. 1,781,882; Nov. 18.
Prosperity Company, The. (See Davis, Ernest, assignor.)
Prosperity Company, The. (See Schremp, E. J., and Braun, assignors.)
Pullen, Rodney S., assignor to Pullenlite Company, Philadelphia, Pa. Match packet. 1,782,074; Nov. 18.
Pullenlite Company. (See Pullen, Rodney S., assignor.)
Quaker Silver Company. (See Jennings, James W., assignor.)
Quality Hardware & Machine Corporation. (See Akers, Axel, assignor.)
Quast, Albert H., and O. B. Olsen, Chicago, Ill. Wedding ring. Des. 82,585; Nov. 18.
Quick, Herbert. (See Cooper, W. R., and Quick.)
Quillen, Wrignol E. (See Robinoff, B. S., Paine, and Quillen.)
R. & G. Company. (See Anderson, Louis A., assignor.)
Radiant Lighting Fixture Co. Inc. (See Bohl, Hugo, assignor.)
Radio Corporation of America. (See Cady, Walter G., assignor.)
Radio Corporation of America. (See Pasternak, Martin, assignor.)
Radio Corporation of America. (See Vermeulen, R., Van Urk, and Hermans, assignors.)
Rattigan, Edwin D., Philadelphia, Pa. Hydrant. 1,782,012; Nov. 18.
Rauba, John M., jr., and A. Mattson, Owen, Wis. Rotary valve. 1,782,389; Nov. 18.
Recker, John, Newark, N. J. Keyless lock. 1,782,212; Nov. 18.
Reed Manufacturing Company. (See Petersen, Thorvald, assignor.)
Reed Manufacturing Company. (See Stoeltzlen, Leo V., assignor.)
Reed Propeller Co., The. (See Reed, Sylvanus A., assignor.)
Reed, Sylvanus A., New York, N. Y., assignor to The Reed Propeller Co. Inc. Aeronautical propeller. 1,781,883; Nov. 18.
Reese, Edward F., South St. Paul, Minn. Combination luggage carrier and collapsible boat. 1,781,860; Nov. 18.
Reo Motor Car Company. (See Wells, Walter W., assignor.)
Resisto Manufacturing Company. (See Stranss, Nathan J.)
Reynolds, Robert A., Detroit, Mich. Internal-combustion engine. 1,781,704; Nov. 18.
Rheinische Metallwaaren-und Maschinenfabrik. (See Flisgen, P. and Kost, assignors.)
Richards, David K., Hilo, Hawaii. Sugar drier. 1,782,177; Nov. 18.
Richmond, Samuel, Batavia, assignor to The Edwards Manufacturing Company, Cincinnati, Ohio. Shoe-shank support. 1,782,178; Nov. 18.
Richter, George A., assignor to Brown Company, Berlin, N. H. Cyclic process of fiber liberation. 1,781,733; Nov. 18.

Ridgway, Ellis B., et al. (See Ridgway, William H., assignor.)
Ridgway, William H., et al. (See Ridgway, William H., assignor.)
Ridgway, William H., assignor to W. H. Ridgway and E. B. Ridgway, Coatesville, Pa. Overflow valve for steam hydraulic systems. 1,782,367; Nov. 18.
Riemann, Otto, Wellingsbuttel, Germany. Press. 1,782,273; Nov. 18.
Rimmelspacher, Joseph, Newark, N. J. Packing gasket. 1,782,014; Nov. 18.
Rittenhouse, Myron J., Cleveland, and O. V. Maurer, East Cleveland, Ohio; said Maurer assignor to said Rittenhouse. Radio reception apparatus. 1,781,861; Nov. 18.
Robbins, Frank D., assignor of one-half to W. A. Bond, Newberg, Oreg. Concrete mixer. 1,781,823; Nov. 18.
Roberts, Robert E. (See Austin, Charles J., assignor.)
Robinoff, Boris S., Pittsburgh, S. E. Paine, and W. E. Quillen, McKeesport, Pa., assignors to National Tube Company, Welding. 1,782,316; Nov. 18.
Rodler, Fred, Cincinnati, Ohio. Centrifugal extractor. 1,782,179; Nov. 18.
Rodman, Thomas H., New York, N. Y., assignor, by mesne assignments, to Cutler-Hammer Inc., Milwaukee, Wis. Motor controller. 1,781,792; Nov. 18.
Rogers, Horace K., Chicago, Ill., assignor to Sinclair Refining Company, New York, N. Y. Cracking hydrocarbons. 1,781,884; Nov. 18.
Rohrbach, Adolf, Berlin-Wilmersdorf, Germany, assignor to Rohrbach Patents Corporation. Arrangement of engines on aircraft. 1,782,013; Nov. 18.
Rohrbach Patents Corporation. (See Rohrbach, Adolf, assignor.)
Rolls-Royce Limited. (See Hall, H. C., and Bradbury, assignors.)
Rolls-Royce Limited. (See Royce, Frederick H., assignor.)
Rolston, Walter F., assignor of one-half to Burson Knitting Company, Rockford, Ill. Suture. 1,781,933; Nov. 18.
Rombach, John C. (See Bell, L. D., and Rombach.)
Roos, Delmar G. (See Newcomb, E. C., and Roos.)
Roos, Delmar G., assignor to The Studebaker Corporation, South Bend, Ind. Steering mechanism. 1,781,705; Nov. 18.
Ross, Oscar A., New York, N. Y. Synchronized machine gun. 1,782,148; Nov. 18.
Roth, Robert G., Minneapolis, Minn. Hand-rake-cleaning attachment. 1,781,734; Nov. 18.
Rowledge, Arthur J. (See Royce, F. H., Rowledge, and Elliott.)
Royal Typewriter Company. (See Degener, Gustave O., assignor.)
Royal Typewriter Company. (See Handley, George F., assignor.)
Royce, Frederick H., West Wittering, near Chichester, assignor to Rolls Royce Limited, Derby, England. Electrical turning gear for starting internal-combustion engines. 1,782,318; Nov. 18.
Royce, Frederick H., West Wittering, near Chicester, A. J. Rowledge, Ellerslie, Derby, and A. G. Elliott, West Wittering, near Chichester, England. Cylinder of internal-combustion engines. 1,782,317; Nov. 18.
Ruau, Félix F., Deptford, London, England. Cigarette-making machinery. 1,782,180; Nov. 18.
Rügamer, Andreas, Pforzheim, Germany. Hygienic dental bur-cleaning apparatus. 1,781,956; Nov. 18.
Ruifs, Edward A., New York, N. Y. Coin holder. Des. 82,586; Nov. 18.
Ruppel, Frederick C., Grand Rapids, assignor, by mesne assignments, to Checker Cab Manufacturing Corporation, Kalamazoo, Mich. Latch handle. Des. 82,595; Nov. 18.
Ruskamp, Joseph, Dodge, Nebr. Stock waterer. 1,782,075; Nov. 18.
Ryan, Scully & Company. (See Beach, George F., assignor.)
Sachs, William B., Jamaica, N. Y. Flash light. 1,782,015; Nov. 18.
Sadacca, Albert, assignor to Noma Electric Corporation, New York, N. Y. Electric-lighting device. 1,781,885; Nov. 18.
Safford, Henry T., sr., El Paso, Tex. Device for pressing soap. 1,782,076; Nov. 18.
Sahner, Emil, Sackingen, Baden, Germany. Clock-actuated calendar. 1,782,274; Nov. 18.
Sala, Charles J. (See Kern, J. G., and Sala.)
Salberg, Karl. (See Crichton, James V., assignor.)
Salisbury, Hervey M., Walnut Grove, and A. E. Miller, Sacramento, Calif. Stabilizer for aeroplanes. 1,782,149; Nov. 18.
Saltzman, Joseph G. (See Atticks, H. J., and Saltzman.)
Sanderson, Arthur N., and F. H. Dana, West Springfield, and K. G. Vogel, Mittineague, Mass. Window fastener. 1,782,016; Nov. 18.
Sargent & Greenleaf, Inc. (See Hill, Reuben, assignor.)
Sawtelle, Edmund M. (See Solberg, J. C., Langenberg, and Sawtelle.)
Saylor, William P., Pittsburgh, Pa. Fastener. 1,782,275; Nov. 18.
Scheibe, Otto, Maquoketa, Iowa. Toy windmill. Des. 82,587; Nov. 18.
Scheibel, Charles, assignor to Crowe Name Plate & Manufacturing Co., Chicago, Ill. Radio tuning mechanism. 1,782,368; Nov. 18.
Schellenger, Newton C., assignor to Chicago Telephone Supply Co., Elkhart, Ind. Tube socket. 1,781,957; Nov. 18.
Schellenger, Newton C., assignor to Chicago Telephone Supply Co., Elkhart, Ind. Automatic plug. 1,781,958; Nov. 18.
Schellenger, Newton C., assignor to Chicago Telephone Supply Company, Elkhart, Ind. Rheostat. 1,781,959; Nov. 18.
Schepss, Wilhelm. (See Kahn, M., Schepss, and Zeh.)
Schleicher, Manifred, Berlin-Charlottenburg, and P. Carlo, Berlin-Grunewald, assignors to Siemens & Halske Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Relay. 1,782,100; Nov. 18.
Schmelzer, Albert. (See Ballauf, F., Muth, and Schmelzer.
Schmidt, Richard. (See Eggert, J., Schmidt, and Wendt.)
Schmidt'sche Heissdampf G. m. b. H. (See Davin, George H., assignor.)
Schmidt'sche Heissdampf-Gesellschaft m. b. H. (See Peperkorn, Heinrich, assignor.)
Schnuser, Oscar, Milbank, S. Dak. Lamp gauge. 1,781,862; Nov. 18.
Schnyder, Michael J. N., Winterhaven, Fla., assignor to Walter G. Meyer, Milwaukee, Wis. Flashing. 1,782,246; Nov. 18.
Schnell, William, assignor to Ternstedt Manufacturing Company, Detroit, Mich. Radiator cap or similar article for an automotive vehicle. Des. 82,588; Nov. 18.
Schoedinger, F. O. (See Conrad, Isiah, assignor.)
Schoultz, Albert R., Joliet, Ill. Radiator trap. 1,782,319; Nov. 18.
Schremp, Edward J., Beechhurst, and P. N. Braun, assignors, by mesne assignments, to The Prosperity Company, Inc., Syracuse, N. Y. Garment or ironing press. 1,782,101; Nov. 18.
Schuler, John A. (See Meyer, Leo J., assignor.)
Schultz, Edward, assignor to The Nagel-Chase Manufacturing Company, Chicago, Ill. Combined fan and pulley. 1,781,960; Nov. 18.
Schumacher, Ernst, Frankfort-on-the-Main, Germany. Generator or producer. 1,781,765; Nov. 18.
Scott-Paine, Hubert, Southampton, England. Hull of water craft. 1,782,320; Nov. 18.
Scott Paper Company. (See Liebeck, Harry, assignor.)
Scott, Roy W., Cleveland, Ohio. Apparatus for measuring the vital capacity of the lungs. 1,781,735; Nov. 18.
Scott & Williams, Incorporated. (See Williams, L. N. D., and Swinglehurst, assignors.)
Scribner, William L., assignor to The Timken Roller Bearing Company, Canton, Ohio. Self-aligning roller bearing. 1,781,886; Nov. 18.
Scully, Walter P., assignor to G. Felsenthal & Sons, Chicago, Ill. Coin savings bank. 1,782,213; Nov. 18.
Seccombe, Pauline S. (See Wyatt, Clayton F., assignor.)
Seifarth, Ernst T., Leipzig, Germany. Bedcover frame. 1,782,276; Nov. 18.
Selden Company, The. (See Jaeger, A. O., assignor, and Bertsch.)
Sellas, Peter. (See Lamoureux, A. F., and Sellas.)
Serre, Eugene E. C., Paris, France. Reaping machine. 1,782,321; Nov. 18.
Shakeproof Lock Washer Company. (See Ohlson, Carl G., assignor.)
Shanks, William, Brooklyn, and W. B. Cater, Douglaston, N. Y., assignors to Vulcan Rail and Construction Company, Maspeth, Long Island, N. Y. Rail fitting. 1,782,017; Nov. 18.
Sharp, Fred H., Selina, Kans. Apparatus for resizing pistons. 1,782,077; Nov. 18.
Shaw, Claude C., Camden, S. C. Warp-beam lock. 1,781,736; Nov. 18.
Sheldon, Waldo, South Norwalk, Conn. Well-drilling apparatus. 1,781,706; Nov. 18.
Sheldon, Waldo, South Norwalk, Conn. Well-drilling apparatus. 1,781,707; Nov. 18.
Sheldrake, Theodore E., Philadelphia, Pa. Fastening loose ends of tire chains. 1,781,708; Nov. 18.
Sheperd, Edward S., assignor to A. D. Stewart, St. Joseph, Mo. Process and apparatus for producing felted fibrous board. 1,782,214; Nov. 18.
Sheperd, Edward S., assignor to A. D. Stewart, St. Joseph, Mo. Apparatus for producing felted fibrous board. 1,782,215; Nov. 18.
Shepherd, B. Chaffey, et al. (See Anglemeyer, Herman B., assignor.)
Shodron, John G., assignor to James Manufacturing Company, Fort Atkinson, Wis. Joist bearing plate and anchor. 1,782,216; Nov. 18.
Shoemaker, William W., New York, N. Y. Cutting tool. 1,781,863; Nov. 18.
Shrum, Peter J., Monaca Heights, Pa., assignor to Pittsburgh Screw and Bolt Corporation. Valve protector. 1,782,150; Nov. 18.
Siemens & Halske, Aktiengesellschaft. (See Schleicher, M., and Carlo, assignors.)
Silberman, Joseph, et al. (See Strauss, Nathan J., assignor.)
Simmons, Burt R., Palms, Calif. Tile machine. 1,782,051; Nov. 18.
Simmons, John W., Cleveland, Ohio, assignor, by mesne assignments, to R. S. Allyn, New York, N. Y. Combined transformer and electron-tube socket. Re17,871; Nov. 18.

Simons, George A., and G. Freeberg, assignors to Simons Millwork, Inc., Minneapolis, Minn. Breakfast-nook bench. Des. 82,589; Nov. 18.
Simons Millwork, Inc. (See Simons, G. A., and Freeberg, assignors.)
Simpson, Emil, Spooner, Wis. Sign reflector. 1,782,181; Nov. 18.
Sinclair Refining Company. (See Bell, J. E., and Isom, assignors.)
Sinclair Refining Company. (See Rogers, Horace K., assignor.)
Sizer, Albert W., Hessle, England. Molding machine. 1,782,322; Nov. 18.
Slichter, Donald C., et al. (See Mason, Max, assignor.)
Slichter, Louis B., et al. (See Mason, Max, assignor.)
Smidth, F. L., & Co. (See Jensen, Axel V., assignor.)
Smith, Augustus, Denver, Colo., assignor to C. T. Daly and M. B. Daly, Billings, Mont. Broomcorn harvester. 1,781,961; Nov. 18.
Smith, Charles S., et al., executors. (See Ingersoll, Robert H.)
Smith, Harry F., assignor to The Gas Research Company, Dayton, Ohio. Method of and apparatus for generating combustible gas and coke. 1,781,766; Nov. 18.
Smith, Harry F., assignor to The Gas Research Company, Dayton, Ohio. Gas producer. 1,781,767; Nov. 18.
Smith, Horace L., jr., assignor, by mesne assignments, to Auto Ramps Corporation, Richmond, Va. Garage ramp system. 1,782,369; Nov. 18.
Smith, Hubert J., Long Beach, Calif. Fluid-level reducer for oil wells. 1,781,824; Nov. 18.
Smith, Ralston R., Hayward, Calif. Power apparatus. 1,782,277; Nov. 18.
Smith and Wesson, Inc. (See Wesson, Harold, assignor.)
Smith, William A., jr., Phillipsburg, assignor to Ingersoll-Rand Company, Jersey City, N. J. Valve for rock drills. 1,782,102; Nov. 18.
Smith, William L., Brandywine Summit, assignor to The Viscose Company, Marcus Hook, Pa. Apparatus for preparing viscous mixtures. 1,782,370; Nov. 18.
Sno-Ko Inc. (See Goldstein, Adolph O., assignor.)
Snyder, Frederick T., New Canaan, Conn. Distilling material and cracking oil. 1,781,934; Nov. 18.
Snyder, Frederick T., New Canaan, Conn. Production of hydrogen. 1,781,935; Nov. 18.
Snyder, Helen M. (See Bartlett, Alexandra T., assignor.)
Snyder, Henry E. (See Wilson, Ford M., assignor.)
Snyder, John P. (See Copley, D. M., and Snyder.)
Société Anonyme des Etablissements Técalémit. (See Piquerez, Emile, assignor.)
Societe de Condensation et d'Applications Mecaniques. (See Florisson, Charles L., assignor.)
Societe du Carburateur Zenith. (See Boulade, Antonin, assignor.)
Société l'Air Liquide, Société Anonyme pour l'Etude et l'Exploitation des Procédés Georges Claude. (See Claude, Georges, assignor.)
Solberg, John C., Arlington, F. C. Langenberg, Watertown, Mass., and E. M. Sawtelle, New York, N. Y., assignors to Oneida Community, Limited, Oneida, N. Y. High-pressure hydraulic press. 1,782,103; Nov. 18.
Sondley, Clifford T., Newberry, S. C. Bearing grooving and pocketing machine. 1,782,104; Nov. 18.
Spear, Thomas S., Nichols, Fla. Buckle. 1,781,709; Nov. 18.
Spencer, Harry E., New York, N. Y. Weight-printing mechanism for scales. 1,781,793; Nov. 18.
Sperry Gyroscope Company. (See Mills, Chester B., assignor.)
Sperry, Samuel E., Hollis, assignor to Intertype Corporation, Brooklyn, N. Y. Mold-cooling device for linecasting machines. 1,782,371; Nov. 18.
Spiess, Georg, Leipzig, Germany. Folding machine. 1,781,768; Nov. 18.
Spiess, Georg, Leipzig-Plagwitz, Germany. Cross-folding machine. 1,782,323; Nov. 18.
Spreen, Charles C., assignor to Kelvinator Corporation, Detroit, Mich. Refrigeration. 1,782,105; Nov. 18.
Stafford, Rogers T., East Providence, assignor to B. A. Ballou & Co., Inc., Providence, R. I. Pin stem. 1,781,737; Nov. 18.
Staines, Frank, London, England. Device for cleaning and washing crockery and the like. 1,782,018; Nov. 18.
Stallan William J., Cambridge, England, assignor to Cambridge Instrument Company, Limited, London, England. Measuring or detecting device. 1,782,151; Nov. 18.
Standard Car Truck Company. (See Barber, F. L., and Webb, assignors.)
Standard Oil Company. (See Bartels, Edward E., assignor.)
Startup, G. G., et al. (See Hilliler, Seymour W., assignor.)
Statter, Estella, Sioux City, Iowa. Sanitary-napkin belt. 1,782,152; Nov. 18.
Steed, Leonard L., Johnson City, assignor to Endicott Johnson Corporation, Endicott, N. Y. Textile fabric or the like. Des. 82,591; Nov. 18.
Stern, Albert R., New York, N. Y. Uniform cap. Des. 82,590; Nov. 18.
Stevens, William C., and G. J. Meuer, assignors to Cutler-Hammer, Inc., Milwaukee, Wis. Electric switch. 1,781,710; Nov. 18.
Stewart, Albert D. (See Sheperd, Edward S., assignor.)
Stimson, Annie W. (See Johnson, James A., assignor.)
Stirling, James A., assignor, by mesne assignments, to Chicago Telephone Supply Company, Elkhart, Ind. Jack switch. 1,781,962; Nov. 18.
Stiver, Sylvester J., New Bethlehem, Pa. Skate. 1,782,078; Nov. 18.
Stoddard, Beatrice M., assignor to D. D. Comstock, Dedham, Mass., doing business as The Kiddie-Rhester Co. Play pen. 1,782,217; Nov. 18.
Stoddard, Robert, assignor to Milk Bottle Crate Company, Chicago, Ill. Milk-bottle crate. 1,781,825; Nov. 18.
Stoeltzlen, Leo V., assignor to Reed Manufacturing Company, Erie, Pa. Diestock. 1,781,936; Nov. 18.
Stoker, Paul P., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Remote-control apparatus. 1,781,963; Nov. 18.
Stoker, Paul P., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Train-counting apparatus. 1,782,052; Nov. 18.
Stoller, Michael G., Paulding, Ohio. Railroad crossing. 1,782,182; Nov. 18.
Stout, Hugh A., Shawnee, Okla. Combined display and storage device. 1,781,769; Nov. 18.
Stover, Howard L., Williamsport, Pa. Garment hanger. 1,781,991; Nov. 18.
Strauss, Nathan J., Lynbrook, N. Y., assignor of one-third to Freydberg Bros., Inc., New York, N. Y., and two-thirds to J. Silberman and L. Kahn, trading as Resisto Manufacturing Company, Baltimore, Md. Tie, tie-piece goods, and method of making. 1,782,183; Nov. 18.
Streit, Carl F., Cincinnati, Ohio. Chair or similar article. Des. 82,592; Nov. 18.
Stromberg-Carlson Telephone Manufacturing Company, The. (See Dickman, John A., assignor.)
Studebaker Corporation, The. (See Kohr, Robert F., assignor.)
Studebaker Corporation, The. (See Newcomb, E. C., and Roos, assignors.)
Studebaker Corporation, The. (See Roos, Delmar G., assignor.)
Sullivan, Dennis J., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Attachment of top lifts to wood heels. 1,781,907; Nov. 18.
Sullivan Machinery Company. (See Maxson, Louis A., assignor.)
Sumner, Richard E., Plainfield, N. J., assignor, by mesne assignments, to The Calco Chemical Company, Inc. Shellac composition. 1,781,711; Nov. 18.
Sun Oil Company. (See Alleman, Gellert, assignor.)
Sun Tube Corporation, The. (See Lynch, Frank J., assignor.)
Superheater Company, The. (See McKee, Neal T., assignor.)
Suter, Ernest, and J. Nuetzi, Milwaukee, Wis. Infra-red element for therapeutic lamps and holders. 1,782,218; Nov. 18.
Swinglehurst, Harry, jr. (See Williams, L. N. D., and Swinglehurst.)
Symington Company, The. (See Barrows, Donald S., assignor.)
Synck, Henry, assignor to The New Idea Spreader Company, Coldwater, Ohio. Manure spreader. 1,782,053; Nov. 18.
Szepsy, Ludovic, and I. Windisch, Arad, Rumania. Rail tie. 1,782,153; Nov. 18.
Tappan, Robert, Forest Hills, N. Y. Building construction. 1,781,794; Nov. 18.
Tate, James R., Toronto, Ontario, assignor to Dominion Cutout Company Limited, Toronto, Canada. Combined electric fuse and switch. 1,781,990; Nov. 18.
Taylor Instrument Companies. (See Vanderpool, William J., assignor.)
Taylor, Lawrence H., Iola, Kans. Cover for cooking utensils. 1,782,079; Nov. 18.
Taylor, Marshall, Wilkinsburg, Pa. Mean-temperature indicator. 1,782,106; Nov. 18.
Teague, Merwyn C., Elmhurst, N. Y., assignor to The Mechanical Rubber Company, Cleveland, Ohio. Method and apparatus for making inlaid sheet material. 1,782,107; Nov. 18.
Teague, Walter D., Forest Hills, N. Y., assignor to Turner Glass Corporation, Terre Haute, Ind. Bottle or similar container. Des 82,593; Nov. 18.
Teletype Corporation. (See Kleinschmidt, Edward E., assignor.)
Television Limited. (See Baird, John L., assignor.)
Ternstedt Manufacturing Company. (See McCullough, J. F. K., and Gilchrist, assignors.)
Ternstedt Manufacturing Company. (See Schnell, William, assignor.)
Tessky, Karl, Esslingen-on-the-Neckar, Germany. Shaft coupling. 1,782,324; Nov. 18.
Tetreault, Joseph P., Providence, R. I. Reinforced denture. 1,781,738; Nov. 18.
Thauss, Alfred. (See Kahn, M., and Thauss.)
Theobald, John L., Dayton, Ohio, assignor to Toledo Scale Company, Toledo, Ohio. Testing device. 1,782,127; Nov. 18.
Thomas, Arthur, Thornton Heath, and F. E. Hallahan, Southend-on-Sea, assignors to The Accounting & Tabulating Corporation, of Gt. Britain, Limited, London, England. Locking device. 1,782,080; Nov. 18.
Thomas, Donald L., New York, N. Y. Treating hydrocarbons. 1,781,826; Nov. 18.

Thomas, George F., Berwyn, and O. J. Herb, assignors to Alemite Corporation, Chicago, Ill. Filter. 1,781,964; Nov. 18.
Thomas, George N., Mankato, Minn. Vehicle heater. 1,782,325; Nov. 18.
Thomas, John W., assignor to B. Mifflin Hood Brick Company, Daisy, Tenn. Apparatus for making tiles. 1,781,992; Nov. 18.
Thomas, Robert A., Lombard, Ill. Machine for grinding mower elements. 1,782,154; Nov. 18.
Thompson, Howard A., Edgewood Borough, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,781,827; Nov. 18.
Thullen, Louis H., East Orange, N. J. Grinding or cutting apparatus. 1,782,128; Nov. 18.
Tiefel Charles G., and W. B. Payne, assignors to The Todd Company, Rochester, N. Y. Apparatus for printing negotiable paper. 1,781,739; No. 18.
Tiffany Manufacturing Company. (See Mason, Carl T., assignor.)
Timken-Detroit Axle Company, The. (See Brownyer, Nelson R., assignor.)
Timken-Detroit Company, The. (See Powers, Milton A., assignor.)
Timken Roller Bearing Company, The. (See Frank, Pardee H., assignor.)
Timken Roller Bearing Company, The. (See Scribner, William L., assignor.)
Todd Company, The. (See Tiefel, C. G., and Payne, assignors.)
Toledo Scale Company. (See Osgood, Louis A., assignor.)
Toledo Scale Company. (See Theobald, John L., assignor.)
Tomashek, William M., assignor to Winona Attrition Mill Company, Winona, Minn. Burr plate. 1,782,372; Nov. 18.
Tomcray, Millard H., assignor to Hudson Motor Car Company, Detroit, Mich. Hub cap. Des. 82,594; Nov. 18.
Tornquist, Walter E., Hoquiam, Wash. Hoisting tongs. 1,782,326; Nov. 18.
Toscano, Arcangelo, New York, N. Y. Nautical cylinder or tube. 1,782,155; Nov. 18.
Tracy, Homer D., Ridgewood, assignor to Barbour Flax Spinning Co., Paterson, N. J. Winding machine. 1,781,770; Nov. 18.
Trageser, Albert H., and L. Hassinger, New York, assignors to John Trageser Steam Copper Works, Maspeth, N. Y. Welding copper boiler heads. 1,782,373; Nov. 18.
Trageser, John, Steam Copper Works. (See Trageser, A. H., and Hassinger, assignors.)
Treiber, Frank A., Cumberland, Md. Antiglare device. 1,782,393; Nov. 18.
Trumbull Electric Manufacturing Company, The. (See Wheeler, Frank T., assignor.)
Turner Glass Corporation. (See Teague, Walter D., assignor.)
Two-way Electric Grinder Company, The. (See Gibson, Carter C., assignor.)
Uhl, Ben F., Richmond Hill, New York (assignor to Industrial Spray-Drying Corporation, New York, N. Y. Method and apparatus for processing materials by means of gases. 1,782,054; Nov. 18.
Union Switch & Signal Company, The. (See O'Hagan, Bernard E., assignor.)
Union Switch & Signal Company, The. (See Stoker, Paul P., assignor.)
Union Switch & Signal Company, The. (See Thompson, Howard A., assignor.)
Union Switch & Signal Company, The. (See Vanhorn, James J., assignor.)
United-Carr Fastener Corporation. (See Carr, Fred S., assignor.)
United Shoe Machinery Corporation. (See Sullivan, Dennis J., assignor.)
U. S. Bobbin & Shuttle Company, 1929. (See Baldwin, Luther C., assignor.)
U. S. Oil & Service Corporation. (See Wanamaker, E., and Bowes, assignors.)
Universal Button Fastening & Button Co. (See Ford, Ira D., assignor.)
Universal Draft Gear Attachment Co. (See Camp, Percy B., assignor.)
Universal Optical Corporation. (See Marciano, Gerardo F., assignor.)
Universal Pipe and Radiator Company, Thee. (See Crotty, Joseph J., assignor.)
Universal Playground Equipment Company. (See Lahay, Dell J., assignor.)
Unger, Raymond J. (See Herby, W. R., and Unger.)
Utica Cutlery Company. (See Matt, Walter J., assignor.)
Van Cleave, Ira H., et al. (See Anglemeyer, Herman B., assignor.)
Vanderpool, William J., assignor to Taylor Instrument Companies, Rochester, N. Y. Mechanism for starting clocks. 1,781,740; Nov. 18.
Vanhorn, James J., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,782,156; Nov. 18.
Van Urk, Arend T. (See Vermeulen R., van Urk, and Hermans.)
Vermeulen, Roelof, A. T. van Urk, and T. H. Hermans, Eindhoven, Netherlands, assignors to Radio Corporation of America. Device for converting electric oscillations into mechanical vibrations. 1,781,795; Nov. 18.
Verrecchia, John, Newark, N. J. Automatic drum player. 1,782,247; Nov. 18.
Vesuvius Crucible Company. (See Arensberg, F. L., and Jackman, assignors.)
Vicars, Edward L., assignor to T. & T. Vicars Limited, Earlestown, England. Biscuit-making and the like machine. 1,782,327; Nov. 18.
Vicars, T. & T., Limited. (See Vicars, Edward L., assignor.)
Victor, Alexander F., New York, N. Y. Film-sprocket structure. 1,781,937; Nov. 18.
Viscose Company, The. (See Smith, William L., assignor.)
Vodoz, Frederick W., Wilmette, assignor to Goodman Manufacturing Company, Chicago, Ill. Drilling mechanism. 1,781,887; Nov. 18.
Vogel, Karl G. (See Sanderson, A. N., Dana, and Vogel.)
Vogt, Hans, Berlin-Wilmersdorf, Germany. Vibrating condenser. 1,782,278; Nov. 18.
Vongunten, Alfred E., Hamilton, Ontario, Canada, assignor to The Columbus Dental Manufacturing Company, Columbus, Ohio. Artificial tooth. 1,781,908; Nov. 18.
Vulcan Rail and Construction Company. (See Shanks, W., and Cater, assignors.)
Wagner, Karl F., Feuerbach, near Stuttgart, Germany, assignor to Elektronmetall G. m. b. H., Cannstatt-Stuttgart, Germany. Pressure die-casting appliance. 1,782,248; Nov. 18.
Wahl, John C., Chicago, Ill., assignor, by mesne assignments, to Pen Desk Set Company. Desk stand and holder for fountain pens. 1,782,108; Nov. 18.
Wallace, Archibald, L., assignor to Metal Hose & Tubing Co., Inc., Brooklyn, N. Y. Machine for use in assembling hose-coupling parts and the like. 1,782,219; Nov. 18.
Wallace, Joseph H., Stamford, Conn., assignor to Pine Waste Products, Inc., New York, N. Y. Wood-pulp material. 1,781,712; Nov. 18.
Wallace, William S., et al., trustees. (See Davis, Kenneth, assignor.)
Walls, John A., Baltimore, Md. Air-filtering device for heating apparatus. 1,782,374; Nov. 18.
Walstrom, Axel M., Minneapolis, Minn., assignor to Elgin Butter Tub Company, Elgin, Ill. Cover and process of making. 1,782,157; Nov. 18.
Wanamaker, Ernest, and L. C. Bowes, Chicago, Ill., assignors to U. S. Oil & Service Corporation, New York, N. Y. Steam-generating apparatus. 1,782,220; Nov. 18.
Wanders, Hans H., Boston, Mass. Heating pad. 1,781,741; Nov. 18.
Ward, Orville S. (See Innis, M. M., and Ward.)
Warner Mfg. Co. (See Cadman, Addi B., assignor.)
Warren City Tank & Boiler Company, The. (See Patterson, John F., assignor.)
Warren Telechron Company. (See Frankl, Paul T., assignor.)
Wayne Company. (See Griffin, W. M., and Merriman, assignors.)
Wayne Pump Company, The. (See Parker, Walter H., assignor.)
Wearham, Gordon A., London, England. Display apparatus and operating the same. 1,782,328; Nov. 18.
Webb, Edwin W. (See Barber, F. L., and Webb.)
Webb, Jervis B. (See Da Costa, James S., assignor.)
Webster, Benjamin C., Southport, Conn., assignor to The Byrant Electric Company, Bridgeport, Conn. Making mounting elements with plaster ears. 1,782,329; Nov. 18.
Weidlinger, Frank, Bethlehem, Pa. Direction indicator. 1,781,888; Nov. 18.
Weiner, Leo. (See Hazman, Jacob, assignor.)
Weiss, Charles, New York, N. Y. Pitcher or the like. Des. 82,545; Nov. 18.
Weiss, Hazel M., et al., administratrices. (See Hilgert, Mathew.)
Wells, Walter W., assignor to Reo Motor Car Company, Lansing, Mich. Transmission. 1,782,184; Nov. 18.
Wemp, Ernest E., Detroit, Mich. Differential-action clutch. 1,782,158; Nov. 18.
Wendt, Bruno. (See Eggert, J., Schmidt, and Wendt.)
Werlich, John, Preston, Ontario, Canada. Child's wagon. 1,782,330; Nov. 18.
Werner, Pauline, née Fresenius, Stuttgart, Germany. Bust support. 1,782,279; Nov. 18.
Werner, Vernon S., Morris, Ill. Combination cigarette container, igniter, and ejector. 1,782,081; Nov. 18.
Wertzberger, Dallas D., Tulsa, Okla. Foot casting for derricks and using the same. 1,781,889; Nov. 18.
Wesson, Harold, assignor to Smith and Wesson, Inc., Springfield, Mass. Flush valve. 1,782,221; Nov. 18.
Wesson, Harold, assignor to Smith and Wesson, Inc., Springfield, Mass. Flush valve. 1,782,222; Nov. 18.
Western Stoneware Company. (See Dains, Irven F., assignor.)
Westinghouse Electric and Manufacturing Company. (See Pleasant, Herman E., assignor.)
Wetzler, Arnold, Far Rockaway, N. Y. Box. 1,782,110; Nov. 18.
Wheeler, Frank T., assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Fuse cabinet or panel board. 1,782,019; Nov. 18.
Wheeling Stamping Company. (See McGinnis, John A., assignor.)

Whiteley, Wilfred, Elland, England, assignor to Eadie Brothers and Company Limited Paisley Scotland. Lubricating rings and travelers in doubling and like frames. 1,781,828; Nov. 18.
Whitney, Baxter D., & Son, Inc. (See McQueston, Frank S., assignor.)
Wichtendahl, Karl, Gotha, Fla. Gambrel. 1,782,082; Nov. 18.
Wieczorek, Emanuel, Breslau, assignor to R. Kandt, Leipzig, Germany. Brake mechanism with brake block for motor vehicles. 1,781,993; Nov. 18.
Wilcox, Frank T., assignor to The Firex Extinguisher Company, Norwalk, Ohio. Fire extinguisher. 1,782,083; Nov. 18.
Wilhelm, Benjamin L., Chicago, Ill. Lens attachment for eyes. 1,782,331; Nov. 18.
Willcox, Frederick H., and E. P. Everhard, assignors to Freyn Engineering Company, Chicago, Ill. Burner. 1,781,796; Nov. 18.
Willenbring, Arnold B., Richmond, Minn. Windmill. 1,782,280; Nov. 18.
Williams, Harrison R., New York, N. Y. Mak'ng packing material and product. 1,781,797; Nov. 18.
Williams, John D., Niles, Ohio. Roll heater. 1,781,798; Nov. 18.
Williams, Leroy E., assignor to Highway Trailer Company, Edgerton, Wis. Demountable cover for dumping bodies. 1,781,713; Nov. 18.
Williams, Louis N. D., Ogontz, Pa., and H. Swinglehurst, jr., Brooklyn, assignors to Scott & Williams, Incorporated, New York, N. Y. Loop retainer and mechanism therefor. 1,782,375; Nov. 18.
Willson, Job H., assignor to Penn Art Steel Works, Erie, Pa. Receptacle. 1,781,909; Nov. 18.
Wilson, Charles T., Company. (See Giesecke, William E., assignor.)
Wilson, Ford M., assignor of one-half to H. E. Snyder, Liberal, Kans. Wrench. 1,781,994; Nov. 18.
Wilson Rings Company. (See Wilson, Wylie G., assignor.)
Wilson, Wylie G., assignor to Wilson Rings Company, Jersey City, N. J. Valve. 1,781,771; Nov. 18.
Wiltse Appliance Company. (See Wiltse, Sumner, assignor.)
Wiltse, Sumner, Detroit, Mich., assignor to Wiltse Appliance Company. Priming device. 1,781,890; Nov. 18.
Windisch, Ignacz. (See Szepsy, L., and Windisch.)
Winkelmann, Herbert A. (See Fisher, H. L., and Winkelmann.)
Winona Attrition Mill Company. (See Tomashek, William M., assignor.)
Wiswell, Ozro N. (See Allen, S. E., and Wiswell.)
Wolfe, Harry H., and H. L. Myers, assignors to The American Floor Surfacing Machine Company, Toledo, Ohio. Rotary drum machine. 1,782,376; Nov. 18.
Wolnik, Max, Brooklyn, N. Y. Mechanism for receiving and weighing coins. 1,782,249; Nov. 18.
Wright, Frederick H., and E. W. Lewis, London, England. Meat-mincing and sausage-meat-making machine. 1,782,084; Nov. 18.
Wyatt, Clayton F., assignor, by mesne assignments, of one-half to P. S. Seccombe. Draft and noise stop. 1,781,864; Nov. 18.
Yale & Towne Manufacturing Company, The. (See Heyer, Frederic K., assignor.)
Yates & Grant, Inc. (See Forbes, John S., assignor.)
Yonekura, Tario, Takaoka, Fuji-Gun, Japan. Cylinder mold of paper-making machines. 1,782,281; Nov. 18.
Young, Robert S., New Brighton, N. Y. Holder for paper slips. 1,782,185; Nov. 18.
Zachos, Louis G., et al. (See Paul, Leonard B., assignor.)
Zander, M. W., et al. (See Anglemeyer, Herman B., assignor.)
Zeh, Ludwig. (See Kahn, M., Schepss, and Zeh.)
Zent, Abram L., Dayton, Ohio. Coin-controlled apparatus. 1,782,250; Nov. 18.
Zerwig, Frank T., Ste. Genevieve, Mo. Wheel scraper. 1,782,085; Nov. 18.
Zundel, Eugene A., Chicago, Ill. Closet chair. 1,781,938; Nov. 18.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 18TH DAY OF NOVEMBER, 1930

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Abrading machine. P. Marchesini. 1,782,269; Nov. 18.
Acid, Manufacture of sulphuric. H. Petersen. 1,781,954; Nov. 18.
Acids, Apparatus for distilling fatty. H. Bollman. 1,781,745; Nov. 18.
Acoustic device. P. A. Michell. 1,781,988; Nov. 18.
Aeroplane. F. G. Diago. 1,782,256; Nov. 18.
Aeroplane. T. Nose. 1,782,210; Nov. 18.
Aeroplane-cloth speaker. U. Grier. 1,781,949; Nov. 18.
Aeroplanes, Stabilizer for. H. M. Salisbury and A. E. Miller. 1,782,149; Nov. 18.
Air-cleansing device, Automotive. H. B. Anglemeyer. 1,781,742; Nov. 18.
Aircraft, System for preventing the formation of ice on. F. McKinstry. 1,782,072; Nov. 18.
Air release for air brakes, Automatic. P. A. Manning and J. W. Gates. 1,782,268; Nov. 18.
Alarm apparatus. J. A. Bolduc. 1,782,190; Nov. 18.
Alarm device. E. Bahr. 1,782,378; Nov. 18.
Alarm device, Fire-. H. Michelman. 1,781,855; Nov. 18.
Alloy, Aluminum. H. C. Hall and T. F. Bradbury. 1,782,300; Nov. 18.
Amines, Treating mixtures of. H. S. Adams and L. Meuser. 1,782,112; Nov. 18.
Amplification system. W. A. MacDonald. 1,781,759; Nov. 18.
Amusement device. L. L. Cook. 1,782,163; Nov. 18.
Anchor, Rail. W. A. Kennedy. 1,782,170; Nov. 18.
Animal trap. B. W. Booth. 1,782,253; Nov. 18.
Antiglare device. F. T. Conner. 1,781,777; Nov. 18.
Antiglare device. F. A. Treiber. 1,782,393; Nov. 18.
Apparatus for maintaining a predetermined water level in steam boilers. G. H. Davin. 1,781,749; Nov. 18.
Apparel. T. J. Howland. 1,781,842. Nov. 18.
Apparel, Wearing. E. V. Crensbaw. 1,781,832; Nov. 18.
Appliance for mixing, beating, etc., Interchangeable. F. W. Parkhill. 1,782,245; Nov. 18.
Arch member for openings, Metal. T. Merryweather. 1,782,147; Nov. 18.
Articles having tarnish-resisting surface and making same. D. Gray, R. O. Bailey, and W. S. Murray. 1,782,092; Nov. 18.
Arylalkylethers which are aralkylated in the nucleus and of their sulphonic acids, Manufacture of. M. Kahn and A. Thauss. 1,781,981; Nov. 18.
Asphaltic material and process for manufacture. G. Abson. 1,782,186; Nov. 18.
Automobile body and constructing a body. R. Calpin. 1,782,230; Nov. 18.
Automobile disposal and withdrawal structure. W. J. Porter. 1,781,955; Nov. 18.
Automobile heater. G. G. Noblitt. 1,781,731; Nov. 18.
Bag: *See*—
Fruit-picking bag.
Bag shaker and feeder. H. Anderson. 1,781,714; Nov. 18.
Baking and molding device. J. L. Balton. 1,782,088; Nov. 18.
Balcony for buildings, Movable. B. H. Marshall. 1,781,787; Nov. 18.
Ball and bladder therefor, Inflatable playing. J. R. Denkert. 1,782,198; Nov. 18.
Band, Holding. W. L. Carter. 1,782,194; Nov. 18.
Bank, Coin savings. W. P. Scully. 1,782,213; Nov. 18.
Bank, Savings. E. J. Fisher. 1,781,920; Nov. 18.
Batteries, Device for controlling the voltage of storage. E. B. Jacobson. 1,781,844; Nov. 18.
Bean cutter. G. Lang. 1,781,851; Nov. 18.
Bearing for cars, Lateral-motion roller. F. L. Barber and E. W. Webb. 1,782,130; Nov. 18.
Bearing grooving and pocketing machine. C. T. Sondley. 1,782,104; Nov. 18.
Bearing, Self-aligning roller. W. L. Scribner. 1,781,886; Nov. 18.
Bedcover frame. E. T. Seifarth. 1,782,276; Nov. 18.
Beds, Unit twin. F. M. De Leon. 1,781,807; Nov. 18.
Belt, Sanitary-napkin. E. Statter. 1,782,152; Nov. 18.
Belt-tightening mechanism for motor-driven supply units. H. Dalton. 1,782,195; Nov. 18.
Biscuit-making and the like machine. E. L. Vicars. 1,782,327; Nov. 18.
Blowpipe head. F. M. Giffen. Des. 82,551; Nov. 18.
Boiler: *See*—
Superheater boiler.
Boiler heads, Welding copper. A. H. Trageser and L. Hassinger. 1,782,373; Nov. 18.
Boiler stand. J. K. Luton. Des. 82,572; Nov. 18.
Boot hook. F. E. Chapper and W. R. McGee. 1,781,748; Nov. 18.
Bottle or similar container. H. Oblander. Des. 82,578; Nov. 18.
Bottle or similar container. W. D. Teague. Des. 82,593; Nov. 18.
Box: *See*—
Dice box.
Fuse box.
Journal box.
Resistance box.
Switch box.
Box. A. Wetzler. 1,782,110; Nov. 18.
Box for jewelry and the like. H. J. Farrington. 1,781,779; Nov. 18.
Bracket: *See*—
Roller bracket.
Bracket for bathrooms. C. H. Lovett. Des. 82,571; Nov. 18.
Brake. R. F. Kohr. 1,781,691; Nov. 18.
Brake mechanism. F. W. Piché. 1,782,176; Nov. 18.
Brake mechanism for railways cars. P. B. Camp. 1,781,805; Nov. 18.
Brake mechanism, Hydraulically-actuated. C. S. Bragg and V. W. Kliesrath. 1,781,868–9; Nov. 18.
Brake mechanism, Motor-vehicle-. M. M. Innis and O. S. Ward. 1,781,843; Nov. 18.
Brake mechanism with brake block for motor vehicles. E. Wieczorek. 1,781,993; Nov. 18.
Brassière. B. Lustgarten. 1,782,044; Nov. 18.
Breakfast-nook bench. G. A. Simons and G. Freeberg. Des. 82,589; Nov. 18.
Bridge member for an optical mounting. W. P. Glintenkamp. Des. 82,550; Nov. 18.
Bridge-warning indicator. H. R. Campbell. 1,781,675; Nov. 18.
Brooch or similar article. B. Mechlovits. Des. 82,576–7; Nov. 18.
Brush, Spray. C. O. Newlin. 1,781,763; Nov. 18.
Buckle, T. S. Spear. 1,781,709; Nov. 18.
Building construction. R. Tappan. 1,781,794; Nov. 18.
Building structure. W. R. Herby and R. J. Unger. 1,782,121; Nov. 18.
Bumper. H. S. Jandus. Des. 82,560; Nov. 18.
Burner: *See*—
Gas burner.
Burner. F. H. Willcox and E. P. Everhard. 1,781,796; Nov. 18.
Burner for producing heat from liquid fuel. M. A. Powers. 1,782,049; Nov. 18.
Burr plate. W. M. Tomashek. 1,782,372; Nov. 18.
Cabinet, Knockdown metal. G. T. Gourley. 1,782,344; Nov. 18.
Cabinet or panel board, Fuse. F. T. Wheeler. 1,782,019; Nov. 18.
Cabinet, Refrigerator. H. E. Pleasant. Des. 82,582; Nov. 18.
Cabinet Shower. F. H. Lewis. 1,781,692; Nov. 18.
Calendar, Clock-actuated. E. Sahner. 1,782,274; Nov. 18.
Cameras, Shutter for photographic, S. Hirsch. 1,781,923; Nov. 18.
Cap, Hub. M. H. Toncray. Des. 82,594; Nov. 18.
Cap, Uniform. A. R. Stern. Des. 82,590; Nov. 18.
Car construction. J. F. O'Connor. 1,782,211; Nov. 18.
Car wheel. F. B. Bell. 1,781,867; Nov. 18.
Carbazole-indophenol compounds and preparing the same. F. Bollauf, F. Muth, and A. Schmelzer. 1,781,966; Nov. 18.
Carbonaceous material, Method and apparatus for distilling solid. H. L. Doherty. 1,781,871; Nov. 18.
Carburetor. A. Boulade. 1,782,027; Nov. 18.
Carline reenforcement and load-lifting arrangement. C. D. Bonsall. 1,781,775; Nov. 18.
Carrier and collapsible boat, Combination luggage. E. F. Reese. 1,781,860; Nov. 18.
Case: *See*—
Vanity case.
Casing and fire box, Combined heater. H. C. Maul. Des. 82,575; Nov. 18.
Casing for a liquid-dispensing apparatus. W. M. Griffin and C. L. Merriman. Des. 82,557; Nov. 18.
Caster. W. F. Herold. 1,781,815; Nov. 18.
Caster and socket, Detachable top-bearing. W. H. Nocltling. 1,781,732; Nov. 18.
Casting for derricks and using the same, Foot. D. D. Wertzberger. 1,781,889; Nov. 18.
Catch, Hood. R. G. Moore. 1,781,820; Nov. 18.
Cell cores, Method of and apparatus for making dry. J. M. Henderson. 1,781,688; Nov. 18.
Centrifugal drier. L. B. Green. 1,782,264; Nov. 18.
Centrifugal extractor. H. Krantz. 1,781,984; Nov. 18.
Centrifugal extractor. F. Rodler. 1,782,179; Nov. 18.
Ceramic products, Manufacture of. V. M. Goldschmidt. 1,782,295; Nov. 18.
Chain and making same, Mesh. W. Forstner. 1,782,004; Nov. 18.

Chain for automobiles, Antiskid. D. Bartoletti. 1,782,283; Nov. 18.
Chair: *See*—
Closet chair.
Chair. A. T. Bartlett. Des. 82,538; Nov. 18.
Chair or similar article. C. F. Streit. Des. 82,592; Nov. 18.
Chlorine, Fixing or recovering. E. O. Barstow. 1,781,830; Nov. 18.
Chopper: *See*—
Cotton chopper.
Chromium plating. J. F. K. McCullough and B. W. Gilchrist. 1,781,789; Nov. 18.
Chuck. S. H. Earl. 1,781,721; Nov. 18.
Cigarette case, lighter, and ash tray, Combination. D. S. Beyer. 1,782,026; Nov. 18.
Cigarette-making machinery. F. F. Ruau. 1,782,180; Nov. 18.
Clamp: *See*—
Sliding clamp.
Clamp. J. Berezowski. 1,781,997; Nov. 18.
Clamp and making the same. J. W. Harding. 1,782,266; Nov. 18.
Clamping apparatus for shoe heels. A. F. Koeppe. 1,781,690; Nov. 18.
Clay-molding die. A. P. Keller. 1,782,236; Nov. 18.
Clock casing and dial therefor or similar article, Combined. P. T. Frankl. Des. 82,548; Nov. 18.
Clocks, Mechanism for starting. W. J. Vanderpool. 1,781,740; Nov. 18.
Closet chair. E. A. Zundel. 1,781,938; Nov. 18.
Closure, Bag. I. W. Litchfield. 1,782,240; Nov. 18.
Clutch, Differential-action. E. E. Wemp. 1,782,158; Nov. 18.
Coal-loading machine. G. M. Crawford and J. M. London. 1,781,895; Nov. 18.
Coin-controlled apparatus. A. L. Zent. 1,782,250; Nov. 18.
Coins, Mechanism for receiving and weighing. M. Wolnik. 1,782,249; Nov. 18.
Collapsible post. L. Joubert. 1,782,168; Nov. 18.
Collar. J. N. Collings. 1,782,000; Nov. 18.
Collar, Shirt. H. Bezner. 1,782,336; Nov. 18.
Color from rosin, Removing. W. B. Logan. 1,782,267; Nov. 18.
Color lakes from petroleum, Manufacturing. G. Alleman. 1,781,772; Nov. 18.
Combustion, Preventing spontaneous. E. C. Pitman. 1,782,126; Nov. 18.
Composition of matter. L. Morris. 1,781,730; Nov. 18.
Compound, Coating. S. J. Charlesworth and A. W. Harris. 1,782,341; Nov. 18.
Concentrating machine. C. N. Bielenberg. 1,781,971; Nov. 18.
Concrete mixer. F. D. Robbins. 1,781,823; Nov. 18.
Concrete mixer and agitator. C. F. Ball. 1,781,965; Nov. 18.
Concrete pipe, Reenforced-. W. C. Parmley. 1,781,699; Nov. 18.
Condenser, Vibrating. H. Vogt. 1,782,278; Nov. 18.
Conduit, Distributing. H. W. Jewell. 1,781,726; Nov. 18.
Connecters, Lubricating. B. S. Burrell. 1,782,337; Nov. 18.
Container. F. J. Funke. 1,782,120; Nov. 18.
Container, igniter, and ejector, Combination cigarette. V. S. Werner. 1,782,081; Nov. 18.
Control apparatus, Remote. P. P. Stoker. 1,781,963; Nov. 18.
Control switch. H. E. Chipman. 1,781,892–3; Nov. 18.
Controlling mechanism for power-driven calculating machines. A. A. Horton. 1,781,689; Nov. 18.
Conveyer. H. C. Dodge and W. H. Beane. 1,781,750; Nov. 18.
Conveyer, Furnace. G. F. Beach. 1,782,335; Nov. 18.
Cooling device for line-casting machines, Mold-. S. E. Sperry. 1,782,371; Nov. 18.
Corn gatherer. E. Hassman. 1,782,067; Nov. 18.
Corn popper. A. H. Basel. 1,781,678; Nov. 18.
Corset. I. Panes. 1,782,311; Nov. 18.
Cotton chopper. J. W. Allen. 1,781,829; Nov. 18.
Coupling: *See*—
Shaft coupling.
Cover and process of making. A. M. Walstrom. 1,782,157; Nov. 18.
Cover, Combination bread and cake. P. Kempter. Des. 82,561; Nov. 18.
Cover for cooking utensils. L. H. Taylor. 1,782,079; Nov. 18.
Cover for dumping bodies, Demountable. L. E. Williams. 1,781,713; Nov. 18.
Cover, Thief-hole. C. Ehret. 1,781,722; Nov. 18.
Crane-operated device. O. A. Bartholomew. 1,781,943; Nov. 18.
Crate attachment. D. A. La Gasse. 1,782,307; Nov. 18.
Crate, Milk-bottle. R. Stoddard. 1,781,825; Nov. 18.
Crockery and the like, Device for cleaning and washing. F. Staines. 1,782,018; Nov. 18.
Cross-flooding machine. G. Spiess. 1,782,323; Nov. 18.
Crossing signal, Railroad-. F. Payne. 1,782,312; Nov. 18.
Crusher: *See*—
Hammer crusher.
Cultivator hitch. A. Blecha. 1,781,972; Nov. 18.
Current-rectifying apparatus. C. B. Bartley and V. H. Dake. 1,782,228; Nov. 18.
Current, Unilateral conductor for rectifying alternating. H. G. André. 1,782,129; Nov. 18.
Cutter: *See*—
Bean cutter.
Cutter bit and carrier therefor. N. D. Levin. 1,782,172; Nov. 18.
Cutter spindle. F. S. McQueston. 1,782,243; Nov. 18.
Cutting machine. W. E. Kay. 1,782,305; Nov. 18.
Cutting machine. J. J. Pondelicek. 1,781,703; Nov. 18.
Cutting machine for globe construction. P. J. King. 1,782,237; Nov. 18.
Cylinder-honing device. F. C. Moser. 1,781,856; Nov. 18.
Cylinder lock. F. K. Heyer. 1,782,347; Nov. 18.
Cylinder of internal-combustion engine. F. H. Royce, A. J. Rowledge, and A. G. Elliott. 1,782,317; Nov. 18.
Cylinder or tube, Nautical. A. Toscano. 1,782,155; Nov. 18.
Dental burr-cleaning apparatus, Hygienic. A. Rügamer. 1,781,956; Nov. 18.
Denture, Reenforced. J. P. Tetreault. 1,781,738; Nov. 18.
Desk. W. E. Gunn. Des. 82,558; Nov. 18.
Desk stand, Fountain-pen. J. A. Fremon and A. S. De Haven. 1,782,109; Nov. 18.
Device for converting electric oscillations into mechanical vibrations. R. Vermeulen, A. T. van Urk, and T. H. Hermans. 1,781,795; Nov. 18.
Dice box. E. W. Koch. 1,781,983; Nov. 18.
Die: *See*—
Clay-molding die.
Die-casting appliance, Pressure. K. F. Wagner. 1,782,248; Nov. 18.
Die-casting method and machine, Multiple-mixture. A. Akers. 1,781,939; Nov. 18.
Diestock. T. Petersen. 1,781,932; Nov. 18.
Diestock. L. V. Stoeltzlen. 1,781,936; Nov. 18.
Differential. C. Andrade, jr. 1,781,996; Nov. 18.
Dimmers, Actuating means for electric-light. H. J. Atticks and J. G. Saltzman. 1,782,390; Nov. 18.
Direction indicator. F. Weidlinger. 1,781,888; Nov. 18.
Dish or similar article, Glass. W. J. Graham. Des. 82,554; Nov. 18.
Disk wheel. W. N. Booth. Des. 82,540; Nov. 18.
Dispensing apparatus, Liquid-. W. H. Parker. 1,781,881; Nov. 18.
Display and storage device, Combined. H. A. Stout. 1,781,769; Nov. 18.
Display apparatus and operating the same. G. A. Wearham. 1,782,328; Nov. 18.
Display box. M. Lesser. Des. 82,568; Nov. 18.
Display case. J. G. Green. Des. 82,556; Nov. 18.
Display stand, Goods-vending. G. P. Grant. Des. 82,555; Nov. 18.
Display stand, Revolving. C. Dumler. 1,782,257; Nov. 18.
Distilling material and cracking oil. F. T. Snyder. 1,781,934; Nov. 18.
Documents transmitted by radio, Device for recording. E. Belin. 1,781,944; Nov. 18.
Door-control apparatus. R. Hill. 1,782,040; Nov. 18.
Doorlatch striker. F. J. McGuinness. 1,782,071; Nov. 18.
Door-operating apparatus, Elevator-. G. L. Allen. 1,782,223; Nov. 18.
Door-operating mechanism. L. Meyer. 1,781,694; Nov. 18.
Door or window screen, Automobile. L. H. Nicholson. 1,782,173; Nov. 18.
Dough dividing and working machine, Automatic. O. Kremmling. 1,782,006; Nov. 18.
Dress. D. Long. Des. 82,569; Nov. 18.
Drier: *See*—
Centrifugal drier.
Hair drier.
Sugar drier.
Drilling mechanism. F. W. Vodoz. 1,781,887; Nov. 18.
Drum machine, Rotary. H. H. Wolfe and H. L. Myers. 1,782,376; Nov. 18.
Drum player, Automatic. J. Verrecchia. 1,782,247; Nov. 18.
Dyestuffs of the phenonaphthosafranine series, Manufacture of acid. P. Laeuger. 1,782,356; Nov. 18.
Easel, Artist's. G. W. Cahall. 1,782,118; Nov. 18.
Economizer. W. F. Keenan, jr. 1,782,205; Nov. 18.
Elastic webbing. J. Hirsch. 1,782,041; Nov. 18.
Electric-cell-testing machine. V. T. Comer. 1,781,914; Nov. 18.
Electric machine, Synchronous dynamo-. J. F. H. Douglas and E. W. Kane. 1,782,200; Nov. 18.
Electric melting furnace. F. Linnhoff. 1,782,359; Nov. 18.
Electric motor. B. L. McNerney. 1,782,242; Nov. 18.
Electric switch. W. C. Stevens and G. J. Meuer. 1,781,710; Nov. 18.
Electrical machines with transformer banks by phase changing and voltage changing, Connecting. F. W. Gay. 1,782,263; Nov. 18.
Electrical machines with transformer banks, Connecting. F. W. Gay. 1,782,262; Nov. 18.
Electrical movement for loud-speakers. M. C. Hopkins. 1,782,094; Nov. 18.
Electricity, Discharge bar for neutralizing static. W. H. Chapman. 1,782,340; Nov. 18.
Electromechanical system. W. G. Cady. 1,781,680; Nov. 18.

Electroplating machine. C. G. Miller. 1,782,791; Nov. 18.
Elevator: *See*—
Well elevator.

Lighter, Cigar and cigarette. L. D. Bell and J. C. Rombach. 1,782,025; Nov. 18.
Lighting device, Electric-. A. Sadacca. 1,781,885; Nov. 18.
Lighting fixture or article of similar nature. H. Bohl. Des. 82,539; Nov. 18.
Liner, Adjustable. W. H. Johnston. 1,781,846; Nov. 18.
Liquid-level indicator. T. M. Eynon. 1,782,233; Nov. 18.
Liquid purifier, Centrifugal. J. W. Adams. 1,781,676; Nov. 18.
Liquid-seal trap, Antisiphonic. J. McDermid. 1,781,683; Nov. 18.
Liquid-whipping apparatus. W. Jensen. 1,782,095; Nov. 18.
Liquors, Treating ammoniacal. D. R. Means. 1,781,987; Nov. 18.
Loading device, Automatic. F. Hamrol. 1,781,873; Nov. 18.
Lock: *See*—
Cylinder lock. Warp-beam lock.
Keyless lock.
Lock device. S. J. Goodwin. 1,781,813; Nov. 18.
Lock for reflectors, Lens-holding. R. E. Major. 1,781,729; Nov. 18.
Lock washer. C. G. Olson. 1,782,387; Nov. 18.
Locking device. A. Thomas and F. E. Hallahan. 1,782,080; Nov. 18.
Locomotives, Steam pipe for. H. K. Harwick. 1,782,346; Nov. 18.
Logging system. D. Lawson. 1,782,043; Nov. 18.
Logs, Process and apparatus for barking. O. A. Bartholomew. 1,781,942; Nov. 18.
Looms, Attachment for. R. Pormann. 1,782,099; Nov. 18.
Loop retainer and mechanism therefor. L. N. D. Williams and H. Swinglehurst, jr. 1,782,375; Nov. 18.
Lubricating device. W. H. Cotton. 1,782,135; Nov. 18.
Lubricating rings and travelers in doubling and like frames. W. Whiteley. 1,781,828; Nov. 18.
Lubricating system. E. W. Davis. 1,781,948; Nov. 18.
Machine and process for cracking nuts. W. E. Giesecke. 1,781,838; Nov. 18.
Machine for cleaning the matrices for type setting and casting machines. K. Christel. 1,781,946; Nov. 18.
Machine for grinding mower elements. R. A. Thomas. 1,782,154; Nov. 18.
Machine for handling loose materials. K. Davis. 1,781,978; Nov. 18.
Machine for knotting warps. U. Bischof. 1,782,162; Nov. 18.
Machine for making wire strands, ropes, and cables. E. A. Conner. 1,781,894; Nov. 18.
Machine for removing flags and other adhering leaf from the stalks of tobacco leaves. M. G. P. Phillips. 1,781,701; Nov. 18.
Machine for use in assembling hose-coupling parts and the like. A. L. Wallace. 1,782,219; Nov. 18.
Magnetic separator. J. Bing. 1,781,998; Nov. 18.
Manifolding. E. R. Gill, jr. 1,781,902; Nov. 18.
Manifolding device. W. A. Pringle and L. F. Hagemann. 1,782,388; Nov. 18.
Manure spreader. H. Synck. 1,782,053; Nov. 18.
Massaging device. J. Grison. 1,782,005; Nov. 18.
Match packet. R. S. Pullen. 1,782,074; Nov. 18.
Match-stock-cutting apparatus. S. M. Friede and F. J. McGuire. 1,781,900; Nov. 18.
Materials by means of gases, Method and apparatus for processing. B. F. Uhl. 1,782,054; Nov. 18.
Materials of different specific gravities, Separation of. T. M. Chance. Re17,873; Nov. 18.
Measuring-dispensing device for containers. M. Bastians. 1,781,968; Nov. 18.
Measuring or detecting device. W. J. Stallan. 1,782,151; Nov. 18.
Measuring the vital capacity of the lungs, Apparatus for. R. W. Scott. 1,781,735; Nov. 18.
Meat-mincing and sausage-meat-making machine. F. H. Wright and E. W. Lewis. 1,782,084; Nov. 18.
Mercury compound of meta cresol. D. M. Copley and J. P. Snyder. 1,782,090; Nov. 18.
Meter: *See*—
Fluid meter.
Methyleneamino compounds and preparing the same, Aromatic. M. Kahn, W. Schepss, and L. Zeh. 1,781,982; Nov. 18.
Mill: *See*—
Hammer mill. Rolling mill.
Mining machine. L. A. Maxson. 1,781,906; Nov. 18.
Mirror, Rear-view. C. Bittinger. 1,781,999; Nov. 18.
Mixer: *See*—
Concrete mixer.
Mixing apparatus. G. H. Haines. Re17,875; Nov. 18.
Molding for metal frames. I. A. Baum. 1,781,773; Nov. 18.
Molding machine. A. W. Sizer. 1,782,322; Nov. 18.
Molding press, String. K. Handle. 1,782,301; Nov. 18.
Motor: *See*—
Electric motor.
Motor-control apparatus. B. E. O'Hagan. 1,781,880; Nov. 18.
Motor controller. T. H. Rodman. 1,781,792; Nov. 18.
Motors, Variable-speed control for electric. E. J. Murphy. 1,781,762; Nov. 18.
Mounting elements with plaster ears, Making. B. C. Webster. 1,782,320; Nov. 18.
Nozzle, Grease. G. W. Cooke. 1,781,681; Nov. 18.
Nut-cracking machines and the like, Feeding mechanism for. L. J. Meyer. 1,782,124; Nov. 18.
Nut fastening, Shiftable. F. S. Carr. Re17,870; Nov. 18.
Nut or collar, Threadless. H. Dalton. 1,782,196; Nov. 18.
Oil gauge. T. A. Hodges and E. Elrod. 1,781,756; Nov. 18.
Oil heater, Crank-case-. T. P. Hannegan. 1,781,840; Nov. 18.

Oiler, Wheel-flange. J. S. Childs. 1,782,133; Nov. 18.
Oiling mechanism, Lathe-. W. F. Groene. 1,781,755; Nov. 18.
Oils, Converting high-boiling hydrocarbon. E. E. Bartels. 1,782,160; Nov. 18.
Oils, Process and apparatus for dewaxing. E. F. Burch. 1,782,028; Nov. 18.
Ophthalmic mounting. G. F. Marciano. 1,781,760; Nov. 18.
Ore-concentrating table. F. C. Dyer. 1,781,810; Nov. 18.
Ornament or similar article, Shoe. E. T. Dugan. Des. 82,546; Nov. 18.
Ornamenting device and making the same. J. Hazman. 1,781,687; Nov. 18.
Oven, Briquet. T. Nagel. 1,782,244; Nov. 18.
Package sealer. T. H. Krueger. 1,782,123; Nov. 18.
Packing. B. P. Joyce. 1,781,926; Nov. 18.
Packing for piston rods and valve stems. S. B. Dunham. 1,782,258; Nov. 18.
Packing material and product, Making. H. R. Williams. 1,781,797; Nov. 18.
Pad: *See*—
Heating pad.
Paper, Apparatus for printing negotiable. C. G. Tiefel and W. B. Payne. 1,781,739; Nov. 18.
Paper-coating composition. D. B. Bradner and C. H. Milligan. 1,781,716; Nov. 18.
Paper from plant fiber, Manufacture of. H. Eggers. 1,782,382; Nov. 18.
Paper-making machine. H. Liebeck. 1,781,928; Nov. 18.
Paper-making machines, Cylinder mold of. T. Yonekura. 1,782,281; Nov. 18.
Paper-making machines, Spear pole for removing paper from the rollers of. R. B. Hull. 1,782,349; Nov. 18.
Paper, Wrapping. D. B. Clement. Des. 82,542; Nov. 18.
Parking system, Automobile. B. M. Flannery. 1,781,753; Nov. 18.
Perforating device. W. W. McCain. 1,781,819; Nov. 18.
Phonograph. R. Brenchley. 1,781,679; Nov. 18.
Pianos, Expression device for automatic. J. H. Dickinson. 1,782,061; Nov. 18.
Picture apparatus, Talking-. F. H. Owens. Re17,876; Nov. 18.
Picture machine, Talking-. T. W. Case. 1,781,945; Nov. 18.
Piezo-electric resonators for the excitation of various overtones, Mounting. W. G. Cady. 1,782,117; Nov. 18.
Pin stem. R. T. Stafford. 1,781,737; Nov. 18.
Pinch waver. A. and J. Goodman. 1,781,812; Nov. 18.
Pipe: *See*—
Concrete pipe. Soil pipe.
Pipe fitting, Waste-. W. H. Darling. 1,781,719; Nov. 18.
Pipe-pulling machine. C. R. Edwards. 1,781,918; Nov. 18.
Pistons, Apparatus for resizing. F. H. Sharp. 1,782,077; Nov. 18.
Pitcher or the like. C. Weiss. Des. 82,545; Nov. 18.
Plant for the generation of high-pressure steam. F. Flatt. 1,781,836; Nov. 18.
Plant thinner. E. J. Antoni. 1,781,743; Nov. 18.
Plate or the like. F. J. Peters. Des. 82,581; Nov. 18.
Plate spring. E. Burnand. 1,782,286; Nov. 18.
Platen-press chase, Adjustable. G. A. Dickey and E. B. Groff. 1,781,979; Nov. 18.
Platform, Portable. A. L. Lewis. 1,782,146; Nov. 18.
Play pen. B. M. Stoddard. 1,782,217; Nov. 18.
Plug and receptacle, Attachment. G. W. Goodridge. 1,782,297; Nov. 18.
Plug, Automatic. N. C. Schellenger. 1,781,958; Nov. 18.
Pocketbook, Combination. B. Epstein. 1,782,003; Nov. 18.
Pontic for bridgework. B. Fischler. 1,781,899; Nov. 18.
Porous material and the manufacturing process thereof. H. W. Greider. 1,782,384; Nov. 18.
Post: *See*—
Collapsible post.
Potato-setting machine. J. F. Ljungdahl. 1,781,986; Nov. 18.
Pottery kick-out element. I. F. Dains. 1,781,947; Nov. 18.
Power apparatus. R. R. Smith. 1,782,277; Nov. 18.
Press: *See*—
Garment or ironing press. Molding press.
Hydraulic press.

Priming device. S. Wiltse. 1,781,890; Nov. 18.
Projectile for signaling or illuminating purposes. L. L. Driggs, jr., and H. B. Faber. 1,782,291; Nov. 18.
Projecting apparatus. R. Cluff. 1,782,288; Nov. 18.
Propeller, Aeronautical. S. A. Reed. 1,781,883; Nov. 18.
Propeller, Variable-pitch. C. K. Greene. 1,782,167; Nov. 18.
Protective device for electric circuits. H. W. Baumer. 1,782,089; Nov. 18.
Pull handle. C. H. and G. J. Overmyer. Des. 82,580; Nov. 18.
Puller: *See*—
Wheel puller.
Pulley carrier for guy lines. S. W. Hillier. 1,782,348; Nov. 18.
Pulp material, Wood-. J. H. Wallace. 1,781,712; Nov. 18.
Pulverizer, Roller. R. E. Dunham. 1,782,201; Nov. 18.
Pump. F. H. Jensen. 1,782,144; Nov. 18.
Pump, Compressor. E. L. Barnes. 1,782,188; Nov. 18.
Pump, Liquid. H. Beyer. 1,782,252; Nov. 18.
Pump of the oscillating-blade type, Rotary. L. I. Poirmeur. 1,782,314; Nov. 18.
Pump, Oil. A. Bizzarri. 1,781,803; Nov. 18.
Pump outflow-regulating device. E. Piquerez. 1,782,073; Nov. 18.
Pump-priming system, Centrifugal. O. Haentjens. 1,782,345; Nov. 18.
Pump, Rotary. A. Bargeboer. 1,782,282; Nov. 18.
Pumping apparatus, Well-. J. T. Overstreet. 1,782,310; Nov. 18.
Rack. W. G. Brown. 1,781,976; Nov. 18.
Radiating device for the cooling of spark plugs, Removable-. J. Franquet and N. Dziacos. 1,782,260; Nov. 18.
Radiator. H. A. Higgins. 1,781,781; Nov. 18.
Radiator-cap construction. R. Miller. 1,781,878; Nov. 18.
Radiator cap or similar article for an automotive vehicle. W. Schnell. 82,588; Nov. 18.
Radiator tank. W. G. Campbell. 1,782,058; Nov. 18.
Radiator trap. A. R. Schoultz. 1,782,319; Nov. 18.
Radiocabinet. M. Pasternak. 82,583; Nov. 18.
Radio frequency transformer. F. L. Capps. 1,781,776; Nov. 18.
Radio log. A. R. Gwynn. 1,782,065; Nov. 18.
Radio recepton apparatus. M. J. Rittenhouse and O. V. Maurer. 1,781,861; Nov. 18.
Radio tuning mechanism. C. Schelbel. 1,782,368; Nov. 18.
Rail. G. R. Douglas. 1,782,031; Nov. 18.
Rail fitting. W. Shanks and W. B. Cater. 1,782,017; Nov. 18.
Rail tie. L. Szepsy and I. Windisch. 1,782,153; Nov. 18.
Railroad crossing. M. G. Stoller. 1,782,182; Nov. 18.
Rake-cleaning attachment, Hand-. R. G. Roth. 1,781,734; Nov. 18.
Razor-conditioning device, Magnetic. J. S. Forbes. 1,782,033; Nov. 18.
Reaping machine. E. E. C. Serre. 1,782,321; Nov. 18.
Receptacle. J. H. Willson. 1,781,909; Nov. 18.
Reciprocating engine. H. J. Alderson. 1,781,831; Nov. 18.
Reel for fishing rods and the like. L. Mitchell-Henry. 1,781,695; Nov. 18.
Refractory structure. F. L. Arensberg and A. J. Jackman. 1,782,023; Nov. 18.
Refractory structure. A. F. Hall. 1,781,780; Nov. 18.
Refrigerating apparatus. E. L. Barnes. 1,782,189; Nov. 18.
Refrigerating unit of fired ceramic material. L. G. Copeman. 1,781,778; Nov. 18.
Refrigeration. C. C. Spreen. 1,782,105; Nov. 18.
Refrigerator. H. E. Larsen. 1,781,758; Nov. 18.
Refrigerator. A. V. Pankey. Re17,872; Nov. 18.
Relay. M. Schleicher and P. Carlo. 1,782,100; Nov. 18.
Resistance box. E. Bandoly. 1,781,802; Nov. 18.
Retard gauge. O. W. Heise. 1,781,814; Nov. 18.
Rheostat. N. C. Schellenger. 1,781,959; Nov. 18.
Rhythmic chart for child orchestration. M. E. Mayberry and E. A. Hill. 1,782,046; Nov. 18.
Rim for dome lights or the like. G. Graff. Des. 82,553; Nov. 18.
Ring. A. F. Di Cristina. Des. 82,544; Nov. 18.
Ring. A. J. Friedman. Des. 82,549; Nov. 18.
Road graders, Lifting attachment for. A. J. and G. W. Monroe. 1,782,363; Nov. 18.
Roll heater. J. D. Williams. 1,781,798; Nov. 18.
Roller bracket, Shade-. E. Broberg. 1,782,131–2; Nov. 18.
Rolling mill. W. F. Detwiler. 1,781,809; Nov. 18.
Roof tank, Water. J. F. Patterson. 1,782,174; Nov. 18.
Roofing elements, Method of and mechanism for coating. H. L. Levin. 1,781,877; Nov. 18.
Roundabout. D. J. Lahay. 1,782,207; Nov. 18.
Rubber derivative and making same. H. L. Fisher and H. A. Winkelmann. 1,782,140; Nov. 18.
Running board. H. J. Earl. Des. 82,547; Nov. 18.
Sack, Cotton-picking. W. R. Keene. 1,782,354; Nov. 18.
Safety equipment for aircraft. D. G. Coplen. 1,782,134; Nov. 18.
Salt and pepper shaker or similar article. J. W. Jennings. Des. 82,559; Nov. 18.
Salts into globular or similar shaped bodies, Conversion of. B. Haak. 1,782,038; Nov. 18.
Scaffolding, Adjustable. H. Ball. 1,781,911; Nov. 18.
Scale, Hydraulic. G. W. Calvert. 1,782,255; Nov. 18.
Scale, Weighing. L. A. Osgood. 1,782,125; Nov. 18.
Scales, Weight-printing mechanism for. H. E. Spencer. 1,781,793; Nov. 18.
Scraper, Wheel. F. T. Zerwig. 1,782,085; Nov. 18.
Screen: *See*—
Door or window screen.
Screen. W. Hanley. 1,782,203; Nov. 18.
Screening, sorting, and handling material, Apparatus for. B. W. Pape. 1,781,857; Nov. 18.
Screw-type head for puncturing closures, Gas-operated. S. E. Allen and O. N. Wiswell. 1,782,021; Nov. 18.
Seal, Smoke-arch. W. F. Kiesel, jr. 1,781,849; Nov. 18.
Sealing mechanism for metal windows. H. E. Campbell. 1,782,338; Nov. 18.
Seat. J. W. Cross and E. E. Johnson. 1,782,231; Nov. 18.
Seat construction. W. S. Mendenhall. 1,782,270; Nov. 18.

Securing means. I. D. Ford. 1,782,164–6; Nov. 18.
Separator: *See*—

Sulphur from iron pyrites, Recovery of. R. F. Bacon. 1,782,226; Nov. 18.
Sulphur from pyrites, Recovery of. R. F. Bacon. 1,782,225; Nov. 18.
Sundial. G. Ancira. 1,782,114; Nov. 18.
Superheater boiler. W. F. Keenan, jr., and H. F. Eddy. 1,782,096; Nov. 18.
Support, Bust. P. Werner. 1,782,279; Nov. 18.
Support, Seat. L. B. Marvin. 1,782,241; Nov. 18.
Support, Shoe-shank. S. Richmond. 1,782,178; Nov. 18.
Support, Table-leaf. F. L. Casper. 1,782,059; Nov. 18.
Suture. W. F. Rolston. 1,781,933; Nov. 18.
Switch: *See*—
Control switch. Jack switch.
Electric switch.
Switch. W. O. Benjafield. 1,781,970; Nov. 18.
Switch box, Meter-entrance. S. Hammer. 1,781,686; Nov. 18.
Table: *See*—
Ore-concentrating table.
Table for automobiles, Collapsible. L. H. Cummings. 1,781,977; Nov. 18.
Tag-making machine. S. E. Allen. 1,782,086; Nov. 18.
Tank: *See*—
Radiator tank. Storage tank.
Roof tank.
Tap. J. M. Le Grand. 1,781,985; Nov. 18.
Tape, Bias insulating. H. I. Diamond. 1,781,896; Nov. 18.
Teeth, Bicuspid and molar bridge. R. W. Beck. 1,782,251; Nov. 18.
Telegraphy, Printing. E. E. Kleinschmidt. 1,781,905; Nov. 18.
Telephone-connecter take-up. J. E. Bolling. 1,782,191; Nov. 18.
Telephone substation equipment. J. A. Dickman. 1,781,916; Nov. 18.
Television apparatus and the like. J. L. Baird. 1,781,800; Nov. 18.
Temperature indicator, Mean-. M. Taylor. 1,782,106; Nov. 18.
Tensioning device for elastic threads. C. F. Kenyon. 1,781,817; Nov. 18.
Testing device. J. L. Theobald. 1,782,127; Nov. 18.
Tetra-alkylated thiuramdisulphides, Manufacturing. H. S. Adams and L. Meuser. 1,782,111; Nov. 18.
Textile fabric. F. W. Bader. Des. 82,537; Nov. 18.
Thermostat and similar control mechanism. M. Mason. 1,782,045; Nov. 18.
Throttle, Foot. P. A. Gianera. 1,782,035; Nov. 18.
Tie: *See*—
Rail tie.
Tie, tie piece goods, and method of making. N. J. Strauss. 1,782,183; Nov. 18.
Tile machine. B. R. Simmons. 1,782,051; Nov. 18.
Tiles, Apparatus for making. J. W. Thomas. 1,781,992; Nov. 18.
Timing indicator for internal-combustion engines. W. D. Havens. 1,782,142; Nov. 18.
Tongs, Hoisting. W. E. Tornquist. 1,782,326; Nov. 18.
Tongs, Pickling. R. C. Hopkins. 1,781,875; Nov. 18.
Tool, Cutting. W. W. Shoemaker. 1,781,863; Nov. 18.
Tool organization, Machine-. E. J. Kearney and J. B. Armitage. 1,782,235; Nov. 18.
Tool, Pneumatic cleaning. F. Luckensmeier. 1,782,308; Nov. 18.
Tool, Well. A. A. Helmecke. 1,781,903; Nov. 18.
Tooth, Artificial. A. E. Vongunten. 1,781,908; Nov. 18.
Torpedo-firing operations, Method and apparatus for. C. L. Florisson. 1,782,294; Nov. 18.
Toy airplane. W. Kramer. 1,782,385; Nov. 18.
Toy bird. V. V. Kunkel. 1,782,042; Nov. 18.
Toy, Mechanical. J. Bulkowski. 1,781,804; Nov. 18.
Toy railroads and the like, Automatic safety cut-out for. H. S. Becker. 1,781,969; Nov. 18.
Toy windmill. O. Scheibe. Des. 82,587; Nov. 18.
Traffic-controlling apparatus, Railway-. H. A. Thompson. 1,781,827; Nov. 18.
Traffic-controlling apparatus, Railway-. J. J. Vanhorn. 1,782,156; Nov. 18.
Train-counting apparatus. P. P. Stoker. 1,782,052; Nov. 18.
Transformer and electron-tube socket, Combined. J. W. Simmons. Re17,871; Nov. 18.
Transmission. W. W. Wells. 1,782,184; Nov. 18.
Transmission mechanism. D. C. Dobbins. 1,782,342–3; Nov. 18.
Transmission mechanism. J. A. Johnson. 1,781,925; Nov. 18.
Transmission, Straight-line. J. A. Johnson. 1,781,924; Nov. 18.
Transmitting signals. J. L. Baird. 1,781,799; Nov. 18.
Trap: *See*—
Animal trap. Radiator trap.
Liquid-seal trap.
Truck, Car. N. R. Brownyer. 1,782,192; Nov. 18.
Truck for railway rolling stock. R. F. Hall. 1,782,093; Nov. 18.
Typewriting machine. G. O. Degener. 1,781,720; Nov. 18.
Typewriting machine. G. F. Handley. 1,781,725; Nov. 18.
Undergarment for women. M. D. Neilson. 1,781,929; Nov. 18.
Upholstery in automobile bodies, Attaching. J. Ledwinks. 1,782,239; Nov. 18.
Utensil, Combination kitchen. J. G. Funk. 1,781,837; Nov. 18.
Vacuum inducing construction. A. Y. Dodge. 1,782,199; Nov. 18.
Valve. R. O. Kirchhan. 1,782,238; Nov. 18.
Valve. W. G. Wilson. 1,781,771; Nov. 18.
Valve, Flush. H. Wesson. 1,782,221–2; Nov. 18.
Valve for air brakes, Feed. C. A. Campbell. 1,781,747; Nov. 18.
Valve for rock drills. W. A. Smith, jr. 1,782,102; Nov. 18.
Valve for steam hydraulic systems, Overflow. W. H. Ridgway. 1,782,367; Nov. 18.
Valve for vacuum-cleaner dust bags. R. E. Gray. 1,782,064; Nov. 18.
Valve-inserting method and mechanism. D. F. O'Brien. 1,781,698; Nov. 18.

Valve, Lubricated plug. S. J. Nordstrom. 1,781,821; Nov. 18.
Valve, Oscillating. J. Gamache. 1,781,901; Nov. 18.
Valve protector. P. J. Shrum. 1,782,150; Nov. 18.
Valve, Rotary. J. M. Rauha, jr., and A. Mattson. 1,782,389; Nov. 18.
Vanity case. L. A. Anderson. 1,782,377; Nov. 18.
Vanity case. L. V. Aronson. 1,782,024; Nov. 18.
Vase, Illuminated flower. F. C. Emmes and J. H. Knopp. 1,781,835; Nov. 18.
Vat assistant for use in dyeing. J. G. Kern and C. J. Sala. 1,782,122; Nov. 18.
Vehicle heater. G. N. Thomas. 1,782,325; Nov. 18.
Vehicle, Trailer. A. B. Cadman. 1,782,115–16; Nov. 18.
Vehicles and the like through the medium of their wheels, Means or apparatus for lifting motor. J. A. G. Kirsten. 1,782,306; Nov. 18.
Vending machine. R. I. Graves. 1,781,839; Nov. 18.
Ventilator: *See*—
Window ventilator.
Viscous mixtures, Apparatus for preparing. W. L. Smith. 1,782,370; Nov. 18.
Visor, Decorated. S. A. Kornsweet. 1,782,206; Nov. 18.
Wagon, Child's. J. Werlich. 1,782,330; Nov. 18.
Wall. O. L. Gent. 1,782,034; Nov. 18.
Warp-beam lock. C. C. Shaw. 1,781,736; Nov. 18.
Washer: *See*—
Lock washer.
Washing machines, Agitator for. M. E. Block. 1,781,774; Nov. 18.
Water heater. R. D. Goldberg. Des. 82,552; Nov. 18.
Water heater. V. Mauck. 1,782,209; Nov. 18.
Water heater, Unrestricted-return. W. A. Daley. 1,782,380; Nov. 18.
Water tap. J. Powell. 1,782,315; Nov. 18.
Weather strip. W. S. Pritchard. 1,781,882; Nov. 18.
Wedding ring. P. Krasnow. Des. 82,566; Nov. 18.
Wedding ring. A. H. Quast and O. B. Olsen. Des. 82,585; Nov. 18.
Welding. B. S. Robinoff, S. E. Paine, and W. E. Quillen. 1,782,316; Nov. 18.
Welding and the resultant product. O. U. Hofmann. 1,782,234; Nov. 18.
Well-drilling apparatus. W. Shedon. 1,781,706–7; Nov. 18.
Well drilling, Apparatus for. G. D. Parker. 1,781,989; Nov. 18.
Well elevator. J. Grant. 1,781,922; Nov. 18.
Wet mixtures, Method and apparatus for preparing. J. C. MacIldowie. 1,781,728; Nov. 18.
Wheel: *See*—
Car wheel.
Wheel driving joint with steering swivel for motor vehicles, Front-. C. Matschei. 1,782,361; Nov. 18.
Wheel for railroad vehicles. P. M. Bourdon. 1,782,285; Nov. 18.
Wheel puller. G. W. Grebenstein. 1,782,037; Nov. 18.
Wheels or other elements from their bearings, Device for removing. J. S. Imlach. 1,782,303; Nov. 18.
Winch drum. A. Lang. 1,782,358; Nov. 18.
Winding machine. H. D. Tracy. 1,781,770; Nov. 18.
Windmill. A. B. Willenbring. 1,782,280; Nov. 18.
Windshield-cleaner-operating mechanism. J. L. Nilson and J. F. Prince. 1,781,697; Nov. 18.
Window, Sliding and swinging. B. Paul. 1,781,858; Nov. 18.
Window ventilator. J. Majuschak. 1,782,098; Nov. 18.
Wood wheel. W. N. Booth. Des. 82,541; Nov. 18.
Wrench. L. D. Anderson. 1,781,940; Nov. 18.
Wrench. J. Nation. 1,782,364; Nov. 18.
Wrench. F. M. Wilson. 1,781,994; Nov. 18.
Zeolite. A. O. Jaeger and J. A. Bertsch. 1,782,353; Nov. 18.
Zinc oxide, Manufacturing high-grade. F. E. Pierce. 1,781,702; Nov. 18.

CLASSIFICATION OF PATENTS

ISSUED NOVEMBER 18, 1930

NOTE.—First number=class, second number=subclass, third number=patent number

2— 10: 1,781,832
12: 1,782,206
40: 1,782,311
42: 1,782,044
1,782,279
68: 1,781,842
73: 1,781,929
129: 1,782,336
132 1,782,000
146: 1,782,183
243: 1,782,041
4— 134: 1,781,938
145: 1,781,692
203: 1,781,719
5— 8: 1,781,807
99: 1,782,217
319: 1,782,276
6— 2: 1,782,202
8— 5: 1,782,122
9— 2: 1,781,860
10— 162: 1,781,873
12— 125: 1,781,690
147: 1,781,907
15— 21: 1,781,956
65: 1,781,763
74: 1,782,018
77: 1,781,946
16— 39: 1,781,732
1,781,815
42: 1,781,951
66: 1,782,040
18— 5: 1,781,688
12: 1,782,322
47.5: 1,782,384
48: 1,781,728
20— 1.13: 1,782,121
1,782,369
48: 1,781,858
68: 1,781,864
22— 69: 1,781,939
1,782,248
209: 1,782,047
23— 102: 1,782,038
148: 1,781,702
168: 1,781,954
207: 1,781,859
212: 1,781,935
219: 1,781,830
226: 1,782,226
227: 1,782,225
234: 1,782,353
24— 17: 1,782,194
19: 1,782,266
66: 1,782,185
134: 1,782,030
137: 1,782,057
140: 1,782,066
155: 1,781,737
166: 1,781,709
208: 1,782,164
1,782,165
1,782,166
219: 1,782,293
223: 1,782,208
230.5: 1,781,975
232: 1,782,379
246: 1,782,275
25— 10: 1,782,076
17: 1,781,992
27: 1,782,236
28: 1,781,947
42: 1,782,051
45: 1,782,301
155: 1,782,383
156: 1,782,295
27— 1: 1,782,332
28— 49: 1,782,162
29— 38: 1,782,138

"Zündapp" Ges. für den Bau von Spezialmaschinen m. b. H., Nuremberg, Germany. Spark plugs, electric motors, storage batteries, etc. 285,048; Nov. 25. Class 21.

CLASSIFIED LIST OF TRADE-MARKS REGISTERED

CLASS 1

Coal. Old Ben Coal Corporation. 277,704; Nov. 25; Serial No. 299,275; published Sept. 9, 1930.
Coal. Philadelphia and Reading Coal and Iron Company. 277,781–2; Nov. 25; Serial Nos. 303,578–9; published Sept. 9, 1930.
Coal. Philadelphia and Reading Coal and Iron Company. 277,787; Nov. 25; Serial No. 301,774; published Sept. 9, 1930.
Earth, Diatomaceous. A. C. Ochs Brick & Tile Co. 277,710; Nov. 25; Serial No. 297,615; published Sept. 9, 1930.
Leather, Calf. American Hide and Leather Company. 277,787; Nov. 25; Serial No. 301,774; published Sept. 9, 1930.
Seed. Virginia Seed Service, Inc. 277,694; Nov. 25; Serial No. 302,661; published Sept. 9, 1930.

CLASS 2

Bottles, Paper. American Paper Bottle Company. 277,654; Nov. 25; Serial No. 283,538; published Sept. 9, 1930.
End pieces for cores, Metal. Brown Company. 277,825; Nov. 25; Serial No. 301,093; published Sept. 9, 1930.
Pails, Paper. Menasha Products Company. 277,849; Nov. 25.
Trays for trucks, Package. American Pulley Company. 277,655; Nov. 25; Serial No. 283,427; published Sept. 9, 1930.

CLASS 3

Bags and brief cases, Traveling. National Brief Case Mfg. Co. 277,786; Nov. 25; Serial No. 302,907; published Sept. 9, 1930.
Bags, suitcases, hand bags, etc., Traveling. Dobbs & Co. 277,725; Nov. 25; Serial No. 299,901; published Sept. 9, 1930.

CLASS 4

Cleaning compound. Volcanite Products Co. 277,811; Nov. 25; Serial No. 303,411; published Sept. 9, 1930.
Cleaning pads, Cloth. B. L. Williams. 80,563; renewed Jan. 3, 1931.
Soap. I. Davis. 277,759; Nov. 25; Serial No. 292,660; published Sept. 9, 1930.
Soap. Los Angeles Soap Co. 35,741; renewed Jan. 8, 1931.
Soap compound, Cleaning and polishing. United Chemical Company. 277,841; Nov. 25; Serial No. 301,134; published Sept. 9, 1930.

CLASS 5

Composition for sealing punctures. W. A. Nicholson. 277,843; Nov. 25.
Mucilage, adhesive paste, and glue. S. S. Stafford, Inc. 277,788; Nov. 25; Serial No. 301,309; published Sept. 9, 1930.

CLASS 6

Antiseptic. Samuel Cabot Incorporated. 81,382; renewed Apr. 4, 1931.
Baking powder and laundry starch. S. Hamill Company. 81,213; renewed Mar. 14, 1931.
Chemical substance. Roessler & Hasslacher Chemical Company. 79,933; renewed Oct. 18, 1930.
Cream, Cucumber. H. Mora. 277,848; Nov. 25.
Glycolytic extract of pancreas. Fairchild Bros. & Foster. 80,114; renewed Nov. 8, 1930.
Hair dressing and tonic. Giroux Manufacturing Company. 80,277; renewed Nov. 29, 1930.
Medicines, Proprietary. S. B. Leonardi & Co. 35,637; renewed Dec. 25, 1930.
Shampoo powder. R. G. Edwards. 79,966; renewed Oct. 25, 1930.
Silicate of soda. Philadelphia Quartz Company. 80,943–9; renewed Feb. 14, 1931.
Silicate of soda. Philadelphia Quartz Company. 80,950; renewed Feb. 14, 1931.
Silicate of soda. Philadelphia Quartz Company. 81,099; renewed Feb. 28, 1931.
Silicate of soda. Philadelphia Quartz Company. 81,353; renewed Mar. 28, 1931.
Starch. National Starch Company. 81,092–3; renewed Feb. 28, 1931.
Tablet, Cathartic. M. F. Schlesinger. 80,874; renewed Feb. 7, 1931.
Twine. Independent Druggists' Alliance Distributing Co. 277,774; Nov. 25; Serial No. 303,893; published Sept. 9, 1930.

CLASS 8

Pipes. Independent Druggists' Alliance Distributing Co. 277,682; Nov. 25; Serial No. 303,894; published Sept. 9, 1930.

CLASS 9

Firecrackers. V. E. Scott. 277,789; Nov. 25; Serial No. 304,073; published Sept. 9, 1930.

CLASS 10

Fertilizers. Plant Food Company. 277,688; Nov. 25; Serial No. 303,487; published Sept. 9, 1930.

CLASS 12

Brick, Fire. Stowe, Fuller & Co. 35,628; renewed Dec. 18, 1930.
Bricks and tiles and blocks made of fire-brick material, Fire. Greenpoint Fire Brick Co. 80,515; renewed Jan. 3, 1931.
Cement, lime, and cement and lime mixtures. Riverton Lime Company. 277,836–7; Nov. 25; Serial Nos. 302,477–8; published Sept. 9, 1930.
Cork board, cork pipe covering, etc. Cork Insulation Co. Inc. 277,830; Nov. 25; Serial No. 302,769; published Sept. 9, 1930.
Floor tiling, Composition. Dreadnought Flooring Company. 80,938; renewed Feb. 14, 1931.
Lime, Hydrated. United States Lime Products Corporation. 277,803; Nov. 25; Serial No. 303,617; published Sept. 9, 1930.
Paneling material for walls, cabinets, or the like. Koken Companies. 277,835; Nov. 25; Serial No. 302,581; published Sept. 9, 1930.
Panels, Wall and ceiling. Merchant Trading Company. 277,842; Nov. 25; Serial No. 301,051; published Sept. 9, 1930.
Slate slabs, Structural. Keenan Structural Slate Company. 277,749; Nov. 25; Serial No. 299,392; published Sept. 9, 1930.

CLASS 13

Hardware. Norvell-Shapleigh Hardware Company. 81,290; renewed Mar. 21, 1930.
Roller supports, Adjustable shade-. General Window Equipment Corporation. 277,824; Nov. 25; Serial No. 301,896; published Sept. 9, 1930.
Wire screen cloth. New York Wire Cloth Company. 80,145; renewed Nov. 8, 1930.

CLASS 14

Aluminum-base alloys. Apex Smelting Company. 277,698; Nov. 25; Serial No. 303,313; published Sept. 9, 1930.
Castings. Chain Belt Company. 277,685; Nov. 25; Serial No. 303,627; published Sept. 9, 1930.

CLASS 15

Gasoline, lubricating oils, and greases. Irving Oil Company. 277,754; Nov. 25; Serial No. 295,796; published Sept. 9, 1930.
Grease, Lubricating and yarn. Cataract Refining and Manufacturing Company. 80,268; renewed Nov. 29, 1930.
Lubricant, Lubricating. Rust-Go Manufacturing Co. 277,834; Nov. 25; Serial No. 302,643; published Sept. 9, 1930.
Oil, Lubricating. Standard Oil Company of New Jersey. 277,765; Nov. 25; Serial No. 300,996; published Sept. 9, 1930.
Oils, greases, and lubricants, Motor-lubricating. A. F. Snipes. 277,816; Nov. 25; Serial No. 303,012; published Sept. 9, 1930.
Petroleum, Refined. Atlantic Refining Company. 80,019–20; renewed Nov. 1, 1930.
Petroleum, Refined. Atlantic Refining Company. 80,399; renewed Dec. 20, 1930.

CLASS 16

Naphtha. American Mineral Spirits Co. 277,758; Nov. 25. Serial No. 292,703; published Sept. 9, 1930.

Paint, varnish, lacquer, and traffic paint, Ready-mixed. R. R. Raap. 277,829; Nov. 25; Serial No. 302,792; published Sept. 9, 1930.
Paints, Metallic. Winter's Metallic Paint Company. 35,669; renewed Dec. 25, 1930.

CLASS 17

Cigarettes, cigars, smoking and chewing tobacco. Teofani & Co. 80,449; renewed Dec. 20, 1930.
Cigarettes, Turkish. Prospero De Nobili & Co. 79,193; renewed Aug. 16, 1930.
Cigars. Cuesta, Rey & Co. 80,803; renewed Jan. 31, 1931.

CLASS 19

Airplanes. Stinson Aircraft Corporation. 277,776–7; Nov. 25; Serial Nos. 303,826–7; published Sept. 9, 1930.
Automobile trailers. Globe-Trotter, Inc., The. 277,779; Nov. 25; Serial No. 303,808; published Sept. 9, 1930.
Radiators for internal-combustion engines. McQuay Radiator Corporation. 277,857; Nov. 25.

CLASS 21

Armatures and armature-testing devices. Armature & Ignition Supply Co. 277,762; Nov. 25; Serial No. 283,320; published Sept. 9, 1930.
Electric burglar alarms and parts thereof. American Electrical Company. 277,763; Nov. 25; Serial No. 280,372; published Sept. 9, 1930.
Electrical conductors, Covered. Splitdorf Electrical Company. 277,840; Nov. 25; Serial No. 302,074; published July 15, 1930.
Lighters, Electric cigar. Casco Products Corporation. 277,750; Nov. 25; Serial No. 299,041; published Sept. 9, 1930.
Loud-speakers, Radio. Jensen Radio Manufacturing Company. 277,819–20; Nov. 25; Serial Nos. 302,899–900; published Sept. 9, 1930.
Loud-speakers, Radio. Jensen Radio Manufacturing Company. 277,828; Nov. 25; Serial No. 302,898; published Sept. 9, 1930.
Signs, Electric. Flasher Sales and Service Co. 277,818; Nov. 25; Serial No. 302,939; published Sept. 9, 1930.
Signs, Electrical. F. C. Reilly. 277,761; Nov. 25; Serial No. 289,291; published Sept. 9, 1930.
Terminal connectors. W. J. Hunter. 277,764; Nov. 25; Serial No. 277,112; published Sept. 9, 1930.

CLASS 22

Bait, Artificial. Enterprise Manufacturing Company. 277,752; Nov. 25; Serial No. 296,733; published Sept. 9, 1930.
Games. H. M. Fancher. 277,839; Nov. 25; Serial No. 302,242; published Sept. 9, 1930.
Sporting goods. Norvell-Shapleigh Hardware Company. 81,289; renewed Mar. 21, 1931.
Toys, Mechanical. W. N. Tiencken. 277,833; Nov. 25; Serial No. 302,654; published Sept. 9, 1930.

CLASS 23

Bit cones, Rotary rock-. Garber Tool Company. 277,727; Nov. 25; Serial No. 303,177; published Sept. 9, 1930.
Fire-extinguishing apparatus. General Fire Extinguisher Company. 80,118; renewed Nov. 8, 1930.
Grain blowers. Link Manufacturing Co. 277,712; Nov. 25; Serial No. 295,270; published Sept. 9, 1930.
Machines, Office. C. L. Werk, jr. 277,771; Nov. 25; Serial No. 303,929; published Sept. 9, 1930.
Motors, pumps, injectors, etc., Explosion. "Zündapp" Ges. für den Bau von Spezialmaschinen m. b. H. 277,651; Nov. 25; Serial No. 288,046; published Sept. 9, 1930.
Razors and blades. J. Holtz. 277,700; Nov. 25; Serial No. 292,935; published Sept. 9, 1930.
Razors, razor-blade holders, and razor blades, Safety. Ericsson Screw Machine Products Co. 277,780; Nov. 25; Serial No. 303,804; published Sept. 9, 1930.
Ring travelers. U. S. Ring Traveler Company. 277,859; Nov. 25.
Seeders and drills, Grain. La Crosse Plow Company. 35,445; renewed Nov. 13, 1930.
Shovels, tractor shovels, skimmers, etc., Power. Bay City Shovels, Inc. 277,775; Nov. 25; Serial No. 303,873; published Sept. 9, 1930.
Sweepers, Carpet. Bissell Carpet Sweeper Company. 80,976–82; renewed Feb. 21, 1931.
Tools and machinery. Van Camp Hardware & Iron Company. 81,560; renewed Apr. 18, 1931.
Underreamers. Bridgeport Machine Company. 277,850–2; Nov. 25.
Valves, Automatic. Ingersoll-Rand Company. 277,800; Nov. 25; Serial No. 303,185; published Sept. 9, 1930.
Vending machines, Vendi-Cater, Inc. 277,791; Nov. 25; Serial No. 303,755; published Sept. 9, 1930.
Vending machines, Coin-operated. Uneedapak Products Company. 277,823; Nov. 25; Serial No. 302,703; published Sept. 9, 1930.

CLASS 26

Air piloting and computing devices. A. R. Melhuish. 277,724; Nov. 25; Serial No. 299,922; published Sept. 9, 1930.

Counting machines. E. R. Ammon. 277,790; Nov. 25; Serial No. 303,795; published Sept. 9, 1930.
Pyrometer. American Demag Corporation. 277,798; Nov. 25; Serial No. 303,361; published Sept. 9, 1930.
Rules. Stanley Works. 277,718; Nov. 25; Serial No. 300,824; published Aug. 26, 1930.

CLASS 27

Clocks, clock movements, and parts. M. Winterhalder & Hofmeier G. m. b. H. 277,657; Nov. 25; Serial No. 282,329; published Sept. 9, 1930.
Clocks, Electric. New Jersey Clock Company. 277,681; Nov. 25; Serial No. 303,974; published Sept. 9, 1930.
Clocks, Porcelain. Irving Miller & Co. 277,690; Nov. 25; Serial No. 303,293; published Sept. 9, 1930.
Watches. Bulova Watch Company. 277,684; Nov. 25; Serial No. 303,836; published Sept. 9, 1930.

CLASS 28

Articles made of or plated with precious metal consisting of pins, watch fobs, and medals. Delta Psi. 277,756; Nov. 25; Serial No. 293,961; published Sept. 9, 1930.
Pins, badges, and pendants, Pledge. Delta Omicron. 277,813; Nov. 25; Serial No. 303,278; published Sept. 9, 1930.

CLASS 29

Brooms and brushes, Whisk. Palmetto Whisk & Broom Company. 277,812; Nov. 25; Serial No. 303,341; published Aug. 26, 1930.
Brushes, Bath. Continental Manufacturing Corporation, Ltd. 277,680; Nov. 25; Serial No. 304,040; published Sept. 9, 1930.
Cloths, Polishing. F. J. Bankle. 277,697; Nov. 25; Serial No. 302,456; published Sept. 9, 1930.

CLASS 30

Salt and pepper shaker constructed of china, combination. W. H. Montgomery. 277,831; Nov. 25; Serial No. 302,736; published Sept. 9, 1930.

CLASS 32

Tables, cases, desks, etc. Gunn Furniture Company. 277,701; Nov. 25; Serial No. 299,572; published Sept. 9, 1930.

CLASS 33

Glass bottles and jars. Hazel-Atlas Glass Company. 81,527; renewed Apr. 18, 1931.

CLASS 34

Burners, Oil. Waltham Oil Burner Corporation. 277,722; Nov. 25; Serial No. 300,094; published Sept. 9, 1930.
Burners, Vaporizing oil. Regal Corporation. 277,799; Nov. 25; Serial No. 303,257; published Sept. 9, 1930.
Furnaces, Coal. Standard School Company. 277,856; Nov. 25.
Heating grilles. Tuttle & Bailey Manufacturing Company. 277,785; Nov. 25; Serial No. 302,973; published Sept. 9, 1930.
Radiators of heating systems and unit heaters and radiator and coils for heat-exchange units. McQuay Radiator Corporation. 277,858; Nov. 25.
Reflectors, Metal. Testrite Instrument Company. 277,844; Nov. 25.

CLASS 35

Belt, Sold woven cotton. Victor Balata & Textile Belting Co. 277,855; Nov. 25.
Brake linings and asbestos clutch facings, Asbestos. Multibestos Company. 277,821; Nov. 25; Serial No. 303,019; published Sept. 9, 1930.
Tires, Vehicle. United States Rubber Company. 277,822; Nov. 25; Serial No. 302,918; published Sept. 9, 1930.
Tubing, Flexible metallic. Pennsylvania Flexible Metallic Tubing Company. 80,870; renewed Feb. 7, 1931.

CLASS 37

Paper. District of Columbia Paper Manufacturing Company. 80,466; renewed Dec. 27, 1930.
Paper. District of Columbia Paper Manufacturing Company. 80,767; renewed Jan. 31, 1931.
Paper, and more particularly such paper as is used for wrapping purposes. American Lakes Paper Company. 277,713–14; Nov. 25; Serial Nos. 293,359–60; published Sept. 9, 1930.
Paper, Writing and printing. W. M. Donaldson. 81,438; renewed Apr. 11, 1931.
Paper, Writing and printing. Strathmore Paper Company. 277,723; Nov. 25; Serial No. 300,038; published Sept. 9, 1930.
Pencils, Lead. Eagle Pencil Company. 80,768; renewed Jan. 31, 1931.
Pens, Fountain. Wahl Company. 277,652; Nov. 25; Serial No. 287,513; published Sept. 9, 1930.

CLASS 38

Books. Lamar & Whitmore, Book Agents, Publishing House, M. E. Church, South. 277,746; Nov. 25; Serial No. 301,041; published Sept. 9, 1930.
Magazine. Automobile Club of New Haven County. 277,730; Nov. 25; Serial No. 303,735; published Sept. 9, 1930.

Magazine. Bruce Publishing Company. 277,737; Nov. 25; Serial No. 302,723; published Sept. 9, 1930.
Magazine. House Furnishing Review Company. 277,656; Nov. 25; Serial No. 283,194; published Sept. 9, 1930.

American Brass Company, The. (See Hook, Ira T., assignor.)
American Cast Iron Pipe Company. (See Morgan, Walter, assignor.)
American Flyer Mfg. Co. (See Becker, Harry S., assignor.)
American Hardware Corporation, The. (See Teich, Ernest L., assignor.)
American Optical Company. (See Tillyer, Edgar D., assignor.)
American Telephone and Telegraph Company. (See Labaugh, James M., assignor.)
American Telephone and Telegraph Company. (See Ohl, Russell S., assignor.)
Amler, Jaroslav, Stamford, Conn. Automobile trap bumper. 1,783,066; Nov. 25.
Amsler, Alfred J., Schaffhausen, Switzerland. Hydraulic press particularly for testing materials. 1,782,595; Nov. 25.
Amy, Aceves & King, Inc. (See Amy, Ernest V., assignor.)
Amy, Ernest V., assignor to Amy, Aceves & King, Inc., New York, N. Y. Absorption of sound. 1,782,399; Nov. 25.
Anaconda Copper Mining Company. (See Carstens, Carl E., assignor.)
Anaconda Copper Mining Company. (See Garred, Ulysses A., assignor.)
Anchelevich, Max, Cincinnati, Ohio. Leak-tester cap for automobile radiators. 1,782,496; Nov. 25.
Anderson, Fred M., New Orleans, La. Electric power circuit control system. 1,783,067; Nov. 25.
Anderson, Hans O., Hampton Bays, N. Y. Clam-catching implement. 1,782,497; Nov. 25.
Anderson, John A., assignor to The Bridgeport Hardware Manufacturing Corporation, Bridgeport, Conn. Screw driver. 1,782,981; Nov. 25.
Andreas, Arno, Munster, Germany. Screen for disintegrating machines. 1,782,953; Nov. 25.
Andrews, Dennis C., assignor to The Northwest Paper Company, Cloquet, Minn. Bleaching pulp. 1,782,800; Nov. 25.
Appelbaum, Isaac, Brooklyn, N. Y. Folding container. 1,783,068; Nov. 25.
Appleton, Ernst G. (See Newman, C., and Appleton.)
Apter, Saul, Cincinnati, Ohio. Traveling case. Des. 82,596; Nov. 25.
Ardco Manufacturing Company. (See Ellis, D. S., and Zusy, assignors.)
Armbruster, Charles E. H., Denver, Colo. Diagnostic instrument. 1,782,705; Nov. 25.
Arnold, William T., Hempstead, N. Y. Electrical meter switch. 1,782,454; Nov. 25.
Askania-Werke Aktiengesellschaft vormals Centralverkstatt Dessau und Carl Bamberg-Friedenau. (See Reipert, Ernst, assignor.)
Astels, Ernest W. (See Palmer, William, assignor.)
Atlantic Service Company. (See Schaefer, Adolph O., assignor.)
Austin, Robert A., Chicago, Ill. Appliance for invalids. 1,782,672; Nov. 25.
Autokraft Box Corporation. (See Adamson, Allan A., assignor.)
Automatic Burner Corporation. (See Perry, Stanley, assignor.)
Automatic Coffee Creamer Incorporation. (See Bronson, E. G., and Russell, assignors.)
Automatic Molding Machine Corporation. (See Morris, T. O., and Lawlor, assignors.)
Automatic Oilingseal Corporation. (See Morrow, Emmet H., assignor.)
Autoyre Company, The. (See Mosgrove, Charles A., assignor.)
Axell, Fred H., Oakland, Calif. Attachment for containers. 1,782,886; Nov. 25.
Ayers, Everett, Brooklyn, assignor of one-third to H. Ayers, Chicago, and one-third to J. Ayers, Camden, Ill. Seed replanting attachment for cultivators. 1,783,032; Nov. 25.
Ayers, Hester, et al. (See Ayers, Everett, assignor.)
Ayers, James, et al. (See Ayers, Everett, assignor.)
Babcock & Wilcox Company, The. (See Jones, Edwin W., assignor.)
Babcock & Wilcox Company, The. (See Jones, William A., assignor.)
Babcock & Wilcox Company, The. (See Savoye, Charles U., assignor.)
Baden-Powell, Baden F. S., Riverhead, Sevenoaks, England. Centrifugal gun. 1,783,053; Nov. 25.
Bader, Fred W., Hillsdale, N. J., assignor to J. Kridel, Sons & Co. Textile fabric. Des. 82,597; Nov. 25.
Baehn, Frederick, Jersey City, N. J. Radio loud-speaker. 1,782,801; Nov. 25.
Bagasse Products Corporation. (See de la Roza, Joaquin J., sr., assignor.)
Baker, Dexter C., Oakland, assignor to Baker-Hansen Manufacturing Co., Alameda, Calif. Rotary pump. 1,782,771; Nov. 25.
Baker, Guy. (See Stanford, F. G. and Baker.)
Baker-Hansen Manufacturing Co. (See Baker, Dexter C., assignor.)
Baker Ice Machine Co. Inc. (See Hoffman, John F., assignor.)
Baker, Richard D., Spokane, Wash. Safety razor. 1,782,455; Nov. 25.
Bancroft, William B. (See Blackburn, J. H., and Bancroft.)
Barber Asphalt Company, The. (See Freegard, William, assignor.)
Barcley Corset Company. (See Gray, Etta, assignor.)
Barium Reduction Corporation. (See Pierce, James B., jr., assignor.)
Barker Manufacturing Company, The. (See Zeilinger, John F., assignor.)
Barker, Winston C., Detroit, Mich. Brake mechanism. 1,783,104; Nov. 25.
Barnard, Neal G., Minneapolis, Minn. Pencil sharpener. 1,783,146; Nov. 25.
Barnard, Neal G., Minneapolis, Minn. Laundry apparatus. 1,783,147; Nov. 25.
Barnes Drill Company. (See Johnson, Albert M., assignor.)
Barr, Archie. (See Kelly, W. J., Burns, and Barr.)

Barratt, Whitford R. (See Rial, W. D., and Barratt.)
Barrett Company, The. (See Martin, Samuel G., assignor.)
Barrett Company, The. (See Miller, Stuart P., assignor.)
Bartholomew, Sherman, Guerneville, assignor of one-half to H. Harris, Rionide, Calif. Drinking fountain for poultry or small animals. 1,782,673; Nov. 25.
Bartlett Hayward Company, The. (See Wagner, Frederick H., assignor.)
Bassett, Bert L. (See Abbott, C. C., and Bassett.)
Bassett, Irvin L. (See Abbott, C. C., and Bassett.)
Bassett, Willard E. (See Abbott, C. C., and Bassett.)
Bauer, Conrad, Mount Oliver, Pa. Venetian blind. 1,782,954; Nov. 25.
Bauer, Wilhelm, Wiesdorf-on-the-Rhine, W. Neelmeier, and T. Nocken, Leverkusen-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y. New indigoid dyestuffs. 1,782,706; Nov. 25.
Baumgartner, August, Hollis, assignor to R. Hoe & Co., Inc., New York, N. Y. Web-cutting mechanism. 1,782,674; Nov. 25.
Bayley, William, Springfield, Ohio. Road-building apparatus. 1,782,707; Nov. 25.
Bayley, William D., Springfield, Ohio. Silo. 1,782,675; Nov. 25.
Bazzoni, Lewis J., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Burnishing machine. 1,782,802; Nov. 25.
Beardsley, Arthur L., Elkhart, Ind. Tubular container. 1,782,526; Nov. 25.
Becker, Harry S., River Forest, assignor to American Flyer Mfg. Co., Chicago, Ill. Track switch for toy electric railroads. 1,783,069; Nov. 25.
Becker, Julius H., San Francisco, Calif. Pressure indicator. 1,782,803; Nov. 25.
Bellgard, Harvey A., Hollywood, Calif. Automatic food-unit-filling machine. 1,782,596; Nov. 25.
Beimling, William A., assignor to National Brake & Electric Company, Milwaukee, Wis. Radiator. 1,782,394; Nov. 25.
Bell & Howell Company, The. (See Howell, Albert S., assignor.)
Bell Telephone Laboratories, Incorporated. (See Snook, Homer C., assignor.)
Bendix Aviation Corporation. (See Stelzer, William, assignor.)
Benjamin, Bert R., Oak Park, Ill., assignor to International Harvester Company. Tractor stalk chopper. 1,782,560; Nov. 25.
Benjamin, E. V., Co., The. (See Orndoff, Herbert W., assignor.)
Bennett, Bert L. (See Glenn, J. H., jr., and Bennett.)
Bennett, Inslee A., Pittsburgh, Pa., assignor to National Electric Products Corporation, New York, N. Y. Electric wiring device and accessory. 1,782,527; Nov. 25.
Bensa, Felice. (See Penecke, Walther, assignor.)
Bergemann, Frederick R., Pueblo, Colo. Screw driver. 1,783,070; Nov. 25.
Berger, Knute, Seattle, Wash. Hoisting and hauling carriage for use on elevated trackways. 1,782,528; Nov. 25.
Best Foods, Inc. (See Schaub, Jacob, assignor.)
Bethlehem Steel Company. (See Keller, Albert T., assignor.)
Betts, Benjamin B. (See Miller, H., and Betts.)
Biermanns, Josef, Karlshorst, Germany, assignor to General Electric Company. Circuit protection. 1,783,105; Nov. 25.
Bigelow-Sanford Carpet Co. (See Stone, E. W., and Martin, assignors.)
Biggert, Florence C., jr., Crafton, assignor to United Engineering & Foundry Company, Pittsburgh, Pa. Apparatus for charging furnaces and the like. 1,782,955; Nov. 25.
Biggs, George A., assignor to Rodney Hunt Machine Company, Orange, Mass. Turbine-regulating device. 1,782,456; Nov. 25.
Biggs, George A., assignor to Rodney Hunt Machine Company, Orange, Mass. Link for hydraulic turbines. 1,782,498; Nov. 25.
Biron, Athanase, Montreal, Quebec, Canada. Signal switch for dispensing apparatus. 1,783,106; Nov. 25.
Black, Harvey T., Lexington, N. C. Door-operating mechanism. 1,782,982; Nov. 25.
Black, John C., Wilmington, Calif., assignor, by mesne assignments, to Gasoline Products Company, Inc., Wilmington, Del. Method of cracking and processing petroleum hydrocarbons. 1,782,676; Nov. 25.
Blackburn, John H., Preston, and W. E. Bancroft, Accrington, assignors to Howard & Bullough Limited, Accrington, England. Ring for the unwinding of yarn from yarn containers in cable-cord frames or other twisting or doubling frames. 1,782,772; Nov. 25.
Blackhall, John R. (See Cordell, H., and Blackhall.)
Blackman, Horace L., assignor to The Parker Pen Company, Janesville, Wis. Dispensing cabinet. 1,782,597; Nov. 25.
Boardman, Raymond H. (See Young, F. A., and Boardman.)
Boella, Giovanni, assignor to Soc. An. Officine Di Villar Perosa, Turin, Italy. Shock absorber. 1,782,457; Nov. 25.
Bolard, Alfred J. G., Vernon, Eure, assignor to "Rusbol," Société à Responsabilité Limitée, Clichy, France. Wheel-lifting device. 1,782,400; Nov. 25.
Boldizsár, Frank, Rakospalota, Hungary. Self-balancing plansifter. 1,782,561; Nov. 25.
Boltz, Fred S., Mansfield, Mass. Soil-water catch basin and heat reclaimer. 1,783,033; Nov. 25.
Bondy Auto Top Company, The. (See Bondy, Charles M., assignor.)
Bondy, Charles M., assignor to The Bondy Auto Top Company, Cleveland, Ohio. Button. Re17,877; Nov. 25.
Bonnar-Vawter Fanform Company. (See Fulk, George L., assignor.)
Booth, Clement, assignor to Cincinnati Grinders Incorporated, Cincinnati, Ohio. Producing noncylindrical articles. 1,783,034; Nov. 25.
Bordas de la Fé, César, Habana, Cuba. Plow. 1,782,598; Nov. 25.
Borden Company, The. (See Olsen, Olaf C., assignor.)
Borden Company, The. (See Taylor, Burt E., assignor.)
Borden, Stephen W., Summit, N. J. Earth electrode. 1,783,035; Nov. 25.
Borglin, Joseph N., Kenvil, N. J., assignor to Hercules Powder Company, Wilmington, Del. Producing rosin oil. 1,782,401; Nov. 25.
Botwin, Harry. (See Neuschafer, F., and Botwin.)
Boutin, Joseph A., Phoenix, Ariz. Clinical thermometer. 1,782,599; Nov. 25.
Bouton, Edgar M., East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Elevator-control system. 1,782,708; Nov. 25.
Bouvier, George A., Oak Park, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Method of and apparatus for testing electrical conductors. 1,782,403; Nov. 25.
Bouvier, George A., Oak Park, and H. L. Case, Maywood, Ill., assignors to Western Electric Company, Incorporated, New York, N. Y. Apparatus for testing electrical conductors. 1,782,402; Nov. 25.
Bowly, Heyward W., Summit, and W. W. McWilliams, South Orange, N. J., assignors to Western Electric Company, Incorporated, New York, N. Y. Clamping device. 1,782,404; Nov. 25.
Boyce, Harrison H., Jericho, N. Y. Instrument-board mounting. 1,782,405; Nov. 25.
Boychuk, John P. (See Boychuk, Nicholas P. and J. P.)
Boychuk, Nicholas P. and J. P., Edmonton, Alberta, Canada. Sheaf-shocking machine. 1,782,837; Nov. 25.
Bradley, Anson K., assignor to Morgan Construction Company, Worcester, Mass. Gas producer. 1,782,677; Nov. 25.
Brado, George T., Reno, Nev. Burner. 1,782,600; Nov. 25.
Brady, Charles T., Detroit, Mich. Lamp shade. 1,782,601; Nov. 25.
Brand, Edwin J. (See Neuberger, Franklin H., assignor.)
Brandon, Francis, New Albany, Ind. Handle. 1,783,107; Nov. 25.
Breitenstein, Albert F., assignor to The Geometric Tool Co., New Haven, Conn. Collapsing taper-thread tap. 1,782,804; Nov. 25.
Breitling, Adolf, Tampico, Mexico, assignor of eighteen per cent to G. L. Zarate and seven per cent to J. E. Palmer. Charge-treating device for internal-combustion engines. 1,782,709; Nov. 25.
Brenneman, Milton B., Davenport, Iowa. Physics laboratory apparatus. 1,782,644; Nov. 25.
Brennen, William J., Scottdale, Pa. Motor protective device. 1,782,458; Nov. 25.
Bridgeport Hardware Manufacturing Corporation, The. (See Anderson, John A., assignor.)
Briechle, Ambrosius, assignor to Fairchild Aerial Camera Corporation, New York, N. Y. Aerial camera. 1,782,864; Nov. 25.
Brill, J. G., Company, The. (See Sayres, C., and Peabody, assignor.)
Brillié, Eugene, Paris, France. Apparatus for signaling condition of fluid in conduits. 1,782,838; Nov. 25.
Bristol, Wm. H., Talking Picture Corporation. (See Garrigus, Clarence G., assignor.)
British Dyestuffs Corporation Limited. (See Cronshaw, C. J. T., and Naunton, assignors.)
Broeman, Frank C., assignor to A. Silbersack, Cincinnati, Ohio. Cleaning powder. 1,782,805. Nov. 25.
Bronson, Ek G., Detroit, Mich., and J. W. Russell, East Orange, N. J., assignors to Automatic Coffee Creamer Incorporation, Detroit, Mich. Method and apparatus for dispensing liquids. 1,782,678; Nov. 25.
Brown, George R., Bridgeport, Conn., assignor to General Electric Company. Thermal cut-out and guard. 1,782,459; Nov. 25.
Brownell, James L., assignor to Checker Cab Manufacturing Corporation, Kalamazoo, Mich. Door handle. Des. 82,598; Nov. 25.
Brownell, James L., assignor to Checker Cab Manufacturing Corporation, Kalamazoo, Mich. Window-regulator handle. Des. 82,599; Nov. 25.
Brownell, James L., assignor to Checker Cab Manufacturing Corporation, Kalamazoo, Mich. Handle. Des. 82,600; Nov. 25.
Brownell, James L., assignor to Checker Cab Manufacturing Corporation, Kalamazoo, Mich. Picture or card holder. Des. 82,601; Nov. 25.
Brownell, James L., assignor to Checker Cab Manufacturing Corporation, Kalamazoo, Mich. Lamp housing. Des. 82,602; Nov. 25.

Bruckmann, Peter C., St. Louis, Mo., assignor by mesne assignments to Vorclone Company. Bearing construction. 1,782,710; Nov. 25.
Bruckmann, Peter C., St. Louis, Mo., assignor, by mesne assignments, to Vorclone Company. Positioning device for laundry machines. 1,782,983; Nov. 25.
Brunner, Emilio. (See Stansfield, E., and Brunner.)
Brush, Frederick F., assignor to Paragon Vaporizer Corporation, Chicago, Ill. Method of and apparatus for vaporizing liquid fuels. 1,782,602; Nov. 25.
Bruson, Herman A., Philadelphia, Pa., assignor to The Resinous Products & Chemical Company. Mixed esters of colophony and related substances. 1,783,165; Nov. 25.
Bruson, Herman A., Philadelphia, Pa., assignor to The Resinous Products & Chemical Company. Resin plasticizer. 1,783,166; Nov. 25.
Bruson, Herman A., Germantown, Pa., assignor to The Resinous Products & Chemical Company. Preparation of rubberlike masses. 1,783,167; Nov. 25.
Bruson, Herman A., Germantown, Pa., assignor to The Resinous Products & Chemical Company. Condensation product and preparing same. 1,783,168; Nov. 25.
Budlong, Edward J., assignor to Budlong & Funchess Motor Products Co., Hanford, Calif. Spreader. 1,783,071; Nov. 25.
Budlong & Funchess Motor Products Co. (See Budlong, Edward J., assignor.)
Bullinger Engine Heads. (See Bullington, Frank A., assignor.)
Bullington, Frank A., assignor to Bullington Engine Heads, Kansas City, Mo. Engine combustion chamber. 1,782,395; Nov. 25.
Bureau, Arthur A., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Portable crane. 1,782,406; Nov. 25.
Burgess, Laurie L., Cambridge, Mass., assignor to Plastic, Inc., Keene, N. H. Producing compositions containing compounds of alginic acid and product thereof. 1,782,887; Nov. 25.
Burns, Milton P. (See Kelly, W. J. Burns, and Barr.)
Burrage, Albert E. (See Sharman, H. B., and Burrage.)
Burrows, Robert J., assignor to Clark Tructractor Company, Buchanan, Mich. Automobile lift truck. 1,782,865; Nov. 25.
Butler, Leland K., Manchester, N. H., assignor, by mesne assignments, to Excel Taping Machine Co., Lynn, Mass. Tape-applying machine. 1,782,532; Nov. 25.
Byrnes, Clarence P., trustee. (See James, Joseph H., assignor.)
Byron, Jerome P., assignor, by mesne assignments, to Excel Taping Machine Co., Lynn, Mass. Tape-applying machine. 1,782,563; Nov. 25.
Cadieux, Joseph O., assignor, by mesne assignments, to Connecticut Telephone & Electric Company, Inc., Meriden, Conn. Telephone-instrument switching. 1,782,806; Nov. 25.
Cady, Hilda H., Saranac Lake, N. Y. Hair waver. 1,783,108; Nov. 25.
California Cedar Products Company. (See Chichester, O. F., and Sylva, assignors.)
California Peach & Fig Growers Association. (See Tyler, J. G., Taylor, and Johnson, assignors.)
Callahan, Michael J., New York, N. Y. Concealed unit for heating and ventilating. 1,782,711; Nov. 25.
Calvert, Raymond A. (See Goddard, J., and Calvert.)
Cambridge Instrument Company. (See Sutton, Charles D., assignor.)
Cameron, Everett S., Tottenville, N. Y. Valve action for internal-combustion engines. 1,782,839; Nov. 25.
Campbell, Harry E., and E. F. Mekelburg, Milwaukee, Wis., assignors, by mesne assignments, to Cutler-Hammer, Inc. Electric switch. 1,782,916; Nov. 25.
Camuset Charles, Bretigny-sur-Orge, France. Diffusion plant. 1,782,603; Nov. 25.
Cann, Harry E., West Chester, Pa. Milk cooler. 1,782,840; Nov. 25.
Carey, Philip, Manufacturing Company, The. (See Fisher, Harry C., assignor.)
Carlile, Frank S., Abington, Pa. Battery cover. 1,782,984; Nov. 25.
Carlson, Albin V., Degerhamn, Sweden. Manufacturing porous building materials. 1,782,460; Nov. 25.
Carlson, Harvey, Cheboygan, Mich. Lamp. 1,782,917; Nov. 25.
Carney, George A., Dorchester, Mass. Skate. 1,782,499; Nov. 25.
Carr, William C., Richmond, Va. Exercising and massaging machine. 1,782,866; Nov. 25.
Car-Record Company, The. (See Souter, Eugene H., assignor.)
Carrigus, Clarence G., Bristol, assignor, by mesne assignments, to Wm. H. Bristol Talking Picture Corporation, Waterbury, Conn. Speed-control apparatus. 1,782,990; Nov. 25.
Carroll, Robert A. (See Elliott, H. L., and Carroll.)
Carstens, Carl E., assignor to Anaconda Copper Mining Company, Anaconda, Mont. Treating copper ores preparatory to leaching. 1,782,841; Nov. 25.
Carter, William C., Flint, Mich. Solenoid motor for fuel pump. 1,782,407; Nov. 25.
Cartlidge, Frank, assignor to Cincinnati Mine Machinery Co., Cincinnati, Ohio. Mining-machine cutter chain. 1,782,408; Nov. 25.
Case, Harry L. (See Bouvier, G. A., and Case.)
Case, J. I., Company. (See MacGregor, W. F., and Krause, assignors.)
Casey-Hedges Company, The. (See Moses, A. J., and Wright, assignors.)
Castorlube Refining Co. (See Clough, Roscoe E., assignor.)
Central Foundry Company, The. (See Crotty, Joseph J., assignor.)
Champion Spark Plug Company. (See Rohde, Otto C., assignor.)
Chapal Donner Corporation, The. (See Plass, Robert H., assignor.)
Chapman Electric Neutralizer Company. (See Chapman, William H., assignor.)
Chapman, Verni J., Schenectady, N. Y., assignor to General Electric Company. Welding machine. 1,782,461; Nov. 25.
Chapman, William H., assignor to Chapman Electric Neutralizer Company, Portland, Me. Controlling electrostatic charges on moving surfaces. 1,782,712; Nov. 25.
Chappelka, Arthur H., Lakeline, Ohio. Hoist. 1,782,679; Nov. 25.
Chappuzeau, Helmut, and O. Emersleben, Kiel, Germany, assignors to the firm Neufeldt & Kuhnke Betreibsgesellschaft m. b. H., Kiel, Germany. Arrangement for testing magnetizable objects. 1,782,462; Nov. 25.
Checker Cab Manufacturing Corporation. (See Brownell, James L., assignor.)
Chemical Construction Corporation. (See Hechenbleikner, Ingenuin, assignor.)
Chemische Fabrik auf Actien (vorm. E. Schering). (See Jordan, Hans, assignor.)
Chemische Fabrik Grünau Landshoff & Meyer Aktiengesellschaft. (See Kirchner, Walter, assignor.)
Cherry-Burrell Corporation. (See Maanum, Dedrick A., assignor.)
Cherry-Burrell Corporation. (See Rosenfeld, Louis, assignor.)
Chicago Bridge & Iron Company. (See Griffin, Alvah M., assignor.)
Chicago Faucet Company, The. (See Gavin, John H., assignor.)
Chicago Mill and Lumber Corporation. (See Gerlach, Charles W., assignor.)
Chichester, Oscar F., and J. J. Sylva, assignors to California Cedar Products Company, Stockton, Calif. Slat waxing and stacking machine. 1,782,645; Nov. 25.
Chickering, Krikor B. (See Erysin, H. A., and Chickering.)
Chidester, John H., Chatham, N. J. Ticker-tape control. 1,783,008; Nov. 25.
Chiles, Robert L., Knoxville, Tenn. Detector-tube circuit. 1,782,500; Nov. 25.
Chireix, Henri, Paris, France. Frequency-regulating system. 1,782,807; Nov. 25.
Chireix, Henri, Paris, France. Antenna system. 1,783,072; Nov. 25.
Chislock, Anthony, Stamford, Conn. Vehicle direction indicator. 1,782,773; Nov. 25.
Chr. Gfeller Aktiengesellschaft. (See Trachsel, Fritz., assignor.)
Chr. Hostmann-Steinberg Sche Farbenfabriken G. m. b. H. (See Machtolf, Josef, assignor.)
Christon, George A., trustee. (See Eckert, George F., assignor.)
Chrysler Corporation. (See McClellan, Harry S., assignor.)
Chute, Harry O., New York, N. Y. Vulcanization of rubber. 1,782,713; Nov. 25.
Chute, Stanley J., Ridgewood, N. J., assignor to The Griscom-Russell Company, New York, N. Y. Heat exchanger. 1,782,409; Nov. 25.
Cincinnati Grinders Incorporated. (See Booth, Clement, assignor.)
Cincinnati Grinders Incorporated. (See Seward, Ernest R., assignor.)
Cincinnati Grinders Incorporated. (See Turner, Albert, assignor.)
Cincinnati Mine Machinery Co. (See Cartlidge, Frank, assignor.)
Clark, George P. (See Dodge, John H., assignor.)
Clark, Keith, Ridgewood, N. J. Desk calendar. 1,782,985; Nov. 25.
Clark Tructractor Company. (See Burrows, Robert J., assignor.)
Clench, Claude, Dumfries, Scotland. Balancing of crank shafts. 1,783,073; Nov. 25.
Cleveland Switchboard Company, The. (See Hafemeister, Fred F., assignor.)
Clough, Roscoe E., Palo Alto, assignor to Castorlube Refining Co., San Francisco, Calif. Engine lubricant and process of making. 1,782,501; Nov. 25.
Colantuono, Mauro, Pittston, and S. Pineno, Wyoming, Pa. Lock nut. 1,782,463; Nov. 25.
Comey, R. H., Brooklyn Company. (See Geisler, Edgar W., assignor.)
Commanditaire Vennootschap; J. B. van Heijst & Zonen. (See van Heijst, Franciscus W., assignor.)
Compagnie Lorraine De Charbons pour L'Electricite. (See Oswald, Marcel, assignor.)
Compagnie Nationale de Matieres Colorantes et Manufactures de Produits Chimiques du Nord Reunies, Etablissements Kuhlman. (See Durr, André H. V., assignor.)

Compton, James T., Los Angeles, Calif. Ground scraper and leveler. 1,782,646; Nov. 25.
Coulon Corporation. (See Janda, Rudolph W., assignor.)
Connecticut Telephone & Electric Company. (See Cadieux, Joseph O., assignor.)
Connecticut Telephone & Electric Corporation. (See Young, F. A., and Boardman, assignors.)
Connery, William M., Philadelphia, Pa. Wall covering and support therefor. 1,782,774; Nov. 25.
Connolly, Gerald C. (See Miller, E. B., and Connolly.)
Continental Can Co. Inc. (See Coyle, John, assignor.)
Continental Diamond Fibre Company. (See Frederick, Louis T., assignor.)
Cook, David B., assignor to Acme Road Machinery Company, Frankfort, N. Y. Road machinery. 1,783,009; Nov. 25.
Cook, Joshua. (See Woodcock, R. B., and Cook.)
Cook, L. D., Kansas City, Mo. Storage garage. 1,782,410; Nov. 25.
Cooper, Ethel A. (See Erhardt, Fred, assignor.)
Copland, Alexander W., deceased, by Detroit & Security Trust Company, Detroit, Mich., assignee, and M. I. Mathewson, Providence, R. I., assignors to Detroit & Security Trust Company, Detroit, Mich. Truing gears. Re17,884; Nov. 25.
Cordell, Henry, Wilmette, and J. R. Blackhall, Highland Park, Ill., said Cordell, assignor to said Blackhall. Carwashing machine. 1,783,074; Nov. 25.
Corning Glass Works. (See Lebby, States L., assignor.)
Costello Engineering Company. (See Kneass, Strickland, jr., assignor.)
Coufal, Joseph F., and H. A. Smith, New York, N. Y. Electric sign. 1,782,584; Nov. 25.
Coyle, John, Baltimore, Md., assignor to Continental Can Co. Inc., New York, N. Y. Marking device for can-closing machines. 1,783,109; Nov. 25.
Crane, Charles A., Winthrop, assignor of one-half to E. G. Wurzburg, Quincy, Mass. Combination polish applying and finishing mitt. 1,782,502; Nov. 25.
Crawford, Henry V., Schenectady, N. Y., assignor to General Electric Company. Control mechanism for centrifugal compressors and operating the same. 1,783,036; Nov. 25.
Crittall Casement Window Company. (See Jorss, Karl F., assignor.)
Crocker-Wheeler Electric Manufacturing Company. (See Edmunds, H. M., and Waring, assignors.)
Cronshaw, Cecil J. T., and W. J. S. Naunton, Blackley, Manchester, assignors to British Dyestuffs Corporation Limited, Manchester England. Use of the mono- and di-carbalkoxy-diarylthioureas as accelerators in the vulcanization of rubber. 1,782,842; Nov. 25.
Cross Development Corporation. (See Cross, Roy, assignor.)
Cross, Roy, Kansas City, Mo., assignor to Cross Development Corporation, Wilmington, Del. Treating hydrocarbons. 1,782,808; Nov. 25.
Cross, Walter M. (See Hawthorne, Joseph G., assignor.)
Crotty, Joseph J., assignor to The Central Foundry Company, New York, N. Y. Waste and vent fitting. 1,782,775; Nov. 25.
Cruikshank, James W. (See Merian, F., and Cruikshank.)
Currier, Hiram D., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Socket. 1,782,411; Nov. 25.
Cutler-Hammer, Inc. (See Campbell, H. E., and Mekelburg, assignors.)
Cutler-Hammer Inc. (See Hunter, Richard B., assignor.)
Dalton, Hubert, Stamford, Coll. Top for smoker's stands. Des. 82,603; Nov. 25.
Darco Corporation. (See Hill, Roy L., assignor.)
Darrach, Bradford, et al. (See Jones, Archdale J., assignor.)
Dauch, Alan D., assignor to George J. Hagan Company, Pittsburgh, Pa. Rotary-hearth furnace. 1,782,956; Nov. 25.
Davidson, Joseph, assignor to Davidson-Kennedy Company, Atlanta, Ga. Apparatus for treating oleaginous material. 1,782,714; Nov. 25.
Davidson-Kennedy Company. (See Davidson, Joseph, assignor.)
Davidson, Philip, assignor to International Combustion Engineering Corporation, New York, N. Y. Central lubrication system for roller-mill rollers. 1,782,867; Nov. 25.
Davis, Harold G., assignor to The Davis and Son Manufacturing Company, Denver, Colo. Oil-dispensing device. 1,782,715; Nov. 25.
Davis and Son Manufacturing Company, The. (See Davis, Harold G., assignor.)
Dawson, Elma N. (See Dawson, James C., assignor.)
Dawson, James C., assignor to E. N. Dawson, Webster Groves, Mo. Loose-leaf binder. 1,782,647; Nov. 25.
Dean, Dion K., Rahway, N. J., assignor to Foster Wheeler Corporation, New York, N. Y. Apparatus for condensing steam. 1,782,986; Nov. 25.
Dearborn, Richard J., Summit, N. J., assignor to The Texas Company, New York, N. Y. Method and apparatus for cracking hydrocarbon oils. 1,783,010; Nov. 25.
Deetjen, Richard, Berlin-Wilmersdorf, assignor to Siemens-Schuckertwerke Aktiengesellschaft, Berlin-Siemensstadt, Germany. High-speed vessel. 1,782,868; Nov. 25.
Defris, Rudolf, Stockerau, and R. Wilder, Vienna, Austria. Manufacture of activated carbon. 1,783,110; Nov. 25.
De la Roza, Joaquin J., sr., Brooklyn, assignor to Bagasse Products Corporation, New York, N. Y. Recovering the fibrous material from sugar cane. 1,782,869; Nov. 25.
Delattre-Seguy, Jean, assignor to Universal Oil Products Company, Chicago, Ill. Process and apparatus for treating oil. 1,782,809; Nov. 25.
Delattre-Seguy, Jean, assignor to Universal Oil Products Company, Chicago, Ill. Process and apparatus for distilling liquids. 1,782,810; Nov. 25.
Delattre-Seguy, Jean, assignor to Universal Oil Products Company, Chicago, Ill. Treating hydrocarbons. 1,782,811; Nov. 25.
De Montmollin, Guillaume. (See Gubler, H., De Montmollin, and Spieler.)
Denham, William C., Keensburg, Ill. Mechanical movement. 1,782,888; Nov. 25.
Derus, Albert E., Chicago, Ill. Mechanically-operated figure toy. 1,782,843; Nov. 25.
Detroit & Security Trust Company. (See Copland, A. W., and Mathewson.)
De Vinna, Clyde, Los Angeles, assignor to Metro-Goldwyn-Mayer Corporation, Culver City, Calif. Film-magazine-locking device. 1,782,529; Nov. 25.
Diamant Samu és Fiai, Messrs. (See Géza, Frommer, assignor.)
Dibner, Abraham B., Peekskill, N. Y. Electrical conductor. 1,782,812; Nov. 25.
Dickson, James G., Glencoe, Ill. Gasket. 1,782,870; Nov. 25.
Dictaphone Corporation. (See Johnson, Manfred J., assignor.)
Dierks, Wilhelm, Osnabruck, Germany. Stirrer mechanism. 1,782,957; Nov. 25.
Dietrichs, Charles, Little Ferry, assignor to Walker Cement Products, Inc., Union City, N. J. Concrete-pipe mold. 1,782,412; Nov. 25.
Dietrichs, Charles, Little Ferry, assignor to Walker Cement Products, Inc., Union City, N. J. Concrete-brick manufacture. 1,782,413; Nov. 25.
Dillingham, George E. (See Stadler, E. H., and Dillingham.)
Dodge, John H., assignor of one-half to G. P. Clark, Shannock, R. I. Loom. 1,782,987; Nov. 25.
Doehler Furniture Co. (See Paull, Erwin J., assignor.)
Dohnal, Frank, Euclid, Ohio. Screw holder. 1,782,565; Nov. 25.
Dolan, John, Dayton, Ohio. Lifting mechanism. 1,782,889; Nov. 25.
Do/More Chair Company. (See Alfreds, Torris H.)
Dorsey, Vernon M., Chevy Chase, Md., assignor to The American Bicheroux Company, Wilmington, Del. Sheet-glass-handling mechanism. 1,782,716; Nov. 25.
Dougherty, Charles P., Spokane, Wash. Combination control switch. 1,782,530; Nov. 25.
Dow Chemical Company, The. (See Griswold, Thomas, jr., assignor.)
Dowling, Francis J., assignor to Francis Kell & Son, Inc., New York, N. Y. Rotary bolt lock. 1,782,776; Nov. 25.
Down, Sidney G., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Automotive brake. 1,782,566; Nov. 25.
Draper Corporation. (See Jackson, Joseph B., assignor.)
Drewell, Heinrich, Berlin-Charlottenburg, Germany. Automatically copying pictures and making printing plates for printing pictures, etc. 1,782,717; Nov. 25.
Du Bose, Horace M., jr., et al. (See Glenn, J. H., jr., and Bennett, assignors.)
Duer, Caroline K., New York, N. Y. Cabinet suitcase. 1,782,414; Nov. 25.
Du Pont Rayon Company. (See Nlogret, Henri F., assignor.)
Durr, André H. V., assignor to Compagnie Nationale de Matiercs Colorantes et Manufactures de Produits Chimiques du Nord Reunies, Etablissements Kuhlmann, Paris, France. Resinous condensation product. Re17,878; Nov. 25.
Dwight, Amos T., Redbank, N. J. Strainer. 1,783,111; Nov. 25.
Dym, Jacob, assignor to Porcelier Manufacturing Company, East Liverpool, Ohio. Coffee percolator. 1,782,958; Nov. 25.
Eastman Kodak Company. (See Teague, Walter D., assignor.)
Eckart, George F., assignor to G. A. Chritton, Chicago, Ill., trustee. Flexible coupling. 1,783,158; Nov. 25.
Edgren, John, Tbayne, Wyo. Air-compressing coupling for engine cylinders. 1,782,718; Nov. 25.
Edmunds, Howard M., New York, N. Y., and E. H. Waring, Essex Fells, assignor to Crocker-Wheeler Electric Manufacturing Company, Ampere, N. J. Change-speed gear. 1,782,756; Nov. 25.
Egli, Ernst, assignor to Maschinenfabrik Rüti vormals Casper Honegger, Ruti, Switzerland. Shuttle-guard device for shuttles without threading devices for automatic looms. 1,782,604; Nov. 25.
Eichenbaum, Irving A., New York, N. Y. Hat-making machine. 1,783,112; Nov. 25.
Eisenburger, Kuno, Bistrita, Rumania, assignor to the firm of Sulzer Frères Société Anonyme, Winterthur, Switzerland. Internal-combustion engine. 1,783,075; Nov. 25.
Eisleb, Otto. (See Jensch, H., and Eisleb.)
Ekstrand, Edward B., West Somerville, Mass. Fuse plug. 1,782,719; Nov. 25.

Elliott-Fisher Company. (See Foothorap, Harry A., assignor.)
Elliott, Henry L., and R. A. Carroll, Claysville, assignors of one-third to T. W. Henderson, Washington, Pa. Ventilating apparatus. 1,782,890; Nov. 25.
Elliott, William S., Pittsburgh, Pa. Distilling apparatus. 1,782,959; Nov. 25.
Ellis, Daniel S., Hackensack, N. J., and C. J. Zusy, Yonkers, N. Y., assignors, by mesne assignments, to Ardco Manufacturing Company, Hoboken, N. J. Locomotive-bell ringer. 1,782,844; Nov. 25.
Elison, Bernard E., Walton-on-Thames, England. Apparatus for tipping and discharging railway cars. 1,782,503; Nov. 25.
Emersleben, Otto. (See Chappuzeau, H., and Emersleben.)
Engineering Products Corporation, Inc., The. (See Allen, Albert J., assignor.)
Erb, Karl, Frankfort-on-the-Main, Main-Griesheim, Germany. Decorticating and depuiping machine. 1,782,918; Nov. 25.
Erhardt, Fred, assignor to E. A. Cooper, Kansas City, Mo. Fastening for leggings and boots. 1,782,504; Nov. 25.
Erysin, Harry A., Malden, and K. B. Chickering, Brockton, Mass. Making food product. 1,782,960; Nov. 25.
Evans Auto Loading Co. Inc., The. (See Tucker, M. D., and Snyder, assignors.)
Evans, William L., Washington, Ind. Hinge. 1,783,076; Nov. 25.
Excel Magneto Company. (See Reis, Curt F., assignor.)
Excel Taping Machine Co. (See Butler, Leland K., assignor.)
Excel Taping Machine Co. (See Byron, Jerome P., assignor.)
Fairchild Aerial Camera Corporation. (See Briechle, Ambrosius, assignor.)
Fairchild Aviation Corporation. (See Aaron, Arthur H., assignor.)
Falk, Morris, Fitchburg, Mass. Master key for cylinder locks. 1,782,464; Nov. 25.
Farley, James, Hertford, England. Transmission mechanism. 1,782,605; Nov. 25.
Farmer, Clyde C., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Gasket. 1,782,567; Nov. 25.
Farmer, John F., Indianapolis, Ind. Adjustable guard for openings. 1,782,415; Nov. 25.
Fay, Alpheus, and J. L. Zehnder, Louisville, Ky. Hose or pipe clamp. 1,782,680; Nov. 25.
Fay, J. A., & Egan Company, The. (See Hirst, James E., assignor.)
Fehn, John G., Des Moines, Iowa. Base for a laundry appliance. Des. 82,638; Nov. 25.
Feinstein, Max. (See Miller, C., and Feinstein.)
Feldman, Abram L., Atlanta, Ga. Disinfecting container. 1,782,919; Nov. 25.
Fenton, Paul E., Thomaston, assignor to Scovill Manufacturing Company, Waterbury, Conn. Machine-attached rivet and burr. 1,783,113; Nov. 25.
Ferguson, William, Flint, Mich. Sheet-metal bumping-out tool. 1,783,077; Nov. 25.
Ferguson, William, Flint, Mich. Bumping-out tool. 1,783,078; Nov. 25.
Ferriera, Angeolo S., San Jose, Calif. Mold. 1,782,813; Nov. 25.
Ferris, William S. (See Alfred, Torris H., assignor.)
Ferris, William S., Elkhart, Ind. Chair or similar article. Des. 82,604; Nov. 25.
Ficks Reed Company. (See Goodman, Avrom B., assignor.)
Fildes, Frederick K., Altoona, Pa. Closure operating and locking mechanism. 1,782,845; Nov. 25.
Filter Fabrics, Inc. (See Manning, Fred W., assignor.)
Fine, Bernard M., assignor to Sanitary Products Corporation of America, Philadelphia, Pa. Machine for forming articles from sheet material. 1,782,777; Nov. 25.
Fischer, Charles, New York, N. Y. Handle for pipe cleaners. 1,782,871; Nov. 25.
Fisher, Harry C., Cincinnati, Ohio, assignor, by mesne assignments, to The Philip Carey Manufacturing Company. Coloring slate granules. 1,782,648; Nov. 25.
Fisher, Harry C., Cincinnati, Ohio, assignor, by mesne assignments, to The Philip Carey Manufacturing Company. Forming grayish-black slate granules. 1,782,649; Nov. 25.
Flanzer, Joseph A., Brooklyn, assignor to Technidyne Corporation, New York, N. Y. Radio dialing device. 1,782,778; Nov. 25.
Flintkote Company, The. (See Levin, Harold L., assignor.)
Florine, Nicolas, assignor of ten per cent to Societe Nationale pour l'Etude des Transports Aeriens, Societe Anonyme, Brussels, Belgium. Helicopter. 1,783,011; Nov. 25.
Florman, Irving, New York, N. Y. Cigarette lighter. Des. 82,647; Nov. 25.
Fokker, Anthony H. G., Amsterdam, Netherlands. Filtering fluids. 1,782,531; Nov. 25.
Foothorap, Harry A., Harrisburg, Pa., assignor to Elliott-Fisher Company. Computing machine. 1,782,757; Nov. 25.
Forbes, John S., Philadelphia, Pa., assignor, by mesne assignments, to Yates & Grant, Inc., Detroit, Mich. Magnetic razor conditioning and device therefor. 1,783,012; Nov. 25.
Forster, Percy M., Berkeley, Calif. Torch. 1,782,872; Nov. 25.
Foss, Leonard R. and R., Oakland, Calif. Feed gun. 1,782,681; Nov. 25.
Foss, Ruby. (See Foss, Leonard R. and R.)
Foster, Franklin J., et al. (See Jones, Archdale J., assignor.)
Foster, Theodore W., & Brother Co. (See Parkin, Winfred T., assignor.)
Foster Wheeler Corporation. (See Dean, Dion K., assignor.)
Fox, Maud C. (See Scott, I. G., and Fox.)
Fr. Küttner Aktiengesellschaft. (See von den Driesch, Joseph, assignor.)
Frank, Benjamin M., New York, assignor to Greenpoint Metallic Bed Co., Inc., Brooklyn, N. Y. Bed frame. 1,782,988; Nov. 25.
Franklin Oil Heating Incorporated. (See Stuart, William W., assignor.)
Franklin, Ralph E., assignor of one-half to T. P. Knutson, Minneapolis, Minn. Refrigerator. 1,782,720; Nov. 25.
Fraschetti, Virgilio, London, England. Cabinet for the storage of gramophone disk records and the like. 1,782,606; Nov. 25.
Frederick Iron & Steel Company, The. (See Lewis, Basil C., assignor.)
Frederick, Louis T., Valparaiso, Ind., assignor, by mesne assignments, to Continental Diamond Fibre Company, Newark, Del. Method and apparatus for feeding disks to a closing mold. 1,782,989; Nov. 25.
Freegard, William, Elizabeth, N. J., assignor to The Barber Asphalt Company, Philadelphia, Pa. Surface covering and making the same. 1,782,416; Nov. 25.
Freeman, Walter A., Augusta, Kans. Loading device. 1,782,607; Nov. 25.
Frenkel, Gennady, Kingston-on-Thames, England. Advertising or like sign or device. 1,782,721; Nov. 25.
Fried, Eugene, Newark, N. J. Device for preventing boiling over of milk. 1,782,417; Nov. 25.
Fried, Fritz. (See Wietzel, G., Jannek, and Fried.)
Fried. Krupp Aktiengesellschaft. (See Hofmann, Konrad, assignor.)
Frink, Frederick W., Schenectady, N. Y., assignor to General Electric Company. High-frequency signaling system. 1,783,037; Nov. 25.
Froehlich, Eugene, New York, N. Y. Obstetrical extractor. 1,782,814; Nov. 25.
Frost, Clarence B., Cambridge, Mass. Fastening bands about bales or the like. 1,782,465; Nov. 25.
Frost & Wood. (See Goddard, J., and Calvert, assignors.)
Fry, Walter L., Scarsdale, assignor, by mesne assignments, to Wil-Fry Corporation, New York, N. Y. Seat cover. 1,782,815; Nov. 25.
Fulk, George L., assignor, by mesne assignments, to Bonnar-Vawter Fanform Company, Inc., Cleveland, Ohio. Printing press. 1,782,608; Nov. 25.
Fuller Lehigh Company. (See Hardgrove, Ralph M., assignor.)
Fullman, James M. G., Sewickley, Pa., assignor to National Electric Products Corporation, New York, N. Y. Fitting for electrical conduit systems. 1,782,779; Nov. 25.
Furey, John P. (See Sullivan, Daniel F., assignor.)
G. & W. Electric Specialty Co. (See Rah, Joseph, assignor.)
G. & W. Electric Specialty Co. (See Williams, Paul F., assignor.)
Galloway Engineering Company. (See Greening, Herald B., assignor.)
Gardner, George H., assignor to The Menasha Products Company, Chicago, Ill. Paper container. 1,782,961; Nov. 25.
Gardner, Stonewall J., New Albany, Ind. Clamp machine. 1,782,846; Nov. 25.
Garred, Ulysses A., Jackson Heights, N. Y., assignor to Anaconda Copper Mining Company. Recovering metals. 1,782,418; Nov. 25.
Gaskill, William R., assignor to R. W. Kerr, Frenchtown, N. J. Incubator. 1,782,609; Nov. 25.
Gasoline Products Company. (See Black, John C., assignor.)
Gavin, John H., assignor to The Chicago Faucet Company, Chicago, Ill. Faucet screen. 1,782,758; Nov. 25.
Gawron, David J., Brooklyn, N. Y. Electric pencil sharpener. 1,783,038; Nov. 25.
Gebhardt, Wilhelm. (See Paschen, P., and Gebhardt.)
Geisler, Edgar W., assignor, by mesne assignments, to R. H. Comey Brooklyn Company, Inc., Brooklyn, N. Y. Treatment of materials to retard fading. 1,783,114; Nov. 25.
Geller, Leon W., Hamburg, assignor to National Aniline & Chemical Co. Inc., New York, N. Y. Disazo dye containing a diphenylurea nucleus. 1,782,682; Nov. 25.
Geloso, John, New York, assignor, by mesne assignments, to Pilot Radio & Tube Corporation, Brooklyn, N. Y. Tube socket. 1,782,419; Nov. 25.
General Aniline Works, Inc. (See Bauer, W., Neelmeier, and Nocken, assignors.)
General Aniline Works, Inc. (See Hoffa, E., and Heyna, assignors.)
General Aniline Works, Inc. (See Schmidt, Robert E., assignor.)
General Chemical Company. (See Merriam, Henry F., assignor.)

General Electric Company. (See Alexanderson, E. F. W., and Keil, assignors.)
General Electric Company. (See Biermanns, Josef, assignor.)
General Electric Company. (See Brown, George R., assignor.)
General Electric Company. (See Chapman, Verni J., assignor.)
General Electric Company. (See Crawford, Henry V., assignor.)
General Electric Company. (See Frink, Frederick W., assignor.)
General Electric Company. (See Gosling, Joseph W., assignor.)
General Electric Company. (See Guay, E. J., and Godfrey, assignors.)
General Electric Company. (See Heisler, Charles L., assignor.)
General Electric Company. (See Ives, Charles A., assignor.)
General Electric Company. (See Kellogg, Edward W., assignor.)
General Electric Company. (See McCullough, Robert Y., assignor.)
General Electric Company. (See Morrill, Wayne J., assignor.)
General Electric Company. (See Peek, Frank W., jr., assignor.)
General Electric Company. (See Radloff, Johannes, assignor.)
General Electric Company. (See Seeley, Harold T., assignor.)
General Electric Company. (See Spitzer, Edwin E., assignor.)
General Electric Company. (See Stephenson, Hugh M., assignor.)
General Electric Company. (See Traver, Oliver C., assignor.)
General Electric Company. (See Trencham, Henry, assignor.)
General Electric Company. (See Trombetta, Panfilo, assignor.)
General Electric Company. (See Vienneau, Jacob J., assignor.)
General Electric Company. (See Wachsmann, Paul, assignor.)
General Electric Vapor Lamp Company. (See Moehler, Otto J., assignor.)
Geometric Tool Co., The. (See Breitenstein, Albert F., assignor.)
Georg, Otto, Herdecke, Germany. Frictional screw-spindle press. 1,783,115; Nov. 25.
Gerlach, Charles W., Wheaton, assignor to Chicago Mill and Lumber Corporation, Chicago, Ill. Packing device. 1,783,079; Nov. 25.
Germanin, Fred, administrator. (See Guay, E. J., and Godfrey.)
Gesellschaft für Drahtlose Telegraphie m. b. H. Hallesches. (See Meissner, Alexander, assignor.)
Géza, Frommer, Ujpest, assignor to Messrs. Diamant Samu és Fiai, Budapest, Hungary. Machine for ironing furs. 1,782,722; Nov. 25.
Giacomino, Joseph L., New Orleans, assignor of one-hundred per cent to C. W. Gibson, parish of Orleans, La. Gas burner. 1,782,683; Nov. 25.
Gibson, Carl W. (See Giacomino, Joseph L., assignor.)
Gibson, George M., assignor to Woodrow Washing Machine Company, Pella, Iowa. Washing machine. 1,782,684; Nov. 25.
Gillette Rubber Company. (See Krause, A. R., and Hirsch, assignors.)
Gillot, Henri F. (See Junillon, L. C., and Gillot.)
Gimenez, Marie, Chicago, Ill. Face mask. 1,783,080; Nov. 25.
Gits, Remi J., Chicago, Ill. Automobile brake. 1,782,891; Nov. 25.
Glaze, Herbert L., South Pasadena, and F. G. Stanford, Los Angeles; said Glaze assignor to G. H. Hyland, Los Angeles, Calif. Beverage-display fountain. 1,782,685; Nov. 25.
Glenn, Joe H., jr., and B. L. Bennett, assignors of one-third to H. M. Du Bose, jr., and R. C. Vaughn, Winston-Salem, N. C. Filling station. Des. 82,644; Nov. 25.
Gochnauer, Walter E., La Crosse, Wis., assignor, by mesne assignments, to Moto Meter Gauge & Equipment Corporation, Long Island City, N. Y. Tire gauge. 1,783,116; Nov. 25.
Goddard, John, and R. A. Calvert, Smiths Falls, Ontario, assignors to the firm Frost & Wood, Smiths Falls, Canada. Dragbar for cultivators. 1,782,081; Nov. 25.
Godfrey, Frederick S. (See Guay, E. J., and Godfrey.)
Goodman, Abraham and J., Brooklyn, N. Y. Double hair waver. 1,782,650; Nov. 25.
Goodman, Avrom B., New York, N. Y., assignor to Ficks Reed Company, Cincinnati, Ohio. Chair. Des. 82,605; Nov. 25.
Goodman, Jacob. (See Goodman, Abraham and J.)
Goodrich, B. F., Company, The. (See Wilson, G. F., and Waner, assignors.)
Goost, Theodor. (See Klingemann, F., Lommel, Korten, and Goost.)
Gorham, Marvine, Buffalo, N. Y., assignor to Michigan Steel Casting Company, Detroit, Mich. Roller-mill guide. 1,783,148; Nov. 25.
Gorman, Henry B., Lynchburg, Va., assignor to United Shoe Machinery Corporation, Paterson, N. J. Insole. 1,782,466; Nov. 25.
Gosling, Joseph W., Schenectady, N. Y., assignor to General Electric Company. Lamp support. Des. 82,641; Nov. 25.
Gosparlin, Frederick, Chicago, Ill. Bridge for stringed musical instruments. 1,783,117; Nov. 25.
Gotham Knitbac Machine Corporation. (See Parlini, Alexander C., assignor.)
Grandin, Louis M., New York, N. Y. Telephone system. 1,782,847; Nov. 25.
Granular Iron Company. (See Hornsey, John W., assignor.)
Gravely, Benjamin F., Dunbar, W. Va. Carburetor. 1,782,848; Nov. 25.
Gray, Charles B., Millbourne, Pa. Cutting machine. 1,782,420; Nov. 25.
Gray, Daniel M., and J. J. Williams, assignors to Hazel-Atlas Glass Co., Wheeling, W. Va. Apparatus for casting zinc slabs and the like. 1,782,920; Nov. 25.
Gray, Etta, New Haven, Conn., assignor to Barclay Corset Company. Corsetiere's fitting apparatus. 1,782,892; Nov. 25.
Green, Frank E., Pittsburgh, Pa. Feed chuck. 1,783,039; Nov. 25.
Green, J Birchard, assignor to F. M. Warden, Chicago, Ill. Rod for use in arc welding or cutting. 1,783,013; Nov. 25.
Green, Samuel G., Jones, Ga. Gun carriage. 1,782,610; Nov. 25.
Greening, Herald B., assignor to Galloway Engineering Company Limited, Hamilton, Ontario, Canada. Boat hull construction. 1,782,893; Nov. 25.
Greenpoint Metallic Bed Co. (See Frank, Benjamin M., assignor.)
Greig, Arthur R., Port Arthur, Tex., assignor to The Texas Company, New York, N. Y. Dewaxing hydrocarbon oils. 1,782,467; Nov. 25.
Gremel, Caroline, executrix. (See Gremel, Frank J.)
Gremel, Frank J., deceased, Detroit, Mich., C. Gremel, executrix. Panel for mold walls. 1,782,921; Nov. 25.
Griffin, Alvah M., Los Angeles, Calif., assignor, by mesne assignments, to Chicago Bridge & Iron Company, Chicago, Ill. Floating deck. 1,783,118; Nov. 25.
Grimley, John P., Harrison, assignor to S. J. Rawlings, Kearney, N. J. Door-holding device. 1,782,816; Nov. 25.
Grimm, George E., assignor to The Willys-Overland Company, Toledo, Ohio. Combination floor board. 1,782,817; Nov. 25.
Griscom-Russell Company, The. (See Chute, Stanley J., assignor.)
Griswold, Thomas, jr., assignor to The Dow Chemical Company, Midland, Mich. Pressure-relieving method and apparatus for autoclaves and the like. 1,783,163; Nov. 25.
Gritt, Frank, Indianapolis, Ind. Lamp. Des. 82,606; Nov. 25.
Grosjean, George B., Shreveport, La. Drain protector. 1,783,082; Nov. 25.
Grubman, Leo J., Belle Harbor, assignor to Markon Manufacturing Co., Inc., New York, N. Y. Artificial eye and applying eyelashes thereto. 1,782,818; Nov. 25.
Grueter, William B., assignor to The Prescott Company, Menominee, Mich. Gang edger. 1,782,894; Nov. 25.
Guay, Emile J., deceased, Swampscott, by F. Germain, administrator, Swampscott, and F. S. Godfrey, Lynn, Mass., assignors to General Electric Company. Machine for forming rings of segmental pieces. 1,783,040; Nov. 25.
Gubler, Hans, Basel, assignor to the firm Society of Chemical Industry in Basle, Basel, Switzerland. Dyestuffs containing metals and making same. 1,783,084; Nov. 25.
Gubler, Hans, and G. De Montmollin, Basel, and J. Spieler, Laufen, assignors to the firm Society of Chemical Industry in Basle, Basel, Switzerland. Dyestuffs containing metals and making same. 1,783,083; Nov. 25.
Guest, Alfred W. F., Brooklyn, N. Y., assignor to Mergenthaler Linotype Company. Typographical casting machine. 1,782,468; Nov. 25.
Gulf Refining Company. (See McCarty, Robert R., assignor.)
Gurney, Estelle M., New York, N. Y. Circulation regulator for heating systems. 1,782,873; Nov. 25.
Hackett, Henry, Selly Oak, Birmingham, and A. Whittaker, Northfield, Birmingham, England. Manufacture of cardboard boxes. 1,782,611; Nov. 25.
Hacking, William F., Burley, Idaho. Broom holder. 1,783,119; Nov. 25.
Hafemeister, Fred F., assignor to The Cleveland Switchboard Company, Cleveland, Ohio. Safety snap switch. 1,782,780; Nov. 25.
Hagan, George J., Company. (See Dauch, Alan D., assignor.)
Hagan, George J., Company. (See Talley, Randal E., assignor.)
Hagerling, F. J. (See Weisler, August, assignor.)
Halford, Frank B., London, England. Internal-combustion engine. 1,783,085; Nov. 25.
Haller, Charles W., assignor to Wheeling Bronze Casting Company, Wheeling, W. Va. Pickling crate. Re17,882; Nov. 25.

Haner, Carl, Moylan, assignor to Publicker, Inc., Philadelphia, Pa. Treating ethyl alcohol. 1,783,086; Nov. 25.
Hannauer Car Retarder Company. (See Hannauer, G., and Wilcox, assignors.)
Hannauer, George, Calumet City, Ill., and E. M. Wilcox, Hammond, Ind., assignors to Hannauer Car Retarder Company, Chicago, Ill. Track-brake mechanism. 1,782,874; Nov. 25.
Hansell, Clarence W., Rocky Point, N. Y., assignor to Radio Corporation of America. Semirigid crystal mounting. 1,783,014; Nov. 25.
Hansen, Herman, New York, N. Y., assignor to Francis Keil & Son, Inc. Construction for display cases. 1,782,819; Nov. 25.
Hard Manufacturing Company. (See McKay, John, assignor.)
Hardgrove, Ralph M., Allentown, assignor to Fuller Lehigh Company, Fullerton, Pa. Cement spreader. 1,782,820; Nov. 25.
Hardin, Robert H., Bakersfield, Calif. Air-cooling device. 1,782,612; Nov. 25.
Harper, Clarence L., Philadelphia, Pa. Conduit base and trim. 1,783,120; Nov. 25.
Harper, Martin, Strand, London, England. Winding endless cinematograph films and the like. 1,783,169; Nov. 25.
Harris, Carl C., Orange, Mass. Cup for sponge moisteners. 1,782,505; Nov. 25.
Harris, Harry. (See Bartholomew, Sherman, assignor.)
Harris, Harry P. (See Spencer, R. W., and Harris.)
Hartman, Walter S., Calumet City, Ill. Bowling alley. 1,782,849; Nov. 25.
Hartman, William O., assignor to Welsh-Hartman Co., St. Louis, Mo. Flexible handrail and support therefor. 1,782,895; Nov. 25.
Harvey, Aro M., Kansas City, Mo. Ironing board. 1,782,421; Nov. 25.
Hasselbring, John, jr., Woodhaven, assignor to Royalty Holding Corporation, Brooklyn, N. Y. Starter for internal-combustion engines. 1,783,015; Nov. 25.
Havens, Homer M., assignor to The Seagrave Corporation, Columbus, Ohio. Parallel-series pump. 1,782,469; Nov. 25.
Hawaiian Cane Products, Limited. (See Williams, William L. S., assignor.)
Hawthorne, Joseph G., Kansas City, Mo., assignor to W. M. Cross. Cracking hydrocarbon oil. 1,782,686; Nov. 25.
Hazel-Atlas Glass Co. (See Gray, D. M., and Williams, assignors.)
Hazel-Atlas Glass Co. (See Kirkpatrick, John, assignor.)
Hazen, Earl A., Joplin, Mo., assignor to Keystone Driller Company, Beaver Falls, Pa. Fishing tool. 1,782,613; Nov. 25.
Hechenbleikner, Ingenuin, Charlotte, N. C., assignor, by mesne assignments, to Chemical Construction Corporation. Acid-phosphate plant. 1,782,821; Nov. 25.
Hechenbleikner, Ingenuin, Charlotte, N. C., assignor, by mesne assignments, to Chemical Construction Corporation. Combined spray drier and burner. 1,782,822; Nov. 25.
Hechenbleikner, Ingenuin, Charlotte, N. C., assignor, by mesne assignments, to Chemical Construction Corporation. Filtering and dust-collecting apparatus. 1,782,823; Nov. 25.
Hechenbleikner, Ingenuin, Charlotte, N. C., assignor, by mesne assignments, to Chemical Construction Corporation. Catalytic apparatus. 1,782,824; Nov. 25.
Heisler, Charles L., Schenectady, N. Y., assignor to General Electric Company. Roll spreader. 1,782,470; Nov. 25.
Helms, Harry W., assignor to Highway Trailer Company, Edgerton, Wis. Automatic semitrailer. 1,783,087; Nov. 25.
Henderson, Thomas W. (See Elliott, H. L., and Carroll, assignors.)
Henderson, William F., Colfax, Wash. Wrecker bar. 1,782,506; Nov. 25.
Henschel, C. B., Mfg. Co. (See Radloff, E. E., and Janke, assignors.)
Hercules Powder Company. (See Borglin, Joseph N., assignor.)
Hermann, Wolfgang, assignor to Metal Specialties Manufacturing Co., Chicago, Ill. Strip-serving machine. 1,782,922; Nov. 25.
Herz, Alfred, Chicago, Ill. Anti-induction shield. 1,782,875; Nov. 25.
Hess-Bright Manufacturing Company, The. (See Russell, Charles L., assignor.)
Hetherington, Harry C., Washington, D. C., and H. J. Krase, Clarendon, Va., assignors to Arthur B. Lamb, trustee. Manufacture of urea. 1,782,723; Nov. 25.
Heyna, Hans. (See Hoffa, E., and Heyna.)
Hicks, William D., Inglewood, assignor, by mesne assignments, to Master Wire Lath Company, Los Angeles, Calif. Lath. 1,782,568; Nov. 25.
High, Jurjen S., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Reproducing device. 1,782,781; Nov. 25.
Highway Trailer Company. (See Helms, Harry W., assignor.)
Hildebrand, James L. (See Sneierson, S. L., and Hildebrand.)
Hill, Charles A., assignor to Mueller Brass Co., Port Huron, Mich. Method of and apparatus for reshaping deformed pipe ends. 1,783,088; Nov. 25.
Hill, Roy L., Tamaqua, Pa., assignor to Darco Corporation, Wilmington, Del. Purifying water and apparatus therefor. 1,782,850; Nov. 25.
Hill, Willoughby F., New York, N. Y. Container cover. 1,782,532; Nov. 25.
Hirsch, Alfred C. (See Krause, A. R., and Hirsch.)
Hirst, James E., assignor to The J. A. Fay & Egan Company, Cincinnati, Ohio. Woodworking machinery. 1,783,041; Nov. 25.
Hite, William B., jr., Webster Groves, Mo. Shock absorber. 1,782,533; Nov. 25.
Hobb, Samuel T., assignor to The Washburn Company, Worcester, Mass. Bottle holder. 1,782,962; Nov. 25.
Hoe, R., & Co. (See Baumgartner, August, assignor.)
Hoern, Joseph H., Saginaw, Mich., assignor to Wilcox-Rich Corporation. Piston-ring burr-removing device. 1,783,121; Nov. 25.
Hoffa, Erwin, and H. Heyna, Hochst-on-the-Main, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Trimethylthionaphthene vat dyestuffs. 1,782,724; Nov. 25.
Hoffman, Andrew, assignor to Andrew Hoffman Manufacturing Company, Chicago, Ill. Window fastener. 1,782,896; Nov. 25.
Hoffman, Andrew, Manufacturing Company. (See Hoffman, Andrew, assignor.)
Hoffman, Ayers M. (See Hoffman, Benjamin P., and A. M.)
Hoffman, Benjamin P. and A. M., assignors to The Pierce Development Company, Tulsa, Okla. Oil saver. 1,782,851; Nov. 25.
Hoffman, John F., assignor to Baker Ice Machine Co. Inc., Omaha, Nebr. Refrigerating system. 1,782,651; Nov. 25.
Hoffman, John F., assignor to Baker Ice Machine Co. Inc., Omaha, Nebr. Refrigerating apparatus. 1,782,687; Nov. 25.
Hoffman, John F., assignor to Baker Ice Machine Co. Inc., Omaha, Nebr. Refrigerating system. 1,782,688; Nov. 25.
Hoffman, John F., assignor to Baker Ice Machine Co. Inc., Omaha, Nebr. Refrigerating apparatus. 1,782,689; Nov. 25.
Hofmann, Konrad, Essen, assignor to Fried. Krunn Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Purifying pig iron. 1,782,923; Nov. 25.
Hokin, Barney E., Chicago, Ill. Home golf game. 1,783,089; Nov. 25.
Holbrook, Gordon G., Maplewood, N. J. Steel hull and building the same. 1,782,422; Nov. 25.
Holinger, Emil F., assignor to Hudson Electrical Heating Corporation, New York, N. Y. Electric heater. 1,782,825; Nov. 25.
Hollins, Jack, Rosemount, Middlewich, assignor to Imperial Chemical Industries Limited, London, England. Electrodeposition of metals. 1,782,614; Nov. 25.
Holzworth, George, Halifax, Mass. Flowerpot stand or similar article. Des. 82,607; Nov. 25.
Hook, Ira T., New Haven, assignor to The American Brass Company, Waterbury, Conn. Cable and connecter therefor. 1,783,016; Nov. 25.
Hoosier Lamp and Stamping Corporation. (See Moll, Walter, assignor.)
Hopff, Heinrich. (See Schuster, K., and Hopff.)
Hopwood, Carrie S., Hinsdale, Mont. Workholder. 1,782,615; Nov. 25.
Horlacher, Albert F., Fredonia, N. Y. Selector mechanism. 1,783,122; Nov. 25.
Hornsey, John W., Summit, N. J., assignor to Granular Iron Company, Conveyer. 1,782,423; Nov. 25.
Hotchkiss, E. H., Company. (See Polzer, Fridolin, assignor.)
Howard, Emory G., Dudley, assignor to Koehler Manufacturing Company, Marlboro, Mass. Athletic shoe and cleat therefor. 1,782,569; Nov. 25.
Howard, Frank C., Chicago, Ill. Heater for vehicles. 1,782 652; Nov. 25.
Howard & Bullough Limited. (See Blackburn, J. H., and Bancroft, assignors.)
Howe, Edward B., Olympia Fields, Ill. Type-page frame. 1,783,042; Nov. 25.
Howell, Albert S., assignor to The Bell & Howell Company, Chicago, Ill. Strip-perforating machine. 1,782,570; Nov. 25.
Hudgin, Charles E., Chicago, assignor to S. E. Lingle, Evanston, Ill. Form clamp. 1,782,897; Nov. 25.
Hudson Electrical Heating Corporation. (See Holinger, Emil F., assignor.)
Hudson Manufacturing Co. (See Kegler, Anton W., assignor.)
Hukill, Henry D., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Brake device. 1,782,571; Nov. 25.
Hulin, Paul L., Grenoble, assignor to Societe Anonyme Compagnie de Produits Chimiques et Electrometallurgiques Alais, Froges et Camarque, Paris, France. Electrolytic apparatus for refining aluminum and for like processes. 1,782,616; Nov. 25.
Hunt, George C., assignor to The Savutime Devices, Inc., Rochester, N. J. Control device for heating systems. 1,782,653; Nov. 25.

Hunter, Carl E., and De L. Lutz, Memphis, Tenn. Casting machine. 1,782,898; Nov. 25.

Hunter, Richard B., Shorewood, assignor, by mesne assignments, to Cutler-Hammer Inc., Milwaukee, Wis. Motor controller. 1,782,424; Nov. 25.

Huonker, Fredreck C., Dayton, Ohio. Adjustable stand and rack. 1,782,617; Nov. 25.

Hurlburt, Henry F., jr. (See Williams, David C., assignor.)

Huther Bros. Saw Manufacturing Company. (See Huther, Warren B., assignor.)

Huther, Warren B., assignor to Huther Bros. Saw Manufacturing Company, Rochester, N. Y. Dado saw. 1,782,507; Nov. 25.

Hvid, Rasmus M., Chicago, Ill. Compressor construction for ice machines. 1,783,017; Nov. 25.

Hyland, George H. (See Glaze, H. L., assignor, and Stanford.)

Hyland, George H. (See Stanford, F. G., and Baker, assignor.)

I. G. Farbenindustrie Aktiengesellschaft. (See Klingemann, F., Lommel, Korten, and Goost, assignors.)

I. G. Farbenindustrie Aktiengesellschaft. (See Schuster, K., and Hopff, assignors.)

I. G. Farbenindustrie Aktiengesellschaft. (See Wietzel, G., Jannek, and Fried, assignors.)

I. G. Farbenindustrie Aktiengesellschaft. (See Wietzel, Rudolf, assignor.)

Illinois Carton & Label Company. (See Johnson, Norman O., assignor.)

Imperial Chemical Industries Limited. (See Hollins, Jack, assignor.)

Inman, Ulysses A., Long Beach, Calif. Shock absorber. 1,782,725; Nov. 25.

International Combustion Engineering Corporation. (See Davidson, Philip, assignor.)

International Harvester Company. (See Benjamin, Bert R., assignor.)

International Harvester Company. (See Robinson, Charles W., assignor.)

International Harvester Company. (See Smith, D. W., and Webber, assignors.)

International Nickel Company, The. (See Shipley, G. B., and Allnder, assignors.)

International Nickel Company, The. (See Siefert, W. C., and Pawel, assignors.)

International Shoe Company. (See Parker, John A., assignor.)

Inventia Patent-Verwertungs-Gesellschaft. (See Wenner-Gren, Axel L., assignor.)

Ives, Charles A., Lawrence Park, Pa., assignor to General Electric Company. Air-brake system. 1,783,043; Nov. 25.

Ives Corporation, The. (See Ives, Harry C., assignor.)

Ives, Harry C., assignor, by mesne assignments, to The Ives Corporation, Bridgeport, Conn. Electric connector for toy train tracks. 1,782,991; Nov. 25.

Ivey, Henry B., Goldsboro, N. C. Vanity case. 1,782,726; Nov. 25.

Jackson, Joseph B., Milford, assignor to Draper Corporation, Hopedale, Mass. Weft stop mechanism for looms. 1,782,782; Nov. 25.

Jackson, Ray P. (See Miller, F. H., and Jackson.)

Jaenichen, Louis, Springfield Township, Oakland County, Mich., assignor to The Standard Computing Scale Company. Weighing scale. 1,782,654; Nov. 25.

James, Alvin E., Waycross, Ga. Aerovehicle. 1,782,508; Nov. 25.

James, Joseph H., Pittsburgh, Pa., assignor to C. P. Byrnes, trustee, Sewickley, Pa. Manufacture of solvents. 1,782,963; Nov. 25.

James, Joseph H., Pittsburgh, assignor to C. P. Byrnes, trustee, Sewickley, Pa. Solvent and making the same. 1,782,964; Nov. 25.

Jameson, Peter, West Quincy, Mass. Pitman or connecting-rod construction. 1,782,655; Nov. 25.

Janda, Rudolph W., Berwyn, assignor to Conlon Corporation, Cicero, Ill. Clutch. 1,782,572; Nov. 25.

Janke, August W. (See Radloff, E. E., and Janke.)

Jannek, Josef. (See Wietzel, G., Jannek, and Fried.)

Janowitch, Joseph H., Brooklyn, N. Y. Shirt-collar stiffener. Re17,885; Nov. 25.

Jantzen, Fred, Bronx, N. Y. Towel cabinet. 1,783,149; Nov. 25.

Jauch, Robert J., Fort Wayne, Ind. Paper-strip-controlling mechanism. 1,782,618; Nov. 25.

Jeffery, Rupert G., Nashua, N. H. Fastener for door panels. 1,783,150; Nov. 25.

Jeffray, John, Ealing, London, England. Manufacture of splinterless glass. 1,782,852; Nov. 25.

Jennings, James W., Providence, R. I., assignor to Quaker Silver Company, Attleboro, Mass. Lighter. Des. 82,608; Nov. 25.

Jensch, Heinrich, Hochst-on-the-Main, and O. Eisleb, Hofheim-on-the-Taunus, Germany, assignors to Winthrop Chemical Company, Inc., New York, N. Y. Basic nitro derivatives of 9 aminoacridine and preparing the same. 1,782,727; Nov. 25.

Jessup, Richard D., La Grange, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Apparatus for coating strands. 1,782,425; Nov. 25.

Jipp, August, Berlin-Spandau, assignor to Siemens & Halske, Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Receiving telegraphic signals. 1,782,534; Nov. 25.

Johansson, Johan E., assignor to Aktiebolaget Gotaverken, Gottenborg, Sweden. Gas-generating combustion engine. 1,783,018; Nov. 25.

Johnson, Albert M., assignor to Barnes Drill Company, Rockford, Ill. Machine tool. 1,782,573; Nov. 25.

Johnson, Albert M., assignor to Barnes Drill Company, Rockford, Ill. Honing machine. 1,783,019; Nov. 25.

Johnson, Algot F., Minneapolis, Minn. Road grader. 1,782,992; Nov. 25.

Johnson, Charles E., Muskegon, Mich. Piston ring. 1,782,427; Nov. 25.

Johnson, Charles E., Muskegon, Mich. Oil-conserving piston. 1,782,428; Nov. 25.

Johnson, Charles E., Muskegon, assignor to The Piston Ring Company, Muskegon Heights, Mich. Piston ring. 1,782,426; Nov. 25.

Johnson, John F., assignor to Weber Costello Company, Chicago Heights, Ill. Movable meridian for globes. 1,782,924; Nov. 25.

Johnson, Lawrence L., Los Angeles, Calif. Aeroplane. 1,782,965; Nov. 25.

Johnson, Manfred J., assignor to Dictaphone Corporation, Bridgeport, Conn. Device for electrically recording telephonic sounds and conversations and system therefor. 1,782,619; Nov. 25.

Johnson, Norman O., assignor to Illinois Carton & Label Company, Chicago, Ill. Collapsible tube protector. 1,782,429; Nov. 25.

Johnson, William S. (See Tyler, J. G., Taylor, and Johnson.)

Jones, Archdale J., New York, N. Y., assignor to B. Darrach, A. D. Marks, and F. J. Foster. Casing or similar container. Des. 82,609; Nov. 25.

Jones, Edwin W., Lincoln, England, assignor to The Babcock & Wilcox Company, Bayonne, N. J. Heat-transfer device. 1,782,574; Nov. 25.

Jones, William A., West New Brighton, N. Y., assignor to The Babcock & Wilcox Company, Bayonne, N. J. Making drums. 1,782,899; Nov. 25.

Jones, Wyatt J., Niles Center, Ill., assignor of one-half to G. S. Noble, Chicago, Ill. Footwear. 1,782,620; Nov. 25.

Jonsson, Anders J., Linkoping, Sweden. Machine for making and applying caps to bottles and the like. 1,782,900; Nov. 25.

Jordan, Hans, Berlin-Steglitz, assignor to Chemische Fabrik auf Actien (vorm. E. Schering), Berlin, Germany. Producing products of hydrogenation of alkylated phenols. 1,782,621; Nov. 25.

Jordan, Hans, Berlin-Steglitz, assignor to Chemische Fabrik auf Actien (vorm. E. Schering), Berlin, Germany. Production of alkylated phenols. 1,782,966; Nov. 25.

Jorss, Karl F., Washington, D. C., assignor to Crittall Casement Window Company, Detroit, Mich. Window-screen structure. 1,782,853; Nov. 25.

Joyce, Bryan P., Davenport, Iowa. Packing. 1,782,656; Nov. 25.

Junas, Paul, jr., Lansford, Pa. Haircloth. 1,782,925; Nov. 25.

Junillon, Louis C., and H. F. Gillot, Lyon, France. Silk-twisting mill and like machine. 1,782,967; Nov. 25.

Kassel, Morris B., Brooklyn, N. Y. Cutting device. 1,782,901; Nov. 25.

Keech, Dana E., Glendale, Calif. Fruit distributor. 1,782,826; Nov. 25.

Kegler, Anton W., assignor to Hudson Manufacturing Co., Minneapolis, Minn. Pressure-tank cap. 1,782,657; Nov. 25.

Kell, Francis, & Son, Inc. (See Dowling, Francis J., assignor.)

Kell, Francis, & Son, Inc. (See Hansen, Herman, assignor.)

Kell, Ray D. (See Alexanderson, E. F. W., and Kell.)

Keller, Albert T., Bethlehem, Pa., assignor to Bethlehem Steel Company. Rolling tubes. 1,782,968; Nov. 25.

Kellogg, Edward W., Schenectady, N. Y., assignor to General Electric Company. Reproducer. 1,783,044; Nov. 25.

Kellogg, Edward W., Schenectady, N. Y., assignor to General Electric Company. Contact film printer. 1,783,045; Nov. 25.

Kell gg Switchboard and Supply Company. (See Currier, Hiram D., assignor.)

Kelly, John A., Brooklyn, N. Y., assignor to United Shoe Machinery Corporation, Paterson, N. J. Making shoes. 1,782,759; Nov. 25.

Kelly, Walter J., and M. P. Burns, Fairfield, and A. Barr, Wylam, Ala. Recuperator. 1,782,430; Nov. 25.

Kerr, Franklin H., Toledo, Ohio. Agricultural tool. 1,782,690; Nov. 25.

Kerr, Richard W. (See Gaskill, William R., assignor.)

Kestell, Thomas A. (See Woodcock, R. B., and Kestell.)

Keystone Driller Company. (See Hazen, Earl A., assignor.)

Kiedrowski, John A., Chicago, Ill. Fountain pen. 1,783,090; Nov. 25.

Kiefer, Karl, Cincinnati, Ohio. Exercising apparatus. 1,782,728; Nov. 25.

Kilian, Frederick K., Syracuse, N. Y. Antifriction roller. 1,782,622; Nov. 25.

Kimball, James L., Beverly, assignor to Ruggles-Klingemann Mfg. Co., Salem, Mass. Method of and apparatus for controlling boiler feed water. 1,782,926; Nov. 25.

King Manufacturing Company, The. (See Roe, Ernest S., assignor.)

Kirchner, Walter, assignor to Chemische Fabrik Grünau Landshoff & Meyer Aktiengesellschaft, Berlin-Grunau, Germany. Accelerating the hardening of hydraulic binding means. 1,782,471; Nov. 25.

Kirkpatrick, John, Clarksburg, assignor to Hazel-Atlas Glass Co., Wheeling, W. Va. Sherbet. Des. 82,610; Nov. 25.

Kirschbraun, Lester, Leonia, N. J., assignor, by mesne assignments, to The Patent and Licensing Corporation, Boston, Mass. Edge-finishing fabricated roofing elements. 1,782,535; Nov. 25.

Kirschbraun, Lester, Leonia, N. J., assignor, by mesne assignments, to The Patent and Licensing Corporation, Boston, Mass. Edge-finishing fabricated roofing elements. 1,782,536; Nov. 25.

Kitson Company. (See Lovekin, Luther D., assignor.)

Kiviaho, Joel, Marshfield, Oreg. Hose-clamp-applying tool. 1,783,123; Nov. 25.

Klein, Clarence J., Bellevue, assignor to United Engineering and Foundry Company, Pittsburgh, Pa. Bearing. 1,782,969; Nov. 25.

Klingemann, Felix, Mainkur near Frankfort-on-the-Main, W. Lommel, Wiesdorf, near Cologne-on-the-Rhine, E. Korten, Fechenheim near Frankfort-on-the-Main, and T. Goost, Leverkusen, near Cologne-on-the-Rhine, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft. Catalytically hydrogenating aromatic amino compounds and products produced thereby. 1,782,729; Nov. 25.

Kloss, Ulrich, Berlin, Germany. Direct-current railway system. 1,782,537; Nov. 25.

Kneass, Strickland, jr., Sewickley, assignor to Costello Engineering Company, Pittsburgh, Pa. Valve. 1,782,970; Nov. 25.

Knight, Octavius, Westfield, N. J. Nonregenerative radio circuits. 1,782,993; Nov. 25.

Knott, Frank W., assignor to Knott & Garllus Company, Detroit, Mich. Massaging-machine cabinet. 1,783,170; Nov. 25.

Knott, Frank W., assignor to Knott & Garllus Company, Detroit, Mich. Electric massaging machine. 1,783,171; Nov. 25.

Knott & Garllus Company. (See Knott, Frank W., assignor.)

Knowlson, James S., Hinsdale, assignor to Speedway Manufacturing Company, Chicago, Ill. Electric power device. 1,782,927; Nov. 25.

Knowlson, James S., Hinsdale, assignor to Speedway Manufacturing Company, Cicero, Ill. Humidifier. 1,782,928; Nov. 25.

Knutson, Tillferd P. (See Franklin, Ralph E., assignor.)

Koch & Te Kock. (See Liebender, Gottlieb, assignor.)

Koehler Manufacturing Company. (See Howard, Emory G., assignor.)

Koehring Company. (See Russell, Leslie A., assignor.)

Kohler, Gustavus A. E. (See Rust, James E., assignor.)

Koontz, Victor R., assignor to Landis Machine Company, Waynesboro, Pa. Die head. 1,782,472; Nov. 25.

Kornblum, Morris, assignor to Metal Lamp Corporation, Brooklyn, N. Y. Table lamp. Des. 82,611; Nov. 25.

Korten, Ernst. (See Klingemann, F., Lommel, Korten, and Goost.)

Kotrbaty, Guy F., New York, N. Y. Rail. 1,782,902; Nov. 25.

Kotzebue, Meinhard H., Tulsa, Okla., assignor to Trumble Gas Trap Company. Crude-oil and natural-gas separator. 1,782,783; Nov. 25.

Kozlowski, Leon, Union City, assignor of one-half to T. Puschett, Jersey City, N. J. Electric-fixture device. 1,783,020; Nov. 25.

Kramer, Henry W., Kingston, assignor to R. P. Young, Marlboro, N. Y. Handle for wooden baskets. 1,782,431; Nov. 25.

Krannak, Steven J., Minneapolis, Minn. Grease-gun-coupling head. 1,782,691; Nov. 25.

Krase, Herbert J. (See Hetherington, H. C., and Krase.)

Krasney, George, Chicago, Ill. Collar button. 1,782,509; Nov. 25.

Krause, Arnold R., and A. C. Hirsch, assignors to Gillette Rubber Company, Eau Claire, Wis. Tube-stock feeding, measuring, and cutting machine. 1,782,658; Nov. 25.

Krause, Norman R. (See MacGregor, W. F., and Krause.)

Kridel, J., Sons & Co. (See Bader, Fred W., assignor.)

Kroemer, Joseph E., St. Paul, Minn. Twine dispensing and cutting device. 1,782,971; Nov. 25.

Kurtz, Charles F., Rock Island, Ill., assignor, by mesne assignments, to L. J. Shields, St. Paul, Minn. Coin-operated vending machine. 1,782,659; Nov. 25.

Labaugh, James M., Paterson, N. J., assignor to American Telephone and Telegraph Company. Casing for a telephone substation set. Des. 82,612; Nov. 25.

Labaugh, James M., Paterson, N. J., assignor to American Telephone and Telegraph Company. Casing for a telephone substation set. Des. 82,613; Nov. 25.

Lahr, Marcus A., Tulsa, Okla. Wheel aligner. 1,782,827; Nov. 25.

Lamb, Arthur B., trustee. (See Hetherington, H. C., and Krase, assignors.)

Lamb, Thomas, Woodlea, and W. R. Sharp, Glenesk, England. Advertisement sign. 1,782,854; Nov. 25.

Lamont, Jesse L., Geneseo, Ill. Signal device. 1,783,124; Nov. 25.

Landis Machine Company. (See Koontz, Victor R., assignor.)

Lang, Bert E., Spokane, Wash. Tire-chain lock. 1,782,510; Nov. 25.

Lapointe, Albert A., West Hartford, assignor to The Silent Glow Oil Burner Corporation, Hartford, Conn. Oil burner. 1,782,730; Nov. 25.

Laramie, Victor J., Detroit, Mich. Milk-bottle cap. 1,782,731; Nov. 25.

Larkin, David, Webster Groves, Mo. Strainer. 1,782,538; Nov. 25.

Lawlor, John J. (See Morris, T. O., and Lawlor.)

Lawson, John F., Brooklyn, N. Y., assignor, by mesne assignments, to Steel and Tubes, Inc. Cutting machine. 1,782,692; Nov. 25.

Leach, William W., Mansfield, Ohio. Loading crane. 1,783,021; Nov. 25.

Lebby, States L., assignor to Corning Glass Works, Corning, N. Y. Cover glass. 1,782,732; Nov. 25.

Leffel, James, & Company, The. (See Swindler, Harry M., assignor.)

Lenander, Nils E., Trondhjem, assignor to Orkla Grube-Aktiebolag, Lokken Verk, near Trondhjem, Norway. Separation of cobalt and iron from solutions rich in iron as obtained by lixiviating roasted pyrites. 1,783,046; Nov. 25.

Leupold, Mathias, Jamaica, N. Y. Resilient tire. 1,783,091; Nov. 25.

Levin, Harold L., Nutley, N. J., assignor to The Flintkote Company, Boston, Mass. Felted fibrous products and method of manufacture. 1,782,855; Nov. 25.

Lewis, Basil C., assignor to The Frederick Iron & Steel Company, Frederick, Md. Agitator for coal hoppers. 1,783,092; Nov. 25.

Liebender, Gottlieb, assignor to Koch & te Kock, Olsnits, Germany. Card-saving motion. 1,783,125; Nov. 25.

Lilleberg, Tideman M., assignor to Nye Tool & Machine Works, Chicago, Ill. Vise. 1,782,929; Nov. 25.

Lilleberg, Tideman M., assignor to Nye Tool & Machine Works, Chicago, Ill. Vise. 1,782,930; Nov. 25.

Lilley, Daniel G., Denver, Colo. Golf club. 1,782,931; Nov. 25.

Lilly, Scott H., Toledo, Ohio. Bag-filling method and apparatus. 1,782,733; Nov. 25.

Lindgren, Bror J., assignor to Niagara Machine and Tool Works, Buffalo, N. Y. Machine for beading and flanging metal barrels. 1,782,994; Nov. 25.

Lingle, Samuel E. (See Hudgin, Charles E., assignor.)

Lippmann, Max, assignor to S. Pfeiffer Manufacturing Company, St. Louis, Mo. Carton. Des. 82,614; Nov. 25.

Liquid Carbonic Corporation, The. (See Mohler, Valentine J., assignor.)

Little, John O., New York, N. Y. Combined letter and envelope stuffer. 1,783,022; Nov. 25.

Loeffler, Louis J., Stapleton, N. Y. Hand telephone. Des. 82,615; Nov. 25.

Lommel, Wilhelm. (See Klingemann, F., Lommel, Korten, and Goost.)

López-Osorio, Felix, Buenos Aires, Argentina. Transformable motor-car body. 1,782,998; Nov. 25.

Lovekin, Luther D., Ardmore, assignor to Kitson Company, Philadelphia, Pa. Emergency cartridge-type shut-off valve. 1,782,760; Nov. 25.

Lucich, Anton, St. Louis, Mo. Electric scissors. 1,782,473; Nov. 25.

Ludwig, Louis, Brooklyn, N. Y. Attachment plug. Des. 82,616; Nov. 25.

Lutz, De L. (See Hunter, C. E., and Luts.)

Lynch, Frank J., Hillside, N. J., assignor to Pinaud, Inc., New York, N. Y. Collapsible tube. Des. 82,640; Nov. 25.

Lynch, John P., Los Angeles, Calif. Extractor cover. 1,782,575; Nov. 25.

Lysholm, Alf, Stockholm, assignor to Aktiebolaget Ljungströms Angturbin, Lidingo-Brevik, Sweden. Turbine-driven locomitive. 1,783,126; Nov. 25.

Maanum, Dedrick A., Minneapolis, Minn., assignor, by mesne assignments, to Cherry-Burrell Corporation, Wilmington, Del. Can-cleaning-machine heater. 1,782,876; Nov. 25.

Macallum, Alexander D., Perth Amboy, N. J. Synthesis of diacetyl-3,3'-diamino-4,4'-dihydroxy-5,5'-diiodoarsenobenzene. 1,782,432; Nov. 25.

MacDougald, Alexander, assignor to MacDougald Construction Company, Atlanta, Ga. Concrete-distributing apparatus. 1,782,734; Nov. 25.

MacDougald Construction Company. (See MacDougald, Alexander, assignor.)

Macgregor, Corânne, Cleveland Heights, Ohio. Construction of small ornamental figures or dolls. 1,782,576; Nov. 25.

MacGregor, Peter G., Pequanock, assignor to Pyrene Manufacturing Company, Newark, N. J. Fire extinguisher. 1,782,539; Nov. 25.

MacGregor, Wallace F., and N. R. Krause, assignors to J. I. Case Company, Racine, Wis. Sack chute for harvester-thrashers. 1,782,995; Nov. 25.

Machtolf, Josef, assignor to the firm Chr. Hostimann-Steinberg' Sche Farbenfabriken G. m. b. H., Celle, Germany. Process of and system for splitting hydrocarbons such as acetylene or the like. 1,782,540; Nov. 25.

MacKenzie, John A., Los Angeles, Calif. Fluid-treating apparatus. 1,782,735; Nov. 25.

Madden, Thomas E., Newark, N. J. Inked stamp. 1,782,877; Nov. 25.

Mahaffey, Dwight W., Morral, Ohio. Bag holder. 1,782,736; Nov. 25.

Mahon, Lee H., Norphlet, Ark. Casing suspension head. 1,782,737; Nov. 25.

Manning, Fred W., Berkeley, Calif., assignor, by mesne assignments, to Filter Fabrics, Inc., Boston, Mass. Reenforced filter paper and making same. 1,782,784; Nov. 25.

Manning, Fred W., Beverly Hills, Calif., assignor, by mesne assignments, to Filter Fabrics, Inc., Boston, Mass. Making filter papers and filter fabrics. 1,782,785; Nov. 25.

Marcus, Samuel, Brooklyn, assignor to Markon Manufacturing Co., Inc., New York, N. Y. Tongue and teeth set for dolls and the like. 1,782,433; Nov. 25.

Maris, Ralph W., Long Beach, Calif. Hand sandpaper holder. 1,782,577; Nov. 25.

Markham, Charles M., Indianapolis, Ind. Adjustable shore. 1,782,903; Nov. 25.

Markon Manufacturing Co. (See Marcus, Samuel, assignor.)

Markon Manufacturing Co. Inc. (See Grubman, Leo J., assignor.)

Markon Manufacturing Co. Inc. (See Wilhelm, John H., assignor.)

Marks, Alan D., et al. (See Jones, Archdale J., assignor.)

Marshall, Lewis C., Walope, Mass. Making steel piston rings. 1,783,047; Nov. 25.

Martin, Chester C., Luckey, Ohio, assignor, by mesne assignments, to St. Regis Paper Company, New York, N. Y. Valve bag. 1,782,738; Nov. 25.

Martin, Eugene. (See Stone, E. W., and Martin.)

Martin, Samuel G., West Somerville, Mass., assignor to The Barrett Company. Cutter. 1,783,023; Nov. 25.

Marx, Louis, New York, N. Y. Toy. 1,782,786; Nov. 25.

Maschinenfabrik Rüti vormals Casper Honegger. (See Egli, Ernst, assignor.)

Master Wire Lath Company. (See Hicks, William D., assignor.)

Mathewson, Maxwell I. (See Copland, A. W., and Mathewson.)

Matosian, Suren, Los Angeles, Calif. Furniture stand. Des. 82,643; Nov. 25.

McArthur, Clarence M., Detroit, Mich. Toothbrush. 1,783,151; Nov. 25.

McAuliffe, John E., assignor to Triangle Conduit Company, Brooklyn, N. Y. Armored conductor. 1,782,787; Nov. 25.

McCarty, Robert B., Port Arthur, Tex., assignor to Gulf Refining Company, Pittsburgh, Pa. Lute. 1,782,932; Nov. 25.

McCaslin, Clifford H., Oakland, Calif. Folding table. 1,782,623; Nov. 25.

McClellan, Harry S., assignor to Chrysler Corporation, Detroit, Mich. Stenciling. 1,782,541; Nov. 25.

McCormick Brothers Company. (See McCormick, Ora N., assignor.)

McCormick, Ora N., assignor to McCormick Brothers Company, Albany, Ind. Flour bin for kitchen cabinets. 1,783,127; Nov. 25.

McCrosson, John T., Port au Prince, Haiti. Canning pineapple and product thereof. 1,782,761; Nov. 25.

McCullough, Robet Y., Schenectady, N. Y. Control system. 1,783,048; Nov. 25.

McCune, Joseph C., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Foot valve device. 1,782,578; Nov. 25.

McGee, William C., Gastonia, assignor to B. A. Smith, Kings Mountain, N. C. Gravity oiling mechanism for spinning frames and the like. 1,782,624; Nov. 25.

McGuire, Lee R., Newark, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Table construction. 1,782,434; Nov. 25.

McKay, John, assignor to Hard Manufacturing Company, Buffalo, N. Y. Bedstead end frame or analogous article. Des. 82,617; Nov. 25.

McKay, John, assignor to Hard Manufacturing Company, Buffalo, N. Y. Bedstead end frame or analogous article. Des. 82,618; Nov. 25.

McKay, John, assignor to Hard Manufacturing Company, Buffalo, N. Y. Bedstead end frame or analogous article. Des. 82,619; Nov. 25.

McKay, John, assignor to Hard Manufacturing Company, Buffalo, N. Y. Bedstead end frame or analogous article. Des. 82,620; Nov. 25.

McLaughlin, Daniel P., Chicago, Ill. Flying machine. 1,783,024; Nov. 25.

McLaughlin, William I., assignor, by mesne assignments, to Standard Oil Company of California, San Francisco, Calif. Time-controlled compass indicator. 1,782,474; Nov. 25.

McWhirter, William C., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Electric lock. 1,782,788; Nov. 25.

McWilliams, William W. (See Bowly, H. W., and McWilliams.)

Mechanics Universal Joint Company. (See Waisner, Horace L., assignor.)

Meissner, Alexander, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H. Hallesches, Berlin, Germany. Antenna. 1,783,025; Nov. 25.

Mekelburg, Earl F. (See Campbell, H. E., and Mekelburg.)

Menasha Products Company, The. (See Gardner, George H., assignor.)

Mergenthaler Linotype Company. (See Quest, Alfred W. F., assignor.)

Merian, Frederic, and J. W. Cruikshank, Pittsburgh, Pa., assignors, by mesne assignments, to Pilkington Brothers Limited, Lancashire, England. Plate-glass polishing apparatus. 1,782,475; Nov. 25.

Merriam, Henry F., West Orange, N. J., assignor to General Chemical Company, New York, N. Y. Apparatus for cooling fluids. 1,782,435; Nov. 25.

Metal Lamp Corporation. (See Kornblum, Morris, assignor.)

Metal Specialties Manufacturing Co. (See Hermann, Wolfgang, assignor.)

Metro-Goldwyn-Mayer Corporation. (See De Vinna, Clyde, assignor.)

Meyer, Herbert A., Buffalo, N. Y. Confection wrapper. 1,782,856; Nov. 25.

Meyer, William, Chicago, Ill. Stand and mounting. 1,782,660; Nov. 25.

Michell, Anthony G. M., Melbourne, Australia, assignor, by mesne assignments, to Michell-Crankless Engines Corporation, New York, N. Y. Construction of operating crankless internal-combustion and explosion engines. Re17,879; Nov. 25.

Michell-Crankless Engines Corporation. (See Michell, Anthony G. M., assignor.)

Michelman, Nathan, Brooklyn, N. Y. Grating. 1,782,789; Nov. 25.

Michigan Steel Casting Company. (See Gorham, Marvine, assignor.)

Midgett, Penelton G., Dallas, Tex. Animal trap. 1,782,661; Nov. 25.

Milks, Elbert D., Salamanca, N. Y. Necktie clip. 1,783,049; Nov. 25.

Miller, Charles, Long Island City, and M. Feinstein, Corona, N. Y.; said Feinstein assignor to said Miller. Heel-attaching means. 1,782,436; Nov. 25.

Miller, Ernest B., and G. C. Connolly, assignors to The Silica Gel Corporation, Baltimore, Md. Obtaining a catalytic gel. 1,782,857; Nov. 25.

Miller, Frank E., New York, N. Y. Electrical tone producer with universal audion. 1,782,542; Nov. 25.

Miller, Frederic H., Wilkinsburg, Pa., and R. P. Jackson, Berkley, Calif., assignors to Westinghouse Electric and Manufacturing Company. Insulator. 1,782,790; Nov. 25.

Miller, Henry, and B. B. Betts, St. Louis, Mo.; said Betts assignor to said Miller. Heating device for railroad switches. 1,782,164; Nov. 25.

Miller, Stuart P., Philadelphia, Pa., assignor to The Barrett Company. Sulphur and resin compound. 1,782,693; Nov. 25.

Mills, John W. (See Muirhead, J. R., and Mills.)

Mishawaka Rubber & Woolen Manufacturing Company. (See Winterhalter, Martin, assignor.)

Moehler, Otto J., Bloomfield, assignor to General Electric Vapor Lamp Company, Hoboken, N. J. Combined support and housing for an electric discharge device. Des. 82,639; Nov. 25.

Mohler, Valentine J., Wheaton, assignor, by mesne assignments, to The Liquid Carbonic Corporation, Chicago, Ill. Bottle-crowning machine. 1,782,904; Nov. 25.

Mohun, John L., and H. Piesch, Omaha, Nebr., assignors to National Lock Washer Company, Newark, N. J. Bottom bar for curtains. 1,782,905; Nov. 25.

Molins, Walter E., Deptford, London, England. Cigarette-making machine. 1,783,093; Nov. 25.

Moll, Walter, assignor to Hoosier Lamp and Stamping Corporation, Evansville, Ind. Oven door. 1,782,739; Nov. 25.

Monro, William L., assignor to Window Glass Machine Company, Pittsburgh, Pa. Method and apparatus for making sheet glass. 1,782,972; Nov. 25.

Monroe Calculating Machine Company. (See Smith, Frank M., assignor.)

Monroe, Finley, Emmett, Idaho. Elevator. 1,782,933; Nov. 25.

Moody, Gilbert D., Weyauwega, Wis. Apparatus for stacking ore and similar material. 1,782,996; Nov. 25.

Moore, William D., and W. Morgan, Birmingham, Ala., assignors to Sand Spun Patents Corporation, New York, N. Y. Centrifugal casting machine. 1,783,094; Nov. 25.

Morgan Construction Company. (See Bradley, Anson K., assignor.)

Morgan Construction Company. (See Sheperdson, John W., assignor.)

Morgan, Guy, assignor to The Warford Corporation, New York, N. Y. Power-transmitting mechanism. 1,782,543; Nov. 25.

Morgan, Walter. (See Moore, W. D., and Morgan.)

Morgan, Walter, assignor to American Cast Iron Pipe Company, Birmingham, Ala. Ladle-tipping device for casting machines. 1,783,128; Nov. 25.

Morrill, Wayne J., Fort Wayne, Ind., assignor to General Electric Company. Magnetic core. 1,783,050; Nov. 25.

Morris, Thomas O., Harrisburg, Pa., and J. J. Lawlor, Plainfield, N. J., assignors, by mesne assignments, to Automatic Molding Machine Corporation, Dover, Del. Molding machine. 1,782,762; Nov. 25.

Morrow, Emmet H., Chicago, Ill., assignor to Automatic Oilingseal Corporation. Attachment for oil cans. 1,782,579; Nov. 25.

Moses, Amaziah J., and F. H. Wright, assignors to The Casey-Hedges Company, Chattanooga, Tenn. Handhole plate. 1,783,129; Nov. 25.

Mosgrove, Charles A., Waterbury, assignor to The Autoyre Company, Oakville, Conn. Swinging-arm towel rack. 1,782,828; Nov. 25.

Moskowitz, Ben Z., assignor, by mesne assignments, to Pilot Radio & Tube Corporation, Brooklyn, N. Y. Vacuum-tube socket. 1,782,437; Nov. 25.

Moto Meter Gauge & Equipment Corporation. (See Gochnauer, Walter E., assignor.)

Mould, James A., Milwaukee, Wis. Internal-combustion engine. 1,782,740; Nov. 25.

Mueller Brass Co. (See Hill, Charles A., assignor.)

Muirhead, John R., Kirkcaldy, and J. W. Mills, Adelaide, South Australia, Australia. Device for pumping fluids. 1,783,095; Nov. 25.

Muller, Firm Johann Carl. (See Ohmsen, Richard C. J. A., assignor.)

Muntz, Eric P. (See Skaer, Arthur P., assignor.)

Muntz, Eric P., Buffalo, N. Y. Building. 1,782,997; Nov. 25.

Myers, Eugene V., East Orange, N. J., assignor to A. Schrader's Son, Incorporated, Brooklyn, N. Y. Valve for pneumatic tires or the like. 1,782,580; Nov. 25.

Myers, Hubert A., Toledo, Ohio. Lighter. 1,782,544; Nov. 25.

Naamlooze Vennootschap Maatschappij tot Veraardiging van Snijmachines volgens Van Berkel's Patent en van andere Werktingen. (See van Duyn, Adrianus, assignor.)

Nagy, Charles, Hillside, N. J. Kite. 1,782,858; Nov. 25.

Narrow, Anton H., Memphis, Tenn. Keyboard cam roll. 1,782,694; Nov. 25.

Nash, Arthur E., Philadelphia, and J. S. Alcorn, Cynwyd, assignors to Alcorn Combustion Company, Philadelphia, Pa. Heat-transfer system. 1,782,829; Nov. 25.

National Air Brake Service, Inc. (See Ricketts, James R., assignor.)

National Aniline & Chemical Co. Inc. (See Geller, Leon W., assignor.)

National Brake & Electric Company. (See Beimling, William A., assignor.)

National Electric Products Corporation. (See Bennett, Inslee A., assignor.)

National Electric Products Corporation. (See Fullman, James M. G., assignor.)

National Electric Products Corporation. (See Sharp, L. Alan, assignor.)

National Lock Washer Company. (See Mobun, J. L., and Piesch, assignors.)

National Mfg. Co. (See Sneierson, S. L., and Hildebrand, assignors.)

National Supply Company, The. (See Spalding, John D., assignor.)

National Supply Company, The. (See Wright, Clyde S., assignor.)

Naunton, William J. S. (See Cronshaw, C. J. T., and Naunton.)

Neelmeier, Wilhelm. (See Bauer, Neelmeier, and Nocken.)

Neuberger, Franklin H., Endicott, N. Y., assignor of one-tenth to E. J. Brand, Jeffersonville, N. Y. Clothesline fastener. 1,782,625; Nov. 25.

Neufeldt & Kuhnke Betriebsgesellschaft m. b. H. (See Chappuzeau, H., and Emersleben, assignors.)

Neuschafer, Frederick, Jersey City, N. J., and H. Botwin, Brooklyn, N. Y. Carbonating machine. 1,782,511; Nov. 25.

Newman, Charles, New York, N. Y., and E. G. Appleton, assignors to Roach-Appleton Manufacturing Company, Chicago, Ill. Switch box. 1,782,545; Nov. 25.

Newman, Charles, New York, N. Y., and E. G. Appleton, assignors to Roach-Appleton Manufacturing Company, Chicago, Ill. Box-supporting ear. 1,782,546; Nov. 25

Newman, Morris S., Newark, N. J. Device for treating the stomach with ultra-violet rays. 1,782,906; Nov. 25.

Niagara Machine and Tool Works. (See Lindgren, Bror J., assignor.)

Nichols Products Corp. (See Sadwith, Ryan, assignor.)

Nicosia, Vincent N., Houston, Tex. Hair-drying apparatus. 1,782,626; Nov. 25.

Nielsen, John F., Long Island City, assignor to Western Electric Company, Incorporated, New York, N. Y. Remote control system. 1,782,907; Nov. 25.

Nielsen, Karl K., assignor to Alcor Manufacturing Company, Chicago, Ill. Adjustable fixture strap. 1,782,791; Nov. 25.

Niogret, Henri F., Lyon, France, assignor, by mesne assignments, to Du Pont Rayon Company, New York, N. Y. Apparatus for the manufacture of artificial silk. 1,782,581; Nov. 25.

Noble, F. H., & Co. (See Shields, John M., assignor.)

Noble, Glenn S. (See Jones, Wyatt J., assignor.)

Nocken, Theodor. (See Bauer, W., Neelmeier, and Nocken.)

Nolde and Horst Company, The. (See Weidner, John R., assignor.)

Norgren, Carl A., Denver, Colo. Lubricating device for pneumatically-operated tools. 1,782,741; Nov. 25.

Northwest Paper Company, The. (See Andrews, Dennis C., assignor.)

Nye Tool & Machine Works. (See Lilleberg, Tideman M., assignor.)

Ober, William R., Llanerch, Pa. Transplanting device. 1,783,026; Nov. 25.

Ohl, Russell S., New York, N. Y., assignor to American Telephone and Telegraph Company. Piezo-electric oscillator. 1,783,130; Nov. 25.

Ohl, Russell S., New York, N. Y., assignor to American Telephone and Telegraph Company. Mounting for piezo-electric devices. 1,783,131; Nov. 25.

Ohl, Russell S., New York, N. Y., assignor to American Telephone and Telegraph Company. Mounting for piezo-electric devices. 1,783,132; Nov. 25.

Ohle, Heinz, and J. Othmar-Neuscheller, Berlin, Germany. Ethyl alcohol-gel. 1,783,133; Nov. 25.

Ohmsen, Richard C. J. A., assignor to Firm Johann Carl Muller, Dresden, Germany. Cigar-making machine. 1,782,627; Nov. 25.

Oldham, Nile, Chicago, Ill. Roll-screen construction. 1,783,052; Nov. 25.

Olsen, Olaf C., Dayton, assignor of two-thirds to The Borden Company, Warren, Ohio. Refrigerating apparatus. 1,782,628; Nov. 25.

Olsson, Alfred, Guytasa, Sweden. Combined cultivator harrow. 1,782,934; Nov. 25.

O'Massey, Richard H., assignor of one-half to E. Padia, Denver, Colo. Aeroplane. 1,782,878; Nov. 25.

Orenstein, Max, Berlin, Germany. Continuous soldering. 1,783,134; Nov. 25.

Orkla Grube-Aktiebolag. (See Lenander, Nils E., assignor.)

Orndoff, Herbert W., assignor to The E. V. Benjamin Co., Inc., New Orleans, La. Bag-turning machine. 1,782,935; Nov. 25.

Oswald, Marcel, Nanterre, France, assignor to Compagnie Lorraine de Charbons pour l'Electricite, Paris, France. Carbon for electro-technical uses and manufacture thereof. 1,783,135; Nov. 25.

Othmar-Neuscheller, Johanna. (See Ohle, H., and Othmar-Neuscheller.)

Oudin, Ferdinand, Riverside, and B. H. Skinner, Berwyn, Ill., assignors to Western Electric Company, Incorporated, New York, N. Y. Clamping device. 1,782,438; Nov. 25.

Oudin, Ferdinand, Riverside, and B. H. Skinner, Berwyn, Ill., assignors to Western Electric Company, Incorporated, New York, N. Y. Clamping device. 1,782,439; Nov. 25.

Oudin, Ferdinand, Riverside, and B. H. Skinner, Berwyn, Ill., assignors to Western Electric Company, Incorporated, New York, N. Y. Clamping device. 1,782,440; Nov. 25.

Overbey, Floyd M., Leavenworth, Kans. Chair. 1,782,763; Nov. 25.

Owens-Illinois Glass Company. (See Wilson, Ben H., assignor.)

Padelford, Lester E., assignor to The Republic Metalware Company, Buffalo, N. Y. Toasting-machine casing. Des. 82,621; Nov. 25.

Padia, Eloy. (See O'Massey, Richard H., assignor.)

Paisley, James A., assignor to The Valley Camp Coal Company, Cleveland, Ohio. Mining lamp. 1,783,136; Nov. 25.

Pajeau, Charles H., Glencoe, assignor to The Toy Tinkers, Inc., Evanston, Ill. Rotary blotter. 1,782,792; Nov. 25.

Palmer, Albert F. (See Palmer, John B., assignor.)

Palmer, John B., assignor of one-half to A. F. Palmer, Fort Wayne, Ind. Reel. 1,783,159; Nov. 25.

Palmer, John E., et al. (See Breitling, Adolf, assignor.)

Palmer, William, assignor of one-half to E. W. Astels, Buffalo, N. Y. Combined ironing board and table. 1,783,051; Nov. 25.

Pape, Floyd N., Clinton, Iowa. Shield for motor-vehicle headlights. 1,782,629; Nov. 25.

Paper Service Company, The. (See Rowe, William W., assignor.)

Paragon Vaporizer Corporation. (See Brush, Frederick F., assignor.)

Parker, Charles A., Haugan, Mont. Hose clamp. 1,782,476; Nov. 25.

Parker, John A., assignor to International Shoe Company, St. Louis, Mo. Die. 1,782,999; Nov. 25.

Parker Pen Company, The. (See Blackman, Horace L., assignor.)

Parkin, Winfred T., assignor to Theodore W. Foster & Brother Co., Providence, R. I. Loose-powder container. 1,783,160; Nov. 25.

Parks, Charles D., Danbury, Conn. Felting. 1,782,764; Nov. 25.

Parks, Charles D., Danbury, Conn. Felting. 1,782,765; Nov. 25.

Parlini, Alexander C., Woodside, assignor to Gotham Knitting Machine Corporation. Holder for reknitting fabrics. 1,782,879; Nov. 25.

Paschen, Paul, and W. Gebhardt, Nuremberg, assignors to Siemens-Schuckertwerke Aktiengesellschaft, Berlin-Siemensstadt, Germany. Apparatus for indicating speed variations. 1,783,000; Nov. 25.

Patent and Licensing Corporation, The. (See Kirschbraun, Lester, assignor.)

Paull, Erwin J., Brooklyn, N. Y., assignor to Doehler Furniture Co. Inc. Night table or the like. Des. 82,622; Nov. 25.

Paull, Erwin J., Brooklyn, N. Y., assignor to Doehler Furniture Co Inc. Chest of drawers or the like. Des. 82,623; Nov. 25.

Pawel, George W. (See Siefert, W. C., and Pawel.)

Peabody, Donald C. (See Sayres, C., and Peabody.)

CARNEGIE LIBRARY OF ATLANTA

Pearce, William J., McKeesport, Pa. Butter-cutting machine. 1,783,096; Nov. 25.
Pearmain, William J., assignor to Twin Disc Clutch Company, Racine, Wis. Friction clutch. 1,782,880; Nov. 25.
Peek, Frank W., jr., Pittsfield, Mass., assignor to General Electric Company. Electric discharge device. 1,783,052; Nov. 25.
Peerless Supply Company. (See Puckett, William H., assignor.)
Penecke, Walther, Graz, Austria, assignor to F. Bensa, Genoa, Italy. Manufacturing a green vat dyestuff from 1,12 perylene quinone. 1,783,137; Nov. 25.
Peneff, Georg, Berlin-Wilmersdorf, assignor to Siemens-Schuckertwerke Aktiengesellschaft, Berlin-Siemensstadt, Germany. Tiller. 1,783,153; Nov. 25.
Penn-Union Electric Corporation. (See Stoeltzlen, Charles L., assignor.)
Perego, James A., Elizabeth, La. Auxiliary soap-cake cover. 1,782,859; Nov. 25.
Perkins, Brayton M., Mounds, Utah. Order crane. 1,782,936; Nov. 25.
Perlmutter, Harry, Brooklyn, N. Y. Body suspension for baby carriages. 1,782,742; Nov. 25.
Perry, Stanley, assignor to Automatic Burner Corporation, Chicago, Ill. Controlling mechanism for oil burners. 1,782,937; Nov. 25.
Persons, Charles A., assignor to Persons-Majestic Manufacturing Company, Worcester, Mass. Ball-bearing pedal for bicycles, etc. 1,782,973; Nov. 25.
Persons-Majestic Manufacturing Company. (See Persons, Charles A., assignor.)
Petersen, Aage V., Frederiksberg, by Copenhagen, Denmark. Transforming of acoustic swinglings into electric capacity swinglings. 1,783,138; Nov. 25.
Pfeifer, Walter S., Shorewood, Wis., assignor, by mesne assignments, to The Reliance Company, Wilmington, Del. Starting device for synchronous motors. 1,782,908; Nov. 25.
Pfeiffer, S., Manufacturing Company. (See Lippmann, Max, assignor.)
Philippossian, Charles, Geneva, Switzerland. Alloy. 1,783,139; Nov. 25.
Phillips, Joseph, Denver, Colo. Radio and television cabinet. Des. 82,624; Nov. 25.
Piccione, Angelo, Buffalo, N. Y. Stationary shaving cup. 1,782,793; Nov. 25.
Pierce Development Company, The. (See Hoffman, Benjamin P. and A. M., assignors.)
Pierce, James B., jr., assignor to Barium Reduction Corporation, Charleston, W. Va. Manufacture of strontium oxide. 1,782,830; Nov. 25.
Pierce, Leon, New York, N. Y., assignor to Pierce Steel Pile Corporation. Crane. Re17,886; Nov. 25.
Pierce Steel Pile Corporation. (See Pierce, Leon, assignor.)
Piesch, Henry. (See Mohun, J. L., and Piesch.)
Pike, Robert D., Piedmont, Calif. Apparatus for the electrodeposition of iron. 1,782,909; Nov. 25.
Pilkington Brothers Limited. (See Merian, F., and Cruikshank, assignors.)
Pilot Radio & Tube Corporation. (See Geloso, John, assignor.)
Pilot Radio & Tube Corporation. (See Moskowitz, Ben Z., assignor.)
Pilot Radio & Tube Corporation. (See Ramsdell, Russell, assignor.)
Pinaud, Inc. (See Lynch, Frank J., assignor.)
Pineno, Stephen. (See Colantuono, M., and Pineno.)
Piquerez, Emile, Paris, France, assignor to Alemite Corporation, Chicago, Ill. Lubricant compressor. 1,782,441; Nov. 25.
Piston Ring Company, The. (See Johnson, Charles E., assignor.)
Plass, Robert H., Montclair, assignor to The Chapal Donner Corporation, Newark, N. J. Pelt-dehairing machine. 1,782,662; Nov. 25.
Plastic, Inc. (See Burgess, Laurie L., assignor.)
Pletcher, Delmer I., Long Beach, Calif. Hypodermic syringe. 1,782,938; Nov. 25.
Polcari, Basilio, Somerville, Mass. Sanitary doorknob. 1,783,097; Nov. 25.
Polzer, Fridolin, assignor to The E. H. Hotchkiss Company, Norwalk, Conn. Operating device for stapling machines, tag-affixing machines, and similar devices. 1,782,743; Nov. 25.
Porcelier Manufacturing Company. (See Dym, Jacob, assignor.)
Potyie, Frigyes, Philadelphia, Pa. Plastering machine. 1,783,098; Nov. 25.
Powers, James, deceased, Sierra Madre, Calif., S. Powers, executrix. Selecting machine. 1,782,442; Nov. 25.
Powers, Sophie, executrix. (See Powers, James.)
Pratt, Seely F., assignor, by mesne assignments, to Union Chest and Cabinet Corporation, Rochester, N. Y. Receptacle provided with trays. 1,782,630; Nov. 25.
Prescott Company, The. (See Grueter, William B., assignor.)
Prez, Robert M., assignor to Reo Motor Car Company, Lansing, Mich. Fastener for trimming material. 1,782,695; Nov. 25.
Price, Herbert E., Seattle, Wash. Animated toy. 1,782,477; Nov. 25.
Price, Mary K., executrix. (See Price, William G.)
Price, William G., deceased, Yakima, Wash.; M. K. Price, executrix. Hydraulic braking apparatus. 1,782,663; Nov. 25.
Prosperity Company, The. (See Simpson, George F., assignor.)
Publicker, Inc. (See Haner, Carl, assignor.)
Puckett, William H., assignor to Peerless Supply Company, Tulsa, Okla. Stuffing box. 1,782,696; Nov. 25.
Puschett, Theresa. (See Kozlowski, Leon, assignor.)
Pyrene Manufacturing Company. (See MacGregor, Peter G., assignor.)
Quaker Oats Company. (See Ufford, Helen, assignor.)
Quaker Silver Company. (See Jennings, James W., assignor.)
Quinliven, Matthew S., Los Angeles, Calif. Fireplace air heater. 1,783,140; Nov. 25.
Radio Corporation of America. (See Hansell, Clarence W., assignor.)
Radloff, Erwin E., and W. Janke, assignors to C. B. Henschel Mfg. Co., Milwaukee, Wis. Attachment for bronzing machines. 1,782,88[illegible]; Nov. 25.
Radloff, Johannes, Berlin, Germany, assignor to General Electric Company. Piston for internal-combustion engines. 1,783,054; Nov. 25.
Raetz, Guglielmo, Cordenons, Italy. Apparatus for making weaving knots. 1,783,001; Nov. 25.
Rah, Joseph, assignor to G. & W. Electric Specialty Co., Chicago, Ill. Conductor disconnecter arrangement. 1,782,547; Nov. 25.
Ramsdell, Russell, Poughkeepsie, N. Y., assignor, by mesne assignments, to Pilot Radio & Tube Corporation, Lawrence, Mass. Tube shield. 1,782,443; Nov. 25.
Ramsdell, Russell, Poughkeepsie, N. Y., assignor, by mesne assignments, to Pilot Radio & Tube Corporation, Lawrence, Mass. Inductance. 1,782,444; Nov. 25.
Randolph, Leonard M., Newark, N. J. Rotary engine. 1,782,766; Nov. 25.
Randolph, Samuel D., Fort Worth, Tex. Power-saving jack. 1,782,512; Nov. 25.
Rawlings, Samuel J. (See Grimley, John P., assignor.)
Raymond, Horace H., Berlin, assignor to The Stanley Works, New Britain, Conn. Hinge leaf. Des. 82,625; Nov. 25.
Raymond, Horace H., Berlin, assignor to The Stanley Works, New Britain, Conn. Hinge. 1,782,582; Nov. 25.
Regents of the University of Michigan, The. (See White, Alfred H., assignor.)
Reifsnyder, Frederick R., Pittsburgh, Pa. Shock absorber. 1,782,631; Nov. 25.
Reipert, Ernst, Nowawes, near Potsdam, assignor to Askania-Werke Aktiengesellschaft vormals Centralverkstatt Dessau und Carl Bamberg-Friedenau, Berlin-Friedenau, Germany. Apparatus for making exposures of the path or route of flying machines or the like. 1,782,860; Nov. 25.
Reis, Curt F., assignor to Excel Magneto Company, Chicago, Ill. Magneto. 1,782,939; Nov. 25.
Reliance Company, The. (See Pfeifer, Walter S., assignor.)
Renault, Louis. (See Saives, Leon, assignor.)
Reo Motor Car Company. (See Prez, Robert M., assignor.)
Republic Metalware Company, The. (See Padelford, Lester E., assignor.)
Reschke, William F., Wichita, Kans. Mechanical movement. 1,782,697; Nov. 25.
Resinous Products & Chemical Company, The. (See Bruson, Herman A., assignor.)
Reuter, Henry C., Chicago, Ill. Frame for windows or the like. Des. 82,626; Nov. 25.
Reyrolle, A., & Company Limited. (See Allan, Archibald, assignor.)
Rial, Wirt D., Wilmington, and W. R. Barratt, Palos Verdes Estates, assignors, by mesne assignments, to Richfield Oil Company of California, Los Angeles, Calif. Recovering waste clays. 1,782,744; Nov. 25.
Richfield Oil Company of California. (See Rial, W. D., and Barratt, assignors.)
Ricketts, James R., Richmond, Calif., assignor to National Air Brake Service, Inc., Reno, Nev. Triple-valve reamer. 1,782,910; Nov. 25.
Ridgely Heater Company. (See Vasey, George F., assignor.)
Rieber, Frank, San Francisco, Calif. System and method for geophysical exploration. 1,782,445; Nov. 25.
Ries, Henry J., Iowa City, Iowa. Paper clip. 1,783,099; Nov. 25.
Rippey, Samuel H., Philadelphia, Pa. Vacuum-cleaner nozzle. 1,782,882; Nov. 25.
Roach-Appleton Manufacturing Company. (See Newman, C., and Appleton, assignors.)
Robert, Nelson J., Lynchburg, Va. Shoe counter. 1,782,632; Nov. 25.
Robertson, Laurence, Toledo, Ohio. Crank disk. 1,782,746; Nov. 25.
Robinson, Charles W., Hamilton, Ontario, Canada, assignor, by mesne assignments, to International Harvester Company, Chicago, Ill. Grain drill. 1,782,583; Nov. 25.
Robinson, Ralph, administrator. (See Talbutt, R. H., and Allner.)
Rodney Hunt Machine Company. (See Biggs, George A., assignor.)
Roe, Ernest S., assignor to The King Manufacturing Company, Plymouth, Mich. Air gun. 1,782,664; Nov. 25.
Rohde, Otto C., assignor to Champion Spark Plug Company, Toledo, Ohio. Shielded spark plug. 1,782,745; Nov. 25.
Roos, Delmar G., assignor to The Studebaker Corporation, South Bend, Ind. Internal-combustion engine. 1,782,513; Nov. 25.
Rosenband, Albert, assignor to The Rosenband Manufacturing Co., Newark, N. J. Clasp for pocketbooks and the like. 1,782,665; Nov. 25.
Rosenband Manufacturing Co., The. (See Rosenband, Albert, assignor.)
Rosenfeld, Louis, Baltimore, Md., assignor to Cherry-Burrell Corporation, Chicago, Ill. Milk cooler. 1,783,100; Nov. 25.
Rosenfield, Edward M., New York, N. Y. Control for electric advertising signs. 1,782,883; Nov. 25.
Ross, Albert S., Dallas, Tex. Money changer. 1,782,666; Nov. 25.
Rowe, William W., Cincinnati, assignor to The Paper Service Company, Lockland, Ohio. Creping process. 1,782,767; Nov. 25.
Rowse, Frank J., Pawtucket, R. I. Coin-operated vending machine. 1,782,768; Nov. 25.
Royal, Thomas M., Philadelphia, Pa. Making paper bags. 1,782,884; Nov. 25.
Royalty Holding Corporation. (See Hasselbring, John, jr., assignor.)
Rozières, Jean A. L., assignor of one-half to Societe Française de Centrifugation, Paris, France. Apparatus for recovering fats from emulsions containing solid particles. 1,782,974; Nov. 25.
Ruggles-Klingemann Mfg. Co. (See Kimball, James L., assignor.)
"Rusbol," Société à Responsabilité Limitée. (See Bolard, Alfred J. G., assignor.)
Rush, Milton A., San Francisco, Calif. Radio leg rest. Des. 82,642; Nov. 25.
Russ Manufacturing Company, The. (See Seitz, Dean C., assignor.)
Russell, Charles L., Rahway, N. J., assignor to The Hess-Bright Manufacturing Company, Philadelphia, Pa. Cage for ball bearings. 1,783,141; Nov. 25.
Russell, Joseph W. (See Bronson, E. G., and Russell.)
Russell, Leslie A., assignor to Koehring Company, Milwaukee, Wis. Hoe-type shovel crane. 1,783,055; Nov. 25.
Russell, Leslie A., assignor to Koehring Company, Milwaukee, Wis. Instroke shovel crane. 1,783,056; Nov. 25.
Rust, James E., Park Ridge, assignor to G. A. E. Kohler, Chicago, Ill. Switch for devices for supplying paper to printing presses. 1,782,698; Nov. 25.
Ruth, Charles H., Huntington Park, assignor, by mesne assignments, to Ruth Dredger Manufacturing Corporation, Ltd., Los Angeles, Calif. Ditch-digging machine. 1,782,478; Nov. 25.
Ruth Dredger Manufacturing Corporation, Ltd. (See Ruth, Charles H., assignor.)
Ryan, John T., Detroit, Mich. Tire-valve dust cap and locking mechanism therefor. 1,782,584; Nov. 25.
Sadtler, Wilhelm, Bad Homburg, Germany. Toy weapon. 1,782,479; Nov. 25.
Sadwith, Ryan, Newark, N. J., assignor to Nichols Products Corp., New York, N. Y. Wall and partition construction for insulating purposes. 1,782,794; Nov. 25.
St. Regis Paper Company. (See Martin, Chester C., assignor.)
Saives, Leon, assignor to L. Renault, Billancourt, France. Apparatus for igniting internal-combustion engines. 1,782,940; Nov. 25.
Sand Spun Patents Corporation. (See Moore, W. D., and Morgan, assignors.)
Sanitary Products Corporation of America. (See Fine, Bernard M., assignor.)
Sauvage, Stanley, Chicago, Ill. Heat distributor or plate. 1,782,699; Nov. 25.
Savino, Camillo, City Island, N. Y. Bottle closure. 1,783,207; Nov. 25.
Savoye, Charles U., Hackensack, assignor to The Babcock & Wilcox Company, Bayonne, N. J. Superheater. 1,782,585; Nov. 25.
Savutime Devices, Inc. (See Hunt, George C., assignor.)
Sayres, Clinton, and D. C. Peabody, Philadelphia, Pa., assignor to The J. G. Brill Company. Load-regulating means. 1,783,142; Nov. 25.
Schaefer, Adolph O., assignor to Atlantic Service Company, Inc., Brooklyn, N. Y. Toilet-paste-tube compressor. 1,783,101; Nov. 25.
Schaer, Charles, Langenthal, assignor to the firm of Sulzer Frères Société Anonyme, Winterthur, Switzerland. High-pressure reciprocating compressor. 1,782,975; Nov. 25.
Schaub, Jacob, Westfield, N. J., assignor to Best Foods, Inc., New York, N. Y. Coloring material for oleomargarine, butter, and the like. 1,783,154; Nov. 25.
Scheele, Edwin H., New York, N. Y., assignor to Westfield River Paper Company, Inc., Russell, Mass. Embossed glassine paper. Des. 82,627; Nov. 25.
Scheuchzer, Auguste, Renens, Switzerland. Device for shunting vehicles off a main line of track. 1,782,941; Nov. 25.
Schiltz, Bernard P., Cleveland, Ohio. Flexible driving connection for tool holders. 1,782,633; Nov. 25.
Schmidt, Robert E., Elberfeld, Germany, assignor to General Aniline Works, Inc., New York, N. Y. Splitting off sulphogroups from anthraquinone sulphonic acid derivatives. 1,782,747; Nov. 25.

Schnell, William, assignor to Ternstedt Manufacturing Company, Detroit, Mich. Dome light or the like for an automotive vehicle. Des. 82,628; Nov. 25.
Schrader's, A., Son, Incorporated. (See Myers, Eugene V., assignor.)
Schrempp, Albert, Dusseldorf, Germany. Filter device. 1,783,143; Nov. 25.
Schröder, Edmund, Berlin, Germany. Three-phase one-phase converter, especially for electric resistance heating and welding machines. 1,782,634; Nov. 25.
Schultz, Alfred W., assignor to The Zeidler Concrete Products Machinery Company, Waterloo, Iowa. Machine and method for constructing concrete pipe. 1,782,446; Nov. 25.
Schuster, Kurt, and H. Hopff, Ludwigshafen-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Preservation of latex. 1,783,057; Nov. 25.
Scott, Irving G., and M. C. Fox, New York, N. Y. Wall pot holder. Des. 82,629; Nov. 25.
Scovill Manufacturing Company. (See Fenton, Paul E., assignor.)
Scrantom, De Hart G., Maplewood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Forming electrical terminal members. 1,782,447; Nov. 25.
Scrimgeour, John, Toronto, Ontario, Canada. Lip-stick device. 1,782,911; Nov. 25.
Seagrave Corporation, The. (See Havens, Homer M., assignor.)
Seeley, Harold T., Lansdowne, Pa., assignor to General Electric Company. Regulating system. 1,782,514; Nov. 25.
Seitz, Dean C., Cleveland, Ohio, assignor to The Russ Manufacturing Company. Draft arm for a soda fountain. Des. 82,630; Nov. 25.
Seward, Ernest R., Detroit, Mich., assignor, by mesne assignments, to Cincinnati Grinders Incorporated, Cincinnati, Ohio. Centerless grinding machine. 1,782,480; Nov. 25.
Sharman, Herbert B., and A. E. Burrage, Northampton, England. Vacuum cleaner. 1,783,058; Nov. 25.
Sharp, L. Alan, Avalon, Pa., assignor to National Electric Products Corporation, New York, N. Y. Duct end outlet aligning means. 1,782,548; Nov. 25.
Sharp, William R. (See Lamb, T., and Sharp.)
Shelhamer, Lester W., Oak Park, Ill. Truck load sections or trays. 1,782,667; Nov. 25.
Sheperdson, John W., assignor to Morgan Construction Company, Worcester, Mass. Method and apparatus for the manufacture and conditioning of skelp bar. 1,782,700; Nov. 25.
Sheridan, Clarence F., Detroit, Mich. Quick-change punch and holder therefor. 1,783,028; Nov. 25.
Shields, John M., assignor to F. H. Noble & Co., Chicago, Ill. Jewelry container. Des. 82,646; Nov. 25.
Shields, L. J. (See Kurtz, Charles F., assignor.)
Shipley, Grant B., and H. Allnder, Pittsburgh, Pa., assignors, by mesne assignments, to The International Nickel Company, Inc., New York, N. Y. Annealing furnace. 1,782,481; Nov. 25.
Short, Samuel F., La Grange, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Guarding and guiding attachment for tools. 1,782,448; Nov. 25.
Siebert, William, assignor of one-half to H. Wigge, Chicago, Ill. Anchor. 1,782,449; Nov. 25.
Siefert, William C., and G. W. Pawel, Clearfield, Pa., assignors, by mesne assignments, to International Nickel Company, Inc., New York, N. Y. Apparatus for heating a pickling solution. 1,782,482; Nov. 25.
Siemens & Halske, Aktiengesellschaft. (See Jipp, August, assignor.)
Siemens-Schuckertwerke Aktiengesellschaft. (See Deetjen, Richard, assignor.)
Siemens-Schuckertwerke Aktiengesellschaft. (See Paschen, P., and Gebhardt, assignors.)
Siemens-Schuckertwerke Aktiengesellschaft. (See Peneff, Georg, assignor.)
Sigg, Joseph A., Pittsburgh, Pa. Screw driver. 1,782,515; Nov. 25.
Silbersack, Arthur. (See Broeman, Frank C., assignor.)
Silent Glow Oil Burner Corporation, The. (See Lapointe, Albert A., assignor.)
Silica Gel Corporation. (See Miller, E. B., and Connolly, assignors.)
Simpson, Emory G., assignor to Ternstedt Manufacturing Company, Detroit, Mich. Curtain roller. 1,783,002; Nov. 25.
Simpson, George F., Boston, Mass., assignor to The Prosperity Company, Inc., Syracuse, N. Y. Woven-wire-cloth covering for pressing-machine elements. Re17,883; Nov. 25.
Skaer, Arthur P., assignor to E. P. Muntz, Buffalo, N. Y. Storage bin. 1,783,003; Nov. 25.
Skinner, Benjamin H. (See Oudin, F., and Skinner.)
Slaght, Ace W., near San Jose, Calif. Radiosignaling. 1,782,831; Nov. 25.
Smith, Alfred B. [illegible]d C. R., Wolverhampton, England. Mixing apparatus. 1,782,795; Nov. 25.
Smith, Bennet A. (See McGee, William C., assignor.)
Smith, Clifford R. (See Smith, Alfred B. and C. R.)

Smith, Daniel W., Oak Park, and W. Webber, La Grange, Ill., assignors to International Harvester Company. Binder hitch. 1,782,586; Nov. 25.
Smith, Frank M., West Orange, assignor to Monroe Calculating Machine Company, Orange, N. J. Attachment for calculating machines. 1,783,172; Nov. 25.
Smith, Harry A. (See Coufal, J. F., and Smith.)
Smith, Helen H., St. Louis, Mo. Pattern. 1,783,004; Nov. 25.
Smith, Irving J., Baltimore, Md. Artificial stone and making the same. 1,782,748; Nov. 25.
Smoot, Charles H., Maplewood, N. J. Regulator. 1,782,832; Nov. 25.
Sneierson, Samuel L., Boston, and J. L. Hildebrand, Lynn, assignors to National Mfg. Co., Boston, Mass. Electric switch. 1,782,516; Nov. 25.
Snook, Homer C., South Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Eliminating noise in machinery. 1,782,912; Nov. 25.
Snyder, Clifford L. (See Tucker, M. D., and Snyder.)
Snyder, Frank L., assignor to The White Motor Company, Cleveland, Ohio. Form-rolling machine. 1,782,483; Nov. 25.
Soc. An. Officine Di Villar Perosa. (See Boella, Giovanni, assignor.)
Societe Anonyme Compagnie de Produits Chimiques et Electrometallurgiques Alais, Froges et Camarque. (See Hulin, Paul L., assignor.)
Societe Francaise de Centrifugation. (See Roziéres, Jean A. L., assignor.)
Societe Nationale pour l'Etude des Transports Aeriens, Societe Anonyme. (See Florine, Nicolas, assignor.)
Society of Chemical Industry in Basle. (See Gubler, Hans, assignor.)
Society of Chemical Industry in Basle. (See Gubler, H., De Montmollin, and Spieler, assignors.)
Söderqvist, William O. N., Lidköping, Sweden. Spring-operated shade roller. 1,782,976; Nov. 25.
Söderqvist, William O. N., Lidköping, Sweden. Metallic shade roller. 1,782,977; Nov. 25.
Soto, Rosario, Oxnard, Calif. Power generator. 1,782,517; Nov. 25.
Souter, Eugene H., Independence, assignor to The Car-Record Company, Kansas City, Mo. Record-carrying device for automobiles. 1,782,942; Nov. 25.
Spalding, John D., Grafton, Pa., assignor, by mesne assignments, to The National Supply Company, Toledo, Ohio. Rotary well-drilling machine. 1,782,769; Nov. 25.
Speedway Manufacturing Company. (See Knowlson, James S., assignor.)
Spencer, Reginald W., South Kirkby, near Pontefract, and H. P. Harris, Sutton Coldfield, England. Pipe joint. 1,782,484; Nov. 25.
Spieler, Joseph. (See Gubler, H., De Montmollin, and Spieler.)
Spieth, William C., Geneva, Ohio. Electric-arc lamp. 1,782,485; Nov. 25.
Spilman, James E., Wartrace, Tenn. Animal trap. 1,783,144; Nov. 25.
Spitzer, Edwin E., Schenectady, N. Y., assignor to General Electric Company. Rectifying alternating current. 1,783,059; Nov. 25.
Stadler, Edward H., St. Louis, and G. E. Dillingham, Richmond Heights, Mo. Printer's chase for checks and the like. 1,782,587; Nov. 25.
Stancill, Robert B., Dalton, Ga. "Jerked in" filling eliminator. 1,782,749; Nov. 25.
Stanciffe, Cecil W., Aldwych, London, England. Boiler and furnace. 1,782,635; Nov. 25.
Standard Cap & Seal Corporation. (See Tevander, Olof N., assignor.)
Standard Computing Scale Company, The. (See Jaenichen, Louis, assignor.)
Standard Oil Company. (See McLaughlin, William I., assignor.)
Stanford, Forrest G. (See Glaze, H. L., and Stanford.)
Stanford, Forrest G., and G. Baker; said Baker assignor to G. H. Hyland, Los Angeles, Calif. Liquid-display apparatus. 1,782,943; Nov. 25.
Stanford, Forrest G., and G. Baker; said Baker assignor to G. H. Hyland, Los Angeles, Calif. Liquid-display fountain. 1,782,944; Nov. 25.
Stanley Works, The. (See Raymond, Horace H., assignor.)
Stansfield, Emilio, Bergamo, and E. Brunner, Milan, Italy. Drawing frame. 1,782,549; Nov. 25.
Steel and Tubes, Inc. (See Lawson, John F., assignor.)
Stelzer, William, Chicago, Ill., assignor to Bendix Aviation Corporation, New York, N. Y. Airplane control. 1,782,750; Nov. 25.
Stephenson, Hugh M., Fort Wayne, Ind., assignor to General Electric Company. Sewing-machine-feeding mechanism. 1,783,060; Nov. 25.
Steps, Robert A., Los Angeles, Calif. Screen pipe and making same. 1,782,518; Nov. 25.
Stewart, Albert E., assignor to Acme-Knitting Machine & Needle Company, Franklin, N. H. Sinker for knitting machines. 1,782,486; Nov. 25.
Stewart, Alexander W., Glasgow, Scotland. Ventilating apparatus. 1,783,005; Nov. 25.
Stewart, Carson R., Akron, Ohio, assignor to United States Chain & Forging Company, Pittsburgh, Pa. Traction device for tires. 1,783,161; Nov. 25.
Stewart-Warner Corporation. (See Wheeler, Leonard H., assignor.)
Stoeltzlen, Charles L., Erie, Pa., assignor to Penn-Union Electric Corporation. Connecter. Re17,880; Nov. 25.
Stokes, Douglas H., Cremorne, near Sydney, New South Wales, Australia. Electrically-operated lawn mower. 1,782,636; Nov. 25.
Stone, Edwin W., Longmeadow, Mass., and E. Martin, Suffield, assignors to Bigelow-Sanford Carpet Co., Inc., Thompsonville, Conn. Electrically-driven loom. 1,782,945; Nov. 25.
Straube, John F., Elkhorn, assignor of one-fourth to N. Swanson, Fremont, Nebr. Spike-drawing device. 1,782,487; Nov. 25.
Stuart, William W., Des Moines, Iowa, assignor to Franklin Oil Heating Incorporated, Columbus, Ohio. Oil Burner. 1,782,668; Nov. 25.
Studebaker Corporation, The. (See Roos, Delmar G., assignor.)
Sullivan, Daniel F., assignor of one-half to J. P. Furey, Lowell, Mass. Stop motion for knitting machines. 1,782,550; Nov. 25.
Sullivan, James A., Persey City, N. J. Automobile lamp. 1,782,551; Nov. 25.
Sulzer Frères Société Anonyme. (See Eisenburger, Kuno, assignor.)
Sulzer Frères Société Anonyme. (See Schaer, Charles, assignor.)
Sun Oil Company. (See Thomas, Henry, assignor.)
Supplee, Samuel G., West Orange, N. J. Porcelain-faced crown. 1,782,552; Nov. 25.
Sutton, Charles D., Waterbeach, assignor to Cambridge Instrument Company, Limited, London, England. Electric meter. 1,782,519; Nov. 25.
Swanson, Nels. (See Straube, John F., assignor.)
Swarner, Joseph D., Kansas City, Kans. Closure operator. 1,782,978; Nov. 25.
Swindler, Harry M., Dayton, assignor to The James Leffel & Company, Springfield, Ohio. Intermittent driving mechanism. 1,782,520; Nov. 25.
Sylva, John J. (See Chickester, O. F., and Sylva.)
Talbutt, Robert H., deceased, by R. Robinson, administrator, and F. A. Allner, Baltimore, Md. Roasting apparatus. 1,782,946; Nov. 25.
Talley, Randal E., Irwin, assignor to George J. Hagan Company, Pittsburgh, Pa. Electric heating furnace. 1,783,153; Nov. 25.
Talley, Randal E., Irwin, assignor to George J. Hagan Company, Pittsburgh, Pa. Heat-treating apparatus. 1,783,156; Nov. 25.
Taylor, Burt E., Mount Vernon, assignor to The Borden Company, New York, N. Y. Machine for applying cement to can tops. 1,782,450; Nov. 25.
Taylor, Charles C. (See Tyler, J. G., Taylor, and Johnson.)
Taylor, Harvey B., Philadelphia, Pa. System of speed governing for prime movers. 1,783,157; Nov. 25.
Taylor, Harvey B., Philadelphia, Pa. System of speed governing. 1,783,162; Nov. 25.
Teague, Walter D., New York, assignor to Eastman Kodak Company, Rochester, N. Y. Photographic-shutter cover. Des. 82,631; Nov. 25.
Teague, Walter D., New York, assignor to Eastman Kodak Company, Rochester, N. Y. Photographic-shutter cover. Des. 82,632; Nov. 25.
Technidyne Corporation. (See Flanzer, Joseph A., assignor.)
Teich, Ernest L., assignor to The American Hardware Corporation, New Britain, Conn. Push bar for doors. Des. 82,633; Nov. 25.
Terman, Frederick E., Stanford University, Calif. Electrical measuring instrument. 1,782,588; Nov. 25.
Ternstedt Manufacturing Company. (See Schnell, William, assignor.)
Ternstedt Manufacturing Company. (See Simpson, Emory G., assignor.)
Tevander, Olof N., assignor to Standard Cap & Steel Corporation, Chicago, Ill. Machine and method for applying closures. 1,782,553; Nov. 25.
Texas Company, The. (See Dearborn, Richard J., assignor.)
Texas Company, The. (See Greig, Arthur R., assignor.)
Thatcher, Charles J., New York, N. Y. Purifying anthracene. 1,782,488; Nov. 25.
Thies, Frank. (See Thies, John and F.)
Thies, John and F., Hutchinson, Kans. Wheel-lug cleaner. 1,782,637; Nov. 25.
Thiry, Leon, Brussels, Belgium. Oscillating joint. 1,782,770; Nov. 25.
Thomas Elevator Company. (See Wilson, Alexander H., assignor.)
Thomas, Henry, Ridley Park, assignor to Sun Oil Company, Philadelphia, Pa. Tube still furnace. 1,782,885; Nov. 25.
Thomas, Louis G. L., Chicago, Ill. Automatic control for heating plants. 1,782,489; Nov. 25.
Thompson, Robert J., Paris, France. Fold collar. 1,782,913; Nov. 25.
Tillyer, Edgar D., assignor to American Optical Company, Southbridge, Mass. Ophthalmic lens. Re17,887; Nov. 25.
Tool, Harold W., Murdock, Nebr. Animal chute for automobile trucks. 1,782,554; Nov. 25.
Torgerson, Theodore L., Oroville, Calif. Adjustable door hinge. 1,782,490; Nov. 25.
Totzek, Fritz, Stoppenberg near Essen-on-the-Ruhr, Germany. Coke-oven wall structure. 1,782,638; Nov. 25.

Townsend, Elvin E., Watsonville, Calif. Speedometer-testing machine. 1,782,914; Nov. 25.
Toy Tinkers, Inc., The. (See Pajeau, Charles H., assignor.)
Trachsel, Fritz, Bern, assignor to Chr. Gfeller Aktiengesellschaft, Bern-Bumpliz, Switzerland. Automatic telephone-exchange system. 1,782,491; Nov. 25.
Traver, Oliver C., Schenectady, N. Y., assignor to General Electric Company. Protective arrangement. 1,783,061; Nov. 25.
Trencham, Henry, Ruislip, England, assignor to General Electric Company. Electric switch. 1,783,062; Nov. 25.
Triangle Conduit Company. (See McAuliffe, John E., assignor.)
Trombetta, Panfilo, Milwaukee, Wis., assignor to General Electric Company. Magnetic core. 1,782,521; Nov. 25.
Trumble Gas Trap Company. (See Kotzebue, Meinhard H., assignor.)
Tuck, Russell F., Long Beach, Calif. Derrick safety appliance. 1,782,701; Nov. 25.
Tucker, Max D., and C. L. Snyder, assignors to The Evans Auto Loading Co. Inc., Detroit, Mich. Reenforced hold-down for loading automobiles and other vehicles. 1,783,102; Nov. 25.
Turner, Albert, assignor, by mesne assignments, to Cincinnati Grinders Incorporated, Cincinnati, Ohio. Grinding machinery. 1,782,669; Nov. 25.
Twin Disc Clutch Company. (See Pearmain, William J., assignor.)
Tyler, John G., C. C. Taylor, and W. S. Johnson, assignors to California Peach & Fig Growers Association, Fresno, Calif. Fig-sterilization apparatus. 1,782,522; Nov. 25.
Ude, William C., East Haven, Conn. Collapsible tube. 1,782,980; Nov. 25.
Ufford, Helen, New York, N. Y., assignor to Quaker Oats Company, Chicago, Ill. Sugar bowl or similar article. Des. 82,634; Nov. 25.
Ufford, Helen, New York, N. Y., assignor to Quaker Oats Company, Chicago, Ill. Cup or similar article. Des. 82,635; Nov. 25.
Underwood, Western Santa Monica, Calif. Street lamp. Des. 82,636; Nov. 25.
Union Chest and Cabinet Corporation. (See Pratt, Seely F., assignor.)
Union Switch & Signal Company, The. (See McWhirter, William C., assignor.)
United Engineering & Foundry Company. (See Biggert, Florence C., jr., assignor.)
United Engineering and Foundry Company. (See Klein, Clarence J., assignor.)
United Shoe Machinery Corporation. (See Bazzoni, Lewis J., assignor.)
United Shoe Machinery Corporation. (See Gorman, Henry B., assignor.)
United Shoe Machinery Corporation. (See Kelly, John A., assignor.)
United Shoe Machinery Corporation. (See Woodcock, R. B., and Cook, assignors.)
United Shoe Machinery Corporation. (See Woodcock, R. B., and Kestell, assignors.)
United States Chain & Forging Company. (See Stewart, Carson R., assignor.)
Universal Oil Products Company. (See DeLattre-Seguy, Jean, assignor.)
Valley Camp Coal Company, The. (See Paisley, James A., assignor.)
Van Allen, Clifford, Canton, Ohio. Barbecuing machine. 1,782,639; Nov. 25.
Van Deren, George W., Elmira, N. Y. Universal joint. 1,782,492; Nov. 25.
Van Duyn, Adrianus, assignor to Naamlooze Vennootschap Maatschappij tot Veraardiging van Snijmachines volgens Van Berkel's Patent en van andere Werktingen, Rotterdam, Netherlands. Indicating means for weighing apparatus. 1,782,670; Nov. 25.
Van Heijst, Franciscus W., assignor to Commanditaire Vennootschap: J. B. van Heijst & Zonen, The Hague, Netherlands. Device for throwing at will projectiles from aircraft. 1,783,145; Nov. 25.
Van Loon, Johannes, Deventer, Netherlands. Active carbon and making same. 1,782,493; Nov. 25.
Vasey, George F., assignor to Ridgely Heater Company, Scranton, Pa. Heater. 1,782,947; Nov. 25.
Vaughn, Robert C., et al. (See Glenn, J. H., jr., and Bennett, assignors.)
Vazcane Process, Inc. (See Vazquez, Eugenio A., assignor.)
Vazquez, Eugenio A., Habana, Cuba, assignor to Vazcane Process, Inc. Cellulosic product. 1,782,751; Nov. 25.
Vernia, Ernest A., Odebolt, Iowa. Check-wire gauge for corn planters. 1,782,948; Nov. 25.
Vienneau, Jacob J., Pittsfield, Mass., assignor to General Electric Company. Magnetic core. 1,783,063; Nov. 25.
Vles, Samuel I., Arnhem, Netherlands. Production of partially-hydrolyzed cellulose acetates. 1,782,796; Nov. 25.
Von den Driesch, Joseph, Dresden, assignor to the Firm Fr. Küttner Aktiengesellschaft, Pirna-on-the-Elbe, Germany. Apparatus for washing, bleaching, and dyeing artificial silk in the hanks or spinning cakes. 1,783,103; Nov. 25.
Von Tell, Edward E., Gottenborg, Sweden. Clamping means. 1,782,979; Nov. 25.
Vorclone Company. (See Bruckmann, Peter C., assignor.)
Wachsmann, Paul, Berlin-Halensee, Germany, assignor to General Electric Company. Dynamo-electric machine. 1,783,064; Nov. 25.
Wagner, Frederick H., assignor to The Bartlett Hayward Co., Baltimore, Md. Gas holder. 1,782,861; Nov. 25.
Wagner, Frederick H., assignor to The Bartlett Hayward Company, Baltimore, Md. Liquid and gas contact apparatus. 1,782,862; Nov. 25.
Wagner, Frederick H., assignor to The Bartlett Hayward Company, Baltimore, Md. Gas holder. 1,782,949; Nov. 25.
Wahlert, Henry A., assignor to The American Brake Company, St. Louis, Mo. Brake cylinder. 1,782,589; Nov. 25.
Waisner, Horace L., assignor, by mesne assignments, to Mechanics Universal Joint Company, Rockford, Ill. Heat-treating furnace. 1,782,451; Nov. 25.
Wilder, Robert. (See Defris, R., and Wilder.)
Walker Cement Products, Inc. (See Dietrichs, Charles, assignor.)
Walker Dishwasher Corporation. (See Walker, Forrest A., assignor.)
Walker, Forrest A., assignor to Walker Dishwasher Corporation, Syracuse, N. Y. Mechanical dishwasher. 1,782,950; Nov. 25.
Waner, Harry E. (See Wilson, G. F., and Waner.)
Warden, Franklin M. (See Green, J. Birchard, assignor.)
Warford Corporation, The. (See Morgan, Guy, assignor.)
Waring, Edward H. (See Edmunds, H. M., and Waring.)
Warnock, Charles S., Los Angelcs, Calif. Ventilator for vehicles. Des. 82,645; Nov. 25.
Warren, Virgil P., Atlanta, Ga. Refrigerator-display-case construction. 1,782,523; Nov. 25.
Washburn Company, The. (See Hobbs, Samuel T., assignor.)
Weaver, Edgar R., Dayton, Ohio. Rudder and brake control. 1,782,524; Nov. 25.
Webber, William. (See Smith, D. W., and Webber.)
Weber Costello Company. (See Johnson, John F., assignor.)
Weidner, John R., assignor to The Nolde and Horst Company, Reading, Pa. Box insert. 1,782,915; Nov. 25.
Weinstein, Alfred, Hamburg, Germany. Animated device. 1,782,555; Nov. 25.
Weisler, August, Perryville, assignor of one-half to F. J. Hagerling, St. Louis, Mo. Wrench. 1,782,752; Nov. 25.
Welsh-Hartman Co. (See Hartman, William O., assignor.)
Wenner-Gren, Axel L., Stockholm, Sweden, assignor to Inventia Patent-Verwertungs-Gesellschaft, Schaffhausen, Switzerland. Vacuum cleaner. 1,782,640; Nov. 25.
Western Electric Company. (See Adams, Arthur H., assignor.)
Western Electric Company. (See Bouvier, George A., assignor.)
Western Electric Company. (See Bouvier, G. A., and Case, assignors.)
Western Electric Company. (See Bowly, H. W., and McWilliams, assignors.)
Western Electric Company. (See Bureau, Arthur A., assignor.)
Western Electric Company. (See Jessup, Richard D., assignor.)
Western Electric Company. (See McGuire, Lee R., assignor.)
Western Electric Company. (See Nielsen, John F., assignor.)
Western Electric Company. (See Oudin, F., and Skinner, assignors.)
Western Electric Company. (See Scrantom, De Hart G., assignors.)
Western Electric Company. (See Short, Samuel F., assignor.)
Westfield River Paper Company. (See Scheele, Edwin H., assignor.)
Westinghouse Air Brake Company, The. (See Down, Sidney G., assignor.)
Westinghouse Air Brake Company, The. (See Farmer, Clyde C., assignor.)
Westinghouse Air Brake Company, The. (See Hukill, Henry D., assignor.)
Westinghouse Air Brake Company, The. (See McCune, Joseph C., assignor.)
Westinghouse Electric & Manufacturing Company. (See Bouton, Edgar M., assignor.)
Westinghouse Electric & Manufacturing Company. (See High, Jurjen S., assignor.)
Westinghouse Electric and Manufacturing Company. (See Miller, F. H., and Jackson, assignors.)
Wheeler, Grace P., administratrix. (See Wheeler, John H.)
Wheeler, John H., deceased, by G. P. Wheeler, administratrix, Columbus, Ohio. Aero auxiliary cylinder. 1,782,753; Nov. 25.
Wheeler, Leonard H., assignor, by mesne assignments, to Stewart-Warner Corporation, Chicago, Ill. Liquid-handling device. 1,782,702; Nov. 25.
Wheeling Bronze Casting Company. (See Haller, Charles W., assignor.)
White, Alfred H., Ann Arbor, Mich., assignor to The Regents of the University of Michigan. Coke and producing the same. 1,782,556; Nov. 25.

White, George R., Stony Brook, N. Y. Ornithopter. 1,783,029; Nov. 25.
White Motor Company, The. (See Snyder, Frank L., assignor.)
Whittaker, Arthur. (See Hackett, H., and Whittaker.)
Wietzel, Gustav, J. Jannek, Ludwigshafen-on-the-Rhine, and F. Fried, Mannheim, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Elimination of sulphur compounds from gases. 1,782,590; Nov. 25.
Wietzel, Rudolf, Ludwigshafen-on-the-Rhine, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Manufacture of alkyl formates. 1,782,591; Nov. 25.
Wigge, Hans. (See Siebert, William, assignor.)
Wilcox, Charles E., Long Beach, Calif. Elevator. 1,782,754; Nov. 25.
Wilcox, Edgar M. (See Hannauer, G., and Wilcox.)
Wilcox-Rich Corporation. (See Hoern, Joseph H., assignor.)
Wild, Louis. (See Wild, Otto and L.)
Wild, Otto and L., Murl, Switzerland. Machine for flanging plate disks. 1,782,641; Nov. 25.
Wilder, Edward B., St. Louis, Mo. Kite. 1,782,557; Nov. 25.
Wiley, Hugh, Los Altos, Calif. Internal-combustion engine. 1,782,642; Nov. 25.
Wil-Fry Corporation. (See Fry, Walter L., assignor.)
Wilhelm, John H., Rockaway Beach, assignor to Markon Manufacturing Co. Inc., New York, N. Y. Eye set for dolls. 1,728,833; Nov. 25.
Wilks, Charles H., Marche, Ark. Tractor wheel. 1,782,643; Nov. 25.
Williams, David C., Medfield, assignor to H. F. Hurlburt, jr., Wellesley, Mass. Packing for safety-razor blades. 1,782,797; Nov. 25.
Williams, Earl, Los Angeles, Calif. Hand-adapted trombone brace. 1,782,452; Nov. 25.
Williams, John J. (See Gray, D. M., and Williams.)
Williams, Paul F., assignor to G. & W. Electric Specialty Co., Chicago, Ill. System of electrical distribution and control means therefor. 1,782,568; Nov. 25.
Williams, Thomas, Topeka, Kans. Spudding cushion for drilling machinery. 1,783,006; Nov. 25.
Williams, William L. S., assignor to Hawaiian Cane Products, Limited, Hilo, Hawaii. Treating bagasse for the manufacture of wall board and the like. 1,782,755; Nov. 25.
Willys-Overland Company, The. (See Grimm, George E., assignor.)
Wilson, Alexander H., Oak Park, assignor to Thomas Elevator Company, Chicago, Ill. Portable hoisting machine. 1,782,703; Nov. 25.
Wilson, Ben H., assignor to Owens-Illinois Glass Company, Toledo, Ohio. Jug. Des. 82,637; Nov. 25.
Wilson, George F., and H. E. Waner, Akron, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y. Spreader device for opening vulcanizing molds or the like. 1,782,798; Nov. 25.
Window Glass Machine Company. (See Monro, William L., assignor.)
Wing, Luman B., Brooklyn, N. Y. Piano construction. 1,782,453; Nov. 25.
Winterhalter, Martin, Halle-on-the-Saale, Germany, assignor, by mesne assignments, to Mishawaka Rubber & Woolen Manufacturing Company, Mishawaka, Ind. Fastening for fabrics and the like. Re17,881; Nov. 25.
Winthrop Chemical Company. (See Jensch, H., and Eisleb, assignors.)
Wlodarski, Franciszek, Poznan, Poland. Apparatus for rendering displays visible from all sides. 1,782,834; Nov. 25.
Woodcock, Reginald B., and J. Cook, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J. Skiving machine. 1,782,495; Nov. 25.
Woodcock, Reginald B., and T. A. Kestell, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J. Sole-rounding machine. 1,782,494; Nov. 25.
Woodrow Washing Machine Company. (See Gibson, George M., assignor.)
Woodruff, Joseph W., Elizabeth, N. J. Oil-measuring apparatus. 1,782,704; Nov. 25.
Woodside, James P., Detroit, Mich. Mouthpiece. 1,782,559; Nov. 25.
Worden, James A., Antigo, Wis. Kiln. 1,783,030; Nov. 25.
Wright, Clyde S., assignor to The National Supply Company, Toledo, Ohio. Pitman. 1,782,863; Nov. 25.
Wright, Frank H. (See Moses, A. J., and Wright.)
Wünsche, Wilhelm, Detroit, Mich. Hobble. 1,782,835; Nov. 25.
Wurzburg, Edwin G. (See Crane, Charles A., assignor.)
Yates & Grant, Inc. (See Forbes, John S., assignor.)
Young, Frank A., and R. H. Boardman, assignors, by mesne assignments, to Connecticut Telephone & Electric Corporation, Meriden, Conn. Electric snap switch. 1,782,836; Nov. 25.
Young, Ralph P. (See Kramer, Henry W., assignor.)
Younger, Dwen R., assignor of one-half to E. L. Younger, Woodland, Calif. Fuel-feeding device. 1,782,592; Nov. 25.
Younger, Earl L. (See Younger, Dwen R., assignor.)
Zarate, Guillermo L., et al. (See Breitling, Adolf, assignor.)
Zehnder, John L. (See Fay, A., and Zehnder.)
Zeidler Concrete Products Machinery Company, The. (See Schultz, Alfred W., assignor.)
Zellinger, John F., assignor to The Barker Manufacturing Company, Inc., David City, Nebr. Cultivator. 1,782,593; Nov. 25.
Zusy, Charles J. (See Ellis, D. S., and Zusy.)

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 25TH DAY OF NOVEMBER, 1930

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Accelerating the hardening of hydraulic binding means. W. Kirchner. 1,782,471; Nov. 25.
Acid phosphate plant. I. Hechenbleikner. 1,782,821; Nov. 25.
Acoustic swingings into electric capacity swingings, Transforming of. A. V. Petersen. 1,783,138; Nov. 25.
Advertising or like sign or device. G. Frenkel. 1,782,721; Nov. 25.
Aeroplane. L. L. Johnson. 1,782,965; Nov. 25.
Aeroplane. R. H. O'Massey. 1,782,878; Nov. 25.
Aerovehicle. A. E. James. 1,782,508; Nov. 25.
Air-brake system. C. A. Ives. 1,783,043; Nov. 25.
Air-cooling device. R. H. Hardin. 1,782,612; Nov. 25.
Air gun. E. S. Roe. 1,782,664; Nov. 25.
Air heater, Fireplace. M. S. Quinliven. 1,783,140; Nov. 25.
Airplane control. W. Stelzer. 1,782,750; Nov. 25.
Alcohol-gel, Ethyl. H. Ohle and J. Othmar-Neuscheller. 1,783,133; Nov. 25.
Alcohol, Treating ethyl. C. Haner. 1,783,086; Nov. 25.
Aligning means, Duct-end outlet-. L. A. Sharp. 1,782,548; Nov. 25.
Alkyl formates, Manufacture of. R. Wietzel. 1,782,591; Nov. 25.
Alloy. C. Philippossian. 1,783,139; Nov. 25.
Amino compounds and products produced thereby, Catalytically hydrogenating aromatic. F. Klingemann, W. Lommel, E. Korten, and T. Goost. 1,782,729; Nov. 25.
Anchor. W. Siebert. 1,782,449; Nov. 25.
Animal trap. P. G. Midgett. 1,782,661; Nov. 25.
Animal trap. J. E. Spilman. 1,783,144; Nov. 25.
Animated device. A. Weinstein. 1,782,555; Nov. 25.
Annealing furnace. G. B. Shipley and H. Alinder. 1,782,481; Nov. 25.
Antenna. A. Meissner. 1,783,025; Nov. 25.
Antenna system. H. Chireix. 1,783,072; Nov. 25.
Anthracene, Purifying. C. J. Thatcher. 1,782,488; Nov. 25.
Antifriction roller. F. K. Kilian. 1,782,622; Nov. 25.
Apparatus for cooling fluids. H. F. Merriam. 1,782,435; Nov. 25.
Apparatus for rendering displays visible from all sides. F. Wlodarski. 1,782,834; Nov. 25.
Appliance for invalids. R. A. Austin. 1,782,672; Nov. 25.
Automobile brake. R. J. Gits. 1,782,891; Nov. 25.
Automotive brake. S. G. Down. 1,782,566; Nov. 25.
Bag: *See*—
  Valve bag.
Bag-filling method and apparatus. S. H. Lilly. 1,782,733; Nov. 25.
Bag-turning machine. H. W. Orndoff. 1,782,935; Nov. 25.
Bags, Making paper. T. M. Royal. 1,782,884; Nov. 25.
Bagasse for the manufacture of wall board and the like, Treating. W. L. Williams. 1,782,755; Nov. 25.
Bands about bales or the like, Fastening. C. B. Frost. 1,782,465; Nov. 25.
Bar: *See*—
  Skelp bar. Wrecker bar.
Bar for curtains, Bottom. J. L. Mohun and H. Piesch. 1,782,905; Nov. 25.
Bar for doors, Push. E. L. Teich. Des. 82,633; Nov. 25.
Barbecuing machine. C. Van Allen. 1,782,639; Nov. 25.
Base for a laundry appliance. J. G. Fehn. Des. 82,638; Nov. 25.
Basin and heat reclaimer, Soil-water Catch. F. S. Boltz. 1,783,033; Nov. 25.
Bearing. C. J. Klein. 1,782,969; Nov. 25.
Bearing construction. P. C. Bruckmann. 1,782,710; Nov. 25.
Bed frame. B. M. Frank. 1,782,988; Nov. 25.
Bedstead end frame or analogous article. J. McKay. Des. 82,617–20; Nov. 25.
Bell ringer, Locomotive. D. S. Ellis and C. J. Zusy. 1,782,844; Nov. 25.
Bin: *See*—
  Storage bin.
Bin for kitchen cabinets, Flour. O. N. McCormick. 1,783,127; Nov. 25.
Binder hitch. D. W. Smith and W. Webber. 1,782,586; Nov. 25.
Binder, Loose-leaf. J. C. Dawson. 1,782,647; Nov. 25.
Blind, Venetian. C. Bauer. 1,782,954; Nov. 25.
Blotter, Rotary. C. H. Pajeau. 1,782,792; Nov. 25.
Board: *See*—
  Floor board. Ironing board.
Boat-hull construction. H. B. Greening. 1,782,893; Nov. 25.
Boiler and furnace. C. W. Stancliffe. 1,782,635; Nov. 25.
Bolt lock, Rotary. F. J. Dowling. 1,782,776; Nov. 25.
Bottle cap, Milk-. V. J. Laramie. 1,782,731; Nov. 25.
Bottle closure. C. Savino. 1,783,027; Nov. 25.
Bottle-crowning machine. V. J. Mohler. 1,782,904; Nov. 25.
Bowl or similar article, Sugar. H. Ufford. Des. 82,634; Nov. 25.
Bowling alley. W. S. Hartman. 1,782,849; Nov. 25.
Box: *See*—
  Stuffing box. Switch box.
Box insert. J. R. Weidner. 1,782,915; Nov. 25.
Box-supporting ear. C. Newman and E. G. Appleton. 1,782,546; Nov. 25.
Boxes, Manufacture of cardboard. H. Hackett and A. Whittaker. 1,782,611; Nov. 25.
Brace: *See*—
  Trombone brace.
Brake: *See*—
  Automobile brake. Automotive brake.
Brake device. H. D. Hukill. 1,782,571; Nov. 25.
Brake mechanism. W. C. Barker. 1,783,104; Nov. 25.
Brake mechanism, Track. G. Hannauer and E. M. Wilcox. 1,782,874; Nov. 25.
Braking apparatus, Hydraulic. W. G. Price. 1,782,663; Nov. 25.
Bridge for stringed musical instruments. F. Gosparlin. 1,783,117; Nov. 25.
Bronzing machines, Attachment for. E. E. Radloff and A. W. Janke. 1,782,881; Nov. 25.
Building. E. P. Muntz. 1,782,997; Nov. 25.
Bumper, Automobile trap. J. Amler. 1,783,066; Nov. 25.
Burner: *See*—
  Gas burner. Oil burner.
Burner. G. T. Brado. 1,782,600; Nov. 25.
Burners, Controlling mechanism for oil. S. Perry. 1,782,937; Nov. 25.
Burnishing machine. L. J. Bazzoni. 1,782,802; Nov. 25.
Butter-cutting machine. W. J. Pearce. 1,783,096; Nov. 25.
Button. C. M. Bondy. Re17,877; Nov. 25.
Button, Collar. G. Krasney. 1,782,509; Nov. 25.
Cabinet, Dispensing. H. L. Blackman. 1,782,597; Nov. 25.
Cabinet for the storage of gramaphone disk records and the like. V. Fraschetti. 1,782,606; Nov. 25.
Cabinet, Massaging-machine. F. W. Knott. 1,783,170; Nov. 25.
Cabinet, Radio and television. J. Phillips. Des. 82,624; Nov. 25.
Cabinet, Towel. F. Jantzen. 1,783,149; Nov. 25.
Cable and connecter therefor. I. T. Hook. 1,783,016; Nov. 25.
Cage for ball bearings. C. L. Russell. 1,783,141; Nov. 25.
Calculating machines, Attachment for. F. M. Smith. 1,783,172; Nov. 25.
Calendar, Desk. K. Clark. 1,782,985; Nov. 25.
Camera, Aerial. A. Briechle. 1,782,864; Nov. 25.
Canning pineapple and product thereof. J. T. McCrosson. 1,782,761; Nov. 25.
Cans, Attachment for oil. E. H. Morrow. 1,782,579; Nov. 25.
Car body, Transformable motor. F. López-Osorio. 1,782,998; Nov. 25.
Cars, Apparatus for tipping and discharging railway. B. E. Ellison. 1,782,503; Nov. 25.
Carbon and making the same, Active. J. van Loon. 1,782,493; Nov. 25.
Carbon for electrotechnical uses and manufacture thereof. M. Oswald. 1,783,135; Nov. 25.
Carbon, Manufacture of activated. R. Defris and R. Wälder. 1,783,110; Nov. 25.
Carbonating machine. F. Neuschafer and H. Botwin. 1,782,511; Nov. 25.
Carburetor. B. F. Gravely. 1,782,848; Nov. 25.
Card-saving motion. G. Liebender. 1,783,125; Nov. 25.
Carriages, Body suspension for baby. H. Perlmutter. 1,782,742; Nov. 25.
Carton. M. Lippmann. Des. 82,614; Nov. 25.
Case: *See*—
  Vanity case.
Casing for a telephone substation set. J. M. Lebaugh. Des. 82,612–13; Nov. 25.
Casing or similar container. A. J. Jones. Des. 82,609; Nov. 25.
Casing suspension head. L. H. Mahon. 1,782,737; Nov. 25.
Casing, Toasting-machine. L. E. Padelford. Des. 82,621; Nov. 25.
Casting machine. C. E. Hunter and De L. Lutz. 1,782,898; Nov. 25.
Casting machine, Centrifugal. W. D. Moore and W. Morgan. 1,783,094; Nov. 25.

Casting machines, Ladle-tipping device for. W. Morgan. 1,783,128; Nov. 25.
Catalytic apparatus. I. Hechenbleikner. 1,782,824; Nov. 25.
Catalytic gel, Obtaining a. E. B. Miller and G. C. Connolly. 1,782,857; Nov. 25.
Cellulose acetate, Production of partially-hydrolyzed. S. I. Vles. 1,782,796; Nov. 25.
Cellulosic product. E. A. Vazquez. 1,782,751; Nov. 25.
Cement spreader. R. M. Hardgrove. 1,782,820; Nov. 25.
Chain, Mining-machine cutter. F. Cartlidge. 1,782,408; Nov. 25.
Chair. A. B. Goodman. Des. 82,605; Nov. 25.
Chair. F. M. Overbey. 1,782,763; Nov. 25.
Chair or similar article. W. S. Ferris. Des. 82,604; Nov. 25.
Chairs, Back-rest arrangement for. T. H. Alfreds. 1,782,398; Nov. 25.
Chase for checks and the like, Printer's. E. H. Stadler and G. E. Dillingham. 1,782,587; Nov. 25.
Chest of drawers or the like. E. J. Paull. Des. 82,623; Nov. 25.
Chopper: *See*—
Stalk chopper.
Chuck, Feed. F. E. Green. 1,783,039; Nov. 25.
Chute for automobile trucks, Animal. H. W. Tool. 1,782,554; Nov. 25.
Cigar-making machine. R. C. J. A. Ohmsen. 1,782,627; Nov. 25.
Cigarette-making machine. W. E. Molins. 1,783,093; Nov. 25.
Circuit-control system, Electric-power. F. M. Anderson. 1,783,067; Nov. 25.
Circuit, Detector-tube. R. L. Chiles. 1,782,500; Nov. 25.
Circuit protection. J. Biermanns. 1,783,105; Nov. 25.
Circulation regulator for heating systems. E. M. Gurney. 1,782,873; Nov. 25.
Clam-catching implement. H. O. Anderson. 1,782,497; Nov. 25.
Clamp: *See*—
Form clamp.
Hose clamp.
Hose or pipe clamp.
Clamp machine. S. J. Gardner. 1,782,846; Nov. 25.
Clamping device. H. W. Bowly and W. W. McWilliams. 1,782,404; Nov. 25.
Clamping device. F. Oudin and B. H. Skinner. 1,782,438-40; Nov. 25.
Clamping means. E. E. von Tell. 1,782,979; Nov. 25.
Clasp for pocketbooks and the like. A. Rosenband. 1,782,665; Nov. 25.
Clays, Recovering waste. W. D. Rial and W. R. Barratt. 1,782,744; Nov. 25.
Cleaner: *See*—
Vacuum cleaner.
Wheel-lug cleaner.
Clip: *See*—
Necktie clip.
Paper clip.
Closure operating and locking mechanism. F. K. Fildes. 1,782,845; Nov. 25.
Closure operator. J. D. Swarner. 1,782,978; Nov. 25.
Clutch. R. W. Janda. 1,782,572; Nov. 25.
Clutch, Friction. W. J. Pearmain. 1,782,880; Nov. 25.
Cobalt and iron from solutions rich in iron as obtained by lixiviating roasted pyrites, Separation of. N. E. Lenander. 1,783,046; Nov. 25.
Coke and producing the same. A. H. White. 1,782,556; Nov. 25.
Collapsible tube. F. J. Lynch. Des. 82,640; Nov. 25.
Collapsible tube. W. C. Ude. 1,782,980; Nov. 25.
Collar, Fold. R. J. Thompson. 1,782,913; Nov. 25.
Collar stiffener, Shirt-. J. H. Janowitch. Re17,885; Nov. 25.
Coloring material for oleomargarine, butter, and the like. J. Schaub. 1,783,154; Nov. 25.
Compass indicator, Time-controlled. W. I. McLaughlin. 1,782,474; Nov. 25.
Compositions containing compounds of alginic acid and product thereof, Producing. L. L. Burgess. 1,782,887; Nov. 25.
Compressor, High-pressure reciprocating. C. Schaer. 1,782,975; Nov. 25.
Compressor, Lubricant. E. Piquerez. 1,782,441; Nov. 25.
Compressors and operating the same, Control mechanism for centrifugal. H. V. Crawford. 1,783,036; Nov. 25.
Computing machine. H. A. Foothorap. 1,782,757; Nov. 25.
Concrete-brick manufacture. C. Dietrichs. 1,782,413; Nov. 25.
Concrete-distributing apparatus. A. MacDougald. 1,782,734; Nov. 25.
Condensation product and preparing same. H. A. Bruson. 1,783,168; Nov. 25.
Conductor, Armored. J. E. McAuliffe. 1,782,787; Nov. 25.
Conduit base and trim. C. L. Harper. 1,783,120; Nov. 25.
Connection for tool holders, Flexible driving. B. P. Schiltz. 1,782,633; Nov. 25.
Connector. C. L. Stoeltzlen. Re17,880; Nov. 25.
Construction of operating crankless internal-combustion and explosion engines. A. G. M. Michell. Re17,879; Nov. 25.
Container, Disinfecting. A. L. Feldman. 1,782,919; Nov. 25.
Container, Folding. I. Appelbaum. 1,783,068; Nov. 25.
Container, Jewelry. J. M. Shields. Des. 82,646; Nov. 25.
Container, Loose-powder. W. T. Parkin. 1,783,160; Nov. 25.
Container, Paper. G. H. Gardner. 1,782,961; Nov. 25.
Container, Tubular. A. L. Beardsley. 1,782,526; Nov. 25.
Containers, Attachment for. F. H. Axell. 1,782,886; Nov. 25.
Control device for heating systems. G. C. Hunt. 1,782,653; Nov. 25.
Control for electric advertising signs. E. M. Rosenfield. 1,782,883; Nov. 25.
Control for heating plants, Automatic. L. G. L. Thomas. 1,782,489; Nov. 25.
Control switch, Combination. C. P. Dougherty. 1,782,530; Nov. 25.
Control system. R. Y. McCullough. 1,783,048; Nov. 25.
Control system, Remote. J. F. Nielsen. 1,782,907; Nov. 25.
Conveyer. J. W. Hornsey. 1,782,423; Nov. 25.
Cooler: *See*—
Milk cooler.
Copper ores preparatory to leaching, Treating. C. E. Carstens. 1,782,841; Nov. 25.
Corsetiere's fitting apparatus. E. Gray. 1,782,892; Nov. 25.
Coupling: *See*—
Flexible coupling.
Coupling for engine cylinders, Air-compressing. J. Edgren. 1,782,718; Nov. 25.
Coupling head, Grease-gun. S. J. Krannak. 1,782,691; Nov. 25.
Cover, Auxiliary soap-cake. J. A. Perego. 1,782,859; Nov. 25.
Cover, Battery. F. S. Carlile. 1,782,984; Nov. 25.
Cover, Container. W. F. Hill. 1,782,532; Nov. 25.
Cover, Extractor. J. P. Lynch. 1,782,575; Nov. 25.
Cover glass. S. L. Lebby. 1,782,732; Nov. 25.
Cover, Seat. W. L. Fry. 1,782,815; Nov. 25.
Crane. L. Pierce. Re17,886; Nov. 25.
Crane, Hoe-type shovel. L. A. Russell. 1,783,055; Nov. 25.
Crane, Instroke shovel. L. A. Russell. 1,783,056; Nov. 25.
Crane, Loading. W. W. Leach. 1,783,021; Nov. 25.
Crane, Order. B. M. Perkins. 1,782,936; Nov. 25.
Crane, Portable. A. A. Bureau. 1,782,406; Nov. 25.
Crank shafts, Balancing of. C. Clench. 1,783,073; Nov. 25.
Crate, Pickling. C. W. Haller. Re17,882; Nov. 25.
Creping process. W. W. Rowe. 1,782,767; Nov. 25.
Crystal mounting, Semirigid. C. W. Hansell. 1,783,014; Nov. 25.
Cultivator. J. F. Zellinger. 1,782,593; Nov. 25.
Cultivator harrow, Combined. A. Olsson. 1,782,934; Nov. 25.
Cultivators, Dragbar for. J. Goddard and R. A. Calvert. 1,783,081; Nov. 25.
Cultivators, Seed-replanting attachment for. E. Ayers. 1,783,032; Nov. 25.
Cup: *See*—
Shaving cup.
Cup for sponge moisteners. C. C. Harris. 1,782,505; Nov. 25.
Cup or similar article. H. Ufford. Des. 82,635; Nov. 25.
Current, Rectifying alternating. E. E. Spitzer. 1,783,059; Nov. 25.
Curtain roller. E. G. Simpson. 1,783,002; Nov. 25.
Cutter. S. G. Martin. 1,783,023; Nov. 25.
Cutting device. M. B. Kassel. 1,782,901; Nov. 25.
Cutting machine. C. B. Gray. 1,782,420; Nov. 25.
Cutting machine. J. F. Lawson. 1,782,692; Nov. 25.
Cylinder, Aero auxiliary. J. H. Wheeler. 1,782,753; Nov. 25.
Cylinder, Brake. H. A. Wahlert. 1,782,589; Nov. 25.
Deck, Floating. A. M. Griffin. 1,783,118; Nov. 25.
Decorticating and depulping machine. K. Erb. 1,782,918; Nov. 25.
Derrick safety appliance. R. F. Tuck. 1,782,701; Nov. 25.
Device for preventing boiling over of milk. E. Fried. 1,782,417; Nov. 25.
Device for shunting vehicles off a main line of track. A. Scheuchzer. 1,782,941; Nov. 25.
Device for treating the stomach with ultra-violet rays. M. S. Newman. 1,782,906; Nov. 25.
Diacetyl-3, 3'-diamino-4, 4'-dihydroxy-5,5'-diiodoarsenobenzene, Synthesis of. A. D. Macallum. 1,782,482; Nov. 25.
Diagnostic instrument. C. E. H. Armbruster. 1,782,705; Nov. 25.
Die. J. A. Parker. 1,782,999; Nov. 25.
Die head. V. R. Koontz. 1,782,472; Nov. 25.
Diffusion plant. C. Camuset. 1,782,603; Nov. 25.
Direction indicator, Vehicle. A. Chislock. 1,782,773; Nov. 25.
Disconnecter arrangement, Conductor. J. Rah. 1,782,547; Nov. 25.
Dishwasher, Mechanical. F. A. Walker. 1,782,950; Nov. 25.
Disk, Crank. L. Robertson. 1,782,746; Nov. 25.
Disks to a closing mold, Method and apparatus for feeding. L. T. Frederick. 1,782,989; Nov. 25.
Dispensing and cutting device, Twine. J. E. Kroemer. 1,782,971; Nov. 25.

Dispensing device, Oil-. H. G. Davis. 1,782,715; Nov. 25.
Display apparatus, Liquid-. F. G. Stanford and G. Baker. 1,782,943; Nov. 25.
Display cases, Construction for. H. Hansen. 1,782,819; Nov. 25.
Display fountain, Beverage-. H. L. Glaze and F. G. Stanford. 1,782,685; Nov. 25.
Display fountain, Liquid-. F. G. Stanford and G. Baker. 1,782,944; Nov. 25.
Distilling apparatus. W. S. Elliott. 1,782,959; Nov. 25.
Ditch-digging machine. C. H. Ruth. 1,782,478; Nov. 25.
Dolls and the like, Tongue and teeth set for. S. Marcus. 1,782,433; Nov. 25.
Door handle. J. L. Brownell. Des. 82,598; Nov. 25.
Door-holding device. J. P. Grimley. 1,782,816; Nov. 25.
Doorknob, Sanitary. B. Polcari. 1,783,097; Nov. 25.
Door-operating mechanism. H. T. Black. 1,782,982; Nov. 25.
Door, Oven. W. Moll. 1,782,739; Nov. 25.
Draft arm for a soda fountain. D. C. Seitz. Des. 82,630; Nov. 25.
Drain protector. G. B. Grosjean. 1,783,082; Nov. 25.
Drawing frame. E. Stansfield and E. Brunner. 1,782,549; Nov. 25.
Drill: *See*—
Grain drill.
Drilling machine, Rotary well-. J. D. Spalding. 1,782,769; Nov. 25.
Drilling machinery, Spudding cushion for. T. Williams. 1,783,006; Nov. 25.
Driving mechanism, Intermittent. H. M. Swindler. 1,782,520; Nov. 25.
Drums, Making. W. A. Jones. 1,782,899; Nov. 25.
Dye containing a diphenylurea nucleus, Disazo. L. W. Geller. 1,782,682; Nov. 25.
Dyestuff from 1.12 perylene quinone, Manufacturing a green vat. W. Penecke. 1,783,137; Nov. 25.
Dyestuffs containing metals and making same. H. B. Gubler. 1,783,084; Nov. 25.
Dyestuffs containing metals and making same. H. Gubler, G. De Montmollin, and J. Spieler. 1,783,083; Nov. 25.
Dyestuffs, New indigoid. W. Bauer, W. Neelmeier, and T. Nocken. 1,782,706; Nov. 25.
Dyestuffs, Trimethylthionaphthene vat. E. Hoffa and H. Heyna. 1,782,724; Nov. 25.
Electric discharge device. F. W. Peek, jr. 1,783,052; Nov. 25.
Electric-fixture device. L. Kozlowski. 1,783,020; Nov. 25.
Electric heater. E. F. Holinger. 1,782,825; Nov. 25.
Electric lock. W. C. McWhirter. 1,782,788; Nov. 25.

Fountain: *See*—
Display fountain.
Fountain for poultry or small animals, Drinking. S. Bartholomew. 1,782,673; Nov. 25.
Frame: *See*—
Bed frame.
Drawing frame.
Type-page frame.
Frame for windows or the like. H. C. Reuter. Des. 82,626; Nov. 25.
Fruit distributor. D. E. Keech. 1,782,826; Nov. 25.
Fuel-feeding device. D. R. Younger. 1,782,592; Nov. 25.
Fuels, Method of and apparatus for vaporizing liquid. F. F. Brush. 1,782,602; Nov. 25.
Furnace: *See*—
Annealing furnace.
Hearth furnace.
Heat-treating furnace.
Heating furnace.
Tube still furnace.
Furnace top. H. A. Acer. 1,783,065; Nov. 25.
Furnaces and the like, Apparatus for charging. F. C. Biggert, jr. 1,782,955; Nov. 25.
Furniture stand. S. Matosian. Des. 82,643; Nov. 25.
Fuse plug. E. B. Ekstrand. 1,782,719; Nov. 25.
Gang edger. W. B. Grueter. 1,782,894; Nov. 25.
Garage, Storage. L. D. Cook. 1,782,410; Nov. 25.
Garage, Storage and parking. W. P. Allred, jr. 1,782,671; Nov. 25.
Gas burner. J. L. Giacomino. 1,782,683; Nov. 25.
Gas-generating combustion engine. J. E. Johansson. 1,783,018; Nov. 25.
Gas producer. A. K. Bradley. 1,782,677; Nov. 25.
Gasket. J. G. Dickson. 1,782,870; Nov. 25.
Gasket. C. C. Farmer. 1,782,567; Nov. 25.
Gauge: *See*—
Tire gauge.
Gauge for corn planters, Check-wire. E. A. Vernia. 1,782,948; Nov. 25.
Gear, Change-speed. H. M. Edmunds and E. H. Waring. 1,782,756; Nov. 25.
Gear, Electric-switch. A. Allan. 1,782,594; Nov. 25.

Gears, Truing. A. W. Copland and M. I. Mathewson. Re17,884; Nov. 25.
Generator: *See*—
Power generator.
Geophysical exploration, System and method for. F. Rieber. 1,782,445; Nov. 25.
Glass: *See*—
Cover glass.
Glass-handling mechanism, Sheet-. V. M. Dorsey. 1,782,716; Nov. 25.
Glass, Manufacture of splinterless. J. Jeffray. 1,782,852; Nov. 25.
Glass, Method and apparatus for making sheet. W. L. Monro. 1,782,972; Nov. 25.
Glass-polishing apparatus, Plate-. F. Merian and J. W. Cruikshank. 1,782,475; Nov. 25.
Golf club. D. G. Lilley. 1,782,931; Nov. 25.
Golf game, Home. B. E. Hokin. 1,783,089; Nov. 25.
Grain drill. C. W. Robinson. 1,782,583; Nov. 25.
Grating. N. Michelman. 1,782,799; Nov. 25.
Grinding machine, Centerless. E. R. Seward. 1,782,480; Nov. 25.
Grinding machinery. A. Turner. 1,782,669; Nov. 25.
Guard for openings, Adjustable. J. F. Farmer. 1,782,415; Nov. 25.
Gun carriage. S. G. Green. 1,782,610; Nov. 25.
Gun, centrifugal. B. F. S. Baden-Powell. 1,783,053; Nov. 25.
Haircloth. P. Junas, jr. 1,782,925; Nov. 25.
Hair-drying apparatus. V. N. Nicosia. 1,782,626; Nov. 25.
Hair waver. H. H. Cady. 1,783,108; Nov. 25.
Hair waver, Double. A. and J. Goodman. 1,782,650; Nov. 25.
Handhole plate. A. J. Moses and F. H. Wright. 1,783,129; Nov. 25.
Handrail and support therefor, Flexible. W. O. Hartman. 1,782,895; Nov. 25.
Handle. F. Brandon. 1,783,107; Nov. 25.
Handle. J. L. Brownell. Des. 82,600; Nov. 25.
Handle for pipe cleaners. C. Fischer. 1,782,871; Nov. 25.
Handle for wooden baskets. H. W. Kramer. 1,782,431; Nov. 25.
Hat-making machine. I. A. Eichenbaum. 1,783,112; Nov. 25.
Hearth furnace, Rotary-. A. D. Dauch. 1,782,956; Nov. 25.
Heat distributor or plate. S. Sauvage. 1,782,699; Nov. 25.
Heat exchanger. S. J. Chute. 1,782,409; Nov. 25.
Heat-transfer device. E. W. Jones. 1,782,574; Nov. 25.
Heat-transfer system. A. E. Nash and J. S. Alcorn. 1,782,829; Nov. 25.
Heat-treating apparatus. R. E. Talley. 1,783,156; Nov. 25.
Heat-treating furnace. H. L. Waisner. 1,782,451; Nov. 25.
Heater: *See*—
Air heater. Machine heater.
Electric heater.
Heater. G. F. Vasey. 1,782,947; Nov. 25.
Heater for vehicles. F. C. Howard. 1,782,652; Nov. 25.
Heating and ventilating, Concealed unit for. M. J. Callahan. 1,782,711; Nov. 25.
Heating and welding machines, Three-phase one-phase converter, especially for electric resistance. E. Schröder. 1,782,634; Nov. 25.
Heating device for railroad switches. H. Miller and B. B. Betts. 1,783,164; Nov. 25.
Heating furnace, Electric. R. E. Talley. 1,783,155; Nov. 25.
Heel-attaching means. C. Miller and M. Feinstein. 1,782,436; Nov. 25.
Helicopter. N. Florine. 1,783,011; Nov. 25.
Hinge. W. L. Evans. 1,783,076; Nov. 25.
Hinge. H. H. Raymond. 1,782,582; Nov. 25.
Hinge, Adjustable door. T. L. Torgerson. 1,782,490; Nov. 25.
Hinge leaf. H. H. Raymond. Des. 82,625; Nov. 25.
Hobble. W. Wunsche. 1,782,835; Nov. 25.
Hoist. A. H. Chappelka. 1,782,679; Nov. 25.
Hoisting and hauling carriage for use on elevated trackways. K. Berger. 1,782,528; Nov. 25.
Hoisting machine, Portable. A. H. Wilson. 1,782,703; Nov. 25.
Holder, Bag. D. W. Mahaffey. 1,782,736; Nov. 25.
Holder, Bottle. S. T. Hobb. 1,782,962; Nov. 25.
Holder, Broom. W. F. Hacking. 1,783,119; Nov. 25.
Holder for reknitting fabrics. A. C. Parlini. 1,782,879; Nov. 25.
Holder, Gas. F. H. Wagner. 1,782,861; Nov. 25.
Holder, Gas. F. H. Wagner. 1,782,949; Nov. 25.
Holder, Hand sandpaper. R. W. Maris. 1,782,577; Nov. 25.
Holder, Picture or card. J. L. Brownell. Des. 82,601; Nov. 25.
Holder, Screw. F. Dohnal. 1,782,565; Nov. 25.
Holder, Wall pot. I. G. Scott and M. C. Fox. Des. 82,629; Nov. 25.
Honing machine. A. M. Johnson. 1,783,019; Nov. 25.
Hoppers, Agitator for coal. B. C. Lewis. 1,783,092; Nov. 25.
Hose clamp. C. A. Parker. 1,782,476; Nov. 25.
Hose or pipe clamp. A. Fay and J. L. Zehnder. 1,782,680; Nov. 25.
Humidifier. J. S. Knowlson. 1,782,928; Nov. 25.
Hydrocarbons such as acetylene or the like, Process of and system for splitting. J. Machtolf. 1,782,540; Nov. 25.

Powder, Cleaning. F. C. Broeman. 1,782,805; Nov. 25.
Power device, Electric. J. S. Knowlson. 1,782,927; Nov. 25.
Power generator. R. Soto. 1,782,517; Nov. 25.
Power-saving jack. S. D. Randolph. 1,782,512; Nov. 25.
Power-transmitting mechanism. G. Morgan. 1,782,543; Nov. 25.
Press: *See*—
Printing press. Screw-spindle press.
Press, particularly for testing materials, Hydraulic. A. J. Amsler. 1,782,595; Nov. 25.
Pressure indicator. J. H. Becker. 1,782,803; Nov. 25.
Pressure relieving method and apparatus for autoclaves and the like. T. Griswold, jr. 1,783,163; Nov. 25.
Printing press. G. L. Fulk. 1,782,608; Nov. 25.
Products of hydrogenation of alkylated phenols, Producing. H. Jordan. 1,782,621; Nov. 25.
Projectiles from aircraft, Device for throwing at will. F. W. van Heijst. 1,783,145; Nov. 25.
Protective arrangement. O. C. Traver. 1,783,061; Nov. 25.
Pulp, Bleaching. D. C. Andrews. 1,782,800; Nov. 25.
Pump, Parallel-series. H. M. Havens. 1,782,469; Nov. 25.
Pump, Rotary. D. C. Baker. 1,782,771; Nov. 25.
Punch and holder therefor, Quick-change. C. F. Sheridan. 1,783,028; Nov. 25.
Rack: *See*—
Towel rack.
Radiator. W. A. Belmling. 1,782,394; Nov. 25.

Radiators, Leak-tester cap for automobile. M. Anchelevich. 1,782,496; Nov. 25.
Radio circuits, Nonregenerative. O. Knight. 1,782,993; Nov. 25.
Radio dialing device. J. A. Planzer. 1,782,778; Nov. 25.
Radio leg rest. M. A. Rush. Des. 82,642; Nov. 25.
Radio loud-speaker. F. Baehn. 1,782,801; Nov. 25.
Radiosignaling. A. W. Slaght. 1,782,831; Nov. 25.
Rail. G. F. Kotrbaty. 1,782,902; Nov. 25.
Railway system, Direct-current. U. Kloss. 1,782,537; Nov. 25.
Razor conditioning and device therefor, Magnetic. J. S. Forbes. 1,783,012; Nov. 25.
Razor, Safety. R. D. Baker. 1,782,455; Nov. 25.
Receptacle provided with trays. S. F. Pratt. 1,782,630; Nov. 25.
Record-carrying device for automobiles. E. H. Souter. 1,782,942; Nov. 25.
Recuperator. W. J. Kelly, M. P. Burns, and A. Barr. 1,782,430; Nov. 25.
Reel. J. B. Palmer. 1,783,159; Nov. 25.
Refrigerating apparatus. J. F. Hoffman. 1,782,687; Nov. 25.
Refrigerating apparatus. J. F. Hoffman. 1,782,689; Nov. 25.
Refrigerating apparatus. O. C. Olsen. 1,782,628; Nov. 25.
Refrigerating system. J. F. Hoffman. 1,782,651; Nov. 25.
Refrigerating system. J. F. Hoffman. 1,782,688; Nov. 25.
Refrigerator. R. E. Franklin. 1,782,720; Nov. 25.
Refrigerator-display-case construction. V. P. Warren. 1,782,523; Nov. 25.
Regulating system. H. T. Seeley. 1,782,514; Nov. 25.
Regulating system, Frequency-. H. Chireix. 1,782,807; Nov. 25.
Regulator. C. H. Smoot. 1,782,832; Nov. 25.
Reproducer. E. W. Kellogg. 1,783,044; Nov. 25.
Reproducing device. J. S. High. 1,782,781; Nov. 25.
Resin plasticizer. H. A. Bruson. 1,783,166; Nov. 25.
Resinous condensation product. A. H. V. Durr. Re17,878; Nov. 25.
Ring: *See*—
Piston ring.
Ring for the unwinding of yarn from yarn containers in cable-cord frames or other twisting or doubling frames. J. H. Blackburn and W. E. Bancroft. 1,782,772; Nov. 25.
Rivet and burr, Machine-attached. P. E. Fenton. 1,783,113; Nov. 25.
Road-building apparatus. W. Bayley. 1,782,707; Nov. 25.
Road grader. A. F. Johnson. 1,782,992; Nov. 25.
Road machinery. D. B. Cook. 1,783,009; Nov. 25.
Roasting apparatus. R. H. Talbutt and F. A. Allner. 1,782,946; Nov. 25.
Rod for use in arc welding or cutting. J. B. Green. 1,783,013; Nov. 25.
Roofing elements, Edge-finishing fabricated. L. Kirschbraun. 1,782,535; Nov. 25.
Roofing elements, Edge-finishing fabricated. L. Kirschbraun. 1,782,536; Nov. 25.
Roller: *See*—
Antifriction roller. Shade roller.
Curtain roller.
Rotary engine. L. M. Randolph. 1,782,766; Nov. 25.
Rubberlike masses, Preparation of. H. A. Bruson. 1,783,167; Nov. 25.
Rubber, Vulcanization of. H. O. Chute. 1,782,713; Nov. 25.
Rudder and brake control. E. R. Weaver. 1,782,524; Nov. 25.
Saw, Dado. W. B. Huther. 1,782,507; Nov. 25.
Scale, Weighing. L. Jaenichen. 1,782,654; Nov. 25.
Scissors, Electric. A. Lucich. 1,782,473; Nov. 25.
Scraper and leveler, Ground. J. T. Compton. 1,782,646; Nov. 25.
Screen: *See*—
Faucet screen.
Screen construction, Rail-. N. Oldham. 1,783,152; Nov. 25.
Screen for disintegrating machines. A. Andreas. 1,782,953; Nov. 25.
Screen pipe and making same. R. A. Steps. 1,782,518; Nov. 25.
Screw driver. J. A. Anderson. 1,782,981; Nov. 25.
Screw driver. F. R. Bergemann. 1,783,070; Nov. 25.
Screw driver. J. A. Sigg. 1,782,515; Nov. 25.
Screw-spindle press, Frictional. O. Georg. 1,783,115; Nov. 25.
Selecting machine. J. Powers. 1,782,442; Nov. 25.
Selector mechanism. A. F. Horlacher. 1,783,122; Nov. 25.
Semitrailer, Automatic. H. W. Helms. 1,783,087; Nov. 25.
Separator: *See*—
Oil and natural-gas separator.
Sewing-machine, Feeding mechanism. H. M. Stephenson. 1,783,060; Nov. 25.
Shade, Lamp. C. T. Brady. 1,782,601; Nov. 25.
Shade roller, Metallic. W. O. N. Söderqvist. 1,782,977; Nov. 25.
Shade roller, Spring-operated. W. O. N. Söderqvist. 1,782,976; Nov. 25.
Sharpener, Electric pencil. D. J. Gawron. 1,783,038; Nov. 25.
Sharpener, Pencil. N. G. Barnard. 1,783,146; Nov. 25.
Shaving cup, Stationary. A. Piccione. 1,782,793; Nov. 25.
Sheaf-shocking machine. N. P. Boychuk and J. P. Boychuk. 1,782,837; Nov. 25.
Sherbet. J. Kirkpatrick. Des. 82,610; Nov. 25.
Shield, Anti-induction. A. Herz. 1,782,875; Nov. 25.
Shield for motor-vehicle headlights. F. N. Pape. 1,782,629; Nov. 25.
Shock absorber. G. Boella. 1,782,457; Nov. 25.
Shock absorber. W. B. Hite, jr. 1,782,533; Nov. 25.
Shock absorber. U. A. Inman. 1,782,725; Nov. 25.
Shock absorber. F. R. Reifsnyder. 1,782,631; Nov. 25.
Shoe and cleat therefor, Athletic. E. G. Howard. 1,782,569; Nov. 25.
Shoe counter. N. J. Robert. 1,782,632; Nov. 25.
Shoes, Making. J. A. Kelly. 1,782,759; Nov. 25.
Shore, Adjustable. C. M. Markham. 1,782,903; Nov. 25.
Shutter cover, Photographic-. W. D. Teague. Des. 82,631–2; Nov. 25.
Sign, Advertisement. T. Lamb and W. R. Sharp. 1,782,854; Nov. 25.
Sign, Electric. J. F. Coufal and H. A. Smith. 1,782,564; Nov. 25.
Signal device. J. L. Lamont. 1,783,124; Nov. 25.
Signaling system, High-frequency. F. W. Frink. 1,783,037; Nov. 25.
Signals, Receiving telegraphic. A. Jipp. 1,782,534; Nov. 25.
Silk, Apparatus for the manufacture of artificial. H. F. Nlogret. 1,782,581; Nov. 25.
Silk-twisting mill and like machine. L. C. Junillon and F. Gillot. 1,782,967; Nov. 25.
Silo. W. D. Bayley. 1,782,675; Nov. 25.
Sinker for knitting machines. A. E. Stewart. 1,782,486; Nov. 25.
Skate. G. A. Carney. 1,782,499; Nov. 25.
Skelp bar, Method and apparatus for the manufacture and conditioning of. J. W. Sheperdson. 1,782,700; Nov. 25.
Skiving machine. R. B. Woodcock and J. Cook. 1,782,495; Nov. 25.
Slat waxing and stacking machine. O. F. Chichester and J. J. Sylva. 1,782,645; Nov. 25.
Slate granules, Coloring. H. C. Fisher. 1,782,648; Nov. 25.
Slate granules, Forming grayish-black. H. C. Fisher. 1,782,649; Nov. 25.
Snap switch, Safety. F. F. Hafemeister. 1,782,780; Nov. 25.
Socket. H. D. Currier. 1,782,411; Nov. 25.
Socket, Tube. J. Geloso. 1,782,419; Nov. 25.
Socket, Vacuum-tube. B. Z. Moskowitz. 1,782,437; Nov. 25.
Soldering, Continuous. M. Orenstein. 1,783,134; Nov. 25.
Sole-rounding machine. R. B. Woodcock and T. A. Kestell. 1,782,494; Nov. 25.
Solvent and making the same. J. H. James. 1,782,964; Nov. 25.
Solvents, Manufacture of. J. H. James. 1,782,963; Nov. 25.
Sound, Absorption of. E. V. Amy. 1,782,399; Nov. 25.
Spark plug, Shielded. O. C. Rohde. 1,782,745; Nov. 25.
Speed-control apparatus. C. G. Garrigus. 1,782,990; Nov. 25.
Speed governing for prime movers, System of. H. B. Taylor. 1,783,157; Nov. 25.
Speed governing, System of. H. B. Taylor. 1,783,162; Nov. 25.
Speed variations, Apparatus for indicating. P. Paschen and W. Gebhardt. 1,783,000; Nov. 25.
Speedometer-testing machine. E. E. Townsend. 1,782,914; Nov. 25.
Spike-drawing device. J. F. Straube. 1,782,487; Nov. 25.
Spray drier and burner, Combined. I. Hechenbleikner. 1,782,822; Nov. 25.
Spreader. E. J. Budiong. 1,783,071; Nov. 25.
Spreader device for opening vulcanizing molds or the like. G. F. Wilson and H. E. Waner. 1,782,798; Nov. 25.
Spreader, Roll. C. L. Heisler. 1,782,470; Nov. 25.
Stalk chopper, Tractor. B. R. Benjamin. 1,782,560; Nov. 25.
Stamp, Inked. T. E. Madden. 1,782,877; Nov. 25.
Stand and mounting. W. Meyer. 1,782,660; Nov. 25.
Stand and rack, Adjustable. F. C. Huonker. 1,782,617; Nov. 25.
Stand or similar article, Flowerpot. G. Holzworth. Des. 82,607; Nov. 25.
Stapling machines, tag-affixing machines, and similar devices, Operating device for. F. Polzer. 1,782,743; Nov. 25.
Starter for internal-combustion engines. J. Hasselbring, jr. 1,783,015; Nov. 25.
Starting device for synchronous motors. W. S. Pfeifer. 1,782,908; Nov. 25.
Station, Filling. J. H. Glenn, jr., and B. L. Bennett. Des. 82,644; Nov. 25.
Steam, Apparatus for condensing. D. K. Dean. 1,782,986; Nov. 25.
Steel hull and building the same. G. G. Holbrook. 1,782,422; Nov. 25.
Stenciling. H. S. McClellan. 1,782,541; Nov. 25.

Sterilization apparatus, Fig-. J. G. Tyler, C. C. Taylor and W. S. Johnson. 1,782,522; Nov. 25.
Stirrer mechanism. W. Dierks. 1,782,957; Nov. 25.
Stone and making same, Artificial. I. J. Smith. 1,782,748; Nov. 25.
Storage bin. A. P. Skaer. 1,783,003; Nov. 25.
Strainer. A. T. Dwight. 1,783,111; Nov. 25.
Strainer. D. Larkin. 1,782,538; Nov. 25.
Strands, Apparatus for coating. R. D. Jessup. 1,782,425; Nov. 25.
Strap: *See*—
Fixture strap.
Strip-serving machine. W. Hermann. 1,782,922; Nov. 25.
Strontium oxide, Manufacture of. J. B. Pierce, jr. 1,782,830; Nov. 25.
Stuffing box. W. H. Puckett. 1,782,696; Nov. 25.
Sugar cane, Recovering the fibrous material from. J. J. de la Roza, sr. 1,782,869; Nov. 25.
Suitcase, Cabinet. C. K. Duer. 1,782,414; Nov. 25.
Sulphogroups from anthraquinone sulphonic acid derivatives, Splitting off. R. E. Schmidt. 1,782,747; Nov. 25.
Sulphur and resin compound. S. P. Miller. 1,782,693; Nov. 25.
Sulphur compounds from gases, Elimination of. G. Wietzel, J. Jannek and F. Fried. 1,782,590; Nov. 25.
Superheater. C. U. Savoye. 1,782,585; Nov. 25.
Support and housing for an electric discharge device, Combined. O. J. Moehler. Des. 82,639; Nov. 25.
Support, Lamp. J. W. Gosling. Des. 82,641; Nov. 25.
Surface covering and making the same. W. Freegard. 1782,416; Nov. 25.
Switch: *See*—
Control switch. Electrical switch.
Electric-meter switch. Snap switch.
Electric snap switch.
Switch box. C. Newman and E. G. Appleton. 1,782,545; Nov. 25.
Switch for devices for supplying paper to printing presses. J. E. Rust. 1,782,698; Nov. 25.
Switch for dispensing apparatus, Signal. A. Biron. 1,783,106; Nov. 25.
Syringe, Hypodermic. D. I. Pletcher. 1,782,938; Nov. 25.
Table: *See*—
Folding table.
Table construction. L. R. McGuire. 1,782,434; Nov. 25.
Table or the like, Night. E. J. Pauli. Des. 82,622; Nov. 25.
Tank cap, Pressure-. A. W. Kegler. 1,782,563; Nov. 25.
Tape-applying machine. L. K. Butler. 1,782,562; Nov. 25.
Tape-applying machine. J. P. Byron. 1,782,563; Nov. 25.
Taper-thread tap, Collapsing. A. F. Breitenstein. 1,782,804; Nov. 25.
Telephone-exchange system, Automatic. F. Trachsel. 1,782,491; Nov. 25.
Telephone, Hand. L. J. Loeffler. Des. 82,615; Nov. 25.
Telephone instrument switching. J. O. Cadieux. 1,782,806; Nov. 25.
Telephone system. L. M. Grandin. 1,782,847; Nov. 25.
Telephonic sounds and conversations and system therefor, Device for electrically recording. M. J. Johnson. 1,782,619; Nov. 25.
Textile fabric. F. W. Bader. Des. 82,597; Nov. 25.
Thermal cut-out and guard. G. R. Brown. 1,782,459; Nov. 25.
Thermometer, Clinical. J. A. Boutin. 1,782,599; Nov. 25.
Thrashers, Sack chute for harvester. W. F. MacGregor and R. K. Norman. 1,782,995; Nov. 25.
Ticker-tape control. J. H. Chidester. 1,783,008; Nov. 25.
Tiller. G. Peneff. 1,783,153; Nov. 25.
Tire-chain lock. B. E. Lang. 1,782,510; Nov. 25.
Tire gauge. W. E. Gochnauer. 1,783,116; Nov. 25.
Tire, Resilient. M. Leupold. 1,783,091; Nov. 25.
Tire-valve dust cap and locking mechanism therefor. J. T. Ryan. 1,782,584; Nov. 25.
Tires, Traction device for. C. R. Stewart. 1,783,161; Nov. 25.
Tone producer with universal audion, Electrical. F. E. Miller. 1,782,542; Nov. 25.
Tool, Agricultural. F. H. Kerr. 1,782,690; Nov. 25.
Tool, Bumping-out. W. Ferguson. 1,783,078; Nov. 25.
Tool, Burning-in. C. F. Allgaier. 1,782,952; Nov. 25.
Tool, Fishing. E. A. Hazen. 1,782,613; Nov. 25.
Tool, Hose-clamp-applying. J. Kiviaho. 1,783,123; Nov. 25.
Tool, Machine. A. M. Johnson. 1,782,573; Nov. 25.
Tool, Sheet-metal-bumping-out. W. Ferguson. 1,783,077; Nov. 25.
Tools, Guarding and guiding attachment for. S. F. Short. 1,782,448; Nov. 25.
Toothbrush. C. M. McArthur. 1,783,151; Nov. 25.
Top for smokers' stands. H. Dalton. Des. 82,603; Nov. 25.
Torch. P. M. Forster. 1,782,872; Nov. 25.
Towel rack, Swinging-arm. C. A. Mosgrove. 1,782,828; Nov. 25.
Toy. L. Marx. 1,782,786; Nov. 25.
Toy, Animated. H. E. Price. 1,782,477; Nov. 25.
Toy electric railroads, Track switch for. H. S. Becker. 1,783,069; Nov. 25.
Toy, Mechanically-operated figure. A. E. Derus. 1,782,843; Nov. 25.
Toy train tracks, Electric connecter for. H. C. Ives. 1,782,991; Nov. 25.
Toy weapon. W. Sadtler. 1,782,479; Nov. 25.
Tractor wheel. C. H. Wilks. 1,782,643; Nov. 25.
Transmission mechanism. J. Farley. 1,782,605; Nov. 25.
Transplanting device. W. R. Ober. 1,783,026; Nov. 25.
Trap: *See*—
Animal trap.
Traveling case. S. Apter. Des. 82,596; Nov. 25.
Trombone brace, Hand-adapted. E. Williams. 1,782,452; Nov. 25.
Truck, Automobile lift. R. J. Burrows. 1,782,865; Nov. 25.
Truck load sections or trays. L. W. Shelhamer. 1,782,667; Nov. 25.
Tube: *See*—
Collapsible tube.
Tube compressor, Toilet-paste-. A. O. Schaefer. 1,783,101; Nov. 25.
Tube protector, Collapsible-. N. O. Johnson. 1,782,429; Nov. 25.
Tube shield. R. Ramsdell. 1,782,443; Nov. 25.
Tube still furnace. H. Thomas. 1,782,885; Nov. 25.
Tube-stock feeding, measuring, and cutting machine. A. R. Krause and A. C. Hirsch. 1,782,658; Nov. 25.
Tubes, Rolling. A. T. Keller. 1,782,968; Nov. 25.
Turbine-regulating device. G. A. Biggs. 1,782,456; Nov. 25.
Type-page frame. E. B. Howe. 1,783,042; Nov. 25.
Typographical casting machine. A. W. F. Guest. 1,782,468; Nov. 25.
Universal joint. G. W. Van Deren. 1,782,492; Nov. 25.
Urea, Manufacture of. H. C. Hetherington and H. J. Krase. 1,782,723; Nov. 25.
Vacuum cleaner. H. B. Sharman and A. E. Burrage. 1,783,058; Nov. 25.
Vacuum cleaner. A. L. Wenner-Gren. 1,782,640; Nov. 25.
Valve. S. Kneass, jr. 1,782,970; Nov. 25.
Valve action for internal-combustion engines. E. S. Cameron. 1,782,859; Nov. 25.
Valve bag. C. C. Martin. 1,782,738; Nov. 25.
Valve device, Foot. J. C. McCune. 1,782,578; Nov. 25.
Valve, Emergency cartridge-type shut-off. L. D. Lovekin. 1,782,760; Nov. 25.
Valve for pneumatic tires or the like. E. V. Myers. 1,782,580; Nov. 25.
Valve reamer, Triple-. J. R. Ricketts. 1,782,910; Nov. 25.
Vanity case. H. B. Ivey. 1,782,726; Nov. 25.
Vending machine, Coin-operated. C. F. Kurtz. 1,782,659; Nov. 25.
Vending machine, Coin-operated. F. J. Rowse. 1,782,768; Nov. 25.
Ventilating apparatus. H. L. Elliott and R. A. Carroll. 1,782,890; Nov. 25.
Ventilating apparatus. A. W. Stewart. 1,783,005; Nov. 25.
Ventilator for vehicles. C. S. Warnock. Des. 82,645; Nov. 25.
Vessel, High-speed. R. Deetjen. 1,782,868; Nov. 25.
Vise. T. M. Lilleberg. 1,782,929–30; Nov. 25.
Wall and partition construction for insulating purposes. R. Sadwith. 1,782,794; Nov. 25.
Wall covering and support therefor. W. M. Connery. 1,782,774; Nov. 25.
Washing, bleaching, and dyeing artificial silk in hanks or spinning cakes, Apparatus. J. von den Driesch. 1,783,103; Nov. 25.
Washing machine. G. M. Gibson. 1,782,684; Nov. 25.
Washing machine, Car-. H. W. Cordell and J. R. Blackhall. 1,783,074; Nov. 25.
Waste and vent fitting. J. J. Crotty. 1,782,775; Nov. 25.
Water and apparatus therefor, Purifying. R. L. Hill. 1,782,850; Nov. 25.
Water, Method of and apparatus for controlling boiler feed. J. L. Kimball. 1,782,926; Nov. 25.
Web-cutting mechanism. A. Baumgartner. 1,782,674; Nov. 25.
Weighing apparatus, Indicating means for. A. Van Duyn. 1,782,670; Nov. 25.
Welding machine. V. J. Chapman. 1,782,461; Nov. 25.
Wheel: *See*—

Wheel-lug cleaner. J. and F. Thies. 1,782,637; Nov. 25.
Window-regulator handle. J. L. Brownell. Des. 82,890; Nov. 25.
Window-screen structure. K. F. Jorss. 1,782,853; Nov. 25.
Wire-cloth covering for pressing-machine elements, Woven-. G. F. Simpson. Re17,883; Nov. 25.
Woodworking machinery. J. E. Hirst. 1,783,041; Nov. 25.
Workholder. C. S. Hopwood. 1,782,615; Nov. 25.
Wrapper, Confection. H. A. Meyer. 1,782,856; Nov. 25.
Wrecker bar. W. F. Henderson. 1,782,506; Nov. 25.
Wrench. A. Weisler. 1,782,752; Nov. 25.
Zinc slabs and the like, Apparatus for casting. D. M. Gray and J. J. Williams. 1,782,920; Nov. 25.

CLASSIFICATION OF PATENTS

ISSUED NOVEMBER 25, 1930

NOTE.—First number=class, second number=subclass, third number=patent number

2— 27: 1,782,892
50: 1,782,925
132: R. 17,885
138: 1,782,913
4— 211: 1,782,774
1,782,775
5— 80: 1,782,672
285: 1,782,988

U. S. GOVERNMENT PRINTING OFFICE: 1930

Patents Nos. 1,780,150 to 1,780,895

THE OFFICIAL GAZETTE

OF THE

United States Patent Office

Vol. 400—No. 1 TUESDAY, NOVEMBER 4, 1930 Price—$10 per year

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscription, $10.00 per annum; including annual indexes, $11.50; single numbers, 25 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

NOTICE

NUMBER OF TYPEWRITTEN BRIEFS REQUIRED WHEN PRINTING HAS BEEN DISPENSED WITH

FINAL HEARINGS

BEFORE EXAMINERS OF INTERFERENCES, both patents and trade-marks:

1 original and 1 good carbon—
3 days before hearing.

ON APPEAL TO BOARD OF APPEALS:

1 original and 2 good carbons—
30 days for appellant and
10 days for appellee.

ON APPEAL TO THE COMMISSIONERS:

1 original and 1 good carbon—
30 days for appellant and
10 days for appellee.

ALL BRIEFS SHOULD BE SERVED

DESTRUCTION OF FILES ABANDONED APPLICATIONS

ACT OF APRIL 11, 1930

DEPARTMENT OF COMMERCE,
U. S. PATENT OFFICE, *Washington, Oct. 20, 1930.*

(ORDER No. 3,166)

Section 6 of the act of April 11, 1930 (393 O. G. 1031-2) reads as follows:

The Commissioner of Patents is hereby authorized to annually destroy or otherwise dispose of all the files and papers belonging to all abandoned applications which have been on file for more than twenty years.

(1) If any patentee calls attention within 60 days from the date of this order to an abandoned application referred to in his patent, the file of that abandoned application will be retained in this Office.

(2) If any member of the public similarly calls attention to a patent having reference to such an abandoned application, the file of that application will be retained.

(3) Except as indicated in paragraphs (1) and (2), where any applicant or the assignee of any application wishes to obtain the file of an application which has been abandoned for more than 20 years, such application will be sent to him if request therefor is made within 60 days from date of this order, provided that if request is made by the applicant for such file and the record shows an assignment thereof, the request must be accompanied by the assent of the assignee.

Except as above indicated, steps will be taken to destroy the files of all abandoned applications which have been on file longer than the 20-year period fixed by statute.

THOMAS E. ROBERTSON,
Commissioner.

Disclaimer

1,540,691.—*Walter A. Gibbs*, Wilmington, Del. ANIMAL TRAP. Patent dated June 2, 1925. Disclaimer filed October 11, 1930, by the patentee.

Hereby enters this disclaimer to claims 14 and 15 in said specification which are in the following words, to wit:

"14. In an animal trap, the combination with a pair of pivotally mounted jaws, of a closing lever embracing the jaws and pivotally mounted between the jaw pivots, a spring bearing against the back of the lever and adapted to elevate the lever to close the jaws, and means on the lever for preventing displacement of the spring from behind the lever.

"15. In an animal trap, the combination with a pair of pivotally mounted jaws, of a substantially flat closing lever embracing the jaws and pivotally mounted between the jaw pivots, a coiled spring having one end bearing against the back of the lever and adapted to elevate the latter to close the jaws, and a flange at the side of the lever to prevent displacement of the end of the spring from behind the lever."

Condition of Applications Under Examination at Close of Business October 24, 1930

Room No.	(Total number of applications awaiting action, excluding Trade-Mark Division, 115,687; Trade-Mark Division, 1,445. Oldest new case, Dec. 24, 1929; oldest amended, Dec. 24, 1929. The dates given are 1930 except where † indicates 1929.) DECISIONS IN PATENT AND TRADE-MARK CASES

Commissioner's Decisions

EX PARTE ARBUCKLE

Decided June 11, 1929

SPECIFICATION—REFERENCE TO MODIFICATIONS.

A statement in the specification that other modifications may be resorted to and it is desired to claim the invention broadly, limited only by the scope of the claims, *Held* objectionable where the application has been restricted to limited claims.

[This application has resulted in Patent No. 1,772,175.]

ON PETITION.

HEADLIGHT FOR PRODUCING MULTICOLORED BEAMS

Mr. Chester H. Braselton for the applicant.

ROBERTSON, *Commissioner:*

Applicant petitions from the Examiner's requirement to cancel the words "and I desire, therefore, to claim the invention broadly," appearing in the last sentence of the specification, which reads as follows:

Many other modifications may be resorted to without departing from the spirit of the invention, and I desire, therefore, to claim the invention broadly, limited only by the scope of the appended claims.

The Examiner in the Office actions merely required the elimination of the phrase in question on the authority of *Ex parte Champ*, 114 O. G. 1827, and *Ex parte Eldon*, 83 O. G. 748. In his statement he points out that the broader claims have all been canceled in response to rejection on the art, which he states is very close to the structure here disclosed. He further argues that since the interpretation of a patent is for the courts it is thought that the applicant can not give any directions as to how the court would exercise its discretion.

The applicant argues that the language is unobjectionable, since he is simply intending to show that it was his intention to use the terms in the claims in as broad a sense as possible and that the language objected to is within the ruling in *Ex parte Jansson*, 120 O. G. 2126.

In that case, in passing upon an objection to the statement that the applicant wishes to be understood that he does not desire to be limited to the exact details of construction shown, the Commissioner stated that, in case of any doubt as to the meaning of the terms, the intent of the applicant in so using them might become material.

Obviously, however, a statement should not appear in a patent that applicant desires "to claim the invention broadly as well as specifically", if no broad claims have been allowed, and in view of the art applicant has been restricted to specific claims, since the patentee would not then be claiming the invention broadly.

The particular statement of this application that applicant desires to claim "the invention broadly, limited only by the scope of the appended claims," would likewise seem to be objectionable, all the broad claims having been rejected and canceled, as indicating that applicant was claiming the invention more broadly than the claims themselves indicated. On the other hand, even if the language could be construed as a statement that it was desired that the terms of the claims be broadly construed, it would still be objectionable if only limited claims were allowed.

The petition is denied.

EX PARTE MESSICK

Decided October 13, 1930

APPLICATION—PROSECUTION—TIME WITHIN WHICH ACTION MAY BE TAKEN.

The six months, term specified in section 4894 Revised Statutes refers to calendar months and the rule for computing a term of calendar months is that the term expires on the day of the last month corresponding to the day of the month in which the term began, if the last month has a sufficient number of days; otherwise, on the last day of that month.

PETITION to revive.

LOUD-SPEAKER CONE SUSPENSIONS

Mr. Charles Messick pro se.

KINNAN, *First Assistant Commissioner:*

The applicant has presented a petition to revive this application and the showing submitted in support of the petition is deemed to justify a holding that delay in prosecution was unavoidable.

Under the foregoing circumstances the petition would be granted without further review but the applicant has contended that his response to the Examiner's action was filed within six months and that the holding by the Examiner that the case is abandoned is in error and not according to statute.

The Examiner's action was dated and mailed February 28, 1930, and the applicant's response thereto was filed August 30, 1930. It is the applicant's view that this amendment was filed within six months after the date of the Examiner's action. It is submitted by applicant that the statute limiting response to six months refers to calendar months and reference is made to the settled practice of requiring an action by the Office under date of, for example, August 30 or 31 to be responded to not later than February 28—or February 29 when that month has 29 days—of the succeeding year. The applicant urges in effect that the reverse would be true, that if the Examiner's action were on February 28 the applicant would have until August 31.

Since it is well enough settled that if an Office action were made on February 27, response would be necessary not later than August 27, the applicant's interpretation of the statute would mean that were the Office action made on February 28, the applicant would have three days longer, until August 31st, within which to make response. It is deemed obvious no such interpretation of the statute can be supported. It is true the statute is properly interpreted as referring to calendar months as distinguished

from lunar months or from 30-day periods, but the six months include only the day in the sixth month which corresponds with the number of the day of the month upon which the Examiner's action was taken. As indicating this general rule of courts, attention is invited to the cases of *Parkhill* v. *Town of Brighton*, 61 Iowa 108, 15 N. W. 853; *Williams Bros.* v. *Bank of Blue Mountain*, 95 So. 843, 132 Miss. 178; *Oehler* v. *Walsh*, 28 Ohio Cir. Ct. R. 446; *Dailey* v. *Anderson* (Wyo.), 48 P. 839, 7 Wyo. 1, 75 Am. St. Rep. 870. It will be noted that this last decision correctly sets forth the practice in this Office that the rule for computing a term of calendar months is that the term expires on the day of the last month corresponding to the day of the month in which the term began, if the last month has a sufficient number of days; otherwise, on the last day of that month.

The foregoing is in accordance with the following decisions: *Ex parte Cannon*, opinion of the Assistant Attorney General, 94 O. G. 2165, 1901 C. D. 263; *ex parte Poulson*, 175 O. G. 265.

The Examiner correctly interpreted the statute in holding that the applicant's response of August 30, 1930, was not made within six months from February 28, 1930.

The petition to revive is in view of the showing in excuse of the delay granted.

U. S. Court of Customs and Patent Appeals

IN RE TABB

No. 2,350. Decided May 28, 1930

[40 F.(2d) 780]

1. PATENTABILITY—BRASSIÈRES—FUNCTIONAL CLAIMS.
   Claims for a brassière including the limitation "a front cover member for the bust, twisted" *Held* functional since the application does not disclose a permanently twisted front cover member but one which may be twisted in wearing.
2. SAME—SAME.
   Claims for a brassière *Held* unpatentable over the prior art.

APPEAL from the Patent Office. Affirmed.

Mr. W. Lee Helms and *Mr. C. Russell Riordan* for Tabb.

Mr. T. A. Hostetler for the Commissioner of Patents.

GRAHAM, *P. J.:*

The appellant, Elizabeth Minor Tabb, filed her application for a patent on improvements in brassières, Serial No. 67,161, on November 5, 1925. Six claims were filed, of which three, 1, 5 and 6 were allowed, and 2, 3, and 4 were rejected by the Examiner and by the Board of Appeals. The claims were rejected on patent reference to Yurka, No. 1,431,206, dated October 10, 1922, and a British patent to Barbu, No. 139,725, dated August 23, 1919.

The claims disallowed are as follows:

2. In women's apparel a front cover member for the bust, twisted as by rotation of the ends thereof with respect to each other 180 degrees about a line joining mid portions of said ends.

3. In a garment comprising a member to cover and confine the bust of the wearer, an operative formation of said member, said formation comprising a twist of said member in a front central portion thereof, with a narrowing of said member by said twist adjacent thereto, and a tightening of the edges of said member by said twist and a cupping of said member by said twist to the right and the left of the same; said twist comprising a warping of the surface of said portion as by rotation of the ends thereof with respect to each other about a line substantially central of the width thereof, with a plurality of folds of said surface crossing each other in double fan formation.

4. In women's apparel a closed band to encircle the body of the wearer supporting the bust, said band having in opened and developed formation an obverse face and a reverse face and two opposite longitudinal edges, said closed band being formed from said developed band by joining the ends of said developed band in inverted relation, said obverse face at one end thereof being placed in correspondence with said reverse face at the other end thereof, with one of said edges adjacent one of said ends forming a continuation of the other of said edges adjacent the other of said ends; said joining thus providing a twist in a portion of said closed band.

Applicant's brassière is described and shown in her drawings, in several variations, substantially as follows: An oblong strip of cloth, of equal width throughout its length, of proper size to form a sufficient covering and support for the breasts, is attached at each end to strips of material by gathered seams. These strips of material are designated in the drawings as 8 and 10. To the end of the strip 10 is attached an elastic strip, having on its outer end hooks. On the outer end of the strip 6 are eyes. The hooks and eyes are so arranged that they will only fasten properly when the brassière is twisted 180 degrees. In some forms of the pictured brassière, shoulder straps are added which are attached at opposite sides of the central strip of material constituting the brassière proper, so that when the strip is twisted in wearing, the shoulder straps will both be above the brassière.

The allowed claims fully cover the feature of the shoulder straps being attached on opposite sides, and the hooks and eyes being arranged in such a manner as to be only usable when the brassière is twisted.

[1] Considering rejected claim 2 of appellant's application, which is not a process claim, but a claim for a device, it will be observed that the only device expressly described is "a front cover member for the bust, twisted." However, appellant does not show a permanently twisted front cover member, but one which may be twisted in wearing. The feature of the claim relative to the method of wearing is, in our opinion, an attempt to patent a function of the device, and was, therefore, porperly rejected, *Corning* v. *Burden*, 15 How. 252, 268; *In re Weston*, 17 App. D. C. 431; 940 O. G. 1786; *In re Cunningham*, 21 App. D. C. 29; 102 O. G. 824. To illustrate, an applicant might obtain a patent for a necktie, permanently tied in a certain manner; this, however, would not justify the granting of a patent on every method by which a tie of ordinary variety might be tied by the wearer.

[2] Claim 3 is subject to the same objection. It simply describes the method in which the brassière is to be worn. The features which give it a distinctive character, if at all, are not relied upon and described in this claim. Even if the method in which the brassière is to be worn were sufficient to make this claim patentable, it would be clearly anticipated by the Yurka reference. Yurka shows an oblong strip of material, made of thin sheet rubber, having tapes for attachment at each corner thereof. No reason is apparent why this strip may not be twisted, and, as thus twisted, be tied by the tapes and worn as appellant's brassière is to be worn. The fact that Yurka uses rubber does not establish a distinction. The applicant here also includes the use of such material.

When claim 4 is carefully considered, it will be found nothing further is disclosed than is disclosed in claims 2 and 3. We are therefore of opinion that the decision of the Board of Appeals should be and it is hereby affirmed.

Affirmed.

U. S. Court of Customs and Patent Appeals

IN RE ROHLFS

No. 2,351. Decided May 28, 1930

[40 F.(2d) 753]

PATENTABILITY—ELECTRICAL AERIAL SIGN.
A claim for an electrical aerial sign consisting of neon tubes mounted on the underside of the lower wings of an aeroplane *Held* unpatentable over the prior art.

APPEAL from the Patent Office. Affirmed.

Mr. C. B. Des Jardins for Rohlfs.

Mr. T. A. Hostetler for the Commissioner of Patents.

BLAND, *J.:*

The subject matter of this appeal is an electrical aerial advertising sign. The United States Patent Office allowed certain of appellant's claims and rejected claims 4 and 7, from which action appeal has been taken to this court and here claim 7 was abandoned, which leaves before this court claim 4, only, which reads as follows:

4. The combination with a power driven aeroplane, of an electrical aerial sign or the like comprising one or more luminous tube lights, each consisting of a single length of translucent tubing shaped to conform either in whole or in part to the outline of the letter or other character desired to be shown, means for fastening said tube lights to the aeroplane, and an electrical generator mounted on said aeroplane and electrically connected with said light or lights, for generating sufficient current to operate it or them.

Applicant proposes, by the specifications of his application for patent, to mount on the under surface of the lower wings of an aeroplane an electrically illuminated sign made up of luminescent tubes, shaped to the outline of the letter or character to be shown, and supplied with operating current by a generator mounted on the aeroplane. The luminous tubes which he uses are the well-known neon type such as described in the Claude Neon patents, referred to by patent numbers in applicant's specifications.

The object of this invention is to display an illuminated sign, at night, above cities and thickly populated centers.

The Board of Appeals rejected the claims before it upon the following references: Mitchell et al., 1,474,682, Nov. 20, 1923; Fargo, 1,041,988, Oct. 22, 1912; Bohm, 524,752, Aug. 21, 1894; Sperry, 1,362,753, Dec. 21, 1920.

The patent to Bohm shows a sign consisting of a glass tube or tubes bent or curved to the desired shape so as to form a letter, figure, word, design, or other part of an advertisement or decorative device, and so connected and mounted as to admit of the practical application to advertising. The tube is illuminated by passing electric current therethrough.

The patent to Fargo shows a railroad signal in which illuminating means are provided for outlining the arm. The means consists of a tube which follows the outline of the arm and is attached thereto. The illuminating means disclosed is a Moore vacuum tube light in which the rarefied gas in the tube acts as a conductor of electric current.

Sperry discloses a wind-driven electrical generator for aircraft in which the generator is driven by propeller blades.

Mitchell, who will be referred to more particularly hereinafter, discloses an advertising sign on the underside of aeroplane wings. The lighting consists of a plurality of electric bulbs receiving their current from a storage battery carried by the aircraft, the battery being supplied with current by means of an appropriate motor driven generator.

The Board of Appeals held that the appealed claims called for no more than the combination of the disclosures in the references and that substituting one element of the combination for another, in the manner in which appellant did, did not constitute invention.

Appellant insists with great earnestness that he is entitled to the allowance of claim 4, which embodies the combination of old elements only, because he has reduced aeroplane night advertising to a success when prior to his entering the field, it had been a complete and abandoned failure. He characterizes the reference Mitchell, which is the reference with which we are chiefly concerned, as "a failure, inoperative and worthless." He admits the different elements of his combination, with the exception of those for which claims were allowed, to be old in the art. He shows, and we think convincingly, by affidavits and argument, that the Mitchell patent was of little value as a commercial enterprise, and that the same, after repeated trials at great expense, had been abandoned. He points out that in the Mitchell patent signs are fastened to the undersurface of the aeroplane wings by means of a series of hangers and slotted angle bars; that certain metal channels are adjustably fastened to the angle bars and are shaped to conform to the particular character of the sign; that within these channels bars is mounted a series of incandescent electric lamps connected by elaborate wiring to a heavy storage battery which supplies illuminating current; that the channels serve as reflectors; that the advertising device is cumbersome in character and more than twice the thickness of the aeroplane wing supporting it; that it projects in front of the wing and in the rear of same, interfering with the air currents necessary for the efficient and safe flying of the plane; that after repeated experiments the weight of the electrical apparatus could not be reduced to less than 500 pounds; that it was difficult to get the aeroplane, so loaded, off the ground; that high flying

was not possible, if the advertising was to be read; that low flying was dangerous and eventually regarded as impracticable; that the vibrations of the machine broke the incandescent lamp filaments and that the battery did not afford enough current to last for a display of longer than fifteen minutes; that various noted aviators by affidavits (in the record) pronounced it a failure as a commercial enterprise and to be dangerous and impracticable of operation.

Appellant argues from these premises that Mitchell's device is inoperative and that an inoperative structure is an improper reference.

It is admitted that Mitchell's device did operate; that the electric light globes in the Mitchell combination outlined the sign which the public saw during the course of the flight; that the plane could and did fly, carrying and displaying the advertising matter, although it could not fly or display the sign for very long periods of time and was cumbersome, dangerous and expensive of operation. Nevertheless, it operated, and was a disclosure of a mechanism for performing the result, though in a more unsatisfactory manner, obtained by appellant.

The Patent Office concluded, and we think properly so, that the combination of old elements as proposed by applicant did not constitute patentable invention; that no new result was obtained, but that a more efficiently operating and commercially valuable mechanism was developed by applicant, requiring no more than mechanical skill.

The decision of the Board of Appeals is affirmed.
Affirmed.

U. S. Court of Customs and Patent Appeals

BUCHANAN *v.* BURRAGE, JR.

No. 2,359. Decided May 28, 1930

[41 F.(2d) 98]

INTERFERENCE—PRIORITY—RIGHT TO MAKE THE CLAIMS.

Record reviewed and *Held* to establish that the application of appellee discloses the invention in issue and that priority was properly awarded to him.

APPEAL from the Patent Office. Affirmed.

Mr. H. C. Bierman for Buchanan.

Mr. Odin Roberts for Burrage.

BLAND, *J.:*

Appellant has appealed from the decision of the Board of Appeals awarding priority to the party Burrage upon the following counts in interference:

1. A rubber accelerator comprising a mixture of diphenylguanidine and ditolylguanidine.
2. A rubber accelerator comprising a mixture of diphenylguanidine and ditolylguanidine, the melting point of said mixture being lower than the melting point of the major constituent.
3. A rubber accelerator comprising a mixture of diphenylguanidine and ditolylguanidine, the melting point of said mixture being lower than the melting point of either constituent.
4. A rubber accelerator comprising a mixture of diphenylguanidine and ditolylguanidine, and having an accelerating value approximately equal to that of ditolylguanidine.

Buchanan filed application for a patent on a rubber accelerator and method of making the same and after due proceedings obtained a patent, No. 1,593,385, on July 20, 1926. Later the Primary Examiner suggested that an interference should be declared on the subject matter of claim 1. The Burrage application had been on file in the Patent Office prior to the filing of the application of Buchanan. Burrage copied four claims of the Buchanan patent and interference was declared thereon. Buchanan moved to dissolve on the theory that Burrage could not make the claims. The Law Examiner denied the motion. His view was sustained by the Examiner of Interferences and by the Board of Appeals.

The invention in issue, as disclosed in the Buchanan patent, consists of a mixture of two compounds, namely, DPG and DOTG, both of which had been known and used as rubber accelerators. Buchanan claims to have discovered first that mixtures of these two substances in various proportions are mutually soluble; second, that the melting points of these mixtures differ materially from the melting points of the individual constituents; third, that a eutectic mixture containing approximately equimolecular parts of the two substances had a relatively low melting point, much lower than the melting points of either of the two constituents; fourth, that these mixtures have high accelerating values and particularly the eutectic mixture which has an activity equal to that of DOTG.

The object of the claimed invention is to enable the rubber manufacturer to use with good results larger quantities of the cheaper accelerator and thus reduce manufacturing costs.

Appellee filed no brief and made no appearance in this court.

In the decision of the Board of Appeals is found an apt statement of the case, and we can do no better than to copy it:

> Count 1 is identical with claim 16 of Burrage which is one of his original claims and it is obvious, therefore, that he can make this claim.
>
> Count 2 specifies that the mixture has a melting point lower than that of the major constituent. In the Burrage application on page 4, lines 4–10, the proportions of the mixture, which appear to apply generally to all the described ingredients, were stated as two parts of the slower and less expensive constituent and one part of the more active and more expensive one. Applying these proportions to the specific substances of the claims, this would mean 33⅓% of diphenylguanidine and 66⅔% of ditolylguanidine. If the ditolylguanidine is the major constituent, count 2 would, according to the diagram in the drawing of Buchanan's patent, cover all mixtures of the specified substances and if the diphenylguanidine is the major constituent, then the conditions are satisfied by all mixtures in which such substance exceeds 30%. Under either condition, the mixture of the Burrage application satisfies count 2.
>
> Count 3 specifies that the melting point of the mixture is lower than the melting point of either constituent. The Law Examiner appears to have considered the word "either" as ambiguous but we think the plain meaning of the claim is that the melting point of the mixture is lower than that of any one of its ingredients. Reading the Burrage mixture on the diagram we find that the 33⅓% to 66⅔% mixture would have a melting point of between 130°–140° which is less than that of either of the elements and Burrage can therefore make this claim.
>
> Count 4 specifies that the accelerating value of the mixture is approximately that of ditolylguanidine. According to Buchanan this is the case when the mixture is "eutetic" or one in which the melting point is the lowest attainable in such mixtures.
>
> The specification of Buchanan specifies that the eutectic mixture corresponds to a mixture of equimolecular proportions of the two constituents and claim 6 of his patent covers such a mixture. There is nothing in the patent to indicate the range covered by the word "approximately" in count 4 but this count is clearly intended to include more than claim 6. The Burrage proportions of 33⅓% to 66⅔% appear to near enough to the eutectic mixture, whose proportions are about 46⅔% to 54⅓%, to be covered by the language of this count.
>
> In his brief Buchanan contents that Burrage had altogether a different problem in mind and had no conception of the characteristics which Burrage stresses as important. This is not altogether true for the Burrage application sets forth on page 3, lines 21–31 the fact that the mixture will act at a lower temperature than the higher component, and on page 4, line 23–page 5, line 4, that proper combinations may be obtained whereby almost any reasonable speed of action without burning or discoloration, may be secured. His specification also refers to the fact that the mixture is cheaper than that of the higher priced ingredients.
>
> We are satisfied that all the counts are supported by the Burrage disclosure and the decision of the Examiner of Interferences awarding priority of invention to Albert S. Burrage, jr., the senior party, is affirmed.

We agree with the conclusion reached by the Board of Appeals and the reasons assigned therefor, and its decision is affirmed.

Affirmed.

U. S. Court of Customs and Patent Appeals

MARTUS AND BECKER *v.* HEISE

No. 2,275. Decided April 14, 1930

[39 F.(2d) 715]

INTERFERENCE—PRIORITY.

Evidence reviewed and *Held* to establish that H. was the first to conceive the invention and was not lacking in diligence in reducing it to practice at the time M. and B. entered the field and subsequently thereto and priority properly awarded to H.

APPEAL from the Patent Office. Affirmed.

Mr. Alfred M. Houghton for Martus and Becker.

Mr. Charles H. Potter and *Mr. W. J. Willis* for Heise.

HATFIELD, *J.:*

This is an appeal in an interference proceeding from the decision of the Board of Appeals affirming the decision of the Examiner of Interferences awarding priority of invention to appellee, George W. Heise.

The invention in issue relates to the addition of zeolitic agents—one of which is "permutit"—to the electrolyte in a caustic alkali electric cell for the purpose of increasing electrolyte efficiency.

The counts in issue read as follows:

1. An electric cell of the copper oxid type having positive electrode and negative electrodes and a liquid caustic alkali electrolyte, said cell also containing zeolite material in contact with said liquid.
2. An electric cell of the copper oxid type having positive and negative electrodes and a liquid caustic alkali electrolyte, said cell also containing in contact with said liquid a zeolite of the water purifying type containing reactive alumina and reactive silica.
3. An electric cell of the copper oxid type having a positive electrode, a negative electrode, and a liquid caustic alkali electrolyte, said cell also containing in contact with said liquid a solid material containing silica in reactive hydrated form.
4. An electric cell of the copper oxid type having a positive electrode, a negative electrode and a liquid caustic alkali electrolyte, said cell also containing in contact with said liquid a solid material containing alumina in hydrated reactive form.
5. An electric cell of the copper oxid type having a positive electrode, a negative electrode, and a liquid caustic alkali electrolyte, said cell also containing silica in reactive hydrated form and alumina in hydrated reactive form, said silica and said alumina existing in the form of a zeolite.

The application of appellants, Martus and Becker, filed February 13, 1925, matured into patent—No. 1,581,851—on April 20, 1926.

Appellee's application, filed May 15, 1925, was pending at the time the patent to appellants was issued. Appellee is the junior party and has the burden of proving priority of invention by a preponderance of the evidence.

Considerable evidence was submitted by appellee. Appellants submitted no evidence and are, restricted, therefore, to their filing date.

Each of the Patent Office tribunals has exhaustively considered the issues in rather elaborately-prepared opinions. They concurred in holding that appellee was the first to conceive the invention; that he had not reduced the invention to practice prior to his filing date—May 15, 1925; and that, as he was not lacking in diligence immediately prior to or after the time appellants entered the field, he was entitled to an award of priority.

It is contended by counsel for appellants that the Board of Appeals erred in holding that appellee conceived and disclosed the invention prior to appellants' filing date—February 13, 1925, and that the record discloses that appellee had no conception of the invention prior to appellants' filing date. It is further contended that, if appellee conceived and disclosed the invention at any time in the year 1924, as claimed, he was clearly lacking in diligence and, therefore, is not entitled to an award of priority.

It appears from the record that appellee is a chemist in the employ of The National Carbon Company; that, in the spring and summer of the year 1924, appellee and his assistants were engaged in experimental work, the object of which was to increase electrolytic efficiency; that permutit was used, according to one witness, to "remove zinc from the solution," and, according to another, to reduce zinc concentration; that it was also added to "copper solutions to reduce the copper"; and that the invention in issue was disclosed to several witnesses as early as May, 1924. Experiments and tests were made from May to October, 1924. In view of the fact that these experiments have been discussed at considerable length by the Examiner of Interferences, we deem it unnecessary to describe them here. It is sufficient to say that we are in accord with the decisions of the Patent Office tribunals holding that appellee has established conception and disclosure of the invention as early as the summer of 1924.

With reference to appellants' contention that appellee had no conception of the invention prior to the filing date of appellants' application, the Board of Appeals said:

> • • • Several of these alleged errors relate to the theories of the parties to the interference as to the function performed by the zeolite material in the electrolyte. Martus and Becker have one theory, Heise has a different theory, but there is nothing in the counts about the function performed or the result secured by the use of the zeolite material. So far as we can discover there is no testimony in the record which establishes that Heise's theory as to the purpose of the zeolite material is incorrect. Moreover, under the law as we understand it Heise is entitled to the date of disclosure of the use of the zeolite material for conception even though his theory as to the purpose of the material was incorrect. On the straight question of conception and disclosure we are in accord with the Examiner of Interferences that Heise has proven a conception and disclosure prior to the rate to which Martus and Becker are restricted. We base our conclusion on the testimony of Heise corroborated by Pflug and Schumacher as pointed out on pages 2 and 3 of the decision of the Examiner of Interferences. Although the decision did not accord to Heise any specific date for conception and disclosure if it were necessary we would have no hesitancy in holding that Heise has proven conception and disclosure in the summer or fall of the year 1924. Holding as we do that Heise has proven conception and disclosure prior to the filing date of Martus and Becker no reason is seen for a finding that Heise should be restricted to his filing date for the activities in question. The disclosure in the testimony is as complete as is the disclosure in the application.

Due to the views we hold, it will be unnecessary for us to discuss the question of whether appellee

is entitled to a finding that he reduced the invention to practice prior to the filing of his application. On October 29, 1924, appellee prepared and signed a patent memorandum describing the invention. It was received by the witness, Scheffler, (who, at that time, was in charge of the patent department of the Union Carbide and Carbon Research Laboratories) on November 6, 1924, from his superior, Mr. Townsend, with the recommendation that an application for patent be prepared and filed, if an "investigation disclosed substantial patentable subject-matter." Due to the accumulation of business requiring attention and for other proper reasons set forth in the decisions below, and which need not be mentioned here, counsel was delayed in giving consideration to appellee's application for patent until March 17, 1925. Approximately two months thereafter it was filed in the Patent Office.

There is no evidence of any activity on the part of appellants until February 13, 1925, when their application was filed. Accordingly, in order to prevail, it must appear that appellee was reasonably diligent from immediately prior to February 13, 1925, until May 15, 1925, a period of only about three months. During all of this time appellee's patent memorandum was in the possession of his assignee's attorneys; and from March 17, 1925, until the application was filed, counsel for the assignee were active in its preparation.

The question of diligence is one of fact, and must be determined in each case in the light of the prevailing conditions and circumstances. There are no facts of record to indicate that appellee, as counsel for appellants argue, was deliberately inactive.

Due entirely to the delay occasioned by the unfortunate conditions prevailing in the office of the patent department of his assignee (which, in our opinion, have been satisfactorily explained), the filing of appellee's application was delayed for about three months after appellants entered the field. There is not the slightest evidence that appellee concealed or abandoned the invention, as suggested by counsel for appellants. See *Olson* v. *Pospeshil*, 50 App. D. C. 182, 269 Fed. 698, 283 O. G. 365.

In our opinion, the tribunals of the Patent Office were clearly right in awarding priority of invention to appellee, and the decision of the Board of Appeals is affirmed.

Affirmed.

U. S. Court of Customs and Patent Appeals

PIERSON *v.* BECK

No. 2,340. Decided May 28, 1930

[40 F.(2d) 769]

1. INTERFERENCE — PRIORITY — RIGHT TO MAKE THE CLAIMS.
   Record reviewed and *Held* to establish that the disclosure of B supports the counts of the issue.
2. SAME—PRIORITY—REDUCTION TO PRACTICE.
   Evidence reviewed and *Held* to establish that B, who was the first to conceive the invention, was also the first to reduce it to practice, and that priority was properly awarded to him.

APPEAL from the Patent Office. Affirmed.

Messrs. Eakin & Avery, Mr. Parker Dodge, Mr. W. D. Eakin, and *Mr. W. F. Avery* for Pierson.

Messrs. Whittemore, Hulbert, Whittemore & Belknap, and *Mr. Clarence B. Zewadski* for Beck.

HATFIELD, *J.:*

This is an appeal in an interference proceeding from the decision of the Board of Appeals reversing the decision of the Examiner of Interferences awarding priority of invention to appellant, Robert M. Pierson.

The invention relates to a door-check specially adapted for use on automobile doors. It is sufficiently described in the count of the issue, which reads:

> The combination with a swinging door and its frame of a flexible, resilient link connecting said door and frame and adapted to attain a condition of initial strain when the door has reached a relatively-wide opening, said link being essentiallly composed of vulcanized soft rubber compound.

Appellant, the senior party, filed his application for a patent on August 2, 1923.

Appellee filed his application on March 3, 1924.

Appellant moved to dissolve the interference on the ground that appellee could not make the claim in issue. The motion was denied by the Law Examiner.

In his preliminary statement, appellee alleged that he conceived the invention on or about December 5, 1921; that on or about December 6, 1921, he made and attached the device in issue to an automobile and successfully operated it; that he disclosed the invention to others on or about December 10, 1921; and that on or about March 1, 1922, he made drawings of the invention and a mold for the device, and immediately thereafter manufactured and successfully operated many of the involved devices.

As appellant submitted no evidence, he is restricted to his filing date—August 2, 1923—for conception and constructive reduction to practice.

Appellee submitted considerable evidence in an effort to establish conception and actual reduction to practice prior to appellant's filing date.

The Examiner of Interferences held that Beck's disclosure supported the count in issue. However, he awarded priority of invention to Pierson on the ground that, although Beck had established prior conception, he had failed to show an actual reduction to practice and was lacking in diligence from August 2, 1923, Pierson's filing date, to March 8, 1924, when his application was filed.

On appeal by Beck, the Board of Appeals sustained the Examiner of Interferences with respect to his holding that Beck's disclosure supported the count in issue, and that he was the first to conceive the invention. However, it held that the evidence submitted by Beck was sufficient to establish that he had reduced the invention to practice long prior to Pierson's filing date, and that, therefore, he was entitled to an award of priority.

It is contended by appellant that the tribunals below were in error in holding that appellee's disclosure supported the count in issue. In support of this contention it is argued by counsel for appellant that appellee's application does not disclose a door-check "adapted to attain a condition of initial strain when the door has reached a relatively-wide opening," as provided in the count in issue, but, on the contrary,

> what he shows and describes is *consistent with the supposition* that he intended to portray that species of door-check *which is put under initial strain from the beginning of the door-opening movement and acts throughout that movement,* instead of during only a portion thereof, to impose a yielding resistance to the opening of the door. (Italics ours.)

It is further argued that Exhibit No. 1, introduced in evidence by appellee, consisting of a molded-rubber door-check with metal brackets at the ends for attaching it to the door and frame of an automobile, "is not in itself an embodiment of the issue."

In appellee's specification it is said:

> This invention relates to door checks such as are used for limiting the opening of doors of motor vehicles and consists of certain novel features of construction and combination of parts as hereinafter set forth.
>
> * * * * * * *
>
> For checking the outward swinging movement of the door,
>
> * * * * * * *
>
> From the foregoing description it will be readily apparent that I have provided a strong and durable and yet simple and inexpensive device that may be easily and quickly installed for yieldably and gradually checking the movement of doors, gates, windows and the like so that the ordinary shocks and jars due to the sudden checking of such elements is obviated entirely

We agree with the views of the tribunals below, as expressed by the Board of Appeals, that "There is nothing in the description to warrant the holding that Beck's strap is a door closer and [designed] for the purpose of closing the door or keeping the door closed."; and that Beck's disclosure supports the count in issue.

Each of the tribunals of the Patent Office has exhaustively considered the evidence in the record, much of it being set out in the decisions. Accordingly, we deem it unnecessary to set it out here, or to discuss it at length. With regard to the question of whether appellee, Beck, reduced the invention to practice prior to his filing date, the Examiner of Interferences and the Board of Appeals have reached different conclusions.

The record clearly supports the conclusion that Beck was the first to conceive the invention.

Furthermore, it appears from the record that Exhibit No. 1 and other door-checks like it were successfully used by appellee on various automobiles from the latter part of the year 1921 to a date later than June, 1923.

[2] In concluding its decision, the Board of Appeals has concisely stated our views of the evidence with regard to the question of Beck's reduction to practice prior to the filing date of appellant's application. We quote:

> We are unable to agree with the Examiner of Interferences that the tests of the hand-made door check and the molded check, Exhibit 1, were not sufficiently satisfactory to constitute a reduction to practice. Exhibit 1 was submitted to extensive tests on several cars. It embodies the issue and it appears to have stood up well. The Examiner of Interferences held that Beck's conduct in attempting to improve the device of Exhibit 1 shows he was not satisfied with it. Even so, this does not necessarily negative reduction to practice. To constitute a reduction to practice it is not necessary that the device be perfect or a commercial success. In most every art the pioneer invention is a crude affair which, while operative with sufficient success to constitute a reduction to practice, is capable of infinite improvement.
>
> In view of this conclusion that Beck had an actual reduction to practice prior to Pierson's filing date, it is unnecessary to consider whether Beck was diligent at the time of Pierson's filing date and subsequently thereto.

For the reasons stated, the decision is affirmed.

Affirmed.

Adverse Decisions in Interference

In interferences involving the indicated claims of the following patents final decisions have been rendered that the respective patentees were not the first inventors with respect to the claims listed:

Pat. 1,549,003, W. K. Howe, Train control, decided September 25, 1930, claims 1, 4, 5, 6, 8, 9, 10, 13, 15, and 16.

Pat. 1,701,220, G. H. Willis, Process of producing colored composite materials, decided October 16, 1930, claims 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, and 17.

Pat. 1,754,772, H. A. Sallop, Fastener, decided October 11, 1930, claims 1 and 3.

TRADE-MARKS

OFFICIAL GAZETTE, NOVEMBER 4, 1930

[VOL. 400. No. 1]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

Marks applied for "under the ten-year proviso" are registrable under the provision in clause (b) of section 5 of said act as amended February 18, 1911.

As provided by section 1 of said act, a fee of ten dollars must accompany each notice of opposition.

CLASS 1

Raw or Partly-Prepared Materials

Ser. No. 294,393. JULIUS LOEWITH, INC., New York, N. Y. Filed Jan. 4, 1930.

FORGET ME NOT

GENUINE

POULTRY LITTER

Applicant disclaims the words "Genuine Poultry Litter" apart from the trade-mark shown in the drawing.

For Peat Moss.

Claims use since Dec. 1, 1929.

Ser. No. 301,448. INDIANA LIMESTONE COMPANY, Bedford, Ind., and New York, N. Y. Filed May 28, 1930.

ILCO HUNTER VALLEY BUFF

No claim being made to the exclusive use of the word "Buff" apart from the mark as shown in the drawing.

For Building Stone as it Comes from the Quarry.

Claims use since May, 1926.

Ser. No. 301,450. INDIANA LIMESTONE COMPANY, Bedford, Ind., and New York, N. Y. Filed May 28, 1930.

ILCO HUNTER VALLEY GRAY

No claim is made to the exclusive use of the word "Gray" apart from the mark as shown in the drawing.

For Building Stone as it Comes from the Quarry.

Claims use since May, 1926.

Ser. No. 301,975. J. J. MAYOU FOUNDRY SUPPLY CO., Chicago, Ill. Filed May 31, 1930.

REX

For Foundry Supplies—Namely, Bentonite, Core Compounds, Core Blacking, Mold Wash, Sea-Coal Facing, Partings, Plumbago, Fire Clay, Refined and Ground Silicas, and Refractories, Such as Fire Brick.

Claims use since February, 1921.

Ser. No. 302,536. I. G. FARBENINDUSTRIE AKTIENGESELLSCHAFT, Frankfort-on-the-Main, Germany. Filed June 18, 1930.

Cosavult

For Partly-Prepared Unvulcanized Natural and Synthetic Rubber Coagulates.

Claims use since Jan. 20, 1928.

Ser. No. 304,579. THE RESINOUS PRODUCTS & CHEMICAL COMPANY, Philadelphia, Pa. Filed Aug. 13, 1930.

PARAPLEX

For Viscous, Resinous, or Rubberlike Condensation Product or Solution Thereof Used in the Production of Nitrocellulose Lacquers, Plastics, and Other Types of Coatings.

Claims use since July 7, 1930.

Ser. No. 304,958. I. G. FARBENINDUSTRIE AKTIENGESELLSCHAFT, Frankfort-on-the-Main, Germany. Filed Aug. 23, 1930.

Agfa

For Raw and Partly-Prepared Artificial Textile Fibers and Imitation Horsehair.

Claims use since November, 1929.

Ser. No. 305,786. OCKLAWAHA NURSERIES, INC., Lake Jem, Fla. Filed Sept. 17, 1930. Under 10-year proviso.

PEDIGREED

For Citrus Trees—Namely, Seedless Orange, Early Improved Seedless Orange, Parson Brown Orange, Ruby Blood Orange, Valencia Late Orange, King Orange, Pineapple Orange, Satsuma Orange, Dancey Tangerine, Grapefruit, Prolific Grapefruit, Improved Prolific Grapefruit, Early Improved Prolific Grapefruit, anad Marsh Seedless Grapefruit.
Claims use since 1893.

Ser. No. 306,091. THE DEFORD COMPANY, Baltimore, Md. Filed Sept. 26, 1930.

DECOFLEX

For Leather.
Claims use since October, 1928.

CLASS 4

Abrasive, Detergent, and Polishing Materials

Ser. No. 287,425. GEO. RASMUSSEN CO., Chicago, Ill. Filed July 20, 1929.

FORT DEARBORN

For Scouring Powder.
Claims use since 1914.

Ser. No. 301,366. D. STANLEY SEIBEL, doing business as M-De-S Laboratories, Kansas City, Mo. Filed May 27, 1930.

M-De-S

For Germicidal Soap.
Claims use since Jan. 15, 1930.

Ser. No. 302,650. GERMAIN H. STADELMAN, Jamaica, N. Y. Filed June 20, 1930.

AUKA

For Metal Polish.
Claims use since May 5, 1930.

Ser. No. 304,574. PERCIVAL SPECIALTY COMPANY, Foxboro, Mass. Filed Aug. 13, 1930.

NU-SILVER

In the drawing the horizontal lines indicate a blue color and the vertical lines indicate a red color. No claim is made to the exclusive use of the term "Nu-Silver" apart from the mark shown in the drawing.
For Preparation for Cleaning and Polishing Metal.
Claims use since June 2, 1930.

UPSON-WALTON

For Manilla Rope.
Claims use since 1926.

CLASS 10

Fertilizers

Ser. No. 302,555. THE W. A. SIMPSON COMPANY, Baltimore, Md. Filed June 18, 1930.

LAWNSPUR

For Fertilizer.
Claims use since January, 1930.

Ser. No. 305,820. MERCHANTS FERTILIZER & PHOSPHATE COMPANY, Charleston, S. C. Filed Sept. 18, 1930.

GARDENGRO!

For Plant Food and Fertilizer for Gardens, Pot Plants, Lawn Cultivation, Etc.
Claims use since July 1, 1930.

CLASS 12

Construction Materials

Ser. No. 296,627. THE BEST BROTHERS KEENE'S CEMENT COMPANY, Medicine Lodge, Kans. Filed Feb. 28, 1930.

For Casting, Finishing, Molding, and Gauging Plaster.
Claims use since Feb. 4, 1930.

Ser. No. 303,208. EMIL POEGEL, Newark, N. J. Filed July 7, 1930.

For Plastic Coating for Buildings.
Claims use since Jan. 1, 1929.

Ser. No. 304,295. PERMA-GREEN COMPANY, INC., Kansas City, Mo. Filed Aug. 6, 1930.

PERMA-GREEN

No claim is made to the word "Green" apart from the mark shown in the drawing.
For Coverings for Miniature Golf Courses Comprising a Mixture of Shredded Wood, Wood Wool, or Wood Fibre Incorporated with a Coloring Material and Binder to Produce a Matted Surface.
Claims use since May 10, 1930.

Ser. No. 304,500. FISH-SCHURMAN CORPORATION, New York, N. Y. Filed Aug. 12, 1930.

DENSO-TEK

For Plastic Protective Nonrusting and Waterproof Composition and Tape and Fabric Impregnated or Coated Therewith Which is Applied to Metal Pipes or Parts to Prevent Same from Corroding.
Claims use since June 26, 1930.

Ser. No. 304,924. MIDWEST BRICK COMPANY, Ottawa, Ill. Filed Aug. 22, 1930.

RISTOKOTTA

For Brick and Like Wall Building Blocks.
Claims use since July 17, 1930.

Ser. No. 305,070. ALBERT M. COLEMAN, doing business as Coleman Equipment Company, Boston, Mass. Filed Aug. 27, 1930.

FROLJOINTS

For Plastic Compound for Sealing Joints.
Claims use since June 1, 1930.

Ser. No. 305,137. THE LOGAN-LONG COMPANY, Chicago, Ill. Filed Aug. 29, 1930.

SAFEWAY

For Outside Coverings Made of Flexible Felt and Impregnated with Asphaltum for Attachment to the Outer Walls of Buildings.
Claims use since Aug. 7, 1930.

Ser. No. 305,235. MOSINEE PAPER MILLS COMPANY, Mosinee, Wis. Filed Sept. 2, 1930.

CORDEX

For Paper Used for Steel Backing and Thermal Insulating Purposes.
Claims use since May 13, 1929.

Ser. No. 305,437. LAMELLA ROOF SYNDICATE, INC., New York, N. Y. Filed Sept. 8, 1930.

LAMELLA

For Structural Members for Constructing Roofs.
Claims use since Aug. 6, 1930.

Ser. No. 305,521. THE FLINTKOTE COMPANY, Boston, Mass. Filed Sept. 10, 1930.

NUBINALT

For Bituminous Emulsions.
Claims use since Apr. 25, 1930.

Ser. No. 305,650. BOTFIELD REFRACTORIES COMPANY, Philadelphia, Pa. Filed Sept. 13, 1930.

ADASET

For Refractory Cement.
Claims use since Mar. 3, 1930.

CLASS 13

Hardware and Plumbing and Steam-Fitting Supplies

Ser. No. 290,778. THE CONSOLIDATED EXPANDED METAL COMPANIES, Wheeling, W. Va. Filed Oct. 8, 1929.

HANK

For Lathers' Hairpins.
Claims use since Apr. 23, 1929.

Ser. No. 297,037. TUBE-TURNS INCORPORATED, Louisville, Ky. Filed Mar. 8, 1930.

TUBE-TURN

No claim is made to the word "Tube" apart from the mark as shown on the drawing.
For Metal Bent-Pipe Sections.
Claims use since Mar. 1, 1929.

Ser. No. 300,266. FOSTER WHEELER CORPORATION, New York, N. Y. Filed May 10, 1930.

FW

For Metal Tubes and Pipes and Expansion Joints.
Claims use since Jan. 16, 1930.

Ser. No. 305,865. LOUIS H. LEHMAN, doing business as The Lehman Sprayshield Company, Philadelphia, Pa. Filed Sept. 19, 1930.

"Don't Bathe in a Tent"

For Glass Shower-Stall Doors and Shower-Bath Shields.
Claims use since January, 1929.

Ser. No. 306,254. JAMES F. KING, Hillsgrove, R. I. Filed Mar. 3, 1930.

KING DIAMOND

For Metal-Pipe Unions.
Claims use since Feb. 4, 1930.

CLASS 14

Metals and Metal Castings and Forgings

Ser. No. 303,584. UNION STEEL CASTING COMPANY, Pittsburgh, Pa. Filed July 17, 1930.

"UNIVAN"

For Special-Alloy Steel Castings.
Claims use since Mar. 31, 1928.

Ser. No. 305,646. L. E. ZURBACH STEEL CO., Cambridge, Mass. Filed Sept. 12, 1930.

ZURCOSTEEL

For Sheet Steel.
Claims use since Feb. 1, 1930.

Ser. No. 305,830. S. & T. METAL CO., Chicago, Ill. Filed Sept. 18, 1930.

SATCO

For Lead Alloys.
Claims use since Dec. 1, 1929.

CLASS 15

Oils and Greases

Ser. No. 288,593. WILLIAM DRYPOLCHER, Bogota, N. J. Filed Aug. 16, 1929.

SPIROL

For Lubricating Oils and Greases.
Claims use since July 22, 1929.

Ser. No. 293,195. SHELL OIL COMPANY, San Francisco, Calif. Filed Dec. 3, 1929.

SHELL

AIRMOTOR OIL

No claim is made to the words "Airmotor Oil" apart from the mark shown in the drawing.
For Engine-Lubricating Oil.
Claims use since June 7, 1929.

Ser. No. 295,027. GOODOIL COMPANY, INC., Philadelphia, Pa. Filed Jan. 21, 1930.

GOODOIL

The drawing is lined to indicate the colors white and red. The exclusive right to the use of the words "Good Oil" is herein disclaimed apart from the mark shown in the drawing. No claim is herein made to the words "A Good Motor Oil."
For Lubricating Oils.
Claims use since Jan. 13, 1930.

CARNEGIE LIBRARY OF ATLANTA

Ser. No. 302,051. SHELL OIL COMPANY, San Francisco, Calif. Filed May 31, 1930.

SHELL

AIRMOTOR
Gasoline

The words "Airmotor Gasoline" are disclaimed apart from the mark shown on the drawing.
For Gasoline.
Claims use since Mar. 5, 1930.

Ser. No. 302,052. SHELL OIL COMPANY, San Francisco, Calif. Filed May 31, 1930.

SHELL

For Gasoline and Motor-Lubricating Oil.
Claims use since Mar. 5, 1930.

Ser. No. 304,168. VALVOLINE OIL COMPANY, Edgewater, N. J., and New York, N. Y. Filed Aug. 2, 1930.

VALVOLINE

ETC OIL

No claim being made to the exclusive use of the word "Oil" apart from the mark as shown.
For Lubricating Oils.
Claims use since May 28, 1930.

Ser. No. 305,485. KUEHNLE, INC., Philadelphia, Pa. Filed Sept. 9, 1930.

TOTEM

For Cup Grease, High-Pressure Grease, and Chassis Lubricant and Graphite Penetrating Oil.
Claims use since Aug. 12, 1930.

CLASS 16

Paints and Painters' Materials

Ser. No. 296,847. ALUMINUM COMPANY OF AMERICA, Pittsburgh, Pa. Filed Mar. 5, 1930.

For Aluminum Bronse Powder.
Claims use since Aug. 22, 1929.

Ser. No. 305,006. INTERNATIONAL CHEMICAL COMPANY, Chicago, Ill. Filed Aug. 25, 1930.

Dura Seal

The word "Seal" is disclaimed except as part of the mark shown.
For Preservative and Finish in the Nature of a Paint or Varnish for Articles and Constructions of Wood, Cork, Cement, Marble, Terrazzo, and Compositions.
Claims use since Apr. 9, 1929.

Ser. No. 305,076. THE GRASSELLI CHEMICAL COMPANY, Cleveland, Ohio. Filed Aug. 27, 1930.

DUOL

For Dry Colors for Paints.
Claims use since Feb. 16, 1928.

Ser. No. 305,394. E. I. DU PONT DE NEMOURS AND COMPANY, Wilmington, Del. Filed Sept. 6, 1930.

DU-LUX

For Wood Stains, Fillers; Dry Colors—Namely, Dry Aniline Wood-Stain Powders; Prepared Shellac, Varnishes, Thinners, Paint Enamels, Lacquers.
Claims use since Aug. 9, 1928.

CLASS 17

Tobacco Products

Ser. No. 302,228. THE AMERICAN TOBACCO COMPANY, New York, N. Y. Filed June 7, 1930.

LUCKY STRIKE CIGARS

No claim is made to the word "Cigars" except in connection with the mark as shown.
For Cigars.
Claims use since 1886.

Ser. No. 304,826. THOMAS E. OFIESH, doing business as Broadway Cigarette & Tobacco Co., Altoona, Pa. Filed Aug. 20, 1930.

BROADWAY

For Cigars, Cigarettes, and Smoking Tobacco.
Claims use since July 22, 1929.

Ser. No. 305,299. THE TOBACCO REHANDLING CO., LTD., Louisville, Ky. Filed Sept. 3, 1930.

SAM

For Leaf Tobacco.
Claims use since February, 1927.

CLASS 19

Vehicles, Not Including Engines

Ser. No. 303,675. WOLSELEY MOTORS (1927) LIMITED, Birmingham, England. Filed July 19, 1930.

HORNET

For Automobiles and Their Constructive Parts.
Claims use since Mar. 20, 1930.

Ser. No. 304,852. AMERICAN AUSTIN CAR COMPANY, INC., Butler, Pa. Filed Aug. 21, 1930.

AMERICAN AUSTIN

No claim is made in the use of the word "American" apart from and except in association with the other features of the mark shown in the drawing.
For Motor Vehicles—Namely, Touring Cars, Coupés, Roadsters, Sedans, Limousines, Taxicabs, Delivery Cars, Trucks, Chassis, and Constructive Parts Thereof.
Claims use since May 30, 1930.

Ser. No. 305,866. LEMPCO PRODUCTS, INC., Bedford, Ohio; New York, N. Y.; Chicago, Ill.; San Francisco, Calif.; Atlanta, Ga.; and Dallas, Tex. Filed Sept. 19, 1930.

LEMPCO

For Axle Shafts and Brake Drums.
Claims use since June, 1921.

CLASS 21

Electrical Apparatus, Machines, and Supplies

Ser. No. 295,324. THE APEX ELECTRICAL MANUFACTURING COMPANY, Cleveland, Ohio. Filed Jan. 29, 1930.

RŌTAREX

For Battery, Alternating-Current, and Crystal Radio Receiving Sets; Short-Wave Adapters; Screen-Grid Preamplifiers, Radio Frequency Oscillators, Radio Frequency Boosters, and Audiooscillators, Both Vacuum Tubes and Assembled Units; Wave Traps, Electric Phonograph Pick-Ups, Loud-Speakers, Vacuum Radiotubes; Single-Dial Connectors, Television Transmitting and Receiving Units.
Claims use since Nov. 18, 1929.

Ser. No. 299,081. ARTHUR C. PFAU, doing business as Eltyro Company, Cincinnati, Ohio. Filed Apr. 18, 1930.

Eltyro

For Electric Routing Tools for Use on Electrotypes and the Like.
Claims use since Feb. 18, 1930.

Ser. No. 301,993. NATIONAL BATTERY COMPANY, St. Paul, Minn. Filed May 31, 1930.

EAGLE

For Electric Batteries.
Claims use since Jan. 10, 1925.

Ser. No. 303,285. HARTWELL HAAS and J. O. FRANCIS HAAS, Chicago, Ill. Filed July 9, 1930.

TEL-O-MIKE

No exclusive claim is made to the word "Mike" and the representation of the goods apart from the mark shown in the drawing.
For Telephone Transmitter Silencers.
Claims use since June 20, 1930.

Ser. No. 303,791. SIMPLIMUS, INC., Boston, Mass. Filed July 24, 1930.

Simplimus

For Electrical Systems for Reproducing, Amplifying, and Projecting Sound from Records of the Phonograph Type or Films and Parts Thereof, Consisting of Electrical Pick-Up, Amplifiers, Photoelectric Cells, Sound Gates, Aperture Plate and Pressure Pad, Tone Controls, Lens, Tubes, Light-Reflecting Mirrors, and Sprocket and Film Rollers.
Claims use since May 15, 1929.

Ser. No. 303,800. BOND ELECTRIC CORPORATION, Jersey City, N. J. Filed July 25, 1930.

INDUSTRIALITE

For Electric Flash Lights.
Claims use since Mar. 12, 1928.

Ser. No. 304,224. SUMMIT MANUFACTURING COMPANY, Davenport, Iowa. Filed Aug. 4, 1930.

SUMMIT

For Electrically-Heated Water Heaters.
Claims use since Apr. 16, 1929.

Ser. No. 304,675. WESTERN AUTO SUPPLY AGENCY, Los Angeles, Calif. Filed Aug. 15, 1930.

WASCO

The lines shown on the drawing indicate shading only.
For Storage Batteries and Parts Therefor.
Claims use since Aug. 1, 1930.

Ser. No. 305,498. SCOVILL MANUFACTURING COMPANY, Waterbury, Conn. Filed Sept. 9, 1930.

SCOVILL

For Flash Lights and Radiocondensers.
Claims use since Feb. 14, 1930.

Ser. No. 305,515. COLUMBIA RADIO CORPORATION, Chicago, Ill. Filed Sept. 10, 1930.

TROJAN

For Radio Receiving Sets, Vacuum or Electron Tubes and Radio Speakers.
Claims use since July 8, 1930.

CLASS 22

Games, Toys, and Sporting Goods

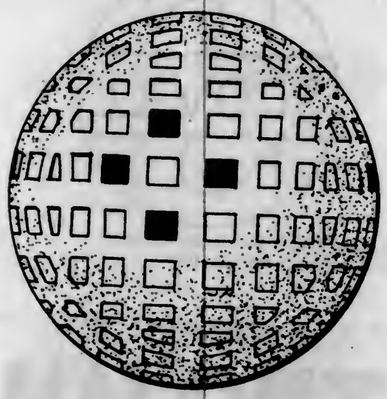
Ser. No. 303,351. THERMO INSTRUMENT COMPANY, INC., Norfolk, Va. Filed July 10, 1930.

GOLFTAB

For Device for Use in Recording the Events in a Game Such as Golf.
Claims use since Feb. 14, 1930.

Ser. No. 303,474. FRANK R. HANSON, Seattle, Wash. Filed July 14, 1930.

Publici-Tee



No claim is made to the word "Tee" apart from the mark as shown.
For Golf Tees.
Claims use since June 15, 1930.

Ser. No. 303,872. JAY B. BASSETT, Beverly Hills, Calif. Filed July 28, 1930.

WEE-WEE

For Portable Golf Games, Comprising Portable Fairways and Hazards in Connection with Which the Usual Golf Ball and Putter are Employed.
Claims use since July 16, 1930.

Ser. No. 303,882. ENDICOTT JOHNSON CORPORATION, Endicott, N. Y. Filed July 28, 1930.

No claim is herein made to the representation of the golf ball which is shown in the drawing merely to exemplify the mark.
For Golf Balls.
Claims use since Apr. 14, 1930.

Ser. No. 304,285. ELMER HAKE, Covington, Ky. Filed Aug. 6, 1930.

GOLLUF

For Portable Indoor and Outdoor Golf-Green-Game Apparatus, Consisting of a Scoring Field, Ball, and Impeller for the Ball.
Claims use since July 16, 1930.

Ser. No. 304,646. WRIGHT & MCGILL COMPANY, Denver, Colo. Filed Aug. 14, 1930.

The word "Hooks" and the representation of a hook and leader are disclaimed for the purpose of this registration only.
For Fish Lures.
Claims use since Sept. 27, 1927.

Ser. No. 304,732. NESTOR JOHNSON MANUFACTURING COMPANY, Chicago, Ill. Filed Aug. 18, 1930.

ALL-AMERICAN

For Ice Skates and Skate Outfits, Consisting of Attached Shoe and Skate.
Claims use since Nov. 27, 1929.

Ser. No. 304,910. THE DENT HARDWARE COMPANY, Fullerton, Pa. Filed Aug. 22, 1930.

CALAMITY JANE

For Golf Clubs.
Claims use since Aug. 11, 1930.

Ser. No. 305,344. HAROLD W. DUTCHER, Asbury Park, N. J. Filed Sept. 5, 1930.

CAMEL

For Miniature Portable Golf Courses; Golf Ball, Clubs, and Accessories; Tennis Balls, Rackets, and Nets; Toy Baseball Outfits—Namely, Toy Bats, Balls, and Gloves; Bows and Arrows for Archery; and Toys and Games—Namely, Toy Baseball, Toy Archery, and Toy Golf, Not Including Board Games.

The drawing is lined to indicate the color red. No claim is made to the descriptive term "Golf" apart from the mark shown on the drawing.
For Hazards, Flags, Markers, and Finely-Divided Material Used in Making Artificial Playing Surfaces, All Sold as a Unit for Outdoor and Indoor Miniature Golf Courses.
Claims use since July 14, 1930.

Ser. No. 305,518. CHARLES C. FINN, doing business as The Gungoff Co., Seattle, Wash. Filed Sept. 10, 1930.

Gungoff

For Game Comprising a Table, a Projector, and a Movable Target.
Claims use since July 19, 1930.

CLASS 23

Cutlery, Machinery, and Tools, and Parts Thereof

Ser. No. 291,028. SEARS, ROEBUCK AND CO., Chicago, Ill. Filed Oct. 12, 1929.

ARMOR POINT

No claim is made to the word "Point" apart from the mark shown in the drawing.
For Plow Shares.
Claims use since July 25, 1929.

Ser. No. 298,994. HI-G-NIK DISHWASHER CO., Los Angeles, Calif. Filed Apr. 17, 1930.

Hi-G-niK

For Dishwashing Machines Made of Metal.
Claims use since July 9, 1929.

Ser. No. 300,620. ECLIPSE LAWN MOWER CO., Prophetstown, Ill. Filed May 16, 1930.

CENTURY

For Lawn Mowers.
Claims use since Apr. 30, 1930.

Ser. No. 300,627. HAMMEL, RIGLANDER-PENNANT CORPORATION, New York, N. Y. Filed May 16, 1930.

TIGRE DORÉ

For Jewelers' Saws.
Claims use since Oct. 28, 1929.

Ser. No. 303,871. THE BANTAM BALL BEARING COMPANY, South Bend, Ind. Filed July 28, 1930.

Applicant claims ownership of Reg. No. 56,912, issued Oct. 23, 1906. No claim is made to the bearing ball apart from the mark shown.
For Antifriction Bearings.
Claims use since June 9, 1930.

Ser. No. 304,429. GEO. D. ROPER CORPORATION, Rockford, Ill. Filed Aug. 9, 1930.

For Pumps—Namely, Farm Pumps, Such as House Pumps for Shallow Wells, Pitcher Spout Pumps, Hand-Lift and Force Pumps, Windmill-Lift and Force Pumps, Underground Force Pumps, Booster Reciprocating Pumps, Hand Tank Pumps, and Well Cylinders for the Foregoing; Other Pumps for Different Purposes, Such as Garage Pumps—Namely, Hand-Operated Double-Acting Pumps for Elevating Gasoline, Kerosene, and Oils from Underground Storage, and Boiler-Feed Pumps; Rotary Gear Pumps, Hand Operated or Power Driven, Suitable for Pumping a Wide Variety of Liquids Industrially and Otherwise; Hand Rotary Vane Pumps; and Shallow and Deep Well Water Systems and Pumps in General and Parts Thereof.
Claims use since 1927.

Ser. No. 304,799. ANDRE CAMPICHE, Lausanne, Switzerland. Filed Aug. 20, 1930.

HYDROGAZEUR

For Apparatus for Humidifying the Gaseous Charge in Internal-Combustion Engines.
Claims use since Nov. 26, 1929.

Ser. No. 304,866. GREENFIELD TAP AND DIE CORPORATION, Greenfield, Mass. Filed Aug. 21, 1930.

No claim is made to the representation of the drill or of the words "Copper Flute" as appearing on the drawing. The trade-mark consists in a copper-colored helical stripe congruent with the helical fluting of the drill and is shown on the drawing by the stipling in the said fluted portion.
For Twist Drills for Metal Working.
Claims use since July 2, 1930.

Ser. No. 305,842. THE ATWOOD MACHINE COMPANY, Stonington, Conn. Filed Sept. 19, 1930.

J

For Spinning and Twisting Spindles.
Claims use since Sept. 2, 1930.

Ser. No. 305,843. THE ATWOOD MACHINE COMPANY, Stonington, Conn. Filed Sept. 19, 1930.

A

For Spinning and Twisting Spindles.
Claims use since Sept. 2, 1930.

Ser. No. 305,844. THE ATWOOD MACHINE COMPANY, Stonington, Conn. Filed Sept. 19, 1930.

AD

For Spinning and Twisting Spindles.
Claims use since Sept. 2, 1930.

Ser. No. 305,845. THE ATWOOD MACHINE COMPANY, Stonington, Conn. Filed Sept. 19, 1930.

17

For Spinning and Twisting Spindles.
Claims use since Sept. 2, 1930.

CLASS 24

Laundry Appliances and Machines

Ser. No. 305,879. ROKOR COMPANY, Cleveland, Ohio. Filed Sept. 19, 1930.

ROKOR

For Dry-Cleaning and Laundry Machines Comprising a Combined Clothes Washer and Boiler.
Claims use since Aug. 7, 1930.

CLASS 26

Measuring and Scientific Appliances

Ser. No. 287,486. MASTERPHONE SOUND CORPORATION, Seattle, Wash. Filed July 22, 1929.

MASTER PHONE

The term "Phone" is hereby disclaimed aside from the association with the mark as shown.
For Unitary Machine or Apparatus for the Synchronous Production and Reproduction of Light and Sound Effects Known as the Talking Movies.
Claims use since Dec. 15, 1928.

Ser. No. 304,190. DIAMOND POWER SPECIALTY CORPORATION, Detroit, Mich. Filed Aug. 4, 1930.

DIAMOND

For Gauge Glasses, Water Columns, and Water Gauges.
Claims use since July 14, 1930.

Ser. No. 304,191. DIAMOND POWER SPECIALTY CORPORATION, Detroit, Mich. Filed Aug. 4, 1930.

For Gauge Glasses, Water Columns, and Water Gauges.
Claims use since July 14, 1930.

Ser. No. 305,345. EASTMAN KODAK COMPANY, Rochester, N. Y. Filed Sept. 5, 1930.

TRANSLITE

For Light-Sensitive Photographic Paper.
Claims use since Feb. 17, 1930.

Ser. No. 305,626. SQUARE D COMPANY, Detroit, Mich. Filed Sept. 12, 1930.

SQUARE D

For Voltage Testers.
Claims use since August, 1924.

Ser. No. 305,840. AMERICAN SPECTACLE COMPANY, INC., New York, N. Y. Filed Sept. 19, 1930.

For Optical Goods—Namely, Lenses, Spectacles, and Parts Thereof.
Claims use since Sept. 11, 1930.

CLASS 27

Horological Instruments

Ser. No. 300,645. MONTGOMERY WARD & CO., INCORPORATED, Chicago, Ill. Filed May 16, 1930.

Crest Line

For Watches.
Claims use since Feb. 6, 1929.

Ser. No. 305,563. ELGIN NATIONAL WATCH COMPANY, Chicago and Elgin, Ill. Filed Sept. 11, 1930.

Presentation

For Watches, Watch Movements, and Watchcases.
Claims use since Jan. 2, 1924.

CLASS 28

Jewelry and Precious-Metal Ware

Ser. No. 303,641. HEATH'S BEAD SHOP, INC., St. Petersburg, Fla. Filed July 19, 1930.

For Bead Necklaces and Strings of Beads for Personal Adornment.
Claims use since Oct. 1, 1929.

CLASS 29

Brooms, Brushes, and Dusters

Ser. No. 301,171. JULIUS V. HARPHAM, Lincoln, Nebr. Filed May 24, 1930.

No claim is made to the representation of the mit constituting a part of the mark shown in the drawing except in combination with the other features constituting the composite mark.
For Dusting Mittens.
Claims use since Nov. 8, 1928.

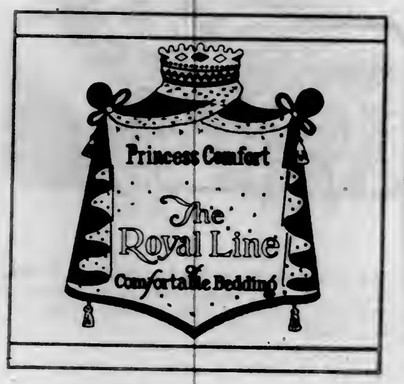
CLASS 31

Filters and Refrigerators

Ser. No. 301,707. SANITARY COTTON COMPANY, INC., Chicago, Ill. Filed May 29, 1930.

Exclusive use of the word "Milkloth" is disclaimed except in association shown in the drawing.
For Filter Bags Made of Cloth Manufactured from Cotton for Milk Filters Made of a Specially-Woven Fabric of High Efficiency as a Filter.
Claims use since Apr. 1, 1929.

Ser. No. 305,679. EDWARD RICE, JR., Philadelphia, Pa. Filed Sept. 13, 1930.



ICEFIN

For Refrigerating Apparatus.
Claims use since May 6, 1930.

CLASS 32

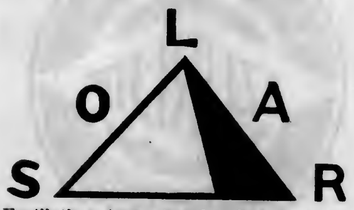
Furniture and Upholstery

Ser. No. 255,502. ELLISON FURNITURE & CARPET CO., Fort Worth, Tex. Filed Oct. 1, 1927.

Applicant disclaims the expression "Line of Comfortable Bedding" except in connection with other features of the mark.

For Cotton Mattresses, Springs, and Pillows.
Claims use since May 1, 1927.

Ser. No. 296,918. FRANCIS KARR, Holland, Mich. Filed Mar. 6, 1930.



AIRIA

For Pillows, Cushions, and Mattresses.
Claims use since Jan. 25, 1930.

CLASS 34

Heating, Lighting, and Ventilating Apparatus, Not Including Electrical Apparatus

Ser. No. 287,145. WILLIAM H. LUTTON COMPANY, Jersey City, N. J. Filed July 15, 1929.

For Ventilating Apparatus for Greenhouses—Namely, Roof and Side Ventilating Sash and Wall Ventilating Panels and Heating Systems for Greenhouses.
Claims use since Mar. 18, 1929.

Ser. No. 299,361. THE AIR-WAY SUPER HEATER COMPANY, Lexington, Ky. Filed Apr. 24, 1930.

The AIR-WAY
SUPER HEATER

The words "Super Heater" are disclaimed apart from the other features of the mark shown in the drawings.
For Coal-Burning Heaters, Stoves, and Furnaces.
Claims use since Mar. 1, 1930.

Ser. No. 300,170. THE CLEVELAND HEATER COMPANY, Cleveland, Ohio. Filed May 9, 1930.

The lining and hatching representing the colors red, blue, yellow, brown, and black in the mark are disclaimed as apart from the mark as shown in the drawing.
For Gas, Oil, and Vapor Burning Water Heaters and Their Structural Parts.
Claims use since August, 1928.

Ser. No. 300,171. THE CLEVELAND HEATER COMPANY, Cleveland, Ohio. Filed May 9, 1930.

CHIEF

For Gas, Oil, and Vapor Burning Heaters and Their Structural Parts.
Claims use since April, 1906.

Ser. No. 304,465. LIBERTY FOUNDRIES COMPANY, Rockford, Ill. Filed Aug. 11, 1930.

Hā Dees

For Space Heaters Generally of a Type Through Which Steam or Hot Water is Passed to Deliver the Heat Therefrom, and Parts Thereof and Deflectors Therefor.
Claims use since 1927.

Ser. No. 305,825. THORNTON W. PRICE, doing business as The Coal Carburetor Company, New Brunswick, N. J. Filed Sept. 18, 1930.

For Furnace-Controlling Device Comprising an Electrically-Operated Blower Having Connections by Which to Blow Air into the Furnace Partly Below the Fire Grate and Partly Above the Fire.
Claims use since Jan. 1, 1928.

CLASS 35

Belting, Hose, Machinery Packing, and Non-metallic Tires

Ser. No. 285,892. THE SIMPLEX PISTON RING COMPANY OF AMERICA, INC., Cleveland, Ohio. Filed June 20, 1929.

Slap-Chek

Applicant claims ownership of registration No. 255,218 issued Apr. 16, 1929. The word "Slap" is disclaimed apart from the other features of the mark.
For Ring Expanders for Use with Piston Rings.

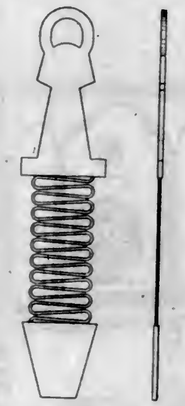
82,416. SHOE. FERDINAND W. ELLINGTON, Jamaica, N. Y., assignor to Delman, Inc., New York, N. Y., a Corporation of New York. Filed June 25, 1930. Serial No. 36,162. Term of patent 3½ years.

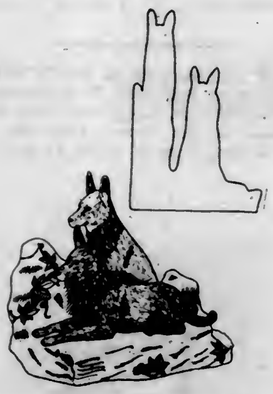
The ornamental design for a shoe as shown.

82,417. SHOE. FERDINAND W. ELLINGTON, Jamaica, N. Y., assignor to Delman, Inc., New York, N. Y., a Corporation of New York. Filed June 25, 1930. Serial No. 36,165. Term of patent 3½ years.



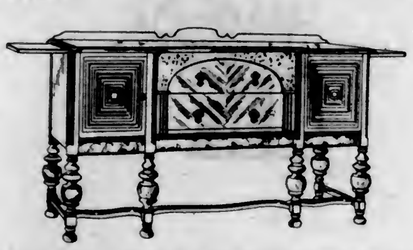
The ornamental design for a shoe as shown.

82,418. SHOE. FERDINAND W. ELLINGTON, Jamaica, N. Y., assignor to Delman, Inc., New York, N. Y., a Corporation of New York. Filed June 30, 1930. Serial No. 36,240. Term of patent 3½ years.



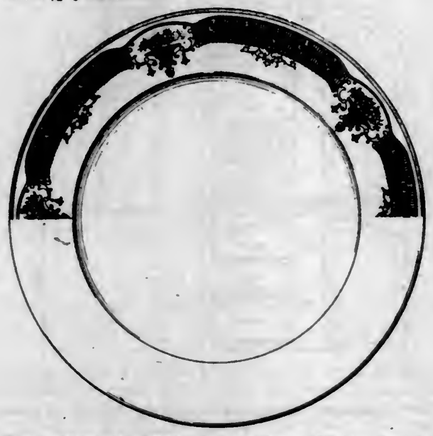
The ornamental design for a shoe as shown.

82,419. NECKTIE HOLDER. EMANUEL M. EISFELD, Rochester, N. Y., assignor to Braeburn of Rochester, Inc., Rochester, N. Y., a Corporation of New York. Filed Apr. 24, 1930. Serial No. 35,372. Term of patent 3½ years.



The ornamental design for a necktie holder, as shown.

82,420. LAMP. SAUL WILLIAM FRUCHTMAN, Brooklyn, N. Y., assignor to Everlite Novelty Mfg. Corp., a Corporation of New York. Filed Apr. 18, 1930. Serial No. 35,311. Term of patent 3½ years.



The ornamental design for a lamp substantially as shown.

82,421. BUFFET. FRED A. GLEICHAUF, Newark, Ohio. Filed Aug. 7, 1930. Serial No. 36,588. Term of patent 3½ years.

The ornamental design for a buffet as shown.

82,422. DISH OR SIMILAR ARTICLE. WILLIAM P. GRAHAM, New York, N. Y., assignor to Graham & Zenger, Inc., New York, N. Y., a Corporation of New York. Filed July 17, 1930. Serial No. 36,384. Term of patent 3½ years.

The ornamental design for a dish or similar article as shown and described.

82,423. ASH RECEPTACLE. ALBERT C. GRUNWALD, River Forest, Ill., assignor to Precision Metal Workers, Chicago, Ill., a Corporation of Illinois. Filed Sept. 6, 1930. Serial No. 36,886. Term of patent 14 years.

The ornamental design for an ash receptacle as shown.

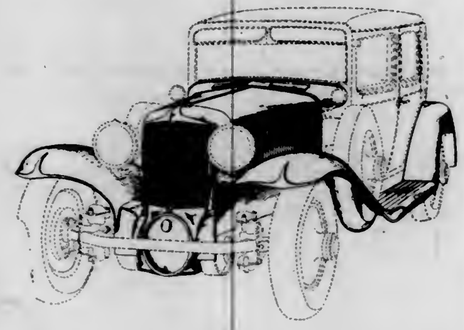
82,424. CLOCK OR THE LIKE. ERROL W. GOFF, Everett, Mass., assignor to Warren Telechron Company, a Corporation of Maine. Filed July 15, 1930. Serial No. 36,355. Term of patent 14 years.

The ornamental design for a clock or the like as shown.

82,425. STREET-LIGHTING FIXTURE. GEORGE ROLLO HARRIS, Los Angeles, Calif. Filed Aug. 5, 1929. Serial No. 32,307. Term of patent 3½ years.

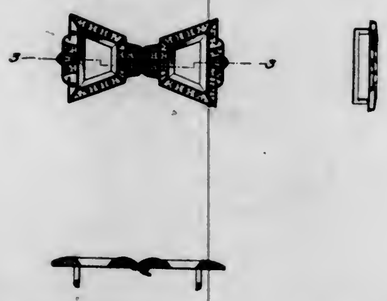
The ornamental design for a street lighting fixture, substantially as shown.

82,426. LAMP. HERBERT V. HENDERSON, Detroit, Mich., assignor to Chrysler Corporation, Detroit, Mich., a Corporation of Delaware. Filed Dec. 21, 1929. Serial No. 33,891. Term of patent 3½ years.



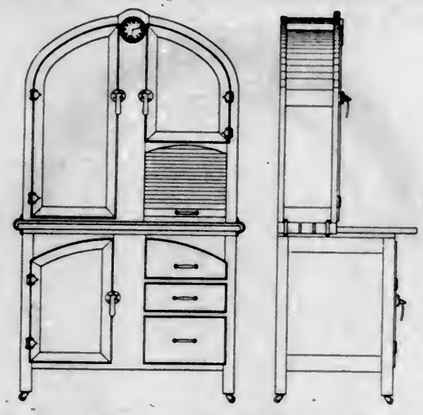
The ornamental design for a lamp substantially as shown.

82,427. AMUSEMENT-PARK BUILDING OR ANALOGOUS STRUCTURE. EMIL C. HOPPE, Elizabeth, N. J. Filed May 31, 1930. Serial No. 35,871. Term of patent 14 years.



The ornamental design for an amusement park building or analogous structure, as shown.

82,428. AUTOMOBILE. ALAN H. LEAMY, Auburn, Ind., assignor to Manning & Co., Chicago, Ill., a Corporation of Illinois. Filed June 24, 1929. Serial No. 31,807. Term of patent 7 years.



The ornamental design for an automobile, substantially as shown.

82,429. COSTUME JEWELRY CLASP. MORRIS LUCOMLIN, New York, N. Y. Filed Aug. 13, 1930. Serial No. 36,655. Term of patent 3½ years.

The ornamental design for a costume jewelry clasp as shown.

82,430. KITCHEN CABINET. JOSEPH F. KASPER, Louisville, Ky. Filed June 16, 1930. Serial No. 36,050. Term of patent 14 years.

The ornamental design for a kitchen cabinet as shown.

82,431. SALT AND PEPPER SHAKER. JESS CLAIR KELLY, Cambridge, Ohio. Filed Sept. 6, 1930. Serial No. 36,885. Term of patent 14 years.

The ornamental design for a salt and pepper shaker substantially as shown.

82,432. SHOE BUCKLE. CLIFFORD G. KING, Barrington, R. I., assignor to C. G. King & Co., Inc., Providence, R. I. Filed Aug 7, 1930. Serial No 36,584. Term of patent 3½ years.

The ornamental design for a shoe buckle as shown.

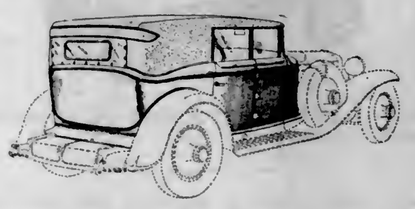
82,433. SHOE ORNAMENT. CLIFFORD G. KING, Barrington, R. I., assignor to C. G. King & Co., Inc., Providence, R. I. Filed Aug. 7, 1930. Serial No. 36,585 Term of patent 3½ years.

The ornamental design for a shoe ornament as shown.

82,434. BABY'S SHOE. PHILIPP KLAUER, Nuremberg, Germany, assignor to the Firm Vereinigte Schuhfabriken Berneis-Wessels A. G., Augsburg-Oberhausen, Germany. Filed July 8, 1929, Serial No. 31,960, and in Germany Mar. 23, 1929. Term of patent 7 years.

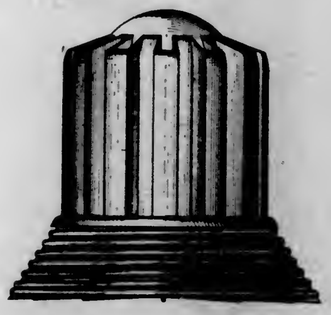
The ornamental design for a baby's shoe, as shown and described.

82,435. TOY TOP. JOHN M. KRAUSE, Los Angeles, Calif., assignor of one-half to Norman E. Hall, Los Angeles, Calif. Filed May 9, 1930. Serial No. 35,556. Term of patent 3½ years.



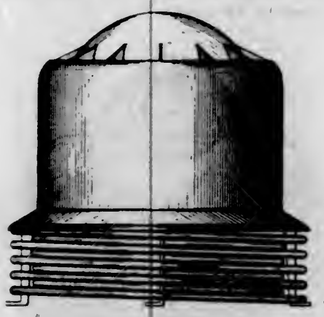
The ornamental design for a toy top as shown.

82,436. COMBINED MIRROR AND INSTRUMENT. WILLIAM LA HODNY, Buffalo, N. Y., assignor to Standard Mirror Company, Inc., Buffalo, N. Y., a Corporation of New York. Filed Aug. 29, 1930. Serial No. 36,822. Term of patent 14 years.



The ornamental design for a combined mirror and instrument as shown.

82,437. AUTOMOBILE. ALAN H. LEAMY, Auburn, Ind., assignor to Manning & Co., Chicago, Ill., a Corporation of Illinois. Filed June 19, 1929. Serial No. 31,759. Term of patent 7 years.

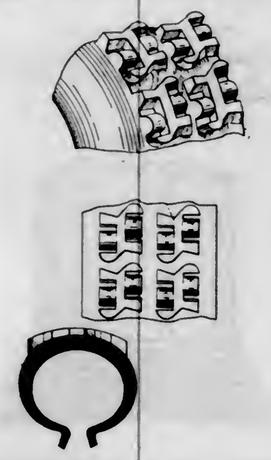


The ornamental design for an automobile substantially as shown.

82,438. REFRIGERATOR UNIT. EDWARD B. MALLORY, Tenafly, N. J. Filed Feb. 26, 1930. Serial No. 34,657. Term of patent 14 years.

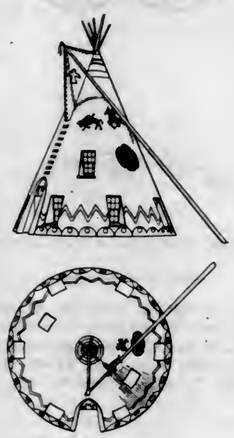
The ornamental design for a refrigerator unit as shown and described.

82,439. REFRIGERATOR UNIT. EDWARD B. MALLORY, Tenafly, N. J. Filed Feb. 26, 1930. Serial No. 34,659. Term of patent 14 years.



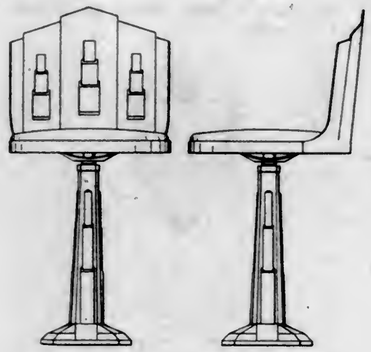
The ornamental design for a refrigerator unit as shown and described.

82,440. VEHICLE TOY. LOUIS MARX, New York, N. Y., assignor to Charles J. Correll and Freeman F. Gosden, Chicago, Ill. Filed Mar. 31, 1930. Serial No. 35,075. Term of patent 3½ years.



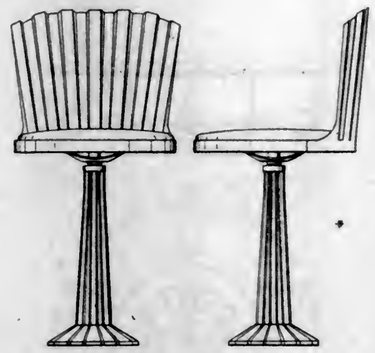
The ornamental design for a vehicle toy, substantially as shown and described.

82,441. TIRE. JOHN J. MCDONALD, West View, Pa. Filed Oct. 24, 1929. Serial No. 33,151. Term of patent 7 years.



The ornamental design for a tire as shown.

82,442. BUILDING. FRANK W. MCDONALD, Lawrence, Kans. Filed June 24, 1930. Serial No. 36,155. Term of patent 7 years.

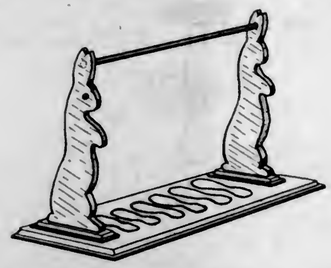


The ornamental design for a building as shown.

82,443. ROTARY CHAIR. JAMES J. MCGERRY, Grand Rapids, and CHARLES H. WHITING, Kalamazoo, Mich., assignors to Rotary Utility Corporation, Chicago, Ill., a Corporation of Illinois. Filed July 18, 1930. Serial No. 36,391. Term of patent 7 years.

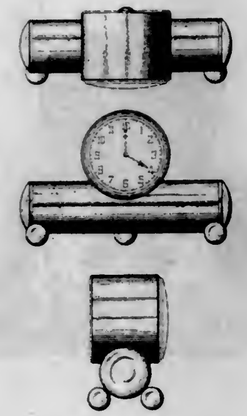
The ornamental design for a rotary chair, as shown.

82,444. CHAIR. JAMES J. MCGERRY, Grand Rapids, and CHARLES H. WHITING, Kalamazoo, Mich., assignors to Rotary Utility Corporation, Chicago, Ill., a Corporation of Illinois. Filed July 18, 1930. Serial No. 36,393. Term of patent 7 years.



The ornamental design for a chair, as shown.

82,445. SPANISH LACE FOR DRESSES. CHARLES B. J. MOLITOR, New York, N. Y. Filed Aug. 27, 1929. Serial No. 32,560. Term of patent 3½ years.



The ornamental design for Spanish lace for dresses as shown and described.

82,446. CHILD'S COSTUMER. GERTRUDE A. MULLER, Fort Wayne, Ind. Filed Aug. 19, 1929. Serial No. 32,445. Term of patent 3½ years.

The ornamental design for a child's costumer as shown.

82,447. CLOCK CASING. ROBERT P. NICHOLS, Port Chester, N. Y. Filed June 28, 1930. Serial No. 36,227. Term of patent 3½ years.

The ornamental design for a clock casing as shown.

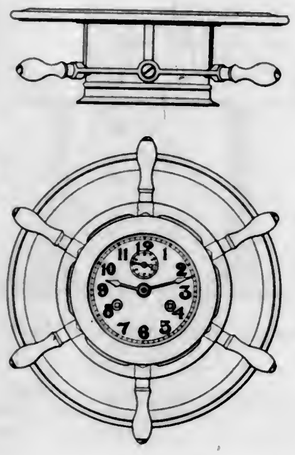
82,448. BADGE OR SIMILAR ARTICLE. HAILEY A. PROCTOR, Sylvia, Kans. Filed Aug. 12, 1930. Serial No. 36,643. Term of patent 14 years.

The ornamental design for a badge or similar article, as shown.

82,449. MAGAZINE COVER. WILLIAM D. ROSE, Portland, Oreg. Filed June 24, 1930. Serial No. 36,159. Term of patent 3½ years.

The ornamental design for a magazine cover, as shown and described.

82,450. RING. ABRAHAM SAGER, Chicago, Ill. Filed Jan. 16, 1930. Serial No. 34,149. Term of patent 14 years.



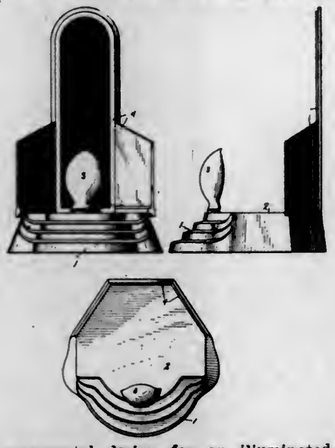
The ornamental design for a ring as shown.

82,451. TABLE-LIGHTING FIXTURE. BERNARD SCHAEFER, Cincinnati, Ohio. Filed May 9, 1930. Serial No. 35,547. Term of patent 7 years.

The ornamental design for a table lighting fixture, as shown.

82,452. CLOCK CASE. JOHN H. SCHAEFER, Grosse Pointe Park, Mich. Filed Apr. 4, 1930. Serial No. 35,165. Term of patent 7 years.

The ornamental design for a clock case substantially as shown.



82,453. COMBINED SAFETY-RAZOR HANDLE, BLADE SUPPORT, AND GUARD. JOHN T. SCULLY, New York, N. Y. Filed Feb. 5, 1930. Serial No. 34,409. Term of patent 14 years.

The ornamental design for a combined safety-razor handle, blade support, and guard, as shown.

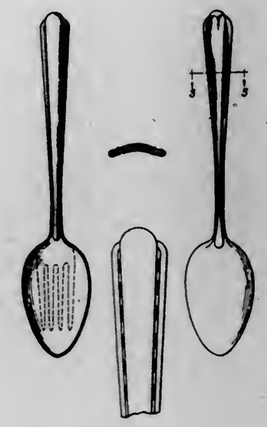
CARNEGIE LIBRARY OF ATLANTA

82,454. ILLUMINATED BASE FOR STATUARY AND THE LIKE. HYMAN SHAPIRO, Brooklyn, N. Y., assignor to Samuel Perla, Brooklyn, N. Y. Filed Aug. 5, 1930. Serial No. 36,555. Term of patent 7 years.

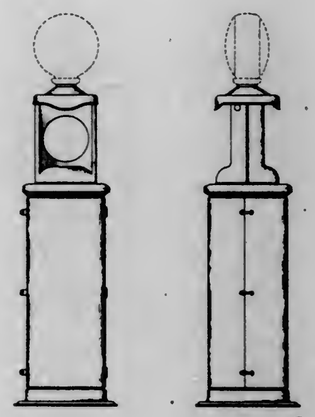
The ornamental design for an illuminated base for statuary and the like substantially as shown and described.

82,455. EDIBLE CONTAINER FOR ICE CREAM. BENJAMIN SMITH, Chelsea, Mass. Filed Oct. 30, 1929. Serial No. 33,221. Term of patent 7 years.

The ornamental design for an edible container for ice cream, as shown.

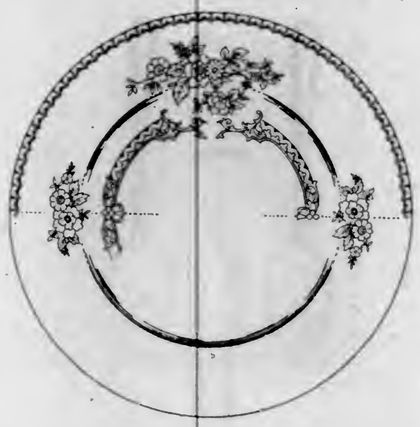


82,456. SHOE ORNAMENT. WALTER EDWARD SMITH, Warwick Downs. R. I., assignor to C. G. King & Co., Inc., Providence, R. I. Filed Aug. 5, 1930. Serial No. 36,565. Term of patent 3½ years.



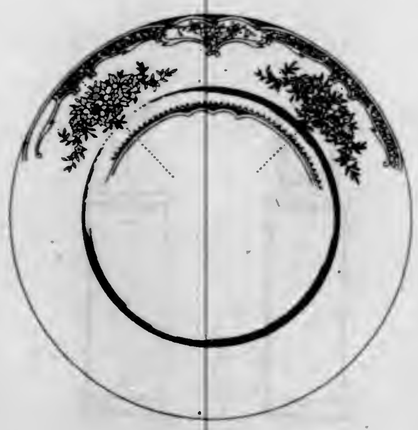
The ornamental design for a shoe ornament as shown.

82,457. SPOON OR SIMILAR ARTICLE. AXEL H. STAF, Providence, R. I., assignor to The Alvin Corporation, Providence, R. I. Filed May 24, 1930. Serial No. 35,741. Term of patent 14 years.



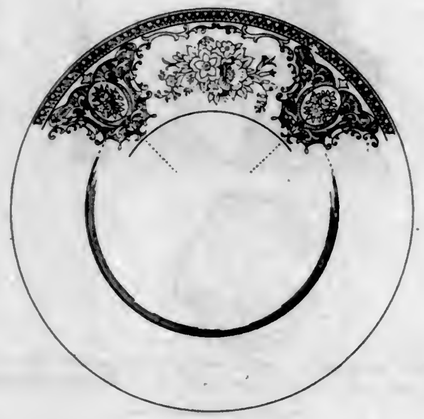
The ornamental design for a spoon or similar article as shown.

82,458. CASING FOR AN OIL PUMP. JACQUES STANITZ, Warren, Ohio, assignor to The Youngstown Pressed Steel Company, Warren, Ohio, a Corporation of Ohio. Filed Apr. 2, 1930. Serial No. 35,104. Term of patent 7 years.



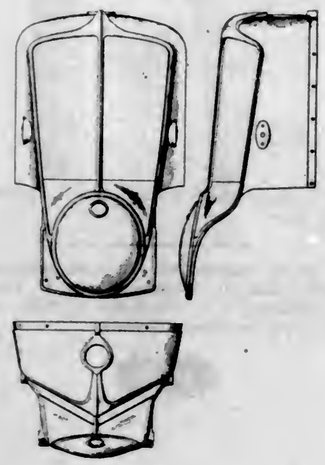
The ornamental design for a casing for an oil pump, as shown.

82,459. PLATE OR SIMILAR ARTICLE. URASABURO TOMITA, Astoria, N. Y., assignor to Morimura Bros. Inc., New York, N. Y., a Corporation of Japan. Filed Nov. 4, 1929. Serial No. 33,294. Term of patent 7 years.



The ornamental design for a plate or similar article, as shown and described.

82,460. PLATE OR SIMILAR ARTICLE. URASABURO TOMITA, Astoria, N. Y., assignor to Morimura Bros. Inc., New York, N. Y., a Corporation of Japan. Filed Nov. 4, 1929. Serial No. 33,296. Term of patent 7 years.



The ornamental design for a plate or similar article, as shown and described.

82,461. PLATE OR SIMILAR ARTICLE. URASABURO TOMITA, Astoria, N. Y., assignor to Morimura Bros. Inc., New York, N. Y., a Corporation of Japan. Filed Nov. 4, 1929. Serial No. 33,300. Term of patent 7 years.

The ornamental design for a plate or similar article, as shown and described.

82,462. RADIATOR SHELL. CORNELIUS W. VAN RANST, Auburn, Ind., assignor, by mesne assignments, to Manning & Co., Chicago, Ill., a Corporation of Illinois. Filed May 31, 1929. Serial No. 31,473. Term of patent 7 years.

The ornamental design for a radiator shell substantially as shown.

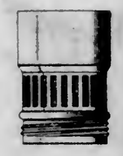
82,463. ASH TRAY OR SIMILAR ARTICLE. ARTHUR VON FRANKENBERG, New York, N. Y. Filed Aug. 16, 1930. Serial No. 36,681. Term of patent 7 years.

The ornamental design for an ash tray or similar article, substantially as shown.

82,464. RADIOCABINET. HARRY BACKER WARNER, Hagerstown, Md. Filed Nov. 11, 1929. Serial No. 33,420. Term of patent 14 years.

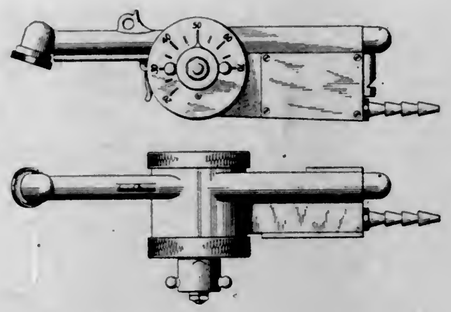
The ornamental design for a radiocabinet substantially as shown and described.

82,465. ELECTRIC-LAMP SOCKET. JOHN WEBER, Schenectady, N. Y., assignor to Weber Electric Company, Schenectady, N. Y., a Corporation of New York. Filed June 10, 1929. Serial No. 31,608. Term of patent 14 years.



The ornamental design for an electric lamp socket substantially as shown and described.

82,466. ELECTRIC-LAMP SOCKET. JOHN WEBER, Schenectady, N. Y., assignor to Weber Electric Company, Schenectady, N. Y., a Corporation of New York. Filed June 12, 1930. Serial No. 36,025. Term of patent 14 years.



The ornamental design for an electric lamp socket, substantially as shown and described.

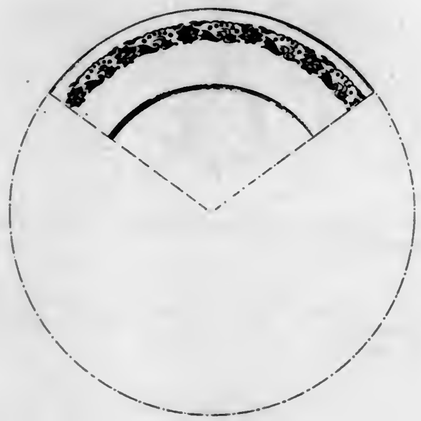
82,467. ELECTRIC-LAMP SOCKET. JOHN WEBER, Schenectady, N. Y., assignor to Weber Electric Company, Schenectady, N. Y., a Corporation of New York. Filed Aug. 29, 1930. Serial No. 36,819. Term of patent 14 years.

The ornamental design for an electric lamp socket, substantially as shown and described.

82,468. TIRE-INFLATION DEVICE. SIDNEY M. WEISBERG, Brooklyn, N. Y. Filed Aug. 21, 1930. Serial No. 36,730. Term of patent 14 years.

The ornamental design for a tire inflation device, as shown.

82,469. SHOE. FERDINAND W. ELLINGTON, Queens County, N. Y., assignor to Delman, Inc., New York, N. Y., a Corporation of New York. Filed June 25, 1930. Serial No. 36,166. Term of patent 3½ years.

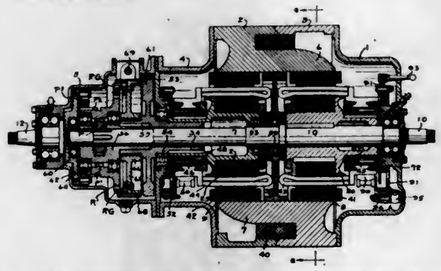


The ornamental design for a shoe as shown.

82,470. FINGER RING OR SIMILAR ARTICLE. JACOB BERLINGER, Brooklyn, N. Y. Filed Aug. 21, 1930. Serial No. 36,728. Term of patent 14 years.

The ornamental design for a finger ring or similar article, substantially as shown.

82,471. PLATE. BERNARD N. KANE, East Liverpool, Ohio, assignor to Warwick China Company, Wheeling, W. Va. Filed Sept. 16, 1930. Serial No. 36,984. Term of patent 7 years.

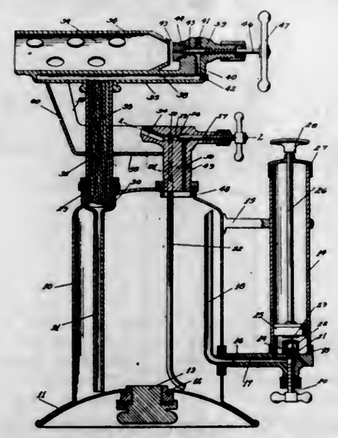


The ornamental design for a plate, as shown and described.

PATENTS

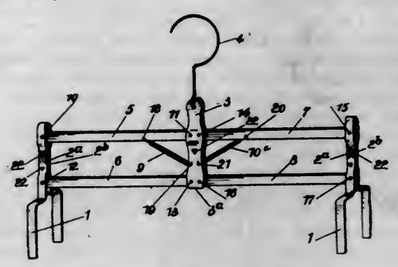
GRANTED NOVEMBER 4, 1930

1,780,150. ELECTROMAGNETIC TRANSMISSION MECHANISM. CHARLES E. F. AHLM, Cleveland, Ohio, assignor to Continuous Torque Transmission Company, Cleveland, Ohio, a Corporation of Delaware. Filed Apr. 29, 1926. Serial No. 105,445. 18 Claims. (Cl. 172—239.)



1. In a change speed gearing, the combination of two armatures, a common field therefor, a driving member connected with one armature, a driven member having a gear rigid therewith, a gear on the driving member and an internal external gear meshing with both said gears, an eccentric bearing for said internal external gear revoluble with and rigidly connected to the other armature.

1,780,151. PROCESS OF ESTERIFYING CELLULOSE. FRANZ BECKER, HEINRICH HEIMANN, and ALFONS BAYERL, Dessau in Anhalt, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany, a Corporation of Germany. Filed Dec. 22, 1928, Serial No. 328,050, and in Germany Dec. 24, 1927. 11 Claims. (Cl. 260—101.)

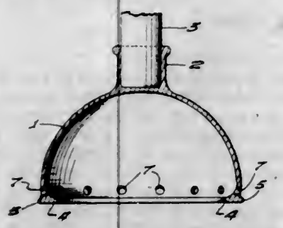


1. A process of producing cellulose esters which comprises treating a cellulose material with nitric acid vapor and reacting on the so pre-treated material with any esterifying agent.

1,780,152. BLOWTORCH. HENRY BIRNBAUM, Shelton, Wash. Filed Feb. 18, 1929. Serial No. 340,893. 2 Claims. (Cl. 158—33.)

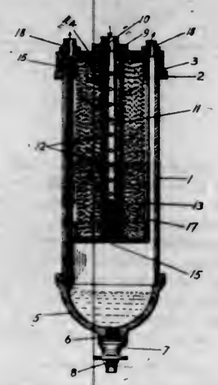
1. A blow torch comprising a closed receptacle constituting a fuel reservoir, pump means carried thereby and communicating therewith for placing the fuel under pressure, a tube mounted within the receptacle and extending from the top to a point near the bottom thereof, the upper end of said tube being enlarged, a wick tube detachably mounted within the enlarged upper end of said first named tube and containing a wick, a burner structure carried by the upper end of said wick tube and including a horizontally elongated generating chamber and a passage therebeneath, the passage communicating with the upper end of the wick tube, a valve nozzle forming part of the burner structure located beyond one end of the generating chamber and communicating with said passage, and a priming nozzle mounted on the receptacle in spaced relation to the wick tube and provided with a valve controlled outlet passage to which is connected a tube leading into and terminating near the bottom of the receptacle.

1,780,153. TROUSERS HANGER. KAREL FRANCSICS, Budapest, Hungary. Filed Oct. 16, 1928, Serial No. 312,889, and in Hungary Aug. 2, 1928. 3 Claims. (Cl. 223—67.)



1. A trousers hanger including a pair of stretching members adapted to be inserted in the lower ends of the legs of a pair of trousers, two guiding devices carrying the stretching members for ensuring of the simultaneously parallel movement thereof, each guiding device being in the form of a pivoted double rod parallelogram and of which each stretchng member forms a part, and segments formed on the adjacent ends of the rods of each parallelogram and intermeshing with each other so as to positively unite the guiding devices together.

1,780,154. MANUFACTURE OF HIGH-PURITY CARBON. DANIEL GARDNER, Ruell, France. Filed Oct. 10, 1927, Serial No. 225,403, and in Great Britain Mar. 5, 1927. 5 Claims. (Cl. 134—60.)

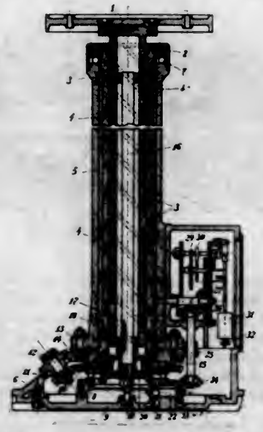


1. In the method of obtaining substantially chemically pure impalpable carbon from solid carbonized material containing organic and inorganic impurities, the steps comprising reducing said impure material to impalpability, and boiling same at ordinary pressures with caustic alkali solution of high concentration to render water-soluble any silica contained in said material and to render lime, magnesia, alumina, titanium oxide and like other impurities amenable to extraction by hot concentrated nitric acid, separating solids from said alkali solution, washing them with water to remove said soluble silica, treating the washed solids at elevated temperature with nitric acid of high concentration to extract such other impurities, removing the solid product and washing same, again reducing it to impalpability and heating it at temperatures of the order of 1000° to 1300° C. under nonoxidizing conditions to expel organic impurities and eliminate moisture.

1,780,155. WASHING DEVICE. FRED A. HAHN, East Moline, Ill. Filed July 19, 1929. Serial No. 379,495. 1 Claim. (Cl. 68—5.)

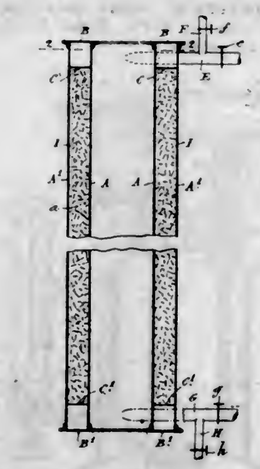
A washing device for the purpose set forth comprising a cup-shaped body of strong but compressible rubber, said body having the outer surface of its mouth flat and provided with an inwardly extending flange and an outwardly projecting bead, the body at the juncture of the bead or flange being thickened to render the beaded portion of the mouth practically non-yieldable and to permit of the inward yielding of the edge of the flange, said body above the flange and bead being provided with an annular series of openings whose walls are inclined downwardly, and a socket extension formed on the top of the body for the reception of an operating stick.

1,780,156. APPARATUS FOR EXTRACTING MOISTURE FROM AIR. FREDERICK ROBERT HALL, Arncliffe, near Sydney, New South Wales, Australia. Filed Oct. 10, 1928, Serial No. 311,689, and in Australia Nov. 10, 1927. 2 Claims. (Cl. 183—78.)



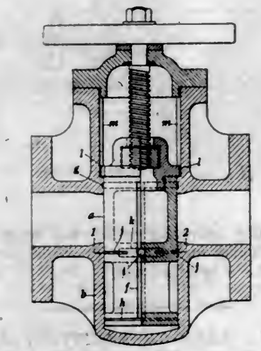
1. Apparatus for extracting moisture from air comprising a container, an air tight cover connected thereto and provided with a central threaded opening and with an opposed threaded opening near the outer edge thereof, a moist air inlet in communication with the central opening in said cover, a perforated moist air admission receptacle having one end threaded and engaged in the central opening and arranged within the container, a strainer consisting of a piece of wire gauze of spiral form within the container and surrounding the said receptacle, means associated with the container for the passage of water therefrom, and threaded nipple outlets engaged in the other openings in the cover for the passage of dry air from the container.

1,780,157. COMPOSITE LUBRICANT. JOHN ALLEN HIGGINS, St. Joseph, Mo., assignor to Emma Higgins, St. Joseph, Mo. Filed Mar. 3, 1927. Serial No. 172,572. 3 Claims. (Cl. 87—9.)



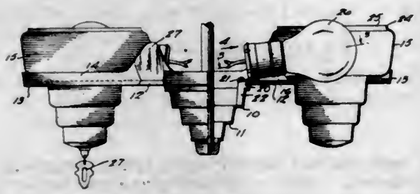
2. A composite lubricant comprising a mixture of substantially one pound of caoutchouc dissolved in gasoline, substantially twenty-five gallons of a neutral mineral lubricating oil and approximately eight ounces of cocoanut oil, added to and mixed with substantially fifty gallons of castor oil having substantially fifty gallons of cotton seed oil mixed therewith.

1,780,158. ADJUSTABLE STAND FOR ROTATABLE BALANCES. WILLY PAUL JENNY, Strasburg, Ohio, assignor to the Firm Exploration G. m. b. H., Hanover, Germany. Filed Jan. 16, 1929, Serial No. 332,899, and in Germany Jan. 9, 1928. 5 Claims. (Cl. 265—1.)



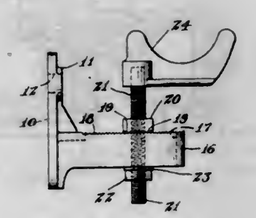
1. In an adjustable stand for a rotatable balance for executing geophysical measurement, a support of the measuring device, means for simultaneously turning and sinking said support and means for regulating such turning and sinking movements.

1,780,159. APPARATUS FOR THE HOT PURIFICATION OF GASES. ALFRED JOSEPH, Enghein, France, assignor to Compagnie Internationale pour la Fabrication des Essences et Petroles, Paris, France, a Company of France. Filed July 30, 1928, Serial No. 296,288, and in France Oct. 6, 1927. 6 Claims. (Cl. 183—4.)



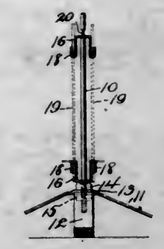
1. Apparatus for the purification of distillation gases comprising inner and outer tubular walls providing an annular space therebetween for the passage of distillation gases to be purified and said inner wall providing an open space enclosed therein, whereby heat is radiated from the surfaces of both of said walls, means forming annular chambers adjacent the ends of said walls for conducting gases to and from said space, and means for severally conducting and discharging distillation gases to be purified and regenerating gases to and from said chambers.

1,780,160. VALVE. ROBERT WILLIAM LEACH and WILLIAM HENRY BATEMAN, Newport, England. Filed Jan. 17, 1929, Serial No. 333,073, and in Great Britain Jan. 21, 1928. 2 Claims. (Cl. 251—62.)



1. In a valve, a body part having a passage, a cylindrical member slidable axially within said body part, the body part and cylindrical member having adjacent working faces, lubricant distributing channels in the body part and cylindrical member, said channels surrounding the valve passage, and means for supplying lubricant to the channels under pressure, certain of the channels moving out of communication with other channels when the movable member is moved from one position to another.

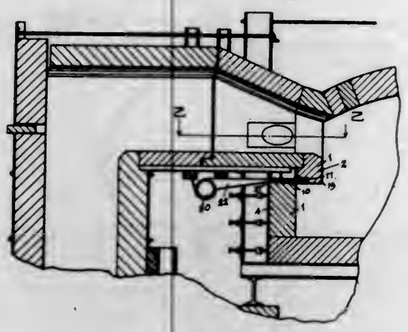
1,780,161. LIGHTING FIXTURE. HARRY AGLOW, Philadelphia, Pa., assignor to Gill Glass and Fixture Company, a Corporation of Delaware. Filed Mar. 2, 1929. Serial No. 344,065. 8 Claims. (Cl. 240—78.)



1. In a lighting fixture, a chandelier body having a central portion and narrow radially extending arms each terminating in a shade receiving and supporting basket, a lamp socket mounted on each arm with its axis substantially horizontal and the socket opening toward the corresponding basket, and a translucent glass shade fitted in each basket, the shades being open at the top and having side apertures to receive the lamp sockets and being freely removable from the chandelier body in the absence of lamp bulbs in the sockets without disturbing the sockets, the baskets and shades being spaced from one another so that the sides of the shades are visible from substantially all directions.

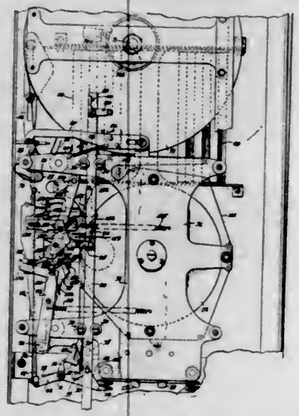
1,780,162. UNIVERSAL RADIATOR BRACKET. SAUL C. APPEL, Medford, Mass. Filed Nov. 27, 1928. Serial No. 322,219. 3 Claims. (Cl. 248—17.)

1. In a device of the kind described, the combination of a base provided with an elongated slot adjacent to one end, a member mounted on said base and extending laterally outward therefrom, said member being provided with an elongated slot, a plurality of parallelly arranged serrations in one surface of said member, a threaded member passing through said elongated slot, an internally threaded member mounted on said threaded member and provided with teeth for engaging in the serrations of the first said member, and an internally threaded nut on the threaded member cooperating with the first said internally threaded member and with the laterally extending member for clamping the threaded member in adjusted position on the laterally extending member and a supporting yoke carried on the threaded member.



1,780,163. STAND. CARL E. ANDERSON, East Orange, N. J., assignor to Eastern Tool & Mfg. Co., Bloomfield, N. J. Filed Jan. 23, 1929. Serial No. 334,544. 5 Claims. (Cl. 40—146.)

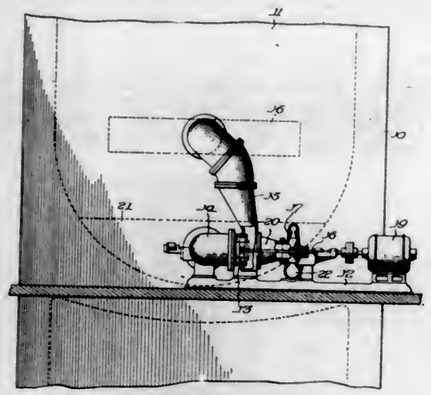
1. A stand comprising a post, a pair of legs of bridge-like form and adapted to be nested while on the post, and having holes through which the post passes, a stop on the post above the legs and a nut on the post underneath the legs.



3. A stand comprising a base and rotatable post thereon, a U-shaped clip on the post and having a hole in the cross-strip thereof to receive the post, the clip having an outwardly projecting bendable ear at the end thereof.

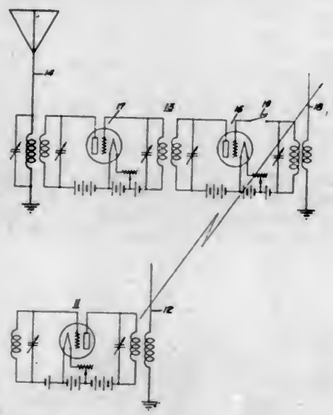
1,780,164. GLASS TANK. GEORGE W. BATCHTELL, Toledo, Ohio. Filed June 29, 1929. Serial No. 374,679. 7 Claims. (Cl. 49—54.)

1. In a glass tank formed of blocks, a metal plate protruding over and located in proximity to the surface of the glass, and means for protecting the upper surface of the plate from the heat of the furnace.



1,780,165. COIN-CONTROLLED WEIGHING MACHINE. HARRY S. BENJAMIN, Detroit, Mich. Filed Oct. 7, 1927. Serial No. 224,580. 19 Claims. (Cl. 194—35.)

1. In a machine of the character described, the combination of a weight printing wheel, a weighing platform, means operated by said platform for positioning said printing wheel, means for making an impression from said wheel, means for storing energy to operate said impression means, locking means for locking said energy storing means, means to actuate said locking means controlled by the operation of said platform for releasing said energy storing means, whereby said impression means will not operate to print from said printing wheel when there is no weight on the platform, and coin controlled means for controlling the operation of said releasing means.



1,780,166. AGITATOR. JOSEPH E. BOND, Appleton, Wis. Filed Mar. 14, 1928. Serial No. 261,555. 5 Claims. (Cl. 259–96.)

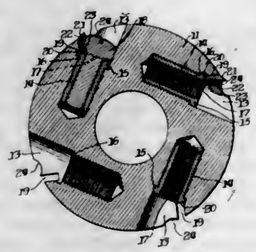
1. In combination, a storage tank, an agitating pump associated therewith, said pump developing a minimum head of the liquid treated, and a centrifugal pump connected to the outlet from the circulating pump, said

centrifugal pump operating under the head created by said agitating pump and serving to withdraw a quantity of the liquid for a specified use.

1,780,167. RADIO TRANSMITTING APPARATUS. WILLIAM M. BROWER, Palo Alto, Calif., assignor to Federal Telegraph Company, San Francisco, Calif., a Corporation of California. Filed Mar. 20, 1928. Serial No. 263,010. 1 Claim. (Cl. 250—17.)

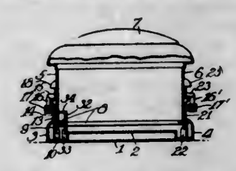
A radio station transmitting equipment comprising a main antenna, electron relay amplifying means having output and input circuits, the output circuit being coupled to said main antenna, said means serving to amplify oscillatory energy impressed upon its input circuit without integration, a relatively small local antenna coupled to said input circuit, a local master oscillator of the electron relay type and operative to generate oscillations of radio frequency, and another local antenna coupled to said oscillator, said last local antenna being sufficiently small as to have substantially no tendency to vary the frequency of the oscillator, said local oscillator and said last local antenna being electrically isolated from said amplifying means and said first local antenna and transferring energy thereto solely by radiation.

1,780,168. DEVICE FOR DISTRIBUTING FOAM FOR FIRE-EXTINGUISHING PURPOSES. HANS BURMEISTER, Berlin, Germany, assignor to Pyrene-Minimax Corporation, a Corporation of Delaware. Filed Sept. 10, 1927, Serial No. 218,808, and in Germany Sept. 25, 1926. 5 Claims. (Cl. 299—144.)



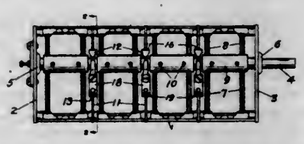
1. A fire foam distributing device comprising a duct with a plurality of foam outlets spaced along the length thereof, each outlet having a chamber projecting into the duct and adjustable to direct more or less foam to the outlet, the cross-sectional area of the duct being reduced in steps at the outlets.

1,780,169. SNAP-ON CLIP. WESTON F. CHADBOURNE, Franklin, Mass. Filed May 14, 1928. Serial No. 277,549. 7 Claims. (Cl. 152—14.)



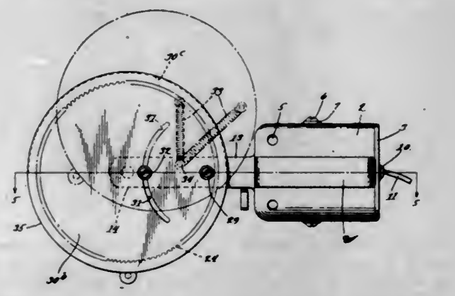
1. In a tire chain, a spring clip having a U-shaped yieldable body terminating at one side in a rolled yielding channel for detachably engaging one strand of a side link and at the other in a curved outwardly concaved flange for engaging the curved outer end of a cross chain hook.

1,780,170. CUTTER HEAD. ALEX A. CLARKE, Chicago, Ill. Filed June 21, 1928. Serial No. 287,311. 16 Claims. (Cl. 144—230.)



1. A cutter head of the class described having elongated slots across its peripheral face, cutter blades positioned in said slots, hollow screws secured in said head to constitute seats for said cutter blades and additional screws threaded in said hollow screws to detachably hold the cutter blades locked against said seats.

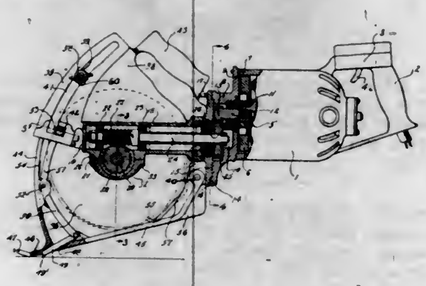
1,780,171. BURIAL-CASKET ATTACHMENT. JOHN Q. CLARKE, Crawfordsville, Ind. Filed Apr. 23, 1928. Serial No. 272,306. 5 Claims. (Cl. 27—2.)



1. A burial casket attachment comprising a hinge plate having foot members thereon, a handle plate hingedly connected to the hinge plate and provided with a handle bracket, and a handle having an arm connected to the bracket.

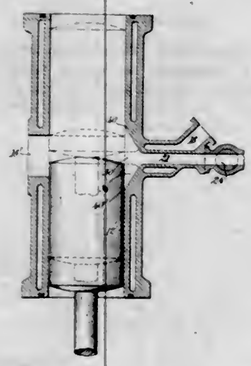
1,780,172. ELECTRICAL CONDENSER. STANLEY S. CRAMER, Haddon Heights, N. J., assignor to Radio Condenser Company, Camden, N. J. Filed May 10, 1929. Serial No. 361,943. 7 Claims. (Cl. 175—41.5.)

1. In an electrical gang condenser including; a frame, a plurality of groups of stator plates supported by the frame, a rotatable system comprising a single shaft supported by the frame and carrying a plurality of groups of rotor plates for cooperation with said stator groups, said shafts being supported by anti-friction bearings in said frame, and a device for applying a desired amount of friction to said rotatable system; said device consisting of at least two pieces guided by a part of the frame and embracing opposite portions of said shaft, and means for drawing the pieces toward each other to grip the shaft.



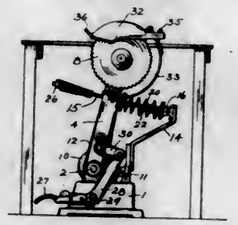
1,780,173. PORTABLE TOOL. JOHN M. CROWE, Covington, Ky., assignor, by mesne assignments, to The Stanley Works, New Britain, Conn., a Corporation of Connecticut. Filed Sept. 25, 1922. Serial No. 590,553. 4 Claims. (Cl. 143—43.)

3. In a portable power driven hand saw adapted to be applied bodily to and moved along the work by the operator, a frame, a rotary saw blade operatively mounted at the front thereof, a motor on said frame rearwardly



of and having driving connection with said blade, blade-guarding means pivoted to the frame between the blade and the motor and movable about said pivot in the plane of the blade to advance or retreat to guard or expose a cutting portion of the blade and having a portion adapted to travel along the work, and automatic means effective in all tool positions and tending to advance said guarding means.

1,780,174. PORTABLE POWER SAW. JOHN M. CROWE, Covington, Ky., assignor, by mesne assignments, to The Stanley Works, New Britain, Conn., a Corporation of Connecticut. Filed Jan. 16, 1928. Serial No. 247,056. 2 Claims. (Cl. 143—43.)

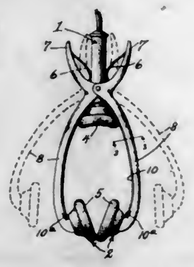


1. In a portable tool, a frame, a cutting blade operatively mounted thereon, means for operating said blade, guarding means adapted to advance or retreat to guard or expose a cutting portion of said blade, means tending to advance said guarding means, latch means for securing said guarding means against accidental retreat, said guarding means having a work-engaging portion with a forwardly and downwardly extending bore therein, means slidable longitudinally in said bore and positioned thereby and associated with said latch means to actuate the same, and extending longitudinally into the path of the work to be engaged thereby to release said guarding means.

1,780,175. TWO-CYCLE INTERNAL-COMBUSTION ENGINE. CHARLES G. CURTIS, New York, and EARLE R. NEWTON, Jamaica, N. Y. Filed Mar. 17, 1928. Serial No. 262,354. 8 Claims. (Cl. 123—61.)

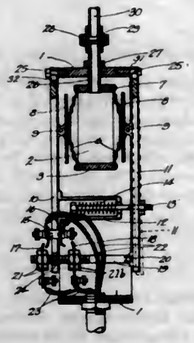
5. A two-cycle engine comprising a cylinder, exhaust ports, a bank of air inlet ports on one side of the cylinder, an inlet port in the middle section of the bank higher than the exhaust ports and arranged to deliver an air stream obliquely toward the cylinder cover, a valve for controlling said latter inlet port, the end inlet ports being lower than the exhaust ports and arranged to deliver air streams more nearly horizontally and toward that side of the cylinder in which the inlet ports are located, the arrangement being such that all the inlet ports open after the exhaust ports, that the end inlet ports close before the exhaust ports and the middle inlet port closes after the exhaust ports whereby a supercharge is established in the cylinder.

1,780,176. SAWING MACHINE. ARTHUR E. DE KONING, Portland, Oreg. Filed Feb. 25, 1928. Serial No. 256,931. 2 Claims. (Cl. 143—46.)



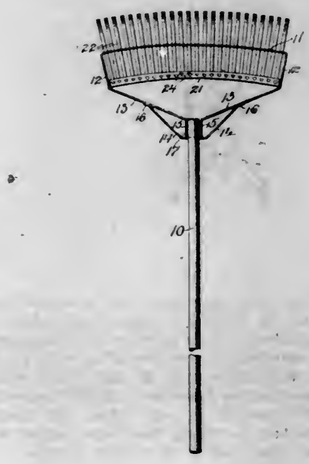
1. In sawing machines, a base, a saw carriage pivotally mounted thereupon, a rod pivotally attached to said base above the said pivotal attachment of the said saw carriage at one end extending through the said saw carriage and fitted with an adjusting screw and nut at its other end, a pair of oppositely disposed reflecting springs mounted upon said rod so as to engage the said saw carriage at either end of the stroke thereof, a relatively larger spring to return the said saw carriage to its position of equilibrium whereat said spring will be strained in neither direction, having a greater amplitude of movement in compression or extension than either one of said pair of reflecting springs, rigidly secured to the said saw carriage at one end and to the said base or an extension thereof at the other end and of such length relative to the said reflecting springs and the said rod as to be compressed when said saw carriage makes contact with one of said reflecting springs, and be extended when said saw carriage makes contact with the other of said reflecting springs, together with a treadle and connecting gear for oscillating said saw carriage.

1,780,177. BACK-PART STAY. WILLIAM J. DE WITT, Auburn, Mass., assignor to Shoe Form Co., Inc., Auburn, N. Y., a Corporation of New York. Filed June 11, 1929. Serial No. 370,028. 6 Claims. (Cl. 12—128.1.)



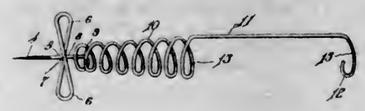
1. A back part stay for a shoe form comprising a tube of celluloid or similar material, and a resilient wire inserted into the hollow of the tube, one end of the wire projecting from the tube while the other end is encased, the ends of the back stay being formed into loops both offset from the body of the stay in the same direction.

1,780,178. TELEPHONE HEAD SET. ADIEL Y. DODGE, South Bend, Ind. Filed Apr. 22, 1929. Serial No. 357,027. 5 Claims. (Cl. 179—156.)



1. A transmitter and receiver construction comprising a transmitter, a receiver secured thereto comprising an ear-piece, means for yieldingly holding said ear-piece against the ear comprising a member engaging the other side of the head of the wearer and means for forcing said ear-piece and head-engaging member away from each other to facilitate positioning the ear-piece, comprising a pair of members movable toward each other to force the head-engaging member and ear-piece apart, said pair of members being close enough together to be grasped in one hand.

1,780,179. ADJUSTABLE HIGH AND LOW PRESSURE SWITCH ALARM. WILLIAM C. ELLIOTT, Minco, and EARL S. HENRY, Medford, Okla. Filed July 3, 1928. Serial No. 290,237. 5 Claims. (Cl. 200—83.)

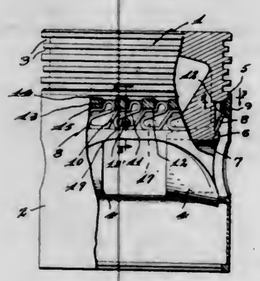


1. A device of the class described, comprising a three part union having therewithin perforated baffle plate means for controlling the sudden fluctuating pressures into and out of a pressure chamber, a pressure chamber having an opening connecting with said union, and having oppositely disposed side diaphragms hermetically sealed longitudinally of said chamber, said diaphragms being adapted for expanding and contracting upon the inflow and outflow of a liquid pressure thereagainst, a frame anchored intermediate said union and said pressure chamber having first and second swinging arms depending therefrom, said arms having pressure plates for contacting said diaphragms, means for adjustably holding said pressure plates against said diaphragms, an attaching rod in hinged relation to said first of said arms being adapted for free movement through a perforation in said second arm; said attaching rod being adapted for anchoring a high and a low contacting point with said second arm therebetween, said second arm having a high and a low contacting point respectively on its sides, said high contacting points being adapted to close an electric circuit upon the occurrence of a predetermined position, and to break said circuit in all other positions, and said low contacting points being adapted to close an electric circuit upon the occurrence of a predetermined position, and to break said circuit in all other positions.

1,780,180. RAKE. HENRY W. FALSTROM, Bloomfield, N. J., assignor to Eastern Tool & Manufacturing Company, Bloomfield, N. J. Filed Dec. 15, 1927. Serial No. 240,163. 3 Claims. (Cl. 55—10.)

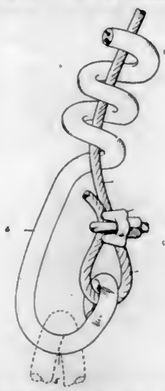
1. A rake comprising a frame formed of a flat strip bent so as to provide a front bar with converging rearwardly extending side bars and which connect with inwardly extending braces which are provided with return bends with the ends of the strip secured to the braces, a rear bar connected to the side bars in rear of the front bar, and tines passing through slits in the front bar and the rear bar and with their rear ends bent over on the rear bar to hold the tines in place and providing a ready releasing means for a broken tine.

1,780,181. TREE-BRANCH HOLDER. CHARLES A. FASSEN, Detroit, Mich. Filed Mar. 15, 1928. Serial No. 261,756. 4 Claims. (Cl. 41—15.)



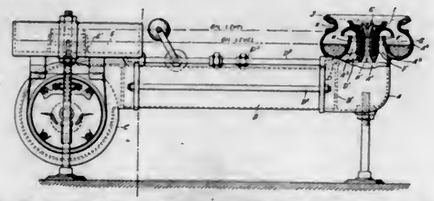
1. A holder having a pointed end, a series of convolutions, an arm extending outwardly from the outermost extremity of said convolutions, and a hook on the end of said arm, the convolutions being adapted to receive the end of an inserted member, and the hook being adapted to engage said inserted member at a remote point from the convolutions.

1,780,182. HAIR AND SCALP TREATING APPARATUS. ERNEST O. FREDERICS, New York, N. Y., assignor to E. Frederics, Inc., New York, N. Y., a Corporation of New York. Filed Dec. 8, 1926. Serial No. 153,300. 16 Claims. (Cl. 34—16.)



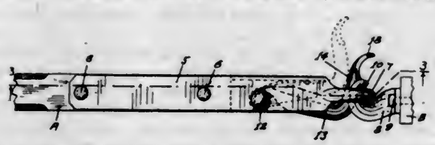
2. A hair-drying machine, including, in combination, a standard, means for forcing a current of gaseous fluid through said standard, a pair of elbow members, one connected to said standard, means providing an outlet member connected with the second of said elbow members, means for connecting the inner ends of said elbows to rotate axially with respect to each other, and means for locking said members to remain fixed with respect to each other in at least one position of relative rotation.

1,780,183. PISTON. PHELPS M. FREER, Detroit, Mich. Filed June 17, 1929. Serial No. 371,577. 9 Claims. (Cl. 74—108.)



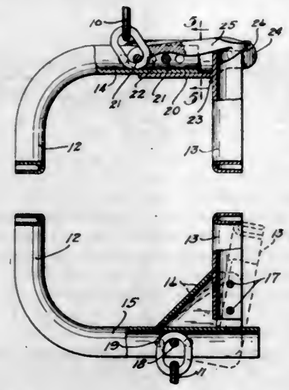
1. In a piston, the combination with head and skirt members, of means for securing said head and skirt members together, including a wire, said means associated with said wire and one of said head and skirt members for establishing a cam engagement therebetween upon relative rotation of said last mentioned member and said wire.

1,780,184. CABLE-TERMINAL HOOK. KENNETH GLEASON, Hibbing, Minn. Filed Sept. 27, 1929. Serial No. 395,641. 1 Claim. (Cl. 24—123.)



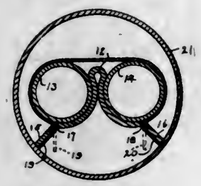
A hook of the class described, helically shaped at one end, and having a hook at the opposite end terminating in an eye, an elongated substantially straight body portion intermediate the hooked end and the helical portion, the axis of the eye being at an angle to the axis of the hook for the purpose described.

1,780,185. OIL BURNER. ALBERT E. GRANT, New York, N. Y., assignor to Grant Heat Machine Corporation, New York, N. Y., a Corporation of Delaware. Filed Feb. 11, 1928. Serial No. 253,580. 2 Claims. (Cl. 158—92.)



1. In combination, two independent oil burners located adjacent to each other and adapted to be operated separately or simultaneously, an air chamber and conduits for air leading therefrom to each of said burners, said burners comprising annular chambers for oil, one of which is open and exposed at its upper end directly to the atmosphere, and means for deflecting air from said air chamber downwardly into said open annular oil chamber to provide a fuel mixture.

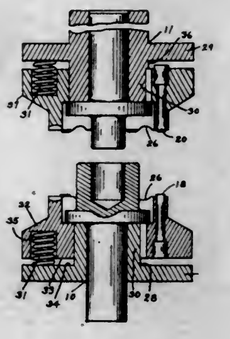
1,780,186. HITCH. JOHN L. HAGEL, St. Paul, Minn., assignor to The Hagel Wagon Spring Bolster Co., St. Paul, Minn., a Corporation of Minnesota. Filed Nov. 1, 1929. Serial No. 404,150. 4 Claims. (Cl. 280—33.15.)



1. A hitch for detachably connecting a tongue to the rear of a pulling vehicle, comprising a hook member secured to the vehicle, a bracket member secured to the tongue and having a curved bar portion for engagement with the hook, a lever member carried by the bracket for engagement against the hook, said hook being provided at its rear with a recess to receive the lever.

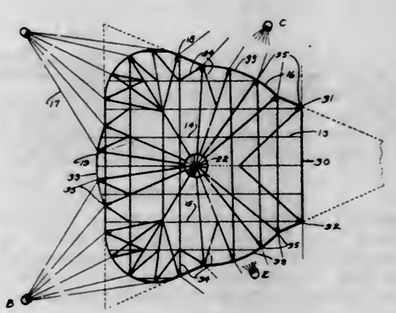
1,780,187. STANCHION. CASPER F. HANSON, Albert Lea, Minn., assignor to Olson Manufacturing Company, Albert Lea, Minn., a Corporation of Minnesota. Filed Mar. 8, 1928. Serial No. 260,011. 8 Claims. (Cl. 119—147.)

1. A stanchion comprising main and secondary side members, top and bottom members, a latch in the top member for the secondary side member, and a hinge fitting connecting the secondary side member to the bottom member for outward swinging movement from a closed position in the plane of the stanchion, said hinge fitting having guide flanges that engage the bottom member and direct the secondary side member to the latch during its closing movement.



1,780,188. SUPERHEATER BRACKET. ERNEST A. HILDEBRANDT, Indianapolis, and CHARLES MCDONAUGH, Beech Grove, Ind. Filed July 23, 1928. Serial No. 294,667. 3 Claims. (Cl. 248—34.)

1. A pipe bracket for maintaining pipes in spaced alinement comprising a piece of sheet metal formed to have a shoulder conforming to the curvature of the pipes, the metal being carried from the shoulder around and upwardly between one pipe and the next adjacent pipe and thence bent around back against itself to return between the same two pipes forming a separator between the pipes and to continue around under the second pipe to form a shoulder thereunder, both shoulders of the bracket terminating close to vertical planes through the centers of their respective pipes, said separator having a greater thickness above than at a plane through the center lines of the pipes, and legs extending from the shoulders having slots at their junctions with the shoulders.

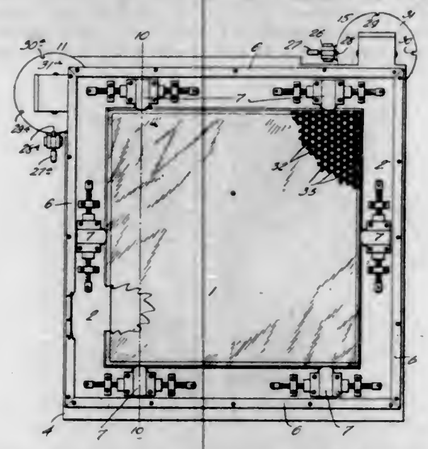


1,780,189. RIVETING STAYS OR RIVETS IN BALL BEARINGS. GEORGE O. HODGE, Plainville, Conn., assignor to Standard Steel and Bearings Incorporated, Plainville, Conn., a Corporation of Delaware. Filed Nov. 17, 1928. Serial No. 320,163. 1 Claim. (Cl. 78—49.)

In riveting the stays or rivets for the cage members of ball bearings, upper and lower die structures provided with mating guide means, and each of said die structures being composed of a main part and a moving part arranged for relative sliding movement in the axial direction, spring means operating to position said moving part normally generally in an advanced position relatively to said main part, said moving part being provided with

a set of concave seats for receiving convex portions of a cage member, and riveting means loosely carried by said moving parts positioned between said seats and adapted to be actuated by said main parts, whereby upon initial movement of said die structures to clamp ball bearing cage members, said riveting means will yield and thereafter be actuated by the further advance of said main parts.

1,780,190. PARACHUTE. EDWARD L. HOFFMAN, Dayton, Ohio. Filed Aug. 28, 1929. Serial No. 389,055. 8 Claims. (Cl. 244—21.) (Granted under the act of Mar. 3, 1883, as amended Apr. 30, 1928; 370 O. G. 757.)

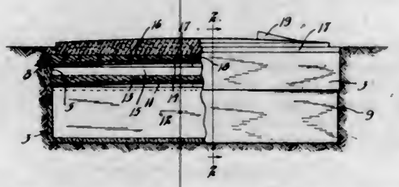


6. A parachute comprising a canopy having a flat single sustaining surface, suspension lines attached to said canopy and means offset from the center of the area of said canopy when inflated for laterally venting the air from the side thereof to propel said parachute substantially horizontally.

1,780,191. APPARATUS FOR MAKING PHOTOGRAPHIC FRACTIONAL EXPOSURES. WILLIAM C. HUEBNER, Chicago, Ill. Filed May 28, 1928. Serial No. 281,185. 9 Claims. (Cl. 95—36.)

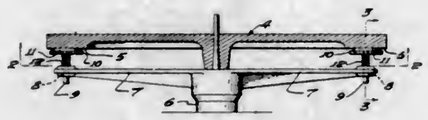
1. The combination of a screen for fractional exposure of a sensitized surface, which screen has its area composed of transparent units and opaque units arranged in such an order that by adjusting the screen from one position to another with a right line movement in two

directions from a given point a transparent unit and an opaque unit are caused to exchange positions, a holder



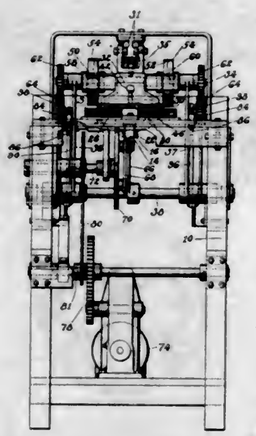
on which said screen is mounted; and means for effecting movement of said screen in said two directions relative to said holder.

1,780,192. DEFLECTING RIM FOR BOILERS AND WASHING MACHINES. ANDREW JACKSON, Binghamton, N. Y., assignor of one-half to F. A. Haight, Johnson City, N. Y. Filed Feb. 7, 1928. Serial No. 252,653. 1 Claim. (Cl. 68—30.)



In a deflector for vessels and the like, opposing side plates and opposing end plates fitted together to form a complete detachable rim for resting upon the edge of a vessel, the inner edges of the said plates being disposed below their outer edges, said plates extending inward and downward from the upper edge of the vessel.

1,780,193. BURIAL VAULT. GEORGE W. JANDA, Bismarck, and ROBERT C. PLAGGMIER, Taylor, N. Dak., assignors to The National Survault Company, Bismarck, N. Dak., a Corporation. Filed Nov. 17, 1928. Serial No. 320,092. 2 Claims. (Cl. 72—7.)



1. A sealing joint for a burial vault of the surface type having side and end walls, shoulders on said walls projecting inwardly therefrom and defining upper and lower portions of said vault, formed members resting on said shoulders and acting as a closure for the lower portion of said vault, outwardly projecting grooves in said side and end walls immediately above said formed members, and a poured layer of concrete on said formed members entering and filling said grooves and sealing the vault.

1,780,194. SOUND-REPRODUCING MACHINE. GEORGE KENDE, East Orange, N. J., assignor to Phonodise Corporation, New York, N. Y. Filed May 3, 1929. Serial No. 360,126. 2 Claims. (Cl. 188—83.)

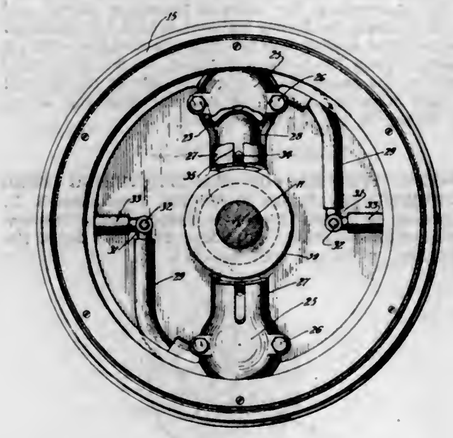
1. The combination with a sound record turntable having an annular braking surface, of a plurality of fixed arms disposed below and adjacent to the turntable, and a resiliently pressed brake member carried by each arm and in contact with the braking surface.

1,780,195. SHEET-SEPARATING APPARATUS. FAY D. KINNEY, Wenham, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Dec. 5, 1928. Serial No. 324,028. 45 Claims. (Cl. 271—18.)

1. In an apparatus for separating successive sheets, a sheet-engaging projection, means for moving the projection and sheets relatively to cause the engagement of a sheet by the projection, and means for moving the projection and sheets relatively to draw the engaged sheet across the succeeding sheet in a direction generally opposite to the engaging movement.

1,780,196. PROCESS FOR THE EVOLUTION OF HYDROCYANIC ACID. HANS LEHRECKE, Frankfort-on-the-Main, Germany, assignor to The Roessler & Hasslacher Chemical Company, New York, N. Y., a Corporation of Delaware. Filed Oct. 20, 1925, Serial No. 63,787, and in Germany Oct. 27, 1924. 13 Claims. (Cl. 167—35.)

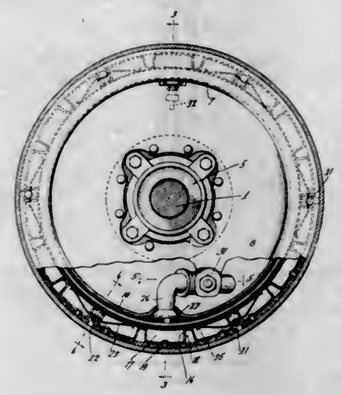
10. Product to be used in the destruction of pests consisting in a finely divided addition product of hydrocyanic acid and iron chloride with the presence of an excess of iron chloride.



1,780,197. METHOD OF CAUSING THE SIMULTANEOUS EVOLUTION OF HYDROCYANIC ACID AND AN IRRITANT GAS. HANS LEHRECKE, Frankfort-on-the-Main, Germany, assignor to The Roessler & Hasslacher Chemical Company, New York, N. Y., a Corporation of Delaware. Filed Oct. 20, 1925, Serial No. 63,789, and in Germany Oct. 31, 1924. 8 Claims. (Cl. 167—35.)

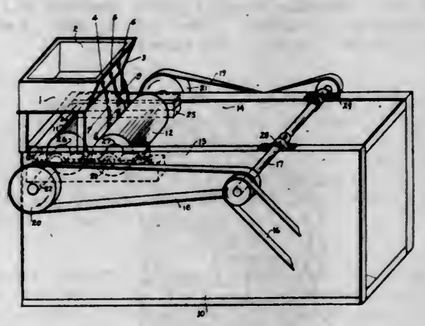
8. A product for the simultaneous evolution of hydrocyanic acid and cyanogen chloride containing a mixture of an addition product of hydrocyanic acid and iron chloride with sodium hypochlorite.

1,780,198. PROCESS FOR STABILIZATION OF HYDROCYANIC ACID. HANS LEHRECKE, Frankfort-on-the-Main, Germany, assignor to The Roessler & Hasslacher Chemical Company, New York, N. Y., a Corporation of Delaware. Filed June 23, 1926, Serial No. 118,090, and in Germany July 3, 1925. 12 Claims. (Cl. 23—250.)



1. Process for stabilizing liquid hydrocyanic acid against polymerization or decomposition which comprises adding to said hydrocyanic acid an inorganic compound of a strong acid capable of hydrolysis under the conditions of storage of liquid HCN.

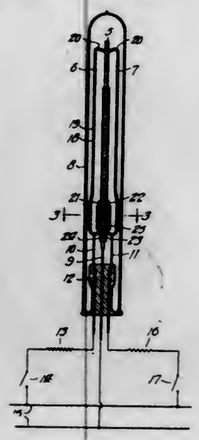
1,780,199. FLUID-PRESSURE-OPERATED DEVICE. BERT A. LINDERMAN, New York, N. Y., assignor to Linderman & Co., Wilmington, Del., a Corporation of Delaware. Filed June 22, 1925. Serial No. 38,704. 5 Claims. (Cl. 192—88.)



1. A fluid pressure operated device comprising a first transmission element, a second transmission element angularly movable with respect to said first element, movable means associated with one of said elements for effecting a power transmitting connection with the other, actuating means for said movable means comprising a closed hollow member having an inflatable and a depressible part, and adapted to contain a fluid pressure medium, said member being carried by the element with which said movable means is associated, a plunger adapted to act substantially radially upon said depressible part and an axially slidable actuating member operating on said plunger.

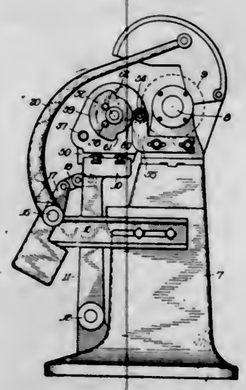
1,780,200. METALLIC SHOE FOR FLUID-PRESSURE-OPERATED BRAKES. BERT A. LINDERMAN, New York, N. Y., assignor to Linderman & Company, New York, N. Y., a Corporation of Delaware. Filed May 15, 1926. Serial No. 109,210. 15 Claims. (Cl. 188—152.)

1. In a device of the class described a brake shoe consisting of arcuate segments of sheet metal, at least one of said segments being formed with spacing lugs adapted to space it from the other segment of the shoe to form a space between the segments to provide an air circulating chamber to dissipate heat.



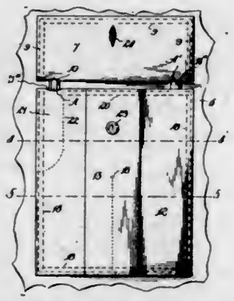
1,780,201. PROCESS AND MECHANISM FOR MAKING METAL PELLETS. DAVID MARTIN, Mansfield, Ohio, assignor to The Globe Steel Abrasive Company, Mansfield, Ohio, a Corporation of Ohio. Filed Aug. 13, 1928. Serial No. 299,146. 8 Claims. (Cl. 83—91.)

1. In the manufacture of metallic grit, the process of preparing pellets to be later comminuted, comprising the introduction of streams of molten iron between closely related opposing parallel surfaces of rotating rolls in the presence of a cooling liquid carried peripherally on the rolls and therebetween, flattening the streams between the rolls and breaking up the flattened molten iron by the combined effects of molecular cohesion of the metal and the conversion into steam of portions of the water in engagement with the flattened surfaces.



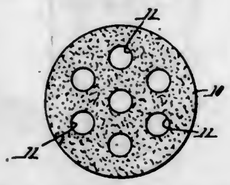
7. In a mechanism for forming metallic pellets, a roller for rolling molten metal into a sheet or ribbon, means for supplying molten metal to the roll to be rolled thereby, means for supplying a cooling fluid to the said ribbon or sheet substantially at that portion where it is rolled thinnest by the roller.

1,780,202. CIRCUIT-BREAKING DEVICE. CHARLES A. MARTIN, Chicago, Ill. Filed Nov. 26, 1928. Serial No. 321,904. 8 Claims. (Cl. 200—113.)



8. A circuit controlling device comprising a closed vessel having a non-oxidizing gaseous filling, an elongated bar magnet therein, a bimetallic thermostatic element therein composed in part of magnetic material whereby it is, attracted by said magnet, said magnetic material in said element extending substantially from one pole of said magnet to the opposite pole thereof to complete the magnetic circuit therefor, and lead in conductors extending through said vessel and secured to said element and magnet respectively.

1,780,203. FEED-CONTROL MEANS FOR TURNING MACHINES. CARL L. MATTISON, Rockford, Ill., assignor to Mattison Machine Works, Rockford, Ill., a Corporation of Illinois. Filed July 5, 1928. Serial No. 290,474. 1 Claim. (Cl. 142—10.)

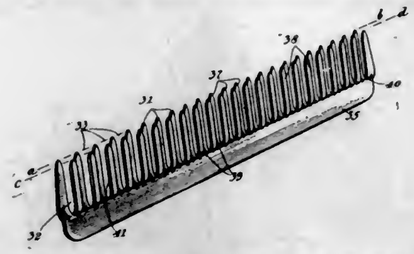


A lathe comprising a cutter and a work support one mounted so as to be movable with respect to the other through a substantial range, manual means for imparting said movement, a combined cam and pattern device, an abutment engaged thereby to govern a certain inner portion of said range, said cam device comprising a succession of pattern contours in radially stepped relation to each other, the engagement of which with said abutment determines the pattern of the cross-section of the work then being cut, while the steps or pronounced portions of the cam provide comparatively abrupt shifts of distance between the work and cutter, the angular pattern dimension of the cam of greater radius being sufficiently prolonged to control the complete cross-section of the work then being cut and so that when its engagement with the abutment is repeated its advance portion having spaced the cutter and work they remain spaced long enough to afford the operator full opportunity to manually complete the range of withdrawal movement.

1,780,204. POCKET STRUCTURE FOR GARMENTS. CLARENCE W. MASTIN, San Antonio, Tex. Filed Apr. 15, 1929. Serial No. 355,400. 1 Claim. (Cl. 2—253.)

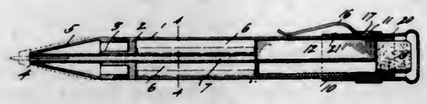
A patch pocket for garments comprising a lining and facing material attached to each other around the edges thereof and to the garment at the edges of the sides and lower end to provide an inner or main pocket opening out at its upper end and an auxiliary pocket between the lining and facing material, a vertical box pleat formed on the outer side of the facing at the center thereof, and a slit through the facing material behind the center of the box pleat leading into the upper part of the auxiliary pocket between the facing and lining, the box pleat being sewed to the facing material at one side of the slit and to both sides of said facing material from the slit to the bottom of the auxiliary pocket.

1,780,205. PROCESS OF MANUFACTURING FUEL BRIQUETTES. HENRY F. MAUREL, Providence, R. I., assignor to Maurel Investment Corporation, a Corporation of Rhode Island. Filed Mar. 24, 1928. Serial No. 264,399. 5 Claims. (Cl. 44—14.)



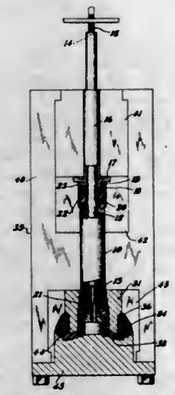
1. The process of producing fuel suitable for use in furnaces and the like from carbonaceous substances which comprises concentrating the same by the "froth flotation" process, reducing the moisture in the flotation concentrates to leave them in the form of a heavy paste, thereafter mixing said paste with a suitable liquid hydrocarbon, and finally baking the mixture.

1,780,206. COMB. ARCHIBALD D. MCKELLAR, Park Ridge, Ill. Filed Jan. 30, 1929. Serial No. 336,093. 9 Claims. (Cl. 132—11.)



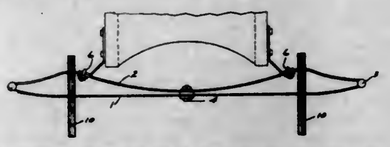
2. In the construction of a comb of the class described, the process of forming a blank having one edge serrated

to correspond to the points of the teeth, the opposite edge to correspond to the outer edge of the back or handle, and the ends to correspond to the outer edges of the end teeth; cutting the said blank from the points of indentation by a number of parallel cuts of adopted length, made



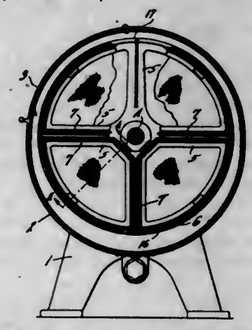
intermediate the ends to form strips of tooth form, attached to the bank or handle thereof; and bending an inner part of each of the said strips adjacent the back or handle thereof to form curved base portions to position the teeth in rows, and to provide tortuous transverse passageways.

1,780,207. MAGAZINE PENCIL. LEANDRO E. MELÉNDEZ, New York, N. Y. Filed Nov. 1, 1929. Serial No. 404,130. 6 Claims. (Cl. 120—14.)



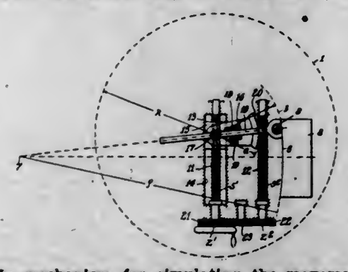
1. A magazine pencil including a barrel terminating in a writing point, a lead carrier fixed within the barrel immediately above the writing point and formed to provide a central channel in line with the writing point and a series of concentric channels for the reception of different leads, and means operative beyond the carrier with respect to the writing point to be positioned to receive a lead from a particular lead channel and transfer such lead to the central channel through longitudinal tilting of the pencil.

1,780,208. METHOD OF MAKING PUMP MEMBERS. VLADIMIR VICTOR MESSER, New York, N. Y., assignor to Seiberling Rubber Company, Barberton, Ohio, a Corporation of Delaware. Filed Dec. 7, 1929. Serial No. 412,504. 12 Claims. (Cl. 154—2.)



8. The method of making composite structures which comprises wrapping rubberized fabric upon itself around a rod mandrel to form a tubular stem, incorporating a metallic member in one end of the stem, applying the parts of a longitudinally-divided molding mandrel externally to that end of the stem, placing an annular, rubberized foot member around said molding mandrel, connecting said foot member and stem with a rubber foot web, vulcanizing the parts together upon the mandrels, and withdrawing the mandrels.

1,780,209. BUMPER RACK. WILLIAM E. V. SHAW, Minneapolis, Minn. Filed Apr. 28, 1930. Serial No. 448,132. 7 Claims. (Cl. 293—55.)



1. A bumper rack having a load-supporting portion, and opposed portions one of which is yieldable and adapted to move toward the other under tension to act as a clamp.

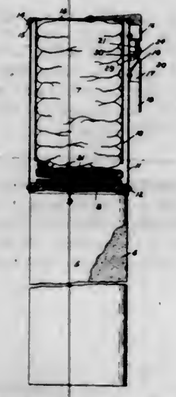
1,780,210. LAUNDRY APPARATUS. ALONZO D. STALEY, Cincinnati, Ohio, assignor to The American Laundry Machinery Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Feb. 16, 1924. Serial No. 693,271. 1 Claim. (Cl. 68—18.)

In a machine of the character described, a rotatable shaft, frame means rotatable with said shaft, a work receiving container provided with an end wall and with side walls, one of said side walls providing a door, and a single means carried by said end wall for both maintaining said door in closed position and for latching said container to said frame means.

1,780,211. RADIUS-TEMPLATE-GRINDING MACHINE. HILDING VALDEMAR TÖRNEBOHM, Gottenborg, Sweden, assignor to Aktiebolaget Svenska Kullagerfabriken, Gottenborg, Sweden, a Corporation of Sweden. Filed Dec. 8, 1928. Serial No. 324,757. 5 Claims. (Cl. 51—32.)

1. In mechanism for simulating the movement of the radius of a circle rolling along a straight line and for

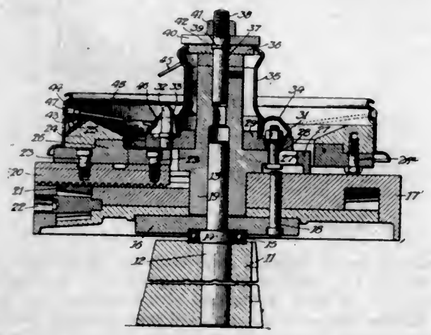
causing a point thereon to generate a cycloidal curve, comprising a carriage, means for causing the traverse of the carriage, an oscillatory member pivotally mounted on the carriage for movement in a plane including the line of carriage traverse, means for so oscillating such member including means for timing the oscillation in relation to the traverse of the carriage, and a working tool mounted on the oscillatory member and adjustable radially thereof, the organization being such that the working tool is caused to generate a selected portion of a cycloid.



1,780,212. PROCESS OF PRODUCING A TWO-TONED FINISH ON METAL SURFACES. MARVIN J. UDY, Niagara Falls, N. Y. Filed July 28, 1927. Serial No. 209,176. 10 Claims. (Cl. 204—1.)

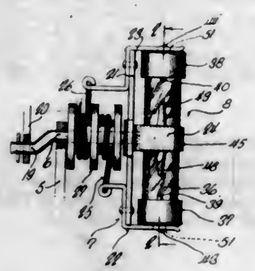
1. Process of producing a two-toned finish on a metal surface, comprising coating a portion of such surface with a substance that retards the action of electrodeposition on such portion but is gradually removed therefrom during such action; immersing said coated surface in an electroplating solution having an etching action on said metal during said period of retarded deposition, subjecting both coated and uncoated portions of such surface to an electroplating operation in said bath; and continuing such operation until after such coating has become removed and until both the coated and uncoated portions are plated with an electrodeposit.

1,780,213. METHOD OF PREPARING CHROMIUM-PLATED FERROUS ARTICLES. VINCENT M. VERTUCCI, Jersey City, N. J. Filed Oct. 7, 1926. Serial No. 140,219. 4 Claims. (Cl. 204—1.)



1. In the art of electrodepositing chromium on iron, steel and predominantly ferrous alloys, that improvement which comprises heating the aforesaid material of ferrous character to a dull redness, thereupon cooling the heated material, and immediately cleaning the surface of the cool material.

1,780,214. FLARE. SAMUEL WILEY, Metuchen, N. J. Filed Aug. 16, 1929. Serial No. 886,408. 8 Claims. (Cl. 102—124.) (Granted under the act of Mar. 3, 1883, as amended Apr. 30, 1928; 370 O. G. 757.)

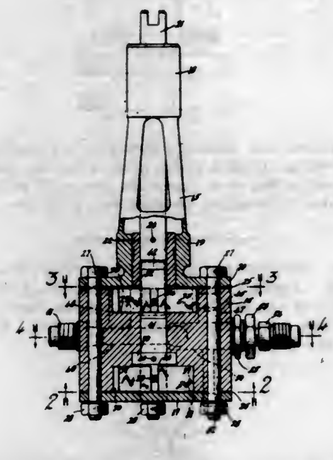


1. A flare embodying a light case having a tubular extension at one end thereof, a parachute container insertable in the extension and spaced therefrom, a cover on the outer end of the containr projecting beyond the extension to grip the edge thereof, a flare supporting member carried by the cover of the container and disposed along the outside of the extensioin and means for separably fastening the light case to the supporting member.

1,780,215. WIRE-WHEEL-ASSEMBLY DEVICE. MOSES W. H. WILSON, East Lansing, Mich., assignor to Motor Wheel Corporation, Lansing, Mich., a Corporation of Michigan. Filed June 10, 1929. Serial No. 369,728. 8 Claims. (Cl. 29—87.)

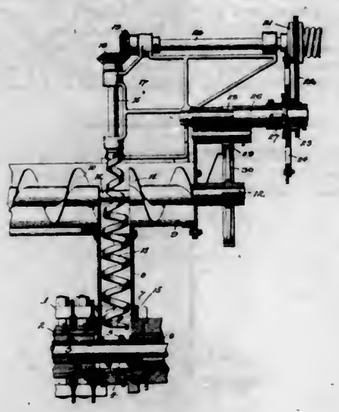
1. A device for assembling wire wheels comprising clamping members to hold the hub and rim in predetermined ultimate relative positions while lacing the wheel, said hub and rim clamping members relatively adjustable as to respective planes and angularly in such planes.

1,780,216. ELECTRICAL SWITCH. GUSTAV O. WILMS, Milwaukee, Wis., assignor, by mesne assignments, to The Reliance Company, Wilmington, Del., a Corporation of Delaware. Original application filed Apr. 14, 1921, Serial No. 461,288, now Patent No. 1,629,756, dated May 24, 927. Divided and this application filed Oct. 8, 1926. Serial No. 140,298. 10 Claims. (Cl. 200—152.)



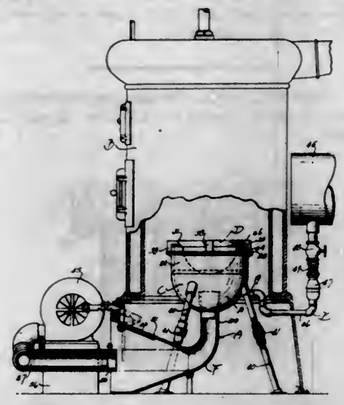
1. A double throw contactor switch comprising a hermetically sealed elongated glass container, an electrode fixed in each end of said container, a pair of electrodes each of which is positioned between the center of said container and one of the first named electrodes, a common support for said pair of electrodes comprising an inwardly extending integral shank adjacent the center of said container and extending downwardly from the upper wall thereof, a metallic member exterior of said container and supported thereupon, said pair of electrodes being electrically connected to said metallic member, and a body of conducting liquid movable beneath said electrodes and said support to and from contact with said electrodes.

1,780,217. PUMP MECHANISM. SUMNER WILTSE, Detroit, Mich., assignor to Wiltse Appliance Co., a Corporation of Michigan. Filed Aug. 25, 1927. Serial No. 215,817. 3 Claims. (Cl. 103—137.)



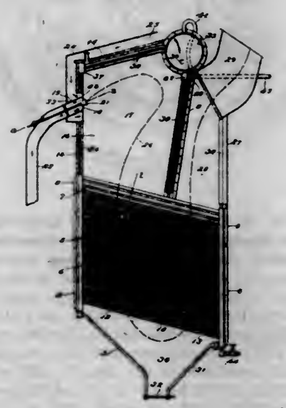
1. In a pump of the class described, a casing having a recess therein, a pump element in said recess, an

opening in one face of said casing, a second opening in another face of said casing of larger diameter than the first mentioned opening and in axial alignment therewith, said openings being connected together whereby a shoulder is formed at their point of connection, a passage connecting said second opening with said recess, a



passage connecting said first mentioned opening with said recess, a member threaded into the outer end of said second opening, a ball within said second opening positioned against said shoulder, a spring held under compression between said member and said ball, a passageway through said member, and a filtering member in said second opening maintained in position by said spring.

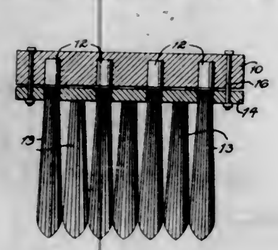
1,780,218. FEEDING MECHANISM FOR PRESSES. RAYMOND T. ANDERSON, Cleveland, Ohio, assignor to The V. D. Anderson Company, Cleveland, Ohio, a Corporation of Ohio. Filed June 28, 1926. Serial No. 119,183. 11 Claims. (Cl. 100—48.)



1. In a press, the combination of a shell; means located therein for effecting pressure upon material to be pressed; a feed inlet; a chute in communication therewith; a spiral element formed from spring material located within the chute; and means for rotating said element.

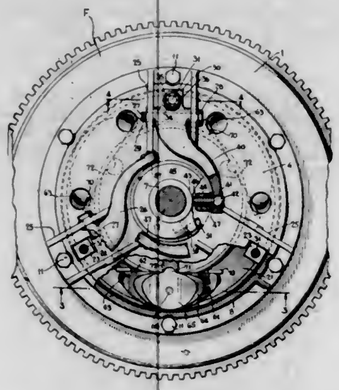
1,780,219. OIL BURNER. JAMES JOSEPH BARRETT, White Plains, N. Y., assignor to Barrett Blue Blaze Burner Co., Inc., a Corporation of New York. Filed Mar. 19, 1924. Serial No. 700,838. 6 Claims. (Cl. 158—91.)

1. In an oil burner the combination of an oil receiving receptacle, means for feeding oil into the receptacle to a predetermined normal level, a member supported in a depending relation in the upper portion of the receptacle with its receptacle facing surface disposed in a continuously converging relation with respect to the inner surface of the receptacle from a location above the plane of normal liquid level within the receptacle upwardly towards the outer edge of the receptacle, the said member at its outer end being annularly spaced from the receptacle to provide an opening from the receptacle, and means providing an air passageway in the receptacle, opening above the normal liquid level immediately below the member in such manner that the air entering the receptacle strikes against the member and is laterally deflected towards the space between the upwardly converging surfaces of the member and receptacle.



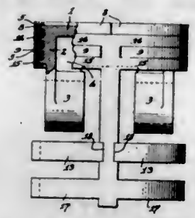
1,780,220. STEAM GENERATOR. HENRY H. BAUMGARTNER, Belleville, N. J., assignor to Drake Nonclinkering Furnace Block Company, Inc., New York, N. Y., a Corporation of New York. Filed Mar. 5, 1927. Serial No. 173,177. 6 Claims. (Cl. 122—235.)

1. Steam generating apparatus comprising a bank of boiler water tubes, a baffle wall therein establishing a



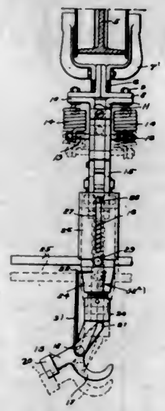
down-travel first boiler pass and an up-travel second boiler pass, with the gases traveling beneath such baffle wall from the first to the second boiler pass, enclosing walls forming a combustion space above the first boiler pass and a refuse space below the baffle wall, and a fluent fuel burner delivering into the combustion space, the upper boiler tubes having their top sides exposed to the radiant heat of the combustion.

1,780,221. BRUSH. JOHN BUCHMANN, Hamilton, Ohio. Filed May 8, 1930. Serial No. 450,790. 3 Claims. (Cl. 15—194.)



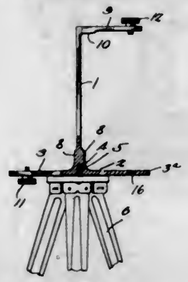
1. A brush construction comprising replaceable bristle tufts, a back member, a tuft holder on the end of each tuft, flanges on the tuft holders, a member secured to the back member and in position to hold the flanges in place relative to the back member, the second member being provided with openings to permit the passage of the bristles.

1,780,222. CLUTCH. EDWARD P. BULLARD, Jr., Stratford, and GEORGE F. KOLB, Bridgeport, Conn., assignors to The Bullard Company, Bridgeport, Conn., a Corporation of Connecticut. Filed Jan. 13, 1928. Serial No. 246,447. 2 Claims. (Cl. 192—68.)



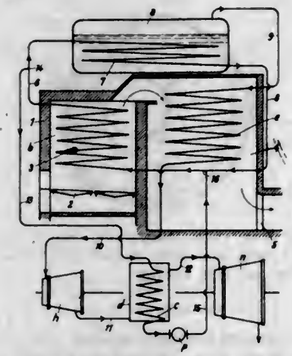
1. A clutch of the class described, comprising a shallow housing having circularly-spaced apertures, a pressure ring within the housing having lugs passing through the apertures and slidably fitting same, a driven member, plate springs interspaced with the lugs, studs extending rearward from the lugs and having lever abutment members, releasing levers fulcrumed on the housing, having their short arms engaging the abutment members, and a shifting collar connected to the inward ends of the levers, the connections of the levers to the shifting collar comprising ball-ended studs engaged with the collar and sockets in the lever ends in which the ball ends of the studs are engaged, and clearance take-up washers intermediate the lever ends and the collar.

1,780,223. PISTON AND PISTON-RING ASSEMBLY. ARTIST B. CROUCH, Detroit, Mich. Filed Dec. 13, 1926. Serial No. 154,540. 13 Claims. (Cl. 74—108.)



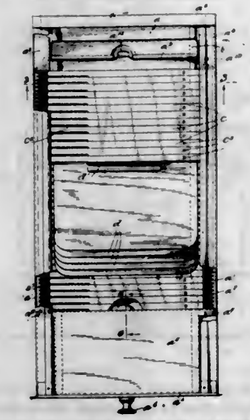
1. A piston ring structure including a plurality of top rings to engage about a piston head, a bottom ring, and a portion connecting said top rings and said bottom ring and forming an integral skeleton ring structure.

1,780,224. SETTING MEANS FOR CONVEYING MECHANISM. JAMES STARR DA COSTA, Merchantville, N. J., assignor of one-half to Jervis B. Webb, Detroit, Mich. Filed Nov. 26, 1929. Serial No. 409,929. 7 Claims. (Cl. 198—46.)



1. The combination with a carrier comprising a non-rotative element and a rotative element, the latter being adapted to be actuated step by step during the travel of the carrier, of indicating mechanism by which the degree of movement necessary to move the rotative element to releasing position may be predetermined and visually indicated.

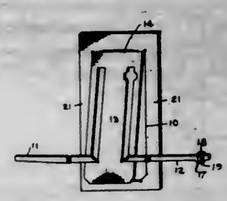
1,780,225. CAMERA TRIPOD. EDMOND DE MOULIN, Los Angeles, Calif. Filed Nov. 9, 1928. Serial No. 318,240. 2 Claims. (Cl. 248—46.)



1. In a holder for motion picture cameras, a support including a standard, means for mounting the support on a tripod with the standard in a substantially upright position, said standard being provided near its upper end with a laterally extended arm, the standard being provided near its lower end with a laterally extended arm, the arms projecting in opposite directions with respect to the standard, and a camera-holding means on each arm.

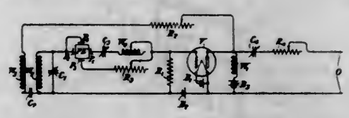
1,780,226. INTERSTAGE SUPERHEATING IN STEAM POWER PLANTS. HERMAN ELSNER, deceased, Cassel, Germany, by Carl Wagner, administrator, Cassel-Wilhelmshohe, Germany. Filed Apr. 20, 1926, Serial No. 103,263, and in Germany Apr. 28, 1925. 4 Claims. (Cl. 60—73.)

1. A steam power plant comprising a steam engine having several expansion stages, an interstage superheater between two of such stages, a working steam boiler for generating the high-pressure working steam for said engine and connected to said engine, a heating steam boiler adapted to generate heating steam to be used in the working steam boiler as heating medium for the indirect generation of the working steam, a heating coil in said working steam boiler immersed in the liquid of the boiler, means for conducting the heating steam from said heating steam boiler to said heating coil in the working steam boiler, means for diverting part of said heating steam before its introduction into the coil in the working steam boiler, and means for conducting said part of steam into the interstage superheater to be used therein as heating medium.



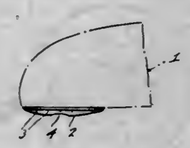
1,780,227. CARD-INDEX SYSTEM. ROLAND A. FURLONG, Rochester, N. Y., assignor to The Yawman & Erbe Manufacturing Company, Rochester, N. Y., a Corporation of New York. Filed Aug. 6, 1927. Serial No. 211,024. 15 Claims. (Cl. 129—16.)

1. In an apparatus of the class described, a tray, space bars carried thereby, means to engage an end bar to hold the bars together, an arm carried by the means, and means to move the arm into engagement with the tray to lock the first means in a desired position.



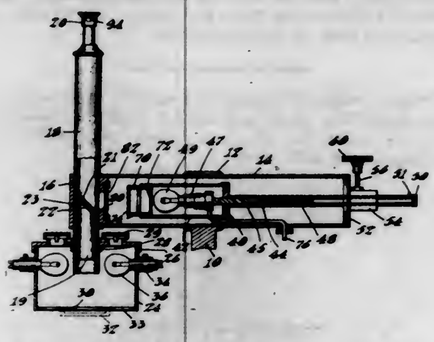
6. In an apparatus of the class described, in combination, a tray, cards to be carried thereby having securing means, space bars for the tray comprising parallel bars adapted to lie in the tray, and means on the bars to engage and hold the securing means.

1,780,228. MERCHANDISING FABRIC. ALEXANDER R. GOLDEN, New York, and JULIUS I. KAHN, Brooklyn, N. Y. Filed May 17, 1927. Serial No. 191,986. 2 Claims. (Cl. 223—18.6.)



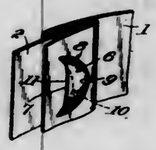
1. An insert of the class described comprising a substantially rectangular card having a substantially rectangular central portion cut out of the same and hinged at one end, and hinged cut outs in said central portion adapted to be secured transversely around said insert.

1,780,229. OSCILLATION GENERATOR. ESTILL I. GREEN, East Orange, N. J., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Sept. 10, 1927. Serial No. 218,774. 9 Claims. (Cl. 250—36.)



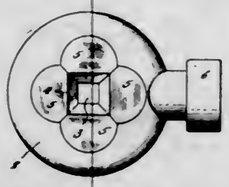
1. The combination of a piezo-electric device capable of vibrating simultaneously in a plurality of modes at different frequencies, said piezo-electric device having a pair of electrodes for its vibration in each mode, and means for uniting selected frequencies of vibration of said piezo-electric device to produce a substantially different frequency of vibration.

1,780,230. TAP FOR DANCING SLIPPERS OR SHOES. WILLIAM JOHN HANEY, North Vernon, Ind. Filed Mar. 25, 1930. Serial No. 438,791. 4 Claims. (Cl. 46—46.)



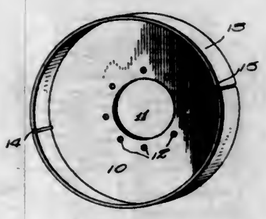
1. A hard rigid tap for dancing slippers adapted to be affixed to the underside of the hole of a slipper or shoe; said tap being concavo-convex in section to afford a space between its upper side and the underside of the sole and being provided adjacent to its edges with apertures for attaching purposes and being further provided within and spaced from said apertures with a comparatively large aperture extending transversely through it and communicating with the said space.

1,780,231. OPTICAL MEASURING INSTRUMENT. ARTHUR C. HARDY, Wellesley, Mass., assignor to Godfrey L. Cabot, Inc., Boston, Mass., a Corporation of Massachusetts. Filed Jan. 19, 1928. Serial No. 247,881. 6 Claims. (Cl. 88—23.)



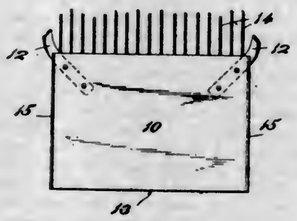
1. An optical instrument for measuring the reflecting power of carbon black, comprising means for intensely illuminating a sample thereof to raise its brightness to a level approximating good photometric practice, a surface of standard brightness which is the optical equivalent of an illuminated carbon black specimen, and means including an eye-piece for viewing the brightness of said surface and sample in the same field.

1,780,232. JOINT. EBER J. HAYMAN, Parkersburg, W. Va. Filed Feb. 28, 1928. Serial No. 257,739. 11 Claims. (Cl. 220—75.)



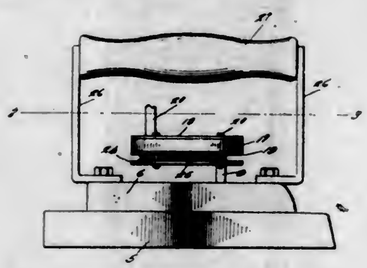
1. A joint for metallic members comprising overlapping edge portions, an uncovered aperture in one edge portion, an offset lock in the other edge portion, a raw edge adjacent the aperture engaging a raw edge of the offset lock, said offset lock being so shaped that the two edge portions are capable of relative longitudinal movement to disengage the same.

1,780,233. SPRINKLER. HOWARD JENKINS, Denver, Colo. Filed July 12, 1928. Serial No. 292,067. 1 Claim. (Cl. 299—18.)



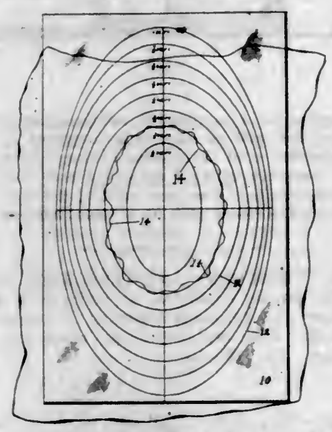
A lawn sprinkler comprising a shallow body of circular outline internally having a flat uninterrupted base and an arched top and having a nozzle on its side, the top marginally approaching the base at an acute angle and being provided centrally with a square outlet opening and the body being provided with an inlet opening of uniform cross sectional area extending across the axis of the nozzle in the horizontal plane thereof with its ends at opposite sides of said axis and one wall forming a deflecting surface, the wall of the body forming the end of the nozzle at the side away from the deflecting surface being beveled towards said surface, and feet on the bottom of the shallow body whereby the body may be supported with the interior thereof in the horizontal plane of the axis of the nozzle.

1,780,234. BRAKE DRUM. JOSEPH W. JOHNSTON, Steubenville, Ohio. Filed Oct. 2, 1926. Serial No. 139,144. 8 Claims. (Cl. 188—218.)



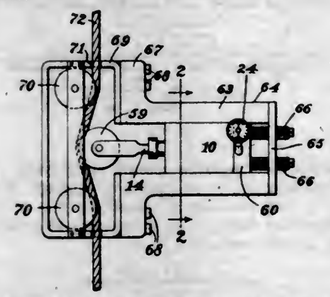
6. A brake drum comprising a disk and a flange carried thereby, said disk and said flange each being provided with cut-away portions therein.

1,780,235. POTATO-DIGGER BLADE. ERICK A. JOHNSON, Pine Bluffs, Wyo. Filed Feb. 9, 1928. Serial No. 253,128. 1 Claim. (Cl. 55—54.)



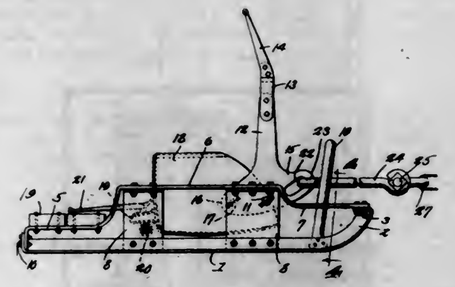
In a potato digger, a blade comprising a rectilinear member the width of which is substantially twice as great as its length, and having integral flanges at its lateral edges tapering from the rear of the blade to the forward edge thereof, the edges of said flanges being unsharpened, and screen bars rigidly connected to the rear edge of said blade.

1,780,236. SELF-STEAMING IRON. WILLIAM B. KLAREN, Lexington, Ky. Filed Mar. 26, 1929. Serial No. 350,078. 1 Claim. (Cl. 68—26.)



A sad iron comprising a work engageable block, a plate mounted upon the block, said plate being provided with a pocket in the bottom side thereof, a heating element disposed within the pocket and against the top side of the said block, a water boiler mounted upon the iron, said iron being provided with openings therethrough, and means for delivering moisture from the said boiler through the said openings to the work, said boiler comprising an annular side wall, top and bottom walls for the said side walls, a plate, a heating element disposed between the said plate and the said bottom wall, and securing means securing the said top and bottom walls and the said plate to the said side wall.

1,780,237. AREA-ESTIMATING DEVICE FOR SHEET MATERIAL. BERNARD S. LESLIE, Beverly, Mass., assignor to Krippendorf Kalculator Company, Portland, Me., a Corporation of Maine. Filed Mar. 12, 1925. Serial No. 15,103. 4 Claims. (Cl. 33—121.)



1. A device for estimating the faulty area of a sheet of material, consisting of a sheet of transparent material having a series of concentric figures of uniformly varying areas outlined upon it.

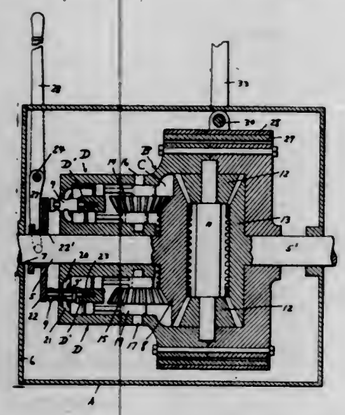
1,780,238. WEIGHT INDICATOR. ROBERT A. LINCOLN, Tonkawa, Okla., assignor of one-half to American Iron & Machine Works, Inc., Tonkawa, Okla., a Corporation of Oklahoma. Original application filed July 31, 1924, Serial No. 729,340. Divided and this application filed Mar. 23, 1928. Serial No. 264,246. 5 Claims. (Cl. 265—47.)

1. In a weight indicator for well drilling apparatus, the combination of an indicator, a cylinder and piston, means between the piston and a line of hoisting mechanism, which is adapted to engage an intermediate stretch of said line and normally deflect it from its straight course, said line under its tendency to straighten out due to pull thereon moving the piston to effect an indication, and adjustable means in engagement with said cylinder to allow said line to straighten out and lower the apparatus when the indicator shows excessive pressure.

1,780,239. DIRT MOVER. HENRY MASCHEK, Wichita Falls, Tex. Filed Aug. 17, 1929. Serial No. 386,648. 3 Claims. (Cl. 37—122.)

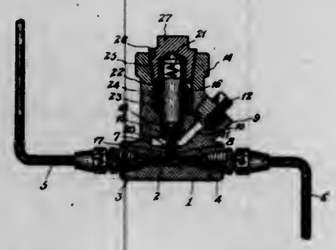
1. The combination with a supporting structure and a scoop therein, of draft means, means actuated by the draft means when subjected to a pulling action, for holding the front of the scoop out of contact with the surface on which the supporting structure is mounted, cooperating means on the scop and supporting structure for holding the rear portion of the scoop above and out of contact with the surface on which the structure is mounted, and means for swinging the back of the scoop upwardly and forwardly relative to the draft means to dump the contents of the scoop.

1,780,240. REAMER. WILLIARD M. MCBRIDE, Pittsburgh, Pa. Filed July 2, 1927. Serial No. 203,137. 1 Claim. (Cl. 77—75.)



A reamer comprising an elongated body having an axial opening and a plurality of longitudinal slots and further provided with alined transverse threaded openings inwardly from the slots leading into opposite sides of the axial opening, blades in the slots, a bar having end portions of cylindrical formation and its intermediate portion polygonal, one end portion fitting within the axial opening of the body and having portions cut from its opposite sides to define transversely alined recesses and a central radial web, said recesses being alined with the transverse openings in the body and the polygonal portion of the bar bearing against the inner edges of the blades, and screws threaded into the transverse openings in the body and housed therein with their inner ends engaged in the recesses in the bar and bearing against opposite sides of the web to retain the bar in place and effect its rotation for adjusting the blades.

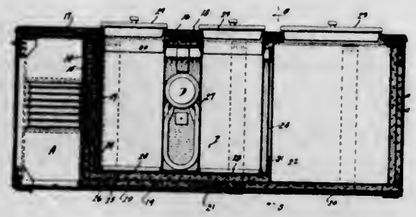
1,780,241. CLUTCH MECHANISM. FORD S. MILLER, New Salem, Kans. Filed July 10, 1929. Serial No. 377,135. 6 Claims. (Cl. 74—34.)



1. In a clutch mechaniam of the class described, a drive shaft, a driven shaft, a housing rotatably mounted on said shafts, each of said shafts having a gear mounted on the inner end thereof, said gears being disposed in opposed relation, a pair of oppositely disposed gears rotata-

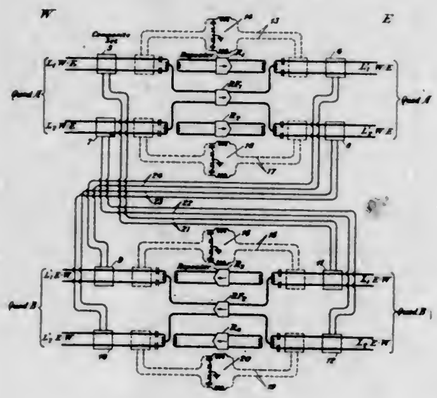
bly mounted in said housing intermediate the first mentioned gears and adapted for mesh therewith, said housing having a plurality of cylinders formed therein, pis-

tons mounted for reciprocation within said cylinders, and means operatively connecting said pistons with the gear on said drive shaft.



1,780,242. VALVE. JOHN R. REPLOGLE, Detroit, Mich., assignor to Kelvinator Corporation, Detroit, Mich., a Corporation of Michigan. Original application filed Feb. 28, 1921, Serial No. 448,331. Divided and this application filed Jan. 31, 1927. Serial No. 164,739. 10 Claims. (Cl. 251—155.)

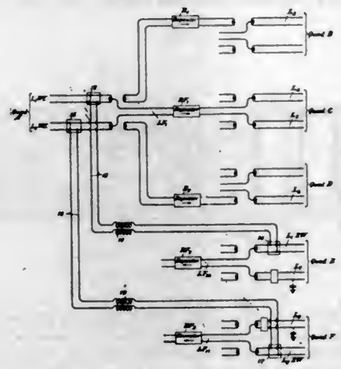
1. A valve fitting for refrigerating systems comprising a single piece casting provided with an outlet adapted to be secured to the inlet port of a refrigerating system, an intake tubular portion adapted to receive the return pipe of said system, said casting being provided with a circulation passage communicating with said outlet and intake connections, a tubular extension formed integral with said casting and communicating with said circulation passage, said extension being adapted ot be connected to an exhausting and charging apparatus, and a manipulative valve for controlling the communication between said exhausting and charging extension and said circulation passage, said valve being arranged exteriorly of said circulation passage.



1,780,243. MECHANICALLY-REFRIGERATED CABINET. JOHN R. REPLOGLE, Detroit, Mich., assignor to Kelvinator Corporation, Detroit, Mich., a Corporation of Michigan. Filed Feb. 5, 1927. Serial No. 166,050. 5 Claims. (Cl. 62—93.)

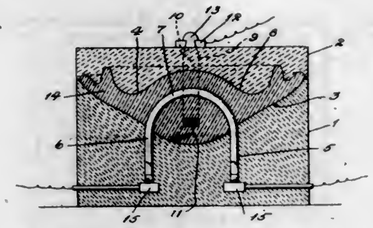
5. In a food storage cabinet having an interior heat insulated chamber and provided with openings through which access may be had to said chamber, the combination of a closed brine tank supported within said insulated chamber, said brine tank having open end food storage compartments extending therein, the open end of said compartments registering with openings in the cabinet, movable closure members for the openings in the cabinet,

an evaporator of a mechanical refrigerating system in said brine tank, and an open tank supported in said insulated chamber, said tanks being arranged in spaced relation to permit a confined air circulation therebetween for transmitting heat from the walls of the open tank to the walls of the closed tank at a predetermined rate.



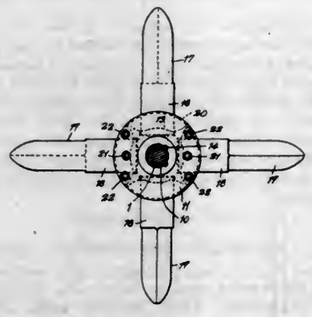
1,780,244. TELEPHONE AND TELEGRAPH CIRCUIT. PAUL E. RITTER, Roselle, N. J., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Sept. 27, 1929. Serial No. 395,628. 5 Claims. (Cl. 179—4.)

1. A four-wire telephone circuit comprising two one-way line sections for transmission in opposite directions, repeaters in said one-way line sections, and a telegraph circuit connected between said one-way line sections at the inputs of said repeaters.



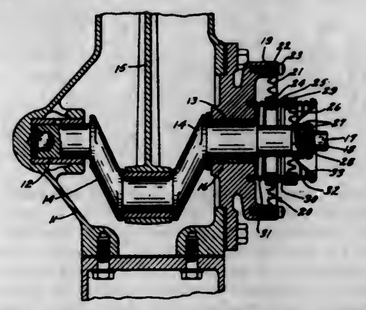
1,780,245. TELEPHONE AND TELEGRAPH SYSTEM. LELAND C. ROBERTS, Towaco, N. J., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Sept. 27, 1929. Serial No. 395,629. 4 Claims. (Cl. 179—4.)

1. A transmission system comprising a plurality of four-wire telephone circuits having their one-way circuits arranged in quads and arranged for the production of phantom circuits, the individual circuits being so transposed at a point that the phantom circuits will be separated from their side circuits, telegraph circuits connected between the one-way circuits of certain of said four-wire



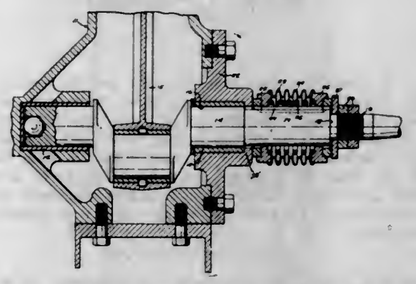
circuits, and means in said telegraph circuits for preventing the transmission thereover of currents from said phantom circuits.

1,780,246. GLASS INSULATOR AND METHOD OF MAKING SAME. DAVIDGE H. ROWLAND, Baltimore, Md., assignor to Locke Insulator Corporation, Baltimore, Md., a Corporation of Maryland. Filed Dec. 9, 1924. Serial No. 754,746. 10 Claims. (Cl. 49—81.)



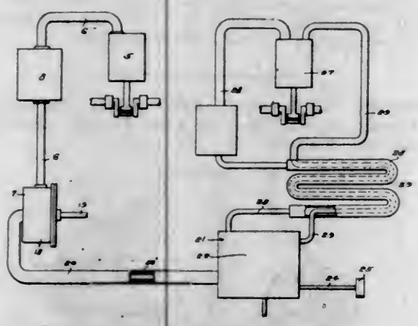
9. The method of making an insulator of a type having a permanently attached suspension element, comprising molding a glass body about said suspension element and passing an electric current through the element to effect heating thereof during molding, and continuing said heating until after the glass has set.

1,780,247. ROTARY CUTTER FOR SUGAR CANE AND THE LIKE. ALFRED M. SIMPSON, Manila, P. I. Filed Mar. 27, 1928. Serial No. 265,027. 1 Claim. (Cl. 146—121.)



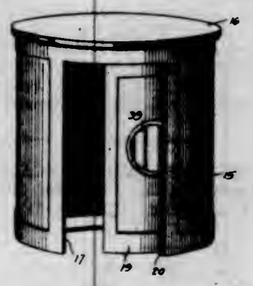
A rotary cutter comprising a hub having a peripheral flange provided with a plurality of rectangularly-formed knife-receiving grooves extending radially thereof, knives comprising blade sections, and rectangularly-shaped butt sections adapted to fit into said grooves, the butt sections being of greater length than the depth of said grooves and projecting above said flange, a collar fitting the hub and contacting the projecting faces of said knife butts, and individual bolts traversing the flange, knife butts and collar, for locking the butts in the grooves, and multiple bolts for locking the collar and hub together.

1,780,248. JOURNAL-BEARING SEAL. CHARLES C. SPREEN, Detroit, Mich. Filed Dec. 30, 1926. Serial No. 157,939. 1 Claim. (Cl. 286—11.)



The combination with a casing having an annular portion projecting from one wall thereof forming a seat, and a rotatable shaft extending through said casing wall and interiorly of the annular projecting portion; of a seal structure comprising an annular sealing ring disposed radially inwardly of the aforesaid seat, a flexible diaphragm secured rigidly to the seat and sealing ring, another sealing ring disposed adjacent the first and in rotatable engagement therewith, clamping means associated with the shaft and disposed radially inwardly of said last mentioned sealing ring, a second flexible diaphragm secured rigidly to the last mentioned sealing ring and clamping means, and a pair of springs disposed concentrically of the shaft for resiliently retaining the aforesaid sealing rings in rotatable engagement.

1,780,249. JOURNAL-BEARING SEAL. CHARLES C. SPREEN, Detroit, Mich. Filed Dec. 30, 1926. Serial No. 157,941. 3 Claims. (Cl. 286—11.)

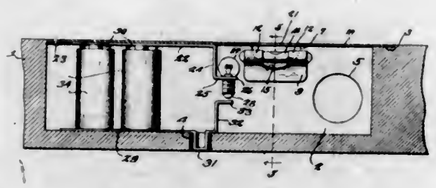


1. In combination with a casing provided with a shaft aperture, a plate for closing said casing aperture provided with a bearing aperture and an exterior seat and a shaft extending through said apertures; of a seal structure including a tubular bellows, annular members secured to each end of the bellows, said members being keyed to and movable longitudinally of said shaft, friction rings attached to said annular members, a seating plate clamped to a shoulder of said shaft and a spring within said bellows for rotatably and resiliently sealing said annular members to said plate seats.

1,780,250. METHOD OF AND APPARATUS FOR LIQUEFYING GASES. LEON B. STRONG, Washington, D. C., assignor of twenty per cent to Frank G. Campbell. Filed Mar. 27, 1930. Serial No. 439,435. 14 Claims. (Cl. 62—174.)

1. The herein described process of absorbing and removing the latent heat of condensation of gases having a low condensing temperature, which consists in compressing a gas having a critical temperature lower than the condensing temperature of the gas sought to be liquefied, expanding the said gas while in heat exchanging relation with the saturated vapor, and returning the expanded gas in counter-current with the compressed gas to its source of compression.

1,780,251. TELEPHONE BOOTH. SOLOMON TEPLOW, Los Angeles, Calif. Filed Aug. 23, 1926. Serial No. 131,078. 6 Claims. (Cl. 20—3.5.)



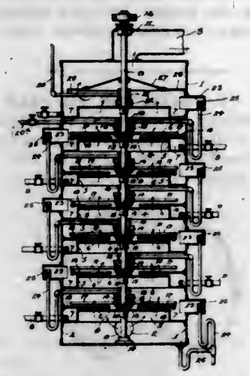
1. A telephone booth comprising a section open at one side, closed at its top and formed at its bottom with a shelf, and a door structure forming the only other section of the booth and supported entirely from said first section and arranged when closed to coact with the shelf to permit the body of a person when standing to be accomodated in the space between the door and said shelf so that the portion of the body above the waist will extend into the booth.

1,780,252. WATER-SOLUBLE PRODUCT DERIVED FROM THE FATTY ACIDS OCCURRING IN WOOL FAT AND PROCESS OF PREPARING THE SAME. ALFRED THAUSS, Cologne-Deutz, and GUSTAV MAUTHE, Cologne-Holweide, Germany, assignors to General Aniline Works, Inc., New York, N. Y., a Corporation of Delaware. Filed Dec. 16, 1927, Serial No. 240,625, and in Germany Dec. 17, 1926. 6 Claims. (Cl. 87—12.)

1. The process for the manufacture of a water soluble product from the fatty acids occurring in wool fat which process comprises treating these fatty acids with sulfuric acid monohydrate in the presence of a phenol.

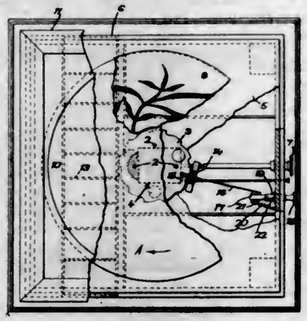
1,780,253. LEVEL DEVICE. CHARLES ANDREW VOLZ, Birmingham, Mich. Filed May 1, 1929. Serial No. 359,660. 2 Claims. (Cl. 240—6.4.)

1. In a device of the class described, a stock having a compartment, the stock being provided in one edge with a hole communicating with the compartment, switch members in the form of strips disposed in approximately parallel relation in the compartment, the strips having arms that extend inwardly toward each other, an electric lamp carried by the arm of one strip, the other strip being resilient and having a button to which the hole gives access, whereby said other strip may be flexed inwardly to bring the arm thereof into circuit-closing relation to the lamp, and to light the lamp, a battery electrically engaged between the strips, and a leveling device carried by the stock and located close enough to the lamp to be lighted thereby.



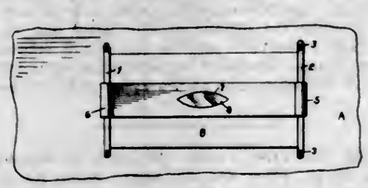
1,780,254. TABLE. ALLEN P. WAGNER, Jonestown, Pa. Filed May 5, 1927. Serial No. 189,072. 11 Claims. (Cl. 45—51.)

4. In combination, a support, guides on the support, a table having a rear edge guided by the guides, an upright member pivoted to the support, a second member pivoted to the first member, at a point adjacent the middle of the first member and having its opposite end pivoted to the table, the proportions of the table and the two members and guides being such that the upper ends of the first member will lock the inner end of the table in the upper ends of the guides when the table is in a horizontal position.



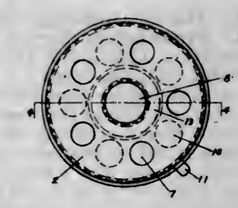
1,780,255. LIQUID AND GAS CONTACT APPARATUS. FREDERICK H. WAGNER, Baltimore, Md., assignor to The Bartlett Hayward Company, Baltimore, Md., a Corporation of Maryland. Filed Mar. 8, 1928. Serial No. 260,038. 12 Claims. (Cl. 261—84.)

1. In a liquid and gas contact apparatus the combination of a casing having a gas inlet and a gas outlet, a diaphragm extending transversely thereof from wall to wall, said diaphragm being perforate; a member located



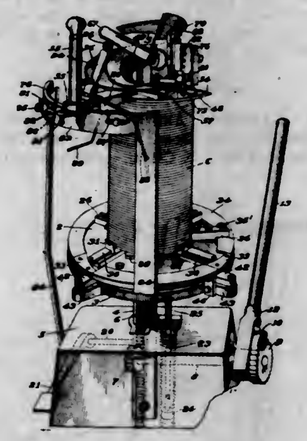
adjacent an opening formed in the diaphragm; means for feeding liquid onto said member; and means for imparting motion to said member.

1,780,256. SOCIAL GAME. WALTHER WALSS, Meggen, near Lucerne, Switzerland. Filed Dec. 7, 1929, Serial No. 412,477, and in Germany Jan. 21, 1929. 5 Claims. (Cl. 273—136.)



1. In a game of the type described, in combination, a game board, a disk for supporting said game board, a transparent plate situated above said game board, playing pieces adapted to be placed on said transparent plate, and means to cause a relative rotational displacement between said game board and said transparent plate for changing the positions of the playing pieces relatively to the game board without altering the position of these pieces on the transparent plate.

1,780,257. AUTOMOBILE CURTAIN. CORA P. WEAVER, Alhambra, Calif. Filed Sept. 14, 1926. Serial No. 135,305. 1 Claim. (Cl. 296—138.)



In combination with a frame having a window opening, a pair of vertically disposed fabric strips having only their opposing ends secured to the frame and their main body portions overlying said frame along adjacent window opening edges, a fabric curtain having transverse loops formed at its opposing ends, mounted slidably and frictionally in embracing relation upon said strips, said curtain bridging the full length of said window opening and being of a width narrower than that of the window opening to allow it to be raised or lowered vertically of the window, and a colored transparent panel carried by said curtain.

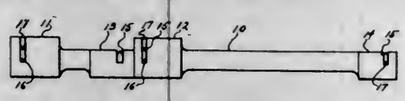
1,780,258. COMBINED CIGARETTE EXTINGUISHER AND RESIDUE RECEPTACLE. FRED WEINBERG, White Plains, N. Y. Filed Dec. 30, 1927. Serial No. 243,528. 9 Claims. (Cl. 131—51.)

1. In a device of the class described, a receptacle, a cover therefor having cigarette openings, a disc carried by the cover on its inner face and having a plurality of holes therein corresponding to the number of cigarette openings in the cover, and at least as large as said openings, said disc being normally positioned so as to close the openings through said cover and means for operating said disc so the holes therein can be brought into register with the cover openings whereby stubs may be dropped into the receptacle after being extinguished.

1,780,259. CLUTCH-RING-SHEARING MACHINE. THOMAS HANDEL BATESON, Walpole, Mass., assignor to Multibestos Company, Walpole, Mass., a Corporation of Massachusetts. Filed May 12, 1928. Serial No. 277,375. 18 Claims. (Cl. 242—55.5.)

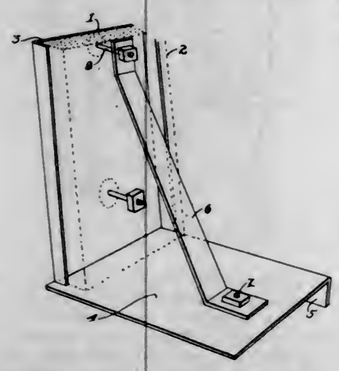
1. In a machine of the character described, the combination of a support for a coil of flat facing material wound edgewise, cutting mechanism for severing said material substantially radially thereof, means operable to relatively rotate said coil and said mechanism, and means operative during said relative rotation to guide a strip of said facing material unwound from said coil into cooperative relationship to said cutting mechanism.

1,780,260. METHOD OF PRODUCING PICTURES IN COLORS. GEORGE F. CAPWELL, Wethersfield, Conn. Filed Dec. 2, 1929. Serial No. 410,961. 8 Claims. (Cl. 101—115.)



1. The method of producing pictures in colors, which consists in interposing a protective screen over the surface to receive the picture and beneath a screen stencil, and forcing a color through the stencil and protective screen.

1,780,261. LEAD ALLOY AMENABLE TO HARDENING BY HEAT TREATMENT. MICHAEL G. CORSON, Jackson Heights, N. Y. Filed June 8, 1928. Serial No. 284,004. 4 Claims. (Cl. 148—21.4.)

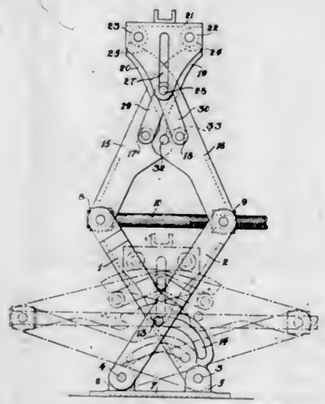


1. A method of hardening an alloy consisting principally of lead, and containing 0.5 to 15% each of antimony and cadmium, which comprises heating said alloy to a temperature upwards of 200° C. and short of the melting point for a sufficient period of time to bring the antimony and cadmium into solid solution in the lead matrix and then cooling to produce supersaturation followed by aging.

1,780,262. LEVER FOR SCALES AND METHOD FOR MAKING THE SAME. LOUIS JAENICHEN, Springfield Township, Oakland County, Mich., assignor to The Standard Computing Scale Company, Detroit, Mich., a Corporation of Michigan. Filed Nov. 18, 1926. Serial No. 149,092. 4 Claims. (Cl. 308—2.)

1. A lever of non-uniform thickness adapted to be provided with pivots in the form of knife edged bars, said lever being provided with a plurality of cross grooves cut to the same depth level, the grooves in the thinner portions of the lever being of a depth equal to the vertical dimension of a knife edged bar, the grooves in the thicker portions of the lever being twice this depth.

1,780,263. LADDER. ANDREW P. KETTMANN and IRVIN W. ANDERSON, San Jose, Calif. Filed Nov. 8, 1928. Serial No. 317,917. 1 Claim. (Cl. 228—61.)

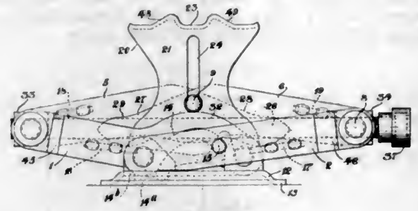


The combination with a ladder of a foot comprising a body portion adapted to overlie the inner surface of the lower portion of the ladder side and means for securing the same rigidly to the ladder side, and a ground engaging plate extending laterally from the said body portion and passing beneath the ladder side, and bracing means inserted between the said plate and the outer side of the ladder.

1,780,264. PACKING FOR FRAGILE ARTICLES. MORRIS KOPPELMAN, Brooklyn, N. Y., assignor, by mesne assignments, to Holed-Tite Packing Corporation, a Corporation of New York. Filed July 16, 1926. Serial No. 122,777. 4 Claims. (Cl. 217—26.5.)

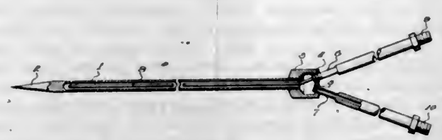
4. A packing for fragile articles comprising a series of cup-like articles receiving members united to form a sheet and having an upright hinge connection for folding them on one another with their concave sides opposed, upright marginal edges constructed and arranged to overlap when the sheet is folded and protuberances at the apexes of said receiving members having an opening therein.

1,780,265. LIFTING JACK. WILLIAM H. LOLLEY, New York, N. Y. Filed Nov. 12, 1926. Serial No. 147,907. 17 Claims. (Cl. 254—126.)



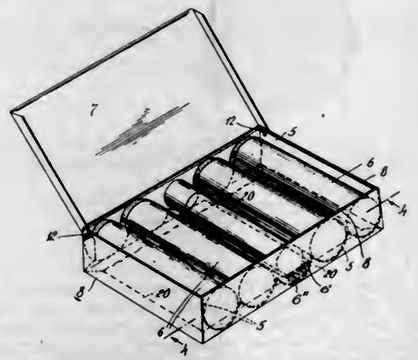
1. A lifting jack comprising a base member, a pair of levers pivotally mounted at their lower ends to said base member, a pair of upper crossed levers pivotally connected at their lower ends to the lower pair of levers respectively, means for turning said lower pair of levers about their pivots, a rest, means on said upper crossed levers for supporting said rest, and means on each upper crossed lever for engaging the other upper crossed lever for effecting the raising of the upper ends of said upper levers whereby the turning of said lower pair of levers about their pivots will give to the rest a substantially uniform vertical movement for a uniform horizontal component of the movement of the upper ends of the lower levers.

1,780,266. LIFTING JACK. WILLIAM H. LOLLEY, New York, N. Y. Filed Nov. 12, 1926. Serial No. 147,908. 15 Claims. (Cl. 254—126.)



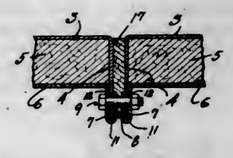
1. A lifting jack comprising a base member, a pair of levers pivotally mounted at their lower ends to said base

member, a pair of upper levers pivotally connected at their lower ends to the lower pair of levers respectively, means for turning said lower pair of levers about their pivots, a rest movable relatively to said upper and lower levers, said rest being adapted to directly engage said



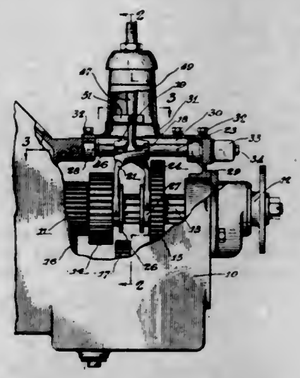
lower levers intermediate their ends during the earlier period of the raising operation of the jack and to be raised thereby during such period and means on said upper levers adapted to engage said rest and to effect the raising thereof after said earlier period of the raising operation of the jack.

1,780,267. APPARATUS AND METHOD FOR CHILLING MEATS. JOHN P. MALONE, Chicago, Ill., assignor of one-half to Adam P. Young, Chicago, Ill. Filed Aug. 20, 1928. Serial No. 300,746. 2 Claims. (Cl. 99—14.)



1. A device for chilling meats comprising a conduit, and means for circulating a refrigerant from the forward end of said conduit to the rearward end thereof comprising an injection tube opening into said conduit at its forward end and a discharge tube communicative with the rear end thereof, in manner adapted to cause the lowest temperature to be near the forward end.

1,780,268. CLEANER SET PACKAGE. JAMES LYLE MILLER, Toledo, Ohio, assignor to Rex Research Corporation, Toledo, Ohio, a Corporation of Delaware. Filed May 22, 1928. Serial No. 279,673. 4 Claims. (Cl. 206—65.)

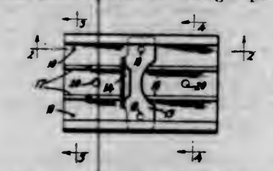


1. A package of liquid cleaning-materials in receptacles including a container comprising a frame having an open bottom, a flexible member suspended from the top edges of two sides thereof for carrying the receptacles and having formations thereon for protecting the receptacles from contacting with each other and with outside objects, said frame having its lower edges all around formed into substantially horizontal flanges and extended under said flexible member a sufficient distance to prevent said member from sagging down and out of the package under the weight of the receptacles.

1,780,269. OVEN CONSTRUCTION. WILLIAM G. MILLER, Detroit, Mich., assignor to The R. C. Mahon Company, Detroit, Mich., a Corporation of Michigan. Filed May 16, 1929. Serial No. 363,700. 6 Claims. (Cl. 72—16.)

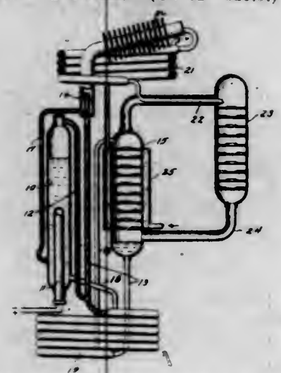
1. In an oven construction, an oven unit comprising a sheet metal base member having upturned flanges at the edges, a second sheet metal member having return bent flanges at the edges engaging over the flanges of the base member, the interengaging flanges being apertured, and the metal of one flange being extruded at the apertures to lock the flanges together, the space between the sheet metal members being filled with insulating material.

1,780,270. MOTOR VEHICLE. ALFRED MOORHOUSE, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed Oct. 28, 1925. Serial No. 65,269. 12 Claims. (Cl. 74—39.)



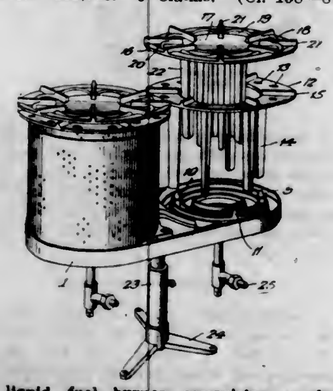
12. In a transmission gearing, the combination of two shifter elements, a shift lever adapted to be moved laterally to engage either of said elements and to be moved longitudinally to move the engaged element, and means for moving the shift lever laterally to interlock the shifter elements when one of them is in neutral and the other is in shifted position.

1,780,271. MOUNTING FOR SHADE FIXTURES. ROGER E. MOORE, New York, N. Y. Filed Oct. 17, 1928. Serial No. 312,969. 4 Claims. (Cl. 156—24.)



1. A mounting for shade fixtures, comprising a plate provided with inwardly turned flanges at opposite margins thereof to form opposed grooves, the plate being

further formed with a rib intermediate between and parallel to said grooves, said rib being tapered near one

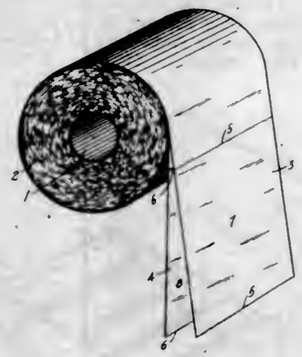


end of the plate to merge into the plane of the plate, and the flanges being oppositely tapered at said end to provide enlarged mouths for said grooves.

1,780,272. REFRIGERATION. CARL GEORG MUNTERS, Stockholm, Sweden, assignor to Electrolux Servel Corporation, New York, N. Y., a Corporation of Delaware. Filed Apr. 2, 1928, Serial No. 266,861, and in Germany Apr. 7, 1927. 2 Claims. (Cl. 62—119.5.)

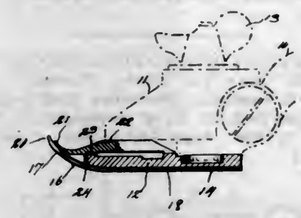
1. Refrigerating apparatus comprising a generator, an absorber situated with respect to the generator so that the normal liquid level in the generator is higher than the liquid level in the absorber, an elevated receiver situated above the generator and above the absorber, a conduit connecting the bottom of the absorber with the elevated receiver, a conduit connecting the vapor space of the generator with a point in said conduit below the normal level of liquid in the absorber and a conduit connecting the receiver with the generator.

1,780,273. LIQUID-FUEL BURNER. JOHN W. NEWBERY, Rockville Center, N. Y. Filed Dec. 13, 1929. Serial No. 413,748. 5 Claims. (Cl. 158—87.)



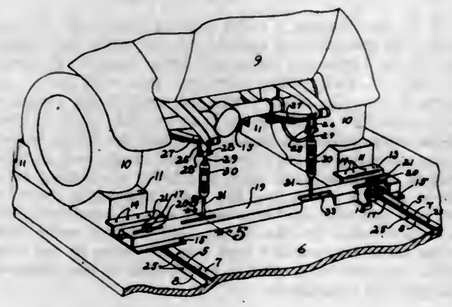
1. A liquid fuel burner comprising a plurality of foraminous concentric tubular elements vertically disposed and spaced apart; a base provided with fuel troughs therein, said troughs being located beneath the spaces between said tubular elements, and constituting therewith a plurality of combustion chambers; a baffle plate extending above and closing the central tubular member and above the combustion chambers; a second baffle plate extending above and closing one of said combustion chambers; and a series of vertically disposed baffles extending radially intermediate said baffle plates.

1,780,274. VENTILATING WINDOW LOCK. ALEXANDER PRIMAS, Buffalo, N. Y., assignor of one-fourth to John G. Miller, Buffalo, N. Y. Filed Jan. 19, 1929. Serial No. 333,534. 9 Claims. (Cl. 292—342.)



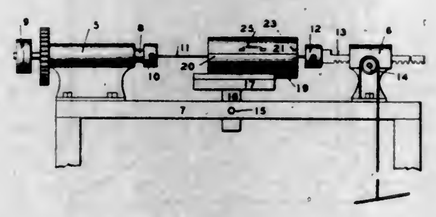
9. A ventilating window-lock, comprising a supporting member stamped of a single piece of sheet metal to form a flat base and spaced upstanding side members, said side members having the metal at their front marginal portions bent outwardly to form guide flanges to provide wide outer bearing faces and said flanges having stop ears at their upper ends, a bolt member comprising a body portion stamped of a single piece of sheet metal to form a flat transverse portion spanning the space between said side members and having opposite ends thereof bearing against the wide bearing faces of said side members and bent around said guide flanges, said flat transverse portion having clench flanges at its upper and lower edges, a friction block transversely co-extensive with said flat transverse portion against the upper and lower sides of which said clench flanges are forced, said friction block being tapered downwardly, and a release lever pivotally mounted between said side members and adapted to lift or release said bolt member when in binding contact with a window-sash.

1,780,275. PACKAGE OF TOILET PAPER. JOHN E. H. RANDERSON, Albany, N. Y. Filed Oct. 19, 1928. Serial No. 313,539. 1 Claim. (Cl. 206—58.)



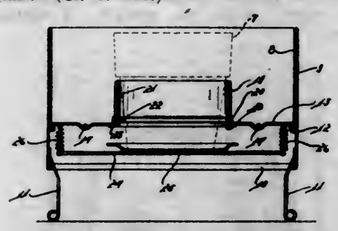
A toilet paper package comprising a plurality of lengths of paper wound together to form a roll, each length being provided with spaced, transverse lines of weakness, and the lines of weakness in the outer layer of paper coinciding substantially with the lines of weakness in the under layer of paper whereby a plurality of substantially coextensive sheets may be torn from the roll in one operation.

1,780,276. CURVED-BLADE BARBER CLIPPERS. ALBERT E. SCHREWER, Erie, Pa. Filed Apr. 15, 1930. Serial No. 444,499. 3 Claims. (Cl. 30—1.)



1. In combination with a clipper, an upper and a lower blade having upwardly curved cutting teeth, said lower blade having forwardly extending upwardly curved comb portions integrally formed with the cutting teeth of said lower blade whereby to lead the hair toward the cutting teeth.

1,780,277. SHIPPING DEVICE. FAY L. SEELEY and CLIFFORD L. SNYDER, Detroit, Mich., assignors to The Evans Auto Loading Co. Inc., Detroit, Mich., a Corporation of Delaware. Filed Jan. 5, 1929. Serial No. 330,544. 17 Claims. (Cl. 105—368.)

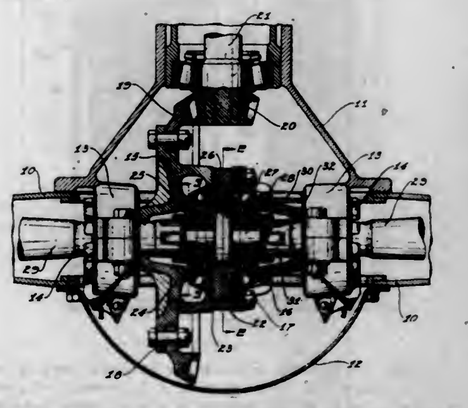


1. In combination, a vehicle chock positioned in alignment with a wheel of the vehicle and a vehicle hold-down positioned out of alignment with such wheel of the vehicle and common means for securing the two to a support.

1,780,278. BRUSH-MAKING MACHINE. CHAUNCEY F. SHULTZ, St. Louis, Mo. Filed Jan. 31, 1930. Serial No. 424,753. 5 Claims. (Cl. 300—2.)

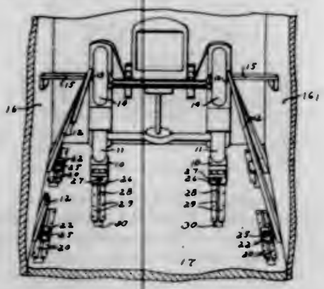
1. In a device of the class described, the combination with core twisting means, of a hollow cylindrical guide surrounding the core and holding the filiers in symmetrical relation to the core during the twisting operation.

1,780,279. PLANT-POT SUPPORT. WILLIAM SMITH, Detroit, Mich. Filed Dec. 9, 1929. Serial No. 412,724. 4 Claims. (Cl. 47—38.)



1. A plant pot support of the class described, comprising: a receptacle having an opening formed in its base; an engaging member projecting upwardly from said base around said opening and serving as a support for a pot positioned therein; a drip pan positioned beneath said opening; and yieldable means for maintaining said drip pan in engagement with the bottom of said pot.

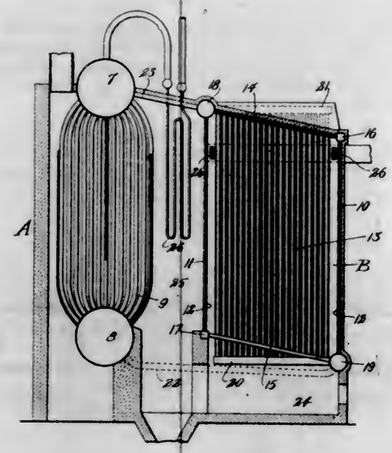
1,780,280. HEAT-TRANSMITTING PLATEN. JOHN A. STEVENS, Lowell, Mass., assignor to The Upson Company, Lockport, N. Y., a Corporation of New York. Filed May 10, 1928. Serial No. 276,798. 4 Claims. (Cl. 257—256.)



1. In a heat transmitting platen element, the combination with a face plate and a back plate, both grooved at their edges, of side plates set into the grooves of said plates at their opposite edges and welded to the material thereof adjacent to said grooves, and a plurality of threaded connecting members each threaded into said face plate at one end and threaded into said back plate at the other end, both ends of said threaded members being riveted to the respective plates.

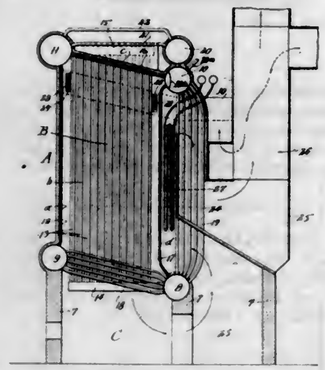
1,780,281. MOTOR VEHICLE. MILTON TIBBETTS, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed Oct. 25, 1928. Serial No. 314,902. 16 Claims. (Cl. 74—99.)

1. A differential assembly comprising a spider, a gear centered on the spider, an axle fitted to the gear by splines and means for centering the axle on the spider in spaced relation to the gear.



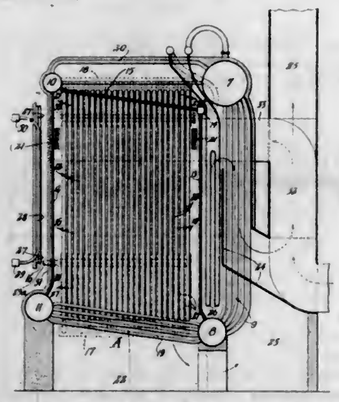
1,780,282. SHIPPING OF AUTOMOBILES. MAX D. TUCKER, Detroit, Mich., assignor to The Evans Auto Loading Co. Inc., a Corporation of Delaware. Filed Jan. 5, 1929. Serial No. 330,439. 4 Claims. (Cl. 105—368.)

1. In a freight car, in combination with the floor thereof, channels in said floor adjacent the sides thereof and extending lengthwise of said car, bolts having heads confined in said channels slidable in said channels, automobile shipping deck members provided with brackets at their lower ends, said brackets adapted to receive said bolts, and nuts cooperating with said bolts for locking said brackets against movement relative to said floor.



3. In a freight car, in combination with the floor thereof, channels in said floor in spaced relation to the side walls thereof, fastening means slidably retained in said channels, automobile shipping deck members provided with brackets at their lower ends, connected to said fastening means, said brackets being offset to position the lower ends of said deck members against the respective adjacent side walls of the freight car.

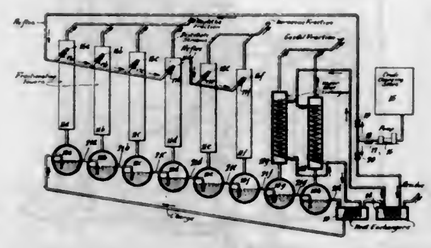
1,780,283. APPARATUS FOR GENERATING STEAM BY THE BURNING OF FUEL IN SUSPENSION. JOHN VAN BRUNT, Flushing, N. Y., assignor to International Combustion Engineering Corporation, New York, N. Y., a Corporation of Delaware. Filed Mar. 27, 1926. Serial No. 97,878. 11 Claims. (Cl. 122—235.)



1. The combination with a boiler having a bank of convection tubes and its setting, of a combustion chamber having its walls largely defined by steam generating tubes subject to radiant heat, the tubes of at least one of said walls being upright and provided with longitudinally extending fins, a gas space between the combustion chamber and the boiler, said gas space being defined in part by convection tubes of the boiler and in part by finned upright tubes of the combustion chamber, a gas inlet for said gas space establishing communication between the combustion chamber and the gas space and a gas outlet for said gas space establishing communication between it and the boiler.

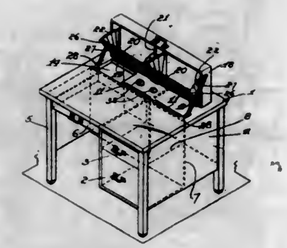
1,780,284. FINELY-DIVIDED-FUEL-BURNING BOILER FURNACE. JOHN VAN BRUNT, Flushing, N. Y., assignor to International Combustion Engineering Corporation, New York, N. Y., a Corporation of Delaware. Filed May 5, 1926. Serial No. 106,813. 7 Claims. (Cl. 122—235.)

1. In combination, a boiler furnace having its side and end walls comprised of upright tubular water walls upper and lower drums and upper and lower headers, the tubes of the end walls being connected into said upper and lower drums, the tubes of the side walls being connected into said upper and lower headers, the upper headers being connected to an upper drum and the lower headers being connected to the opposite lower drum, and an economizer section integral with said boiler comprising water tubes directly connecting the lower and upper drums of the rear end wall, said economizer section constituting the sole downcomer for the boiler, said tubular water walls being subject to radiant heat and the tubes of the economizer section being subject to the heat of convection of the gases of combustion.



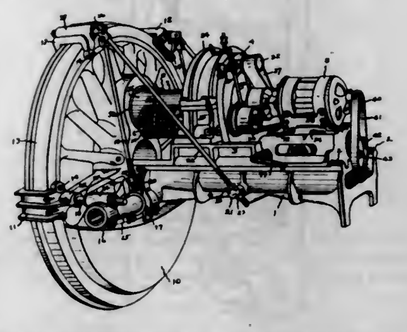
1,780,285. BOILER. JOHN VAN BRUNT, Flushing, N. Y., assignor to International Combustion Engineering Corporation, New York, N. Y., a Corporation of Delaware. Filed May 24, 1926. Serial No. 111,138. 1 Claim. (Cl. 122—235.)

In combination, a furnace shaped tubular boiler, the tubes of which have abutting fins throughout a portion of



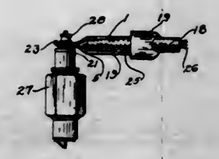
their length and a superheater, the tubes of which are located in the spaces between unfinned portions of the boiler tubes, said superheater tubes and boiler tubes being in substantial juxtaposition, the fins, boiler tubes and superheater tubes cooperating to form a substantially continuous wall marginal of the combustion space.

1,780,286. TREATING HYDROCARBON OILS. CLAUDE W. WATSON, Port Arthur, Tex., assignor to The Texas Company, New York, N. Y., a Corporation of Delaware. Filed July 1, 1927. Serial No. 202,782. 3 Claims. (Cl. 196—73.)



1. In the fractional distillation of hydrocarbon oils, the process which comprises passing the oil through a battery of series-connected stills provided with fractionating towers wherein the oil is exposed to progressively increasing temperatures, subjecting vapors evolved from the stills to fractionation in the fractionating towers, condensing and collecting vapors evolved from the first several stills of the series whereby a distillate fraction is formed containing the more volatile constituents of the oil charge, dividing the charge into a larger and a smaller portion, introducing the smaller portion as a reflux medium to those fractionating towers corresponding to the stills from which vapors forming said distillate fraction are obtained, and introducing the larger portion of the charge into the first still of the series.

1,780,287. OFFICE DESK. CLEM E. WHEELER, Oak Park, Ill. Filed May 5, 1926. Serial No. 106,812. 9 Claims. (Cl. 45—6.)

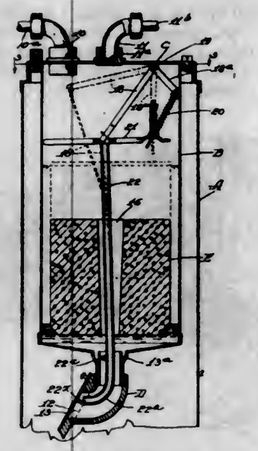


1. An office desk comprising a substantially flat work top and filing compartments, certain of said compartments being located within the desk beneath the top thereof, a receptacle hingedly connected to the desk and containing certain other of said filing compartments, the slot in the desk top communicating with the interior compartment and arranged in co-operative relation to the compartments in said receptacle, a front member hinged at the lower edge and adapted to be limitedly tilted forwardly to present an open entrance into the receptacle, end members carried by the front member of the receptacle for interlapping the fixed ends of the receptacle and accommodating the opening and closing movement of said front member, said end members comprising a plurality of respectively inter-lapping sectors totaling when extended, a width greater than the fore-and-aft depth of the receptacle, and being individually in width less than said fore-and-aft depth.

1,780,288. GRINDING MACHINE. HENRY H. YERK and WILLIAM J. BAUMBERGER, Davenport, Iowa, assignors to Micro Machine Company, Bettendorf, Iowa, a Corporation of Iowa. Filed Aug. 23, 1926. Serial No. 130,886. 13 Claims. (Cl. 51—43.)

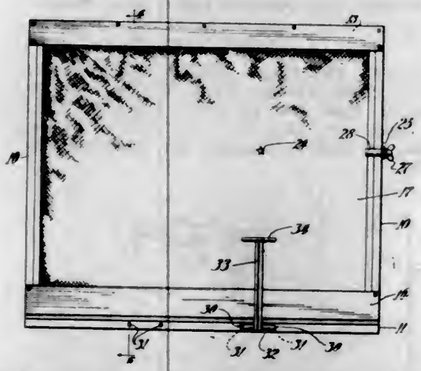
1. A grinding machine for grinding external cylindrical surfaces comprising, in combination, a bed, a carriage slidable on said bed, an annular headstock rotatably mounted on said carriage and arranged that portions of the work to be ground may extend into the annular space thereof, a rotatable grinding wheel spindle carried by said headstock, a power shaft on said carriage having its axis in longitudinal alignment with the axis of said headstock, means for rotating said headstock from said power shaft, and means for rotating said grinding wheel spindle on its own axis from said power shaft during the rotation of said headstock, whereby said grinding wheel spindle may be caused to rotate on its own axis and simultaneously in an orbital path about the surface to be ground.

1,780,289. TERMINAL CONNECTER FOR ELECTRICAL CONDUCTORS. FRANK W. ZEPP, San Francisco, Calif. Filed Jan. 11, 1929. Serial No. 331,728. 8 Claims. (Cl. 173—269.) (Granted under the act of Mar. 3, 1883, as amended Apr. 30, 1928; 370 O. G. 757.)



1. A blank of sheet metal adapted to be formed into an electrical terminal for insulated cables comprising a central body portion, a V-shaped prong projecting from one end thereof, a plurality of V-shaped prongs extending from the other end thereof, and a central prong projecting within said central body portion.

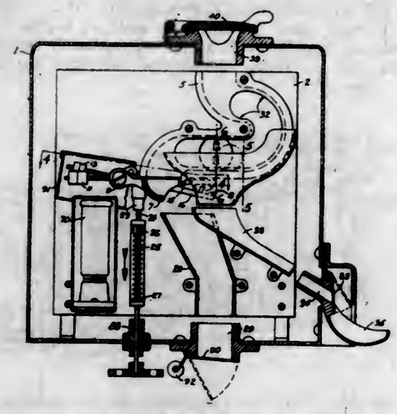
1,780,290. VACUUM FUEL-FEED DEVICE. J LEWIS ANDREWS, Elmwood Park, Ill., assignor to Stewart-Warner Corporation, Chicago, Ill., a Corporation of Virginia. Filed Jan. 18, 1929. Serial No. 333,323. 9 Claims. (Cl. 103—236.)



1. In a construction for lifting liquid fuel by suction, in combination with a receptacle comprising a vacuum chamber having a restricted suction connection, a liquid inflow

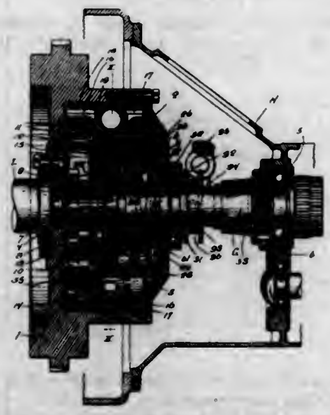
connection and a liquid discharge port at the lower part; a valve at the liquid discharge port adapted to open in the direction of gravity flow of the liquid on the release of the suction; a tubular lever having its tubular cavity extending from the point in the chamber above the high liquid level thereof, downwardly to the liquid discharge

port, and open at said port and terminating in position for operating the discharge valve thereof for opening the same; a float in the chamber and link and lever connections from the float to the tubular lever arranged for actuating said tubular lever in discharge-valve-opening direction upon the rise of the float to a predetermined height.



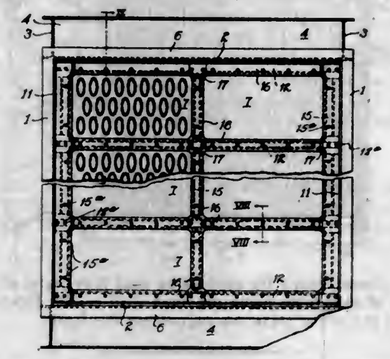
1,780,291. OPTICAL APPARATUS. ALEXANDER S. CAMERON, Chicago, Ill., assignor to William J. Cameron, Chicago, Ill. Filed Dec. 6, 1928. Serial No. 324,096. 15 Claims. (Cl. 88—20.)

1. An optical apparatus comprising a translucent screen having a fixation point upon the side towards the patient, and having a diagram upon the opposite side showing definite optical fields which diagram is normally invisible to the patient and means for displaying and moving a test object to any position upon the screen, which object is visible from both sides of the screen.



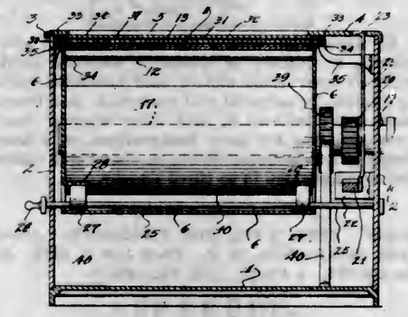
1,780,292. AUTOMATIC LIQUID-FUEL DISPENSER. CHARLES BRAHY, New York, N. Y., assignor to Charles E. Marion, New York, N. Y. Filed Oct. 8, 1929. Serial No. 398,162. 8 Claims. (Cl. 194—13.)

5. In an automatic liquid fuel dispenser, a coin actuated control mechanism containing a pivotally mounted temporary coin receptacle, independently and pivotally mounted supporting means provided with means adapted to hold said receptacle against rotation and a shaft on which said receptacle and said supporting means are both mounted; two contact points, one carried by said receptacle and the other by said supporting means; means to bring said points into abutment; balancing means to yieldably hold said receptacle and said supporting means



against rotation; said balancing means being adjustable to cause said supporting means to yield when the coin deposited within said receptacle is of greater than a predetermined weight, thereby causing said points to separate and permitting said receptacle to continue on its downward course due to the weight of the coin therein, until said coin is caused to drop into a suitably positioned coin box.

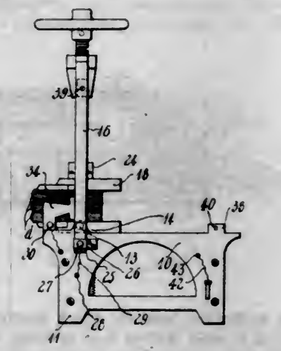
1,780,293. AUTOMATIC TRANSMISSION. HOWARD E. CHRISTIE and KIBBEY W. COUSE, Bronx, N. Y., assignors to C. N. K. Transmission Corp., New York, N. Y., a Corporation of New York. Filed July 15, 1925. Serial No. 43,749. 12 Claims. (Cl. 74—34.)



1. A power transmitting mechanism comprising a drive shaft, a driven shaft, a pair of gripping devices connecting said shafts, means whereby said gripping devices are operable respectively to effect "high speed" and "low speed" connections between said shafts, and fluid pressure means automatically operable in response to an increase in load upon the driven shaft to cause operation of one of said gripping devices and in response to a decrease in load upon the driven shaft to cause operation of the other gripping device, both without dropping the load.

1,780,294. HEAT-EXCHANGING APPARATUS. ARCHIBALD H. DAVIS, Jr., Pittsburgh, Pa., assignor to Shaw-Perkins Manufacturing Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Feb. 1, 1929. Serial No. 336,746. 6 Claims. (Cl. 257—236.)

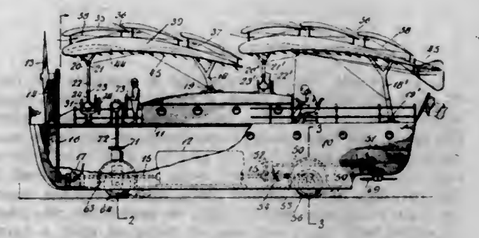
1. Heat exchanging apparatus comprising a framework, rails supported horizontally in two opposite ends in the framework, radiator units comprising parallel tubes and headers connected to the ends of the tubes disposed in the frame work with the headers slidably supported between the adjacent rails to be individually laterally removable from the framework, vertical bars positioned between the rails at the ends of the headers, and clamping members engaging said headers removably connected to said rail members and bars, the rails at one end of the apparatus being adapted to move in the framework to permit expansion of the radiators.



1,780,295. LISTING MACHINE. CHARLES B. EDWARDS, Mount Clemens, Mich. Filed May 17, 1929. Serial No. 363,844. 7 Claims. (Cl. 282—16.)

7. In a listing machine, a casing, a carriage, means for raising and lowering the carriage in the casing, a pair of rolls for supporting a paper strip manually rotatable in the carriage, the paper strip being wound on the rolls and extending therebetween, means for advancing the paper strip by movement of the carriage in one direction, indicating means, means for causing the indicating means to move with the paper strip, and means for disassociating said last named means from the indicating means during movement of the carriage.

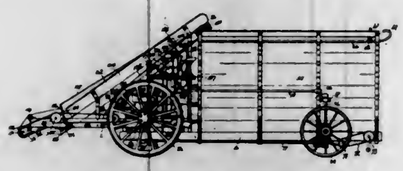
1,780,296. BOOK-BACKING AND PRESS-MACHINE COMBINATION. JACOB W. GROSS, Hartford, Conn. Filed Nov. 5, 1928. Serial No. 317,430. 4 Claims. (Cl. 11—1.)



1. A bookbinding press comprising a frame, a yoke pivoted to the frame, a fixed press member carried by the yoke, a movable press member carried by the yoke, means for forcing the members towards each other, means for holding the yoke in either horizontal or vertical position to permit a book being bound to be worked upon in several operations in the same press, and a counterbalancing spring normally urging the yoke into vertical position.

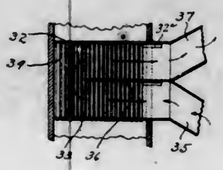
1,780,297. PROCESS OF ELECTRIC FLASH WELDING. WARREN F. HEINEMAN, Shorewood, Wis., assignor to A. O. Smith Corporation, Milwaukee, Wis., a Corporation of New York. Filed Mar. 26, 1930. Serial No. 439,262. 3 Claims. (Cl. 219—10.)

1. The process of electric flash welding comprising first flashing uneven edge portions away to obtain an accurate parallelism of the edges to be welded, then abutting the edges under light pressure while maintaining the application of welding current thereacross to obtain a distribution of heat in the metal adjacent the edges, then establishing a flashing arc between the edges to heat the metal thereof to welding temperature, and finally abutting the edges under heavy pressure and discontinuing the application of the welding current to obtain a fusing and welding of the metal of the edges and to give the required upset to the weld.



1,780,298. CRAFT ADAPTED TO TRAVEL ON LAND OR WATER OR IN THE AIR. JEAN BAPTISTE ICRE, New York, N. Y. Filed Jan. 22, 1929. Serial No. 334,190. 8 Claims. (Cl. 244—12.)

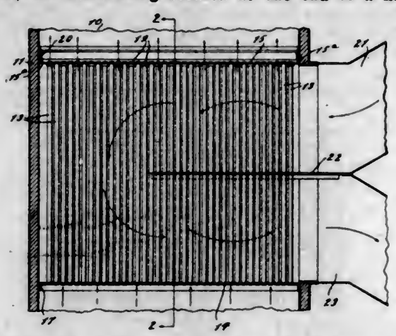
1. In aircraft, a body, a wing connected with said body movably and adapted to assume different inclinations, a compressible cushion interposed between the wing and the body, and a gauge for indicating the condition of said cushion.



5. In a craft of the character described, a body, a main wing connected with said body movably and adapted to assume different longitudinal inclinations, and side portions movably connected with said main wing to swing about axes extending lengthwise of said main wing.

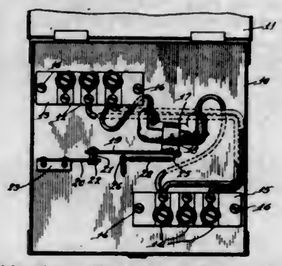
1,780,299. SHOCK LOADING AND UNLOADING MACHINE. JOHN W. JACKSON, Moose Jaw, Saskatchewan, Canada. Filed Feb. 17, 1927, Serial No. 169,093, and in Canada Feb. 24, 1927. 3 Claims. (Cl. 214—82.)

1. In a gathering tank for shock loading machines, a tank having a solid bottom and vertical sides diverging rearwardly, rails mounted below and inside the top of said diverging sides, endless carriers mounted on the bottom of said tank, means to actuate said carriers from the driver's seat, an end gate comprising a vertical portion extending to the top of said tank sides, antifriction wheels mounted adjacent the top of said vertical sides, positioned to travel on said rails, a platform extension fastened to the lower end of said end gate at right angles thereto, and normally resting on said carriers, and means at the rear of said rails to prevent the said antifriction wheels from leaving said rails when the end gate is swung rearwardly.



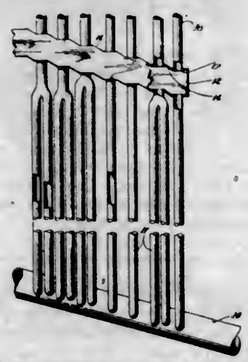
1,780,300. HEAT-TRANSFER DEVICE. DAVID S. JACOBUS, Montclair, N. J., and WILLIAM A. JONES, West New Brighton, N. Y., assignors to The Babcock & Wilcox Company, Bayonne, N. J., a Corporation of New Jersey. Filed Apr. 21, 1926. Serial No. 103,443. 15 Claims. (Cl. 251—224.)

1. In an air heater comprising a plurality of rows of vertically extending tubes, a single upper and a single lower plate each provided with openings through which the upper and lower ends, respectively, of the tubes pass, the tubes being secured at one end to a first of said plates and the other ends thereof being slidably received in the openings of the second plate, and associated means for supporting said second plate on said tubes, the plate to which said tubes are secured being of such a thickness that its own weight and the weight of the tubes secured thereto would normally cause said plate to sag substantially.



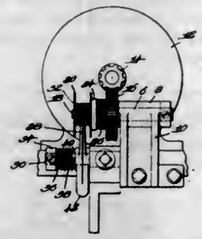
1,780,301. FLUID HEATER. WILLIAM A. JONES, West New Brighton, N. Y., assignor to The Babcock & Wilcox Company, Bayonne, N. J., a Corporation of New Jersey. Filed Aug. 9, 1927. Serial No. 211,742. 8 Claims. (Cl. 257—224.)

1. In a fluid heater, a plurality of vertically extending tubes, upper and lower plates provided with openings in which the upper and lower ends of said tubes are received, the tubes being secured at one end to a first of



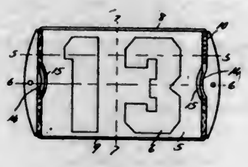
said plates, means for supporting said first plate, at least some of said tubes being provided with collars located beneath the other plate for supporting the latter.

1,780,302. ACTUATOR FOR CONTROLLING DEVICES. LAWRENCE E. KOCH and HENRY F. DEVER, Elkhart, Ind., assignors, by mesne assignments, to Time-O-Stat Controls Company, Elkhart, Ind., a Corporation of Maryland. Filed May 5, 1928. Serial No. 275,370. 3 Claims. (Cl. 200—122.)



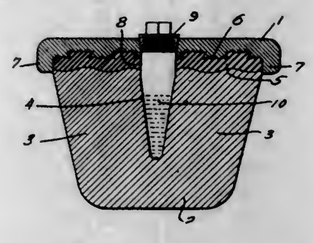
1. In combination with a thermally operated actuator comprising a plurality of bimetallic elements connected together at their ends, one of said bimetallic elements being electrically actuated and controlled, said bimetallic elements being opposed to each other whereby they are self compensating for room temperatures, of a mercury contactor switch mounted wholly on one of said bimetallic elements and adapted to be tilted thereby.

1,780,303. FIRE WALL FOR FURNACES. ABBOT A. LANE, New Rochelle, N. Y. Filed Apr. 7, 1928. Serial No. 268,092. 1 Claim. (Cl. 122—235.)



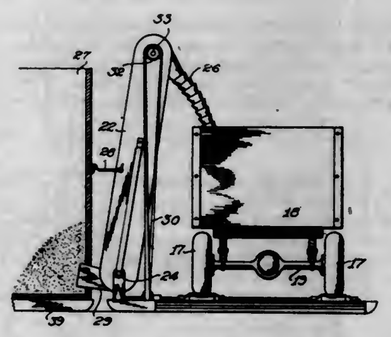
A water wall for furnaces comprising a lower feed pipe, a plurality of vertical pipes extending upward from said feed pipe, a header at the tops of said pipes and secured thereto, said header being of a generally inclined character and having spaced parallel upper and lower walls including spaced horizontal wall portions and inclined portions connecting said horizontal portions, the tops of the vertical pipes extending through the bottom horizontal wall portions and being bent over on the interior thereof, and other vertical pipes projecting upwardly from the header and communicating therewith, the lower ends of said last mentioned pipes extending through the top horizontal wall portions of the header and having their ends bent over on the interior of said header, substantially as described.

1,780,304. BOBBIN-WINDING MACHINE. BERNARD T. LEVEQUE, Wenham, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Apr. 18, 1928. Serial No. 270,907. 6 Claims. (Cl. 242—22.)



1. A bobbin winding machine having, in combination, a bobbin supporting spindle, a driver for the bobbin, means adapted for one position of the bobbin lengthwise of the spindle to operatively connect the bobbin to the driver, means tending constantly to move the bobbin out of operative position, and a thread contact finger adapted through contact with the bobbin flanges to hold the bobbin in operative position and to be moved by the thread mass from between the flanges to release the bobbin.

1,780,305. FRAME FOR DISPLAY SIGNS AND THE LIKE. IWAN LIPKOWSKI, Detroit, Mich. Filed Apr. 8, 1929. Serial No. 353,328. 2 Claims. (Cl. 40—125.)

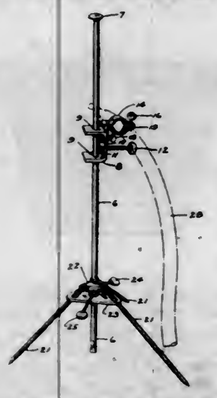


1. In a display sign, the combination with a slab having recesses in its side edges, of a frame therefor having a rear portion backing said slab and integral side, top and bottom flanges adapted to engage the sides of the slab, the top and bottom flanges being formed with infolded end tabs angularly disposed to the remainder of such flanges, and the side flanges of the frame being formed with spaced walls enclosing the inturned tabs of the top and bottom flanges, portions of the side flanges being crimped into the recesses of the slab to secure the slab within the frame.

1,780,306. VEHICLE TIRE. CHARLES M. MANLY, deceased, Kew Gardens, N. Y., by John M. Manly, Chicago, Ill., Basil M. Manly, Washington, D. C., and William G. Manly, Columbia, Mo., executors, assignors to Overman Cushion Tire Company, Inc. Filed May 21, 1928. Serial No. 279,580. 3 Claims. (Cl. 152—1.)

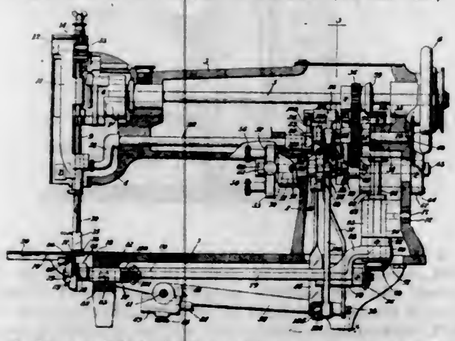
1. A tire comprising in combination a metal base-band, a rubber tire-body vulcanized to the outer peripheral surface of said base-band, said tire being hollow with a closed circumferentially extending cavity formed between said rubber tire-body and said base-band; and a heat transferring liquid contained within said cavity to transfer the interior body heat to the base-band.

1,780,307. PORTABLE GRAIN-LOADING DEVICE. ARPAD MCLENNAN, Kitscoty, Alberta, Canada. Filed Jan. 15, 1929, Serial No. 332,603, and in Canada June 8, 1928. 3 Claims. (Cl. 198—203.)



1. A portable grain loading device including a platform having longitudinal shafts thereon with pairs of rollers adjacent opposite ends; side extensions hinged to said platform; a grain elevator hinged to one end of said platform and supported in upright position thereon for operation; said grain elevator being adapted to be folded down over said platform for transportation purposes; said side extensions of the platform being adapted to be folded up against said grain elevator for transportation purposes; a support on said platform for said grain elevator when the latter is folded down in inoperative position on said platform; and means for transferring power from one of said shafts to said grain elevator to operate the latter when in operative upstanding position.

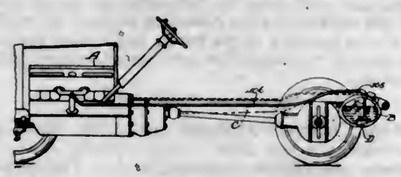
1,780,308. ADJUSTABLE WATER-SPRINKLER HOLDER. ALBERT S. MORRIS, Oakland, Calif. Filed Aug. 29, 1928. Serial No. 302,775. 2 Claims. (Cl. 248—29.)



1. A device of the character described having in combination, a tripod consisting of a plurality of legs pivotally fastened on a tripod head; a rod vertically mounted in and through the tripod head and constructed to be slidable therein; a plate, having a plurality of holes for the

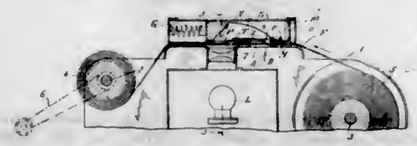
legs to project through, mounted slidable on said rod underneath the tripod head; said tripod legs being mounted slidable in the holes of said plate; the holes in said plate being so arranged that the legs are spread apart when the plate is moved on the rod toward the tripod head and are moved toward each other when the plate is moved

on the rod away from the tripod head; a holder mounted vertically and circumferentially adjustable on the rod above the tripod head; means for fastening the tripod head adjustable on said rod; and threaded means constructed to extend through a portion of the plate and be applied against the rod to hold the plate vertically adjustable directly on the rod.



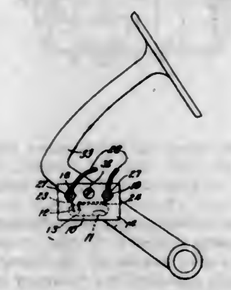
1,780,309. STITCH-FORMING MECHANISM FOR SEWING MACHINES. WALTER MYERS, Bridgeport, Conn., assignor to The Singer Manufacturing Company, Elizabeth, N. J., a Corporation of New Jersey. Filed July 3, 1929. Serial No. 375,615. 18 Claims. (Cl. 112—59.)

1. In a sewing machine, an endwise reciprocatory needle, a loop-taker cooperating with said needle in the formation of stitches, mechanism for vibrating the needle laterally, and compensating mechanism for insuring cooperative relation between the loop-taker and the needle during lateral vibrations of the latter, which compensating mechanism is ineffective during vibrations of the needle from its position of non-vibration to a predetermined extent of vibration and is rendered effective for vibrations of the needle beyond said predetermined extent.



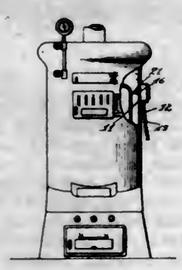
1,780,310. FUEL-FEEDING APPARATUS FOR INTERNAL-COMBUSTION ENGINES. JOHN K. OLSEN, Chicago, Ill., assignor to Stewart-Warner Corporation, Chicago, Ill., a Corporation of Virginia. Filed Mar. 17, 1927. Serial No. 175,954. 6 Claims. (Cl. 261—72.)

1. In a construction for the purpose indicated comprising a container for fuel and connections therefrom for conducting fuel to the engine intake, apparatus in the container for effecting delivery of fuel therefrom through said connections, said aparatus comprising two conduits constituting said connections, a receptacle consisting of an upwardly open cup and a top plate applied liquid-tight onto the upper margin of the cup, said top plate having apertures for liquid-tight junction therewith of said two conduits; one of said conduits leading to the atmosphere



and the other constituting the fuel delivery connection; a member interposed between the upper margin of the cup, and said top plate comprising a web and flange dimensioned for completely covering and closing the first mentioned cup at the top of the latter, and comprising a depression dimensioned horizontally for spanning and effecting the coupling together of the two conduits at the under side of said cover plate.

1,780,311. MOVING-PICTURE MACHINE. ARMANDO PAPÒ and AUGUSTO GENTILINI, Rome, Italy. Filed Sept. 9, 1925. Serial No. 55,260. 23 Claims. (Cl. 88—16.8.)



1. In a motion picture machine the combination of an optical system having a portion of its optical axis parallel with the plane of the film, and including a reflector properly spaced from a projecting lens, said system being adapted to be moved in synchronism with the film during the projection of the picture, means for moving said reflector comprising a film-engaging member carired thereby adapted to be engaged directly by the film and transmit the movement of the film to said reflector, said reflector registering intermittently with said picture to transmit light to said projecting lens, and means for continuously advancing said film.

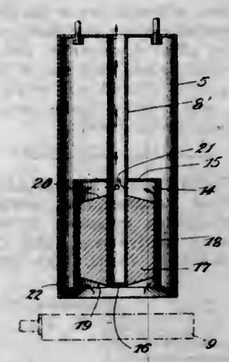
1,780,312. MOUNTING FOR ELECTRICAL SWITCHES. LOUIS A. M. PHELAN, Beloit, Wis., assignor, by mesne assignments, to Time-O-Stat Controls Company, Elkhart, Ind., a Corporation of Maryland. Filed July 19, 1923. Serial No. 652,540. 3 Claims. (Cl. 200—59.)

1. A switch device comprising a tiltably operated liquid contactor tube, a housing therefor formed of two co-operating portions of insulating material for enveloping said tube, means fixed to one of said portions for removably attaching the other portion thereto, said means serving as electrical terminals for the electrodes of said tube, and means for fixing the tube rigidly in one of the portions of said housing.

1,780,313. FUSIBLE SWITCH PLUG. LOUIS A. M. PHELAN, Elkhart, Ind., assignor, by mesne assignments, to Time-O-Stat Controls Company, Elkhart, Ind., a Corporation of Maryland. Filed July 5, 1927, Serial No. 203,318. Renewed Apr. 7, 1930. 6 Claims. (Cl. 200—142.)

1. A thermally controlled circuit breaker comprising an apertured plug, a stationary insulating member and a relatively movable insulating member mounted on said plug, coacting contact making members mounted on each of said insulating members, means between said insulating members to disengage said contact members, thermally controlled means normally restraining said disengaging movement, and a heat conducting element disposed in said plug aperture in thermal contact with said restraining means.

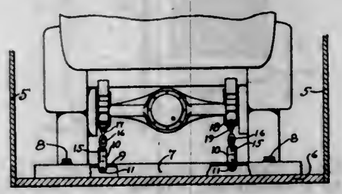
1,780,314. COLORING AGENT FOR FABRICS AND METHOD OF MAKING SAME. ANTON PICAREFF, New York, N. Y., assignor to Anton Picareff Art Studios, Inc., New York, N. Y., a Corporation of New York. Original application filed May 14, 1927, Serial No. 191,551. Divided and this application filed May 21, 1929. Serial No. 364,946. 3 Claims. (Cl. 8—6.)



1. A coloring agent for fabrics consisting of a basic dye stuff, gum acacia, and tannic acid in an aqueous solution.

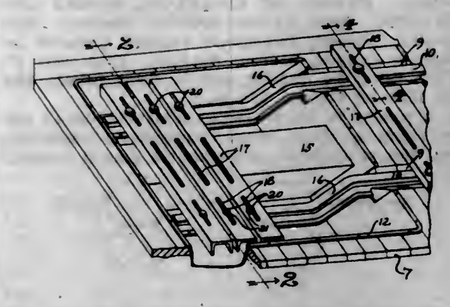
1,780,315. GREASE. OTTO C. SCHMIDT, Sharpsburg, Pa. Filed Nov. 17, 1928. Serial No. 320,212. 4 Claims. (Cl. 87—9.)

3. A lubricating compound containing paraffin wax, petroleum oil and sheep wool grease.



1,780,316. HOT-WATER TANK. GERHARDT F. SCHWARTZ, St. Louis, Mo. Filed Feb. 10, 1928. Serial No. 253,334. 1 Claim. (Cl. 122—156.)

A tank for storage water heaters having a central flue for heated air and gases extending therethrough and closed at its lower end, a flue section of relatively large diameter surrounding the lower end portion of said central flue and having a top wall closing the upper end thereof, the lower end of said flue section being open to receive the heated air and gases, a cylindrical deflecting member fixed to the lower end portion of the central flue within said enlarged flue section and having a cylindrical surface adjacent to the vertical wall of said flue section to provide a narrow annular passage therebetween for the air and gases, and the wall of said central flue between the upper end of said deflecting member and the top wall of said enlarged

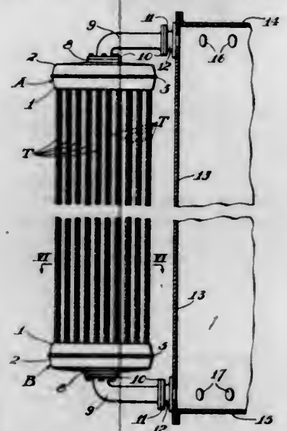


flue section having a plurality of openings therein for the passage of the gases from said enlarged flue section into the central flue.

1,780,317. SHIPPING DEVICE. CLIFFORD L. SNYDER, Detroit, Mich., assignor to The Evans Auto Loading Co. Inc., a Corporation of Delaware. Filed Feb. 27, 1929. Serial No. 343,087. 2 Claims. (Cl. 105—368.)

1. In combination, a supporting floor, a channel member secured to the floor and having a slot therein, a second member secured to the channel member through the slot, being movable along the slot, said second member being also movable to extend substantially vertical or substantially horizontal, as desired, and having means thereon for attachment of a vehicle hold-down.

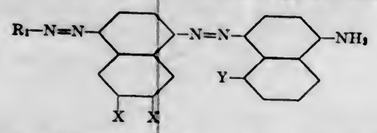
1,780,318. SHIPPING DEVICE. CLIFFORD L. SNYDER, Detroit, Mich., assignor to The Evans Auto Loading Co. Inc., a Corporation of Delaware. Filed Feb. 27, 1929. Serial No. 343,088. 5 Claims. (Cl. 105—368.)



1. In combination, a freight car or the like, a guideway adjacent the floor of the car, a member secured to the car and movable along the guideway, said member having means for attachment of a shipping device there-

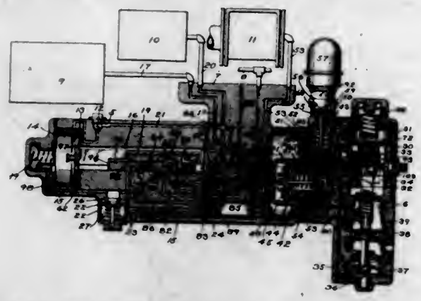
to, a pan in the car floor, extending beneath the surface of the floor and means for moving said member into said pan.

3. In combination, a freight car or the like, a guide rail extending longitudinally along the floor thereof, one end of said rail being offset downwardly, and a member secured to and movable along said rail to positions either on the normal portion of said rail or on the depressed portion thereof, said member having means for attachment of a shipping device thereto.



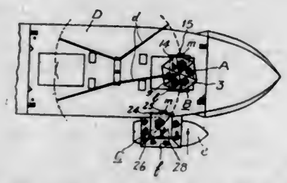
1,780,319. DEFORMED TUBE RADIATOR. CHARLES SONNEBORN, West Pittsburg, Pa., assignor to Shaw-Perkins Manufacturing Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Dec. 17, 1926. Serial No. 155,410. 1 Claim. (Cl. 257–191.)

A radiator adapted to be directly attached to and supported by a transformer cooling tank comprising sheet-metal headers having elliptical openings punched therein, inturned flanges bounding said openings, tubes comprising welded seams connecting the headers and attached thereto, the ends of the tubes extending into the openings and the edges of the tube ends being welded to the said bounding flanges, the tubes being formed of sheet-metal and having smooth elliptical shaped ends adapted to fit into said openings, the intermediate body of the tubes being deformed to provide a middle circular portion with open flattened wings extending therefrom on opposite sides thereof, the seams of the tubes lying in said circular portion.



1,780,320. DYEING OF CELLULOSE ESTERS AND ETHERS. ERIC ALFRED SPEIGHT, Blackley, Manchester, England, assignor to Imperial Chemical Industries Limited, London, England. Filed Apr. 27, 1929, Serial No. 358,766, and in Great Britain May 30, 1928. 8 Claims. (Cl. 8—5.)

1. A process for the production of black shades on cellulose esters or ethers which comprises the application to the fibre of a disazo dye having the general formula:

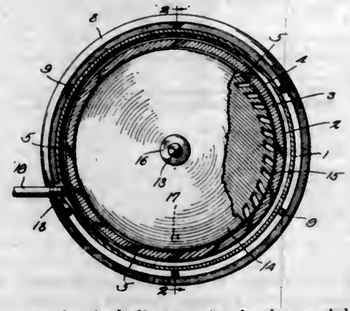


wherein one X represents hydrogen and the other X represents hydrogen or a sulphonic group, R_1 represents a benzene residue free from sulphonic and carboxylic groups, and Y represents an auxochromic salt-forming group.

1,780,321. TRIPLE-VALVE DEVICE. THOMAS H. THOMAS, Edgewood, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa, a Corporation of Pennsylvania. Filed Nov. 30, 1928. Serial No. 322,634. 5 Claims. (Cl. 303—39.)

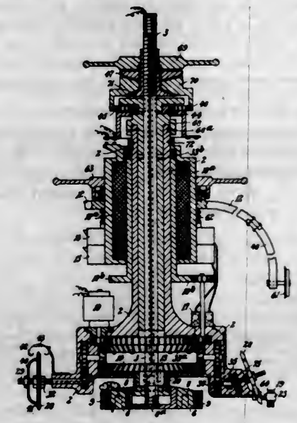
1. In a fluid pressure brake, the combination with a brake pipe and a brake cylinder, of a pipe bracket, connections from said brake pipe and said brake cylinder to said pipe bracket, a reservoir in said pipe bracket, and a plurality of valve devices carried by the pipe bracket for controlling the supply of fluid to the brake cylinder, one of said valve devices being operative upon a reduction in brake pipe pressure for connecting said brake pipe to said reservoir to effect a predetermined local reduction in brake pipe pressure.

1,780,322. APPARATUS FOR ENABLING HATCH LOADING IN THE RAIN FOR SHIPS OR THE LIKE. SHINGO TSUJI, Tokyo, Japan. Filed July 9, 1928, Serial No. 291,405, and in Japan Aug. 4, 1927. 2 Claims. (Cl. 214—15.)



2. In loading apparatus of the class described, in combination with a crane having a hoisting tackle comprising a pulley and a cord, an umbrella-like protecting means comprising a fabric, a lower runner member through which the hoisting cord freely passes, rods arranged radially with respect to said lower runner member and on which said fabric bears, said rods being pivotally connected to said lower runner member, an upper runner member through which also the hoisting cord freely passes, cords connecting the upper and lower runner members, cords pivotally connected at their upper ends to the upper runner member and connected at their lower ends to the peripheral portion of said fabric, cords suspending said upper runner member from the crane and a stop element on the hoisting cord below the lower running member and arranged when the hoisting cord moves upwardly, to engage and thereby cause the lower runner member to move upwardly, so that the fabric becomes folded.

1,780,323. UTILIZATION OF GALVANIZER'S WASTE. WILLIAM GEORGE WARING, Webb City, Mo. Filed July 6, 1929. Serial No. 376,503. 5 Claims. (Cl. 75—18.)

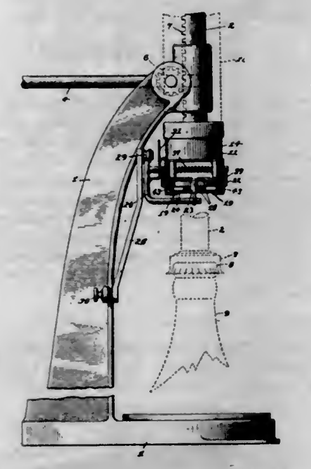


1. In the utilization of galvanizers' waste, the process which comprises wet grinding such waste, screening out metallic particles, neutralizing the screened slurry, distilling off ammonia, oxidizing to convert ferrous iron into ferric, filtering the slurry and washing the solids to remove chlorids and extracting the washed solids with ammonium carbonate solution to dissolve and remove zinc while leaving lead compounds undissolved.

1,780,324. STEAM ENGINE. WILLIAM A. WEBSTER, Galesburg, Ill., assignor of one-third to Leon J. Castle, Abingdon, Ill. Filed Jan. 28, 1928. Serial No. 250,227. 1 Claim. (Cl. 253—56.)

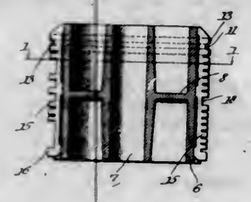
A steam engine including a rotor having peripheral recesses gradually increasing in depth from their ends toward their centers and having opposed flat faces, all of the recesses being disposed at a tangent to a single imaginary circle concentric with the rotor, and a stator housing the rotor, said stator including opposed heads, each having a space in the inner side thereof substantially coextensive with the rotor, concentric contacting rings interposed between the heads and surrounding the rotor, and means for clamping the heads on the rings, there being registering grooves in the meeting faces of the rings forming a continuous distributing passage, a steam inlet port in the outer ring opening into said passage, and a plurality of outlet ports in the inner ring for directing jets of steam from the distributing passage into the recesses, said ports being tangentially disposed, the ports farthest from the inlet being spaced apart greater distances than those ports adjacent the inlet, there being clearance between the rotor and the heads for the escape of steam laterally from the peripheral recesses in the rotor to the spaces in the heads, and outlet ports in the heads communicating with the spaces.

1,780,325. TREPAN TOOL WITH RADIAL CAGE, CUTTER, AND GUIDE. ERNEST WILLIAMS, Stone, England. Filed Oct. 16, 1926, Serial No. 142,131, and in Great Britain Oct. 29, 1925. 24 Claims. (Cl. 29—67.)



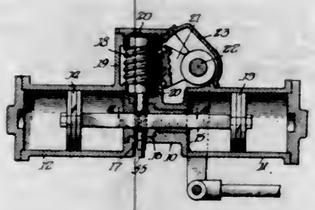
3. A trepan machine for making annular cuts, comprising a plurality of rotary cutters, a radial cage therefor, radially disposed spindles rotatably mounted in said cage, each spindle having secured thereto a rotary cutter, a central axis upon which is rotatably mounted the radial cage, means for rotating said cutters, means for guiding the cutters in a circular path, means for rotating the cutters at any angle in relation to the radial cage, means for operating the radial cage, and means for supporting the central axis on the work.

1,780,326. ALDEHYDE AMINE CONDENSATION PRODUCT. IRA WILLIAMS and WALDO BRIGGS BURNETT, Pittsburgh, Pa., assignors, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del., a Corporation of Delaware. Filed Mar. 13, 1925. Serial No. 15,337. 16 Claims. (Cl. 260—130.)



1. As new compositions of matter, the condensation products resulting from the direct reaction with the elimination of water from the reaction mixture during the condensation reaction of one molecular proportion of an amine body with more than two molecular proportions of aliphatic aldehyde having a plurality of carbon atoms in the molecule, which products are yellowish to brown colored, liquid, semi-solid or a morphous solid substances insoluble in water, soluble in organic solvents, highly unsaturated and which absorb oxygen from the air.

1,780,327. BOTTLE-CAPPING MACHINE. COMMODORE B. WOODMAN, Oakland, Calif., assignor of one-half to Oscar Hoffman, Oakland, Calif. Filed July 14, 1928. Serial No. 292,750. 9 Claims. (Cl. 226—84.)



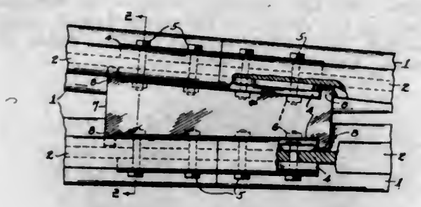
1. The combination with a bottle capping machine having a plunger and die movable to press a cap onto the mouth of a bottle, of a bracket mounted in connection with the plunger; a magazine mounted upon the bracket and arranged to contain a supply of caps; a member slidably mounted upon the bracket and movable to carry caps from the magazine to the die, said member having a body portion and a hinged extension offset below the surface of the body portion to receive a cap; actuating means for reciprocating said member as the plunger is raised and lowered; and means supporting the caps within the magazine and actuated to release the lowermost cap into engagement with the hinged extension each time the member is reciprocated.

1,780,328. KNITTING MACHINE. ELMER U. AMES, deceased, Collingswood, N. J., by Caroline F. Ames administratrix, Haddonfield, N. J. Original application filed Mar. 19, 1926, Serial No. 96,049. Divided and this application filed Apr. 26, 1930. Serial No. 447,694. 19 Claims. (Cl. 66—156.)

10. A pattern element for a knitting machine instrumentality comprising an elongated member having a plurality of selecting means of frangible material in spaced relation along an edge of said member.

1,780,329. REVERSING-GEAR MECHANISM. FRANCIS N. BARD, Highland Park, Ill. Original application filed July 31, 1920, Serial No. 400,478. Divided and this application filed Nov. 28, 1921. Serial No. 518,426. 2 Claims. (Cl. 121—41.)

1. In a reverse gear operating mechanism, a fluid operated motor including a cylinder, a piston operating in said cylinder, a rack bar connected to said piston and extending without the cylinder, a worm arranged with its axis transversely of said rack bar and operated thereby, means connected to the reverse gear for receiving motion from said worm, a casing for said worm, said means and said rack bar and forming a substantially common bearing for the rack bar, and worm, and an extension from said worm through said casing whereby the mechanism may be manually operated.



1,780,330. SOAP CAKE AND ART OF MAKING SAME. ROBERT S. BLAIR, Stamford, Conn. Filed Feb. 23, 1923. Serial No. 620,633. 4 Claims. (Cl. 87—23.)

1. A soap cake having an outer solid shell of soap and an inner non-solid soap filling of hard structure and extending throughout the interior of said shell in sponge-like form and of such size as largely to increase the size of the cake.

4. The herein described art which consists in introducing air into a mass of soap in physically soft condition to form therein a mass of air cells of such substantial and readily perceptible size as largely to increase the volume of the soap, permitting the soap to harden, and forming its surface into a substantially smooth shell.

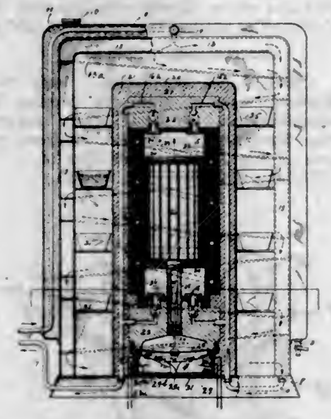
1,780,331. FOOT GUARD. JEFFERSON BRADFORD and CHARLES B. PEOPLES, Butler, Ky. Filed Nov. 14, 1929. Serial No. 407,225. 3 Claims. (Cl. 238—379.)

1. A foot guard of the type indicated comprising a substantially rectangular plate having outwardly laterally directed lugs positioned on one side and adjacent each end.

1,780,332. WATER SPRINKLER. EVERARD CURRIE BRICKHILL, North Fitzroy, Australia. Filed Dec. 16, 1927. Serial No. 240,582. 2 Claims. (Cl. 299—69.)

1. A sprinkler including a rotating cross head, spray arms carried thereby, and a plurality of nozzles removably carried by each of the spray arms and extending laterally therefrom, each of the nozzles being formed with elongated slots in a plane at right angles to the axis of the nozzles, the slots of the nozzles remote from the cross head being of greater width and less length than the slots in the nozzles more nearly adjacent the cross head.

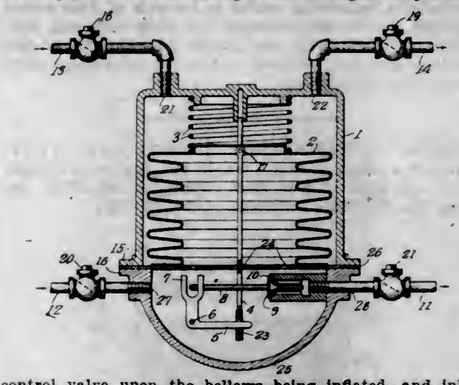
1,780,333. APPARATUS FOR AGITATING THE CONTENTS OF STORAGE VESSELS. WILLIAM H. BROOKS, Oconomowoc, Wis., and WALTER PAGE, New York, N. Y. Filed Apr. 3, 1929. Serial No. 352,159. 5 Claims. (Cl. 259—56.)



1. Apparatus for agitating the contents of containers comprising a guide way, a conveyer running above the guide way in position to make contact with containers in the guide way and roll them from one point to another, said containers being disposed in transverse position within said guide way and the guide way being bowed upward between its ends to tension the conveyer in contact with all of the containers in the guide way.

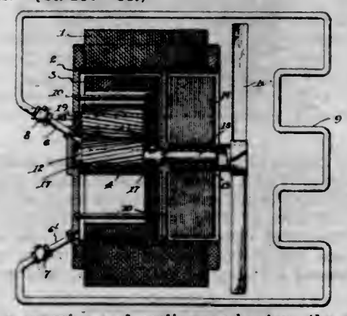
1,780,334. ALDEHYDE AMINE CONDENSATION PRODUCTS. WALDO BRIGGS BURNETT and IRA WILLIAMS, Pittsburgh, Pa., assignors, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del., a Corporation of Delaware. Filed Feb. 12, 1926. Serial No. 87,956. 31 Claims. (Cl. 260—130.)

1. As new compositions of matter, the aldehyde amine condensation products which are substantially identical with the condensation products obtained by reacting in the presence of an acidic substance and under conditions whereby water is eliminated from the reaction mixture during the condensation reaction, with one molecular proportion of an amino body upon two or more molecular proportions of an aldehyde containing more than two carbon atoms in the molecule and which products are yellowish to brown liquids or amorphous semi-solid or solid substances.



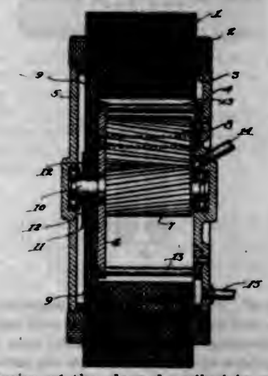
1,780,335. ELECTRICAL PUMP. ALLEN A. CANTON, New York, N. Y., assignor to Cantonice Corporation, New York, N. Y., a Corporation of New York. Filed Apr. 22, 1927. Serial No. 185,673. 9 Claims. (Cl. 230—55.)

1. In an electrically operated pump device, a magnetic field, an armature rotating and sliding in said field, a pump casing surrounding said armature and separating it from the field and means at one end of the armature and casing compelling a reciprocation of the armature while it rotates.



1,780,336. PUMPING MECHANISM. ALLEN A. CANTON, New York, N. Y., assignor to Glacier, Inc., the State of New York. Filed Dec. 31, 1928. Serial No. 329,572. 6 Claims. (Cl. 103—44.)

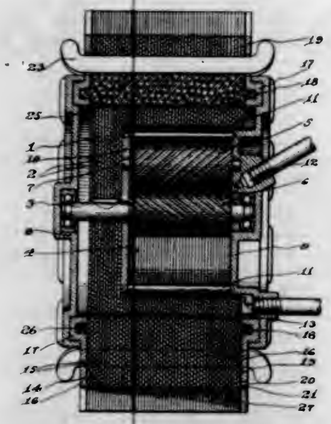
1. A pump comprising a casing, a plate dividing said casing into upper and lower chambers and extending entirely across the space within the casing, said plate having perforations in its central portion, a bellows diaphragm in said upper chamber having its lower end open and its upper end closed, the lower end of the diaphragm being secured to said plate around the perforations therein, an inlet pipe opening into the lower chamber and provided with a check valve opening toward the lower chamber, an inwardly opening control valve at the inner end of said outlet pipe, a valve actuating device arranged to open said



control valve upon the bellows being inflated, and inlet and outlet pipes provided with check valves and communicating with said upper chamber.

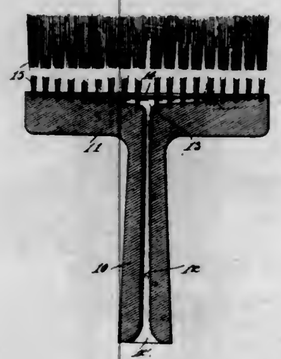
1,780,337. PUMPING MECHANISM. ALLEN A. CANTON, New York, N. Y., assignor to Glacier, Inc., the State of New York. Filed Dec. 31, 1928. Serial No. 329,574. 6 Claims. (Cl. 230—58.)

1. In a pumping and cooling mechanism, the combination of a motor field element and two armatures and a plurality of impellers, one driven by each of said armatures, both of said armatures operated by the same field element.



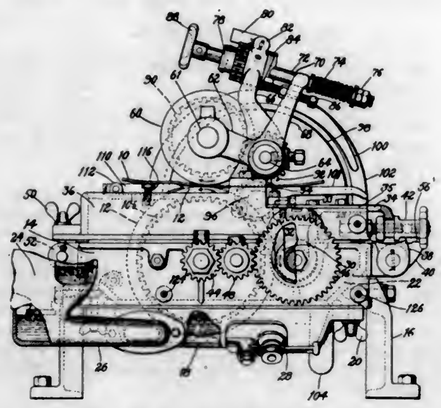
1,780,338. COMBINATION MOTOR AND PUMP. ALLEN A. CANTON, New York, N. Y., assignor to Glacier, Inc., the State of New York. Filed Dec. 31, 1928. Serial No. 329,575. 9 Claims. (Cl. 230—58.)

1. In a device of the class described in combination, a magnetic field element, a revolving armature, a pump



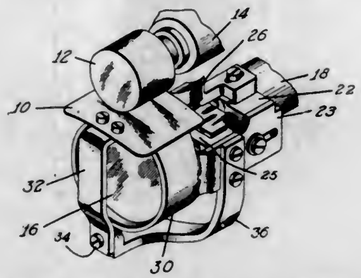
housed in said armature, and means for making said armature leak-proof from said field element, said means consisting of a cylindrical casing and a pair of head plates attached to the field element and fully enclosing said armature, bearings in said plates for said pump, said bearings being fully enclosed and having no opening which leads to the atmosphere.

1,780,339. COMBINATION MOTOR AND PUMP. ALLEN A. CANTON, New York, N. Y., assignor to Glacier, Inc., the State of New York. Filed Jan. 28, 1929. Serial No. 335,725. 5 Claims. (Cl. 172—36.)



1. In a device of the class described, the combination of an armature, of a stator core surrounding said armature, said stator core consisting of a series of laminations, the end laminations being roughened and coated with a binding compound, flanged rings attached to the said end laminations, end plates attached to said rings, said end plates forming a leak-proof enclosure for said armature.

1,780,340. PLASTERER'S BRUSH OR THE LIKE. JOHN T. COOK, St. Paul, Minn. Filed Aug. 2, 1929. Serial No. 383,136. 2 Claims. (Cl. 15—160.)



1. A plasterer's brush or the like comprising a handle and a head at one end of said handle, said head having a funnel-like depression in its bristle face, said handle having a drainage bore extending through the same and opening into the center of the said depression and bristles set in the inner face of the said depression.

1,780,341. CEMENTING MACHINE. JOHN W. COSGROVE, Medford, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed July 22, 1927. Serial No. 207,737. 16 Claims. (Cl. 91—51.)

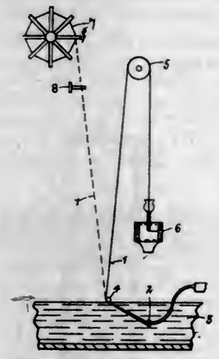
1. In a cementing machine, an applying roll, a pressure roll associated with said applying roll, a pivotal mounting for said pressure roll, a spring urging said pivotal mounting in a direction to carry the pressure roll toward the applying roll, and means for determining the initial separation of the pressure roll from the applying roll comprising a manually operable member rotatable about an axis normal to the axis of one of said rolls arranged to move said pivotal mounting against the tension of said spring.

1,780,342. CEMENTING MACHINE. JOHN W. COSGROVE, deceased, Medford, Mass., by Caroline E. Cosgrove, administratrix, Medford, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed June 14, 1929. Serial No. 371,001. 6 Claims. (Cl. 91—18.)

1. In a cementing machine, a cement applying device, a work supporting device disposed below said cement applying device, means for protecting said work supporting device from cement drippings comprising a guard movable between two positions in one of which it is adapted to be interposed between said devices.

1,780,343. PROCESS FOR BREAKING PETROLEUM EMULSIONS. MELVIN DE GROOTE, St. Louis, and LOUIS T. MONSON, Maplewood, Mo., assignors to Wm. S. Barnickel & Company, Webster Groves, Mo., a Corporation of Missouri. Filed Jan. 21, 1929. Serial No. 334,104. 10 Claims. (Cl. 196—4.)

1. A process for breaking a petroleum emulsion of the water-in-oil type, which consists in subjecting the emulsion to the action of a demulsifying agent comprising wood sulfite liquor material and a sulfonic demulsifying body.



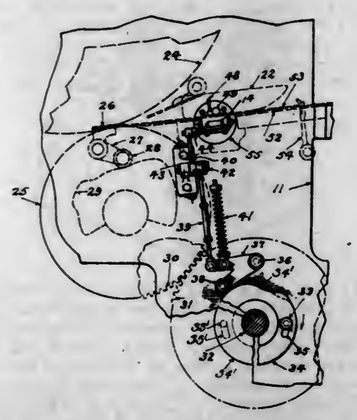
1,780,344. PROCESS FOR BREAKING PETROLEUM EMULSIONS. MELVIN DE GROOTE, St. Louis, LOUIS T. MONSON, Maplewood, and ARTHUR F. WIRTEL, Webster Groves, Mo., assignors to Wm. S. Barnickel & Company, Webster Groves, Mo., a Corporation of Missouri. Filed Jan. 21, 1929. Serial No. 334,107. 16 Claims. (Cl. 196—4.)

1. A process for breaking a petroleum emulsion of the water-in-oil type, which consists in subjecting the emulsion to the action of a demulsifying agent containing an amylated aromatic sulfonic body, characterized by the fact that it will produce an insoluble precipitate with a soluble alkaline earth salt.

1,780,345. PROCESS FOR BREAKING PETROLEUM EMULSIONS. MELVIN DE GROOTE, St. Louis, LOUIS T. MONSON, Maplewood, and ARTHUR F. WIRTEL, Webster Groves, Mo., assignors to Wm. S. Barnickel & Company, Webster Groves, Mo., a Corporation of Missouri. Filed Jan. 21, 1929. Serial No. 334,108. 20 Claims. (Cl. 196—4.)

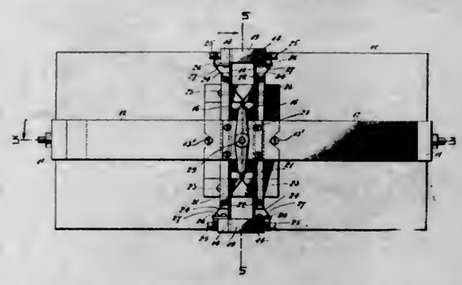
1. A process for breaking a petroleum emulsion of the water-in-oil type, which consists in subjecting the emulsion to the action of a demulsifying agent, containing a substituted aromatic detergent-froming sulfonic body of the type X F R SO_3 Z; wherein X is a polycyclic aromatic nucleus; F a detergent-forming organic residue, R, an alcohol residue derived from an alcohol of fewer than twelve carbon atoms and substituted in the aromatic ring; SO_3 represents the conventional sulfonic acid residue; and Z represents an hydrogen ion equivalent.

1,780,346. MANUFACTURE OF ARTIFICIAL SILK AND THE LIKE. WILLIAM PORTER DREAPER, Hampstead Heath, England. Filed Jan. 3, 1927, Serial No. 158,838, and in Great Britain Jan. 11, 1926. 2 Claims. (Cl. 118—1.)



1. In combination with a centrifugal box for spinning artificial silk, an apparatus for practically continuous spinning comprising a skein winder for receiving the strand of filaments during the time of changing the centrifugal boxes, said strand of filaments attached to the jet being led onto the said skein winder.

1,780,347. PROCESS OF MANUFACTURING ALPHA CELLULOSE. LAUAI I. L. DURCHMAN, Petersburg, Va. Filed May 8, 1929. Serial No. 361,546. 4 Claims. (Cl. 92—11.)

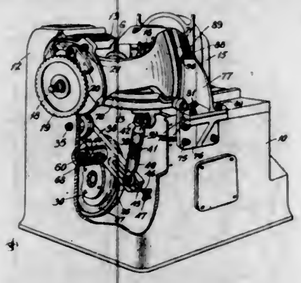


1. A process for producing easy bleaching cellulose which consists in cooking wood chips with black and white sulphate liquor with the addition of sodium sulphite in the proportion of 0.8–1.0% based on the airdry weight of the wood chips, continuing the cooking for a longer period than is the usual practice in the sulphate process, thereby increasing the alphacellulose content, and treating the pulp with a solution containing 2–6% sodium hydroxide and 2–6% common salt.

1,780,348. SHEET-REGISTERING MECHANISM FOR PRINTING MACHINES. WILLIAM K. ECKHARD, Dunellen, N. J., assignor to R. Hoe & Co., Inc., New York, N. Y., a Corporation of New York. Filed Nov. 16, 1928. Serial No. 319,812 5 Claims. (Cl. 271—55.)

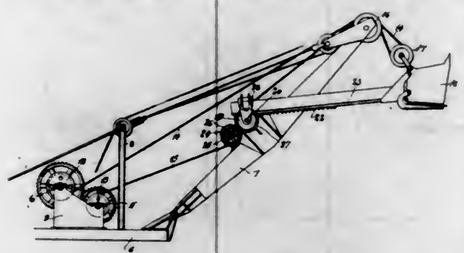
1. In combination with a machine having printing cylinders, a sheet registering mechanism of the class described, having two side guides arranged to reciprocate into and out of engagement with the side edges of a sheet being forwarded to the printing cylinders, and separate mechanisms for operating each guide independently of the other, whereby the guide on either side may be made to continue in engagement with the sheet after the guide on the other side has been moved out of engagement with it.

1,780,349. APPARATUS FOR RADIATING SOUND WAVES. RICHARD D. FAY, Cambridge, Mass. Filed Dec. 10, 1927. Serial No. 239,178. 4 Claims. (Cl. 179—115.5.)



1. A sound-radiating device comprising in combination, means creating a constant magnetic field having two oppositely-disposed gaps, a primary winding without said field, a closed secondary inductively related to said primary and having two oppositely-disposed portions thereof located within said gaps, means suspending said secondary for motion in the direction of its plane, and a tympanum secured to said secondary.

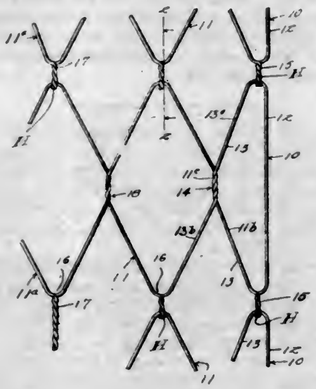
1,780,350. GEAR-GENERATING MACHINE. EYVIND FINSEN, Rochester, N. Y., assignor to Gleason Works, Rochester, N. Y., a Corporation of New York. Filed Oct. 12, 1928. Serial No. 312,173. 20 Claims. (Cl. 90—1.)



1. In a machine for generating gears, a work spindle, a tool, and means for producing a relative rolling movement between the work spindle and tool including a gear segment connected to the work spindle, a pivotally mounted gear segment, on which the first segment is adapted to

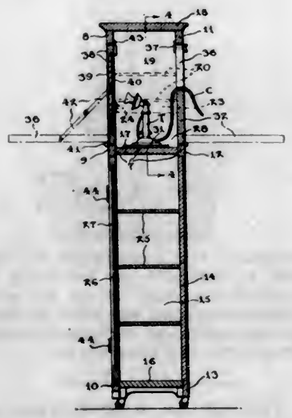
roll having a fixed relation to the tool, said pivotally mounted segment being capable of angular motion about its pivot during the rolling movement, and means for resiliently holding the two segments in mesh.

20. In a gear generating machine, a tool, a work support, an oscillatable cradle upon which the work support is mounted, a work spindle journaled in the work support, a bevel gear segment, having a pitch cone angle less than the pitch cone angle of the gear to be cut, secured to the work spindle, a crown gear segment, with which the first segment is adapted to roll, pivotally mounted at one end on a relatively fixed part of the machine, means for resiliently holding the two segments in mesh, and means for oscillating the cradle including a pair of cams having cam paths so formed as to oscillate the cradle selectively through different sized arcs, said paths being so formed, also, as to align with each other at one point, and a roller operatively connected with the cradle and movable selectively from engagement with one cam into engagement with the other when the roller is at the point of alignment of the two cam paths.



1,780,351. ROPE-THRUSTING SHOVEL WITH DIFFERENTIAL THRUST. MITCHELL L. FYKSE, South Milwaukee, Wis. Filed July 14, 1928. Serial No. 292,779. 6 Claims. (Cl. 214—135.)

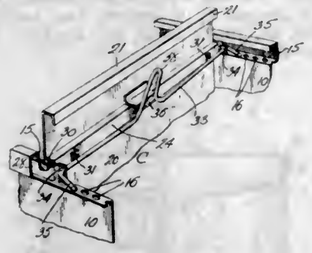
1. In a power shovel, including a boom, and a dipper and dipper handle mounted thereon for reciprocation and swinging with respect thereto, the combination of: racks on said handle to effect reciprocation; pinions mounted on said boom and engaging said racks; two drums on the boom to rotate with said pinions; a hoist-rope to swing said dipper, and wound upon only one of said drums, in such a way that the tension in the hoist rope exerts a constant tendency to thrust said dipper outwardly; and a retracting rope wound upon only the other of said drums, thereby being available at will to resist and control said tendency; said second drum being of an effective diameter less than that of said first drum.



1,780,352. BED-SPRING FABRIC. JOHN JOHNSON, Honolulu, Territory of Hawaii. Filed Aug. 23, 1928. Serial No. 301,560. 3 Claims. (Cl. 245—5.)

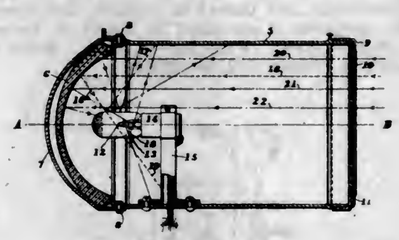
1. A bed-spring fabric comprising a series of mesh elements each series extending transversely of the finished fabric, each end element of each series comprising a relatively long straight bar and an integral obliquely directed bar, an adjacent mesh element comprising an integral wire body having four portions, three of which are arranged to form three sides of a diamond, the fourth portion being directed across the oblique bar of the first-mentioned mesh element and connected therewith and

further connected at its end with the end of the straight side of the first mesh element, the other end of the second-mentioned mesh element being connected with the free end of said oblique bar, said twisted ends being formed to provide hooks for engaging the mesh elements of an adjacent section, and interconnected intermediate mesh elements of substantially triangular formation thereof being connected with said second-mentioned elements.



1,780,353. COMBINATION CABINET. MARY WADE JONES, Wilkes-Barre, Pa. Filed July 3, 1928. Serial No. 290,102. 1 Claim. (Cl. 312—189.)

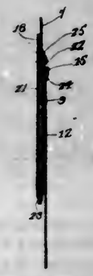
In a combination portable cabinet, the combination of a hollow frame provided with a horizontal partition that divides it into an upper chamber and a lower chamber and forms a top for the lower chamber while forming a floor for the upper chamber, a rear door hinged on said frame and provided with a slot which opens through one edge of the door so a telephone's conducting cord can be passed thereinto while a telephone is being passed through the open rear doorway, to be seated on said partition, and a front door hinged to the frame at the front edge of said partition and movable into positions



for closing and opening the doorway thereof so the telephone can be moved out therethrough from said partition, and means to combine with the hinges of the front door for supporting it in an open and substantially horizontal position in which it conveniently receives and supports the telephone when it is moved forward from said horizontal partition.

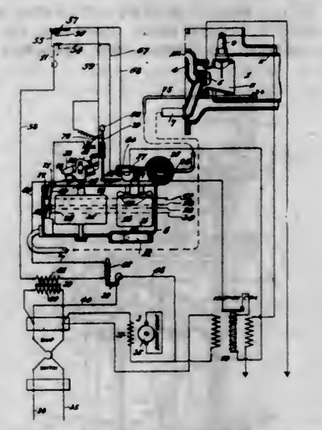
1,780,354. COMPRESSOR AND LOCKING MEANS THEREFOR. OSCAR J. LARSON and JAMES R. JONES, Jamestown, N. Y., assignors to Art Metal Construction Company, Jamestown, N. Y., a Corporation. Filed May 30, 1930. Serial No. 457,662. 12 Claims. (Cl. 129—28.)

12. The combination with a drawer or the like having a longitudinally disposed series of spaced stops, of a compressor adjustable lengthwise of the drawer, a locking bar of resilient material mounted on said compressor and having a part engageable with said drawer stops, and a part on said compressor with which said locking bar engages and by which said bar is normally held under stress in a manner to yieldingly urge said part of said bar in a direction to engage said drawer stops, whereby said bar automatically cooperates with said stops to prevent movement of said compresor in one direction lengthwise of the drawer while permitting movement thereof in an opposite direction.



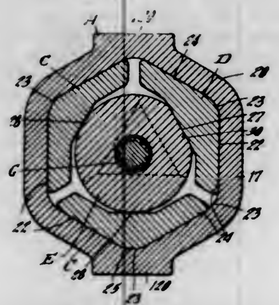
1,780,355. PROJECTOR. STATES LEE LEBBY, Corning, N. Y., assignor to Corning Glass Works, Corning, N. Y., a Corporation of New York. Filed Nov. 13, 1922. Serial No. 600,501. 3 Claims. (Cl. 177—329.)

3. The combination with a reflector having a principal focal point, of a light source located substantially at the focal point of the reflector, and a transparent enclosure enlongated in the direction of the axis of the reflector and surrounding the light source, the enclosure having walls arranged in positions oblique to rays entering the reflector from an outside source and directed by the reflector in the direction of its focal point.



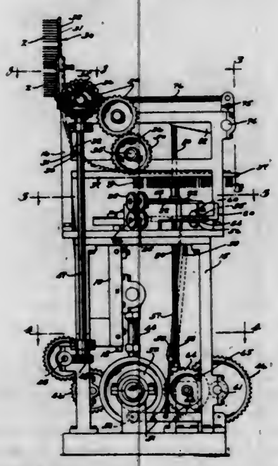
1,780,356. TROUSER. MEYER LIBERMAN, Vallejo, Calif. Filed Mar. 15, 1930. Serial No. 436,203. 1 Claim. (Cl. 2—227.)

In a pocket construction for trousers, the combination of a trouser leg provided in its outer side with a horizontally disposed opening, the portions of said side bordering said opening inturned to provide an upper and a lower outer fold, a backing member opposing the inner face of said side and having its lower portion outturned to provide an upper inner fold, a vertically disposed front wall forming member opposing the inner face of said side and having its upper portion outturned to provide a lower inner fold, a vertically disposed rear wall forming member opposing the rear faces of said members, a pair of reinforcing elements overlapped by said inner folds, the bend provided by the upper inner fold positioned below the bend provided by the upper outer fold, the



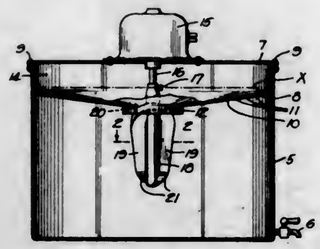
bend provided by the lower inner fold positioned above the bend provided by the lower outer fold, the bends provided by the inner folds contacting, the bends provided by the outer folds being spaced from each other, means for securing said side, the upper folds, backing and rear wall forming members and one of said elements together, means for securing the lower folds, front wall forming member, the other of said elements and said side together, means for securing said wall forming members together, and means for securing said side and backing and rear wall forming members together, and said inner folds opposing said outer folds.

1,780,357. FUEL BURNER AND CONTROL THEREFOR. ROBERT F. METCALFE, Brooklyn, N. Y., assignor to Socony Burner Corporation, Brooklyn, N. Y., a Corporation of Delaware. Filed Nov. 3, 1925. Serial No. 66,464. 13 Claims. (Cl. 158—28.)



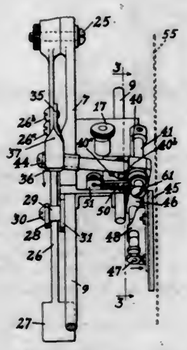
4. In a liquid fuel heating system, the combination with a burner, of means for supplying fuel thereto comprising a constant level supply chamber, a fuel admission valve, a float so related to the valve as to close the same when the fuel rises but permitting the valve to open when the levers lowers, means tending to open the valve when the fuel level lowers, a thermostat responsive to the operation of the burner and means actuated through the thermostat to close the valve irrespective of the float.

1,780,358. FRICTION SHOCK-ABSORBING MECHANISM. WILLIAM H. MINER, Chazy, N. Y., assignor to W. H. Miner, Inc., Chicago, Ill., a Corporation of Delaware. Filed Apr. 15, 1929. Serial No. 355,082. 5 Claims. (Cl. 213—32.)



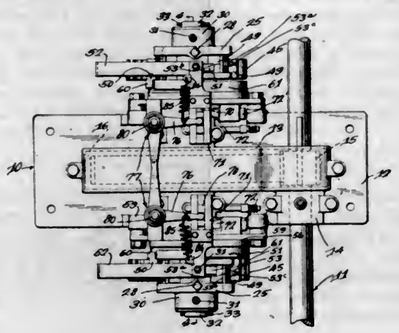
2. In a friction gear, the combination with a friction shell of substantially hexagonal transverse cross section, said shell having six interior flat friction faces converging inwardly of the shell and symmetrically arranged with respect to the longitudinal axis of the shell, the adjacent longitudinal edges of each adjacent pair of said flat faces merging with an appreciably curved face to permit proper seating of and minimization of abrasion by cooperable friction shoes slidable thereon, whereby three friction surfaces symmetrically arranged with respect to the axis are provided, each comprising two adjacent flat faces with an intervening curved face with the longitudinal edges of adjacent friction surfaces separated by a curved face; a spring resistance; a friction shoe cooperable with each said friction surface, each shoe having two flat faces cooperable with the corresponding two flat faces of the shell friction surface and a curved face at the junction of the two shoe flat faces; and a centrally disposed wedge projecting outwardly of the shoes and having wedge engagement therewith, said wedge being adapted to directly receive the actuating pressure.

1,780,359. MATCH-MANUFACTURING MACHINE. SIMON NELSON, Duluth, Minn. Filed Dec. 18, 1929. Serial No. 414,907. 6 Claims. (Cl. 144—55.)



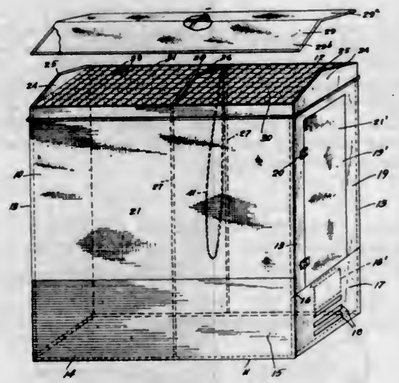
1. In a machine of the class described, a continuously moving splint-carrying belt comprising pivotally connected plates having transverse and longitudinal rows of holes, splint-forming knives and cooperating mechanism for inserting splints formed by the knives in said holes, and a feed device including a roll for moving the splint-forming material to the knives, driving mechanism for the feed roll including a ratchet wheel, a cooperating pawl, a driven cam, a yieldingly held arm operated by the cam, connections from the arm to the pawl and a wheel rotated in timed relation to the cam and having a member for intermittently holding the arm out of action of the cam to render the pawl inactive.

1,780,360. AGITATING, MIXING, AND CIRCULATING MACHINE. THOMAS O'FARRELL, Claremont, Calif., assignor to Russell C. Bloomfield, Los Angeles, Calif. Filed Nov. 26, 1929. Serial No. 409,900. 7 Claims. (Cl. 259—66.)



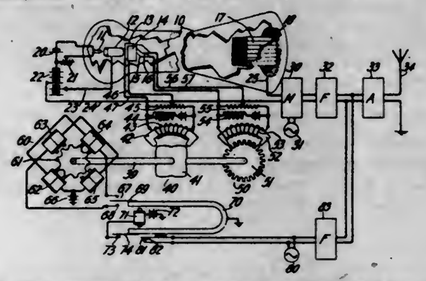
1. A machine of the class described comprising a liquid container having an air space, a tray underlying the air space and provided with a central opening, the tray having perforations positioned at a point laterally of the said opening, and means carried by the tray and co-acting with the opening and the said perforations for placing liquid in circulation in the container and for causing a quantity of the liquid to be deflected into the air space and thereby saturated with air and then drawn back into the container by way of said opening to be intermixed with the mass of liquid in said container.

1,780,361. BANJO MUTE. CHARLES W. PIERSON, CECIL Y. FITZGERALD, and GEORGE E. THOMAE, Los Angeles, Calif., assignors of one-fourth to Robert D. Pearson, Los Angeles, Calif. Filed June 6, 1929. Serial No. 368,795. 6 Claims. (Cl. 84—273.)



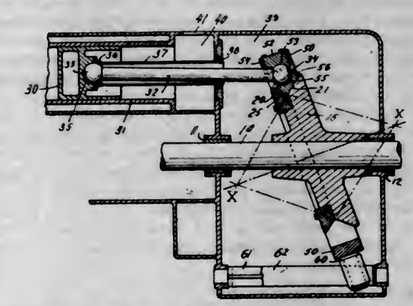
1. In a device of the character described, a frame, means to support said frame within a banjo in fixed relation thereto, a pendulum mounted on said frame, a movable mute mounted on said frame to swing at right angles to the plane in which said pendulum swings, means to transmit a swinging movement from said pendulum to said mute to bring said mute into contact with the membrane of the banjo, and means operable by a manual movement of the instrument to retract said mute from the position wherein it engages the membrane of the banjo.

1,780,362. LUMBER TRIMMER. SUMNER K. PRESCOTT, Seattle, Wash., assignor to Prescott Iron Works, Seattle, Wash., a Corporation of Washington. Filed Oct. 28, 1929. Serial No. 402,889. 8 Claims. (Cl. 143—41.)



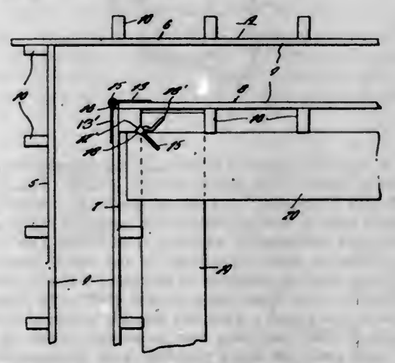
1. In a lumber trimmer having the usual saw frames, a double lift unit including a single counter shaft, two lifting arms, one at each end of the counter shaft, means cooperable with an intermediate portion of the counter shaft to rotate the same, means for controlling the connection of each lifting arm with the counter shaft, and connections between each lifting arm and a saw frame.

1,780,363. SUN-BATH APPARATUS. GEORGE A. PROCTOR, Los Angeles, Calif. Filed Dec. 27, 1928. Serial No. 328,681. 5 Claims. (Cl. 174—177.)



1. In a housing for sun baths, comprising screened side and end faces, a top grid carried by the housing embodying closely spaced fixed strips and closely spaced strips pivotally supported in the housing and perpendicular to said fixed strips, a bar carried by the housing, and manually controlled means within the housing for actuating said bar to adjust said pivoted strips in alignment with the sun's rays.

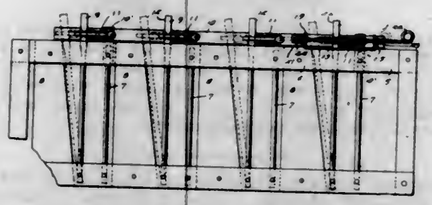
1,780,364. ELECTROOPTICAL TRANSMISSION. FREDERICK W. REYNOLDS, Grantwood, N. J., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Dec. 4, 1926. Serial No. 152,656. 15 Claims. (Cl. 178—6.)



1. The method of scanning an image for television purposes which comprises simultaneously producing a plurality of discrete space charges of photo-electrons corresponding respectively to the elementary areas of said image, and causing said space charges to successively vary the impedance to a space current.

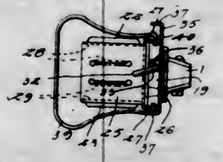
1,780,365. CRANKLESS ENGINE. THOMAS L. SHERMAN, Melbourne, Australia, assignor to Michell-Crankless Engines Corporation, New York, N. Y., a Corporation of New York. Filed Oct. 31, 1929. Serial No. 403,842. 17 Claims. (Cl. 74—14.)

1. In combination, a swash plate, a ring surrounding the plate, a reciprocatable element, and means connecting said element to said plate and said ring to said plate.



1,780,366. WALL FORM. CHARLES M. SHOWERS, Madison, Wis. Filed June 24, 1929. Serial No. 373,255. 4 Claims. (Cl. 144—293.)

1. In a corner construction for concrete forms, an elongated angle bar having the flanges thereof adapted to be

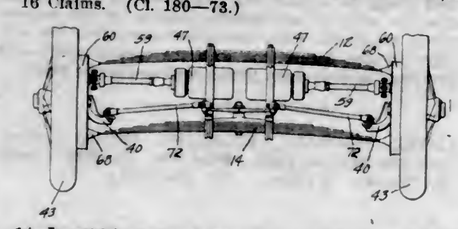


disposed in overlying relation with respect to the inner faces of the adjacent ends of the inner side and end walls of the form respectively, an elongated post squared in cross section having certain faces thereof disposed against the outer faces of the said adjacent ends of the said walls, bolts passing through said angle bar at the connecting end of its flanges, and said bolts being further adapted to extend through said post and to extend beyond said post at one corner thereof, and clamping nuts threadedly engaged with the projecting ends of said bolts.

1,780,367. STANCHION LATCH AND OPERATING MEANS THEREFOR. LOUIE G. SIEBENMORGEN, Hiawatha, Kans. Filed Dec. 1, 1928. Serial No. 323,164. 1 Claim. (Cl. 119—148.)

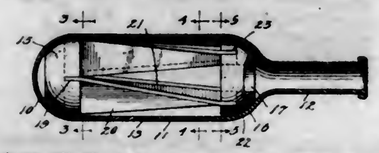
The combination with a plurality of stanchions wherein each includes an upright swinging bar, of a reciprocable bar common to said swinging bars and extending transversely of the upper end of each, latch means on said reciprocable bar for detachably engaging each swinging bar for movement with the reciprocable bar, a supporting bracket mounted adjacent said reciprocable bar and having an aperture formed therethrough and further having lateral recesses opening into said aperture, a reciprocating latch bar extending through the aperture of said bracket and supported thereby, connecting means between the latch bar and the reciprocable bar, and studs carried by the latch bar designed to pass through said recesses to permit shifting of the latch bar and to engage against one face of the bracket when the latch bar is turned to prevent shifting thereof.

1,780,368. CHROMATIC PLAYING ATTACHMENT FOR HARMONICAS. WALTER E. SHAVER, Schenectady, N. Y. Filed May 25, 1929. Serial No. 366,037. 11 Claims. (Cl. 84—377.)



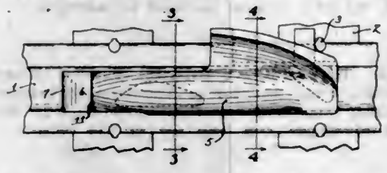
5. A chromatic playing attachment for harmonicas, comprising a mouth piece provided with orifices, a base provided with a plurality of rows of passages, a valve plate provided with a row of orifices and mounted between the mouth piece and base for adjustment to arrange its orifices in registration with the orifices in the mouth piece and one of the rows of passages in the base, a shaft rockably supported on the base and provided with arms engaging the valve plate, and a push rod slidably mounted between the mouth piece and base and connected to one of said rods, said push rod being provided with downwardly extending terminals and with a flange contacting with an end of the base.

1,780,369. METHOD OF DETERMINING DRIFT OF AIRCRAFT. CHESTER AMMEN SNOW, Jr., Washington, D. C. Filed Feb. 16, 1929. Serial No. 340,635. 3 Claims. (Cl. 250—11.)



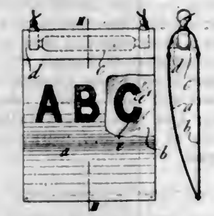
1. The method of determining the drift angle of an aircraft which includes the steps of delivering a radio broadcasting unit from the aircraft while in flight and thereafter picking up signals from said unit through a radio direction finder.

1,780,370. WHEEL ASSEMBLY. PERRY L. TENNEY, Muncie, Ind. Filed July 2, 1924. Serial No. 723,717. 16 Claims. (Cl. 180—73.)



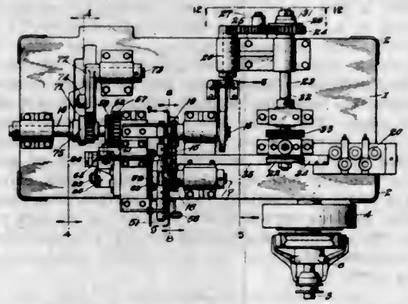
14. In vehicle running gear the combination of a wheel assembly including a fixed supporting ball, a leaf spring, a socket receiving the ball, a housing surrounding the socket and ball, means for clamping the housing to the spring including a clamping bar overlying the end of the spring, clamping bolts securing the housing to the ends of the bar, and means engaging the housing and bar beyond said load supporting and for rigidly holding the housing and spring in aligned relation.

1,780,371. PENCIL SHARPENER. WOJCIECH BENCZALSKI, Eureka, Calif. Filed Aug. 10, 1929. Serial No. 384,989. 5 Claims. (Cl. 120—93.)



1. A pencil sharpener comprising a pair of blocks, a plurality of knives mounted by their edges in said blocks, one of said blocks having a central bore for inserting a pencil therethrough, said knives, at their inner sharp edges tapering toward said last mentioned block, the body portions of said knives remaining in an oblique position relative to the longitudinal axis of the sharpener.

1,780,372. DERAILING FROG. CHARLES BESS, Dunsmuir, Calif. Filed Nov. 29, 1929. Serial No. 410,344. 2 Claims. (Cl. 246—162.)

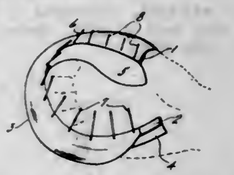


2. A derailing frog fashioned to rest upon the head of a rail and having legs to rest upon the rail base to prevent tipping, said frog having at its forward end a projecting flat toe-plate to receive the entering wheel and prevent the frog from slipping, and said frog having a rising tread surface to lift the wheel and a groove to receive the wheel flange, said tread surface and said groove merging into substantially the same horizontal plane, and a derailing flange converging to and cross the tread surface to sidle the wheel therefrom.

1,780,373. ILLUMINATING DEVICE. ALFRED WILLIAM BEUTTELL, Norbury, England. Filed Feb. 15, 1928, Serial No. 254,472, and in Great Britain Feb. 15, 1927. 13 Claims. (Cl. 40—132.)

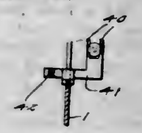
1. A device of the class described comprising a curved transparent reflector so curved and adapted to be arranged relatively to an object to be illuminated and which is to be viewed through the reflector as to permit of the entry of light rays between the said curved reflector and the object and to increase the illumination of the ulterior portion of the object by reflection from the curved portion of said reflector.

1,780,374. WIREWORKING MACHINE. WILLIAM M. BIRCH, Crawfordsville, Ind., assignor to Mid-States Steel & Wire Co., Crawfordsville, Ind., a Corporation of Indiana. Filed Mar. 28, 1929. Serial No. 350,645. 15 Claims. (Cl. 140—71.)



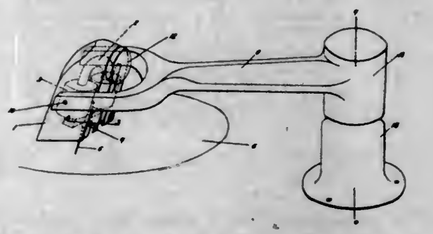
1. In a wire working machine, a looping means, means to feed a wire to said looping means, said looping means operative to shape the end of the wire into an elongated looped head having a pair of eyes, and means coacting with said looping means to assist in the formation of said head.

1,780,375. TREATING POROUS AND NONPOROUS MATERIALS. THEODORE F. BRADLEY, Westfield, N. J., assignor to American Cyanamid Company, New York, N. Y., a Corporation of Maine. Filed Nov. 25, 1929. Serial No. 409,766. 19 Claims. (Cl. 91—68.)



1. A process of treating a body which comprises applying to a surface of such body, a water solution of a water-soluble salt of a polybasic acid-polyhydric alcohol resin.

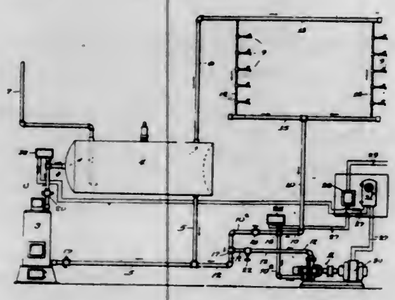
1,780,376. BERRY PICKER. HELENA E. CARR, Harrison, Mont. Filed Nov. 6, 1929. Serial No. 405,088. 2 Claims. (Cl. 56—330.)



1. In a device of the kind described, a substantially U-shaped frame, an outer protecting flange secured to the frame and curved outwardly and downwardly therefrom, an inner flange extended downwardly from the frame and having an enlarged portion adjacent one end, and spaced upwardly and inwardly extended prongs secured to the frame.

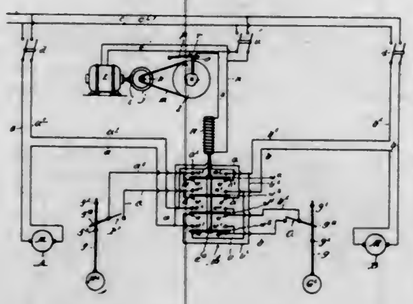
1,780,377. TIMER FOR CREAM TESTERS. PAUL L. COOL and BUOL F. COOL, Council Bluffs, Iowa, assignors of fifty-two per cent to Howard McDaniel, Council Bluffs, Iowa. Filed Oct. 18, 1929. Serial No. 400,680. 10 Claims. (Cl. 200—33.)

5. A timing mechanism for cream testers having a rotating operating shaft comprising a ratchet wheel, means for controlling the operation of the tester, a cam member rotating in unison with the ratchet wheel, means operated by the cam after a predetermined period of rotation for actuating the tester control means, reciprocating arm members operating upon the ratchet wheel to give step by step movement thereto, means for connecting the arm members with the tester drive shaft to cause the arms to be actuated thereby, and means for reducing the speed of rotation of said ratchet wheel.



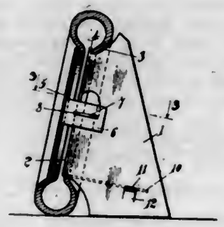
1,780,378. ELECTRIC PICK-UP FOR GRAMOPHONE OR OTHER SOUND RECORDS. JEAN DIEUX, Paris, France. Filed Mar. 1, 1929, Serial No. 343,776, and in France May 10, 1928. 2 Claims. (Cl. 179—100.41.)

2. In an electric pick-up, a supporting arm, a casing pivotally carried by said arm, a generator of electric



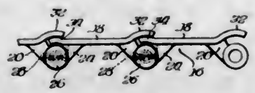
oscillations, such as an electromagnet, mounted in said casing, a vibrating member also mounted in said casing, and movable relative to said electromagnet, the movable assembly of said vibrating member, said electromagnet and said casing being traversed by the pivotal axis of suspension on said arm and being partially balanced with respect to said axis by its construction, and a counterweight carried by said casing and completing the balance, thus insuring a perfect balance of said movable assembly without a material increase of the mass of said assembly.

1,780,379. AUTOMATICALLY-CONTROLLED WATER-CIRCULATING SYSTEM. AUGUSTUS C. DURDIN, JR., Chicago, Ill. Filed Sept. 6, 1927. Serial No. 217,552. 3 Claims. (Cl. 126—362.)



1. An automatically controlled fluid circulating system comprising in combination a source of fluid supply, a fluid supply pipe and a fluid return pipe connected therewith, there being fluid outlets connected to said supply pipe, an electric motor operated fluid circulating pump for circulating liquid towards the source only, said return pipe having a direct passage past the pump and the pump having branch pipes connecting its intake and discharge sides with said return pipe, a check valve in said return pipe between its connections with said branch pipes, and a thermostat connected to said return pipe and operated by changes of temperature of the fluid therein, said thermostat being electrically connected with the motor of said pump and operating to start and stop the same.

1,780,380. AUTOMATIC CONTROL SYSTEM FOR ELECTRIC MOTORS. AUGUSTUS C. DURDIN, JR., Chicago, Ill. Filed Dec. 31, 1927. Serial No. 243,815. 19 Claims. (Cl. 172—239.)

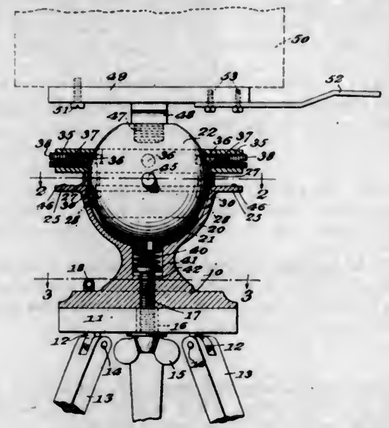


3. In an automatic control system for a plurality of electric motors, the combination of several electric circuits, including an electric motor in each circuit, an automatically operated switch for said circuits, a double throw-switch interposed in said circuits between said automatically operated switch and the motors, and switch actuating mechanism for said double throw switch having a switch throwing element operated at intervals.

1,780,381. TIRE-DISPLAY STAND. ELWOOD DYMENT, Lakewood, Ohio, assignor to The Dyment Company, Cleveland, Ohio, a Corporation. Filed Dec. 6, 1928. Serial No. 324,206. 3 Claims. (Cl. 211—24.)

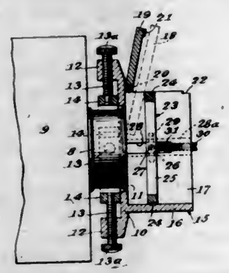
1. In combination an easel having means at its upper end to engage within the upper part of an annular object and comprising sheet material bent to form a front and sides; a disk adapted to engage the outer side of said object to close the opening therein; flaps hingedly connected with the disk and turned back towards the sides of the easel; and lugs integral with and projecting from said sides of the easel, with which lugs said flaps are interlocked.

1,780,382. APRON-TYPE CONVEYER. FRANK A. FAHRENWALD, Chicago, Ill. Filed Oct. 11, 1928. Serial No. 311,805. 3 Claims. (Cl. 198—189.)



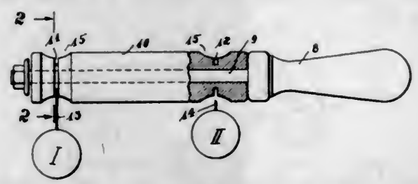
1. A conveyer comprising in combination a plurality of plates, a pair of separate arms integrally connected with each of said plates and extending downwardly and rearwardly from a central portion near one edge of one plate, a pair of arms integral with the adjoining plate and extending downwardly and forwardly from a central portion near the adjacent edge of the said adjoining plate, the latter arms being integrally connected by a barrel portion and fitting between the first mentioned arms; a pin extending through all of said arms to pivotally join said plates; each of said plates having a large, substantially flat top surface, and opposite edge portions curved about said pin as an axis to overlap the adjoining plates, and having a bottom surface unencumbered except by two remote pairs of depending arms.

1,780,383. CAMERA TRIPOD. IRVING I. GREEN, Brookline, Mass. Filed June 13, 1928. Serial No. 284,943. 4 Claims. (Cl. 248—47.)



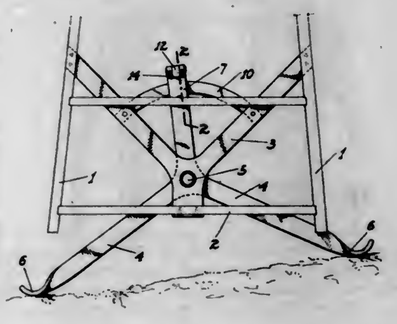
1. In a device of the class described, an instrument support having a spherical base providing a supporting bearing, a trunnion for mounting said support to turn

on a predetermined axis and located above said bearing, means for guiding the trunnion to move in a fixed plane



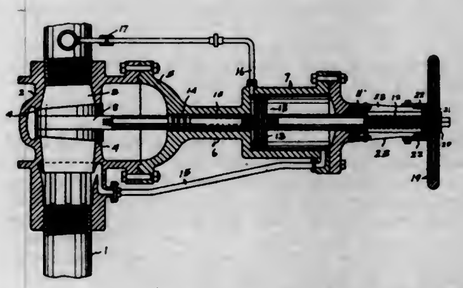
and a spring pressed device disposed above said trunnion and acting against said support under tension during the movement thereof.

1,780,384. FILTER HOLDER FOR CAMERAS. IRVING I GREEN, Brookline, Mass. Filed Oct. 4, 1928. Serial No. 310,311. 6 Claims. (Cl. 95—81.5.)



1. A device of the class described comprising a housing adapted to receive one or more filters and having an opening at one side for the insertion thereof into the housing, means for attaching the housing to a camera lens, and a spring actuated slide member movable toward and from the lens for clamping one or more filters in position in front of the lens.

1,780,385. TOY. REINHARD GUYOT, Los Angeles, Calif. Filed July 30, 1929. Serial No. 382,113. 4 Claims. (Cl. 46—14.)

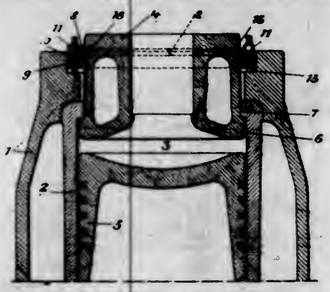


1. In a toy, a handle for manipulating the toy, and bodies operatively interconnected and in operative relation to the handle and disposed to transmit force one to another by a movement of the handle.

1,780,386. LEVELING ATTACHMENT FOR LADDERS. JOHN H. HARRISON, Stockton, Calif. Filed Sept. 14, 1929. Serial No. 392,681. 4 Claims. (Cl. 228—64.)

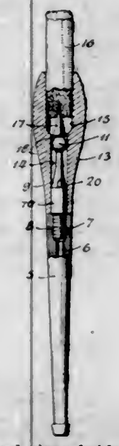
3. A ladder leveling device including an auxiliary leg unit extending across the ladder to a point below the bottom of the same, ground engaging feet at the outer lower ends of the leg unit, means pivotally supporting said unit on the ladder for oscillating movement in a plane parallel to the same, a quadrant fixed on the ladder concentric with the axis of oscillation of the leg unit, a plate fixed with the leg unit and disposed in concentric and cooperating relationship with the quadrant, said quadrant having a row of holes and the plate having a hole to register with the quadrant holes selectively, a pin movable radially of the quadrant and adapted to project through the plate hole and one of the quadrant holes simultaneously and a horizontal lever pivoted at one end in connection with the leg unit and from which the pin depends.

1,780,387. AUTOMATIC BLOW-OUT PREVENTER. PAUL BRYAN HART, Maracaibo, Venezuela. Filed Aug. 12, 1927. Serial No. 212,535. 3 Claims. (Cl. 137—139.)



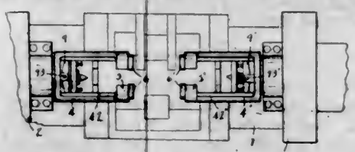
1. The combination with a pipe, of a valve adapted to open and close the passageway through said pipe, a cylinder, means in the cylinder connected to the valve and separating the cylinder into two chambers, a fluid pressure line entering one of said chambers and a relief outlet leading from the other chamber, said outlet line being normally blocked, and being arranged to be readily disrupted by an external force.

1,780,388. ENGINE CYLINDER. WILHELM HEFTI, Wulflingen, Switzerland, assignor to The Firm Sulzer Freres Societe Anonyme, Winterthur, Switzerland. Filed Sept. 4, 1929, Serial No. 390,278, and in Switzerland Dec. 4, 1928. 5 Claims. (Cl. 123—173.)



1. A working cylinder for internal combustion engines, comprising in combination a removable cylinder cover,

introduced from inside the cylinder, a suitable projection formed in a separate liner, and an annular and adjustable member arranged in a recess of the cylinder wall,

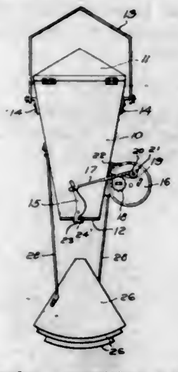


the adjustment of which annular member in axial direction will force the liner against the wall of the cylinder, thereby firmly securing the cover in its position.

1,780,389. CIGARETTE AND CIGAR HOLDER. RUDOLPH HIRSCH, North Bergen, N. J., assignor to Reiss Premier Pipe Co., Inc., Union City, N. J., a Corporation of New Jersey. Filed Dec. 29, 1928. Serial No. 329,200. 4 Claims. (Cl. 131—10.)

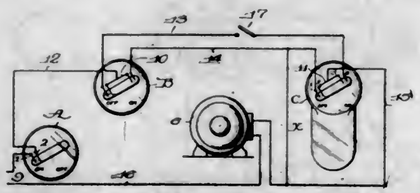
1. In a cigarette and cigar holder, a bit, a holder section, a stem on said bit slidably and removably mounted in said holder section, said stem having spaced supporting portions with which said holder section contacts, said portions having smoke apertures therethrough, and means on said stem adapted to penetrate the end of a cigar or cigarette in said holder section, said means being adapted upon removal from said holder to extract a cigar or cigarette from said holder.

1,780,390. LATHE AND LATHE CHUCK. GEORGE F. HOPKINS, Jackson, Mich.; William K. Sagendorph executor of said George F. Hopkins, deceased. Filed Aug. 17, 1927. Serial No. 213,554. 9 Claims. (Cl. 82—40.)



1. In a chuck structure, the combination of a hollow chuck body with front plate open at the side like a cradle, a cross wall with lathe center pin, chuck jaws adapted to out of round bodies in suitable ways on said front plate, bell cranks for actuating the same having squared ends and longitudinally slotted pivot connections, an equalizer bar, adjustable stops for the equalizer bar, pneumatic actuating connections pivotally connected to the center of said bar, and links connected to the ends of said equalizer bar disposed in suitable guides on opposite sides of said chuck body and connected to the chuck jaw bell cranks, coacting as specified.

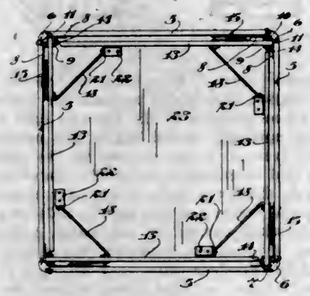
1,780,391. BACKING FOR STENCIL SHEETS. SHINJIRO HONJI, Tokyo, Japan. Filed Feb. 21, 1928, Serial No. 256,061, and in Japan Jan. 23, 1928. 2 Claims. (Cl. 41—3.5.)



1. A backing sheet for a dry-process stencil sheet consisting of a firm stiff paper treated with a coating composition including a non-drying oil and a hardening material for the purposes described.

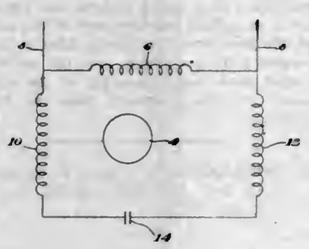
1,780,392. DRY POULTRY FEEDER. ANDREW S. JOHNSON, St. Paul, Minn. Filed Dec. 4, 1929. Serial No. 411,526. 3 Claims. (Cl. 119—156.)

1. A poultry feeder, comprising a hopper provided in its bottom with an outlet opening, means to cover and uncover the outlet opening, a plurality of conical deflectors supported beneath the outlet opening of the hopper and having openings at their apexes which are in substantial alinement with the outlet of the hopper, said conical deflectors being arranged in spaced superposed substantially concentric relation, the lower end of the lower conical deflector being of smaller diameter than the lower end of the next upper conical deflector, whereby the lower conical deflector will distribute the feed upon a smaller area than the upper conical deflector.



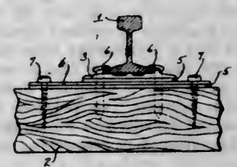
1,780,393. SYSTEM OF PRESSURE AND TEMPERATURE REGULATION FOR HEATERS. DAVID J. JONES, Chicago, Ill., assignor to Bell & Gossett Company, Chicago, Ill., a Corporation of Illinois. Filed May 24, 1929. Serial No. 365,700. 8 Claims. (Cl. 236—9.)

1. In combination a boiler having firing means therefor, a system of pressure, boiler water temperature and



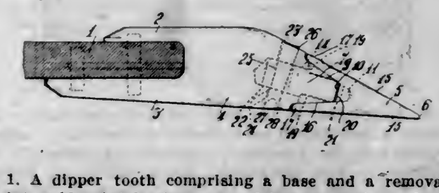
premises temperature control, comprising a circuit including in series the pressurestat, aquastat, thermostat and firing means, and a branch circuit paralleling said thermostat running from said aquastat to said firing means.

1,780,394. FOLDING TABLE. JOHN E. KALGREN, Minneapolis, Minn., assignor to The J. R. Clark Co., Minneapolis, Minn., a Corporation of Minnesota. Filed May 15, 1929. Serial No. 363,205. 3 Claims. (Cl. 45—11.)



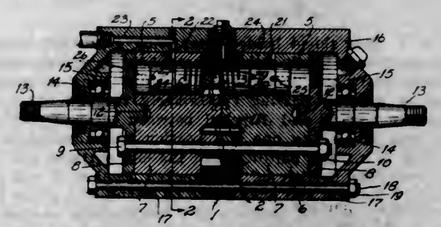
1. The combination with a table top having a marginal frame, of legs pivotally connected to said frame in the corners thereof, toggle-acting braces connecting said legs to sides of said frame adjacent which the respective legs lie when folded, and flexible braces connected at their outer ends to said legs and extending in planes at right angles to the corresponding toggle-acting braces, and independent anchor brackets directly secured to the board of the table top and completely spaced from the adjacent sides of said marginal frame, and to which anchor brackets the inner ends of said flexible brackets are pivoted out of line with the projected axis of the respective leg pivots, whereby said braces are subject to a tensional strain in the set-up position of the legs to securely brace the latter.

1,780,395. CONDENSER INDUCTION MOTOR. CARLTON L. KENNEDY, Braintree, Mass., assignor to The Holtzer-Cabot Electric Company, Roxbury, Mass., a Corporation of Massachusetts. Filed Nov. 28, 1928. Serial No. 322,461. 2 Claims. (Cl. 172—233.)



1. A condenser induction motor having, in combination, a line winding, a condenser circuit including a condenser and a pair of condenser windings, the line and condenser windings being wound in the same slots of the stator, the condenser windings and the condenser being connected all in series with the condenser between the condenser windings, whereby the voltage between the line and condenser windings is limited to a safe value.

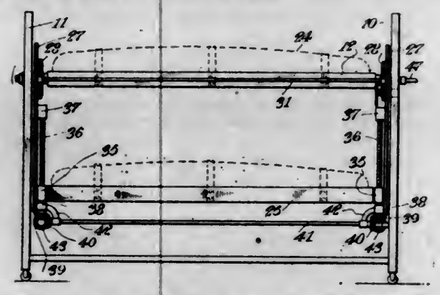
1,780,396. MEANS FOR SUPPORTING RAILWAY RAILS UPON TIES. WALTER H. KIRKBRIDE, San Francisco, Calif. Filed Mar. 12, 1930. Serial No. 435,132. 4 Claims. (Cl. 238—283.)



3. A means for mounting railway rails upon cross-ties comprising a tie-plate underlying the rail; a resilient pad adjacent to said plate, said pad having a plurality of intersecting ribs formed upon one surface; and means for securing said rail to the cross-tie.

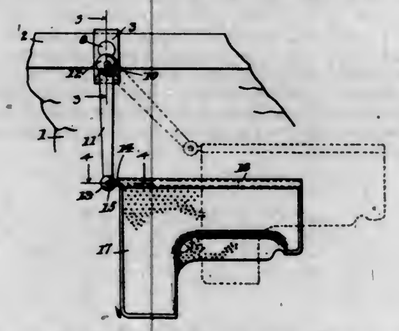
1,780,397. DIPPER TOOTH. WALTER S. MCKEE and EUGENE C. BAUER, Chicago, Ill., assignors to Kensington Steel Company, Chicago, Ill., a Corporation of Illinois. Filed Aug. 29, 1928. Serial No. 302,668. 6 Claims. (Cl. 37—142.)

1. A dipper tooth comprising a base and a removable point, said point having top and bottom surfaces diverging from a forward cutting edge, the wedge shaped sides being recessed to form upper and lower diverging jaws connected by a central vertical web, there being side flanges connecting the forward ends of the jaws at each side of the point, and pockets projecting forwardly into the point between the web and side flanges, and a central tongue projecting rearwardly from the web, the base being formed with a tapered nose portion adapted to be received between the jaws of the point, the nose being bifurcated to receive the web, the front ends of the arms of the nose being externally recessed to engage the side flanges of the point and to provide inner projections that are received within the pockets of the point, there being a rearwardly extending central recess in the base to receive the tongue, there being mating transverse openings formed in the base and tongue, and a locking member received in said openings.



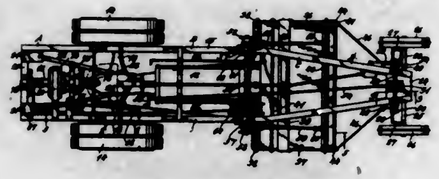
1,780,398. AIR COMPRESSOR. MATHEW B. MORGAN, Detroit, Mich., assignor to The Timken-Detroit Axle Company, Detroit, Mich., a Corporation of Ohio. Filed Aug. 24, 1929. Serial No. 388,048. 13 Claims. (Cl. 230—178.)

1. A pump comprising a casing having fluid distributing passageways therein and having a continuous cam rib



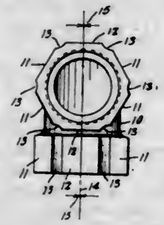
on the interior thereof, a cylindrical rotor rotatable in said casing and having a plurality of piston chambers arranged therein in alined pairs, and a reciprocatable piston member for each pair of chambers, each piston member having a circumferential groove at the middle thereof adapted to receive said cam rib and each piston member having a portion of reduced diameter in each end portion thereof and a passageway from said reduced portion through the end of said piston member, and the rotor having passageways openings into the respective piston chambers opposite the reduced portions of the piston members and arranged to communicate periodically with said first-mentioned passageways, respectively.

1,780,399. HOSPITAL BED. EDMUND L. MUNSON, Mount Kisco, N. Y. Filed Apr. 12, 1928. Serial No. 269,501. 8 Claims. (Cl. 5—61.)



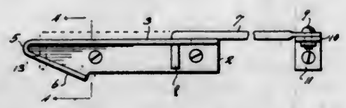
4. A structure of the kind described comprising a bed frame, a bed pivoted on trunnions in the frame, hangers mounted on the trunnions, a second bed carried by the hangers, a gear mechanism for swinging the hangers and their bed to carry the latter above or below the pivoted bed, and means for adjusting the swinging bed up and down on its hangers.

1,780,400. GLARE-SHIELD HOLDER. OTTO S. NELSON, Mitchell, S. Dak., assignor to Face-a-Lite Manufacturing Company, Mitchell, S. Dak. Filed Nov. 9, 1927. Serial No. 232,064. 2 Claims. (Cl. 296—97.)



1. A glare shield holder comprising a bracket member formed from a single strip of metal bent to provide spaced intermediate and opposite end portions lying in parallel planes, a screw passing transversely through the intermediate portion and disposed between the end portions, an arm pivoted to one end portion and adapted to be swung in a plane parallel with the end portions and the intermediate portion of the bracket member, a rod pivoted to the arm and adapted to be swung in a plane parallel with the end portions and intermediate portion of the bracket, and a shield mounted for turning movement upon the rod and adapted to be swung transversely of the end portions and intermediate portion of the brackets.

1,780,401. POWER-OPERATED SCRAPER. HAROLD M. PURSEL, Casper, Wyo., assignor to Sharrock and Pursel, Casper, Wyo., a Copartnership consisting of W. G. Sharrock and Harold M. Pursel. Filed Dec. 23, 1929. Serial No. 415,928. 4 Claims. (Cl. 37—128.)

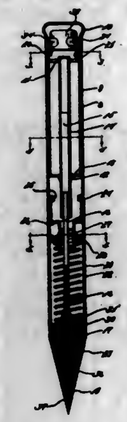


1. A power scraper employing a tractor having a winch, a friction clutch and a brake for controlling the winch, a frame secured to the tractor, said frame comprising two upwardly bowed beams, one secured to each side of the tractor, a bar secured to the under side of each beam and extending downwardly therefrom, a scraper pivoted to the lower ends of the bars, a shaft extending across the frame and having its ends rotatably supported in bearings carried by the beams, a drum secured to each end of the shaft, cables secured at one end to the drums and having their other ends attached to the front end of the scraper, a third drum secured to the shaft, and a cable having one end secured to the third drum and wound about the same, the other end of this cable being connected with the winch whereby when the cable is wound onto the winch it will be unwound from the drum on the shaft and rotate the latter whereby the front end of the scraper will be raised.

1,780,402. PIPE FITTING. JOSEPH A. RECKO, Bridgeport, Conn. Filed July 30, 1928. Serial No. 296,245. 1 Claim. (Cl. 285—203.)

As an article of manufacture, a pipe fitting having a flange provided with a series of flats and concave grooves, said grooves extending transversely of the flange and arranged at the junctions of adjacent flats in alternate relation throughout its periphery, and the curvature of the grooves being such that the angle of the edges between the flats and grooves is greater than the angle between adjacent flats.

1,780,403. DOOR HOLDER. FRANK W. RICHARDS, Nampa, Idaho. Filed Feb. 19, 1929. Serial No. 341,089. 2 Claims. (Cl. 292—272.)

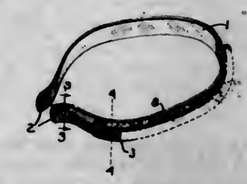


1. A door holding device, comprising a brace bar, means for pivotally securing one end thereof to a fixed structure adjacent a door, a longitudinally slotted plate designed to be secured transversely of the door, a tongue carried by said bar and slidably engaged in the slot of said plate and an apertured member at the end of the plate remote from the pivotal point of the bar arranged to have said tongue ride thereonto when the door is swung to full open position and to enter the aperture thereof.

1,780,404. WHEEL. LUTHER L. SCHOOLING, Quincy, Ill., assignor to Electric Wheel Company, Quincy, Ill., a Corporation of Illinois. Filed Dec. 9, 1927. Serial No. 238,821. 1 Claim. (Cl. 301—39.)

In a wheel including a main section and an auxiliary section constituting a lateral extension thereof, the adjacent sides of said sections being formed with interfitting projections and recesses, the different sets of coacting projections and recesses being located at substantially opposite points about the axis of the wheels, the projections and recesses of each set being formed with with inclined coacting surfaces adapted to effect relative angular and radial alinement of said sections, and bolt means to secure said sections in interfitting engagement, said sections having apertures formed therein to receive said bolts the diameters of said apertures in the planes of the adjacent faces of the sections being relatively greater than the diameters of said bolts to prevent slight relative displacement of the wheel sections from obstructing passage of said bolts through said apertures.

1,780,405. PENCIL. PERCY A. SHARROW, East Windsor, Ontario, Canada. Filed Dec. 16, 1929. Serial No. 414,306. 7 Claims. (Cl. 120—18.)

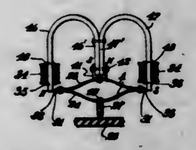


1. A pencil of the class described, comprising: a hollow body forming portion; a lead retainer slidably mounted in said body forming portion; a lead feeding member threaded into said retainer and movable in unison therewith; and resilient means for normally resisting movement of said retainer; and means for adjusting the tension of said resilient means.

1,780,406. RIB CLIP. ANTHONY G. SIEBENLIST, Milwaukee, Wis., assignor, by mesne assignments, to Milcor Steel Company, Milwaukee, Wis., a Corporation of Delaware. Filed Oct. 21, 1927. Serial No. 227,672. 3 Claims. (Cl. 72—118.)

1. A rib clip for securing metallic lathing to a structural supporting member comprising a strap adapted to be attached to the structural supporting member, and provided with a pair of spaced openings intermediate its ends, and a separate tie-wire of substantially U-shaped form having its legs extended through said openings, and its body portion engaged with the strap between the openings, the legs being adapted to be extended around the of the metallic lathing and to be intertwisted to secure the lathing on the strap.

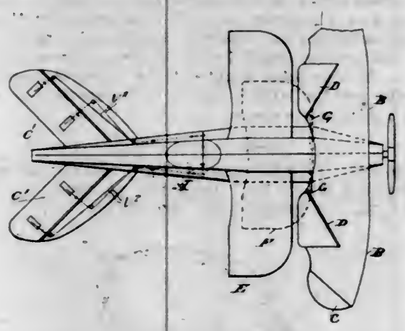
1,780,407. INSECT REPELLER. WALTER E. SMITH, Daytona Beach, Fla. Filed Jan. 24, 1929. Serial No. 334,750. 3 Claims. (Cl. 299—24.)



3. An insect repeller comprising a band adapted to be worn on the ankle, arm or other part of the body, a container secured to the band and extending longitudinally thereof and substantially encircling the band, and a pad of absorbent material within the container, which material is adapted to be saturated with an insect-repelling ingredient.

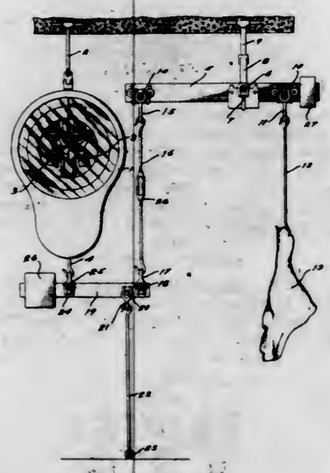
1,780,408. INSECT REPELLER. WALTER E. SMITH, Daytona Beach, Fla. Filed Jan. 31, 1929. Serial No. 336,467. 3 Claims. (Cl. 299—24.)

1. An insect repeller comprising a body portion having a peripheral flange, absorbent material containing insectifuge filling said body portion and overlying the flange, and a cap member overlying the absorbent material and secured to said flange, the absorbent material which overlies the flange spacing the cap member from the body member.



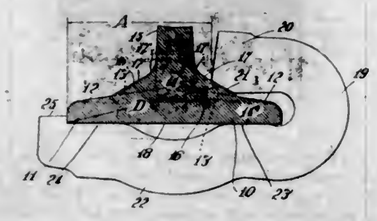
1,780,409. ELECTROMAGNETIC TRANSMITTER. ADOLPH A. THOMAS, New York, N. Y. Filed Feb. 10, 1928. Serial No. 253,240. 12 Claims. (Cl. 179—100.41.)

1. In an electric phonograph reproducer, a pair of oppositely bowed magnetic leaf springs connected at their



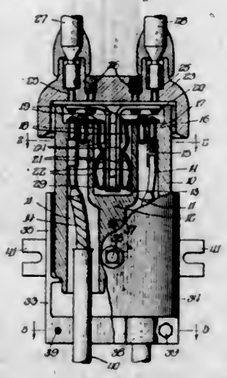
ends and constituting a closed flat loop, the distance between said ends being greater than the distance between the opposed central points of the leaf springs, means for supporting one of said bowed springs at the center, a stylus member connected to the central portion of the other bowed spring for vibrating both springs in their own plane, and electromagnetic means in operative relation to the ends of said leaf springs for converting the movements of said springs into electric impulses.

1,780,410. AEROPLANE. FRANK TUPTA, Cleveland, Ohio. Filed Nov. 14, 1927. Serial No. 233,218. 3 Claims. (Cl. 244—29.)



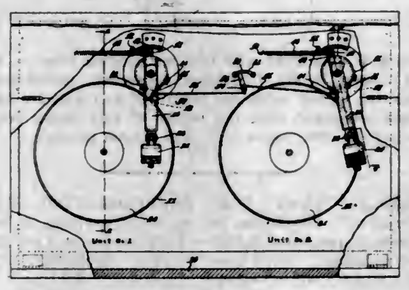
1. In an aeroplane, a fuselage, fixed wings and movable wings, said movable wings being transversely pivoted upon said fuselage to swing to a vertical angle thereon, a flexible retaining means attached to the rear of said fuselage, automatically acting means for moving said movable wings to the required vertical angle and manually operated means for releasing said retaining means when said desired vertical angle has been attained.

1,780,411. WEIGHING SCALE. EDWARD F. ULRICH, Toledo, Ohio, assignor to Toledo Scale Company, Toledo, Ohio, a Corporation of New Jersey. Filed Oct. 18, 1926. Serial No. 142,203. 2 Claims. (Cl. 265—49.)



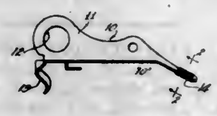
1. In a device of the class described, in combination, a hanging scale, said scale having a removable pan, lever mechanism adapted to be incorporated with said scale in substitution for said pan, said lever mechanism comprising a horizontal lever, means for connecting said horizontal lever to said scale at the point of connection for said pan and for connecting said lever to the floor, a second horizontal lever, means for connecting said second horizontal lever to the ceiling and to the first said lever, a commodity-receiver suspended from said second horizontal lever, and an adjustable balance weight on the first said horizontal lever.

1,780,412. RAIL ANCHOR. HAROLD G. WARR, Park Ridge, Ill., assignor to The P & M Company, Chicago, Ill., a Corporation of Illinois. Filed Jan. 18, 1929. Serial No. 333,502. 8 Claims. (Cl. 238—330.)



8. In combination with a railroad rail having a fillet forming an inclined plane in the angle between the upper marginal surface of the base and the vertical web of the rail, of a rail anchor comprising an under rail portion adapted to bear against a vertical face of a cross tie and having a bearing at opposite ends for engaging the bottom surface of the rail base adjacent opposite longitudinal edges thereof, a rail base engaging jaw portion at one end of the said under rail portion for embracing one base flange of the rail and which bears at its extremity upon said fillet, and a locking shoulder at the other end of the under rail portion adapted upon distortion of the anchor to snap into engagament with the lower corner portion of the base flange at the opposite side of the rail to lock the said jaw in its applied position.

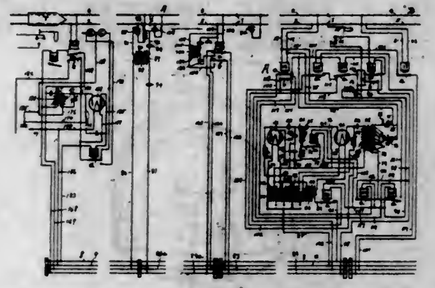
1,780,413. COMBINATION POTHEAD AND SERIES CUT-OUT. PAUL F. WILLIAMS, Chicago, Ill., assignor to G. & W. Electric Specialty Co., Chicago, Ill., a Corporation of Illinois. Filed May 16, 1925. Serial No. 30,764. 8 Claims. (Cl. 200—2.)



1. In a device of the class described, the combination of a pothead, confined yieldable contacts mounted therein, a removable top for said pothead, spaced contacts carried thereby which when electrically connected with said yieldable contacts separate the latter to complete a given circuit, said yieldable contacts springing into engagement with each other when said other contacts are withdrawn to form a circuit around said other circuit, said yieldable contacts being in the form of a loop to provide a pothead engaging portion to prevent fatigue of same and to insure their interengagement when said other contacts are withdrawn.

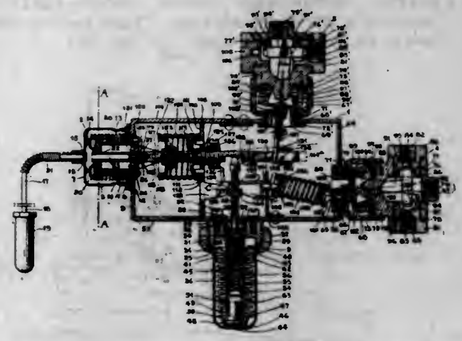
1,780,414. CONTINUOUS-SOUND-REPRODUCING APPARATUS. LLOYD J. ANDRES, Chicago, Ill., assignor of one-half to Elmer B. Rullman, Chicago, Ill. Filed Aug. 24, 1928. Serial No. 301,786. 14 Claims. (Cl. 179—100.4.)

1. An apparatus of the class described comprising, in combination, a plurality of phonograph record supports each adapted to carry a phonograph record; an amplification unit; a pick-up unit for each phonograph record electrically connected to said amplification unit; means for causing alternative engagement of said pick-up units with the respective records, and volume control means operatively connected to said alternative engagement means, substantially as described.



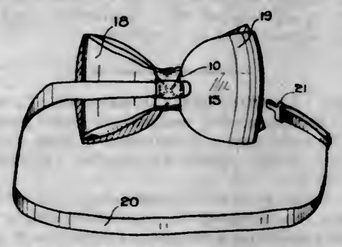
1,780,415. BREAKER MECHANISM. JOHN C. BAKER, Lake Bluff, Ill., assignor to Fansteel Products Company, Inc., North Chicago, Ill., a Corporation of New York. Filed Jan. 3, 1927. Serial No. 158,438. 2 Claims. (Cl. 200—166.)

1. In combination, a breaker arm provided with a centering depression, a contact point adapted to fit in said depression, and to extend slightly above the surface of the breaker arm, said contact point being welded both to the entire bottom of the depression and to the sides thereof, whereby a maximum welded area is obtained, the contact point is centered, and a minimum amount of space is required.



1,780,416. TRACK INSTALLATION TO CONTROL RAILWAY TRAINS. THOMAS E. CLARK and JAMES E. CLARK, Detroit, Mich., assignors to Continuous Train Control Corporation, Detroit, Mich., a Corporation of Michigan. Substitute for abandoned application Serial No. 192,839, filed May 20, 1927. This application filed Dec. 12, 1929. Serial No. 413,689. 11 Claims. (Cl. 246—34.)

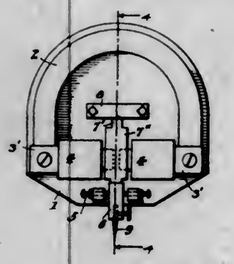
1. In a track installation to control railway trains, the combination of a trackway divided into blocks each comprising a plurality of cut-sections, a current source and a track relay connected to each cut-section, a radio-frequency current generator for each block and comprising an output transformer embodying a secondary coil, connections between said secondary coil and the



rails of the several cut-sections, a relay for each cut-section to close said connections thereto, a current source, and circuits between said current source and said last named relays which are closed when said track relays are deenergized.

1,780,417. CONTROL DEVICE. EARNEST J. DILLMAN, Detroit, Mich., assignor to American Radiator Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 1, 1927. Serial No. 236,969. 25 Claims. (Cl. 236—48.)

1. A control apparatus of the character described, comprising a control device, temperature responsive means for moving said control device to one position, a second temperature responsive means for moving said control device to another position, and means whereby operation of one of said temperature responsive means when acting to move said control device moves the other temperature responsive means from its actuative relation to said control device.



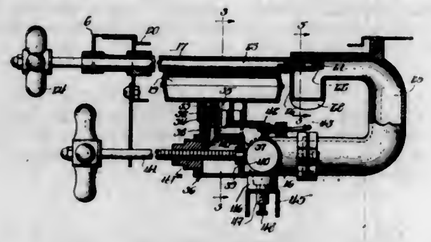
1,780,418. BOW TIE. GEORGE EDWARD FIGG, New York, N. Y. Filed Sept. 19, 1929. Serial No. 393,698. 1 Claim. (Cl. 2—154.)

In a bow tie, a frame having side loops and a central loop raised in relation to said side loops, a neck band

strung in said side loops and forming a retaining member and bow necktie made up over said central loop and held by said retaining member.

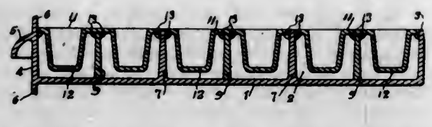
1,780,419. MAGNETIC REPRODUCER. PAUL E. FISCHLER, Bay City, Mich. Filed June 9, 1927. Serial No. 197,537. 7 Claims. (Cl. 179—100.41.)

1. An electric pick-up device comprising a plate, a permanent magnet mounted thereon, cores mounted upon the poles of the magnet, coils mounted upon the cores, a reed armature disposed between the coils and transversely of the cores, means for fixedly supporting the reed, said means being adapted to hold a needle.



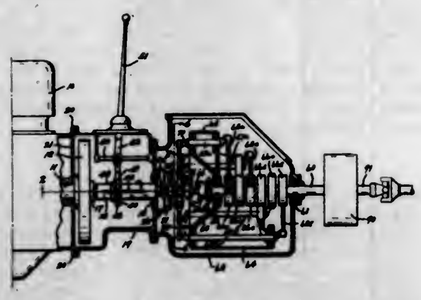
1,780,420. WIND AND WATER PROOF FIXTURE. RICHARD A. FLINT, Malad, Idaho. Filed Mar. 12, 1929. Serial No. 346,273. 2 Claims. (Cl. 20—65.)

1. In a wind and water excluder the combination of a groove cut along the bottom of a casement window; bearing brackets secured in said groove; an angle iron pivoted to said brackets; rubber strips secured on each leg of said angle iron; an angle iron secured on the foot of said window frame; lugs secured on the outside face of said angle iron; levers pivoted to said lugs adapted to be pushed or pulled to pivot said angle iron in said bearing brackets to bring the rubber strips to bear one on the last mentioned angle iron and the other on the outer edge of said groove; and plates secured on the inside of said window through which said levers are passed and on which said levers are engaged when locking the wind or water excluder substantially as described.



1,780,421. LIQUID-FUEL COOKSTOVE. LEON D. FORTIER, Kankakee, Ill., assignor to Sears Roebuck and Co., Chicago, Ill., a Corporation of New York. Filed Apr. 27, 1928. Serial No. 273,213. 5 Claims. (Cl. 158—61.)

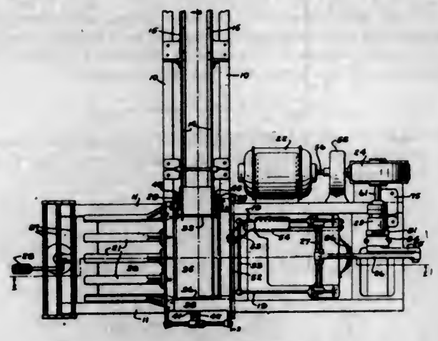
1. A liquid fuel stove comprising, in combination, a generator tube adapted for connection with a source of fuel under pressure, a manifold, a burner head comprising a generator burner disposed beneath said tube, and a pair of cooking burners on opposite sides of the generator burner and disposed in substantially the same plane, a tubular member into which said generator tube is adapted to discharge connected with said manifold, a distributor beneath said head having a valve-controlled passage con-



necting the manifold with the two cooking burners, a second passage in the distributor constantly connecting the generator burner with the manifold, and valve-controlled means connected with the source of fuel under pressure to discharge fuel vapor into said second passage.

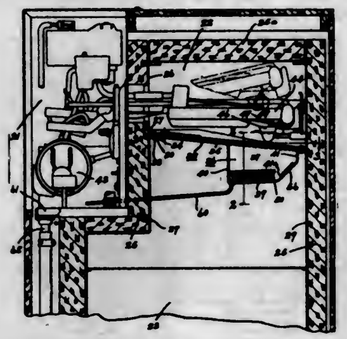
1,780,422. TRAY FOR REFRIGERATING UNITS. FREDERICK C. GEILER, Dayton, Ohio, assignor, by mesne assignments, to Frigidaire Corporation, a Corporation of Delaware. Filed May 26, 1926. Serial No. 111,874. 6 Claims. (Cl. 62—111.)

1. An ice-making receptacle for domestic mechanical refrigerators comprising in combination, a thermally conducting container for liquid to be frozen, removable means for subdividing the container into a plurality of cells each adapted to freeze a block of ice suitable for table use, means for facilitating the removal of a number of said blocks without disturbing the remainder of said blocks, said last mentioned means comprising a thermally conducting fin dividing the blocks into groups said fin being permanently secured to the container in intimate thermal contact with the walls of the container.



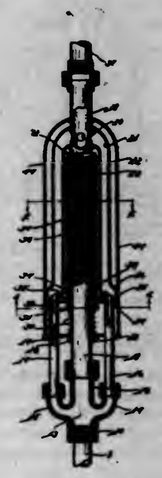
1,780,423. VARIABLE-SPEED POWER-TRANSMISSION UNIT. GEORGE E. A. HALLETT, Dayton, Ohio, assignor to General Motors Research Corporation, Dayton, Ohio, a Corporation of Delaware. Filed June 23, 1925. Serial No. 39,073. 1 Claim. (Cl. 74—53.)

In variable-speed transmissions for motor vehicles the combination of a drive shaft, a driven shaft in alignment with said drive shaft, an over-running clutch adapted to



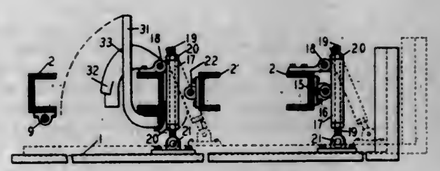
rotate the driven shaft, a journal on the drive shaft, linkage connecting said journal to the over-running clutch, means for adjusting said journal from a position concentric with the drive shaft axis to a position of predetermined maximum eccentricity, a clutch member on the driven shaft, and a co-acting clutch member concentric with said journal and adapted to be engaged with the clutch member on the driven shaft when said journal is concentric with the drive and driven shaft axes.

1,780,424. CAN-BOXING MACHINE. CHARLES MILTON HESSON and WILLIAM JOHN KOCH, Midland Park, N. J., assignors to The Fred H. Knapp Corporation, Ridgewood, N. J., a Corporation of New Jersey. Filed Mar. 7, 1927. Serial No. 173,421. 5 Claims. (Cl. 226—15.)



1. In a machine of the class described an inclined can feeding runway having a collecting space at the end thereof, means adjacent said collecting space for shifting cans longitudinally from said space into a receptacle, a displaceable abutment adapted to temporarily arrest the cans in said collecting space, an unyielding member extending the entire length of a can and adapted to be interposed between the cans on said runway and those in said collecting space, and means for simultaneously displacing said abutment and interposing said arm between said cans in timed relation to arrest the cans on the runway and positively advance the cans in said space a predetermined distance.

1,780,425. REFRIGERATING APPARATUS. HARRY B. HULL, Dayton, Ohio, assignor, by mesne assignments, to Frigidaire Corporation, a Corporation of Delaware. Filed Nov. 30, 1925, Serial No. 72,096. Renewed Dec. 13, 1928. 12 Claims. (Cl. 62—116.)

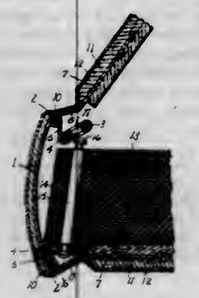


7. A refrigerating apparatus including a cabinet, a partition dividing the cabinet into a storage compartment and a cooling compartment, a container within the cooling compartment adapted to receive water to be frozen, means within said cooling compartment for freezing the water, means for removing the ice from the container, said partition having an opening arranged to permit air to flow from the freezing means directly to the cooling compartment, and having a pocket for receiving ice out of the path of air flowing thru the opening.

1,780,426. HOT-WATER HEATER. LOUIS B. HYDE, Detroit, Mich. Filed Apr. 8, 1929. Serial No. 353,526. 6 Claims. (Cl. 219—39.)

1. A hot water heater of the class described comprising: a plurality of casings mounted in embracing relation, said casings at one end being sealed to each other; a tube projected through said casings, the opposite ends of said casings being sealed on the periphery of said tube, said tube having openings formed adjacent one end between a pair of said casings; a delivery tube communicating with said central tube and the space between the two innermost casings.

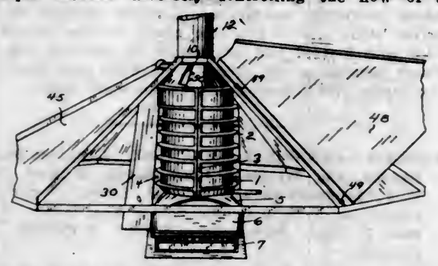
1,780,427. TROWELING MACHINE FOR CONCRETE OR OTHER PLASTIC MATERIAL. JOSEPH E. KIAKHAM, Topeka, Kans. Filed June 22, 1928. Serial No. 287,476. 3 Claims. (Cl. 94—95.)



1. In a troweling machine for concrete and other plastic material, a machine of the kind described comprising a rectangular frame and wheels to carry the same, a plurality of longitudinal trowels each having an upward extension at its forward end, two rods threaded at their ends and pivotally connected to each trowel, sleeves hinged to the frame and arranged to accommodate the said rods, means to adjust and lock the rods to the sleeves and means to reciprocate the trowels.

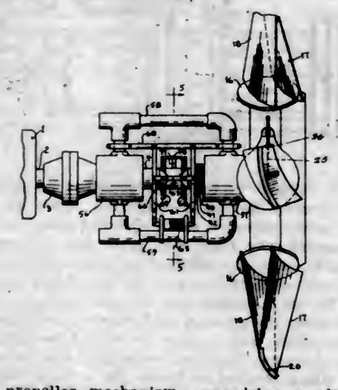
1,780,428. **APPARATUS FOR THE REMOVAL OF OBSTRUCTIVE MATTER FROM OIL WELLS.** CHARLES LARSEN, Denver, Colo. Filed Sept. 6, 1927. Serial No. 217,792. 5 Claims. (Cl. 166—17.)

1. Apparatus for the removal of obstructive matter from an oil well comprising a source of fluid under pressure, tubing in the well, having interiorly, an annular seat, a pipe line in the tubing connected with the source and having adjacent its lower end, a shoulder upon the seat, a piston on the pipe line frictionally engaging the tubing above the seat, and a nozzle at the lower end of the tubing for the emission of fluid conducted thereto by the pipe line.



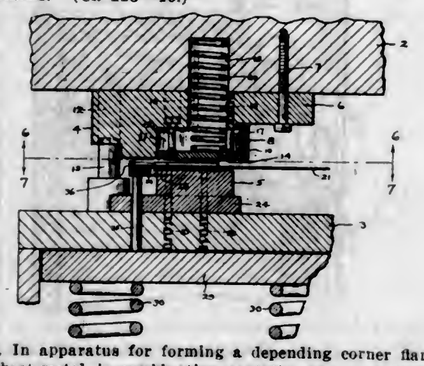
1,780,429. **TEMPORARY BINDER.** HARRY D. MANNING, Kalamazoo, Mich. Filed Aug. 27, 1928. Serial No. 302,185. 11 Claims. (Cl. 129—23.)

6. In a binder, the combination with a back having pivot knuckles in the edges thereof, of binding bars having outwardly and forwardly projecting pivot arms of substantial length provided with pivot knuckles alined with said pivot knuckles of said back, pintles coacting with the alined knuckles, and binding posts coacting with said binding bars.



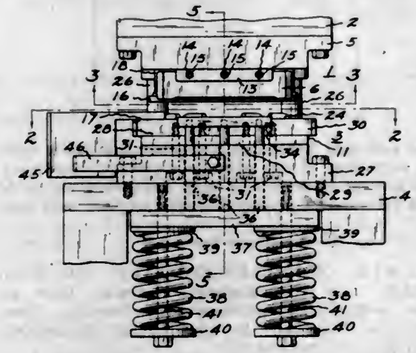
1,780,430. **BROODER STOVE.** GEORGE THOMAS MARKEY, Fort Atkinson, Wis., assignor to James Manufacturing Company, Fort Atkinson, Wis., a Corporation of Wisconsin. Filed Feb. 2, 1925. Serial No. 6,337. 20 Claims. (Cl. 119—32.)

1. A brooder stove having a canopy and provided in its upper portion with an outlet for the products of combustion extending through the canopy, a ventilating passage leading to said outlet upwardly along one side of the stove from the lower portion of the space underneath the canopy, a damper member controlling the flow of products of combustion to said outlet, a co-operating damper member inversely controlling the flow of air



through said passage to the same outlet, and temperature controlled actuating connections for said damper members extending therefrom downwardly through the ventilating passage to the lower end portion thereof.

1,780,431. **AERO PROPELLER.** CHARLES MCCARROLL, Helena, Ala. Filed Oct. 8, 1925. Serial No: 61,320. 14 Claims. (Cl. 170—162.)

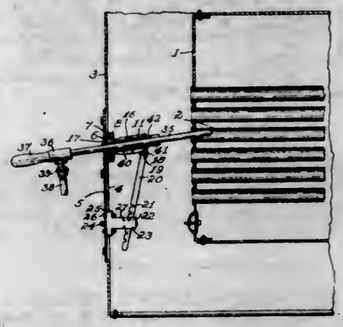


1. A propeller mechanism, comprising a plurality of impeller blades, a shaft on which said blades are rotatably mounted for change in pitch, and means independent of the blades and responsive to variation in the approach of fluid currents to the blades to maintain a condition of tangency between the blades and the approaching fluid currents.

1,780,432. **CORNER DIE.** JAMES A. MCGREGOR, Cleveland, Ohio. Filed Oct. 8, 1926. Serial No. 140,362. 5 Claims. (Cl. 113—46.)

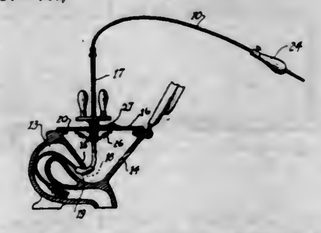
1. In apparatus for forming a depending corner flange in sheet metal, in combination, a stationary punch shaped to conform to the interior surface to be formed in said sheet metal, a movable die adapted to cooperate with said punch to form said sheet metal to the desired shape and having a projecting portion to partially enclose a recess, said punch and die being shaped to form a corner flange in said sheet metal, a blank holder yieldingly mounted outwardly of said recessed portion and cooperable with said punch to form a bead adjacent the top portion of said flange, said blank holder and punch cooperating to hold the body of the sheet metal firmly in non-slipping fashion during the operation of the apparatus, a drawplate yieldingly mounted adjacent, but in spaced relation to, said punch and in alignment with said projecting portion, said drawplate being arranged to hold the corner portion of said sheet metal until said flange is substantially completely formed, and means moving said die toward said punch.

1,780,433. **DIE FOR FLANGING SHEET METAL.** JAMES A. MCGREGOR, Cleveland, Ohio. Filed Mar. 7, 1928. Serial No. 259,665. 13 Claims. (Cl. 113—49.)



1. In sheet metal flanging apparatus, in combination, a die shoe, a die carried by said shoe shaped to conform to the exterior surface of a partially peripheral curved flange to be formed in sheet metal, a punch base, a punch carried by said punch base arranged to cooperate with said die, a pad arranged to cooperate with the face of said punch disposed in the recess of said die and yieldingly movable toward said die shoe, means opposing said yielding movement with relatively great force whereby slippage of the sheet metal gripped between said punch and pad may be substantially prevented, a blank holder associated with said punch base and yieldingly movable toward said shoe, said blank holder being spaced laterally from said punch, means opposing the yielding movement of said blank holder with less force than exerted against yielding movement of said pad, said blank holder being arranged to cooperate with the upper surface of said die to grip a portion of the periphery of the sheet metal therebetween.

1,780,434. **ELECTRIC SWITCH.** GEORGE J. MEUER, Milwaukee, Wis., assignor to Cutler-Hammer, Inc., Milwaukee, Wis., a Corporation of Delaware. Filed Apr. 1, 1929. Serial No. 351,555. 13 Claims. (Cl. 173—335.)

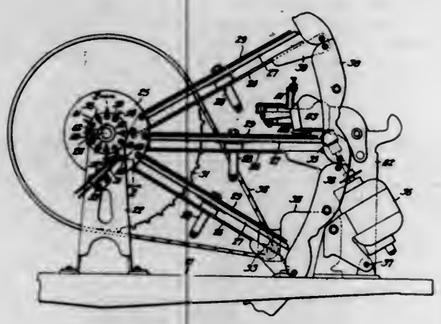


1. In an electric switch, in combination, a metallic frame plate, a flat punched sheet metal contactor of substantially U-shape, the arms of said contactor having end portions extending toward each other, said frame plate having openings the adjacent walls of which are spaced apart a distance greater than the distance between said end portions but less than the distance between said arms, whereby said contactor may be pivotally interlocked with said plate by laterally tilting the former with respect to the latter, an actuator slidably engaging said frame plate, and spring means interposed between said actuator and said contactor to effect snap movement of said contactor upon each movement of said actuator.

1,780,435. **FLUE CLEANER.** DON M. MILLER, Waterloo, Iowa, assignor to Boiler Equipment Company, Waterloo, Iowa, a Corporation of Iowa. Filed July 25, 1927. Serial No. 208,344. 9 Claims. (Cl. 122—390.)

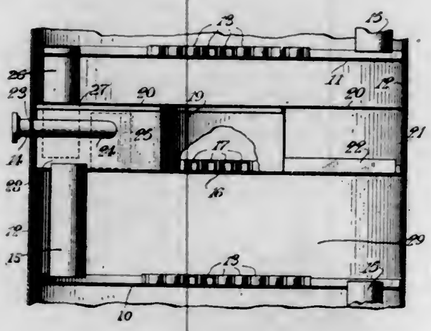
1. A flue cleaner comprising a nozzle mounted for universal movement, an adjustable guide element for said nozzle, and a device for locking said guide element in any adjusted position, releasably, said device in any position relative to said element including yieldable resilient means for engaging and holding said element as adjusted.

1,780,436. **APPARATUS FOR CLEANING OUT CONDUITS AND THE LIKE.** JOHN C. MILLER, Chicago, Ill. Filed Oct. 13, 1928. Serial No. 312,312. 8 Claims. (Cl. 137—70.)



1. A flushing bowl cleaner comprising an elongated flexible coil adapted to pass into the water passageway of said bowl, a cleaning attachment fixed to one end of the coil, and supporting means for the coil, said means comprising a plate adapted to rest on the top of the open bowl, a tube slidably and tiltably passing through the plate, a hook on the lower end of the tube adapted to hook onto the bowl, and a nut threaded onto said tube above said plate.

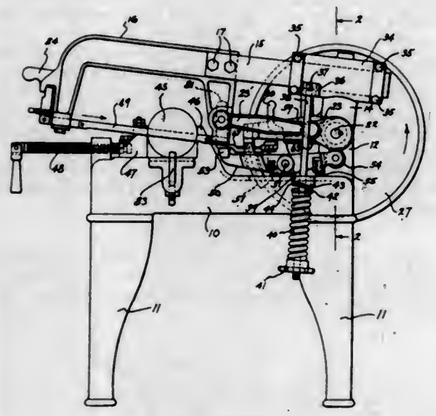
1,780,437. **VOLUME-CONTROLLING DEVICE FOR AUTOMATIC PHONOGRAPHS OR THE LIKE.** BERT E. MILLS, Oak Park, Ill., assignor to Mills Novelty Company, Chicago, Ill., a Corporation of Illinois. Filed Dec. 10, 1928. Serial No. 324,973. 9 Claims. (Cl. 179—100.4.)



2. In an automatic phonograph, the combination of playing mechanism, means for presenting records suc-

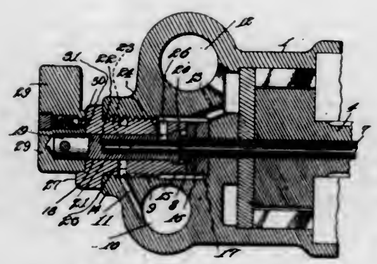
cessively to a playing station, an electrical amplifier, a resistance element in circuit therewith, and devices for automatically including said resistance element in the amplifier circuit at predetermined stages in the cycle of

operations of the phonograph, to thereby control the tone volume in the playing of predetermined records, said devices including control members for each record adapted to be set in operative or inoperative position as may be indicated by the tone characteristics of the record.



1,780,438. FLUID-MIXING DEVICE. WILLIAM A. PETERS, Jr., Seattle, Wash., assignor to E. B. Badger & Sons Company, Boston, Mass., a Corporation of Massachusetts. Filed Apr. 16, 1929. Serial No. 355,486. 6 Claims. (Cl. 261—114.)

1. In a vapor and liquid contacting apparatus, a fluid mixing device comprising a fluid inlet means, a liquid inlet means, vapor and liquid contacting means, and a means inclosing said vapor and liquid contacting means and the discharge ends of said fluid inlet means, and said liquid inlet means.

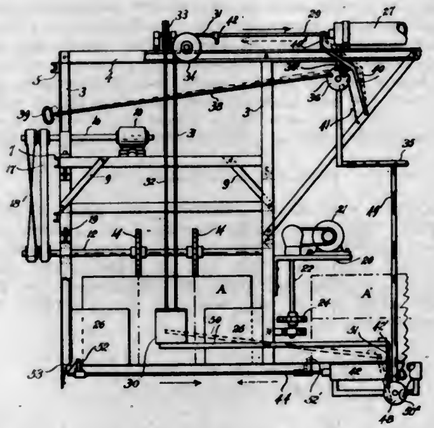


1,780,439. METAL-SAWING MACHINE. CHARLES RASMUSSEN, Racine, Wis., assignor of one-half to Ralph T. Ingalls, Racine, Wis. Filed Oct. 4, 1926. Serial No. 139,309. 3 Claims. (Cl. 29—73.)

1. In a metal sawing machine, a saw frame, means for supporting and imparting sawing movement to said frame, a plate supported for tilting movement, an actuating arm connected to said frame and movable upwardly to raise the latter and extending loosely through said plate, means operable upon completion of the cutting stroke of said frame to tilt said plate into interlocking relation with said arm and to impart upward movement to said plate, said last-named means being operable upon completion of the non-cutting stroke of said frame to cause reverse movement of said plate and to tilt the same out of such relation with said arm, and means co-

operable with said last-named means and said frame upon feeding movement of the latter to a predetermined position to prevent operation of said last-named means to tilt said plate out of interlocking relation with said arm.

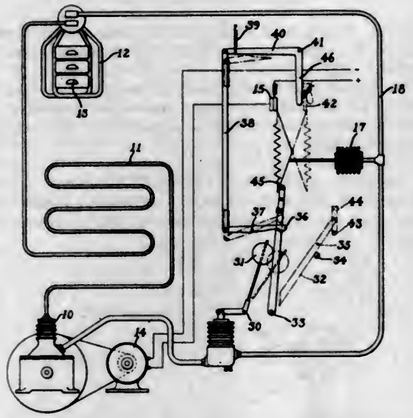
1,780,440. HOLE-CLEANING VALVE FOR ROCK DRILLS. LED L. RICHARDSON, Cleveland, Ohio, assignor to The Cleveland Rock Drill Company, Cleveland, Ohio. Filed Aug. 21, 1928. Serial No. 301,067. 3 Claims. (Cl. 121—10.)



1. The combination with the back head of a drill having a chamber therein, of a plug fitted in the chamber, a stem rotatable in the plug and having a conduit therein, a fluid conducting tube communicating with the conduit, said back head having motive fluid and water passages therein, and means carried by the plug and stem for selectively conducting fluid from the respective passages to the tube, as and for the purpose set forth.

1,780,441. MEANS FOR SCORING ICE BLOCKS BY FLUID PRESSURE. ROBERT H. ROARK, Waco, Tex., assignor, by mesne assignments, to The General Ice Scoring Machine Company, Dallas, Tex., a Corporation of Delaware. Filed Nov. 25, 1927. Serial No. 235,512. 6 Claims. (Cl. 125—13.)

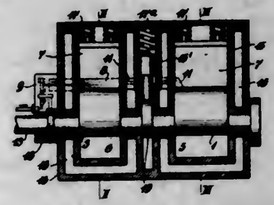
1. In an ice scoring machine having vertically movable scoring means adapted to score a block of ice during such



CARNEGIE LIBRARY OF ATLANTA

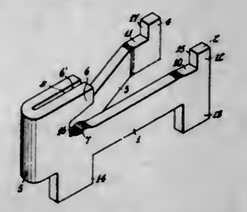
movement, fluid pressure means for effecting said vertical movement, and automatically operated means for cut-

ting off and releasing fluid pressure when the vertical movement in one direction is completed, whereby the scoring means may return to its initial position.



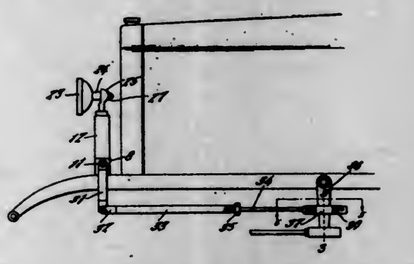
1,780,442. REFRIGERATING APPARATUS. WARREN H. F. SCHMIEDING, Dayton, Ohio, assignor, by mesne assignments, to Frigidaire Corporation, a Corporation of Delaware. Filed Sept. 30, 1927. Serial No. 223,045. 11 Claims. (Cl. 62—3.)

1. Refrigerating apparatus comprising in combination a refrigerating element, means for circulating refrigerant through the element, means responsive to the condition of the system for periodically operating circulating means, means adapted to restrict the flow of refrigerant, means for rendering said last mentioned means operative, and means for rendering said means inoperative after a predetermined operation of the circulating means.



1,780,443. ROTARY INTERNAL-COMBUSTION ENGINE. OTTO W. SCHUMANN, Magdeburg, Germany. Filed May 25, 1928, Serial No. 280,627, and in Germany June 14, 1927. 5 Claims. (Cl. 123—14.)

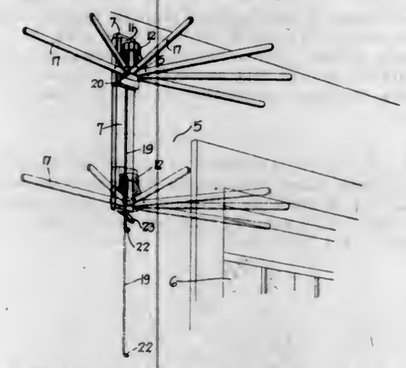
1. A rotary internal combustion engine, comprising, in combination, a casing forming two chambers; a shaft traversing said chambers; two circular pistons affixed to said shaft in said chambers, one of them being larger than the other and serving to compress air, the other being adapted to be driven round in the appertaining chamber by the explosions; a passage provided in said casing and so located as to conduct the compressed air from the chamber enclosing said larger chamber to the



other chamber; a valve inserted into this passage; means for actuating said valve in correspondence with the revolutions of said two pistons; and a fuel nozzle terminating opposite the end of said compressed-air passage at the chamber enclosing the smaller piston, substantially as set forth.

1,780,444. RAIL ANCHOR. CHARLES B. SHEPHERD, Springfield, Mass., assignor, by mesne assignments, to The P & M Company, Chicago, Ill., a Corporation of Illinois. Filed Nov. 20, 1928. Serial No. 320,551. 9 Claims. (Cl. 238—330.)

1. A one-piece rail anchor comprising a pair of legs adapted to extend transversely across the bottom surface of a rail base, said legs being disposed at an angle to each other whereby each leg has one end in close proximity to the end of the other leg and the opposite end substantially spaced from the opposite end of the other leg, separate rail base flange-engaging means disposed on each of the spaced ends and adapted to be flexed one toward the other in applying the anchor to a rail, and rail flange-engaging means disposed at the opposite ends.



1,780,445. DIRIGIBLE HEADLIGHT. JOHN M. SHERWIG, Sharon, Pa. Filed Oct. 11, 1929. Serial No. 398,916. 4 Claims. (Cl. 240—62.)

1. A dirigible headlight apparatus of the class described comprising a bracket structure, a vertical shaft in the bracket structure, a horizontal shaft in the bracket structure, gearing operatively connecting the shafts, a headlight, means engaging the headlight with the verti-

cal shaft to swing upon the rotation thereof, a crank on said horizontal shaft, a link structure connected with said crank, a clamp for connecting the link structure with the steering arm of an automobile, said clamp comprising a pair of L-shaped members having their shorter legs overlapping an L-shaped bracket mounted on the overlapped legs and a bolt through the said legs and the bracket for securing the same together, and adapted to have their longer legs straddling the arm, and a bolt extending through the longer legs to draw them tightly about said arm, said link structure adapted to be attached to said L-shaped bracket.

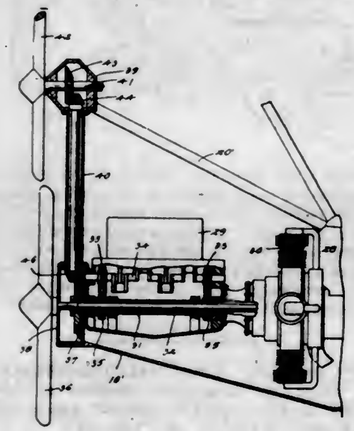
1,780,446. DRYING DEVICE. JOSEPH A. SHOEMAKER, Bennington, Vt. Filed Feb. 14, 1929. Serial No. 339,829. 2 Claims. (Cl. 211—101.)

1. A device for use in drying, comprising a slide strip, a base slidable thereon, a semi-circular block secured to the base and having radial slots and a circumferential shoulder adjacent the lower ends of said slots, a U-shaped holding strip in the block passing through said slots, links pivoted to said holding strip, depending clothes holding arms pivoted to the links, said arms at the link ends being adapted for engagement with the shoulder to be supported horizontally, an operating rod depending from said base, and a yieldable rod holding member on the slide strip.

1,780,447. ROTARY CORE DRILL. JOHN ELGIN SHOWS, Harrisburg, and WILLIAM TRACY DUNN, Houston, Tex. Filed Nov. 2, 1927. Serial No. 230,500. 1 Claim. (Cl. 255—72.)

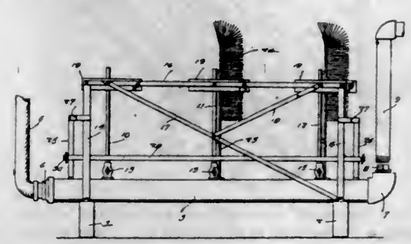
In a cutter, a head having a coreway therein, a collar slidable longitudinally therein, the said collar having longitudinally disposed recesses in its inner face, said recesses being relatively deep at their lower ends, a dog pivoted at its lower end in the deeper portion of each of said recesses, the bottom walls of said recesses inclining in an upward direction toward the axis of said collar to receive said dogs for a substantial part of their length and to maintain the same inclined toward the axis of said collar, and dogs of slightly greater length than their recesses so that their free ends project beyond the upper end of said collar, and a toe on each dog to engage with its respective bottom wall to limit the inward swinging movement of the dog.

1,780,448. METALLIC AIRSHIP OF THE RIGID TYPE. THOMAS B. SLATE, Glendale, Calif., assignor to Slate Aircraft Corporation, a Corporation of Nevada. Original application filed Apr. 28, 1926, Serial No. 105,279. Divided and this application filed Apr. 6, 1927, Serial No. 181,584. Renewed Mar. 24, 1930. 5 Claims. (Cl. 244—3.)



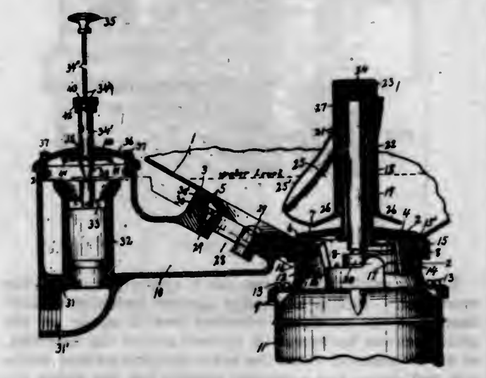
1. An airship of the lighter than air type having an all metal hull comprising gored strips of longitudinally corrugated metal, the corrugations being correspondingly tapered at each end, the strips having their edges lock-seamed and sealed together, and spacing members comprising strips of metal corrugated longitudinally of the strips and formed into rings whereby to space the corrugations of the longitudinal strips to make them rigid in their width.

1,780,449. HAIR WAVING. FOSTER DEE SNELL, Brooklyn, N. Y. Filed July 1, 1929. Serial No. 375,331. 5 Claims. (Cl. 132—36.2.)



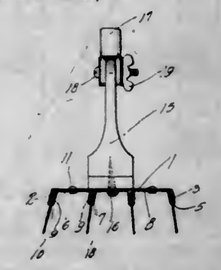
1. The process of waving hair which comprises wetting it with a solution of an alkaline carbonate, wrapping the hair on a curling rod, applying ammonia to the wrapped hair and heating.

1,780,450. AIRCRAFT MOTOR. STEPHEN JUNER VELTON, Houston, Tex. Filed Dec. 9, 1929. Serial No. 412,777. 1 Claim. (Cl. 244—25.)



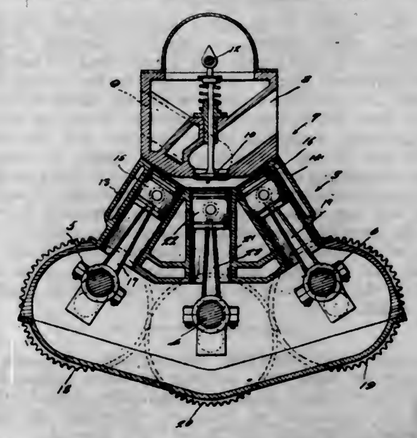
The combination with the fuselage of an airplane, of a frame mounted on and extending forwardly from said fuselage, tandem motors mounted in the frame, the shafts of the motors being telescopically arranged, a casing extending upwardly from and forming part of the casing of the foremost motor, a vertical shaft in the upwardly extending casing geared to said foremost motor, a horizontal shaft in the upper end of said last-named casing driven by said vertical shaft, a propeller on said horizontal shaft, and a propeller on the forward end of the shaft of the rearmost motor.

1,780,451. BOTTLE-CLEANING APPARATUS. ROBERT VOSIKA and LUDVIK VOSIKA, Wilber, Nebr. Filed Aug. 9, 1928. Serial No. 298,511. 2 Claims. (Cl. 15—59.)



1. In a bottle cleaning apparatus of the character described, a pair of spaced supports, a horizontal water pipe extending across the spaced supports, a series of water discharge tubes extending upwardly from the pipe and having communication therewith, a valve associated with each of the tubes at the lower end thereof, a plurality of brush units, each arranged in close proximity to a water discharge tube for position within the interior of a bottle when the bottle is disposed in an inverted position over said discharge tube, a pair of uprights rising from said supports on one side of said water pipe, a horizontally disposed bar secured to the uprights, a plurality of split rings mounted on said horizontal bar, there being one split ring for each of said discharge tubes, said rings being arranged circumjacent their respective discharge tubes, means for securing the split rings in clamped relation about the bottles, a pair of elongated horizontally disposed strips arranged on opposite sides of said tubes, means for supporting said strips in a vertically adjustable position with respect to said tubes, said strips being adapted to support the necks of the bottles disposed over said tubes.

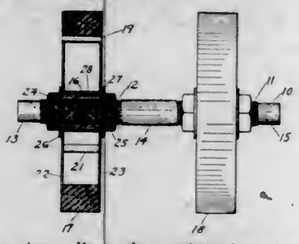
1,780,452. DISHWASHER. FORREST A. WALKER, Syracuse, N. Y., assignor to Walker Dishwasher Corporation, Syracuse, N. Y., a Corporation of New York. Filed July 27, 1927. Serial No. 208,665. 4 Claims. (Cl. 141—9.)



1. In a mechanical dishwasher, a vat, an apertured bushing extending through an opening in the bottom of the vat and provided with a flanged head engaging the inner face of said bottom, a drainage conduit communicating with an opening in the bottom of the vat and provided with an extension loosely surrounding the portion of the bushing adjacent the bottom of the vat, and a motor-supporting ring movably secured to the lower end of the bushing and clamping the conduit extension and bushing to the bottom of the vat.

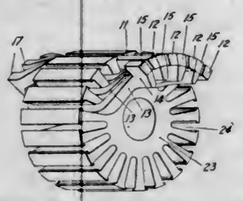
1,780,453. CHOPPER. HANNAH WENALAN, Highland Park, Ill. Filed Mar. 26, 1928. Serial No. 264,855. 1 Claim. (Cl. 146—206.)

A chopper comprising a handle having a sheet of material disposed adjacent one end thereof, said sheet of material being provided with flanges, a plurality of substantially U-shaped members disposed adjacent one side of the sheet of material, a plurality of blades disposed between the sides of certain of the U-shaped members and between other sides of said U-shaped members and said flanges, and means for securing said sheet of material and the U-shaped members to said handle.



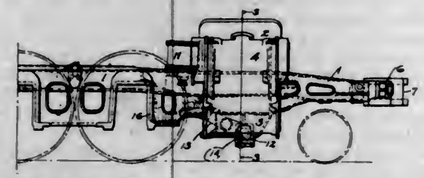
1,780,454. INTERNAL-COMBUSTION ENGINE. JAMES F. WHITE, Richmond, Calif., assignor of ten per cent to Earl W. Terry, Richmond, Calif., ten one-hundredths to E. W. Terry, Albany, Calif., and sixty one-hundredths to Fred Caudle, Richmond, Calif. Filed Dec. 3, 1928. Serial No. 323,479. 1 Claim. (Cl. 123—53.)

An internal combustion engine of the character described comprising a motor block having a single compression and combustion chamber, said block being further provided with intake and exhaust ports communicating with said chamber, a pair of inclined cylinders communicating at their upper ends with the chamber, a vertically disposed cylinder intermediate the inclined cylinders communicating at its upper end with the chamber, a crank shaft positioned below each cylinder in longitudinal alignment therewith, a piston mounted for reciprocation in each cylinder, connecting rods coupling said piston to the adjacent crank shaft, intermeshing gears fixed on each



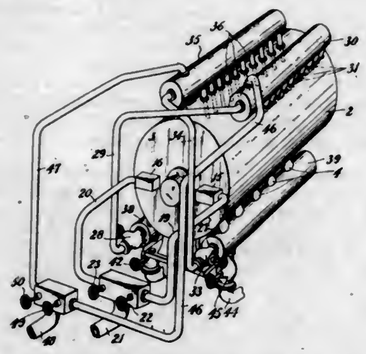
shaft for coupling said crank shafts together, a head mounted on the block having portions of its lower face disposed at right angle to each cylinder to provide a right angularly disposed abutment therefor.

1,780,455. FRICTION DEVICE. VINCENT G. APPLE, Dayton, Ohio. Filed June 14, 1928. Serial No. 285,352. 4 Claims. (Cl. 19—143.)



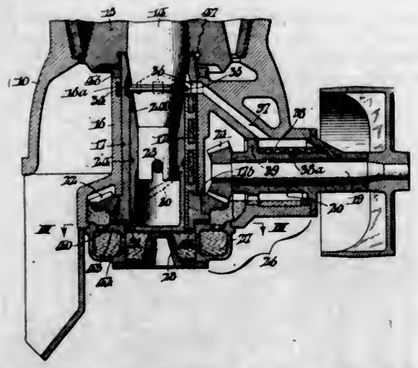
1. In pressing rollers, the combination of a shaft with portions of its diameter threaded, hubs with threaded inside and splined outside diameters disposed on said shaft, wheels with splined inside diameters surrounding said hubs and a common means to lock said wheels and hubs against rotative and axial shift on the shaft.

1,780,456. METHOD OF WINDING DYNAMO-ELECTRIC-MACHINE ELEMENTS. VINCENT G. APPLE, Dayton, Ohio. Filed Nov. 9, 1928. Serial No. 318,223. 4 Claims. (Cl. 171—206.)



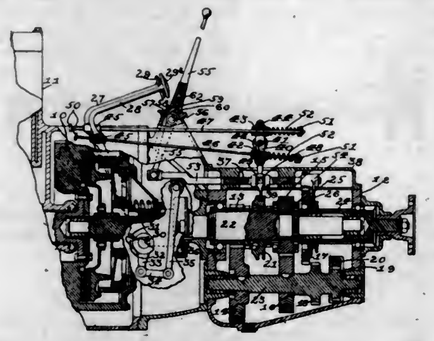
1. The method of winding a dynamo electric machine element, which consists of providing lengths of bar stock, dividing each length from a point near one end to a point relatively farther from the other end thence outwardly thru one edge to compose of each length one relatively short bar and another somewhat longer bar having an upwardly projecting lug at its free end, spreading apart the divided portions of each length to compose loops, assembling a plurality of the loops in the apertures of a core, displacing the ends of the shorter bars outwardly from the core axis, circumferentially displacing the upwardly extending lugs of the longer bars, replacing the ends of the shorter bars to positions circumferentially adjacent the upwardly extending lugs to form pairs, and binding the two parts of each pair together to complete the circuit.

1,780,457. LOCOMOTIVE STRUCTURE. WILLIAM O. ASHE, St. Louis, Mo., assignor, by mesne assignments, to General Steel Castings Corporation, Granite City, Ill., a Corporation of Delaware. Filed Mar. 16, 1928. Serial No. 262,127. 25 Claims. (Cl. 105—44.)



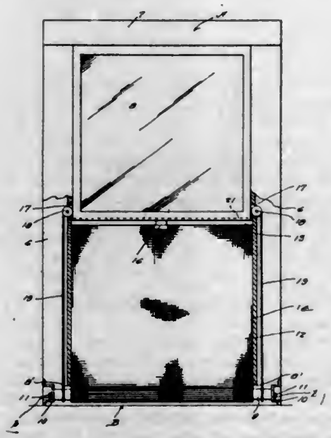
1. In a locomotive, a boiler saddle, and a brake cylinder mounted thereon.

1,780,458. REVERSIBLE STEAM TURBINE ENGINE. CLIFFORD BENNETT, Richmond, New South Wales, Australia. Filed July 12, 1928. Serial No. 292,229. 2 Claims. (Cl. 253—70.)



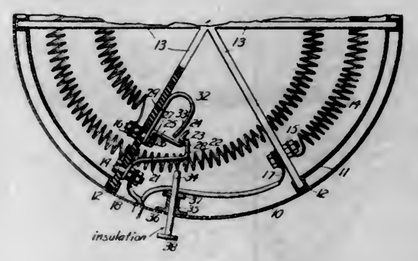
1. An improved reversible steam turbine engine comprising, a cylindrical casing divided to form a high pressure chamber and a series of steam expansion chambers, rotors arranged in said chambers mounted on a common shaft, two steam chambers having jets through which steam is directed to drive the rotor of the high pressure chamber in forward and reverse directions, respectively, means for supplying steam to either of said steam chambers, two inlet manifolds connected to the expansion chambers and having jets arranged to direct steam against the rotors therein to drive them in either direction, means for conducting the exhaust steam from the high pressure chamber to either of said inlet manifolds, and exhaust manifolds receiving the spent steam from the expansion chambers, and wherein the inlet manifolds have two pipes extending into each expansion chamber, said pipes being arranged at opposite sides of the rotors to direct the steam against vanes mounted on both sides of the rotors.

1,780,459. GYRATORY CRUSHER. RICHARD BERNHARD, Allentown, Pa., assignor to Traylor Engineering & Manufacturing Company, Allentown, Pa., a Corporation of Delaware. Filed Jan. 12, 1924. Serial No. 685,776. 4 Claims. (Cl. 308—168.)



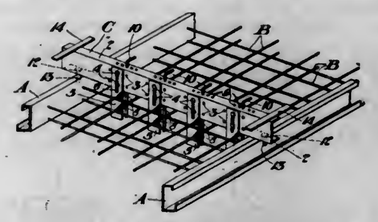
3. In a lubricating system for a gyratory crusher, the combination with a suspended upright gyratory crusher shaft and its revolving eccentric and a sleeve on the shaft forming an extension thereof within the eccentric, of an oil reservoir about the lower portions of said eccentric and sleeve and a bearing support for the sleeve upstanding from the bottom of said reservoir, and means at the co-operating bearing surfaces of eccentric and sleeve for picking up and elevating oil from said reservoir.

1,780,460. ENGINE-CLUTCH-CONTROL-ACTUATED SPEED-CHANGE MECHANISM FOR TRANSMISSION GEARING. EVERETT R. BURTNETT, Pasadena, Calif. Filed Dec. 17, 1929. Serial No. 414,655. 5 Claims. (Cl. 74—81.)



1. In a speed change actuating mechanism for transmission gearing, the combination with a prime mover clutch and a set of speed differentiating gear trains having change gear engagement elements, of a plurality of prime mover clutch throw-out levers provided with the said prime mover clutch, each adopted to commonly control the said clutch, and means including separate connecting linkage provided with each of the said prime mover clutch throw-out actuating movement respectively of the said plurality of clutch throw-out levers with the said change speed engagement elements of the said set of differentiating gear trains, each independently of the other for producing alternately a reverse motion to the said change gear engagement elements of the said speed differentiating set of gear trains, in response to the prime mover clutch throw-out actuating movement respective of each one of the said plurality of prime mover clutch throw-out levers, when the latter are separately employed to throw out the said prime mover clutch.

1,780,461. WINDOW SCREEN. GEORGE W. BYARS, Lexington, N. C. Filed July 5, 1929. Serial No. 376,186. 3 Claims. (Cl. 156—39.)

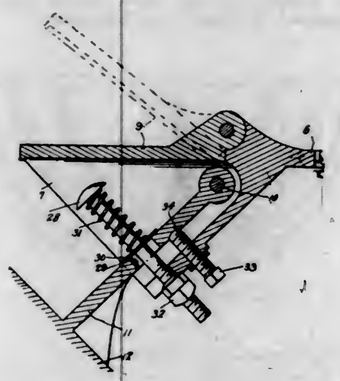


3. In combination, a roller, a flexible screen member windable on the roller, a pair of brackets, said brackets adapted to be secured to a support, each of said brackets including a vertically disposed portion having an elongated slot formed therein for respectively receiving the ends of the roller, springs engaging the ends of the roller and the brackets respectively normally urging the ends of the roller to one end of the slot, and a flexible member trained over said roller and secured at one end to the free end of the flexible screen member, a pulley over which the second mentioned flexible member is adapted to be trained, and means for rotatably mounting said pulley to the support remote from said bracket.

1,780,462. THERMOSTATIC CONTROL FOR ELECTRIC HEATERS. SAMUEL M. CARMEAN and JAMES H. CARMEAN, Kansas City, Mo. Filed Aug. 9, 1926. Serial No. 128,086. 4 Claims. (Cl. 200—138.)

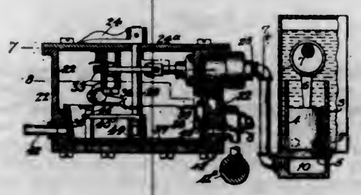
1. A thermostatically controlled switch comprising a contact having an offset tip, a resilient contact normally tending to move toward open circuit position and having a free end provided with a hook for latching engagement with said tip to close a circuit through the contacts, and a thermostatic member having an arm movable against said hook for unlatching the hook from said tip.

1,780,463. CONCRETE REENFORCEMENT SUPPORT. PERRY T. COONS, Montclair, N. J., and GEORGE H. ROSE, Cleveland, Ohio, assignors to The American Steel and Wire Company of New Jersey, a Corporation of New Jersey. Filed Oct. 16, 1929. Serial No. 400,062. 2 Claims. (Cl. 94—39.)



1. A concrete reenforcement support for supporting reenforcement in concrete roads and the like, comprising a supporting beam adapted to be bridged across the side forms of the road, and a plurality of depending vertical legs removably and adjustably mounted on said supporting beam, key pins for securing said legs on said beam, said pins extending through alined apertures in said legs and said beam and being slotted to receive wedge members for preventing displacement thereof.

1,780,464. WHEEL-FLANGE LUBRICATOR. JOHN W. COPPAGE, Franklin Park, Ill. Filed Sept. 5, 1928. Serial No. 304,036. 3 Claims. (Cl. 184—3.)

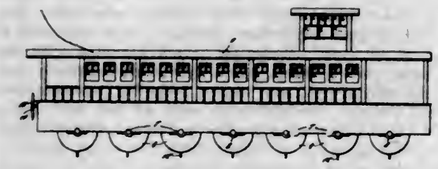


1. In a wheel flange lubricator, an arm adapted to be secured to the stationary member of a car frame adjacent

the wheels of a car, a housing formed integral with the arm at one end of the arm, the outer end of the housing being inclined and opened, an arm pivotally mounted within the housing and having its free end projecting through said opening, a stop member supported in one wall of the housing and adapted to be engaged by said arm to limit the movement of the arm in one direction, said arm being provided intermediate its ends with an opening, a bolt threaded in one wall of the housing and extending through the opening in said arm, a spring member disposed about the bolt, said spring impinging against the head of the bolt at one end of the spring and at its opposite end

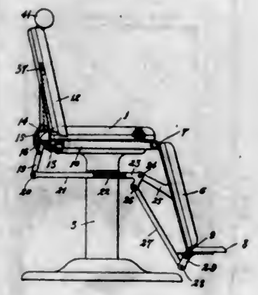
impinging against said arm for normally urging the arm against said stop member, a lubricant container supported on the free end of said arm, a follower member adapted for sliding movement longitudinally of the container for urging the lubricant outwardly of the container for application of the lubricant to the flange of the car wheel, a lever pivotally mounted intermediate its ends within the casing, means operatively connecting one end of said lever with said follower member, spring means for normally urging the lever in one direction for actuating said follower to urge the lubricant exteriorly of its container.

1,780,465. OILING APPARATUS. PETER DOSCH, Stratford, Conn., assignor, by mesne assignments, to Alemite Corporation, Chicago, Ill., a Corporation of Delaware. Filed Nov. 21, 1919. Serial No. 339,692. 21 Claims. (Cl. 184—7.)



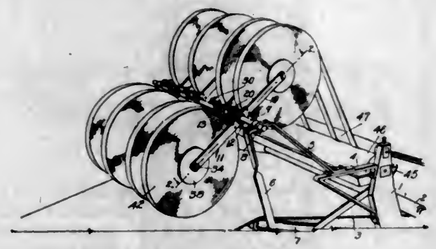
1. A lubricating system for the bearings of a machine, comprising a pipe leading to a bearing, a source of lubricant under variable pressure a valve to control the flow of lubricant from said source into said pipe, hand-operated means to open said valve, and means, operated by the pressure of the lubricant, to close said valve.

1,780,466. LOCOMOTIVE STRUCTURE. GEORGE FRED DRIEMEYER and EDWIN C. JACKSON, St. Louis, Mo., assignors, by mesne assignments, to General Steel Castings Corporation, Granite City, Ill., a Corporation of Delaware. Filed Sept. 14, 1928. Serial No. 306,008. 40 Claims. (Cl. 105—172.)



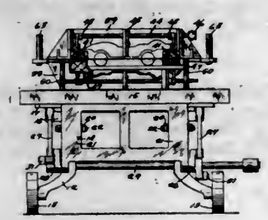
1. In a locomotive bed, side members having portions for carrying a steam cylinder casting, and an expansion plate connecting said portions.

1,780,467. BOAT. JOHN H. FREEZE, Cape Girardeau, Mo. Filed Dec. 9, 1929. Serial No. 412,780. 3 Claims. (Cl. 115—19.)



1. In a boat of the class described, a frame, a plurality of transverse shafts in the frame, a pair of drums on each shaft, sleeves journaled on the shafts and connecting the drums, worm gears on the sleeves, a longitudinal shaft, worm portions on the longitudinal shaft connecting with the worm gears, and means for rotating the longitudinal shaft.

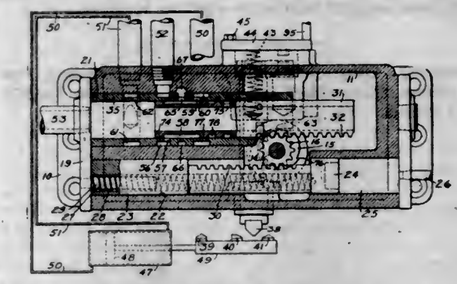
1,780,468. DEFORMABLE CHAIR. MASA FUJITA, Sakai-Gun, Fukui, Japan. Filed Sept. 13, 1928. Serial No. 305,699. 11 Claims. (Cl. 155—27.)



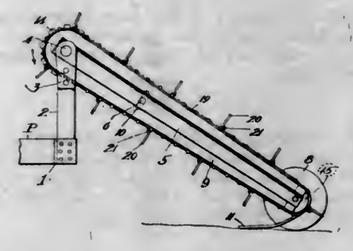
4. A chair, comprising a pedestal; a unit rotatably mounted on the pedestal and consisting of a seat, a leg support and a foot rest; a chair back having a separate rotatable mounting on the pedestal for rotation independently of and relatively to said seat unit; and means for operatively connecting said chair back and seat unit together to transmit the movement of either element to the other.

1,780,469. REVERSIBLE REEL FOR STRIP-APPLYING MACHINES. PAUL A. DINSMOOR, Lawrence, Kans., assignor to Lawrence Paper Manufacturing Company, Lawrence, Kans., a Copartnership composed of The M. G. Bowersock Trust, Irving Hill, Paul A. Dinsmoor, Hortense B. Hill, and Mary B. Dinsmoor. Original application filed May 12, 1926, Serial No. 108,556. Divided and this application filed Aug. 13, 1928. Serial No. 299,356. 6 Claims. (Cl. 242—64.)

3. Apparatus of the character described, comprising a shaft, an arm comprising a bushing adjustable on the shaft, a hub rotatable on the bushing, bars extending oppositely from the hub, means for anchoring the hub in either of two positions on the bushing, and means at the ends of the bars for rotatably supporting a reel.



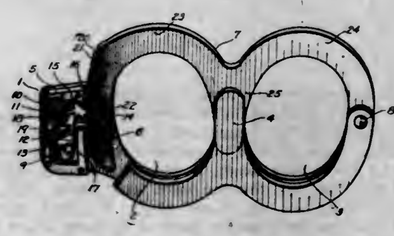
1,780,470. CORE-MOLDING MECHANISM. RAY E. DUNHAM, Berea, Ohio, assignor to The Dunham Company, Berea, Ohio, a Corporation of Ohio. Filed Jan. 28, 1929. Serial No. 335,445. 10 Claims. (Cl. 22—10.)



1. Core molding mechanism, comprising a frame; a table; means for effecting substantially vertical reciprocation of said table relative to said frame; a drag section and a cope section mounted respectively on said table and on said frame and movable relative to each other into and out of cooperating position; and means, becoming operable as said sections are moved out of cooperating position, for supporting the core independently of said drag section.

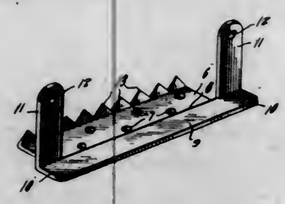
1,780,471. HYDRAULIC CONTROL VALVE UNIT. ROBERT M. GALLOWAY and ROBERT A. SCHAFER, Richmond, Ind., assignors to The National Automatic Tool Company, Richmond, Ind., a Corporation of Indiana. Filed July 20, 1928. Serial No. 294,138. 13 Claims. (Cl. 121—45.)

1. A completely enclosed leak proof valve and actuating mechanism comprising a casing, having a plurality of fluid conduits of unequal capacity connected therewith; a valve member slidable in said casing and adapted to control the fluid flow through said conduits; impositive means therein for urging said valve in one direction; fluid pressure means for moving said valve in the opposite direction against said impositive means; interference means for locking said valve in predetermined positions relative to said conduits; and means extending from said casing adapted to be actuated to release said interference means.



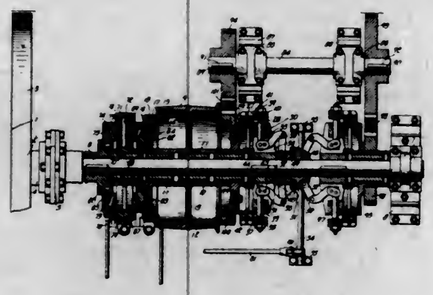
1,780,472. PICK-UP ATTACHMENT FOR COMBINES. GEORGE V. GILGER, Cimarron, Kans., assignor of one-half to Harvey B. Marcum, Newton, Kans. Filed Oct. 21, 1929. Serial No. 401,140. 5 Claims. (Cl. 56—364.)

1. A pick-up attachment, comprising a framework pivotally supported at its rear end, for up and down movement, and provided at its front end with ground-engaging devices, a series of downwardly and forwardly sloping swing arms pivotally supported at their rear ends for independent swinging movement in a vertical plane, ground-engaging shoes holding the front ends of the respective swing arms above the ground, a driven shaft journaled in the framework, wheels thereon, endless conveyors extending along the top and bottom of the swing arms respectively and engaging said wheels, and fingers on said conveyors for picking up grain from the ground and dumping it at the rear ends of said swing arms.



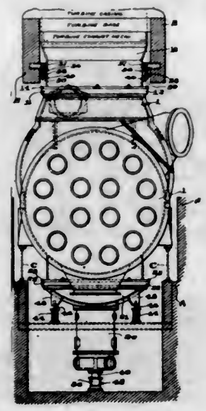
1,780,473. MANACLE. STELLA FRANCES GILL, Kansas City, Mo., assignor to Newton S. Hillyard, St. Joseph, Mo. Filed Dec. 9, 1929. Serial No. 412,805. 4 Claims. (Cl. 70—24.)

1. In a device of the character described, a body comprising spaced plates having arcuate portions forming



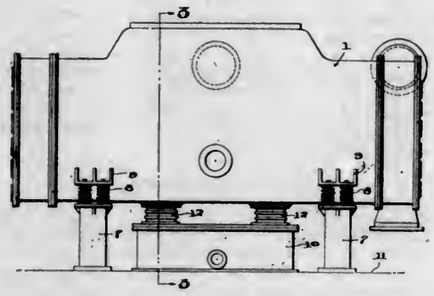
wrist-receiving seats and a rigid lever pivotally mounted on the body to swing between the plates and having clamping portions provided with arcuate faces cooperating with said seats to form wrist-receiving openings.

1,780,474. UPHOLSTERY DEVICE. FRED GLAZER, Dorchester, Mass. Filed Apr. 30, 1929. Serial No. 359,274. 5 Claims. (Cl. 155—179.)



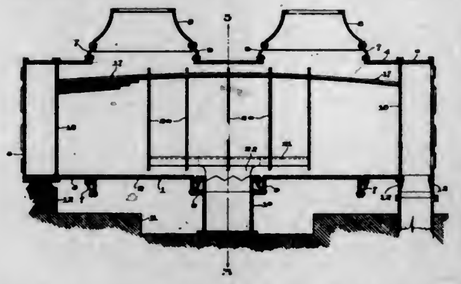
1. A retainer member of the class described comprising a flat bearing surface having vertical pointed projections at one edge and an offset parallel flat section at the opposite edge.

1,780,475. VARIABLE-SPEED TRANSMISSION. SAMUEL B. GOLD and BRUCE E. GOLD, Kansas City, Mo., assignors to Weber Engine Company, Kansas City, Mo., a Corporation of Iowa. Filed Oct. 20, 1928. Serial No. 313,755. 3 Claims. (Cl. 74—21.)



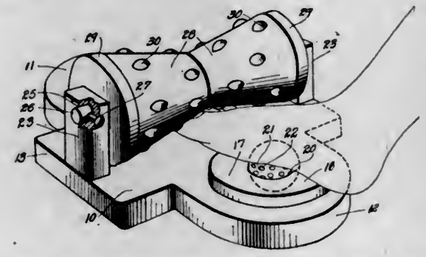
1. In a device of the class described, a power shaft, a pulley loosely mounted on the power shaft, clutch mechanism connecting the power shaft with the pulley to drive the pulley at the speed of the power shaft, a sprocket wheel loose on the power shaft, a counter shaft, a sprocket wheel fixed on the counter shaft and driven from the sprocket wheel on the power shaft, a second sprocket wheel fixed on the counter shaft, a sprocket wheel fixed on the pulley driven from the last named sprocket wheel, and a clutch for connecting the first named sprocket wheel to the power shaft.

1,780,476. STEAM CONDENSER. JOHN F. GRACE, Arlington, N. J., assignor to Worthington Pump and Machinery Corporation, New York, N. Y., a Corporation of Virginia. Filed Dec. 12, 1928. Serial No. 325,625. 33 Claims. (Cl. 257—43.)



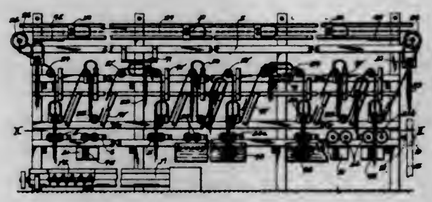
1. In a condenser, a condenser shell, an exhaust steam inlet member, a condensate reservoir, and expansion joints between said inlet member and shell and between said condensate reservoir and shell.

1,780,477. CONDENSER. JOHN F. GRACE, Arlington, N. J., assignor to Worthington Pump and Machinery Corporation, New York, N. Y., a Corporation of Virginia. Filed Jan. 16, 1930. Serial No. 421,198. 18 Claims. (Cl. 257—43.)



1. In a condenser, a shell, spring supports therefor, a hot well rigidly supported independently of said shell, and an expansion joint between said hot well and shell.

1,780,478. CONDENSER. JOHN F. GRACE, Arlington, N. J., assignor to Worthington Pump and Machinery Corporation, New York, N. Y., a Corporation of Virginia. Filed Jan. 16, 1930. Serial No. 421,199. 12 Claims. (Cl. 257—43.)

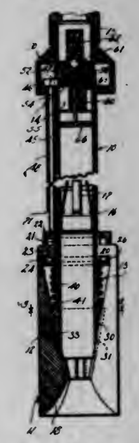


1. In a condenser, a shell, a hot well, tubes in said shell, an expansion joint connecting said hot well and shell, and support plates for said tubes rigidly connected to and supported from said hot well.

1,780,479. ARCH CORRECTOR. FLOYD H. GRIFFITH, Kansas City, Mo. Filed July 13, 1926. Serial No. 122,208. 2 Claims. (Cl. 128—57.)

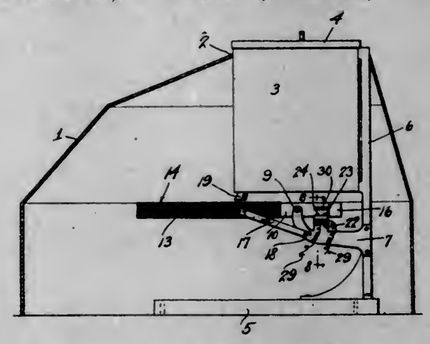
1. An arch corrector including a base plate, a roller mounted transversely on the plate having tapered surfaces meeting on the median line of the plate and a ball rotatably mounted on the median line of the plate in spaced relation with the roller.

1,780,480. METHOD OF AND APPARATUS FOR DECORTICATING, RETTING, AND SCUTCHING FLAX. NORMAN CECIL GRIGG, Drysdale, Victoria, Australia. Filed Jan. 12, 1929. Serial No. 332,073. 18 Claims. (Cl. 19—13.)



1. A method of treating flax which consists in attaching sheaves of flax to a conveyor at longitudinally spaced positions thereof, causing the conveyor to feed each sheaf successively to series of decorticating devices, retting devices and scutching devices, and varying the attitude of each sheaf on the conveyor after a portion of the sheaf has been acted upon by one or more devices of each series so that the other portion of the sheaf will be acted upon by the other device or devices of each of said series of devices.

1,780,481. SPIRAL CONVEYER. STEPHEN H. HALE, Kansas City, Mo., assignor to Gleaner Combine Harvester Corporation, Independence, Mo., a Corporation of Delaware. Filed Sept. 14, 1928. Serial No. 306,034. 5 Claims. (Cl. 56—20.)



1. In combination with a conveyer housing having a lateral discharge opening at one end, a shaft rotatable in said housing, a spiral conveyer blade on the shaft, terminating in a wing radial to and substantially parallel with the shaft, and a stop member on the shaft at the end of the housing cooperative with said wing for interrupting travel of grain longitudinally in the housing and diverting the grain into said opening.

1,780,482. WELL TOOL. LELAND S. HAMER and JOHN Q. [illegible]TLE, Long Beach, Calif. Filed Dec. 3, 1928. Serial No. 323,447. 13 Claims. (Cl. 294—86.)

1. A well tool of the character described including, a body, an expansible head to guide an object into the body, means carried by the body for releasably holding the head in an unexpanded position, and means for yieldingly holding the head in expanded position.

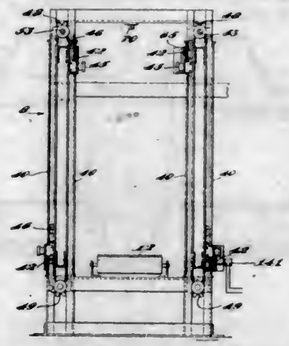
1,780,483. AMMONIA-GAS DETECTOR. LOUIS A. HAVENS, Jr., Queens Village, N. Y. Filed Oct. 3, 1928. Serial No. 309,975. 7 Claims. (Cl. 200—52.)

1. A gas detecting apparatus comprising in combination, a gas collecting hood, a standard arranged within the

hood, a vertically swinging liquid container having a foraminous body, a circuit closer structure operatively associated with the pivoted container and the support and normally held in an inoperative position by the weight of the liquid in the container, said circuit closer structure being disposed in an operative position when the gas collected in the hood comes in contact with the liquid in the container to lower the surface tension thereof and to cause the liquid to flow downwardly through the foraminous body of the container.

1,780,484. TEA CARTRIDGE. BENJAMIN HIRSCHHORN, New York, N. Y., assignor to Millie Patent Holding Co., Inc., New York, N. Y., a Corporation of New York. Filed Apr. 18, 1929. Serial No. 356,055. 1 Claim. (Cl. 53—3.)

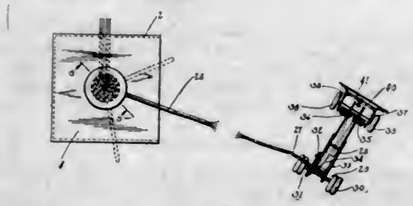
A device for extracting essence from tea-leaves or coffee, comprising a bag having its mouth drawn into folds, a metal strip engaging and compressing said folds for closing the mouth of said bag, a suspending string extended through said metal strip, a handle attached to one end of said string, and a stop on the other end of said string, said string being adapted to be drawn through said metal strip in either direction so that either said stop or said handle is adapted to be brought adjacent said metal strip.



1,780,485. OPERATING BLAST FURNACES. JOHN C. HOPKINS, Lakewood, and ALFRED OSOLIN, Cleveland, Ohio. Filed May 13, 1929. Serial No. 362,794. 3 Claims. (Cl. 266—42.)

1. In the operation of blast furnaces the steps consisting of tapping said furnaces with the blast pressure on, and then stopping the iron flow while the blast pressure is maintained by forcing a continuous and uninterrupted flow of clay into the tapping-hole under sufficient pressure to stop the flow of iron and until the tapping-hole is completely plugged.

1,780,486. CONVEYER SYSTEM. CHESTER S. JENNINGS and LAVONT C. ALLEN, Syracuse, N. Y., assignors to The Lamson Company, Syracuse, N. Y., a Corporation of Massachusetts. Filed Mar. 30, 1929. Serial No. 351,147. 25 Claims. (Cl. 198—37.)

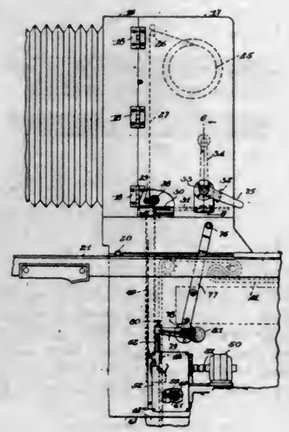


9. Apparatus of the class described, comprising a plurality of elevators, a common conveyer arranged to receive loads from each of the elevators, stations at which loads may be supplied to the elevators, individual driving means for each of the elevators, individual control means permitting actuation of the driving means only when the corresponding elevators are loaded, and a common control means permitting movement of the loaded elevators only in synchronized relation.

20. Apparatus of the class described comprising a plurality of devices each movable along a predetermined path from load-receiving to load-delivering position, means adapted to move all of said devices synchronously, and control means preventing movements of any of such devices which has not received a load but permitting the loaded devices to move in unison.

23. Apparatus of the class described comprising a plurality of devices each movable along a predetermined path from load-receiving to load-delivering position, control means comprising a timer for determining the instant at which such devices may start to move, means adapted to move all of said devices in unison, and means to prevent any of said devices from starting during the loading of any one of said devices.

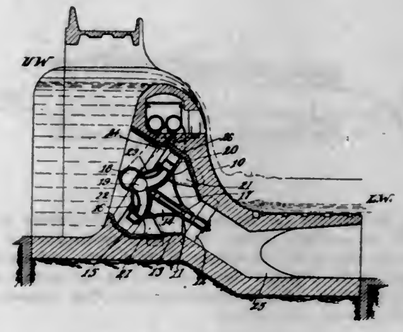
1,780,487. ELECTRIC TOY. MAX L. JURGENSEN, Chicago, Ill. Filed Apr. 18, 1929. Serial No. 356,171. 8 Claims. (Cl. 46—49.)



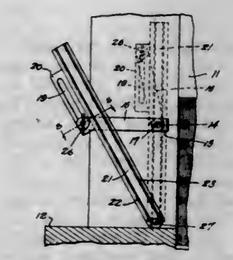
1. A device of the type described comprising a movable toy provided with wheels, electromagnetic means for turning certain of said wheels to steer the toy, and means for bringing the wheels into a normal position for causing a direct forward movement when the electromagnetic means is de-energized.

1,780,488. PRICE TAG. FREDERICK KOHNLE, Dayton, Ohio, assignor to The Monarch Marking System Company, Dayton, Ohio, a Corporation of Ohio. Filed Feb. 20, 1929. Serial No. 341,442. 1 Claim. (Cl. 40—25.)

In a pin ticket, a ticket of plural ply thickness the material forming the ticket folded upon itself providing a fold edge along one end of the ticket, and a penetrating and attaching member therefor constituting a wire bent to form a plurality of double shank pins extending from one side of the ticket, a cross bar portion connecting the pins between the plies of the ticket and extending parallel with and in proximity with the fold edge of the ticket, and the free ends of the wire each respectively extending from the pin at right angles to the cross bar portion and between the plies of the ticket, and toward the fold edge thereof, the cross bar portion and free ends forming a base for the pins and concealed within the ticket.



1,780,489. PHOTOGRAPHIC APPARATUS. PAUL LANDROCK, Rochester, N. Y., assignor to Photostat Corporation, Providence, R. I., a Corporation of Rhode Island. Filed Nov. 6, 1928. Serial No. 317,611. 7 Claims. (Cl. 95—34.)

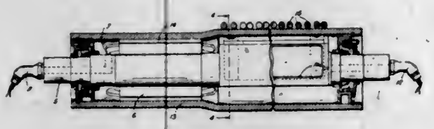


1. In a photographic apparatus, the combination with a camera body arranged to contain a strip of sensitized sheet material, of exposing mechanism, devices for feeding said strip to bring successive portions thereof into the focal plane for exposure and to remove the exposed portions from the focal plane, sheet severing means operable at will independently of said exposing mechanism arranged to sever the exposed portions of said strip, conveying mechanism for moving the severed portions of said sheet material, a driving motor, clutch means connecting said driving motor to said conveying mechanism, and instrumentalities under the control of said severing means for controlling said clutch means.

1,780,490. UTILIZATION OF HYDRAULIC ENERGY. FRANZ LAWACZECK, Munich, Germany, assignor to Worthington Pump and Machinery Corporation, New York, N. Y., a Corporation of Virginia. Original application filed Aug. 24, 1921, Serial No. 494,893, and in Germany Dec. 21, 1918. Divided and this application filed May 14, 1928. Serial No. 277,732. 4 Claims. (Cl. 103—87.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

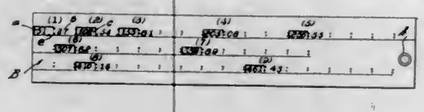
1. In a hydraulic power plant, a dam, a low pressure turbine, a rotary pump, said pump and turbine connected to form a unit located in the dam, said rotary pump and turbine being disposed in the dam to provide a water passage about the pump to the vanes of the turbine runner, and a float forming chamber between said pump and turbine for balancing the pump and the turbine unit and reducing bearing stress.

1,780,491. VENTILATOR. ADOLPH MAEULEN, Williamsport, Pa., assignor to Williamsport Mirror & Glass Co., Williamsport, Pa., a Corporation of Pennsylvania. Filed Mar. 5, 1930. Serial No. 433,380. 7 Claims. (Cl. 98—99.)



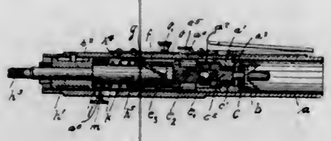
3. A window ventilator bracket including a channel-shaped member made up of a web and opposite side walls, means for pivotally connecting said member to a window frame, one of said walls being cut to provide a slotted tongue arranged in substantially the same plane as the web.

1,780,492. RAIN DRAIN FOR WINDOW SCREENS. EDWARD A. MALM, Wadena, Minn. Filed Dec. 2, 1927. Serial No. 237,271. 1 Claim. (Cl. 156—14.)



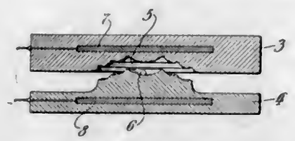
A rain drain for window screens, comprising a unit consisting of a tubular shell, a flanged end, a perforated end and an outwardly raised projection on the shell body.

1,780,493. CONVEYER AND CONVEYER ROLLER. WILLIS MCKEE, Cleveland, Ohio, assignor to The Central United National Bank, a Corporation of Ohio. Filed Sept. 17, 1927. Serial No. 220,111. 11 Claims. (Cl. 198—127.)



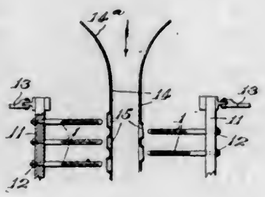
1. A conveyer for magnetic articles comprising a plurality of rollers, means for rotatably supporting said rollers, certain of said rollers being driven, and electrical means in the driven rollers for rotating the same and including winding for magnetically attracting magnetic articles on said last rollers.

1,780,494. CALCULATING DEVICE. JOHN R. MCNALLY, Raleigh, N. C. Filed Sept. 15, 1928. Serial No. 306,200. 1 Claim. (Cl. 235—89.)



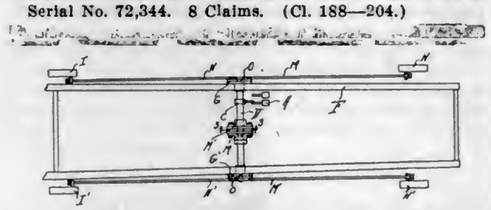
A calculating device of the character described comprising in combination a card having a partial key number positioned thereon and a plurality of numbers constituting partial products of said partial key number and an apertured card adapted to be superposed on said first card, said apertured card having a key number aperture therein adapted to expose the partial key number therethrough and also having the remainder of the key number positioned thereon adjacent said key number aperture, the remaining apertures of said card having numbers positioned adjacent thereto constituting multipliers of said key number, said remaining apertures being disposed about said apertured card whereby to expose therethrough selected numbers of said first card, said selected numbers constituting partial products of the key number, said apertured card having numbers adjacent each aperture, said latter numbers when combined with said partial products completing the product of the key number by the multiplier.

1,780,495. DRIVING MECHANISM USED IN CONNECTION WITH DENTAL TOOLS. HENRY MEYER, Hamburg, Germany. Filed Mar. 6, 1928, Serial No. 259,591, and in Germany Mar. 7, 1927. 3 Claims. (Cl. 192—56.)



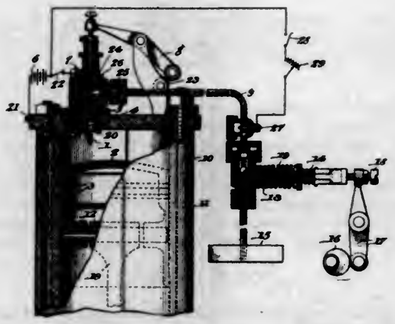
1. In combination, a casing, a power driven shaft mounted in the casing, said shaft having a spiral groove, a clutch member slidably mounted on the end of said shaft, a ball seated between the clutch member and the spiral groove, a second clutch member mounted in the casing in alignment with the first mentioned clutch member, a tool holder carried by the second mentioned clutch member, a spring for normally moving the first mentioned clutch member to engage the second mentioned clutch member and an automatically operated latch for holding the first mentioned clutch member out of engagement with the second mentioned clutch member.

1,780,496. METHOD OF EMBOSSING PLYWOOD. GEORGE R. MEYERCORD, Chicago, Ill., and CHARLES B. NORRIS, Grand Rapids, Mich., assignors to Haskelite Manufacturing Corporation, a Corporation of New York. Filed Mar. 15, 1929. Serial No. 347,436. 7 Claims. (Cl. 101—32.)



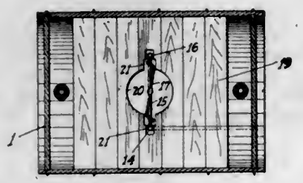
1. The method of producing an embossed plywood panel which consists in boiling the panel, placing it between suitable complementary heated dies, alternately opening the dies and closing them under a high pressure during a short period of time, and then holding the dies closed on the work until the latter has become dry.

1,780,497. COTTON PICKER. WILLIAM E. MILLER, ROY J. SHINN, and CORNELIUS S. GROVE, Hickory, N. C. Filed Apr. 12, 1928. Serial No. 269,552. 8 Claims. (Cl. 56—41.)



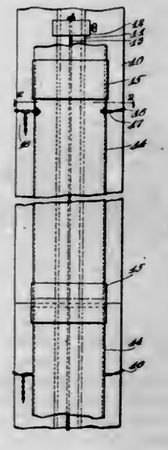
1. In a cotton picker, the combination with a barbed reciprocatory finger, of a fixed stripper plate having an opening through said finger is adapted to freely reciprocate, the inner margin of said opening being flaring or funnel shaped, and spaced from said finger.

1,780,498. BRAKE-EQUALIZING MECHANISM. OWEN M. NACKEN, Detroit, Mich., assignor of one-half to Alanson P. Brush, Detroit, Mich. Filed Nov. 30, 1925. Serial No. 72,344. 8 Claims. (Cl. 188—204.)



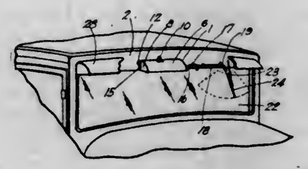
6. In a brake system, the combination with a plurality of brakes, and a common actuating member therefor, of a plurality of equalizing elements arranged between the common actuating member and the said brakes, and means for locking each of the said equalizing elements.

1,780,499. SYSTEM OF IGNITION FOR EXPLOSIVE MIXTURES. LUIS NOVELLI, Bahia Blanca, Argentine Republic. Filed Aug. 7, 1929. Serial No. 384,220. 4 Claims. (Cl. 123—32.)



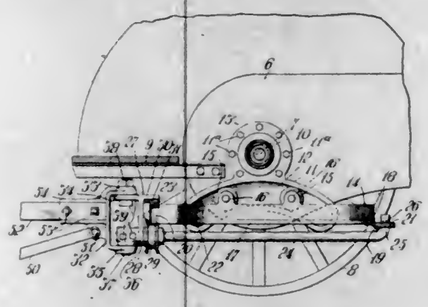
1. The combination of a combustion engine, a pressure fuel supply having a conduit leading directly to a combustion chamber of the engine; an electric heating element within and coextensive with the conduit; and an ignition element within the chamber confronting the inlet thereto from the conduit.

1,780,500. SPRAY-TANK AGITATOR. ELWIN L. O'HARA, Antioch, Calif. Filed Mar. 8, 1929. Serial No. 345,422. 2 Claims. (Cl. 259—96.)



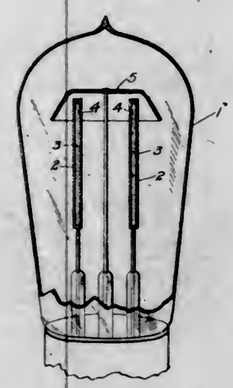
1. In a spray tank, a rotary agitating nozzle disposed to be below the level of the liquid in the tank, said nozzle comprising opposed radial discharge pipes and a hub to which they are secured set on a vertical axis, a baffle-floor disposed above the agitator and terminating short of the end-walls of the tank, said floor having an opening concentric with the agitator, and means for circulating liquid from the tank through the agitator under pressure.

1,780,501. PLUMB PROTECTOR FOR ELEVATOR GUIDES. THOMAS J. OSINGA, Chicago, Ill. Filed Feb. 1, 1929. Serial No. 336,848. 7 Claims. (Cl. 33—216.)



1. A protective enclosure for the plumb wire employed for alining the guide rails in an elevator shaft, comprising a tubular housing about the wire, and open in the side adjacent the rail, the latter forming a closure for the opening when the housing is assembled with the rail.

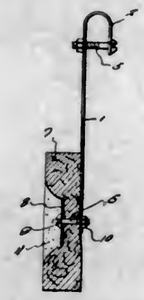
1,780,502. APPARATUS FOR ELIMINATING ICE FROM WINDSHIELDS. CLIFF R. OTTO, Edmond, Okla. Filed Feb. 4, 1929. Serial No. 337,512. 2 Claims. (Cl. 20—40.5.)



1. A device of the class described, comprising a rigid reservoir disposed on the exterior of the front top cross-frame of a motor vehicle, adjacent the front surface of the wind-shield thereof, for housing a suitable liquid, having protruding from one of its lower edges, a short nipple, a suitable pipe adapted to be anchored to said top cross-frame having its outer end turned downwardly, a delivery tube of suitable material adapted at one end to snugly fit the turned down portion of said pipe its other end being beveled forming a lip on its lower edge, said lip being adapted to constantly touch the outer surface of said wind-shield, a rubber tubing adapted at one end to snugly fit said short nipple the other end adapted to fit said pipe, a screw-clamp pinch-cock, adapted to fit said rubber tubing and to regulate and stop the flow of liquid therethrough, all and as for the purposes specified.

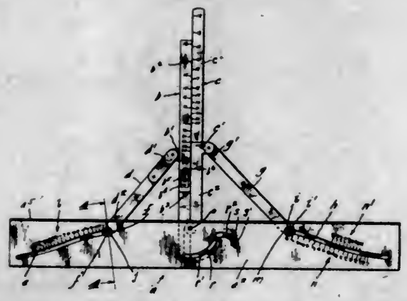
1,780,503. POWER-TRANSMITTING MECHANISM. WILLIAM L. PAUL, Berkeley, Calif., assignor to Deere & Company, Moline, Ill., a Corporation of Illinois. Filed Dec. 3, 1928. Serial No. 323,490. 51 Claims. (Cl. 280—33.12.)

1. A hitch connection for tractors comprising a draft frame connected with the tractor to oscillate vertically about a point lying below the point of physical connection of said draft frame with the tractor, and rearwardly extending draft transmitting means pivotally connected with said draft frame.



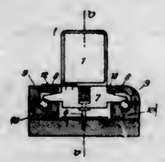
1,780,504. RECTIFYING TUBE. JACQUES RISLER, Paris, France, assignor to Risler Corporation of America, Kansas City, Mo., a Corporation of Delaware. Filed Aug. 1, 1927, Serial No. 209,788, and in France June 3, 1927. 1 Claim. (Cl. 250—27.5.)

A rectifying tube comprising a bulb evacuated to 2 to 10—4 mm. containing an anode with an exposed surface of substantially 4 cm^2 and two hollow, perforated cathodes each substantially 0.5 mm. in diameter and 2 cm. long and placed with their ends 2 to 4 mm. from the anode surface, the hollows in the cathodes containing an alkaline earth salt.



1,780,505. OIL-GAUGE-ROD WIPER. JOHN RUFFING, Sr., Nokomis, Ill. Filed Feb. 20, 1930. Serial No. 429,990. 1 Claim. (Cl. 15—210.)

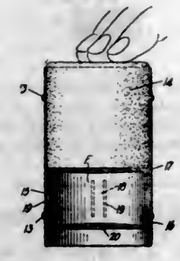
An oil gauge rod wiper of the character described comprising a flat, elongated metallic hanger, an integral supporting yoke on one end of the hanger, a clamping bolt extending through the yoke, a wiping disc of compressible material disposed against the other end portion of the hanger, a headed bolt extending centrally through the disc and through the hanger, a washer mounted on the bolt and interposed between the disc and the bolt head, and



a nut threaded on the bolt and engaged with the hanger in a manner to draw the bolt therethrough for compressing the central portion of the disc and forming a depression in the free side of the disc, the marginal portion of the disc being uncompressed and comparatively loose.

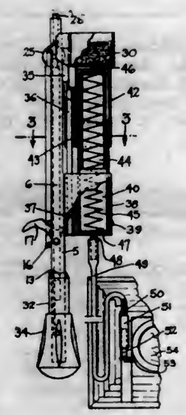
1,780,506. COMBINATION TOOL. AXEL RUTQUIST, Portland, Oreg. Filed June 29, 1925. Serial No. 40,342. 3 Claims. (Cl. 33—91.)

1. An instrument of the character described, comprising a straight-edge formed on one of its edges with oppositely projecting flanges normal to the said straight-edge, two arms each pivoted adjacent one end to the straight edge between the flanges at a common point, one of said arms being provided with a slidable extension, said arms being correspondingly graduated, and means, carried by the straight-edge, adapted to lock said arms together when arranged normal to each other.



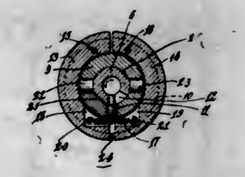
1,780,507. METHOD OF TELEGRAPHING IN MORSE CODE AND APPARATUS THEREFOR. RICHARD LEONARD ARNOLD SCHOEMAKER, Delft, Netherlands. Filed Mar. 20, 1928, Serial No. 263,040, and in the Netherlands May 20, 1927. 5 Claims. (Cl. 178—87.)

1. The method of telegraphically transmitting messages in Morse code by the means of electric impulses in which



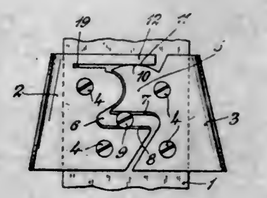
all the symbols and characters of the Morse alphabet as well as every combination of the same are produced by moving one single contact over one single path of contacts or the reverse, and wherein movement of the movable contact in one direction from the starting position at zero and then back to said starting position, transmits a dot or dots, with the proper intervals, and its movement from the zero position in the opposite direction, and back to the zero position, transmits a dash or dashes, with the proper intervals, combinations of dots and dashes being produced by combinations of movements on both sides of the zero position.

1,780,508. DISPENSING CONTAINER. HERMAN E. SCHULSE, New York, N. Y., assignor to H. E. Schulse Inc., a Corporation of New York. Filed Oct. 17, 1927. Serial No. 226,565. 7 Claims. (Cl. 206—56.)



5. A dispensing holder for stick polish wax comprising a metallic open-ended cylindrical case, a follower cylinder therein closed at both ends and of substantial height, said follower cylinder having a spring gripping means for friction-holding engagement within the cylinder in any position, either of the opposite faces of said closed cylinder being adapted for direct engagement by the thumb for facility in feeding the stick from either end of the holder.

1,780,509. FLASH DEVICE. WILLIAM T. SKINNER, Leonia, N. J. Filed Mar. 23, 1929. Serial No. 349,398. 3 Claims. (Cl. 67—29.)

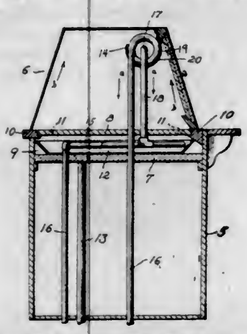


3. In a flashlight device for a camera, a handle, ignition mechanism mounted thereon, first and second socket pieces secured to said handle, a guide rod in said socket pieces, a sleeve slidable on said guide rod, an outer movable cylinder secured to said sleeve, an open top powder container secured to said cylinder, a stationary cylinder fixed to said lower socket piece and disposed within said movable cylinder, a movable inner cylinder within said cylinders, a helical spring within said fixed cylinder and said inner movable cylinder, and a flexible air hose connected to said stationary cylinder and adapted to be connected to the film exposure control mechanism of a camera.

1,780,510. COLLAPSIBLE HUB. ANTHONY G. WISE, Los Angeles, Calif., assignor to Metro-Goldwyn-Mayer Corporation, Culver City, Calif., a Corporation of New York. Filed Aug. 25, 1928. Serial No. 302,085. 5 Claims. (Cl. 242—70.)

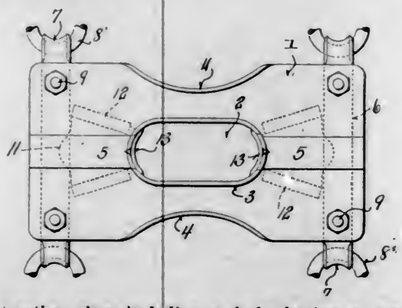
1. A collapsible hub comprising a central sleeve provided with flats in its outer surface, a spool on said sleeve, means for limiting the rotation of said spool on said sleeve, hub sections pivotally connected to said spool, spring means yieldingly connecting the free ends of said hub sections, and means carried by said spool and adapted to cooperate with said sleeve for pivotally moving said hub sections into expanded position when said sleeve is partially rotated with respect to said spool.

1,780,511. SKI TIE. BROR WITH, Skoyen, near Oslo, Norway. Filed Mar. 16, 1929, Serial No. 347,517, and in Norway Mar. 29, 1928. 6 Claims. (Cl. 208—184.)



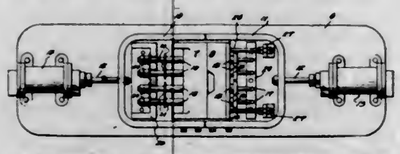
1. Toe irons for a ski tie comprising horizontal portions adapted to be secured to the upper surface of the ski, one of which portions is provided with a projection received by a cut-out in the other portion, one side edge of the projection and the adjacent side edge of the cut-out being beveled, such side edges being so far apart that a slot is formed therebetween, an adjusting screw entering the slot and acting against the beveled portions of said edges and forcing the opposite edge of the projection against the adjacent side edge of the cut-out and thereby temporarily securing said portions to each other and to the ski under the adjustment of said irons.

1,780,512. SHOW CASE. OSCAR MEYER WOLFF, Chicago, Ill. Filed Dec. 12, 1927. Serial No. 239,570. 4 Claims. (Cl. 62—89.5.)



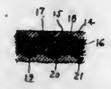
1. In a show case, the combination of a casing having an upper display compartment and a lower counter compartment, a horizontal partition separating the two compartments, displaceable plates forming a closed floor for the display compartment spaced above the horizontal partition to provide an intermediate chamber between the two compartments, said plates having openings through their opposite ends for the flow of condensate from the display compartment to the intermediate chamber, and a heat exchange element comprising upper and lower coils

in series connection mounted in the casing with the upper coil positioned in the display compartment adjacent to the top thereof and the lower coil positioned in the intermediate chamber, said upper coil comprising a straight pipe and a spiral pipe coiled around the straight pipe to provide an extensive heat exchange surface within a small compass in the upper part of the display chamber, said lower coil being flat to fit within the intermediate cham-



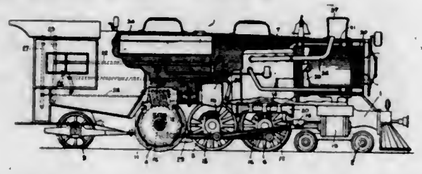
ber adjacent to the floor of the display chamber and having less heat exchange surface than the upper coil so that the greater chilling effect of the latter tends to induce vertical circulation of air in the display chamber, said plates providing a screen for the lower coil to temper the chilling effect of the latter on the lower part of the display compartment to enhance the circulation of air in the display compartment.

1,780,513. TRACTION LUG. BRUNO ARPS, New Holstein, Wis. Filed July 20, 1928. Serial No. 294,135. 1 Claim. (Cl. 305—10.)



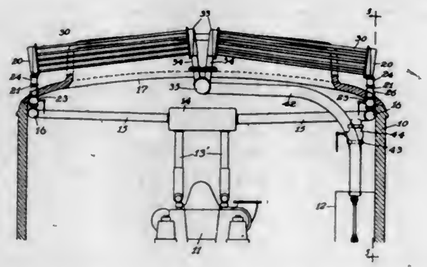
A traction shoe including a body having a central opening, inwardly projecting wheel guide lugs having inclined guide faces, lateral feet on each lug secured to the inner face of the body and tongues on the inner lateral ends of said lugs projecting into the central opening and secured to said body.

1,780,514. MOLDING APPARATUS. ARTHUR T. BATEMAN and ANDREW IRVINE, Detroit, Mich., assignors to Bohn Aluminum & Brass Corporation, Detroit, Mich., a Corporation of Michigan. Filed Aug. 17, 1928. Serial No. 300,285. 4 Claims. (Cl. 22—136.)



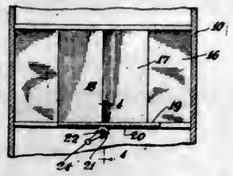
1. In a molding apparatus, the combination with a base, of permanent mold sections arranged on said base and adapted to form a mold cavity, said mold sections including a movable mold section, and means for ejecting the casting formed in the mold cavity of said movable mold section, including an ejector rod slidably engaging said movable mold section, a head upon said rod, a stop upon said base through which the ejector rod slides, means upon said rod and engageable with one side of said stop for limiting the movement of said rod in one direction, means upon said movable mold section and engageable with said head to move said rod in the opposite direction, and means upon said rod engageable with the other side of said stop for limiting movement of said rod by the movable mold section.

1,780,515. BRAIDED WAVED BRAID. HARRY BERLIN, Brooklyn, N. Y. Filed Mar. 19, 1930. Serial No. 437,079. 2 Claims. (Cl. 96—25.)



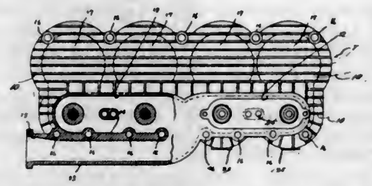
1. A new article of manufacture comprising a braid of diagonal weave wherein the threads of the longitudinal central portion are alternately forced towards the outer edge of the braid, providing a wave-like zone in the center of the braid.

1,780,516. LOCOMOTIVE POWER PLANT. LEONARD R. BESTER, Long Island City, N. Y. Original application filed Feb. 28, 1930, Serial No. 432,076. Divided and this application filed May 2, 1930. Serial No. 449,112. 8 Claims. (Cl. 105—62.)



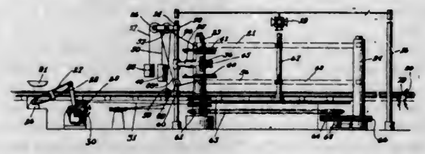
1. A locomotive comprising a frame, three sets of driving wheels held therein, and an internal combustion engine located above said wheels, and a boiler shell enclosing said engine.

1,780,517. INTERNAL-COMBUSTION-ENGINE COOLING SYSTEM. ANDREW CHRISTIANSON, Pittsburgh, Pa., assignor to Standard Steel Car Corporation, a Corporation of Pennsylvania. Filed Sept. 22, 1927. Serial No. 221,266. 8 Claims. (Cl. 123—174.)



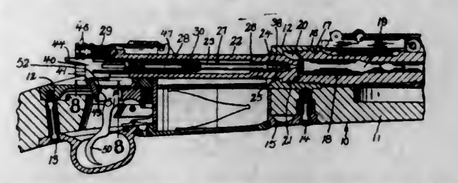
1. The combination in a railroad motor car of a motor cooling system including a radiator positioned above the roof of said car, a water pipe extending loosely through an opening formed in said roof, means for resiliently supporting said radiator on said roof and a yielding water-conveying connection between said pipe and said radiator.

1,780,518. ARMORED CAR. KARL DANKER, New York, N. Y. Filed May 7, 1929. Serial No. 361,149. 2 Claims. (Cl. 89—40.)



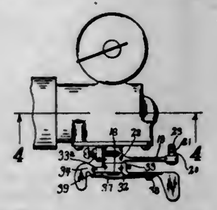
1. In an armored car of the class described, a windshield, a means for protecting said windshield in case of danger, said means comprising a pair of shutters, frames therefor, a rack on said frame, a gear in mesh with said rack, and an operating handle within the car to close said shutters behind the windshield.

1,780,519. INTAKE MANIFOLD. EVERETT M. DE LONG, Detroit, Mich. Filed Sept. 24, 1925. Serial No. 58,411. 2 Claims. (Cl. 123—52.)



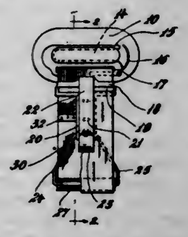
1. In combination with an internal combustion engine having a cylinder block provided with a plurality of cylinders, a unitary head adapted for mounting on said block, said head having a longitudinally extending chamber formed therein, the under surface of said head being spaced from the upper surface of said block throughout the major portion of its area to provide a plurality of chambers each in communication with one of said cylinders, said longitudinal extending chamber communicating with inlet ports with each of said cylinder communicating chambers; an exhaust conduit for each of said cylinders in said block and opening beneath said inlet port into said cylinder communicating chambers; a valve cage mounted on and integral with said head; an intake conduit integral with said head and extending longitudinally thereof throughout substantially one-half its length and communicating with said longitudinally extending chamber, said longitudinally extending chamber lying intermediate the axial line of said intake conduit and said cylinder communicating chambers.

1,780,520. RAILROAD-CROSSING GATE AND TRAIN STOP. PAUL FISCHER, New York, N. Y. Filed Nov. 8, 1929. Serial No. 405,611. 13 Claims. (Cl. 246—127.)



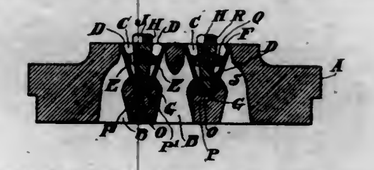
1. In a railroad crossing barrier a hollow post, a rigid shaft receiving said hollow post, a sheave wheel mounted revolvably on said shaft, said sheave wheel being movable independently of hollow post, a cable trained about said sheave wheel, a weight suspended from said cable, a sleeve mounted loosely on said shaft, a ratchet wheel rigid with said sleeve and said sheave wheel and means remote from said hollow post for rotating said ratchet wheel in one direction and lifting said weight when taking up said cable on said sheave wheel for rotating said post.

1,780,521. HIGH-SPEED-FIRING MECHANISM. JOHN C. GARAND, Springfield, Mass., assignor to The Lyman Gun Sight Corporation, Middlefield, Conn. Filed Dec. 28, 1928. Serial No. 329,012. 18 Claims. (Cl. 42—16.)



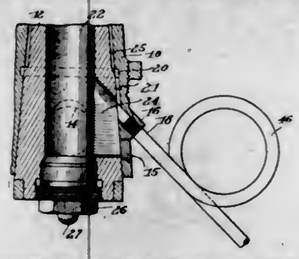
1. In a firing pin for a rifle having a receiver, and a rotatable bolt mounted in said receiver in which said firing pin is adapted to be mounted, said bolt being provided with a cam, a camming surface on the firing pin adapted on rotation of the bolt to cooperate with the cam to move the firing pin longitudinally of the bolt, and means on said firing pin for preventing rotation of the latter during the camming thereof by the bolt, said means including a device carried by the firing pin and engaging a part of the receiver during the camming of the firing pin to hold the latter out of contact with the receiver.

1,780,522. REMOTE CONTROL DEVICE FOR CARBURETORS. FORRESTER L. HAMMER, Branford, WOODRUFF R. SMITH, West Haven, and SWAN ESBORN, Branford, Conn., assignors to Malleable Iron Fittings Company, Branford, Conn. Filed July 19, 1928. Serial No. 294,021. 8 Claims. (Cl. 261—62.)



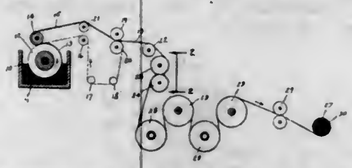
1. In a device for controlling a carburetor valve, a controlling arm adapted to be connected to said valve, means for limiting the movement of said arm, means for actuating said arm from a remote point, a second controller arm connected to said valve and having an unlimited oscillatory movement, and means to disconnect said first named arm from the carburetor valve to permit movement of the latter by the second named arm beyond the position defined by the limiting means.

1,780,523. BELT CARRIER. AUGUST HEIN, Brooklyn, N. Y. Filed Aug. 15, 1929. Serial No. 386,121. 5 Claims. (Cl. 241—7.)



1. In a belt carrier an anchor plate, a nose on said anchor plate, a bifurcated member engaging said nose, a belt carrying member, an elastic band suspending said belt carrying member from said plate, and means for locking said bifurcated member in engagement with said nose.

1,780,524. PLATE VALVE. LESLIE R. HUFF, Phillipsburg, N. J., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Nov. 22, 1928. Serial No. 321,103. 4 Claims. (Cl. 277—46.)

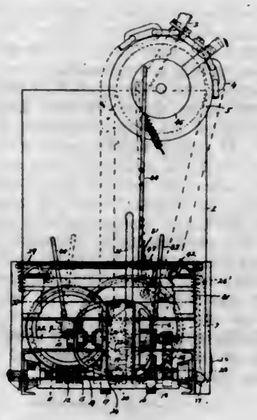


1. In a plate valve assembly, the combination of a valve seat having grooves therein and passageways in the valve seat opening into the grooves, stop plates in the grooves, diverging sides in the grooves to form seating surfaces around the outlet openings of the passageways, rigid valve plates in the grooves cooperating with the seating surfaces for controlling the passageways, means integral with the valve plates and engaging the stop plates for retaining the valve plates in the grooves, and springs interposed between the valve plates and the stop plates for closing the valve plates.

1,780,525. SANITARY VALVE. JENS N. JACOBSEN, Alameda, Calif., assignor to The Pfaudler Company, Rochester, N. Y., a Corporation of New York. Filed Apr. 29, 1927. Serial No. 187,656. 8 Claims. (Cl. 137—69.)

1. The combination with a valve provided with a chamber having inlet and outlet ports and an auxiliary port, of a fluid conduit provided with a trap adapted to communicate with said auxiliary port, and means for closing said inlet and outlet ports, opening said auxiliary port, and causing said fluid conduit to communicate with said chamber.

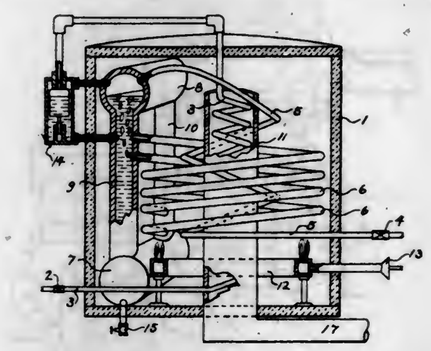
1,780,526. SHOCK-ABSORBING CUSHIONING PAPER AND METHOD OF MAKING SAME. JOHN E. KIEFFER, Ewing, Ind., assignor to Kieffer Paper Mills, Ewing, Ind. Filed Dec. 27, 1927. Serial No. 242,875. 1 Claim. (Cl. 92—49.)



As an article of manufacture, a shock absorbing cushioning paper provided on both of its sides with a multiplicity of molded hollow resilient protuberances closely spaced in all directions, said protuberances having been molded into said paper after it has been completely formed and after a substantial portion of its water content had been removed without materially decreasing its plasticity or causing the fibers to set in their usual substantially flat condition, and prior to the final conditioning and setting of the fibers of the paper, said resilient protuberances serving to impart to said paper a rubber-like resiliency normal to the surface.

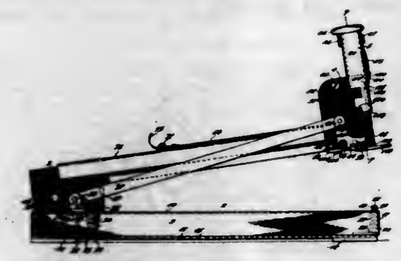
1,780,527. FOUNTAIN PEN. MORRIS KOLBER, Brooklyn, N. Y., assignor to New Diamond Point Pen Co., Inc., New York, N. Y., a Corporation of New York. Filed Aug. 17, 1929. Serial No. 386,528. 2 Claims. (Cl. 120—42.)

1. As a new article of manufacture, a self filling fountain pen embodying a barrel having a relatively thin tubular wall for the greater portion of its length, one end of the barrel terminating in a chambered, exteriorly threaded portion having a wall of greater thickness than the wall of the barrel and provided exteriorly and intermediate the ends of the threaded portion with a rigid annular flange, a suitable plug carrying a pen point and closing the other end of the barrel, a self-filling mechanism associated with the barrel intermediate the said plug and the threaded portion whereby the threaded portion at either side of the flange is adapted to be screwed into a suitable cap which serves to house and conceal the self-filling mechanism when the pen is not in use.



1,780,528. BALING PRESS. GEORGE W. LANGFORD, Ann Arbor, Mich. Filed Apr. 5, 1923. Serial No. 630,078. 8 Claims. (Cl. 192—138.)

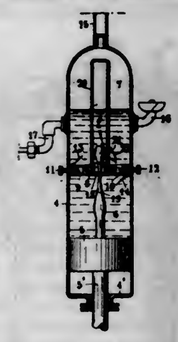
1. A driving means for baling presses having a baling chamber and a plunger movable therein, including a motor, a worm, change speed gearing between said motor and worm, a worm wheel meshing with said worm and operatively connected to said plunger, a member adapted to be actuated by longitudinal movement of said worm, an actuating rod connected to said member, a lever having one end engaging the actuating rod and the opposite end arranged to control the change speed gearing, and springs upon said actuating rod engageable with said lever and operable upon a longitudinal movement of the worm to control said change speed gearing.



1,780,529. STEAM OR VAPOR GENERATOR. LLOYD S. LANTERMAN, La Canada, Calif. Filed Nov. 14, 1927. Serial No. 233,155. 3 Claims. (Cl. 122—250.)

1. In a tubular vapor generator, an upper steam and water drum and a lower mud drum spaced from said steam drum, a pair of spaced pipes connecting said steam and water drum and said mud drum, a coil of hollow pipe arranged adjacent said drums, said coil having the upper end thereof communicating with one end portion of

one of said pipes and having the other end thereof communicating with the lower end portion of the other pipe, a steam discharge line extending from the upper portion of the steam and water drum, said steam discharge line passing through said coil.

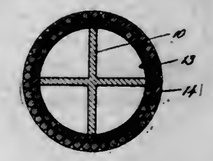


1,780,530. STAPLING MACHINE. ARTHUR H. MAYNARD, Warwick, R. I., assignor to Boston Wire Stitcher Company, Portland, Me., a Corporation of Maine. Filed Dec. 21, 1927. Serial No. 241,591. 19 Claims. (Cl. 1—3.)

1. In a stapling machine, the combination of means for driving a staple into the work, means for successively feeding staples to the driving-means, detent-means movable with the staple-driving means, means engageable with the detent-means for preventing the return of the driving-means to first position, and a cam acting on the detent-means to shift it into inoperative position when the driving-means has been moved to the full extent to complete the operation of setting the staple in the work.

1,780,531. PNEUMATIC SUSPENSION FOR AIRPLANES. GEORGE LOUIS RENÉ JEAN MESSIER, Montrouge, France. Filed Sept. 7, 1928, Serial No. 304,433, and in France Sept. 22, 1927. 2 Claims. (Cl. 267—64.)

1. In a pneumatic suspension for the landing gear of airplanes, in combination, a cylinder pivotally attached to said airplane, a piston pivoted on the landing gear and containing said piston, a volume of gas in said cylinder, a volume of liquid in said cylinder, a diaphragm centrally positioned in said cylinder below the level of said liquid, said diaphragm being provided with a central orifice and intermediate orifices, a rod having a restricted portion, integral with said piston and passing through said central orifice, a closed tube mounted on said diaphragm

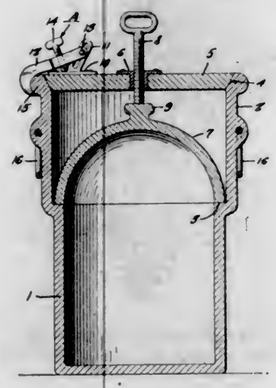


over said central orifice being provided with a side orifice and a flap valve covering said side orifice when said piston descends.

1,780,532. COMBINED COLLAR AND NECKTIE HOLDER. WILLIAM J. MORSE, Attleboro, Mass. Filed Mar. 20, 1930. Serial No. 437,410. 6 Claims. (Cl. 24—49.)

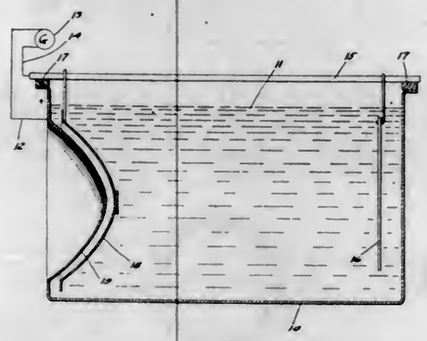
1. A combined collar and necktie holder, comprising a central necktie holding portion and a pair of oppositely-extending arms, each being provided with collar-gripping jaws.

1,780,533. ELECTRICAL CONDUCTOR. GEORGE C. OXER, New York, N. Y., assignor to American Brass Company, a Corporation of Connecticut. Continuation of application Serial No. 693,977, filed Feb. 20, 1924. This application filed Apr. 2, 1927. Serial No. 180,358. 10 Claims. (Cl. 173—13.)



1. A flexible electrical conductor having a large superficial area adapted for high tension transmission lines, which comprises multiple concentric hollow pathways of annular cross-section made of metal of high conductivity and supported from within by a metallic reinforcement extending throughout the length of the conductor, the said reinforcement consisting of a spiralled metallic member of structural shape cross-section, the extremities of the elements of which engage the inner conducting pathway and support the conductor against collapse.

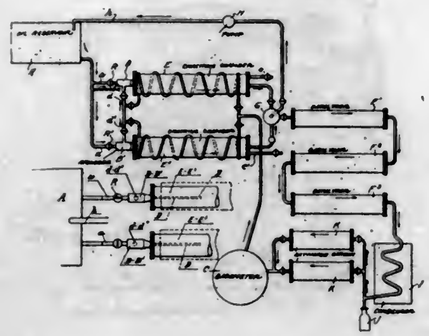
1,780,534. ACID JAR. REYNOLD W. PETERSON, Galva, Ill. Filed Dec. 10, 1928. Serial No. 325,004. 2 Claims. (Cl. 220—29.)



1. A device of the class described comprising a container having an enlarged upper part which forms an internal seat at its junction with the lower part, said enlarged part having a beveled seat at its upper end, a

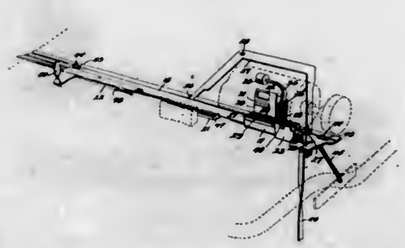
cover having a beveled edge engaging the said seat, clamps for clamping the cover to the upper part of the receptacle, a cover within the enlargement and engaging

the shoulder and a clamping screw passing through the first cover and engaging the second cover when the screw has been turned to a certain position, for holding the second cover in place.



1,780,535. CHROMIUM PLATING. WILLIAM M. PHILLIPS, Birmingham, Mich., assignor, by mesne assignments, to General Motors Research Corporation, Detroit, Mich., a Corporation of Delaware. Filed June 30, 1926. Serial No. 119,663. 3 Claims. (Cl. 204—1.)

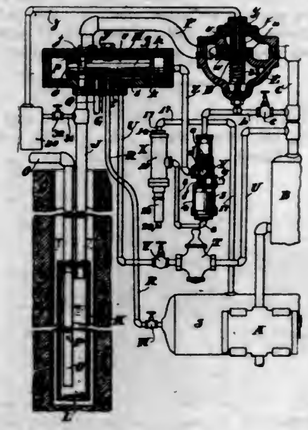
1. The process of depositing substantially pure metallic chromium upon conducting surfaces comprising electrolyzing a bath containing chromic acid as the principal constituent of the materials in solution and substantially free of any other constituent tending to attack iron during the deposition of the chromium, a metallic anode being employed the principal constituent of which is iron.



1,780,536. PROCESS AND APPARATUS FOR TREATING HYDROCARBONS. EUGÈNE ALBERT PRUDHOMME, Neuilly-sur-Seine, France, assignor to Societe International des Procedes Prudhomme (S. I. P. P.), Paris, France, a Limited Joint-Stock Company. Filed June 5, 1926, Serial No. 113,983, and in France Apr. 9, 1926. 4 Claims. (Cl. 196—53.)

4. A continuous process for treating heavy hydrocarbons which consists in atomizing a charge of said hydrocarbons, cracking the atomized charge alternately in one of a pair of heated chambers containing a catalytic purifier, condensing the resultant products and separating residual gases, heating the mass of hydrocarbons to be atomized by returning the heavy fractions of said condensed products to said mass, employing the residual

gases to assist in atomizing said charge, burning the coke deposited during cracking in one chamber while carrying on the cracking in the other chamber, and employing the heat generated by combustion of said coke to heat said residual gases.

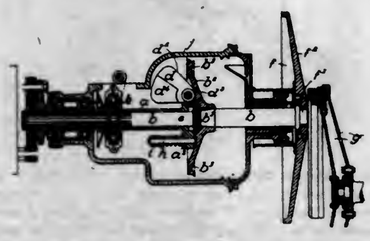


1,780,537. TYPEWRITING MACHINE. DAVID Y. READ, Washington, D. C., assignor to L C Smith & Corona Typewriters Inc., Syracuse, N. Y., a Corporation of New York. Filed July 6, 1927. Serial No. 203,814. 24 Claims. (Cl. 197—63.)

24. In a typewriting machine, in combination, a frame, a carriage mounted on the frame for translatory movement, a margin stop adjustably mounted on the carriage, a line lock stop mounted on the carriage, a bar supported on the frame adjacent the carriage and arranged parallel to the path of the carriage, an abutment adjustably supported on said bar for cooperation with the margin stop, a line lock stop abutment mounted on said bar, and means for laterally moving said bar to withdraw the abutment out of the path of travel of the margin stop for the purpose set forth.

1,780,538. ACCUMULATOR TIMING ELEMENT FOR PRESSURE-FLUID-SUPPLY VALVES. SNOWDEN B. REDFIELD and JULIUS NAAB, Easton, Pa., assignors to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Dec. 16, 1927. Serial No. 240,489. 4 Claims. (Cl. 137—139.)

1. A control mechanism for a fluid supply line, comprising a main pressure fluid supply pipe, a main control valve for the pressure fluid supply pipe, an exhaust valve, a timing accumulator to which the supply of pressure fluid

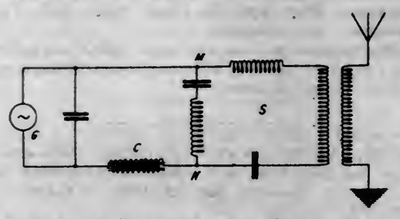


is controlled by said exhaust valve, and a change valve controlling the exhaust valve and regulated by the timing accumulator.

1,780,539. PROCESS OF TREATING FIBER OF NON-CONIFEROUS ORIGIN, GEORGE A. RICHTER, Berlin, N. H., assignor to Brown Company, Berlin, N. H., a Corporation of Maine. Filed Mar. 11, 1927. Serial No. 174,718. 11 Claims. (Cl. 92—13.)

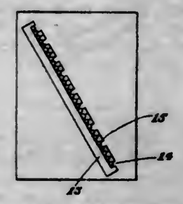
1. A step which comprises digesting previously liberated wood fiber of non-coniferous origin, at about room temperature in a solution of alkaline compounds.

1,780,540. GOVERNOR MECHANISM. JOHN HOGG ROBERTSON, London, England. Filed Aug. 8, 1929, Serial No. 384,447, and in Great Britain Dec. 19, 1928. 2 Claims. (Cl. 74—97.)



1. In a variable friction gearing having a driving member displaceable axially according to its speed, a governor mechanism comprising a rotary support mounted upon the driving shaft, a slidable plate mounted in axial alignment with said shaft, said slidable plate being fast with the axially displaceable member of the gearing, spring means tending to hold said slidable plate towards said rotary support, and a plurality of cams mounted upon said support, said cams being rotatable upon axes lying along the sides of a polygon coaxial with the driving shaft, the centers of gravity of said cams being normally on the side remote from said plate and their edges directed towards said plate being adapted to displace said plate away from said support under the action of centrifugal force, said edges being formed with initial engagement faces of spiral shape and later engagement faces of less sharply curved outline, said faces being adapted to come successively into engagement with said plate as said cams rotate under the action of centrifugal force.

1,780,541. SPRING AIR GUN. ERNEST S. ROE, Plymouth, Mich., assignor to The King Manufacturing Company, Plymouth, Mich., a Corporation of Michigan. Filed Feb. 6, 1928. Serial No. 252,307. 4 Claims. (Cl. 46—46.)

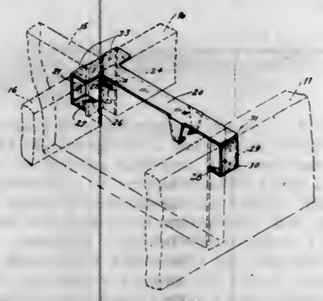


1. In an air gun, the combination with a barrel having an air chamber therein and an elongated slot adjacent to said air chamber, of a projectile adapted to close said chamber, a spring actuated plunger for compressing the air within said chamber and discharging the said projectile therefrom, and compression mechanism for said spring including a pump handle having a projection extending through said slot and terminating within said barrel in an enlarged portion for slidably supporting the handle upon the barrel, said enlarged portion also being operable in one position of the handle to form a stop for said projectile and operable in another position of the handle to move the projectile into sealing engagement with the chamber.

1,780,542. COUPLING ARRANGEMENT FOR FREQUENCY CHANGERS. WALTER SCHAFFER, Berlin, Germany, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany, a Corporation of Germany. Filed Dec. 4, 1924, Serial No. 753,768, and in Germany Dec. 6, 1923. 3 Claims. (Cl. 172—281.)

1. In a device for transforming the frequency of an alternating current from a given value to another, an iron core choke coil for frequency multiplication, a source of fundamental frequency and a series tuned circuit tuned to said fundamental frequency, al connected electrically in series, and a consumption circuit shunted across said series tuned circuit.

1,780,543. JAZZ ORGAN. KARL STIEGELMAYER, New York, N. Y. Filed Apr. 10, 1928. Serial No. 268,818. 2 Claims. (Cl. 84—376.)

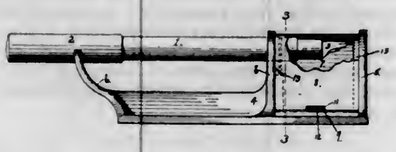


1. In a jazz organ, a bellows, a frame enclosing each end of said bellows, a key-board mounted on the face of one of said frames, said key-board extending diagonally from an upper corner outwardly to a lower corner, said key-board having keys thereon, the keys having inclined sides.

1,780,544. FASTENER FOR PACKING CASES. WILLARD M. STOREY, Winston-Salem, N. C. Filed Dec. 16, 1929. Serial No. 414,444. 6 Claims. (Cl. 217—70.)

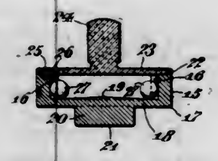
6. In a fastener adapted to secure the partition members of a packing case in position with relation to the

side wall portions, a fastening member adapted to have one end thereof embedded in the side wall portion of the crate, and the other end thereof being adapted to



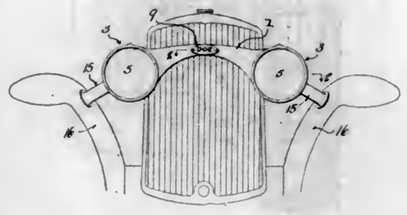
be secured in the side wall portion of one of the longitudinally disposed partition members of the crate and on opposite sides of one of the transverse partition members of said crate.

1,780,545. SUBSTITUTED THIURAM POLYSULPHIDE AND PROCESS OF MAKING. GEORGE STAFFORD WHITBY, Montreal, Quebec, Canada, assignor, by mesne assignments, to The Roessler & Hasslacher Chemical Company, New York, N. Y., a Corporation of Delaware. Filed Apr. 28, 1928. Serial No. 273,777. 7 Claims. (Cl. 260—16.)



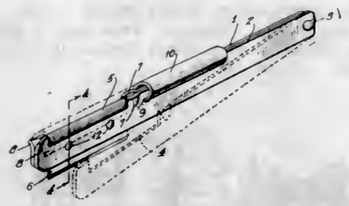
1. The method of producing tetra alkyl polysulphides which comprises treating salts of dialkyl dithiocarbamic acid with sulphur chloride.

1,780,546. FOUNTAIN-PEN HOUSING. CLINTON R. WILLIAMS, New York, N. Y. Filed Mar. 16, 1927, Serial No. 175,689. Renewed Mar. 22, 1930. 5 Claims. (Cl. 120—108.)



1. In a construction for covering the pen-nib end of a fountain pen, a suitable housing provided with a movable closure which opens upon removal of the pen-nib, means for moving said closure into closed position and said means being engaged and actuated by the insertion of the fountain pen in the housing to thereby close the closure.

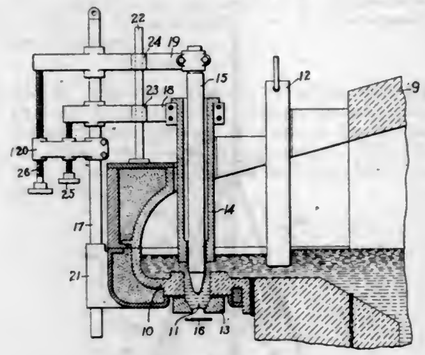
1,780,547. TOP. MAURICE ALLAND, Atlantic City, N. J. Filed Oct. 11, 1928. Serial No. 311,831. 1 Claim. (Cl. 273—147.)



A top, comprising a cylindrical wall having spaced recesses and spanned by a bottom wall having a depending flattened projection and a convex inner surface, a transparent closure for the upper open portion of said top provided with an extension for manually setting the top in motion, means carried by said first-named wall and engaging said closure to prevent relative rotation therebetween, and a gravity actuated element upon said convex surfaces adapted to roll radially into one of said recesses when the top rests upon said flattened projection.

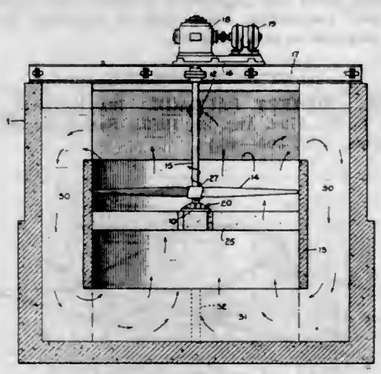
1,780,548. HEADLIGHT. ANDREW ASTRUP and WILLIAM ASTRUP, Racine, Wis. Filed Feb. 4, 1929. Serial No. 337,454. 1 Claim. (Cl. 240—7.1.)

In a headlight structure, a tubular body portion having its ends enlarged transversely to provide housings for headlights, brace members extending laterally from the headlight housings and arranged at an angle out of a parallel with the tubular portion for supporting the tubular portion and the housings in a substantially horizontal plane.



1,780,549. SAFETY-RAZOR-BLADE HOLDER. JOHN W. ASHWORTH, New York, N. Y., assignor to Ashworth Advertising Company, Incorporated, New York, N. Y., a Corporation of New York. Filed May 7, 1929. Serial No. 361,068. 6 Claims. (Cl. 30—25.)

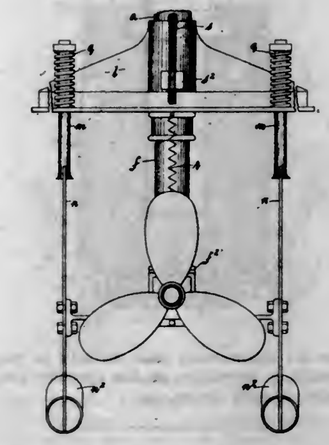
1. In a safety razor blade holder, two strips pivoted to one another at one end of each strip and between the opposite end portions of which strips a safety razor blade is adapted to be clamped, with a sharp edge of the blade projecting beyond the edges of the strips, longitudinally spaced apart cams formed on the outer faces of both strips adjacent the blade, said cams sloping in the direction of the length of the strips and also transversely thereof, and a clamping member comprising a resilient sleeve having in the wall thereof a longitudinal slot of a width to permit the sleeve to straddle both strips and co-act, through longitudinal shifting of the sleeve, with the cams for the purpose of forcing the strips into tight clamping relation with respect to the interposed blade.



1,780,550. COMPOSITE PLUNGER FOR GLASS FEEDERS. WILLIAM T. BARKER, Jr., Hartford, Conn., assignor to Hartford-Empire Company, Hartford, Conn., a Corporation of Connecticut. Filed Mar. 10, 1927. Serial No. 174,194. 20 Claims. (Cl. 49—55.)

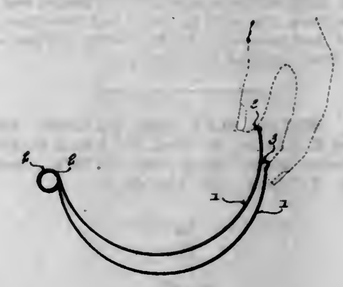
7. In a glass feeder, a composite flow-controlling plunger comprising a tubular outer member and an inner core member adapted for adjustment longitudinally of each other, said core member fitting said tubular member to

permit relative longitudinal movement of said members but to substantially prevent passage of molten glass between said members.



1,780,551. IMPELLER AGITATOR. ARTHUR W. BULL, Naugatuck, Conn., assignor to The Dorr Company, New York, N. Y., a Corporation of Delaware. Filed Mar. 25, 1929. Serial No. 349,732. 8 Claims. (Cl. 259—97.)

1. In an agitator, the combination with a tank having an inlet and an outlet spaced from each other, a relatively large open ended draft tube communicating at its lower end with the lower part of said tank and extending upwardly therefrom, and means for producing a current through said draft tube, of means extending across the inlet end of the tube in the tank and extending to the bottom of the tank and completely across the same for preventing the passage of liquid from the inlet to the outlet across the inlet end of the tube, said means having supporting engagement with the draft tube.

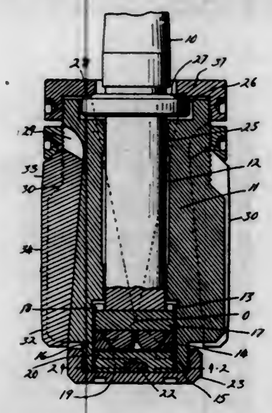


1,780,552. PROPELLER OF MOTOR-DRIVEN CANAL AND OTHER BOATS, RIVER BARGES, AND THE LIKE. THOMAS HERBERT COGGINS and ALBERT FARRINGTON, Aston, Birmingham, England. Filed Apr. 9, 1929, Serial No. 353,855, and in Great Britain Apr. 10, 1928. 5 Claims. (Cl. 115—41.)

1. A motor-driven propeller unit for boats, barges and the like, combining a pillar attachable to the end of a boat or barge, a frame mounted upon said pillar, a sleeve vertically slidable within the pillar and resiliently suspended from the frame, a propeller shaft mounted upon the lower end of the sleeve and fitted with a propeller, a

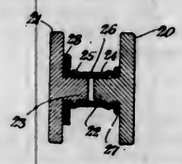
guard fixed to the sleeve and mounting of the propeller shaft, a vertical shaft through the sleeve to drive the propeller shaft, and means for driving the vertical shaft, substantially as described.

1,780,553. GUTTER CONSTRUCTION. PHILLIPP F. FLAGGE, Milwaukee, Wis. Filed Sept. 26, 1928. Serial No. 308,541. 1 Claim. (Cl. 108—28.)



A gutter construction comprising a plurality of sections having channel-like body portions, each of said sections having beads on opposite longitudinal edges, the ends of both beads of one section interlocking with the corresponding beads of the next section, the interlocking beads along one edge of said sections being pivotally joined, whereby one section may be rocked into position after the engagement of the beads along one edge.

1,780,554. FLOATING REAMER. CARL W. FLOSS, Detroit, Mich. Filed Dec. 19, 1927. Serial No. 241,122. 4 Claims. (Cl. 279—16.)

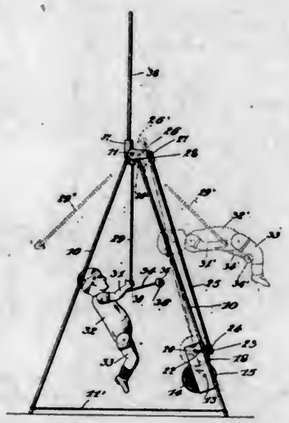


1. A reamer comprising a driving shank, a blade-carrying shell surrounding said shank, a socket member drivingly connected to said outer shell and mounted to permit lateral movement of the same relative to said shell, said

socket member and said shank being provided with co-operating surfaces adapted to form a universal connection

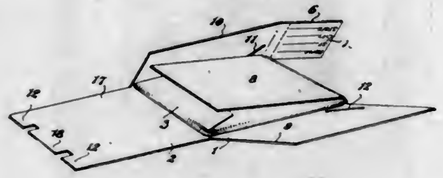
and means for maintaining said surfaces in engagement while permitting swivelling of the opposite end of said shell relative to said shank.

1,780,555. BUTTON. ERIC G. JOHNSON, Brooklyn, N. Y. Filed Mar. 3, 1930. Serial No. 432,651. 3 Claims. (Cl. 24—92.)



1. A button comprising two discs, an inner projection on each disc, an elastic sleeve, a bead at one end thereof, said sleeve adapted to engage with its beaded end one of said projections, and with its other end the other of said projections, and means for firmly holding the parts of the button in their engaged position.

1,780,556. METAL SLAT FOR WINDOW SHADES. WALLACE E. KALLIN, St. Paul, and LYSLE G. BOYNTON, Minneapolis, Minn. Filed Mar. 8, 1929. Serial No. 345,522. 2 Claims. (Cl. 156—31.)

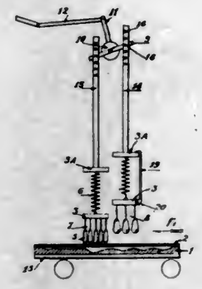


1. In a slat for window shades of the class described normally movable in a vertical plane from a roller mounting, the free edge of said shade adapted to be folded to provide a transverse upwardly directed flap parallel to the main shade; a metal strip member detachably engaging said flap comprising an elongated folded sheet metal strip opening downwardly and adapted to frictionally embrace said flap between its walls, the main shade arranged to be passed upwardly outside of one of its walls, an elongated shell member adapted to be telescoped longitudinally over said strip and the part of the shade exteriorly of said strip to frictionally embrace said strip member and shade part, said shell comprising an elongated folded sheet metal strip opening upwardly and the edges of said shell flanged inwardly.

1,780,557. MECHANICAL TOY. CHIHIRO KATAGIRI, Tokyo, Japan, assignor to Yoshio Katagiri, New York, N. Y. Filed Aug. 15, 1928. Serial No. 299,779. 3 Claims. (Cl. 46—40.)

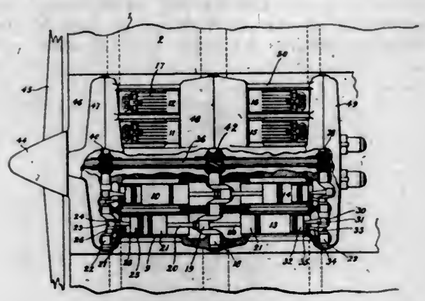
1. In a mechanical toy, in combination, a support, a rock shaft carried by said support, means capable of imparting a rocking movement to said rock shaft, two spaced parallel L-shaped suspending arms fixedly attached to said shaft, a toy figure having pivotal arms each pivotally attached to an extended portion of one of said suspending arms and capable of complete revolution between said suspending arms, and an extended counter weight attached to said toy arms.

1,780,558. HOSIERY PACKAGE. IRA KAVANAU, New York, N. Y. Filed Aug. 21, 1929. Serial No. 387,315. 4 Claims. (Cl. 206—46.)



1. A blank for display purposes having a main body portion, side and end flaps, each of said side flaps having a slit therein, one of said end flaps being substantially of the same area as said body portion so as to entirely cover the back of said display blank when folded and tongues upon said last mentioned end flaps adapted to be inserted in said slits in said side flaps when said blank is in folded condition enclosing an article.

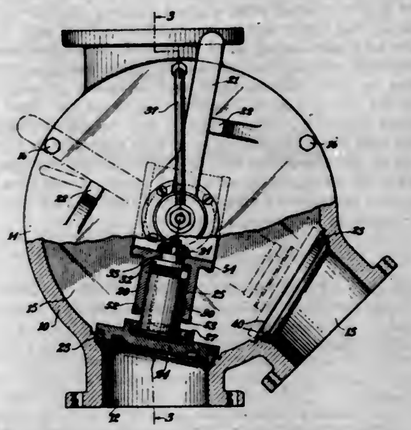
1,780,559. METHOD OF REDUCING THE ZINC-OXIDE CONTENT OF LITHOPONE. AXEL B. LAFTMAN, Bayonne, N. J., assignor, by mesne assignments, to The Grasselli Chemical Company, Cleveland, Ohio, a Corporation of Delaware. Filed Dec. 22, 1926. Serial No. 156,520. 1 Claim. (Cl. 134—78.)



In processes of making lithopone involving the operations of treating an aqueous solution containing zinc sulfate with an aqueous solution containing barium sulfide, to the production of a slurry containing crude lithopone, and thereafter transforming any acetic acid soluble compounds incidentally precipitated with the lithopone slurry into water-soluble zinc compounds by a treatment with a predetermined small amount of an acid, the step which consists in adding to the acidified slurry containing the water-soluble zinc compounds an amount of barium sulfide calculated to react with said water-soluble zinc compounds to the production of an additional amount of crude lithopone.

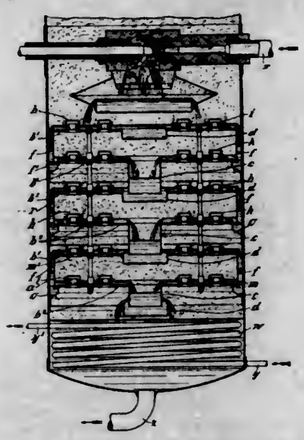
1,780,560. PROCESS AND APPARATUS FOR REPRODUCING BY STAMPING. EDMOND OSCAR LANHOFFER, Poissy, France, assignor to Asbestos Panels Corporation, New York, N. Y., a Corporation. Filed Aug. 2, 1928, Serial No. 297,041, and in France Dec. 24, 1927. 15 Claims. (Cl. 101—32.)

1. A process of reproducing of the type described which comprises placing a sheet of malleable material on a matrix, dropping a series of flexibly suspended weights on said sheet continually and causing relative displacement between said matrix and said sheet of material during dropping of said weights.



1,780,561. AEROPLANE. CONRAD H. MATTHIESSEN, Jr., New York, N. Y. Filed July 9, 1928. Serial No. 291,228. 17 Claims. (Cl. 244—25.)

2. In an aeroplane the combination with a wing and propeller of an aeroplane, of a slide valve engine, said engine being provided with cylinders, a crankshaft and a valve shaft, both of said shafts adapted to develop power, and a harmony drive shaft, geared to the crankshaft and a valve shaft, the propeller being secured to the harmony drive shaft, said engine cylinders extending at right angles to the propeller.



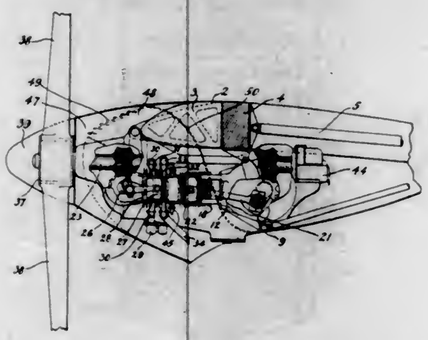
1,780,562. VALVE. HERBERT TOM MELLING, New York, N. Y. Filed June 11, 1927. Serial No. 198,030. 11 Claims. (Cl. 251—102.)

1. In a transport valve for pulverized material, the combination with a valve body which includes a substantially cylindrical wall having an inlet and at least two outlet openings therein, of a valve seat arranged in each opening, a pivotable valve guide in said body and wholly clear of said wall and including a trunnion carrying a radial sleeve, a valve reciprocally mounted in said guide and including a valve stem extending into said sleeve,

means for pivoting said guide to position the valve into operative relationship with a selected opening, and means for reciprocating said valve to raise and lower it with respect to the valve seat in said opening.

1,780,563. APPARATUS FOR SEPARATING LIQUIDS INTO CONSTITUENTS POSSESSING A LOW BOILING POINT AND CONSTITUENTS POSSESSING A HIGH BOILING POINT BY DISTILLATION AND RECTIFICATION. ADOLF MESSER, Frankfort-on-the-Main, Germany. Filed Nov. 9, 1925, Serial No. 67,848, and in Germany Nov. 15, 1924. 1 Claim. (Cl. 202—158.)

An apparatus for separating liquids into constituents possessing a low boiling point and constituents possessing a high boiling point by distillation and rectification, comprising in combination a vertical cylindrical casing, several separate vertical central tubes in said casing and open at both ends, a cup under the lower end of each central tube, a ring-shaped bottom plate fixed on the top end of each cup, a vertical overflow flange on the circumference of said bottom plate and extended in downward direction, a second ring-shaped bottom plate fixed on the top portion of each central tube at a certain distance from the top edge of said tube, a downwardly directed flange on the circumference of said upper bottom plate the lower end

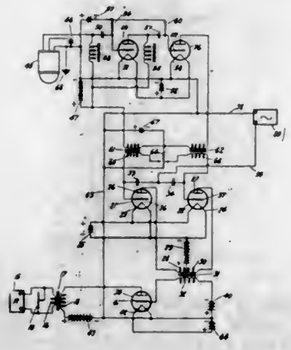


of said flange being bent outward and fixed on the inner surface of said casing and being situated a short distance underneath the edge of the downwardly directed extension of said vertical overflow flange of the lower bottom of the next higher central tube, a great number of vertical tubes open at the upper and lower end inserted in each bottom plate said tubes being all of the same size and arranged in concentric circles and all at the same uniform distance apart in each bottom plate and designed to collect the vapours which ascend from the liquid on the next lower bottom plate, and hoods higher and of greater diameter than said vapour tubes one hood over each vapour tube and fixed at the lower end on the corresponding bottom plate each hood having slots at a short distance above its lower end and designed to make the collected vapours flow into the liquid on said bottom plate.

1,780,564. ELECTRICAL CONDUCTOR. GEORGE C. OXER, New York, N. Y., assignor to American Brass Company, a Corporation of Connecticut. Filed Feb. 20, 1924. Serial No. 693,977. 16 Claims. (Cl. 173—13.)

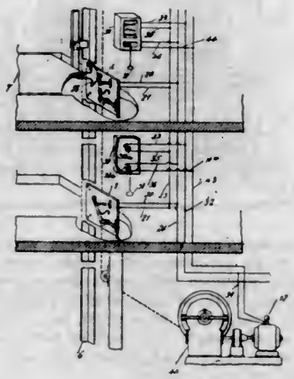
1. An electrical conductor which comprises a substantially cylindrical shell of conducting material supported to withstand collapsing stresses by means of a plurality of separate metal structural members, said members defining spaces extending longitudinally through the shell.

1,780,565. AEROPLANE. ARNOLD G. PARKER, Flushing, N. J., assignor to Conrad H. Matthiessen, jr., New York, N. Y. Filed July 9, 1928. Serial No. 291,174. 11 Claims. (Cl. 244—25.)



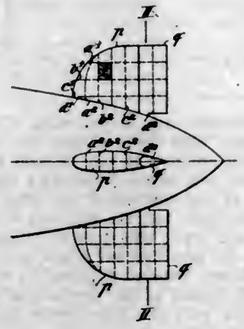
3. In an aeroplane the combination with a wing and propeller of an engine, whose cylinders lie in the line of flight, said engine being provided with a crankshaft, a shaft geared to the crankshaft, said last named shaft extending in the line of flight, the propeller being secured thereto, said cylinders being mounted at right angles to the propeller, cowling enclosing said cylinders and means for supplying cooling air transversely to said cylinders.

1,780,566. PROCESS OF COATING CARTRIDGES. JOHN DOUGLAS PEDERSEN, Springfield, Mass. Filed Jan. 27, 1928. Serial No. 250,090. 4 Claims. (Cl. 91—70.)



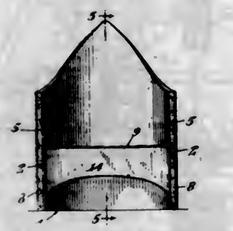
3. The process of affixing a coating film of hard wax such as ceresin to the surface of a metal cartridge case which consists in a substantially continuous travel of said case first through a heating chamber to preheat the same, then through a bath of a hot solution of said wax at approximately the same temperature as said preheated case, whereby said case receives a coating film thereon, and finally through a drying chamber of air to vaporize the solvent from said film under the accelerating effect of the preheated case to produce a hard dry coating film of wax on said case.

1,780,567. METHOD AND APPARATUS FOR RECORDING EXPLOSIVE SHOCKS. FRANK RIEBER, San Francisco, Calif. Filed June 7, 1927. Serial No. 197,212. 10 Claims. (Cl. 234—1.5.)



1. In a system for recording the time of arrival of mechanical vibrations, the process which comprises translating said vibrations into electrical impulses, combining said impulses with other electrical impulses of much higher frequency, and recording the resultant combination.

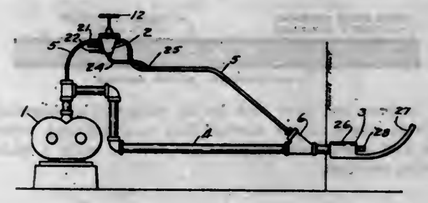
1,780,568. SAFETY DEVICE FOR ELEVATORS. NUNZIO SCARPA, New York, N. Y. Filed June 22, 1927. Serial No. 200,744. 3 Claims. (Cl. 177—336.)



1. In a safety device for elevators, in combination with an elevator used in building construction work and controlled by an operator on the ground, a signal circuit, means in said circuit including switch means on each floor adjacent the elevator for informing the operator of the floor on which the elevator is desired for use, an indicating device at each floor adjacent the elevator for indicating when the elevator is in use, an electric circuit for said indicating devices and connected in parallel across said signal circuit, said devices being connected in multiple relation in said indicating circuit, a switch positioned adjacent each floor level and adjacent the path of the elevator at each floor, each of said switches being connected to said indicating circuit, and operative, when closed, to close said circuit, and means carried by the elevator and operable, when the elevator reaches the floor in accordance with said signal, to close said switch at that floor, thereby to actuate all said indicating devices.

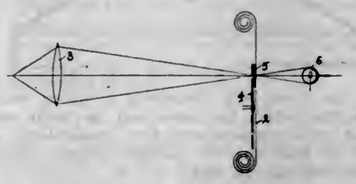
1,780,569. FRAMEWORK STRUCTURE FOR THE STEERING GEAR OF AIRSHIPS. JOHANN SCHUETTE, Lichterfelde-Ost, near Berlin, Germany. Filed Nov. 2, 1929, Serial No. 404,319, and in Germany Nov. 8, 1928. 4 Claims. (Cl. 244—3.)

4. A controlling means for airships, consisting of a partitioned surface for the outside of the airship and having a cover comprising the outer skin of the surface thereby forming individual compartments with the partitions, said compartments preventing the tearing or injury of the skin from spreading beyond the partition of the compartment, in the cover of which the tear has occurred.



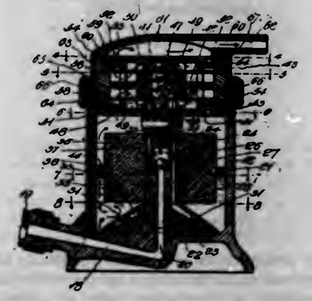
1,780,570. ARTICLE OF FURNITURE. NOBLE E. STEPHENS, Woodside, N. Y., assignor to The Staminart Corporation, New York, N. Y., a Corporation of New York. Filed Apr. 12, 1928. Serial No. 269,318. 2 Claims. (Cl. 155—193.)

2. An article of furniture comprising inner and outer sheets of plywood, each formed to predetermined contours and disposed in spaced relation, and a cork-like material disposed between the exposed edge portions of said sheets, to integrate the same, the space between the body portions of said sheets being free from braces and filling material.



1,780,571. HYDROOIL BURNER. WILBUR TEALE and HERBERT F. MCLAUTHLIN, Seattle, Wash., assignors to Hydro-Oil Fire Corporation, Tacoma, Wash., a Corporation of Washington. Filed Jan. 19, 1926. Serial No. 82,191. 2 Claims. (Cl. 158—76.)

1. In an oil burning apparatus, a furnace, an air main leading to said furnace, a by-pass air pipe leading from said main and reentering said main ahead of the furnace, a triple valve in said by-pass pipe, an oil supply pipe and a water supply pipe leading into said by-pass pipe through

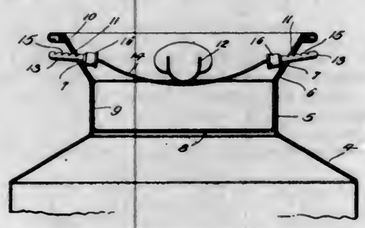


said valve whereby said valve controls the supply of oil and water to the air, and a mixing baffle in said main where the by-pass pipe reenters said main.

1,780,572. OPTICAL DEVICE FOR RADIO CINEMATOGRAPHIC TRANSMITTERS AND RECEIVERS. LÉON THURM, Paris, France. Filed July 14, 1928, Serial No. 292,811, and in France July 21, 1927. 4 Claims. (Cl. 178—6.)

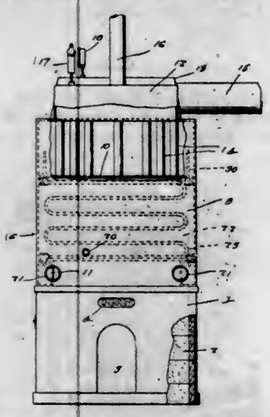
1. A device of the character described comprising a film, a rotatable shutter having series of openings formed therein, said openings displaced in position with rotation of the shutter, a screen disposed between the shutter and the film and carrying a rectangular aperture of a length equal to the double of the corresponding dimension of the aperture in the shutter.

1,780,573. LATHER-FORMING DEVICE. ROBERT H. WAGER, Jersey City, N. J. Filed Mar. 10, 1927, Serial No. 174,320. Renewed Dec. 12, 1929. 21 Claims. (Cl. 299—83.)



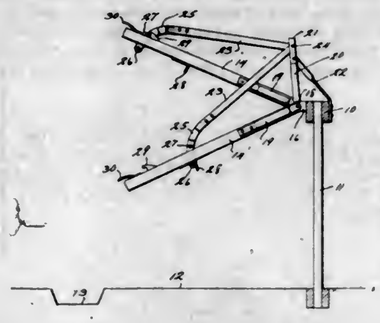
3. In a lather forming device, a container for a saponaceous liquid, said container having an open upper end, means for injecting a gas under pressure into the liquid containing portion of said container to agitate the saponaceous liquid and form soap bubbles, a bubble-converting unit fitting into the open upper end of said container and disposed above the normal liquid level, a lather-discharge cap over said unit and connected with the container, and a post in the container supporting the aforesaid unit, a portion of said post being disposed in the liquid containing portion of the container to hold a soap cake therein.

1,780,574. BOOT AND SHOE SOCK. LEWIS SILVANUS WILLIAMS, Romsey, England. Filed May 29, 1929, Serial No. 364,693, and in Great Britain Mar. 11, 1929. 3 Claims. (Cl. 36—43.)



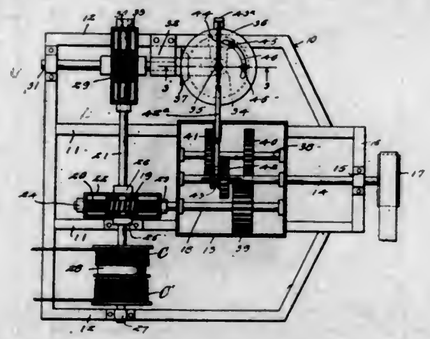
2. A boot and shoe sock lining composed of board-like material whose upper surface has a permanent rubbed gloss and whose under surface is treated with a waterproofing medium.

1,780,575. CAN-TOP LOCK. CLIFFORD E. ANDERSON, Brainerd, Minn. Filed July 1, 1929. Serial No. 375,306. 5 Claims. (Cl. 220—55.)



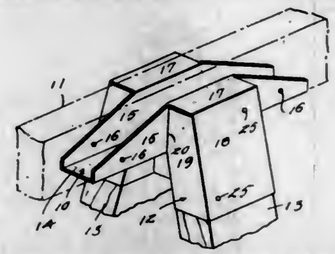
1. A can cover lock comprising a spring metal ring for reception within the cover, and two bolts connected with and projecting outwardly from diametrically opposed portions of said ring for passage through openings in the cover and the can neck.

1,780,576. HEATING BOILER. BARTON H. BRINEY, Indiana Harbor, Ind. Filed Apr. 7, 1927. Serial No. 181,768. 2 Claims. (Cl. 122—169.)



1. In a structure of the class described, a boiler embodying spaced walls forming a water containing and circulating jacket, a circulating tube of coiled formation supported in said boiler, a fitting on the intake end of the tube communicating with the water jacket, a discharge nozzle on the discharge end of the tube also communicating with said water jacket, removable angle irons bolted to the boiler and holding said fitting and nozzle respectively, whereby to permit bodily removal of the tube, said fitting comprising a hollow cast body, having a tube connection and a flattened end cooperable with the complemental flange of the adjacent angle iron, said discharge nozzle having a bevelled extremity and also having a flattened head portion cooperable with the complemental flange of the adjacent retaining iron.

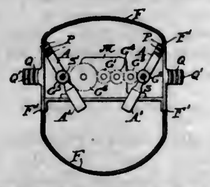
1,780,577. VERTICALLY-ADJUSTABLE PARTITION BAR FOR STABLES. EARL CARMAN, Walton, N. Y. Filed Sept. 19, 1929. Serial No. 393,746. 4 Claims. (Cl. 119—15.)



1. In combination with a cow stall, a partition bar pivotally engaged with the cow stall for vertical movement, and means whereby it may be held in a raised or lowered position, said means including a latch bar pivotally supported at one end and at its other end slidingly engaging the partition bar, the free end of the latch bar having upper and lower transversely extending members between which the partition bar slides, and the partition bar having a detent disposed adjacent its free end and a detent disposed inward of the first-named detent respectively engageable with the transversely extending members of the latch bar.

1,780,578. CONTROL MECHANISM FOR GRAIN-CAR-UNLOADING APPARATUS. ARLEY B. CHRISTY, Liberal, Kans., assignor of one-third to The Light Grain & Milling Company, a Copartnership consisting of C. M. Light, Mrs. C. M. Light, I. R. Salley, and Paul W. Light, Liberal, Kans., and one-third to Wilfred E. Bush, Liberal, Kans. Filed Mar. 23, 1929. Serial No. 349,466. 1 Claim. (Cl. 74—50.)

An automatic operating and control device for an unloading mechanism of the character described, comprising a drum shaft for operating an unloading device, means connected to the drum shaft and controllable for turning the shaft in opposite directions and including a pivoted control lever, a rotary gear having an arcuate slot therein, a pair of pins adjustably secured in the slot, a driving connection between said gear and said shaft, said lever having one end disposed in the path of said pins, a bracket disposed upon the opposite side of said gear from the lever, and a compression spring interposed between the first mentioned end of the lever and said bracket.

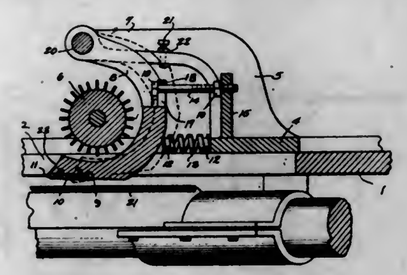


1,780,579. TRUSS BRACE. LILLIAN F. CROWLEY, Vincennes, Ind. Filed Apr. 21, 1928. Serial No. 271,875. 3 Claims. (Cl. 304—5.)

1. A truss brace comprising a trough, sockets secured to the sides of the trough and extending below the trough, flanges secured to the socket below the trough and at the vertical center of the trough and sockets, and means connecting the flanges together.

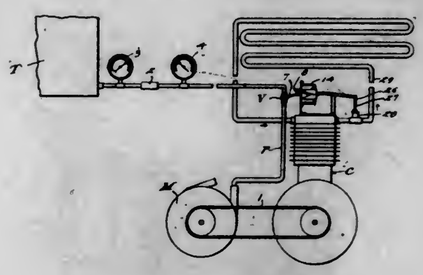
3. A truss brace comprising sockets each embodying an outer wall, side walls and a top wall, the top walls being connected at their outer edges to the upper edges of the outer walls, and the side walls having the upper portions of their inner edges arranged vertically and the lower portions of said edges inclined downwardly and outwardly, a trough arranged between said vertical edge portions and having the upper edges of its sides connected to the inner edges of the top walls, upper flanges secured to said vertical edge portions and to the sides of the trough, lower flanges secured to said inclined edge portions, and flanges secured to said lower flanges and arranged in overlapping relation and secured together, said last flanges being arranged at the vertical center of the trough and sockets.

1,780,580. IMPELLING DEVICE. JOHN H. DAVIS, New York, N. Y., assignor to Air Line Transportation Company, Philadelphia, Pa., a Corporation of Deleware. Filed June 21, 1928, Serial No. 287,126. Renewed Mar. 21, 1930. 14 Claims. (Cl. 244—16.)



1. An impelling device, comprising a piston adapted to travel in an orbital path, and a cylinder in the path of said piston conforming in area therewith and adapted to check the air flow around the piston when passing therethrough causing a maximum resistance.

1,780,581. PENCIL HAVING A SHARPENING DEVICE FOR THE LEAD. ALFRED DILLIER, Aesch/Basel, Switzerland. Filed Mar. 28, 1929, Serial No. 350,653, and in Germany Apr. 21, 1928. 10 Claims. (Cl. 120—15.)

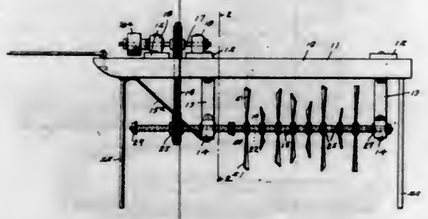


7. In a pencil of the type described in combination, a casing having a conical front part, sharpening means arranged in the front part, lead supporting means in the casing, coupling means between the front part and casing capable of being slid longitudinally and universally tilted to bring said sharpening means into sharpening engagement with the lead, and means to limit the longitudinal movement of said front part and coupling means.

1,780,582. FEED-ROLL MECHANISM FOR VENEER AND SHINGLE MACHINES. JAMES E. ECKERSLEY, Aberdeen, Wash., assignor of one-half to Alexander Polson, Hoquiam, Wash. Filed Aug. 20, 1929. Serial No. 387,162. 7 Claims. (Cl. 144—180.)

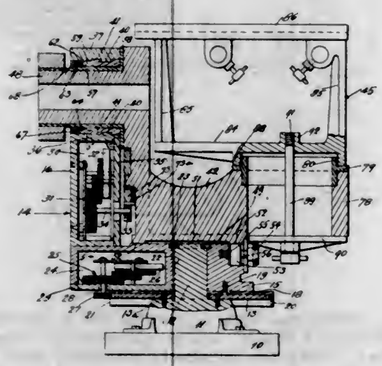
1. In a machine of the kind described, a bed plate having an opening therethrough to receive a block to be operated upon, means for feeding the block through said opening, to a cutter, spait bars pivotally mounted above and in front of the vertical plane of the longitudinal axis of the block feeding means.

1,780,583. AUTOMATIC PRESSURE-CONTROLLING APPARATUS. ERWIN KENT EVANS, Holland Patent, N. Y. Filed Sept. 8, 1928. Serial No. 304,664. 4 Claims. (Cl. 230—13.)



1. In combination with a pipe line and a controlling valve interposed therein, a yoke supported for swinging movement, means for operatively connecting said yoke with the valve to move the valve into open position when the yoke moves in one direction and to move the valve into closed position when said yoke moves in the opposite direction, an arm supported intermediate its ends for swinging movement, an expansible spring interposed between an end portion of said arm and the swinging yoke, and means for imparting swinging movement to the arm.

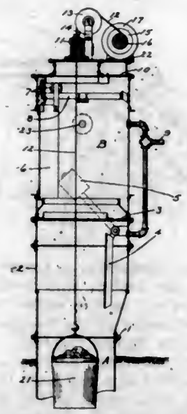
1,780,584. WATER MOTOR. FRED FACHNIE, Withrow, Wash. Filed Feb. 7, 1929. Serial No. 338,219. 1 Claim. (Cl. 170—133.)



A water motor of the character described comprising in combination, a pair of pontoons, a pair of bearings dependingly secured to said pontoons and adapted to be positioned in a stream of running water, a shaft loosely mounted in said bearings, a sleeve positioned about said shaft and engaging said bearings, said sleeve comprising

a plurality of intermediate sections, a plurality of propeller blades loose mounted on said shaft and positioned between said intermediate sleeve sections, said shaft having threaded opposite end portions, a nut threadably positioned on each end of said shaft and adapted to force said sleeve sections inwardly whereby to cause said sleeve sections to rotate coactively with the rotation of said blades, a sprocket member mounted on one of said sleeve

sections, a driven member mounted on said pontoons and connected to said sprocket, flexible means connected to said sprocket on said sleeve and said driven member whereby to rotate said driven member cooperatively with the rotation of said sprocket, and guard means dependingly secured to the bottom of said pontoons adjacent each end and in spaced relation to each other whereby to hold said blades out of engagement with the bottom of the stream.

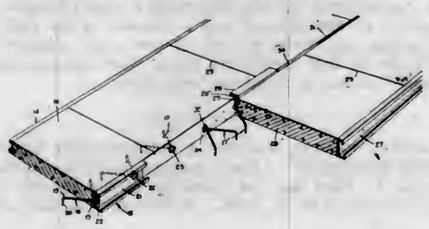


1,780,585. CAMERA MOUNTING. ARMIN FRIED, Los Angeles, Calif., assignor to William Fox Vaudeville Company, Los Angeles, Calif., a Corporation of New York. Filed Nov. 9, 1926. Serial No. 147,326. 2 Claims. (Cl. 248—47.)

2. In combination, a head mounted for rotation about a vertical axis, means for steadying such movement of the head, an adapter mounted in the head for rotation about a horizontal axis and adapted to support a camera, means in the head and operatively connected to the adapter to steady the movement of the adapter about said horizontal axis, and adjustable friction means between the adapter and head adapted to be operated to impose a variable resistance to the rotary movement of the adapter about said horizontal axis.

1,780,586. CAISSON HEAD. FREDERIC B. GOLDSBOROUGH, Croton-on-Hudson, N. Y. Filed Nov. 13, 1925. Serial No. 68,817. 7 Claims. (Cl. 61—83.)

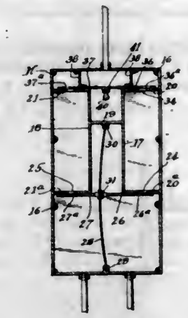
1. In a hoisting and air-lock apparatus for caissons, the combination with a caisson of an air-lock head joined thereto, a door controlling communication between said caisson and said head, a hoisting means mounted on



said head, a cable operable by said hoisting means passing through said head and into said caisson and a carrier suspended from said cable.

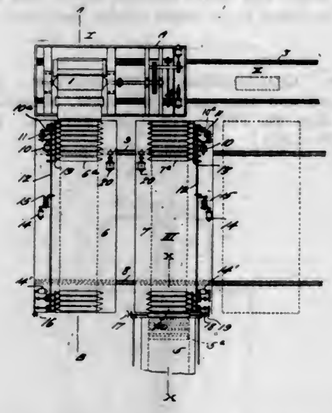
1,780,587. PLANTER ATTACHMENT. AUGUST W. GUSTAFSON, Hutto, Tex. Filed June 26, 1929. Serial No. 373,771. 3 Claims. (Cl. 97—56.)

1. An apparatus of the class described comprising a frame, wheels journaled on the frame, flaps secured to the periphery of the wheel, arms on the frame against which the flaps strike as they move downwardly and forwardly, said frame comprising an axle and a pair of radius rods secured thereto.



1,780,588. CONCRETE ROAD CONSTRUCTION. JOHN N. HELTZEL, Warren, Ohio. Filed Mar. 3, 1927. Serial No. 172,455. 13 Claims. (Cl. 94—13.)

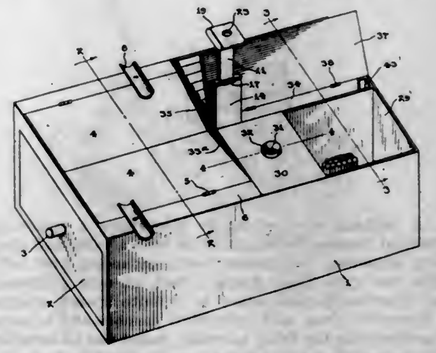
1. Concrete slabs disposed edge to edge and anchor members embedded in said slabs and interengaging one another to tie the slabs together.



1,780,589. WATER-REGULATING DEVICE. WILLIAM R. HENDRIX, Pacific Palisades, Calif., assignor of one-half to Howard A. Hyde, Santa Monica, Calif. Filed Mar. 21, 1927. Serial No. 177,075. 3 Claims. (Cl. 277—46.)

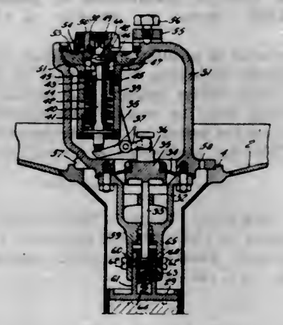
2. A water regulating device comprising a container having an open side, a cover closing said open side, partitions within the container dividing the latter into chambers and provided with ports, a diaphragm mounted in the container, and slide valves operatively connected to the

diaphragm and having ports adapted to register with the first ports to control the passage of water through the first ports in accordance with the position of the diaphragm.



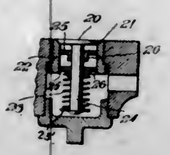
1,780,590. PROCESS AND APPARATUS FOR THE MANUFACTURE OF GLASS. CHARLES HEUZE, Auvelais, Belgium, assignor, by mesne assignments, to The American Bicheroux Company, a Corporation of Delaware. Filed June 19, 1928, Serial No. 286,684, and in Belgium Mar. 3, 1928. 9 Claims. (Cl. 49—3.)

1. The hereinbefore described process for the manufacture and annealing of glass sheets, comprising a forming step accomplished at high speed, an annealing step during which the sheet moves at a reduced speed, and an intermediate step during which the sheet is given an alternate fore and aft movement.



5. In an apparatus for the intermittent manufacture of glass sheets, the combination of a sheet forming machine, means to move the same transversely of its line of feed into two forming positions, a lehr provided with means for feeding the sheets therethrough at a speed less than the speed of sheet formation, a plurality of carriages, means for moving each carriage from one of the sheet forming positions into alignment with the lehr, a roller bed carried by each carriage, and means for driving the rollers of the said beds at speed of sheet formation and at the speed of lehr feed.

1,780,591. ASH-TRAY STRUCTURE. BUNPACHI IIZUKA, San Mateo, Calif. Original application filed Jan. 7, 1928, Serial No. 245,155. Divided and this application filed Dec. 6, 1929. Serial No. 412,154. 3 Claims. (Cl. 131—51.)



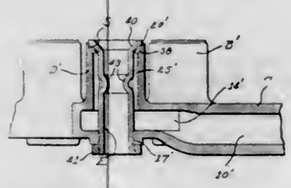
1. A device of the class described, including a casing provided with an ash tray composed of swinging sections hinged at their outer side edges, a vertically movable operating member normally arranged in an elevated position, and means carried by the said member for supporting the ash tray sections in closed position, said member when moved downwardly permitting the ash tray sections to open and discharge the contents of the ash tray.

1,780,592. SINK MINE. KARL OSKAR REINHOLD JOHANSSON, Appelviken, Sweden, assignor to Aktiebolaget Lindholmen-Motala, Motala Verkstad, Sweden, a Joint-Stock Company. Filed Mar. 29, 1928, Serial No. 265,674, and in Sweden Apr. 5, 1927. 11 Claims. (Cl. 102—3.)

1. A sink mine or depth bomb with hydrostatic control of the explosion depth and provided with a depth regulator, a detonating plunger and a pistol, characterized by the fact that the detonating plunger is locked to the depth regulator, prior to the mine being dropped or launched, in such a manner that the detonating plunger will thus be separated from the detonator, and in such a manner that the locking will be released at a certain depth on account of the water pressure, so that the detonating plunger will not only be brought into connection with the detonator, but will also release the latter so that it will cause explosion of the mine.

1,780,593. REFRIGERATING VALVE AND METHOD OF CONSTRUCTING THE SAME. ABRAHAM J. KUSEL, Baltimore, Md., assignor to Kulair Corporation, a Corporation of Delaware. Original application filed June 28, 1924, Serial No. 722,985. Divided and this application filed Apr. 26, 1926. Serial No. 104,855. 2 Claims. (Cl. 251—144.)

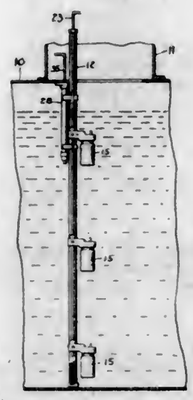
1. A unitary valve structure comprising a removable cylindrical member forming a valve seat, a valve and stem, spaced guideways for concentrically mounting said valve within the cylindrical member, both of said guideways being frictionally maintained in definite spaced relation but removable from said cylindrical member and a spring for maintaining the valve normally closed and in asembled operative position with respect to said cylindrical member.



1,780,594. ACID TREATMENT OF METAL ARTICLES. RALPH E. LAWRENCE, Wickliffe, Ohio, assignor to The Grasselli Chemical Company, Cleveland, Ohio, a Corporation of Delaware. Filed Oct. 9, 1929. Serial No. 398,505. 4 Claims. (Cl. 148—8.)

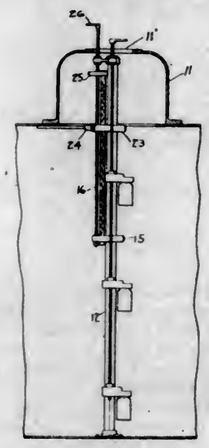
1. In a process of pickling and cleaning metal articles which comprises subjecting said articles to an acid bath containing as the active pickling and cleaning ingredient a non-oxidizing acid, the step of inhibiting the action of said acid upon the metal by the incorporation into said acid of an inhibitor of the class of substances comprising thio-glycollic acid and its derivatives containing the radical $COOH—CH_2—S$.

1,780,595. INHIBITOR. RALPH E. LAWRENCE, Wickliffe, Ohio, assignor to The Grasselli Chemical Company, Cleveland, Ohio, a Corporation of Delaware. Filed Oct. 9, 1929. Serial No. 398,570. 4 Claims. (Cl. 148—8.)



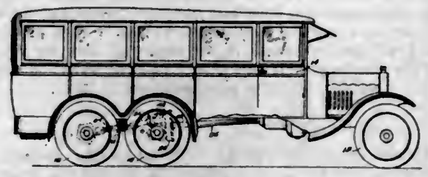
1. In a process of pickling and cleaning metal articles which comprises subjecting said articles to an acid bath containing as the active pickling and cleaning ingredient a non-oxidizing acid, the step of inhibiting the action of said acid upon the metal by the incorporation into the acid of an inhibitor comprising a mustard oil.

1,780,596. BURNER. JOHN L. MANDEVILLE, Arlington, N. J., assignor to The J. B. Colt Company, a Corporation of New Jersey. Filed Oct. 23, 1925. Serial No. 64,418. 12 Claims. (Cl. 158—16.)



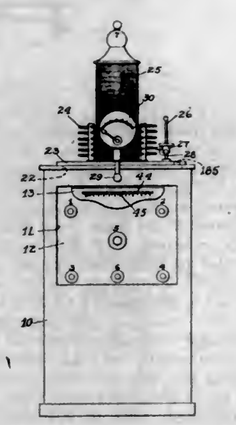
1. A burner comprising coaxial cylindrical members spaced apart to provide a gas passage therebetween and having opposed tapered seats adjacent the outlet end of said passage, one of said seats having an annular groove coaxial with said cylindrical members; and a separately formed spacer clamped between said seats having spaced recessed portions cooperating with said seats to provide outlet orifices for said passage.

1,780,597. LIQUID-TESTING DEVICE. JOHN M. MAYHALL and HOWARD C. MORRISON, Milwaukee, Wis. Filed Oct. 4, 1926. Serial No. 139,373. 7 Claims. (Cl. 137—18.)



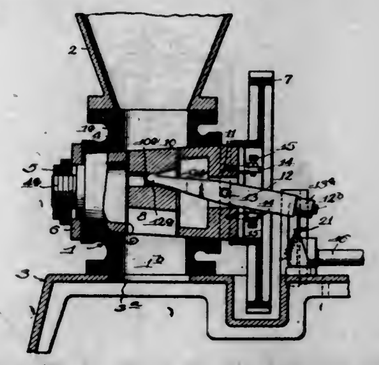
5. A device for testing liquid in tank cars and the like, comprising a staff supporting a plurality of spaced receptacles for taking samples of the bulk of liquid at different levels, and means movable on the staff for determining the ullage in the same testing operation.

1,780,598. LIQUID-MEASURING DEVICE. JOHN M. MAYHALL and HOWARD C. MORRISON, Milwaukee, Wis. Filed Apr. 29, 1927. Serial No. 187,518. 7 Claims. (Cl. 73—120.)



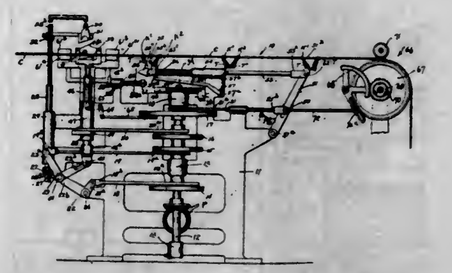
7. A measuring instrument for tank cars, comprising a staff for insertion through the dome of the tank, a domage and ullage indicating device slidable thereon, the said device comprising a tube and a scale associated therewith, means for positioning the tube with the scale at its zero line after insertion in the tank, and a valve for controlling the flow of liquid into the tube.

1,780,599. MOTOR VEHICLE. JOSEPH N. PARKER, Bedford, Va. Filed Mar. 5, 1926. Serial No. 92,466. 17 Claims. (Cl. 180—22.)



1. A motor vehicle comprising a frame, a pair of normally parallel axle housing, a pair of axles in each of said housings, traction wheels secured to the ends of said axles, means for driving said axles, means for transmitting the driving force of said wheels to said frame including a member for positively spacing said axle housings at their centers, a spring arranged adjacent each side of said frame, and connections between the ends of said spring and said housings and between the centers of said springs and said frame, two of the connections of each spring including shackles, the other connection of each spring including pivot means fixed against movement longitudinally with respect to the vehicle, said springs being operative to normally maintain said housings in parallel relationship.

1,780,600. ELECTROTHERAPEUTIC MACHINE. HERMAN P. PULLWITT, Oak Park, Ill., assignor to McIntosh Electrical Corporation, Chicago, Ill., a Corporation of Delaware. Filed Sept. 26, 1928. Serial No. 308,424. 20 Claims. (Cl. 174—177.)

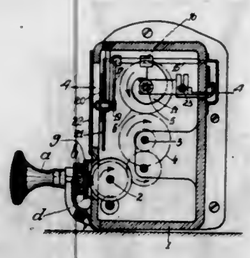


1. In an electro-therapeutic machine for producing high frequency electric currents, the combination of a source of high potential alternating current, a spark gap connected across the terminals of said source, a condenser connected with said terminals, and an inductance connected with said terminals to form with said spark gap and said condenser an oscillatory circuit, said inductance comprising a rotary core of insulating material, bearings supporting said core for rotation, a bare winding helically wound on said core with its turns separated from each other, a guide bar supported substantially parallel with said core, a slider on said guide bar, and an electric contact member carried by said slider and engaging said winding, said slider having lateral engagement with said winding moving said slider longitudinally of said guide bar by rotation of said core.

1,780,601. MEASURING DEVICE. WILLET B. RANNEY, Chicago, Ill., assignor to Wm. Wrigley Jr. Company, Chicago, Ill., a Corporation of Delaware. Filed Dec. 15, 1928. Serial No. 326,279. 2 Claims. (Cl. 221—102.)

1. A measuring device comprising a casing having intake and discharge passages for the material to be measured, a rotative body member mounted in said casing and having a cylinder open at both ends and extending diametrically thereof in the plane of said intake and discharge passages, a piston in said cylinder, a gear wheel fixed to said body member, a drive shaft, a pinion mounted on said drive shaft and meshing with said gear wheel, a lever extending axially of said body member and pivotally mounted intermediate its ends at one end thereof, one end of said lever being pivotally connected with said piston, a cam mounted on said drive shaft, and a lever actuated by said cam and adapted to engage the outer end of said first mentioned lever to impart a reciprocating motion to said piston as the opposite ends of said cylinder are brought into register with said intake and discharge passages.

1,780,602. TASSEL-MAKING ART. SAMUEL J. ROSENTHAL, Brooklyn, N. Y. Filed Nov. 12, 1928. Serial No. 318,684. 19 Claims. (Cl. 28—2.)

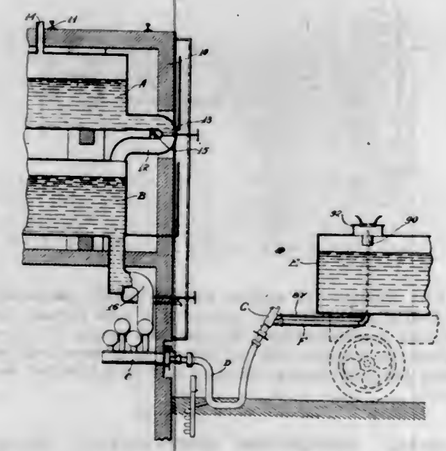


1. A machine for making knotted tassels comprising a feeding mechanism for advancing a cord through the machine a predetermined distance, and means for tying bunches of threads with the cord to form tassels spaced along the cord corresponding to said predetermined distance.

1,780,603. DEVICE FOR MECHANICALLY DETERMINING AND INDICATING THE DEGREE OF USAGE OF A MECHANISM. DESIDERIUS SCHATZ, Zittau, Germany. Filed Nov. 16, 1928, Serial No. 319,882, and in Germany May 28, 1925. 7 Claims. (Cl. 234—1.)

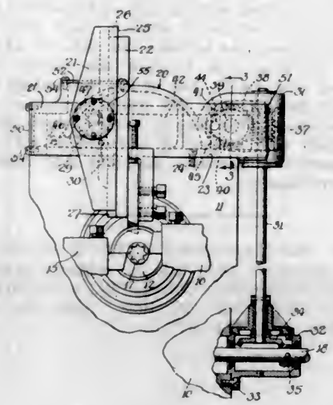
1. Device for indicating the output of machines wherein similar operations are repeated, comprising a device for

counting the actual operations and means for indicating the difference between the number of theoretically ob-



tainable operations and the number of operations actually produced in a predetermined period of time, said means being adapted to be driven by the counting device.

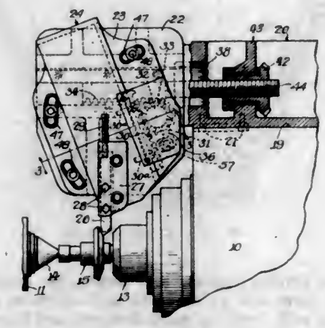
1,780,604. VULCANIZATION OF RUBBER. WINFIELD SCOTT, Nitro, W. Va., assignor to The Rubber Service Laboratories Company, Akron, Ohio, a Corporation of Ohio. Filed Nov. 28, 1927. Serial No. 236,373. 4 Claims. (Cl. 18—53.)



1. The process of manufacturing a vulcanized rubber product which comprises heating a mixture of rubber and sulphur in the presence of an accelerator comprising phenyl-p-piperidyl-phenyl guanidine.

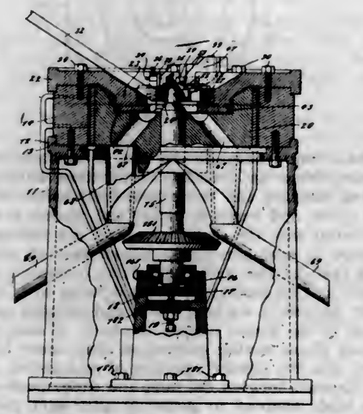
1,780,605. AUTOMATIC TANK LOADER FOR FUEL TRUCKS. CARL E. SPINNEY, West Lafayette, Ind. Filed Oct. 1, 1927. Serial No. 223,313. 8 Claims. (Cl. 137—21.)

1. In combination, a fuel receiving tank having a discharge nozzle, a fuel discharge tube arranged for connection with the discharge nozzle of the receiving tank, a valve in said discharge nozzle, a valve associated with said discharge tube at that end connected with the discharge nozzle, means for interconnecting said valves, a spring associated with each valve for urging the valves into closed position, manually operable means for opening the valves, a dog for holding the valves in open position, and float operated means in the receiving tank for releasing the dog to permit the valves to close when the level of fuel therein reaches a predetermined height.



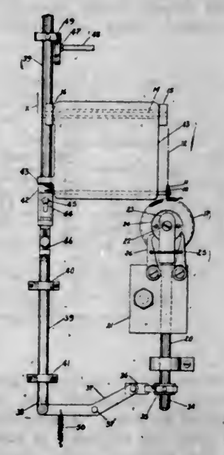
1,780,606. TOOL SUPPORT FOR LATHES. ERNEST J. SVENSON, Rockford, Ill., assignor to Sundstrand Machine Tool Co., Rockford, Ill., a Corporation of Illinois. Filed Mar. 28, 1929. Serial No. 350,476. 6 Claims. (Cl. 82—24.)

1. An auxiliary tool attachment for lathes comprising, in combination, a base adapted to be secured on the top of a lathe headstock and arranged to project over a work piece supported by the headstock spindle of the lathe, a tool slide mounted on said base for movement substantially radially toward and away from such a work piece, and means for actuating said slide comprising a shaft rotatably mounted in said base parallel to said spindle and having one end operatively geared to said slide to move the same when the shaft is rotated, a pinion on the other end of said shaft, a rack engaging said pinion mounted in said base for sliding movement transversely of said shaft, a substantially vertical drive shaft extending downwardly along the rear side of the headstock adapted for connection at its lower end with the lathe feed mechanism and carrying a worm at its upper end, a worm wheel meshing with said worm, and an arm rotating with said worm having at its outer end a pin and slot connection with said rack.



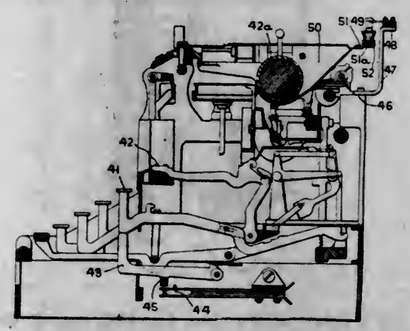
1,780,607. TOOL SUPPORT FOR LATHES. ERNEST J. SVENSON, Rockford, Ill., assignor to Sundstrand Machine Tool Co., Rockford, Ill., a Corporation of Illinois. Filed Mar. 28, 1929. Serial No. 350,477. 5 Claims. (Cl. 82—24.)

1. In a lathe having a bed with a headstock thereon, a work suporting spindle rotatably mounted in said headstock, and a reversible feed shaft mounted in and projecting transversely out of said bed, the combination of a tool carrying attachment comprising a base removably secured on the top of said headstock and extending over the work supporting end of the spindle, a tool slide reciprocably supported on the projecting portion of said base for movement radially of the work, means mounted in said base for moving said tool slide including a transverse shaft projecting rearwardly from said base beyond



the rear side of the headstock, a pair of sprockets, one on each shaft positioned immediately adjacent to the side of the headstock, and an endless chain extending along the side of the headstock and connecting the two sprockets.

1,780,608. THREAD-ROLLING MACHINE. SWAN AUGUST SWANSON, New York, N. Y. Filed Aug. 29, 1928. Serial No. 302,725. 5 Claims. (Cl. 80—7.)

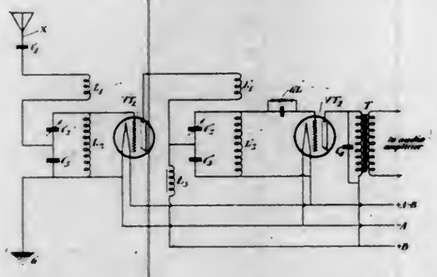


1. In a thread rolling machine, a rotatable shaft, a stationary bearing member provided with an inner cylindrical bearing surface, a rotatable bearing member secured to said shaft and provided with a cylindrical bearing surface adapted to engage the bearing surface of said stationary bearing member, a rotatable die secured to said shaft, a complementary stationary die having its working face located adjacent to said rotatable die, said rotatable bearing member being provided on its upper surface beneath the space between said dies with inclined grooves for the reception of screws from the machine, and openings communicating with the lowest portions of said grooves and extending through said rotatable bearing member for conducting the finished screws from the dies.

1,780,609. MACHINE FOR MAKING SPACED COILED FILAMENTS. STEN WADSTEN, Bloomfield, N. J., assignor to Westinghouse Lamp Company, a Corporation of Pennsylvania. Filed July 26, 1928. Serial No. 295,536. 5 Claims. (Cl. 140—64.)

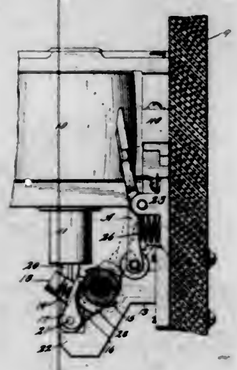
1. A coil winding machine comprising means for moving a wire, mandrelless coil winding means and means for intermittently terminating the coiling operation to produce uncoiled portions of wire connecting coiled portions.

1,780,610. TYPEWRITER PUNCH WITH COLUMN CUT-OUT. HERMANN ADALBERT WEINLICH, Berlin, Germany, assignor to The Tabulating Machine Company, Endicott, N. Y., a Corporation of New Jersey. Filed July 1, 1927, Serial No. 202,809, and in Germany Nov. 11, 1926. 4 Claims. (Cl. 164—113.)



1. In combination, a typewriter with a movable carriage for selecting different printing positions, an electrically operated punch with selector circuits therefor controlled by the typewriter and a circuit controller common to said circuits having a stationary contact member and a conductor member movable with said carriage.

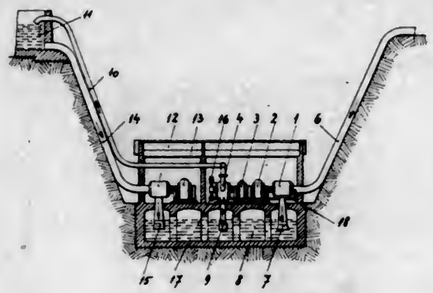
1,780,611. ELECTRICAL AMPLIFIER CIRCUITS. SIDNEY Y. WHITE, New York, N. Y., assignor, by mesne assignments, to Radio Corporation of America, New York, N. Y., a Corporation of Delaware. Filed Aug. 11, 1925. Serial No. 49,521. 13 Claims. (Cl. 179—171.)



2. An electrical amplifying system including a three electrode vacuum tube, an adjustable period circuit con-

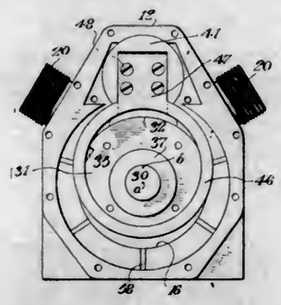
nected to the input electrodes of said tube, an output circuit, a responsive device, and means for controlling the reaction of said output circuit and abstraction of energy therefrom for said responsive device over a wide range of frequencies that a predetermined effect in said responsive device with frequency is obtained, including a circuit coupled to said output circuit adapted to be adjusted in period in consonance with said adjustable period input

circuit, and across which second adjustable circuit said responsive device is connected, said coupling including a pair of coupling elements transferring energy in phase, one of which couplings increases in effect with frequency increase and the other of which couplings decreases in effect with frequency increase, the relative values of said couplings being chosen to give the said predetermined effect over a wide range of frequencies.



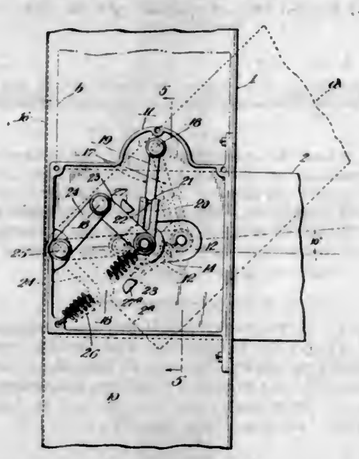
1,780,612. MOTOR-CONTROLLING DEVICE. CARL J. ANDERSON, Chicago, Ill. Filed June 29, 1928. Serial No. 289,232. 2 Claims. (Cl. 200—105.)

1. In a device of the class described, contact closers, springs serving to move said contact closers to contact closing positions, a shaft provided with electrical connections for advancing it step by step, and cams on said shaft and serving to open said contact closers by depressing the springs thereof, said cams having their surfaces so constructed that the tension of said springs operates thru the cams and the shaft to prevent the parts over-running at the termination of each step of the step by step movement.



1,780,613. REGULATING DEVICE FOR LIQUID COUPLINGS. GUSTAV BAUER and CARL SCHMIESKE, Hamburg, Germany. Filed Nov. 5, 1926. Serial No. 146,551. 3 Claims. (Cl. 60—54.)

1. A regulating device for liquid couplings, especially for driving storing pumps of hydro-electric power plants, comprising, in combination with the main driving engine of the plant, the liquid coupling and inlet and outlet slide valves thereof: a governor dependent upon the load on

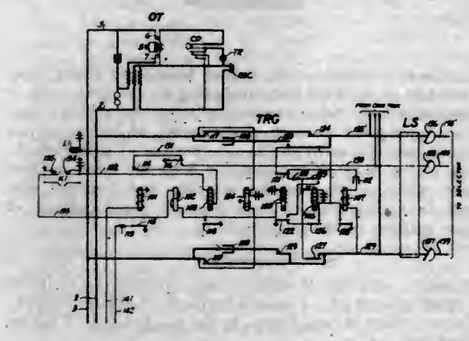


said main driving engine, and means for transmitting movement from said governor to said valves so as to fill and empty said coupling upon decrease and increase, respectively, of the load of said engine.

1,780,614. PUMP. CALVIN M. BOLSTER, Lakehurst, N. J. Filed Dec, 23, 1927. Serial No. 242,079. 14 Claims. (Cl. 103—123.)

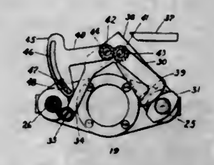
1. In a rotary pump or the like, in combination, a casing comprising an intermediate portion having a cylindrical chamber and circumferentially spaced inlet and outlet ports, and heads at either end having shaft bearings coaxial with the chamber, a rotor comprising a shaft journaled in said bearings, a piston fast on said shaft within said chamber having a portion concentric with the chamber and an eccentric portion defining with the walls of said chamber a working space, and cidcular end plates secured to the piston closing the ends of said chamber, said end plates having grooves on their inner faces concentric with the eccentric portion of said piston, an abutment disposed between the inlet and outlet ports comprising a blade adapted to cooperate with said piston and end portions fitting in said rotor plate grooves for imparting movement to said abutment, an oscillatory block slidably receiving said abutment, packing plates fixed to said casing bearing along an arc at one edge thereof upon the circumference of said rotor plates and on a face thereof against the ends of said abutment and oscillating block for preventing leakage, longitudinal packing strips on said abutment blade adapted to bear upon the eccentric portion of said piston, and other longitudinal packing strips in the casing about the cylindrical chamber thereof adapted to bear upon the concentric portion of said piston, said abutment packing strips being provided with end projections disposed within the grooves of the rotor end plates, and said casing packing strips being provided with end projections bearing upon the outer surface of said rotor plates for retaining said packing strips in correct position.

1,780,615. HINGE MEANS FOR LAVATORY BOWLS. CLIFFORD E. CARY, Chicago, Ill. Filed Apr. 24, 1929. Serial No. 357,618. 7 Claims. (Cl. 4—169.)



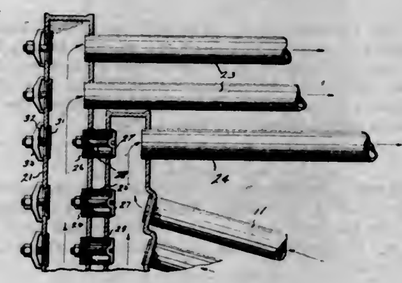
1. In a lavatory fixture, a bowl, a cabinet therefor and having a rear wall, and means providing a hinge mounting for the bowl in the cabinet, said means including stationary slots adjacent the sides of the bowl permitting bodily movement of the bowl as it is swung into and out of the cabinet so that the inner end of the bowl will clear said rear wall in the swinging of the bowl, said slots being pitched so that gravity will aid in the returning of the bowl to the inner ends of the slots as the bowl reaches its terminal positions.

1,780,616. COLORED AND TINTED PARCHMENT PAPER AND THE LIKE AND PROCESS FOR THE MANUFACTURE OF THE SAME. ROBERT IRVING COWEN, New York, N. Y. Filed Nov. 19, 1925. Serial No. 70,196. 13 Claims. (Cl. 8—5.)



1. In the art of manufacturing colored or tinted parchmentized paper, the process of passing the formed paper through an acid bath in which is dissolved dyestuff, and subsequently passing the paper so treated through a water bath to dissolve or wash out the acid still present.

1,780,617. TELEPHONE SYSTEM. THOMAS F. CROCKER, Chicago, Ill., assignor to Reserve Holding Company, Kansas City, Mo., a Corporation of Delaware. Filed Jan. 28, 1929. Serial No. 335,443. 10 Claims. (Cl. 179—5.)

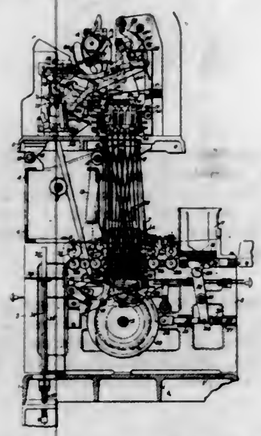


1. In a telephone system, an operator's telephone, a first trunk and a second trunk, means for extending a connection from said telephone over either of said trunks, a battery feeding bridge normally connected to said telephone, means responsive to the extension of a connection over said first trunk for disconnecting said bridge, and means responsive to the extension of a connection over said second trunk for releasing sand first connection and for re-connecting said bridge.

1,780,618. BULB-CULLET-CENTERING DEVICE. CHRISTIAN FLEISCHMANN, Bloomfield, N. J., assignor to Westinghouse Lamp Company, a Corporation of Pennsylvania. Filed Sept. 11, 1928. Serial No. 305,282. 8 Claims. (Cl. 176—3.)

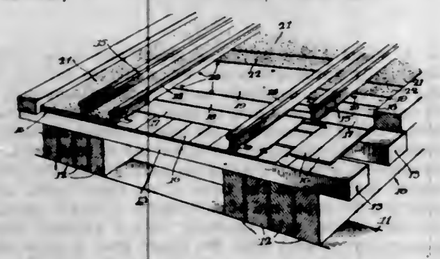
1. A rotatable sealing-in head comprising a seat for supporting a lamp bulb, movable members for engaging a bulb neck, one of said members having an arcuate slot and means in said slot operating in conjunction with one of said members to maintain said members engaged with said neck.

1,780,619. STEAM BOILER. HOWARD J. KERR, Westfield, N. J., assignor to The Babcock & Wilcox Company, Bayonne, N. J., a Corporation of New Jersey. Filed Apr. 15, 1925, Serial No. 23,177. Renewed Mar. 29, 1930. 9 Claims. (Cl. 122—360.)



1. A steam boiler having a steam and water drum, substantially horizontal water tubes divided into a plurality of banks, a downtake water chamber connected to one end of said tubes and to said drum, a main uptake water chamber connected to the bank of tubes nearest the furnace, tubes connecting the upper end of said main uptake chamber with said drum, an auxiliary uptake water chamber connected to the tubes of an upper bank, tubes connecting the upper end of said auxiliary uptake chamber with said drum, said auxiliary uptake chamber being substantially parallel with the upper part of said main uptake chamber and separated therefrom and disposed in the rear thereof, the upper part of said main uptake chamber and said auxiliary uptake chamber having openings in the walls thereof in alignment with each other and opposite each of the tubes connected to said second auxiliary chamber, whereby access to the interior of each tube may be had from the exterior of the boiler, nipples extending through said openings and connecting said main and auxiliary chambers, and closures for said openings.

1,780,620. DOUBLE-SUPERPHOSPHATE MANUFACTURE. WILLIAM BARKLEY KING, Columbia, Tenn., assignor to Armour Fertilizer Works, Chicago, Ill., a Corporation of New Jersey. Filed Jan. 6, 1930. Serial No. 418,999. 5 Claims. (Cl. 71—7.)



1. The process of producing double superphosphate, consisting in forming a slurry of ground phosphate-rock and dilute phosphoric acid solution, concentrating said slurry by heat to a thick liquid only, allowing such liquid to set to a solid condition after termination of said heating action, and drying said solid material.

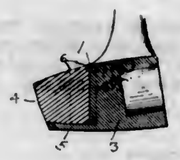
1,780,621. TABULATING MACHINE. WILLIAM W. LASKER, Brooklyn, N. Y., assignor to Remington Rand Incorporated, New York, N. Y., a Corporation of Delaware. Filed Dec. 6, 1929. Serial No. 412,262. 14 Claims. (Cl. 235—61.)

4. In a tabulator, a registering mechanism having a plurality of stops, said stops being movable longitudinally and laterally, analyzing means having a plurality of analyzing members, and means controlled by one of said analyzing members for determining whether the stops shall be moved laterally or not.

1,780,622. PROTECTIVE COVERING FOR BRIDGES. WILLIAM H. LAWRENCE, New York, N. Y., assignor to Johns-Manville Corp., a Corporation of New York. Filed Apr. 18, 1927. Serial No. 184,497. 3 Claims. (Cl. 14—73.)

3. A weather and fire protective covering for railway bridges having their wooden members impregnated with a chemical for preventing decay of said members, comprising a sheet of asbestos paper laid over said members, a plurality of layers of felt impregnated with bituminous material laid over said sheet, a layer of bituminous material over each layer of felt, and a layer of granules imbedded in each of said last-named layers, all loose granules being removed except from the uppermost layer.

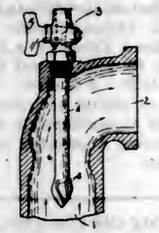
1,780,623. PROCESS FOR MANUFACTURING BUILDING MATERIAL OF VARYING DENSITIES. EMIL C. LOETSCHER, Dubuque, Iowa. Filed July 26, 1929. Serial No. 381,197. 6 Claims. (Cl. 92—54.)



1. A process for manufacturing articles of fibrous material consisting of molding a mat of the fibre pulp with predetermined portions of substantially increased thickness, and compressing the mat to the ultimate thickness of the article to be made, but with the initially thicker portions compressed to a substantially greater density than the initially thinner portions.

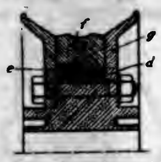
1,780,624. DEVICE TO INSURE THE BURSTING OF ALL KINDS OF BOMBS IN WHATEVER POSITION OF IMPACT OR FALL. ETTORE MANZOLINI, VINCENZO CAPOBIANCO, and FIORENZO SCARPONI, Rome, Italy. Filed Nov. 21, 1928, Serial No. 320,796, and in Italy Nov. 30, 1927. 4 Claims. (Cl. 102—29.)

1. In bombs of all kinds, the combination of a capsule for igniting the fuse, a striker adapted to act on said capsule, a wall carrying said striker and being movable in axial direction against said capsule and confining a compartment, and a mass of material flowing in the same way as a fluid mass filling said compartment and by exerting a pressure upon said movable wall ensuring the bursting of the bomb in any position of impact or fall.



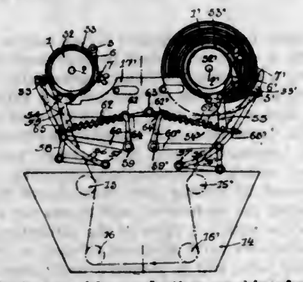
1,780,625. GOLF-CLUB HEAD. GEORGE W. MATTERN, Dayton, Ohio, assignor to The Crawford, McGregor and Canby Company, Dayton, Ohio, a Corporation of Ohio. Filed Apr. 17, 1924. Serial No. 707,121. 3 Claims. (Cl. 273—77.)

1. In a golf club of the driver, brassie or spoon type, a non-hollow metallic body including an integral neck or hosel, said body being continuous from the striking face of the club head to a line rearwardly of the hosel, an angular recess formed in the rear portion of said metallic body and a body of non-metallic material fitted in said recess forming the back of the club and top and side surfaces conforming to and forming continuations of those surfaces of the metallic body.



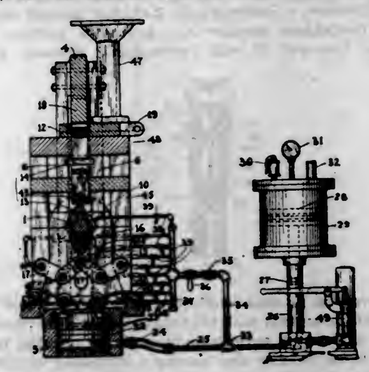
1,780,626. FUEL MIXER FOR INTERNAL-COMBUSTION ENGINES. JAMES MCINTOSH, Cleveland Heights, Ohio. Filed May 2, 1928. Serial No. 274,444. 1 Claim. (Cl. 48—180.)

The combination with a fuel mixture pipe having a constriction therein, of a nozzle projecting into the passage within said constriction with outlets directed against the flow of mixture in the pipe, said nozzle having gas



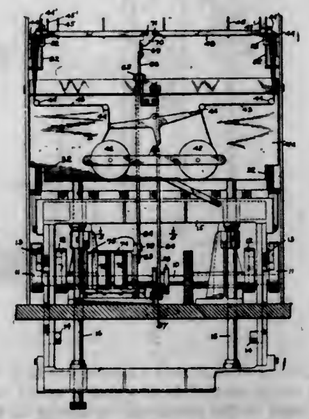
and air inlets, and a valve controlling said inlets to vary the pressure of the gas and air supply thereto the nozzle having a bulb at the end with angular slots therein.

1,780,627. RUNNING WHEEL OF PASSENGER AERIAL CABLEWAYS. MAX MÜLLER, Leipzig, Germany, assignor to Firm Adolf Bleichert & Co., A. G., Leipzig, Germany. Filed Feb. 21, 1930, Serial No. 430,211, and in Germany Apr. 4, 1929. 6 Claims. (Cl. 295—31.)



1. In a carriage roller for wire cableways, the combination with the outer rim, of a rubber ring made of different shape and dimensions as the space between the sides of said rim adapted to receive said rubber ring.

1,780,628. DYEING MACHINE. HANS NABHOLZ, Essonnes, France. Filed Dec. 11, 1925, Serial No. 74,692, and in Germany Dec. 24, 1924. 7 Claims. (Cl. 242—55.)

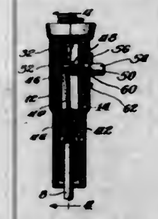


5. In a dyeing machine and other machine for the treatment of fabric, the combination of two rollers adapted to work alternately as winding and unwinding rollers, a main driving shaft, two disc and wheel clutching and changing gears adapted to connect and disconnect said rollers and said main shaft and to gradually modify the speed of rotation of said rollers when in the connecting position, connecting means between the two clutching and speed changing gears whereby at least one gear is in the disconnecting position, two brakes for the rollers, connecting means between the two brakes whereby at least one brake is in the inoperative position, a swinging member for each roller pivotally mounted thereon and adapted to engage inside the innermost fabric layer, a main control member adapted to be engaged at either end by the corresponding swinging member when the latter is free to swing and also adapted to bring into the operative position the clutching and speed changing gear of one roller and the brake of the other roller and two radially movable contact members bearing upon the fabric on each roller and adapted each to control its corresponding clutching and speed changing gear and its corresponding brake.

1,780,629. LUBRICATING DEVICE. CHARLES D. OTTO, New York, N. Y. Filed Apr. 22, 1926. Serial No. 103,879. 14 Claims. (Cl. 25—85.)

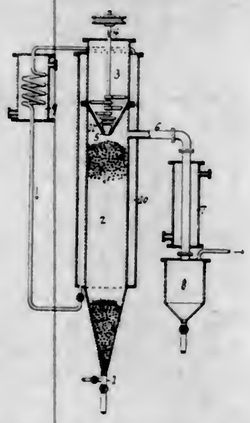
7. In combination, a cylinder, a piston, a substantially incompressible fluid medium in said cylinder, means for applying a pressure to said piston, means for limiting the maximum pressure developed in said cylinder, means for feeding the lubricating medium under a pressure responsive to the pressure developed in said cylinder.

1,780,630. RIBBON-SUPPORTING MECHANISM. RALPH E. PAGE, Binghamton, N. Y., assignor to The Tabulating Machine Company, Endicott, N. Y., a Corporation of New Jersey. Filed Oct. 1, 1927. Serial No. 223,314. 9 Claims. (Cl. 197—151.)



1. In combination, a printing device comprising a plurality of printing elements located side by side and movable to a plurality of printing positions, means for supporting ribbon guides and supports in the path of movement of said printing elements and means for preventing movement of those printing elements in whose path the ribbon guides and supports are placed.

1,780,631. COMBINATION THERMOSTATIC SWITCH AND PLUG CONNECTER. PETER A. PETERSON, Chicago, Ill. Filed Apr. 25, 1928. Serial No. 272,616. 2 Claims. (Cl. 200—139.)



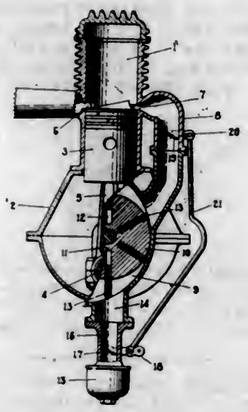
1. In an electric plug socket connecter for electric heating appliances, the combination of a pair of insulating body members secured together, a pair of sockets adapted to receive the connection prongs of a heating appliance and transmit electric current thereto and heat therefrom, each of said sockets being formed in two halves, a bimetallic thermostatic element having one end positioned be-

tween the ends of the halves of one of said sockets and extending longitudinally of said body members, a screw for fastening said socket halves and said element to one of said members, a substantially Z-shaped support secured to said last-named member and having a portion overlying the free end of said thermostatic element, and a

screw threaded in said portion of said support and having a point for contact with the free end of said thermostatic element, said screw extending through an opening in the opposite body member and having a manually engageable finger piece for adjustment of the position of the contact point thereof.

1,780,632. OXIDATION OF FATS, WAXES, AND RESINS. WILHELM PUNGS, Ludwigshafen-on-the-Rhine, Germany, assignor to I. G. Farbenindustrie (Aktiengesellschaft), Frankfort-on-the-Main, Germany, a Corporation of Germany. Filed Oct. 19, 1925, Serial No. 63,556, and in Germany Oct. 22, 1924. 11 Claims. (Cl. 87—12.)

2. The process of oxidizing a mixture of fats, oils, waxes and resins which comprises charging a retort with bodies which are inert to the substances occurring in the process and which are excellent conductors of heat, feeding said mixture into said retort to a point below the top of said inert charge whereby when said mixture swells during the reaction its increase in volume will be in contact with said inert bodies, and passing a strong current of air through said mixture at a temperature between about 160 and 170° C. whereby oxidation is effected.



1,780,633. PRODUCTION OF WAX COMPOSITIONS. WILHELM PUNGS, Ludwigshafen-on-the-Rhine, and MICHAEL JAHRSTORFER, Mannheim, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany, a Corporation of Germany. Filed Jan. 5, 1929, Serial No. 330,612, and in Germany Jan. 24, 1928. 11 Claims. (Cl. 87—19.)

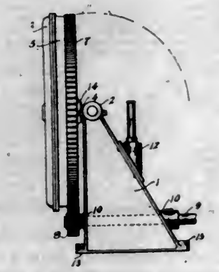
1. A composition of matter comprising a bleached Montan wax comprising esters and salts of the acids contained in the said wax, the salts being present in an amount of less than 25 per cent by weight of the said wax.

1,780,634. LIQUID SUPERSATURATED SOLUTION OF THIOCARBANILIDE. PHILIPP SIEDLER and AUGUST MOELLER, Frankfort-on-the-Main-Griesheim, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany, a Corporation of Germany. Filed May 16, 1929, Serial No. 363,705, and in Germany Jan. 28, 1928. 5 Claims. (Cl. 252—6.)

1. A composition of matter comprising a liquid supersaturated solution of thiocarbanilide in technically pure toluidine and containing a quantity ranging from 0.3% to about 20% of resin.

1,780,635. CHOKE MEANS FOR TWO-CYCLE ENGINES. OWEN H. SPENCER, Indianapolis, Ind. Filed Mar. 21, 1929. Serial No. 348,005. 2 Claims. (Cl. 123—73.)

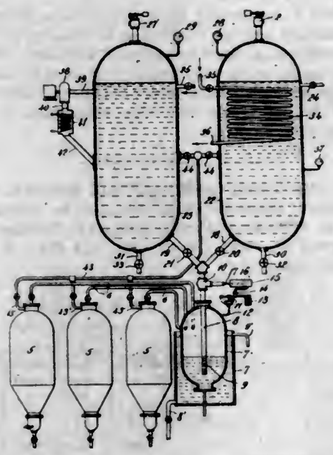
1. In a choke valve mechanism for an engine, the combination with a cylinder, a fuel passage connecting with said cylinder, a charging mechanism connecting with said fuel passage, a carbureter connecting with said charging mechanism, and a valve associated with said carbureter between said carbureter and charging mechanism, of a choke valve intersecting said fuel passage between said cylinder and charging mechanism, whereby the back pressure created by closing said choke valve will not be directed against the carbureter, and means for connecting said choke valve with the valve of the carbureter, whereby when the carbureter valve is moved to open or closed position the choke valve will be simultaneously moved to open or closed position.



1,780,636. SUBSTITUTED GUANIDINE-ALDEHYDE CONDENSATION PRODUCT. CHARLES M. STINE, Wilmington, Del., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a Corporation of Delaware. Filed Oct. 8, 1925. Serial No. 61,157. 1 Claim. (Cl. 260—3.)

An infusible synthetic resin comprising a polymethylol-substituted-guanidine.

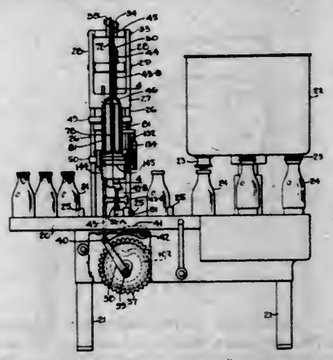
1,780,637. CUTLERY-CLEANING DEVICE. HARRY WILLIAMS, Vancouver, British Columbia, Canada. Filed Dec. 12, 1928. Serial No. 325,474. 2 Claims. (Cl. 141—1.)



2. In a cutlery cleaning device, the combination of a frame, a trunnioned shaft mounted therein, provided with an extension shaft, a cylindrical container rotatably mounted upon said extension shaft, said container being provided with an annular ring having radially disposed

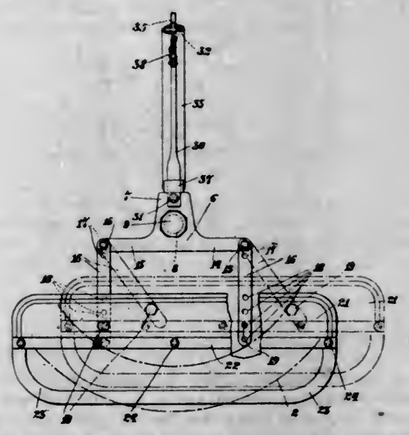
cutlery receiving slots, said ring being so positioned as to provide an annular fluid passage between the ring and container wall, adapted to receive the extremities of cutlery when positioned in aforesaid radially disposed slots, the aforesaid fluid passage being adapted to receive a predetermined amount of cleaning fluid in combination with

shot, sealing cover means on said container, said container having a gear cast integral with the outer periphery thereof, a pinion gear, said first gear being adapted for engagement with said pinion gear, when aforesaid container is rotated to extend in a vertical plane, and a drive shaft on which said pinion gear is mounted to impart rotary motion to the aforesaid container.



1,780,638. PRODUCTION OF PAPER PULP. ROBERT B. WOLF, New York, N. Y. Filed Dec. 23, 1929. Serial No. 416,014. 20 Claims. (Cl. 92—11.)

1. The method of recovering acid in the sulphite pulp process which comprises maintaining a constant pressure in the relief line from the digester, cooling the gases and liquids and then discharging the gases and liquids from the relief line into an acid absorbing medium.

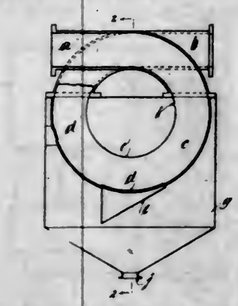


1,780,639. BOTTLE-CAPPING MACHINE. EARL S. BURDICK, Milwaukie, LEWIS B. BYRNE, Portland, and FRANCIS W. CHAUSSE, Salem, Oreg. Filed Dec. 28, 1926. Serial No. 157,451. 7 Claims. (Cl. 226—85.)

1. In a bottle capping machine, the combination of an upright frame; a rubber lined cup slidably mounted on said frame; a presser foot in said cup; a foil feed mechanism adapted to place foil under cup; a disk feed mechanism for feeding caps into said cup above said foil and under said presser foot; means for moving said presser foot downwardly against said cap to force same with said foil into a bottle neck recess; means for moving said rubber cup downwardly to fold the projecting edges of

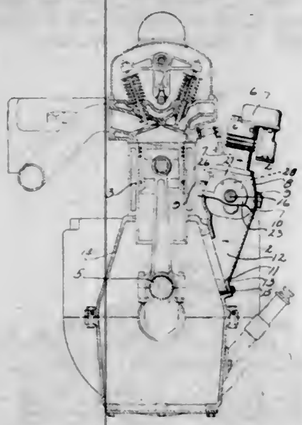
said foil below the bottle mouth; and means for contracting said rubber cup around said folded foil consisting of a pump for forcing a fluid against the outside of said cup lining.

1,780,640. LATERAL SPLASH GUARD FOR ROAD VEHICLES. WILLIAM BURNS, Glasgow, Scotland. Filed May 15, 1929, Serial No. 363,393, and in Great Britain Apr. 19, 1929. 2 Claims. (Cl. 280—156.)



1. A lateral splash guard for a vehicle wheel comprising an axial lateral projection fixed on the wheel, a sleeve rotatably mounted thereon by means of an internal ball bearing, a screw plug for insertion into the sleeve to totally enclose the ball bearing and to form a grease box, a frame mounted on the sleeve and carrying a splash screen, a removable cap adapted to be secured over the end of the sleeve and forming a flange for retaining the frame on the sleeve, and a connection between the frame and a non-rotary part of the vehicle to prevent rotation of the frame.

1,780,641. DUST SEPARATOR. SAMUEL NOEL CHEW, Thornton Heath, England, assignor to Pneumatic Conveyance & Extraction (1929) Limited, London, England, a Company of Great Britain. Filed Aug. 17, 1926, Serial No. 129,792, and in Great Britain Aug. 19, 1925. 2 Claims. (Cl. 183—79.)

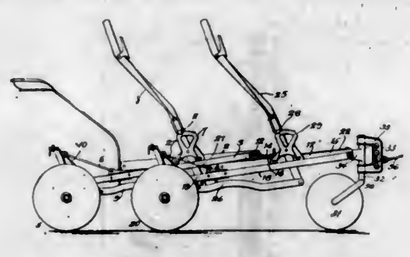


1. An extractor for extracting dust and grit from air or other medium comprising a closed casing forming a collecting chamber for the dust and grit, outlet means

at the bottom of the chamber for the collected matter, and a part-circular tube within said casing, for the passage of the medium, of V-shaped section with the apex of the section at its outer periphery, said tube being open

at its ends to the outside of the casing for coupling pipes and having two openings within the casing, one an outlet at its peripheral apex and the other an inlet on its inner side near its inlet end, both openings communicating with the collecting chamber, as set forth.

1,780,642. COMPRESSOR. NIELS A. CHRISTENSEN, Cleveland, Ohio. Filed Mar. 15, 1929. Serial No. 347,219. 3 Claims. (Cl. 123—2.)

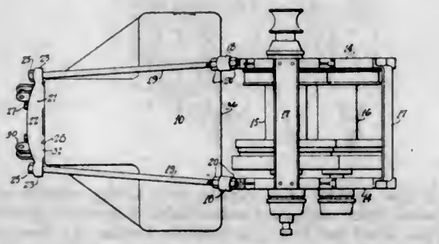


1. In an automotive engine, the combination with the pressure lubricating system and a lay shaft of said engine and the engine crank case having a side opening of a cover plate for said side opening having a hollow pedestal portion extending therefrom, a compressor having its crankcase freely communicating with the engine crank case through said pedestal, said compressor having a crank shaft, driven from said lay shaft, a connecting-rod mounted thereon, and means for lubricating the bearings of said crank shaft and connecting-rod from the pressure lubricating system of the engine, the oil from said bearings being free to drain from said compressor crank case and with the vapor formed in the crank cases forming the sole source of lubricant for the cylinder of the compressor.

1,780,643. METAL AMINO CARBONYLS AND PROCESS OF MAKING THE SAME. PHILIP S. DANNER, Point Richmond, and JOHN E. MUTH, Berkeley, Calif., assignors to Standard Oil Company of California, San Francisco, Calif., a Corporation of Delaware. Filed Sept. 26, 1927. Serial No. 222,198. 15 Claims. (Cl. 260—11.)

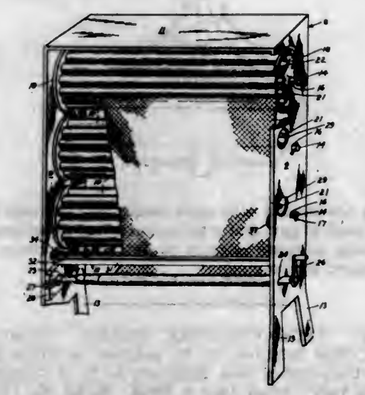
14. An amino carbonyl of a single metal free from alkali metals containing not less than three carbonyl groups for every atom of metal in the compound.

1,780,644. DISK HARROW. WILLIAM D. DEWEND, South Bend, Ind., assignor, by mesne assignments, to Oliver Farm Equipment Company, a Corporation of Delaware. Filed May 10, 1928. Serial No. 276,710. 13 Claims. (Cl. 55—83.)



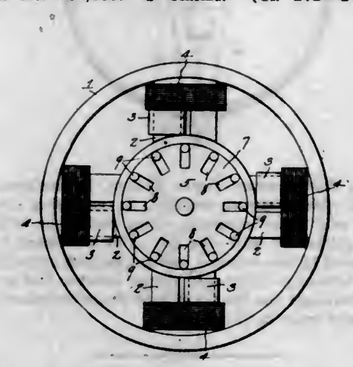
1. In a harrow, the combination with a central frame and disk gangs connected therewith, of a transverse drawbar, means pivotally connecting the forward end of the central frame with said draw-bar, like lateral frames having rigid connection with respective ends of said drawbar, a lateral disk gang connected with each lateral frame, and draft rods connected with the lateral frames and the central portion of the transverse draw-bar.

1,780,645. ORNAMENTAL FABRIC AND METHOD OF MAKING THE SAME. CAMILLE DREYFUS and WILLIAM R. BLUME, New York, N. Y., assignors to Celanese Corporation of America, a Corporation of Delaware. Filed June 26, 1928. Serial No. 288,530. 5 Claims. (Cl. 41–26.)



5. Method of producing brocade effects on fabrics containing cellulose acetate comprising delustering said fabric locally, applying a paste containing cellulose nitrate, a softening agent, a pigment and a solvent for said cellulose nitrate which is a nonsolvent for the cellulose acetate contained in the fabric and then subjecting the fabric to a relustering agency.

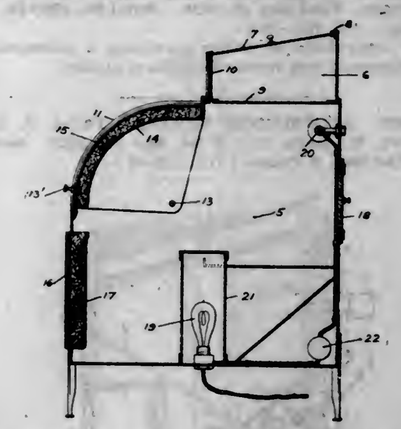
1,780,646. BRACKET FOR TRACTOR HOISTS. SIDNEY B. GORBUTT, Portland, Oreg., assignor, by mesne assignments, to Willamette-Ersted Company, Portland, Oreg. Filed Dec. 10, 1928. Serial No. 324,824. 3 Claims. (Cl. 180—53.)



1. In a tractor hoist the combination of a transmission casing, a hoist having a pair of spaced side frames, means for hinging the lower portion of said side frames to a tractor axle, said frames having tie rod fastenings formed near the upper end thereof, one side of said hoist bearing against an end of the transmission case, an anchor bracket bolted against the opposite end of the transmission case, tie rods joining said anchor bracket to said hoist in a manner to clamp the transmission case between same, the junction of said tie rods and anchor bracket being nearer to each other than are the tie rod fastenings on said hoist, as well as in a lower horizontal plane than are said tie rod fastenings on said hoist.

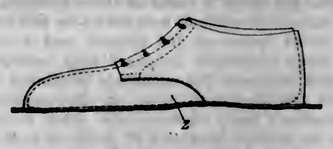
1,780,647. RACK FOR ROLLED MATERIALS. MICHAEL T. HEAVEY, Berkeley, Calif. Filed Mar. 5, 1928. Serial No. 259,009. 5 Claims. (Cl. 33—128.)

1. In a rack of the class described, opposed side panels and a top panel, a shaft journalled in and between said side panels, plate members fixedly mounted on said shaft between said side panels and in opposed relation thereto, and provided with axially directed openings, roll receiving spindles removably and rotatably mounted in and between openings of the different members, and means permitting a longitudinal removal of a spindle from its mounted position in said openings and through a side panel.



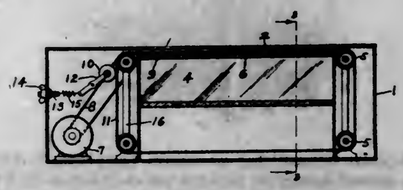
1,780,648. SELF-STARTING SYNCHRONOUS MOTOR. PAUL P. HORNI, Newark, N. J. Filed July 10, 1929. Serial No. 377,165. 4 Claims. (Cl. 172—275.)

1. A Self-starting synchronous motor comprising a multipolar field having rotating characteristics, a rotor turnable in said field, said rotor having an iron core with radial slots and longitudinal conductor rods in the outer portions of the slots, the remainder of said slots being free of conducting material.



1,780,649. WARMING DEVICE. HARRY M. JACOBS, Brooklyn, N. Y., assignor to The Jacobs Bros. Co. Inc., Brooklyn, N. Y., a Corporation of New York. Filed May 14, 1929. Serial No. 363,057. 1 Claim. (Cl. 34—21.)

A warming device including a casing, a source of illumination and heat disposed within said casing, a perforated shield embracing said source to permit warm air to pass through the shield, a container associated with said casing and embracing a perforated base through which warmed air may pass from within said casing,

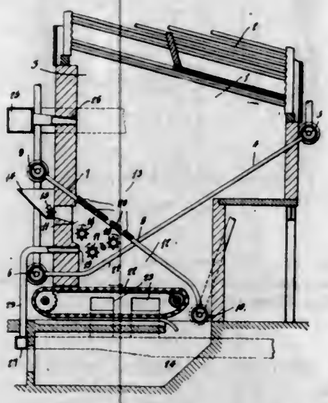


and a perforated cover associated with said container and through the perforations of which said air may escape after flowing through the container.

1,780,650. METHOD OF MAKING SHOES. WILLIAM J. KELLY, Brooklyn, N. Y., assignor of one-half to Arthur C. Basch, Brooklyn, N. Y. Filed Jan. 30, 1930. Serial No. 424,490. 9 Claims. (Cl. 12—142.)

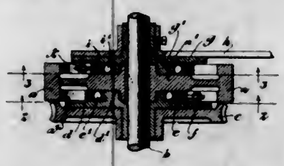
9. In the method of making shoes, the steps of pulling an upper downwardly and outwardly simultaneously from the bottom edge of the last at opposite sides thereof, and driving tacks through the upper and into the side of the last.

1,780,651. ADVERTISING DISPLAY APPARATUS. JOSEPH LASHENICK, Brooklyn, N. Y. Filed Aug. 4, 1928. Serial No. 297,484. 2 Claims. (Cl. 40—82.)



1. In an advertising display apparatus, a casing having a compartment at each end and a middle compartment with a top window, a front exhibiting window and an inner mirror angularly disposed to and facing said windows, rollers within each end compartment, an endless band with advertising matter thereon trained over said top window and over the rollers disposed in each of the end compartments, means for effecting movement of said band over said rollers and adjacent to the top window, said arrangement of band, mirror and windows constituting means for allowing natural light to pass through the upper window and be reflected by said mirror through the front window and thereby display a replica of the advertising matter on said band in said front window.

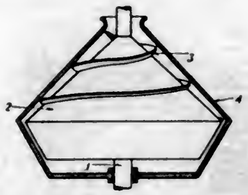
1,780,652. COATING COMPOSITION. WALTER E. LAWSON, Wilmington, Del., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a Corporation of Delaware. Filed May 18, 1928. Serial No. 278,918. 9 Claims. (Cl. 134—26.)



1. A composition of matter containing a polymerized vinyl compound and tetrahydrofurfuryl alcohol.

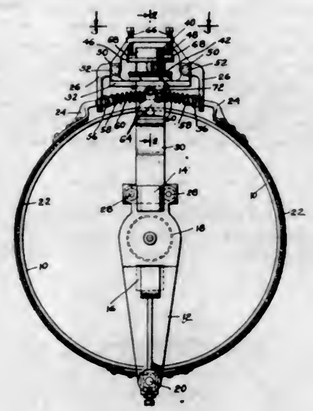
1,780,653. ACID-SLUDGE BURNER. FRANK J. MCDEVITT, St. Louis, Mo. Filed May 26, 1927. Serial No. 194,499. 7 Claims. (Cl. 122—4.)

1. A furnace for burning acid sludge comprising an enclosure having walls, a series of tubes arranged diagonally with respect to walls of said enclosure and connected with the boiler system of the furnace, and a secondary series of tubes diagonally arranged with respect to the walls of said enclosure but oppositely positioned with respect to the first-mentioned tubes, the first mentioned and second mentioned tubes crossing each other intermediate their ends to define a plurality of walls of a distillation chamber, a carbon combustion chamber and a gas combustion chamber, and means for feeding acid sludge to the distillation chamber.



1,780,654. POWER-TRANSMITTING MECHANISM. GEORGE E. MOLYNEUX, Bayonne, N. J. Filed Nov. 28, 1928. Serial No. 322,567. 3 Claims. (Cl. 74—57.)

1. A power transmitting mechanism comprising a driven part, a normal driver, an impeller for cooperation with the driven part, means actuated by the normal driver to effect operative engagement between the impeller and the driven part, a second impeller for cooperation with the driven part an accelerating driver independent of the normal driver, and means actuated by the accelerating driver to effect operative engagement between the second impeller and the driven part, the impeller being coaxial with the driven part.

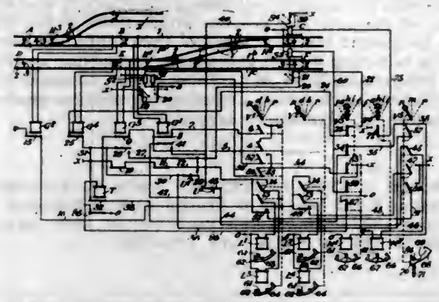


1,780,655. SLUDGE SEPARATOR. AAGE NYROP, Copenhagen, Denmark. Filed Oct. 31, 1929, Serial No. 403,793, and in Denmark Nov. 2, 1928. 8 Claims. (Cl. 233—7.)

1. A rotary separator comprising, a rotating shaft, a rotatable outer casing on said shaft, a central part rotatably mounted within said casing, a cover plate rigidly connected to said central part, helical threads on said cover plate slidably abutting said outer casing, gear train

means in the base of said outer casing between said shaft and said central part and retardation means retarding said outer casing to cause relative motion of said cover plate with respect thereto.

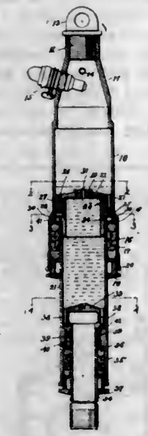
1,780,656. FLUID-PRESSURE BRAKE. ALBERT D. PENTZ, New Brighton, N. Y., assignor to Pentz Motor Brake Corporation, New Brighton, N. Y., a Corporation of New York. Filed June 2, 1926. Serial No. 113,131. 3 Claims. (Cl. 188—152.)



1. In a fluid pressure brake system, in combination, a fluid-tight elastic thrust member, an enclosing ring surrounding said thrust member, a plug resting on said member and guided by said ring for axial movement therein, a brake band in two sections, and mechanism including said plug for interconnecting said thrust member and said sections to transmit the thrust of said thrust member equally to both said brake sections.

1,780,657. PROCESS OF TREATING RUBBER AND PRODUCT PRODUCED THEREBY. WILLIAM BEACH PRATT, Wellesley, Mass., assignor, by mesne assignments, to Dispersions Process, Inc., Dover, Del., a Corporation of Delaware. Filed Aug. 23, 1922. Serial No. 583,903. 21 Claims. (Cl. 134—1.)

2. A process of dispersing a rubber mass in water, which comprises dissolving the rubber together with ammonia in a solvent, mixing water with the solution, and removing the solvent.



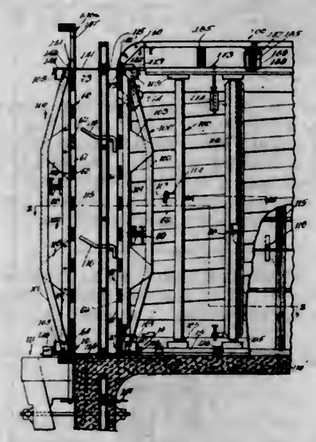
16. A new product, comprising substantially only water as the liquid vehicle having dispersed therein in colloidal non-coagulated form the coagulum of a latex together with a hydrophilic colloid, sulphur and a pigment, and which on removal of water is vulcanizable as a mass, the major portion of said dispersed particles being substantially uniform in size and of the same order of magnitude as the rubber globules of latex.

1,780,658. MASTER-CONTROL APPARATUS. LESTER E. SPRAY, Wilkinsburg, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Jan. 29, 1930. Serial No. 424,258. 15 Claims. (Cl. 246—135.)

15. In combination, a manually operable lever for controlling an electrical device, a first and a second electric lock for controlling said lever, a manually operable master lever having a normal and a reverse position, means controlled by said master lever in its normal position for controlling said first electric lock, and means controlled by said master lever in its reverse position for controlling said second electric lock.

1,780,659. SHOCK-ABSORBING STRUT. JOHN F. WALLACE, Shaker Heights, Ohio, assignor to The Cleveland Pneumatic Tool Company, Cleveland, Ohio, a Corporation of Ohio. Filed Dec. 9, 1927. Serial No. 238,839. 9 Claims. (Cl. 267—64.)

1. In a pneumatic and hydraulic shock absorbing strut, a cylinder, a piston therefor movable against pneumatic pressure to absorb shock, and a second piston movable against liquid displaceable through a metering opening to absorb shock, the movement of said second piston being communicable to said first piston through said liquid whenever the pressure in said liquid equals the pneumatic pressure acting against said first piston.



1,780,660. SHOCK-ABSORBING STRUT FOR AIRCRAFT. JOHN F. WALLACE, Shaker Heights, Ohio, assignor to The Cleveland Pneumatic Tool Company, Cleveland, Ohio, a Corporation of Ohio. Filed Feb. 15, 1928, Serial No. 254,826. Renewed Aug. 28, 1930. 8 Claims. (Cl. 267—64.)

1. In a shock absorbing strut for aircraft, two telescoping parts adapted to be secured to the portions of the aircraft whose relative movements are to be cushioned, one of said telescoping parts comprising two piston heads movable together in fixed relation, and means carried by

the other telescoping part for opposing the movement of one piston head throughout the stroke caused by the impact of landing and for opposing movement of the other piston head throughout only the latter part of said stroke.

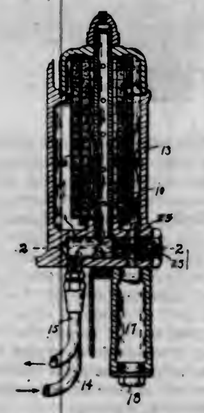
1,780,661. MOLD FOR CONCRETE BUILDINGS. AXEL G. W. WEDBERG, Chicago, Ill. Filed Apr. 9, 1926. Serial No. 100,817. 38 Claims. (Cl. 25—131.)

20. In a molding construction, a plurality of molding panels positioned edge to edge, each of the said panels having a hook-like portion associated with its edge, the hook-like portions of the adjacent panels serving to form a pocket, a stiffening element positioned in the pocket and overlapping the edges of the adjacent panels, and a clamping device for connecting the hook-like portions to force them outwardly from the panels and for urging the stiffening element inwardly towards the panels, said device comprising a pair of clamping arms for engaging said hook portions, a lost motion connection between the said arms, and wedging mechanism for urging the arms towards each other and for urging the arms outwardly away from the stiffening element, as well as for urging the stiffening element in toward the said panels.

26. In a molding construction, a pair of spaced molding panels, means for tying the panels together comprising a

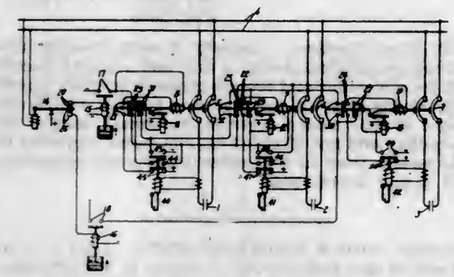
band of material adapted to be laid between the edges of the panels and a wedge member driven through the edge of one panel and passing through perforation in said band, the said wedge member bearing against the rear face of the other panel for tying the panels to another wall panel spaced therefrom, locking the panels against movement toward or away from each other.

28. In a molding construction, a pair of associated molding elements, a stiffening member for one of the said elements adapted to be associated with the rear face of the element to strengthen the same, the other molding element being provided with a shoe for receiving an end of the stiffening element, and means associated with an end of the stiffening element adapted to be set in the shoe to cooperate with the shoe and to prevent twisting of the stiffening element, the said stiffening element transmitting any forces which may be imposed on its associated molding element to the shoe.



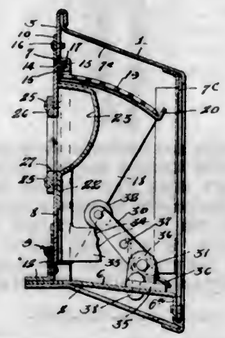
36. In a molding construction, a molding panel comprising a molding surface consisting of a sheet of metallic material, a plurality of slats associated with the rear of the panel for reenforcing the sheet, said sheet having portions turned back over itself to form pockets for receiving the ends of the slats to maintain them in position, said turned back portions having lateral extensions spaced from the edges of the panel.

1,780,662. **DOORCHECK.** JOSEPH WEISS, Chicago, Ill. Filed Oct. 18, 1928. Serial No. 313,199. 11 Claims. (Cl. 292—270.)



1. In a device of the kind described, comprising in combination, a keeper and a latch, said keper having a longitudinal slot and means to lock said latch in said slot by means of a plurality of resilient members hingedly attached to said keeper, said means including an element secured to said latch and slidably confined betwen said resilient members when in operative position.

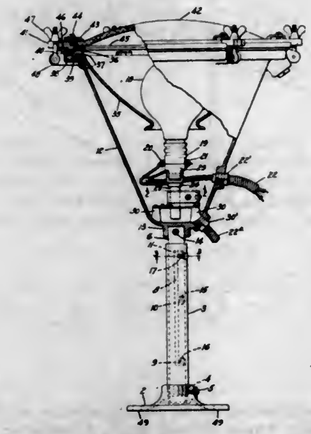
1,780,663. **OIL FILTER.** CHARLES A. WINSLOW, Vallejo, and ELBERT J. HALL, Berkeley, Calif. Filed May 5, 1925. Serial No. 28,211. 2 Claims. (Cl. 210—165.)



1. A pressure filter for the purpose mentioned comprising a housing having an inlet and an outlet port, a collecting medium of compressible porous fibrous substance interposed between said ports adapted to collect a layer of carbon and other solid particles normally present in oil used for lubricating purposes under high temperatures formed at or near the surface of the collecting medium and means for maintaining pressure differences on opposite sides of the collecting medium within limits sufficiently low to prevent the solid particles from filling the pores of the collecting medium and means for applying a yielding compression force to the said porous substance for maintaining the latter at a substantially uniform density, regardless of shrinkage or expansion.

1,780,664. **CONTROL SYSTEM.** ARVID E. ANDERSON, Scotia, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Jan. 14, 1927. Serial No. 161,192. 5 Claims. (Cl. 172—246.)

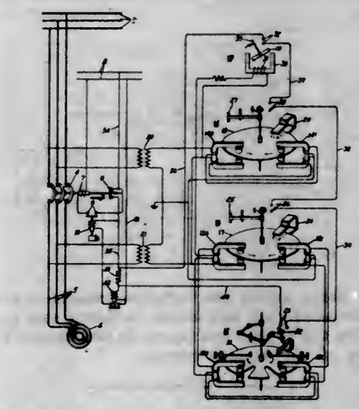
5. In combination, an electric circuit, a plurality of reactive means, a circuit breaker associated with each reactive means for connecting it to said circuit, means responsive to an electrical condition of said circuit for effecting the closing of said circuit breakers in a predetermined sequence and overload responsive means associated with certain of said reactive means for effecting the disconnection thereof from said circuit and for rendering the next circuit breaker in said sequence operative to be closed by said first mentioned means.



1,780,665. **VENTILATOR CONSTRUCTION FOR WINDOW FRAMES.** ROY T. AXE, Syracuse, N. Y., assignor to The O. M. Edwards Company, Inc., Syracuse, N. Y., a Corporation of New York. Filed Sept. 28, 1927. Serial No. 222,654. 3 Claims. (Cl. 98—93.)

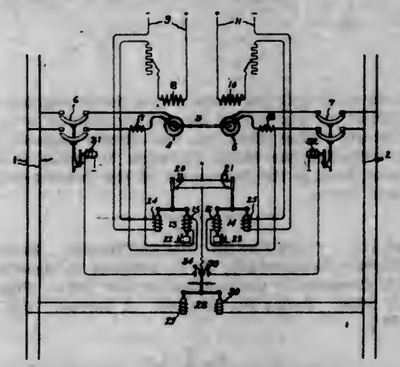
1. The combination with a frame member having a ventilator opening therethrough, of a door in said opening, the door being hinged at one edge and having side walls and a wall at its free edge telescoping into said opening, the wall at the free edge being formed with ventilator passages therethrough, the door being also provided with a hand passage therethrough and a hand

hold mounted on the inner side of the door provided with a depressed portion closing said opening in the door and impositive locking means for holding the door in open and closed positions, and means carried by the hand hold with which said locking means coacts to hold the door in adjusted position.



1,780,666. **FLOOD-LIGHTING DEVICE.** PERCY S. BAILEY, Marblehead, Mass., assignor to General Electric Company, a Corporation of New York. Filed Nov. 17, 1928. Serial No. 320,169. 2 Claims. (Cl. 240—1.)

2. In a flood light, a casing adapted to enclose a light source and a reflector therefor, said flood light having within said casing a support for the lamp, said support comprising a rod held in position by and between the arms of a resilient clamp, said clamp being mounted in the casing in position to hold the rod along the longitudinal axis of the casing, said rod being provided with a mortise in the form of a slot extending along the side of the rod and a tenon supported within the casing with the end thereof in operative engagement with said mortise, whereby the rod may be slid between the arms of the clamp along the axis of the casing but prevented from rotating, said clamp and said tenon being mounted on a plate within the casing, the plate extending transverse the axis of the casing, said plate being perforated, the axis of the perforation serving as a guide bearing for the rod in its longitudinal movement, said plate being supported upon lugs near the bottom of the case whereby the rod may project through the perforation and beyond said plate.

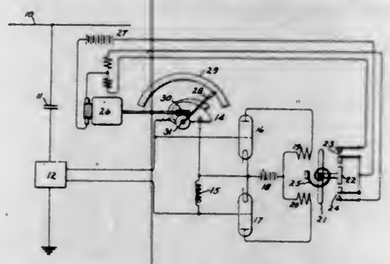


1,780,667. **SYNCHRONIZING APPARATUS.** HERMAN BANY, Yeadon, Pa., and GORDON R. MCDONALD, Schenectady, N. Y., assignors to General Electric Company, a Corporation of New York. Filed Nov. 30, 1928. Serial No. 322,783. 4 Claims. (Cl. 171—118.)

1. In combination, two alternating current circuits, means for connecting the circuits and means for controlling the closing operation of the connecting means including a plurality of relays connected to be energized from the circuits and arranged so that their movable members must simultaneously be in predetermined positions to start the closing operation of the connecting means, means for retarding the movement of the movable members of two of said relays, means for moving the movable elements of said two relays to their respective predetermined positions in times dependent on the difference between the frequencies of the electromotive forces of said circuits and within predetermined overlapping ranges of phase difference between the electromotive forces, means tending to move the movable member of another of said relays to its predetermined position within a predetermined range of phase difference overlapping a portion of the phase difference common to the movable

members of the two relays, and means for actuating the movable member of a fourth one of said relays through its predetermined position at a predetermined phase difference within the range thereof common to the movable members of the first three mentioned relays.

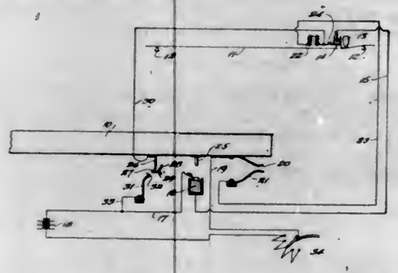
1,780,668. **SYSTEM OF ELECTRIC DISTRIBUTION.** THEOPHILUS F. BARTON, Upper Montclair, N. J., assignor to General Electric Company, a Corporation of New York. Filed June 22, 1929. Serial No. 372,891. 8 Claims. (Cl. 175—294.)



1. In combination, two alternating current systems, a rotary transformer interconnecting said systems, and means operative upon the occurrence of a disturbance on one of said systems which causes said transformer to fall out of step for effecting the disconnection of said transformer only from the system on which the disturbance does not occur whereby said transformer operates as a synchronous condenser across the system on which the disturbance occurs.

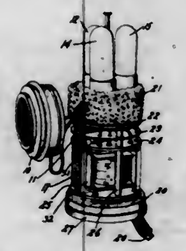
1,780,669. **FREQUENCY-RESPONSIVE SIGNAL-RECEIVING APPARATUS.** WALDEMAR BRÜCKEL and ROBERT SCHIMPF, Berlin, Germany, assignors to General Electric Company, a Corporation of New York. Filed Apr. 23, 1925, Serial No. 25,451, and in Germany Aug. 5, 1924. 8 Claims. (Cl. 250—39.)

1. A frequency responsive signal receiving apparatus comprising a signal receiving circuit having an inductive



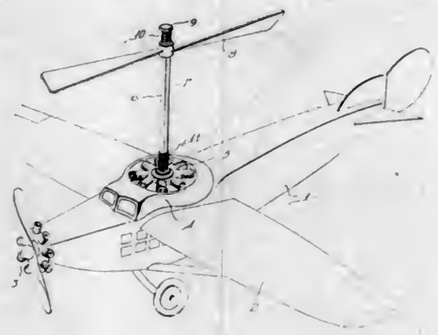
CARNEGIE LIBRARY OF ATLANTA

reactance and a capacitive reactance connected in series, a relay having a pair of differentially connected coils, means responsive to the voltage across the capacitive reactance for energizing one of said coils, means responsive



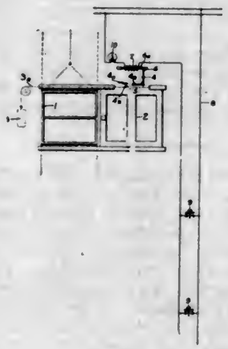
to the voltage across the inductive reactance for energizing the other coil, and means including said relay for controlling one of said reactances in accordance with the frequency of the received current.

1,780,670. SOSTENUTO PIANO. SIMON COOPER, Brooklyn, N. Y. Filed Mar. 12, 1929. Serial No. 346,290. 26 Claims. (Cl. 84—259.)



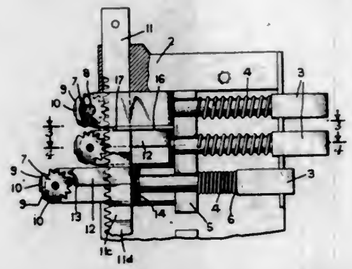
1. In an electric sostenuto piano, electromagnetic means for imparting a powerful momentary impulse to a string to initiate string vibration, and electro-magnetic means for continuing the string vibration by means calculated to also develop the harmonics of the fundamental note of said string.

1,780,671. CONDENSER MICROPHONE. EUGENE G. CRIPPEN, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed June 13, 1928. Serial No. 285,085. 2 Claims. (Cl. 179—171.)



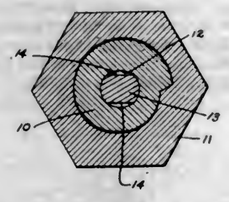
1. The combination with a condenser microphone, of a casing having a sidewall extension adapted to receive said microphone, a resilient lining for the casing, and a multistage thermionic valve amplifier adapted to be mounted as a unit in said casing and within the lining, said amplifier unit including a plurality of valves, sockets for said valves, a resilient cushion for said sockets, electrical coupling means for said valves, a supporting means for said coupling means and said cushion including a plurality of spaced insulating disks, a base for the casing and a resilient supporting means between said unit and said base whereby sound vibrations are prevented from affecting the electrode spacing of said valves.

1,780,672. AEROPLANE. TYRRELL H. DUNCOMBE, Miami, Fla. Filed June 28, 1929. Serial No. 374,312. 6 Claims. (Cl. 244—15.)



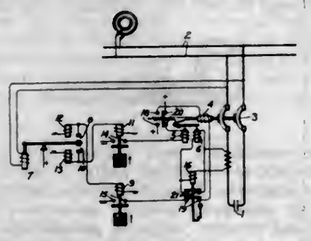
3. The combination in an aeroplane of a vertically extending motor driven splined shaft, a propeller mounted upon said shaft to slide longitudinally thereon, positive means for limiting the sliding movement of said propeller, and resilient means interposed between said positive means and said propeller.

1,780,673. DOOR - CLOSING DEVICE. JOHN EATON, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Feb. 10, 1926. Serial No. 87,471. 4 Claims. (Cl. 177—311.)



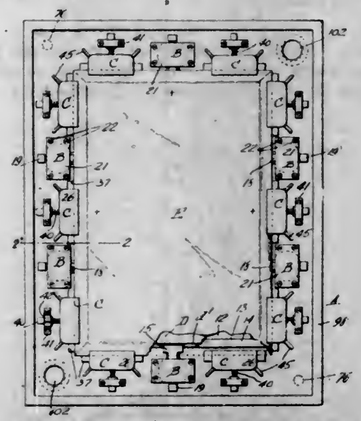
2. In combination, a door, means biasing said door to its closed position, a latch for holding said door in its open position, a signal at the door, a time element device for releasing said latch, and an electric circuit controllable at a distance from the door to set the signal and actuate the time element device.

1,780,674. COMPOUND TYPE BAR. BERNHARD KARL FRITZ EWALD, Villingen, Germany, assignor to The Tabulating Machine Company, Endicott, N. Y., a Corporation of New Jersey. Filed Mar. 4, 1927. Serial No. 172,704. 38 Claims. (Cl. 101—93.)



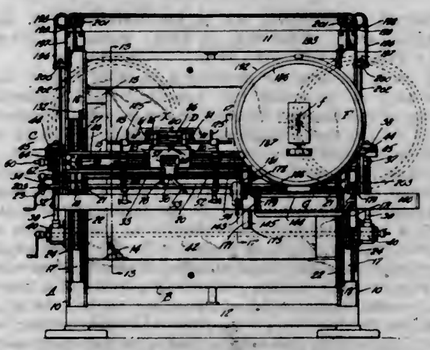
1. In combination, a rectilinearly movable type carrier, a plurality of elongated type elements carried thereby and a plurality of type characters mounted on one end of each of said elements, only one of said characters on each element being adapted after adjustment for printing.

1,780,675. BOLT AND NUT LOCK. WILLIAM R. HEWITT, New York, N. Y. Filed Jan. 16, 1929. Serial No. 332,757. 2 Claims. (Cl. 151—31.)



1. A nut and bolt locking means comprising a threaded bolt provided with a cylindrical opening having a conical bottom portion formed in the end thereof, a nut for said bolt, and a plug adapted to be held by the cylindrical portion of said opening and driven into the conical portion of the opening to expand said bolt, said plug being cylindrical throughout a portion of its length and of a substantially elliptical cross-section at its inner end whereby when the plug is driven into the conical portion of said opening the bolt will be expanded along one axis to thereby lock said nut against turning upon said bolt.

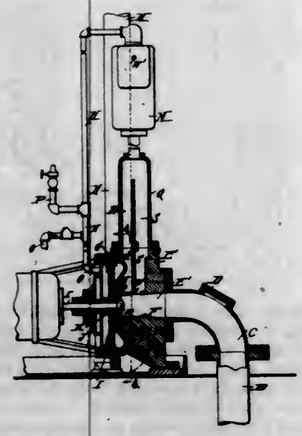
1,780,676. CONTROL SYSTEM. EUGENE L. HOUGH, St. Louis, Mo., assignor to General Electric Company, a Corporation of New York. Filed Jan. 14, 1927. Serial No. 161,195. 2 Claims. (Cl. 172—246.)



1. In combination, an electric circuit, a capacitor, a switch for connecting said capacitor to said circuit, means responsive to an electrical condition of said electric circuit for controlling the closing of said switch, and means responsive to a predetermined current through said capacitor for effecting the opening of said switch and for rendering said control means inoperative to effect the closing of said switch.

1,780,677. HOLDING AND SUPPORTING DEVICE FOR PRINTING OR PRINT-RECEIVING ELEMENTS AND THE LIKE. WILLIAM C. HUEBNER, Buffalo, N. Y. Filed Oct. 10, 1924. Serial No. 742,919. 21 Claims. (Cl. 95—73.)

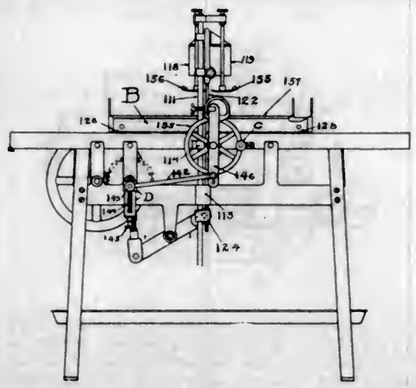
1. A holder for a flexible photographic sheet or film comprising a portable frame having an opening for the passage of light, a support on which said frame is removably secured, a plurality of sheet gripping and tightening devices for said sheet movably mounted on said frame at the several sides of said opening to move independently toward and from the opening in a plane parallel with that of said sheet and each having means for independent attachment to the sheet, adjusting means for said devices adapted to bodily move and hold said devices independently of each other relatively to said frame whereby said devices can be moved to and held at different distances from said openings so as to apply varying tension to different portions of the several edges of said sheet to draw it taut and smooth over said frame opening.



1,780,678. PHOTOGRAPHIC PRINTING APPARATUS. WILLIAM C. HUEBNER, Chicago, Ill., assignor to Huebner-Bleistein Patents Company, Buffalo, N. Y., a Corporation of New York. Filed July 10, 1928. Serial No. 291,650. 30 Claims. (Cl. 95—73.)

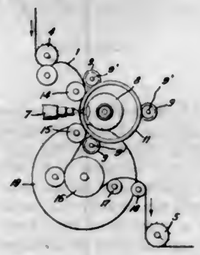
1. In a photographic printing apparatus the combination of a flat sensitized plate, a support therefor, a main

carriage, means for mounting any one of a series of printing plates of different sizes on said main carriage in parallel face to face relation to said sensitized plate, and with an edge disposed in fixed relation to said carriage, whereby the centers of plates of different sizes will be in different relative positions to said carriage, a source of light arranged in a housing adjustably mounted on said main carriage for movements parallel with the sensitized plate into and out of position at the back of the said printing plate and means for adjusting said light housing perpendicular to said last mentioned movement and parallel with the sensitized surface whereby said light can be placed opposite the center of any size of printing plate on said carriage.



1,780,679. SUMP OR BILGE PUMP. IRVING C. JENNINGS, South Norwalk, Conn. Filed Sept. 6, 1927. Serial No. 217,670. 11 Claims. (Cl. 103—113.)

8. A centrifugal water pump comprising an impeller, a casing forming a volute for the impeller, a central inlet passage through the casing forming the inlet eye to the impeller, a hole or orifice in the casing communicating with the volute at a point outside the inlet eye, an opening into the central inlet pasage, a manifold secured on said casing and having passages communicating with said hole and said opening so as to form a circulating passage between the same, a separating tank secured on top of the manifold and having a float controlling a connection to the atmosphere, and a suction air pump connected to the impeller of the water pump to exhaust air from said separating tank.

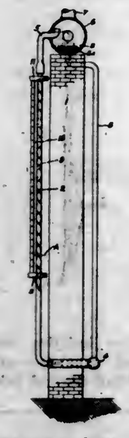


1,780,680. CUTTING MACHINE. WILLIAM E. KAY, Elyria, Ohio. Filed Oct. 12, 1922. Serial No. 593,983. 11 Claims. (Cl. 107—21.)

7. In a machine for dividing a block of plastic material such as ice cream into equally divided portions, a frame, a carriage for supporting the material adapted to move on the frame longitudinally thereof, a cutting tool having a transversely extending knife disposed over the carriage, said knife mounted for vertical reciprocation through the ice cream from a point above the ice cream, common driving means for the carriage and the cutting tool, a rack disposed longitudinally of the carriage and carried thereby, a pinion journalled in the frame engageable with the rack, means to effect a step by step rotary movement of the pinion comprising a link and a step by step ratcheting mechanism interposed betwen the pinion and the driving means, a reciprocable link joining said driving means to said cutting tool, said link being so disposed as to effect a longitudinal movement of the carriage simultaneously with an upward movement of said cutting tool, said ratcheting mechanism comprising a wheel disposed in driving relation to said pinion, an arm having a portion adjacent the wheel rim, said arm comprising a pair of bevelled surfaces facing the wheel rim and a pawl

element disposed intermediate the surfaces and the rim and making wedging engagement therebetween upon a predetermined reciprocatory movement of the arm to clutch the arm to the wheel.

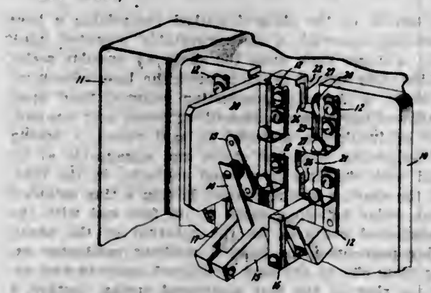
1,780,681. SOUND RECORDING AND REPRODUCING APPARATUS. EDWARD W. KELLOGG, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Original application filed July 27, 1928, Serial No. 295,780. Divided and this application filed Oct. 4, 1929. Serial No. 397,395. 5 Claims. (Cl. 179—100.3.)



1. In apparatus for recording sound on or reproducing sound from a moving film, a freely rotatable cylindrical member adapted to support the film at the recording or reproducing point and supporting means for said member comprising a plurality of rotatable members engaging the periphery of said member.

1,780,682. PIPE FOR SMOKING TOBACCO. HUGH MALCOLM MCCORMICK, Huntington, Ind. Filed Jan. 21, 1929. Serial No. 333,947. 1 Claim. (Cl. 131—12.)

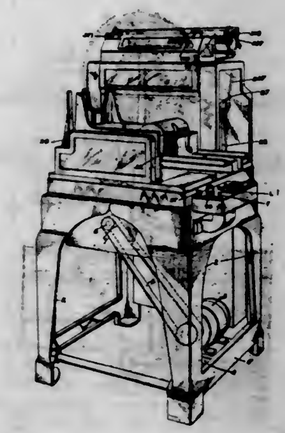
A pipe comprising a bowl having a stem section connected thereto, a bit section having a bit thereon connected to said stem section, said stem section having a plurality of superposed smoking ducts converging from the bowl and directly joining a common duct terminating in the outer end of said bit section, the smoke passage from the bowl to the end of said bit section being continuous and uninterrupted by cavities or wells.



1,780,683. METHOD AND APPARATUS FOR HEAT REMOVAL BY MERCURY. HURT L. NEWKIRK, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Aug. 4, 1927. Serial No. 210,704. 17 Claims. (Cl. 122—332.)

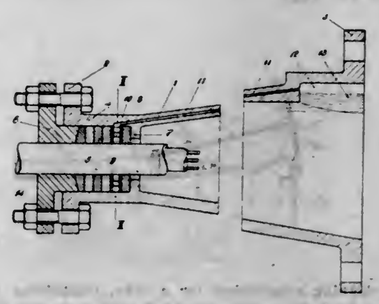
1. The method of transferring heat in a mercury vapor generating apparatus which comprises generating an intimate mixture of mercury vapor and finely divided mercury liquid which is predominantly vapor in volume but not in weight, and passing such mixture along the heated surface to absorb heat therefrom.

6. In a mercury vapor generating apparatus the combination of means for generating an intimate mixture of mercury vapor and finely divided mercury liquid, and means for supplying heat to said mixture.



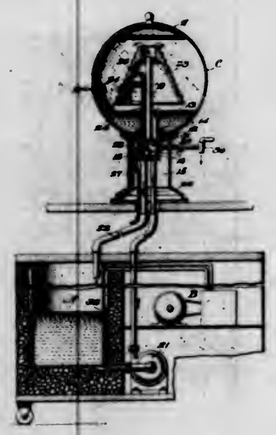
1,780,684. CIRCUIT-INTERRUPTING DEVICE. JOSEPH W. OWENS, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Feb. 4, 1928. Serial No. 251,987. 4 Claims. (Cl. 200—149.)

1. In a circuit interrupter, the combination of a base having arcing contacts mounted thereon and having keyhole-shaped openings formed therein and an arc barrier having projecting keys operable into and out of interlocking engagement with the openings in the base upon predetermined relative movement of the barrier with respect to said base.



1,780,685. PRINTING TABULATING MACHINE. JOHN ROYDEN PRINCE, New York, N. Y., assignor to International Business Machines Corporation, New York, N. Y., a Corporation of New York. Filed Dec. 27, 1924. Serial No. 758,359. 29 Claims. (Cl. 235—58.)

1. In an accounting machine, accumulator racks, accumulator wheels adapted to be actuated by said racks, carrying mechanism associated with said wheels and adapted when a wheel reaches its zero position to carry into the wheel of the next higher order, and means controlled by predetermined movement of an accumulator rack for rendering inoperative the carrying mechanism controlled by the corresponding accumulator wheel.



14. In a tabulating machine, listing mechanism, totaling mechanism, a motor, means for interchangeably causing said motor to actuate said mechanisms, and automatic control means for causing a change of speed of said motor when changing from the actuation of one of said mechanisms to the actuation of the other.

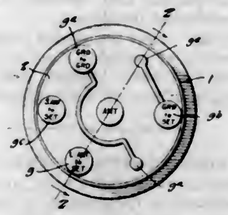
1,780,686. JUNCTION BOX FOR HIGH-TENSION ELECTRIC CABLES. CORNELIS FREDERIK PROOS, Delft, Netherlands, assignor to Naamlooze Venootschap Nederlandsche Kabelfabriek, Delft, Netherlands, a Dutch Company. Filed Jan. 16, 1928, Serial No. 247,244, and in the Netherlands Feb. 7, 1927. 5 Claims. (Cl. 247—18.)

1. A junction box for high tension electric cables provided with lead sheathing, said box having an expansion chamber therein, a plurality of packing rings disposed around the lead sheathing of the cable, spaced separating means arranged between said packing rings forming space between the adjacent faces of the packing rings, and means communicating the space between said means with the expansion chamber.

1,780,687. BEVERAGE DISPENSING AND DISPLAY DEVICE. HARRY C. SMITH, New York, N. Y., assignor to The Autodrink Corporation, New York, N. Y., a Corporation of Delaware. Filed Mar. 2, 1929. Serial No. 344,027. 1 Claim. (Cl. 225—28.)

In a beverage dispensing and display device, a beverage display container, a tube extending through the bottom of said container, a member connected with the lower end of said tube, said member having a pair of passages extending from top to bottom therethrough, one of said passages being in direct communication at its upper end with said tube, a pipe connected with the upper end of the other of said passages extending through said tube into the display container, beverage return and feed pipes connected with the lower ends of said passages, respectively, and a casing surrounding said member and said pipes, said member constituting a nut for clamping said casing rigidly with respect to said container.

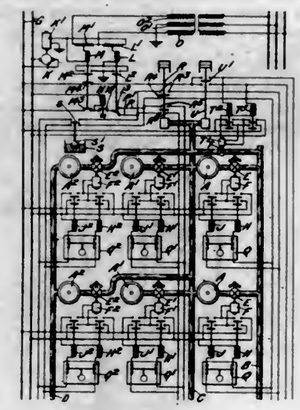
1,780,688. RAKE-CLEANING ATTACHMENT. JOHN A. STEINMETZ and CLYDE V. SPAULDING, Van Wert, Ohio. Filed Jan. 15, 1930. Serial No. 420,960. 1 Claim. (Cl. 55—146.)



A cleaning attachment for a rake, comprising a plate having its body portion provided with a ground levelling bead along one edge and a right angular flange at its opposite edge formed with apertures to receive the teeth of the rake, and a spring support comprising a metal plate having an arcuately bent clamping portion for bracing the handle of the rake and a pair of upwardly inclined relatively diverging flat arms formed integral with a side edge of the said clamp portion and terminating in upwardly disposed angular extensions secured to the cleaning plate below the bead, and fastening means connecting the end of the said clamping portion.

1,780,689. WELT NEEDLE FOR KNITTING MACHINES. FRED SUTCLIFFE, Jr., Philadelphia, Pa., assignor to Mock, Judson, Voehringer Company, Inc., Philadelphia, Pa., a Corporation of Delaware. Filed Feb. 15, 1930. Serial No. 428,764. 2 Claims. (Cl. 66—96.)

1. A welt needle for knitting machines comprising a shank, a spring beard near the outer end thereof, and a pointed and curved end beyond said beard.

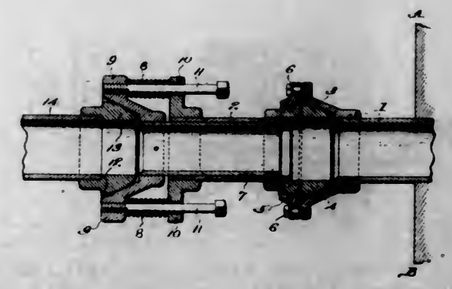


1,780,690. SWITCH FOR RADIORECEIVERS. VERNIS O. SYESTER, Linton, Ind. Filed Aug. 1, 1927. Serial No. 209,939. 2 Claims. (Cl. 200—11.)

1. A switch of the class described comprising a base of insulating material, a shaft rotatably mounted upon the base, a finger knob upon the shaft, an annular series of equidistantly spaced contacts upon the base concentric to the shaft, a sleeve of conducting material fixed upon the shaft and having a circumscribing recess near one end, a collar of insulating material in said recess, a spring contact extending from the sleeve and engageable at its free end with the first mentioned contacts, in the rotation of the shaft, a spring contact having a ring mounted upon the collar and engageable at its free end with the first mentioned contacts, in the rotation of the shaft, a binding post upon the base, a resilient conductor extending from one of the first mentioned contacts and engaging the ring of the last mentioned spring contact, a conductor bridging two relatively adjacent ones of the first mentioned contacts, and a conductor bridging two diametrically opposite ones of the first mentioned contacts and having an arcuate bend intermediate its ends to extend about the sleeve in spaced relation thereto.

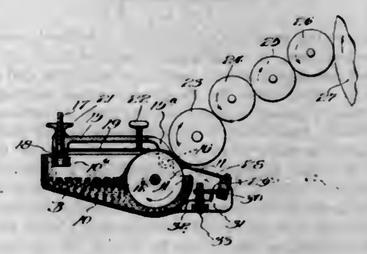
1,780,691. AUTOMATIC CONTROL FOR TURBOALTERNATORS. THOMAS REGINALD WARREN, Norton-on-Tees, England, assignor to Imperial Chemical Industries Limited, London, England, a Company of Great Britain. Filed June 14, 1929, Serial No. 370,979, and in Great Britain June 29, 1928. 7 Claims. (Cl. 290—2.)

1. In an automatic control system for turbo-alternators, the combination of a group of high pressure turbines, an intermediate pressure receiver into which the high pressure turbines exhaust, a second group of turbines supplied from the intermediate pressure receiver, a primary group of alternators driven by the high pressure turbines, a secondary group of alternators driven by the turbines of the second group, and means whereby the distribution of the electrical load between the two groups of alternators is controlled in accordance with variations in the pressure in the intermediate receiver and with variations in the frequency of the electrical system supplied by the alternators.



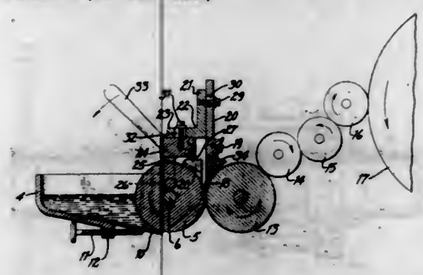
6. In an automatic control system for turbo-alternators, the combination of a group of high pressure steam turbines, an intermediate pressure receiver into which the high pressure turbines exhaust, a second group of steam turbines supplied with steam from the intermediate pressure receiver, means for generating high pressure steam for supply to the first group of turbines, a feed water supply to the steam generating means, means whereby the exhaust steam from some of the turbines of the second group is utilized for preheating the feed water, a primary group of alternators driven by the high pressure turbines, a secondary group of alternators driven by the turbines of the second group, means whereby the supply of steam to the feed-heating turbines is controlled in accordance with the condition of the feed water supply, and means whereby the supply of steam to the turbines of the first group and to the remaining turbines of the second group is controlled in accordance with variations in the pressure in the intermediate receiver.

1,780,692. SHIRT FASTENER. FENTON WRIGHT, Kansas City, Mo. Filed Aug. 7, 1929. Serial No. 383,992. 2 Claims. (Cl. 2—128.)



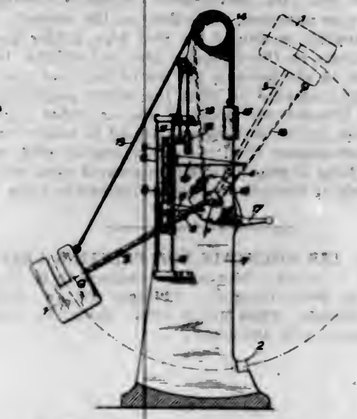
1. A shirt having its body provided with separable portions, one portion having inner and outer slits and intermediate slits, strips having one of their ends secured to the other portion, said strips being passable first through the inner slits and then through the outer slits, said strips being foldable in the outer slits and then passable through the intermediate slits and the inner slits.

1,780,693. EXHAUST CONNECTION. JACOB B. YAEBL, Marion Ohio. Filed Mar. 25, 1926. Serial No. 97,353. 1 Claim. (Cl. 285—70.)



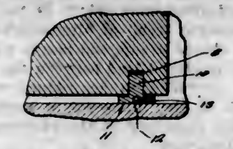
Means for carrying off exhaust from a fire engine when operating in the engine house, the same consisting of a sectional vent pipe having one of the sections fixed in and extending through a wall of the engine house to discharge the exhaust clear thereof, and having a relatively movable section coupled to the fixed section by a universal joint, an extension pipe slidable within the movable section of the vent pipe, spring means normally holding the extension pipe projected, projections on the extension pipe and the movable section of the vent pipe, guides fixed in the projections on the extension pipe and slidable in the projections on the movable section of the vent pipe and having stops adapted to abut the latter projections to limit the forward movement of the extension pipe, an exhaust pipe on the fire engine adapted to freely connect with and disconnect from the said extension pipe, and a universal joint having its elements secured upon the contiguous ends of the said exhaust and extension pipes.

1,780,694. INK FOUNTAIN FOR PRINTING PRESSES. HARLEY C. ALGER, Chicago, Ill., assignor to R. R. Donnelley & Sons Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 9, 1927. Serial No. 173,983. 31 Claims. (Cl. 101—363.)



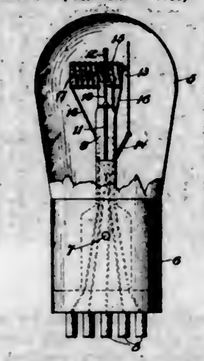
1. In an ink fountain for printing rolls and the like, an ink reservoir, an ink roll adapted to make contact with ink in said reservoir, a second roll spaced a short distance from the first-mentioned roll, and a doctor blade operable on the first-mentioned roll to scrape ink therefrom and cause the ink adjacent the scraping edge of said blade to contact with the second-mentioned roll.

1,780,695. INK FOUNTAIN FOR PRINTING PRESSES. HARLEY C. ALGER, Chicago, Ill., assignor to R. R. Donnelley & Sons Company, Chicago, Ill., a Corporation of Illinois. Filed Nov. 1, 1928. Serial No. 316,557. 15 Claims. (Cl. 101—350.)



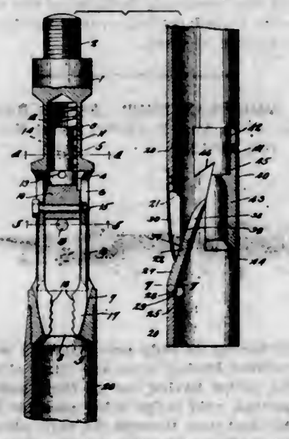
1. In an ink fountain for printing rolls and the like, an ink reservoir, a fountain roller adapted to make contact with ink in said reservoir, a roll spaced a short distance from said roller, and means for transferring the ink from said roller direct to said roll, said means being movable into and out of operative position.

1,780,696. TESTING MACHINE. ALFRED J. AMSLER, Schaffhausen, Switzerland. Filed Dec. 3, 1927, Serial No. 237,492, and in Germany Nov. 7, 1927. 7 Claims. (Cl. 265—13.)



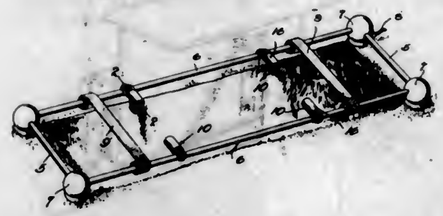
5. A testing machine of the type described, comprising in combination, a pendulum comprising a swingably mounted arm and a weight carried by said arm and adapted to break a test piece by its impact when moving downward from a raised position of the arm, a vertical guide, a uniformly graduated scale adjustable along said guide, a circular member arranged on said arm so that the center of said member is situated on the line passing through the center of gravity of said weight and the turning axis of the pendulum, a horizontal straight edge rigidly fixed to said scale and cooperating with said member for adjusting the scale in height to correspond to the initial position of the pendulum, a further vertically guided, horizontal straight edge acted upon by said member when the pendulum swings in the upward direction after the impact, a hand operatively connected to the latter straight edge and cooperating with said scale for indicating the vertical component of said upward movement and thereby the amount of energy spent in the impact, and a rope brake connected to said pendulum and adapted to automatically brake the movement of the pendulum after it has attained its highest position following upon the impact.

1,780,697. PISTON RING. EDWARD A. BENTON and MATHIUS LINDERNER, Altoona, Pa. Filed Dec. 7, 1929. Serial No. 412,475. 3 Claims. (Cl. 74—109.)



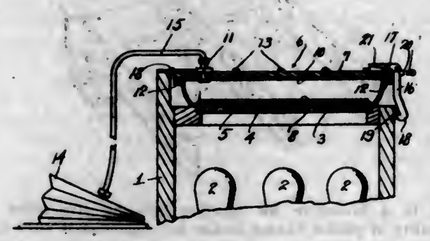
1. A piston ring of the character described comprising an annular ring of substantially T-shaped cross-section having a circumferentially extending oil distributing groove in its outer periphery and oil conducting ports extending therefrom to the forward marginal edge of the ring.

1,780,698. VACUUM TUBE. BERT GRIFFIN BLACKMAN, Ogden, Utah, assignor of one-third to Cleveland Redfield, Ogden, Utah. Filed Sept. 16, 1925. Serial No. 56,677. 3 Claims. (Cl. 250—27.5.)



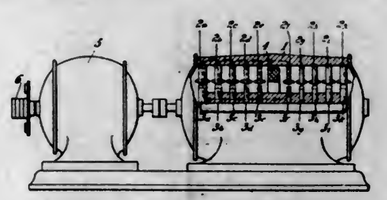
1. In an electron discharge device, an evacuated envelope, an electron emitting filament therein, a flexibly mounted plate of magnetic material located within the envelope, a core, and a control member formed as a coil about said core, the coil being adapted to have passed therethrough the current to be amplified whereby variations in the magnetic field about the coil will influence the plate.

1,780,699. GRAB FOR DRILL RODS AND THE LIKE. HARRY E. BROWN, Wichita, Kans., assignor to Albert H. Neilson, Tulsa, Okla. Filed May 3, 1929. Serial No. 360,924. 8 Claims. (Cl. 294—102.)



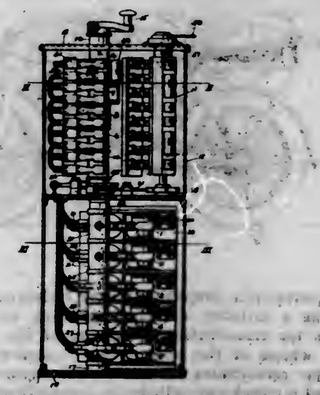
1. A tool of the class described, including a socket member having a lateral opening and superposed bearing portions, and a latch mounted for pivotal movements in said opening having superposed bearing portions cooperative with the bearing portions on the socket to provide a multiple support for the latch and a load carried by the latch.

1,780,700. COFFIN-LOWERING DEVICE. HAROLD J. CORDONNIER and CORBAN H. ZILER, Carthage, Mo. Filed May 13, 1929. Serial No. 362,690. 4 Claims. (Cl. 254—136.)



1. The combination with a coffin lowering device comprising rotatable lowering elements and flexible members carried thereby for supporting the coffin, of means also carried by said rotatable elements for initially supporting the coffin above said flexible members.

1,780,701. PHOTOGRAPHIC-PRINTING DEVICE. ROLAND F. CRANE, Cincinnati, Ohio. Filed Nov. 10, 1928. Serial No. 318,465. 1 Claim. (Cl. 95—76.)



A photographic printing device comprising a light cabinet having a horizontally disposed transparent surface at its upper end for supporting a negative and a sensitized paper in superposed relation thereupon and having its rear wall extended vertically above the said surface for an appreciable distance, a lip projecting outwardly from adjacent the upper edge of the forward wall of the cabinet, a platen hingedly connected at one end to the upper edge of said extended rear wall and adapted when swung into position over the transparent surface to be disposed at an inclination to said surface with its free end resting upon the latter, a pivotal latch depending from the said free end of the platen with its lower end terminating in a hook for engagement with the said lip, said latch being adapted in the inclined position of the platen to extend obliquely with respect to the forward edge of the surface with its hooked end disposed outwardly of and below the said lip, a flat normally deflated pneumatic cushion secured to the inner face of the platen and adapted in the inclined position of the latter to contact with the superposed negative and sensitized paper only at the forward or outer portion thereof, and means for inflating said cushion.

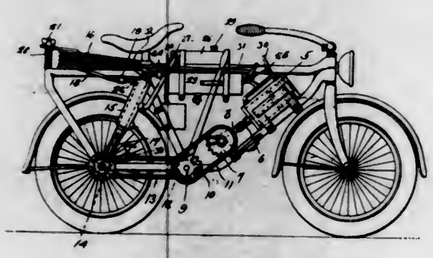
1,780,702. CONSTANT-SPEED MULTIFREQUENCY ELECTRICAL GENERATING APPARATUS. WALTER DOENIG, Berlin-Dahlem, Germany. Filed Jan. 8, 1929, Serial No. 331,100, and in Germany Nov. 28, 1928. 4 Claims. (Cl. 171—252.)

1. A multi-frequency electrical generating apparatus, comprising a multi-frequency generator of the homopolar inductor type having a plurality of independent stator-rotor units of substantially the same diameter; an excitation winding common to all of said units for providing magnetic flux therefor; means for driving said generator; and means for controlling the speed thereof; the air gap distances between successive cooperating rotor and stator units being decreased progressively from the units nearest the exciting winding to those furthest from it, thereby adapting them to independently generate different frequencies.

1,780,703. ELECTRIC CONTROLLER. ROBERT R. DUNLOP, Columbus, Ohio, assignor to The Jeffrey Manufacturing Company, Columbus, Ohio, a Corporation of Ohio. Filed June 8, 1923. Serial No. 644,179. 15 Claims. (Cl. 200—6.)

1. In a device of the class described, a plurality of movable circuit closing elements, movable control means operable on said elements in succession for moving the latter into circuit closing position, and means associated with each of said circuit closing elements and made successively operable in dependence upon the movement of said control means for engaging said elements in the closed position and releasing them upon another movement of said control means.

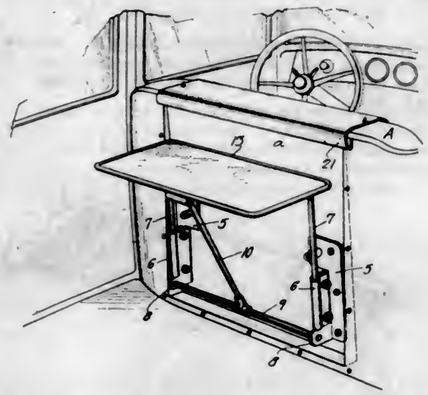
1,780,704. METAL WHEEL AND METHOD OF MAKING THE SAME. ERNEST E. EINERSEN, Davenport, Iowa, assignor to French & Hecht, Incorporated, a Corporation of Iowa. Filed Aug. 3, 1929. Serial No. 383,225. 7 Claims. (Cl. 153—10.)



1. The method of making metal wheels, which includes providing an annular hollow rim having holes there-

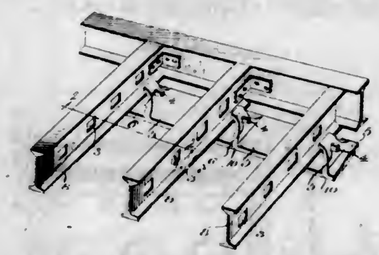
through to receive the spoke ends, inserting the ends of the spokes in said holes, and fastening the rim to the spokes by deforming the rim to force the walls of the holes in firm engagement with the spokes.

6. In a metal wheel, the combination of a hub, spokes fixed thereto, and a hollow rim formed with holes in which the outer end of the spokes extend, said rim being permanently deformed at points adjacent the location of the holes, and the side walls of the latter being in firm and fixed engagement with the sides of the spokes.



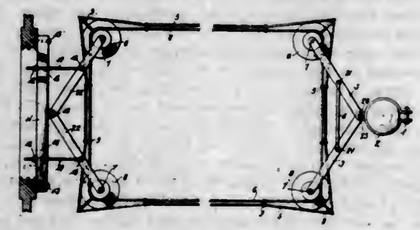
1,780,705. AIR-PROPELLED MOTOR CYCLE. ROBERT E. FORMAN, Cincinnati, Ohio. Filed June 1, 1928. Serial No. 282,149. 1 Claim. (Cl. 180—33.)

A motor-cycle propelling means including a motor embodying a cylinder, a piston operating in the cylinder, means for transmitting movement of the piston to the drive wheels of the motor-cycle, a compressed air tank, a pipe establishing communication between the compressed air tank and cylinder, a manually operated expansion tank for providing the initial supply of compressed air to the compressed air tank, a pipe for establishing communication between the compressed air tank and expansion tank, a compressor operated by the momentum of the motor-cycle, a pipe establishing communication between the compressor and the expansion tank, a water tank mounted above the compressor, a pipe establishing communication between the water tank and the compressor for delivering drops of water to the compressor.



1,780,706. AUTOMOBILE TABLE. FRANK GOLDBECHER, Grantwood, N. J. Filed Feb. 12, 1929. Serial No. 339,415. 3 Claims. (Cl. 45—51.)

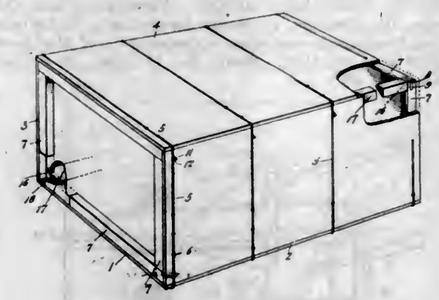
1. In a table unit of the character described, a pair of bracket members adapted to be secured to a support, supporting bars attached at their lower ends to said brackets, a cross member arranged between the brackets beneath said supporting bars, a further bar pivoted at its lower end to said cross member, a table board, slidable and pivotal connections between the board and the upper ends of said first mentioned bars, a slidable and pivotal connection between said board and the upper end of said pivoted bar, said first mentioned slidable and pivotal



connections in each instance consisting of a channel member associated with the table board, a pin slidable therein, and a member carried by said pin for pivotal attachment to the upper end of the adjacent bar.

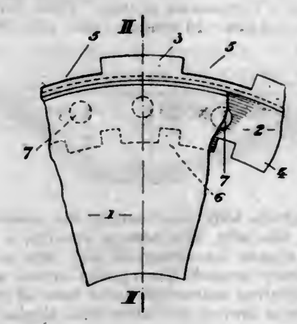
1,780,707. BUILDING CONSTRUCTION. FRED H. HALSEY, Texarkana, Ark. Filed Feb. 26, 1929, Serial No. 342,760. Renewed Sept. 18, 1930. 6 Claims. (Cl. 72—67.)

2. In a structure for forming building structures, a plurality of panels having means for engagement with the beams of a building, and wedge elements engageable with the adjacent ends of adjacent panels to hold the same in place.



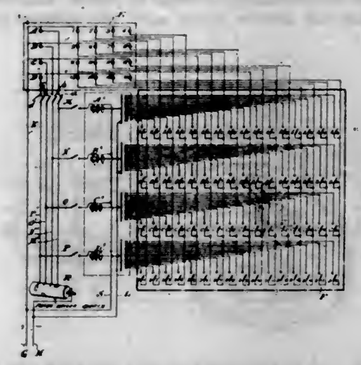
1,780,708. CLOTHES LINE AND DRIER. HERBERT THOMAS HORSCRAFT, Valley Stream, and WILLIS LEROY KING, St. Albans, N. Y. Filed Apr. 26, 1929. Serial No. 358,388. 4 Claims. (Cl. 68—3.)

4. In a device of the character described, a supporting member comprising an elongated bar, divergent lever



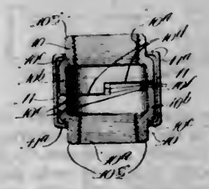
arms co-axially pivoted thereto, a pulley at the free end of each lever arm, means intermediately connecting each lever arm and the supporting member for adjusting the position of each lever arm, said adjusting means comprising a bolt pivotally attached to each lever arm, said bolt extending through the supporting member, and means to secure the bolt in position.

1,780,709. WIRE-BOUND BOX AND METHOD OF MAKING THE SAME. EDWARD T. JOHNSON, Greenfield, Mass., assignor to The New England Box Company, Greenfield, Mass., a Corporation of Massachusetts. Filed Dec. 23, 1929. Serial No. 416,071. 9 Claims. (Cl. 217—12.)



1. A wire bound box comprising a mat formed of a bottom, two sides and a cover, the pieces of the mat being stitched together with wire, two end pieces, the said end pieces having their corners cut off, the mat when shaped nailed to said end pieces, four longitudinal pyramidal strips having their bases lying adjacent the respective cut-off corners of the end pieces, the mat tightly encircling said longitudinal strips and the ends of the wire stitching adapted to be respectively secured to each other to thereby tightly bind the box together.

1,780,710. FRICTION BODY FOR FRICTION COUPLINGS, BRAKES, AND THE LIKE. HANS KATTWINKEL, Coswig, Germany. Filed Jan. 30, 1928, Serial No. 250,635, and in Germany Jan. 26, 1927. 6 Claims. (Cl. 192—107.)

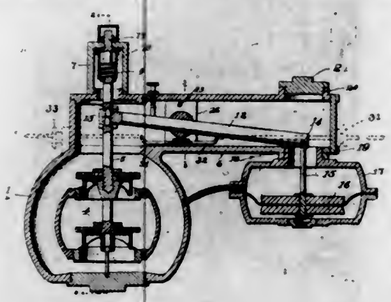


1. A friction element comprising a disc of frictional material, and a metal rim provided with a plurality of driving projections and forming a single endless annular piece which is partly embedded into said frictional material, the driving projections of said rim being formed by folding around the respective portions of the rim.

1,780,711. CALL SYSTEM. IRA JEAN LICHTER, Teaneck, N. J. Filed Oct. 1, 1929. Serial No. 396,466. 8 Claims. (Cl. 177—353.)

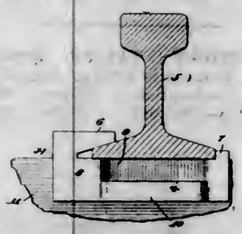
1. In a call system, a display panel and a call board, a plurality of signal devices at the display panel forming one group, a second group of signal devices at the display panel, banks of call switches at the call board corresponding in number of banks to the number of signal devices in the first named group, each of said banks including a switch for each of the signal devices in the second group, circuits from said switches to the signals of the second group and means for successively and intermittently energizing the signals of the first group and simultaneously therewith energizing the banks of switches successively.

1,780,712. FLEXIBLE COUPLING. ROBERT L. LITTLE, Chicago, Ill., assignor to Lindsay Light Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 27, 1927. Serial No. 187,017. 1 Claim. (Cl. 285—193.)



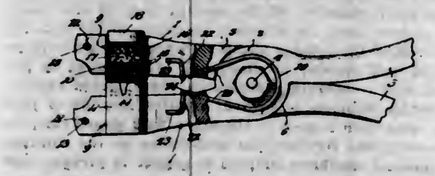
A coupling of the character described, comprising two tubular members having their outer ends provided with threads and their inner ends enlarged to form shoulders, a supporting casing holding the tubular members together, said casing surrounding the enlarged ends and provided with inwardly projecting flanges at its inner ends to engage the shoulders, the internal diameter of the flanges at the ends of the casing being greater than the external diameter of the outer ends of the tubular members and the internal diameter of the central part of the casing being greater than the external diameters of the enlarged inner ends of the tubular members, whereby relative movement of said tubular members out of alinement is permitted, and co-operating means on the enlarged ends of the tubular members to prevent relative rotation of each of the same with respect to the other, said means comprising co-operating recesses and projections on the enlarged ends forming shoulders adapted to engage to prevent such rotation.

1,780,713. CONTROL OR POWER LEVER MECHANISM. ANDREW J. MCEWAN, Tulsa, Okla. Filed Sept. 30, 1926. Serial No. 138,782. 2 Claims. (Cl. 74—5.)



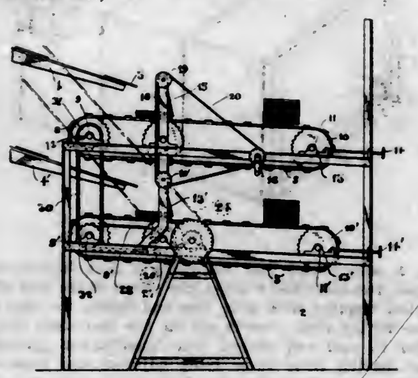
1. In a power mechanism, a casing of restricted cross-sectional dimensions, a fulcrum block of the same cross-

sectional shape as the casing and slidably engaging the walls thereof, a roller carried by said fulcrum block, a lever pivotally mounted by said roller on the block and shiftable longitudinally through the block, counteracting force applying devices acting upon the opposite ends of



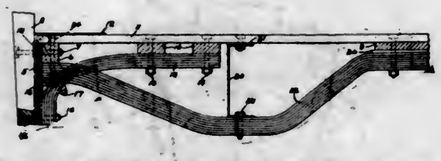
the lever, and means connected with the block and extending to the exterior of the casing whereby the block may be adjusted to vary the fulcrum point of the lever and the force applying ratios of the force applying devices acting on the ends thereof.

1,780,714. RAILWAY-RAIL ANCHOR. HARRY G. NORWOOD, Washington, D. C., assignor to Theodore F. Von Dorn, New York, N. Y. Filed Apr. 3, 1930. Serial No. 441,285. 5 Claims. (Cl. 238—330.)



1. A rail anchor formed from a single piece adapted to be fixedly secured to the rail base, comprising a body portion formed with laterally and oppositely disposed formations intermediate its ends, said body portion having a slit therethrough intermediate its ends, and a rail clamping member at each end portion thereof.

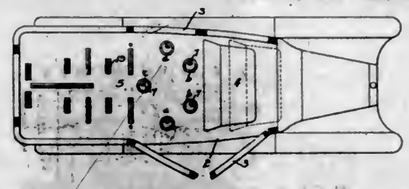
1,780,715. POULTRY MARKER. ELMER D. OLSON, Grand Island, and WILLIAM A. HORTON, Hastings, Nebr.; said Olson assignor to H. B. Horton, Des Moines, Iowa, and C. E. Linn, Hastings, Nebr. Filed Jan. 29, 1930. Serial No. 424,429. 4 Claims. (Cl. 101—26.)



4. A poultry marker comprising jaws pivotally connected and having handles extending therefrom, said jaws being each split longitudinally and formed with a socket in spaced relation to its free forward end, alined openings being formed transversely through said jaws in front of said sockets, a die fitted into the socket of one jaw and having character forming pins extending from its inner end, a block fitted into the socket of the other jaw and formed with a pocket opening through its outer end and a head at its inner end, perforations being formed through the head to receive said pins and opening into said pocket whereby the pins may be moistened with marking fluid in the pocket, a removable closure for the open outer end of said pocket, a spring to normally hold the jaws spread apart consisting of a resilient strand bent to form a U-shaped portion fitting against a side face of said marker about the pivotal connection for said jaws and having arms extending forwardly along the jaws and having their forward portions bent inwardly across the jaws and engaged in the longitudinally extending slits thereof back of the sockets, and securing bolts engaged through the transverse openings in the jaws.

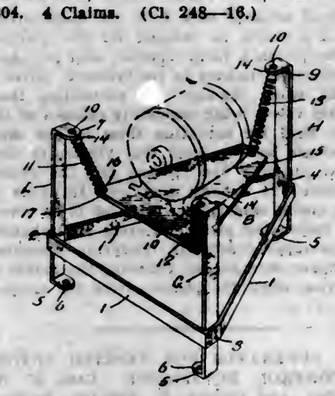
1,780,716. SHINGLE STACKER. EDWARD C. OTIS, Chicago, Ill., assignor, by mesne assignments, to Certain-teed Products Corporation, a Corporation of Maryland. Filed Feb. 26, 1927. Serial No. 171,230. 10 Claims. (Cl. 198—35.)

1. A stacker for sheet elements comprising an endless conveyor on which the sheet elements are accumulated, means against which the elements are projected for aligning said elements in a stack upon the conveyor, means for rotating the aligning means from the path of the stack when any number of elements have accumulated, and means for actuating the stack to a remote point.



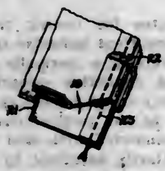
1,780,717. VEHICLE BODY CONSTRUCTION. SYDNEY PAUL, Lima, Ohio, assignor to Superior Body Company, Lima, Ohio, a Corporation of Ohio. Filed Nov. 2, 1928. Serial No. 316,660. 13 Claims. (Cl. 296—28.)

1. In a vehicle body construction, the combination of longitudinal side sills, intermediate sub-sills, a floor laid thereon, outriggers connecting the side sills to the sub-sills and rigidly secured thereto, and struts with their outer ends abutting against the inner faces of the respective side sills to prevent the latter from sagging.



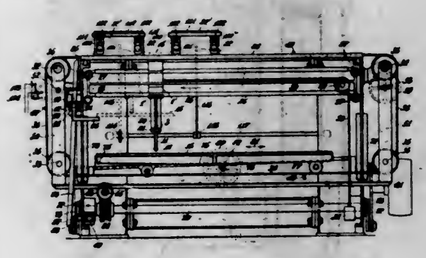
1,780,718. FUNERAL CAR. SYDNEY PAUL, Lima, Ohio, assignor to Superior Body Company, Lima, Ohio, a Corporation of Ohio. Filed July 22, 1929. Serial No. 380,082. 2 Claims. (Cl. 296—16.)

1. In a funeral car having a side opening for the introduction of a casket, a set of three turn-tables mounted in the floor structure of the car, one turn-table being disposed adjacent to said opening near the rear end thereof, another being mounted slightly inwardly and forwardly with respect to said first turn-table, and another being mounted rearwardly of the first turn-table and substan-



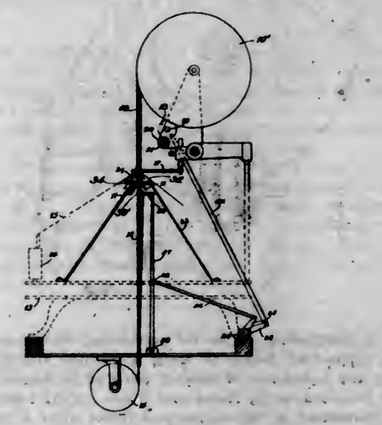
tially in the longitudinal center line of the car, said turn-tables each adapted for free turning movements in the floor plane of the car and having a casket supporting roll at its top portion in off-set relation to the table axis with its axis tangential to a circle concentric to the table axis.

1,780,719. MOTOR SUSPENSION. THORNTON W. PRICE, New Brunswick, N. J. Filed Nov. 6, 1928. Serial No. 317,604. 4 Claims. (Cl. 248—16.)



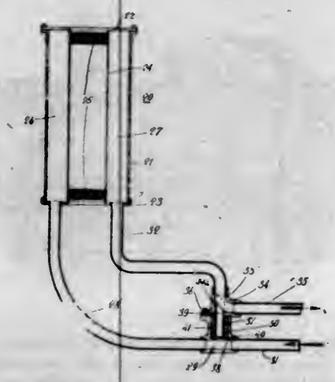
1. A motor suspension comprising a motor platform, a plurality of tension springs by which said motor platform is suspended so as to be freely movable in all lateral directions, and a plurality of substantially vertically disposed leaf springs having upper ends from which the upper ends of said tension springs are suspended, together with supporting means for said leaf springs engaging the lower end portions thereof.

1,780,720. METHOD OF FORMING VALVE BAGS. JOHN C. REDINGTON, Geneva, Ill., assignor, by mesne assignments, to St. Regis Paper Company, New York, N. Y., a Corporation of New York. Filed Sept. 17, 1928. Serial No. 306,323. 4 Claims. (Cl. 93—35.)



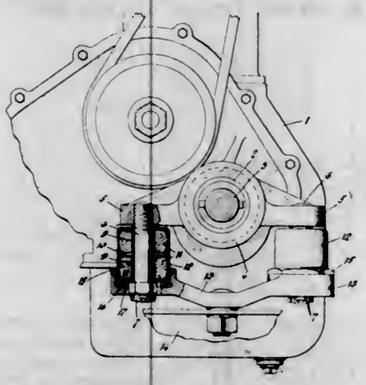
1. A method of providing a bag, comprising a plurality of relatively movable walls, with a tucked-in valve and a sleeve in that valve, which comprises first tucking in the corner of the bag to provide a valve, folding a sheet, slipping the sheet between the walls of the bag at said tucked in corner with the ends of the sheet parallel with the end of the bag, and thereafter forming an end closure across the ends of the bag and the ends of the sheet.

1,780,721. DEVICE FOR THE MANUFACTURE OF DOWELED WOODEN BOARDS. HANS SCHEIDEMANDEL, Munich, Germany. Filed June 1, 1927, Serial No. 195,627, and in Germany May 12, 1926. 11 Claims. (Cl. 144—31.)



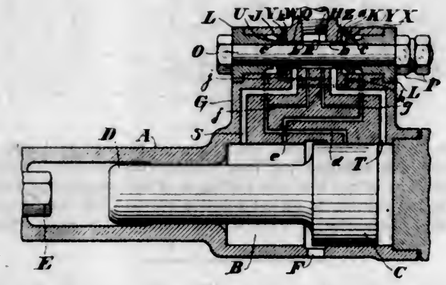
1. An apparatus for the manufacture of doweled wooden plates from boards comprising means for holding said boards in the same plane, means for pressing said boards together, and releasable means adapted to hold a dowel immovable relative to the dowel holding means against the pressure transmitted through the boards and mounted to be shiftable by the boards, as pressed, so that when the dowel has sufficiently penetrated one board it must move therewith to a corresponding distance into the opposing board.

1,780,722. ELECTRIC CONDUCTOR. EDWIN J. SCHNEIDER, Jamaica, and PETER WIGGINS, Maspeth, N. Y., assignors to Eastern Tube and Tool Co., Inc., Brooklyn, N. Y., a Corporation of New York. Filed Mar. 25, 1929. Serial No. 349,589. 7 Claims. (Cl. 173—244.)



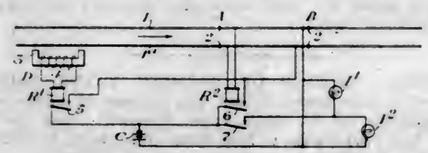
1. The herein described method of manufacturing cable of the class specified which consists in feeding insulated conductors into the machine, applying an outer casing or jacket to said conductors in forming said cable and feeding a ground conductor with the first named conductors, arranging the same between said conductors and imparting intermittent lateral movement to the ground conductor in a plane transverse to the path of movement of the first named conductors to dispose said ground conductor alternately at opposite sides of the longitudinal center of the first named conductors.

1,780,723. CONTROL FOR OIL FILTERS. CHARLES R. SHORT, Dayton, Ohio, assignor to General Motors Research Corporation, Detroit, Mich, a Corporation of Delaware. Filed June 3, 1926. Serial No. 113,488. 18 Claims. (Cl. 210—166.)



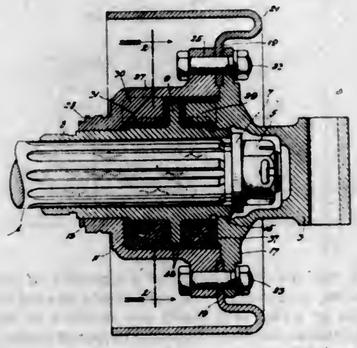
1. The combination of a filter having inlet and outlet passages and means for maintaining a substantially uniform pressure differential in the respective passages.

1,780,724. RUBBER ENGINE SUPPORT. CHARLES R. SHORT, Detroit, Mich., assignor to General Motors Research Corporation, Detroit, Mich., a Corporation of Delaware. Filed Oct. 20, 1926. Serial No. 142,945. 3 Claims. (Cl. 248—14.2.)



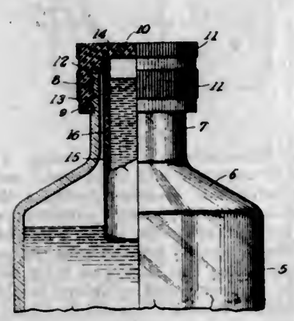
3. A cushioning device for preventing the transmission to a supporting frame of small amplitude vibrations set up by the unbalance of moving parts of an engine or like body mounted in the frame and which rigidly resists relative movement of the engine and frame after a predetermined limit is reached, including in combination with an engine and a frame, of a casing to be interposed between parts on the engine and frame and fastened to one of said parts, a stud fastened to the other of said parts, a pair of spacer sleeves on said stud, a plate-like member held between said sleeves and within the casing, a nut on the stud to hold the parts in assembled relation and elastic deformable material on opposite sides of said plate-like member and confined within said casing under initial deformation and held by the casing against deformation beyond a predetermined limit, whereby small amplitude vibrations are cushioned and large movements rigidly resisted.

1,780,725. VALVE MECHANISM FOR ROCK DRILLS. WILLIAM A. SMITH, Sr., Easton, Pa., and WILLIAM A. SMITH, Jr., Phillipsburg, N. J., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Dec. 14, 1928. Serial No. 325,987. 4 Claims. (Cl. 121—18.)



1. In a fluid actuated rock drill, the combination of a cylinder and a piston, an exhaust for the cylinder controlled by the piston, a valve chamber, inlet passages leading from the valve chamber to the cylinder, valves in the ends of the valve chamber for controlling the inlet passages, said valves being constantly exposed at one end to pressure fluid for actuating them in one direction, tripper passages leading from the cylinder to the ends of the valve chamber and opening into the cylinder at points between the exhaust port and the ends of the cylinder to enable said tripper passages to be covered by the piston before the piston uncovers the exhaust port, and leak passages constantly conveying pressure fluid into the tripper passages for throwing the valves in the other direction when the piston covers the tripper passages.

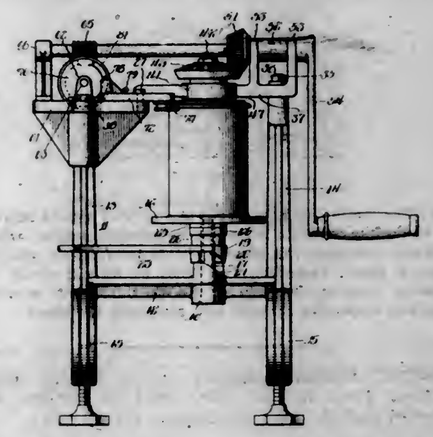
1,780,726. APPARATUS FOR TESTING AUTOMATIC TRAIN-CONTROL EQUIPMENT. CARL F. STOLTZ, Delhi, Ohio, and GEORGE W. FERLING, Indianapolis, Ind., assignors to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed June 2, 1928. Serial No. 282,457. 2 Claims. (Cl. 175—183.)



1. Roadside apparatus for testing the train carried equipment of an intermittent inductive train control system of the type involving a normally energized train carried receiver, said apparatus comprising a winding located in the trackway in such position as to have current induced therein by the receiver during the passage of a train, a relay connected with said winding and arranged to be momentarily energized by the current induced in the winding by the train carried receiver, a stick relay having a pickup circuit controlled by a front contact of said first relay and a stick circuit excluding the front contact of the first relay but including a front contact of the stick circuit, means including a track circuit located in advance of said winding for opening said stick circuit, and an indicating device controlled by said stick relay.

1,780,727. RUBBER COUPLER. PERRY L. TENNEY, Muncie, Ind., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Sept. 29, 1926. Serial No. 138,512. 4 Claims. (Cl. 64—96.)

2. A coupling comprising a driving sleeve having an intermediate radial web, vanes on each side of said web extending radially from the sleeve and axially from each side of said web, a driven member comprising an outer sleeve and a flange member secured thereto, vanes radially extended inwardly from the outer sleeve on one side of said web and vanes axially extended inwardly from said flanged member between the vanes on the other side of said web, resilient means between said vanes to resist relative movement thereof.



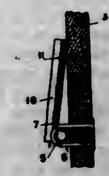
1,780,728. BOTTLE STRUCTURE. CALVIN R. WEBBER, New York, N. Y., assignor to The Packer Manufacturing Co., Inc., New York, N. Y., a Corporation of New York. Filed Jan. 9, 1929. Serial No. 331,311. 3 Claims. (Cl. 215—6.)

1. A main container having a cap provided with two internal screw threads of different diameters removably engaged over its mouth by the larger diametered threads, and a second container engaged by the smaller diametered thread to said cap to extend into the neck of said bottle.

1,780,729. CAN-CLOSING MACHINE. JULES WERY, Deerfield, Ill.; May Wery, administratrix of said Jules Wery, deceased, assignor to Samuel G. Gorsline, River Forest, Ill. Filed Aug. 15, 1928. Serial No. 299,771. 8 Claims. (Cl. 113—22.)

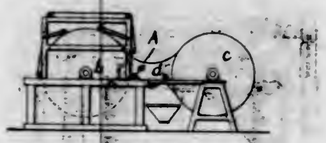
1. In a hand-portable can seaming machine, a frame comprising a base, a pair of spaced posts upwardly extending from said base and a cross member connecting the upper ends of said posts, a can holder mounted on said base, a chuck mounted on said cross member opposite said can holder for rotating a can held on said holder,

a shaft on said cross member for rotating said chuck, a seaming roller supported on said frame, and a driving connection between said roller and said shaft for moving said roller into seaming poistion by rotation on said shaft.



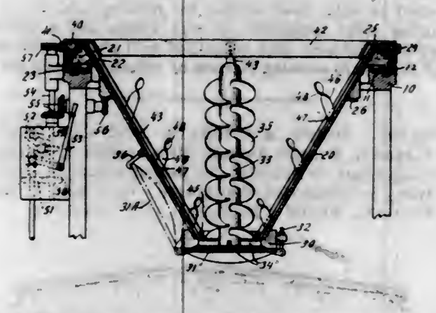
1,780,730. HOIST ANCHORAGE FOR CAR ROOFS. ALFRED R. WILSON, Detroit, Mich., assignor, by mesne assignments, to Hutchins Car Roofing Company, Detroit, Mich., a Corporation of Delaware. Filed Mar. 1, 1926. Serial No. 91,598. 15 Claims. (Cl. 105—355.)

1. The combination with a sloping car roof including a ridge pole and series of carlines, of a beam etxending longitudinally beneath said carlines in spaced relation to said roof and rigidly attached to said carlines to constitute a hoist anchorage, the said beam being located above the plane of the edge portions of said roof.



2. The combination with a car roof having a ridge pole and a series of carlines extending transversely thereof, of a beam extending longitudinally and centrally beneath said carlines in spaced relation to said roof and rigidly attached to said carlines, said beam constituting a hoist anchorage located above the plane of the ends of said carlines.

1,780,731. METAL-LATH SUPPORT. THOMAS A. WRAY, University City, Mo. Filed Feb. 13, 1930. Serial No. 428,000. 9 Claims. (Cl. 72—118.)

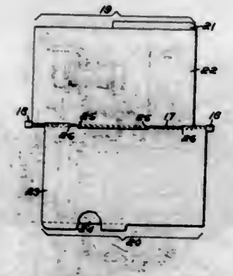


1. A bulk sheet of building material provided with a plurality of spacing strips adapted to fold against it, said strips having means to receive a fastener whereby they may be held in extended position.

1,780,732. METHOD OF AND APPARATUS FOR APPLYING CAKE REENFORCEMENTS. FRANK W. YOUNG, Verona, N. J. Filed July 27, 1926. Serial No. 125,261. 5 Claims. (Cl. 210—199.)

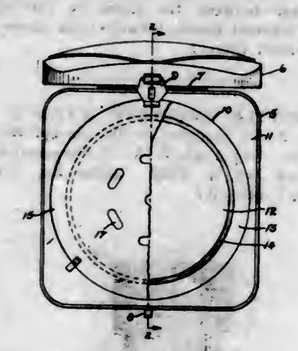
2. The method of applying a plurality of spaced strands in encircling relation about a cylindrical element which includes securing the strands in predetermined position upon a sheet, encircling the sheet so formed about the element, causing the ends of the sheet to abut, securing together respective strands and removing the sheet.

1,780,733. MIXER. KEMPTON ADAMS, Redding Ridge, Conn. Filed Apr. 12, 1928, Serial No. 269,406. Renewed Sept. 6, 1929. 18 Claims. (Cl. 83—73.)



1. A mixer comprising a receptacle arranged to be rotated about a substantially vertical axis, means therein for moving material upwardly and outwardly, and other means therein for moving material inwardly and turning it over.

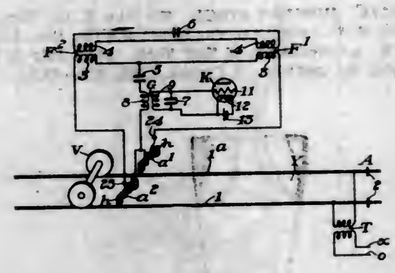
1,780,734. TOY PARACHUTE. PERRY ANDERSON, Milwaukee, Wis. Filed Oct. 31, 1929. Serial No. 403,847. 2 Claims. (Cl. 46—52.)



1. A toy parachute comprising a section of wire having a substantially S-shaped bend therein, a canopy portion secured to said section of wire, an elongated yielding band having one end secured at a distance from said bend and having its other end extended across one portion of the S-shaped bend and looped into the adjacent portion thereof, the free end of said canopy portion being engageable against the tension of said band with the first mentioned portion of the S-shaped bend to hold the canopy in doubled over position during ascent, said yielding band acting to cause disengagement of the free end of the canopy portion when the device has reached the limit of its upward movement.

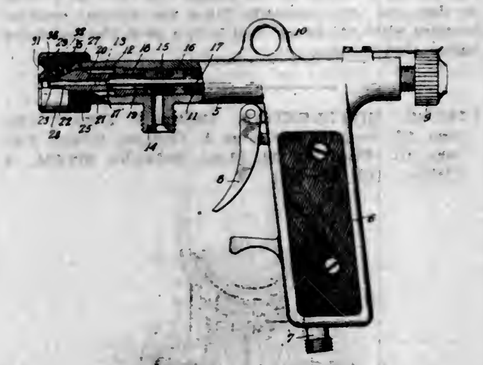
1,780,735. PAPER FILE. CHARLES E. ATTWOOD, Jamestown, N. Y., assignor to Postindex Company, Inc., Jamestown, N. Y., a Corporation of Massachusetts. Filed Feb. 27, 1930. Serial No. 431,747. 9 Claims. (Cl. 129—16.7.)

6. In a file, the combination of a plurality of sheets, a sheet carrier, said carrier and said sheets having cooperative means by which said sheets are attached to said carrier, said means having provision to permit said sheets to be moved laterally relatively to each other and relatively to said carrier.



1,780,736. COMPACT. EDWARD W. BASSETT, Toledo, Ohio, assignor to The Celma Company, Toledo, Ohio, a Corporation of Ohio. Filed July 1, 1929. Serial No. 375,186. 1 Claim. (Cl. 132—83.)

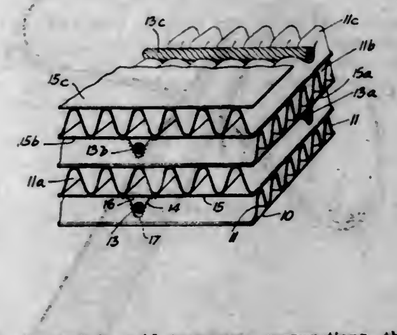
A compact comprising an outer casing, a container formed from a single piece of sheet metal and disposed within said casing, said container having a circular bottom, an annular raised platform extending about said bottom and an upstanding rim at the outer edge of said platform, a frame secured between said rim and the periphery of said casing and having an inner flange drawn over said rim to secure said container in place, and a flexible perforated partition extending across said container and resting on said platform.



1,780,737. RAILWAY-TRAFFIC-CONTROLLING APPARATUS. GEORGE W. BAUGHMAN, Pittsburgh, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Oct. 29, 1929. Serial No. 403,198. 8 Claims. (Cl. 246—63.)

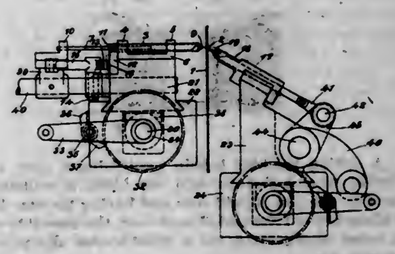
1. In combination, a stretch of railway track, means for so supplying said stretch with periodically varying current that at a given instant said current flows in one direction along one rail of the track and in the opposite direction along the opposite rail of the track, a device in which current is induced by current flowing along said first rail, a second device in which current is induced by current flowing along said opposite rail, a first transformer, a second transformer, a circuit including the primary windings of said transformers and said first and second devices so connected in series that current induced in said first device by current flowing in one direction in said first rail opposes current induced in said second device by current flowing in the opposite direction in said opposite rail, a railway traffic control means so connected

with said circuit as to complete a second circuit including said first device and the primary winding of said first transformer and to complete a third circuit including said second device and the primary winding of said second transformer, and a fourth circuit including the secondary winding of said transformers.



1,780,738. SPRAY NOZZLE. WILLARD C. BEACH, Newark, N. J. Filed Mar. 30, 1927. Serial No. 179,428. 4 Claims. (Cl. 91—45.)

1. A spray nozzle comprising a two part body, one of said parts having means to engage the barrel of a spray gun and containing an annular recess bevelled outwardly at its outer edge, the other part being connected to the first part and containing an annular air equalizing chamber, a conical guard on the last named part entering the chamber, said guard containing an inverted conical cavity presenting a thin annular edge midway the mentioned bevelled recess, a mixing chamber at the bottom of said cavity, a port leading outwardly from the mixing chamber, an angularly walled annular recess in the face of the second part, and two ports disposed diametrically opposite to lead from the outer wall of the recess to the air equalizing chamber.

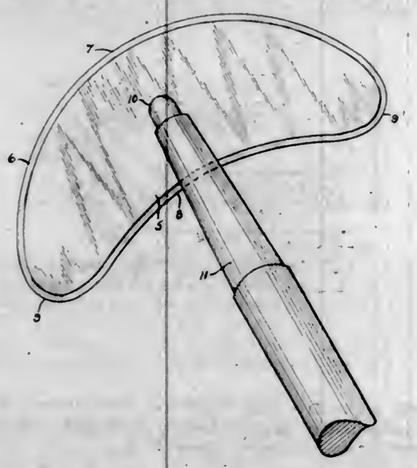


1,780,739. INSULATING BLOCK. JOSEPH BERG, Long Island City, N. Y. Filed Apr. 12, 1930. Serial No. 443,753. 4 Claims. (Cl. 154—28.)

4. A cellular insulating block comprising a plurality of corrugated sheets, each sheet having a series of transverse corrugations on one face thereof, flat sheets interposed between said corrugated sheets, relatively thick

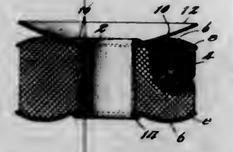
cords disposed in said transverse corrugations, thereby providing a plurality of relatively short cells, and sealing strips for the side edges of said block.

1,780,740. KNOTTING DEVICE FOR MACHINES FOR MANUFACTURING KNOTTED CARPETS. ALBERT BLUM, Rapperswil, Switzerland, assignor, by mesne assignments, to Aktiengesellschaft für Mechanische Knüpfteppiche System Boyer, Zurich. Filed July 25, 1928, Serial No. 295,813, and in Switzerland May 7, 1928. 10 Claims. (Cl. 139—4.)



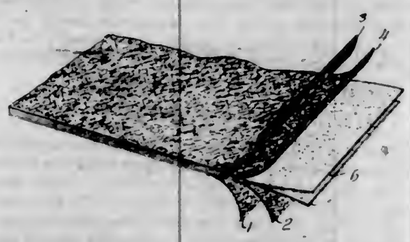
1. In a machine for the manufacture of knotted carpets, knotting tools including a catcher and a knotter, means for moving one of said tools for engaging a pile thread to draw the same over predetermined warp threads, means for turning said tool after the same has drawn the pile thread over the predetermined warp threads thereby crossing the ends of the pile thread, and means for then moving the other tool to engage the crossed pile thread to draw the same between said warp threads, thereby tying the pile thread to the warp threads.

1,780,741. WEED CUTTER. JOHN CADWALLADER, Tiffin, Ohio, assignor to The Monarch Manufacturing Company, Tiffin, Ohio, a Corporation of Ohio. Filed Mar. 7, 1929. Serial No. 344,951. 1 Claim. (Cl. 97—68.)



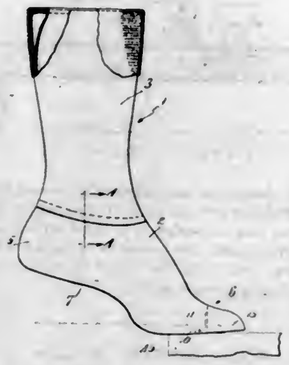
In a tool of the class described, the combination of a handle with a flat blade secured to one end thereof at such an angle that it engages the ground substantially parallel with the surface thereof when the handle is held naturally in the hands of the operator, said blade having opposite arcuate edges, the centers of both arcs being in a line

directly beneath the handle when so held, the inner arc having the greater radius, both faces of said blade having



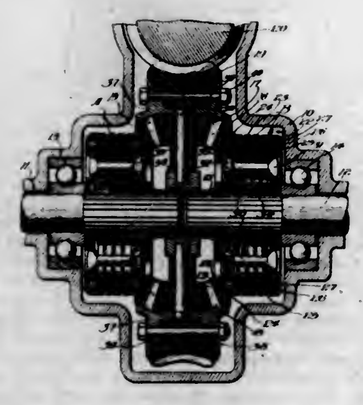
broad rounded ends merging into said arcuate edges, the entire peripheral edge of the blade being beveled toward the bottom surface thereof.

1,780,742. SEWING-MACHINE BOBBIN. ROBERT K. CLARK, Springfield, Mass., assignor to The American Thread Company, New York, N. Y., a Corporation of New Jersey. Filed Jan. 12, 1929. Serial No. 332,119. 6 Claims. (Cl. 112—251.)



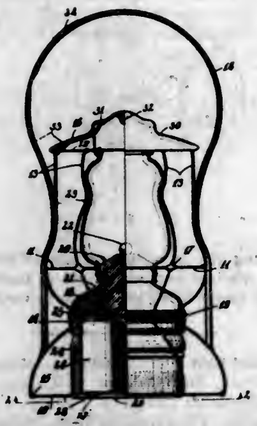
1. A sewing machine bobbin comprising a core, a mass of thread wound thereon into cop form, a resilient disk secured to one end of said core and having its edge located in a plane beyond the end of said core, the rear side of said disk being unsupported for a considerable distance from its periphery.

1,780,743. LAMINATED WALL BOARD. PHILIP W. CODWISE, Kenmore, N. Y., assignor to Certain-teed Products Corporation, New York, N. Y., a Corporation of Maryland. Original application filed Feb. 23, 1928, Serial No. 256,091. Divided and this application filed June 13, 1928. Serial No. 284,962. 9 Claims. (Cl. 154—2.)



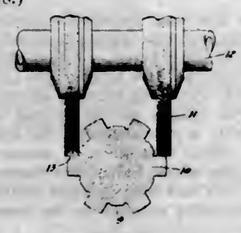
9. The process which comprises beating into a pulp with water a mixture of substantially 35 percent paper waste, 35 percent wood flour and 30% ground wood, shaping said pulp into plies, compressing a plurality of such plies between plies of sized wood pulp screenings and sawdust to form a coherent layer with rough surfaces and a thickness of about .080 inches and ultimately cementing a plurality of said layers together to form a rigid board serviceable as a plaster base board substantially as described.

1,780,744. HOSIERY FORM. WILLIAM J. DE WITT, Auburn, N. Y., assignor to The Shoe Form Co., Inc., Auburn, N. Y., a Corporation of New York. Filed July 3, 1928. Serial No. 290,252. 7 Claims. (Cl. 223—18.3.)



1. A hosiery form replicating the human leg and foot and having a weight at the forepart of the foot portion so that the form normally takes the natural position assumed when the human foot is in a shoe, the heel being higher than the toe.

1,780,745. DIFFERENTIAL. GEORGE F. ECKART, Chicago, Ill., assignor to George A. Chritton, trustee, Chicago, Ill. Filed Jan. 14, 1929. Serial No. 332,504. 3 Claims. (Cl. 74—99.)

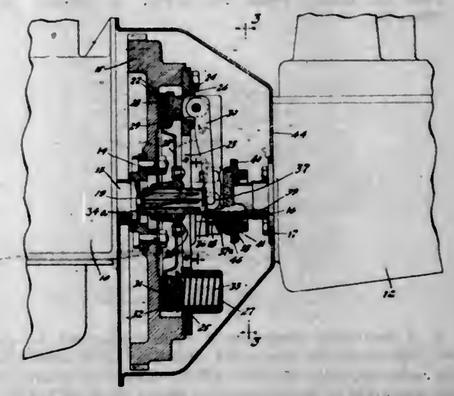


1. In a differential, oppositely extending axle shafts, flanged members keyed thereon, opposed bevel gears rotatably mounted on said flanged members, helical spring means connecting each of said flanged members and its bevel gear, radius rods connecting said bevel gear and flanged member, and means for simultaneously driving said bevel gears.

1,780,746. LAMP. RODOLFO E. ELIZONDO, Monterrey, Mexico. Filed June 26, 1929. Serial No. 373,728. 3 Claims. (Cl. 240—10.5.)

1. A lamp of the class described, comprising a wire frame, a block supported therein, a lamp mounted on the block, a lamp glass encircling the lamp, battery cells mounted in the block and electrically connected with the lamp, springs swivelingly mounted for holding the battery cells in place and formed with slots, and means for simultaneously moving said springs into inoperative positions including pins engaging in said slots and supported on a ring adjustable in said block.

1,780,747. FINISHING SPLINE SHAFTS. FORREST T. ELLIS, Detroit, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed June 16, 1926. Serial No. 116,353. 5 Claims. (Cl. 51—278.)

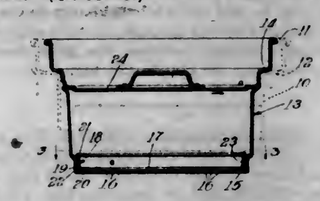


1. The method of finishing a spline shaft which consists in rocking to and fro and moving the shaft axially and simultaneously grinding the surface between two adjacent splines.

1,780,748. LITTER-GATHERING DEVICE. ALBERT H. FISHER, East Cleveland, Ohio, assignor to Herbert B. Sabin, Cleveland, Ohio. Filed Sept. 30, 1929. Serial No. 396,210. 4 Claims. (Cl. 55—10.)

1. An article of the character described having in combination a cross member, adapted in use to provide a substantially horizontal support, a handle connected with said cross member, and a plurality of outwardly extending spaced flexible rubber members mounted on said cross member and of increasing resiliency toward their free ends.

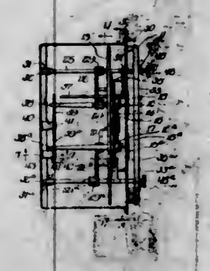
1,780,749. CLUTCH. ALBERT W. FREHSE and CLEMENTS G. BELDEN, Detroit, Mich., assignors to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed June 21, 1926. Serial No. 117,482. 2 Claims. (Cl. 192—110.)



1. The combination with a clutch casing and a clutch mounted therein, of a clutch shaft, a clutch release collar operatively in engagement with the said shaft and provided with a curved concave bearing surface, a bearing mounted about the shaft, an annular antifriction shoe carried in the said bearing for engagement with the curved surface of the release collar, an oscillating lever fulcrumed within the said casing and having bifurcated arms engaging with the said bearing, a spring extending about the transverse axis of the said lever and engaging with lugs formed on the sides of the bearing whereby the latter is urged rearwardly out of engagement with the release collar.

1,780,750. METHOD OF PREPARING CELLULOSE PULP. HARRY L. HORN, New York, N. Y., assignor to Bagasse Development Inc., a Corporation of New York. Filed Dec. 2, 1929. Serial No. 411,219. 6 Claims. (Cl. 92—9.)

1. A method for preparing cellulose pulp from cellulose bearing material such as bagasse, straws, grasses, wood, cornstalk and the like, consisting in simultaneously cooking, beating and electrically and chemically treating the cellulose bearing material.



1,780,751. COFFEE-MAKING DEVICE. JOHN D. HOUCK, Chicago, Ill. Filed Dec. 8, 1928. Serial No. 324,648. 2 Claims. (Cl. 53—3.)
